SUBJECT: APPLICATION FOR AMENDMENT TO CERTIFICATE OF COMPLIANCE FOR
THE MODEL NO. RT-100 PACKAGE – ACCEPTED FOR REVIEW

Dear Mr. Sanchette:

By letter dated January 4, 2019 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML19028A307), as supplemented March 22, 2019 (ADAMS) Accession No. ML19098A844), Robatel Technologies, LLC requested renewal of Certificate of Compliance No. 9365. In addition, Robatel Technologies, LLC made changes to the Operations and Maintenance sections of the safety analysis report. The U.S. Nuclear Regulatory Commission (NRC) staff performed an acceptance review of your application and determined it contains sufficient technical information in scope and depth to allow the staff to complete a detailed technical review.

We have established a schedule for the review and estimated that the staff may need approximately 150 hours to complete its review. The schedule allows for the staff to issue a request for additional information (RAI) in May 2019 and, if a second RAI is not needed, a CoC in August 2019, based on you responding to the first RAI in June 2019. In general, no additional changes to the application should be submitted except for changes resulting from your response to an RAI.

In addition, because you submitted your renewal request in accordance with Title 10 of the *Code of Federal Regulations* Section 71.38(b), the certificate shall not be considered expired until NRC staff completes its review of your application. If you have any questions regarding this matter, please contact me at (301) 415-6877.

Sincerely,

/RA/

Chris Allen, Project Manager
Spent Fuel Licensing Branch
Division of Spent Fuel Management
Office of Nuclear Material Safety
and Safeguards
