Dear Mr. McDonald:

Operating information for Surry Power Station, Unit Nos. 1 and 2,  
for the month of September, 1976 is attached. A corrected copy of data for  
August 1976 is also attached.

Very truly yours,

## DAILY UNIT POWER LEVEL FORM INSTRUCTIONS

On this form, list the average daily unit power level in MWe-net for each day in the reporting month. Compute to the nearest whole megawatt.

These figures will be used to plot a graph for each reporting month. Note that by using maximum dependable capacity for the net electrical rating of the unit, there may be occasions when the daily average power level exceeds the 100% line (or the restricted power level line). In such cases, the average daily unit power output sheet should be footnoted to explain the apparent anomaly.
