

VIRGINIA ELECTRIC AND POWER COMPANY  
RICHMOND, VIRGINIA 23261

September 13, 1976

Mr. William McDonald, Director  
Office of Management Information and  
Program Control  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Serial No. 182/021974  
PO&M/ALH:jlf

Docket Nos. 50-280  
50-281  
License Nos. DPR-32  
DPR-37

Dear Mr. McDonald:

Operating information for Surry Power Station, Unit Nos. 1 and 2, for the month of August 1976 is attached. Corrected copies of data for March through July 1976 on Unit No. 1 and April through July 1976 on Unit No. 2 are also attached.

Very truly yours,

C. M. Stallings  
Vice President-Power Supply  
and Production Operations

REGULATORY DOCKET FILE COPY

16	<u>0</u>		

## DAILY UNIT POWER LEVEL FORM INSTRUCTIONS

On this form, list the average daily unit power level in MWe-net for each day in the reporting month. Compute to the nearest whole megawatt.

These figures will be used to plot a graph for each reporting month. Note that by using maximum dependable capacity for the net electrical rating of the unit, there may be occasions when the daily average power level exceeds the 100% line (or the restricted power level line). In such cases, the average daily unit power output sheet should be footnoted to explain the apparent anomaly.
