(CAC/DOCKET NUMBER/EPID 000224/04003392/L-2019-DDP-0000)

Dear Mr. Patterson:

By letter dated January 4, 2019 (Agencywide Documents Access and Management System [ADAMS] Accession Number ML19008A046), Honeywell submitted its triennial decommissioning funding plan update for the Metropolis Works facility to the U.S. Nuclear Regulatory Commission (NRC) as per License Condition 25 and Title 10 of the *Code of Federal Regulations* (10 CFR) Section 40.36(d) for staff review and approval. The NRC staff performed an acceptance review of your application to determine if the application contains sufficient technical information to allow the NRC staff to complete the detailed technical review.

The purpose of this letter is to advise you, based on the NRC staff's acceptance review, the application does not contain sufficient technical information for us to initiate the review. The information needed to continue the NRC staff's review is described in the enclosure of this letter as "Requests for Supplemental Information" (RSI).

The NRC staff requests a clarification meeting or teleconference to provide Honeywell with the opportunity to discuss the RSIs and to establish a specific date that any supplemental information will be submitted to support the NRC's timely review. If the staff accepts the application for review based on supplemental information Honeywell will be advised of the schedule by separate correspondence.

In accordance with 10 CFR Part 2.390 of the NRC's "Agency Rules of Practice and Procedure," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of NRC's ADAMS. ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

If you have any questions regarding this action, please contact Mr. David Tiktinsky by phone at 301-415-8740, or via e-mail at David.Tiktinsky@nrc.gov.
