RE: License Number 06-30624-01

Dear Mr. Gallagher,

Please accept this correspondence as confirmation that Tritium (Hydrogen-3) has never been used at Invicro's New Haven facility. Additionally, there are no intended research needs for Invicro to use such isotopes in our current work plan.

We would like to formally request that this isotope, Tritium, be removed from Invicro's current NRC license.

Sincerely,
