Summary of Meeting:

On April 18, 2019, staff from the NRC conducted a public meeting with representatives from SNC to discuss issues associated with the safety review of licensing actions for SNC's VEGP Units 3 and 4. Specifically, the meeting discussed SNC's planned LAR for crediting previously completed ADS blowdown first three plant tests performed at AP1000 plants in China to the VEGP Units 3 and 4.

SNC briefed their presentation to the staff. The staff asked clarifying questions and advised SNC that they expected to perform an audit of the various test and quality assurance reports referred to in the draft LAR. SNC stated that only a combined license condition and specific Updated Final Safety Analysis Report Chapter 14 information will be affected by this LAR, and that no inspections, tests, analyses, and acceptance criteria will be impacted.

SNC also stated that they planned to submit the LAR by April 30, 2019, and specified a requested approval date of October 30, 2019. The staff inquired about whether the requested date could be extended to November 30, 2019.

The meeting included a closed session to discuss proprietary aspects of the LAR.

At the conclusion of the open session of the meeting, there was an opportunity for the public to provide comments and ask questions. There were no comments or questions from the public.
