(301-415-0955)
Foreword

Digests and indexes for issuances of the Commission (CLI), the Atomic Safety and Licensing Board Panel (LBP), the Administrative Law Judges (ALJ), the Directors’ Decisions (DD), and the Decisions on Petitions for Rulemaking (DPRM) are presented in this document. These digests and indexes are intended to serve as a guide to the issuances.

Information elements common to the cases heard and ruled upon are:

- Case name (owner(s) of facility)
- Full text reference (volume and pagination)
- Issuance number
- Issues raised by appellants
- Legal citations (cases, regulations, and statutes)
- Name of facility, Docket number
- Subject matter of issues and/or rulings
- Type of hearing (operating license, operating license amendment, etc.)
- Type of issuance (memorandum, order, decision, etc.)

These information elements are displayed in one or more of five separate formats arranged as follows:

1. Case Name Index
   The case name index is an alphabetical arrangement of the case names of the issuances. Each case name is followed by the type of hearing, the type of issuance, docket number, issuance number, and full text reference.

2. Headers and Digests
   The headers and digests are presented in issuance number order as follows: the Commission (CLI), the Atomic Safety and Licensing Board Panel (LBP), the Administrative Law Judges (ALJ), the Directors’ Decisions (DD), and the Decisions on Petitions for Rulemaking (DPRM).

   The header identifies the issuance by issuance number, case name, facility name, docket number, type of hearing, date of issuance, and type of issuance.

   The digest is a brief narrative of an issue followed by the resolution of the issue and any legal references used in resolving the issue. If a given issuance covers more than one issue, then separate digests are used for each issue and are designated alphabetically.

3. Legal Citations Index
   This index is divided into four parts and consists of alphabetical or alpha-numerical arrangements of Cases, Regulations, Statutes, and Others. These citations are listed as given in the issuances. Changes in regulations and statutes may have occurred to cause changes in the number or name and/or applicability of the citation. It is therefore important to consider the date of the issuance.

   The references to cases, regulations, statutes, and others are generally followed by phrases that show the application of the citation in the particular issuance. These phrases are followed by the issuance number and the full text reference.
4. Subject Index

Subject words and/or phrases, arranged alphabetically, indicate the issues and subjects covered in the issuances. The subject headings are followed by phrases that give specific information about the subject, as discussed in the issuances being indexed. These phrases are followed by the issuance number and the full text reference.

5. Facility Index

This index consists of an alphabetical arrangement of facility names from the issuance. The name is followed by docket number, type of hearing, date, type of issuance, issuance number, and full text reference.
CASE NAME INDEX

AEROTEST OPERATIONS, INC.
LICENSE RENEWAL, LICENSE TRANSFER, AND ENFORCEMENT; MEMORANDUM AND ORDER; Docket Nos. 50-228-LR, 50-228-LT, 50-228-EA; CLI-14-5, 79 NRC 254 (2014)
LICENSE TRANSFER; MEMORANDUM AND ORDER; Docket No. 50-228-LT; CLI-15-26, 82 NRC 408 (2015)
LICENSE TRANSFER; CERTIFICATION OF RECORD TO COMMISSION; Docket No. 50-228-LT (ASLBP No. 14-931-01-LT-BD01); LBP-14-10, 80 NRC 85 (2014)
ALL OPERATING BOILING WATER REACTOR LICENSEES WITH MARK I AND MARK II CONTAINMENTS; ORDER MODIFYING LICENSES WITH REGARD TO RELIABLE HARDENED CONTAINMENT VENTS (EFFECTIVE IMMEDIATELY)
ENFORCEMENT; MEMORANDUM AND ORDER; Docket No. EA-12-050; CLI-13-2, 77 NRC 39 (2013)
ENFORCEMENT; MEMORANDUM AND ORDER (Denying Petitions for Hearing); Docket No. EA-12-050 (ASLBP No. 12-918-01-EA-BD01); LBP-12-14, 76 NRC 1 (2012)
ALL OPERATING REACTOR LICENSEES REQUEST FOR ACTION; REVISED DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206; DD-14-2, 79 NRC 489 (2014)
REQUEST FOR ACTION; DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206; DD-15-6, 81 NRC 884 (2015)
ALL POWER REACTOR LICENSEES AND HOLDERS OF CONSTRUCTION PERMITS IN ACTIVE OR DEFERRED STATUS; ORDER MODIFYING LICENSES WITH REGARD TO RELIABLE SPENT FUEL POOL INSTRUMENTATION (EFFECTIVE IMMEDIATELY)
ENFORCEMENT; MEMORANDUM AND ORDER; Docket No. EA-12-051; CLI-13-2, 77 NRC 39 (2013)
ENFORCEMENT; MEMORANDUM AND ORDER (Denying Petitions for Hearing); Docket No. EA-12-051 (ASLBP No. 12-918-01-EA-BD01); LBP-12-14, 76 NRC 1 (2012)
AP1000 DESIGN CERTIFICATION AMENDMENT (10 C.F.R. Part 52)
REQUEST FOR ACTION; MEMORANDUM AND ORDER; Docket No. NRC-2010-0131 (RIN 3150-AB1); CLI-11-5, 74 NRC 141 (2011)
AREVA ENRICHMENT SERVICES, LLC
MATERIALS LICENSE; MEMORANDUM AND ORDER; Docket No. 70-7015; CLI-11-4, 74 NRC 1 (2011)
MATERIALS LICENSE; FIRST PARTIAL INITIAL DECISION (Uncontested/Mandatory Hearing on Safety Matters); Docket No. 70-7015-ML (ASLBP No. 10-899-02-ML-BD01); LBP-11-11, 73 NRC 455 (2011)
MATERIALS LICENSE; SECOND AND FINAL PARTIAL INITIAL DECISION (Uncontested/Mandatory Hearing on Environmental Matters); Docket No. 70-7015-ML (ASLBP No. 10-899-02-ML-BD01); LBP-11-26, 74 NRC 499 (2011)
## CASE NAME INDEX

**BOILING-WATER REACTOR OPERATING POWER REACTORS WITH MARK I AND MARK II CONTAINMENT DESIGNS**

**CALVERT CLIFFS 3 NUCLEAR PROJECT, LLC**

COMBINED LICENSE; MEMORANDUM AND ORDER; Docket No. 52-016-COL; CLI-12-16, 76 NRC 63 (2012); CLI-13-4, 77 NRC 101 (2013); CLI-14-8, 80 NRC 71 (2014)

COMBINED LICENSE; PARTIAL INITIAL DECISION (Ruling on Contention 10C); Docket No. 52-016-COL (ASLBP No. 09-874-02-COL-BD01); LBP-12-17, 76 NRC 71 (2012)

COMBINED LICENSE ORDER (Ruling on Joint Intervenors’ Proposed New Contention 11); Docket No. 52-016-COL (ASLBP No. 09-874-02-COL-BD01); LBP-12-18, 76 NRC 127 (2012)

COMBINED LICENSE ORDER (Granting Summary Disposition of Contention 1); Docket No. 52-016-COL (ASLBP No. 09-874-02-COL-BD01); LBP-12-19, 76 NRC 184 (2012)

COMBINED LICENSE ORDER (Terminating the Adjudicatory Proceeding); Docket No. 52-016-COL (ASLBP No. 09-874-02-COL-BD01); LBP-12-22, 76 NRC 443 (2012)

**CALVERT CLIFFS NUCLEAR PROJECT, LLC**

REQUEST FOR ACTION; MEMORANDUM AND ORDER; Docket No. 52-016-COL; CLI-11-5, 74 NRC 141 (2011)

**CHARLESSA C. SMITH**

SPECIAL PROCEEDING; DECISION (Granting Demand for Hearing); Docket No. 55-23694-SP (ASLBP No. 13-925-01-SP-BD01); LBP-13-3, 77 NRC 82 (2013)

SPECIAL PROCEEDING; MEMORANDUM AND ORDER (Granting Motion to Compel Disclosure); Docket No. 55-23694-SP (ASLBP No. 13-925-01-SP-BD01); LBP-13-5, 77 NRC 233 (2013)

SPECIAL PROCEEDING; INITIAL DECISION; Docket No. 55-23694-SP (ASLBP No. 13-925-01-SP-BD01); LBP-14-2, 79 NRC 131 (2014)

**CROW BUTTE RESOURCES, INC.**

MATERIALS LICENSE AMENDMENT; MEMORANDUM AND ORDER; Docket No. 40-8943; CLI-12-4, 75 NRC 154 (2012); CLI-14-2, 79 NRC 11 (2014); CLI-15-17, 82 NRC 33 (2015)

MATERIALS LICENSE AMENDMENT; MEMORANDUM (Bringing Matter of Concern to Commission’s Attention); Docket No. 40-8943 (ASLBP No. 08-867-08-OLA-BD01); LBP-11-30, 74 NRC 627 (2011)

MATERIALS LICENSE AMENDMENT; MEMORANDUM AND ORDER (Ruling on Intervention Petitions); Docket No. 40-8943-MLA-2 (ASLBP No. 13-926-01-MLA-BD01); LBP-13-6, 77 NRC 253 (2013)

MATERIALS LICENSE AMENDMENT; MEMORANDUM AND ORDER (Denying Applications for Stay of Source Materials License SUA-1534); Docket No. 40-8943 (ASLBP No. 08-867-02-OLA-BD01); LBP-15-2, 81 NRC 48 (2015)

MATERIALS LICENSE AMENDMENT; MEMORANDUM AND ORDER (Ruling on Proposed Contentions Related to the Environmental Assessment); Docket No. 40-8943 (ASLBP No. 08-867-02-OLA-BD01); LBP-15-11, 81 NRC 401 (2015)

MATERIALS LICENSE AMENDMENT; MEMORANDUM AND ORDER (Denying Motion to Admit Additional Contentions Based on EPA Proposed Rules); Docket No. 40-8943 (ASLBP No. 08-867-02-OLA-BD01); LBP-15-15, 81 NRC 598 (2015)

**CSML LLC**

REQUEST FOR ACTION; DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206; Docket No. 030-38594 (License No. 20-35022-01); DD-14-4, 79 NRC 506 (2014)

**DAVID GEISEN**

ENFORCEMENT; MEMORANDUM AND ORDER (Denying Application for Attorneys’ Fees); Docket No. 1A-05-052 (ASLBP No. 06-845-01-EA); LBP-11-8, 73 NRC 349 (2011)

**DETROIT EDISON COMPANY**

COMBINED LICENSE; MEMORANDUM AND ORDER; Docket No. 52-033-COL; CLI-12-16, 76 NRC 63 (2012)

COMBINED LICENSE; MEMORANDUM AND ORDER (Denying Motions for Summary Disposition of Contentions 6 and 8; Denying in Part and Granting in Part Motion to Strike); Docket No. 52-033-COL (ASLBP No. 09-880-05-OLA-BD01); LBP-11-14, 73 NRC 591 (2011)
CASE NAME INDEX

COMBINED LICENSE; MEMORANDUM AND ORDER (Ruling on Motion for Leave to Late-File Amended and New Contentions and Motion to Admit New Contentions); Docket No. 52-033-COL (ASLBP No. 09-880-05-COL-BD01); LBP-12-12, 75 NRC 742 (2012)

COMBINED LICENSE; MEMORANDUM AND ORDER (Granting Motion for Summary Disposition of Contention 6; Denying Motions for Summary Disposition of Contentions 8 and 15; Denying Motion to Admit Contention 25; and Resolving Remaining Issues Regarding Contentions 20 and 21); Docket No. 52-033-COL (ASLBP No. 09-880-05-COL-BD01); LBP-12-23, 76 NRC 445 (2012)

COMBINED LICENSE; MEMORANDUM AND ORDER (Granting Motion for Summary Disposition of Contention 23 Merit Sua Sponte Review Pursuant to 10 C.F.R. § 2.340(b) and Requesting Commission Approval); Docket No. 52-033-COL (ASLBP No. 09-880-05-COL-BD01); LBP-14-9, 80 NRC 15 (2014)

REQUEST FOR ACTION; MEMORANDUM AND ORDER; Docket No. 52-033-COL; CLI-11-5, 74 NRC 141 (2011)

DOMINION VIRGINIA POWER

COMBINED LICENSE; MEMORANDUM AND ORDER; Docket No. 52-017-COL; CLI-12-14, 75 NRC 692 (2012); CLI-12-16, 76 NRC 63 (2012); CLI-12-17, 76 NRC 207 (2012); CLI-14-7, 80 NRC 1 (2014); CLI-14-8, 80 NRC 71 (2014); CLI-14-9, 80 NRC 147 (2014); CLI-15-4, 81 NRC 221 (2015); CLI-15-10, 81 NRC 535 (2015); CLI-15-15, 81 NRC 803 (2015)

COMBINED LICENSE; MEMORANDUM AND ORDER (Declining to Admit New Contentions 12 and 13); Docket No. 52-017-COL (ASLBP No. 08-863-01-COL); LBP-11-10, 73 NRC 424 (2011)

COMBINED LICENSE; MEMORANDUM AND ORDER (Denying Dominion’s Motion for Clarification of LBP-11-10); Docket No. 52-017-COL (ASLBP No. 08-863-01-COL); LBP-11-22, 74 NRC 259 (2011)

COMBINED LICENSE; MEMORANDUM AND ORDER (Denying BREDL’s Motion to Reopen and Admit Contention 14); Docket No. 52-017-COL (ASLBP No. 08-863-01-COL); LBP-14-8, 79 NRC 519 (2014)

REQUEST FOR ACTION; MEMORANDUM AND ORDER; Docket No. 52-017-COL; CLI-11-5, 74 NRC 141 (2011)

DTE ELECTRIC COMPANY

COMBINED LICENSE; MEMORANDUM AND ORDER; Docket No. 52-033-COL; CLI-14-7, 80 NRC 1 (2014); CLI-14-8, 80 NRC 71 (2014); CLI-14-9, 80 NRC 147 (2014); CLI-14-10, 80 NRC 157 (2014); CLI-15-1, 81 NRC 1 (2015); CLI-15-4, 81 NRC 221 (2015); CLI-15-10, 81 NRC 535 (2015); CLI-15-12, 81 NRC 555 (2015)

COMBINED LICENSE; PARTIAL INITIAL DECISION (Ruling on Contentions 8 and 15); Docket No. 52-033-COL (ASLBP No. 09-880-05-COL-BD01); LBP-14-7, 79 NRC 451 (2014)

COMBINED LICENSE; ORDER (Terminating Licensing Board Adjudicatory Proceeding); Docket No. 52-033-COL (ASLBP No. 09-880-05-COL-BD01); LBP-14-7, 79 NRC 452 (2015)

OPERATING LICENSE RENEWAL; MEMORANDUM AND ORDER (Ruling on Petitions to Intervene and Requests for a Hearing); Docket No. 50-341-LR (ASLBP No. 14-933-01-LR-BD01); LBP-15-5, 81 NRC 249 (2015)

OPERATING LICENSE RENEWAL; ORDER (Terminating Proceeding); Docket No. 50-341 (ASLBP No. 14-933-01-LR-BD01); LBP-15-25, 82 NRC 161 (2015)

DUKE ENERGY CAROLINAS, LLC

COMBINED LICENSE; MEMORANDUM AND ORDER; Docket Nos. 52-018-COL, 52-019-COL; CLI-12-16, 76 NRC 63 (2012); CLI-14-8, 80 NRC 71 (2014); CLI-14-9, 80 NRC 147 (2014); CLI-15-4, 81 NRC 221 (2015); CLI-15-10, 81 NRC 535 (2015); CLI-15-15, 81 NRC 803 (2015)

COMBINED LICENSE; MEMORANDUM AND ORDER; Docket Nos. 52-025-COL, 52-026-COL; CLI-12-7, 75 NRC 379 (2012)

COMBINED LICENSE; MEMORANDUM AND ORDER (Denying Motions to Reopen Closed Proceedings and Intervention Petition/Hearing Request as Premature); Docket Nos. 52-018-COL, 52-019-COL (ASLBP No. 11-913-01-COL-BD01); LBP-11-27, 74 NRC 591 (2011)
### CASE NAME INDEX

| Combined License: Memorandum and Order (Denying Motions to Reinstate Contention) | Docket Nos. 52-018-COL, 52-019-COL (ASLBP No. 11-913-01-COL-BD01); LBP-11-36, 74 NRC 768 (2011) |
| Request for Action: Memorandum and Order | Docket Nos. 52-018-COL, 52-019-COL; CLI-11-5, 74 NRC 141 (2011) |
| Duke Energy Florida, Inc. | Request for Action; Director’s Decision Under 10 C.F.R. § 2.206; Docket No. 50-302 |
| (License No. DPR-72); DD-14-3, 79 NRC 500 (2014) |
| Energy Northwest | License Renewal; Memorandum and Order | Docket No. 50-397-LR; CLI-12-7, 75 NRC 379 (2012) |
| License Renewal; Memorandum and Order (Denying Motions to Reopen Closed Proceedings and Intervention Petition/Hearing Request as Premature) | Docket No. 50-397-LR (ASLBP No. 11-912-03-LR-BD01); LBP-11-27, 74 NRC 591 (2011) |
| License Renewal; Memorandum and Order (Denying Motions to Reinstate Contention) | Docket No. 50-397-LR (ASLBP No. 11-912-03-LR-BD01); LBP-11-36, 74 NRC 768 (2011) |
| Request for Action; Memorandum and Order | Docket No. 50-397-LR; CLI-11-5, 74 NRC 141 (2011) |
| Energysolutions, LLC | Import and Export Licenses: Memorandum and Order | Docket Nos. 110-05896 (Import), 110-05897 (Export); CLI-11-3, 73 NRC 613 (2011) |
| Entergy Nuclear Fitzpatrick, LLC | Request for Action; Director’s Decision Under 10 C.F.R. § 2.206; Docket No. 50-333 (License No. DPR-59); DD-15-8, 82 NRC 107 (2015) |
| Entergy Nuclear Generation Company | Operating License Renewal; Memorandum and Order | Docket No. 50-293-LR; CLI-12-1, 75 NRC 39 (2012); CLI-12-3, 75 NRC 132 (2012); CLI-12-6, 75 NRC 352 (2012); CLI-12-10, 75 NRC 479 (2012); CLI-12-15, 75 NRC 704 (2012); CLI-12-21, 76 NRC 491 (2012) |
| Operating License Renewal; Partial Initial Decision (Rejecting, Upon Remand, Pilgrim Watch’s Challenge to Meteorological Modeling in SAMA Analysis in Entergy’s License Renewal Application) | Docket No. 50-293-LR (ASLBP No. 06-848-02-LR); LBP-11-18, 74 NRC 29 (2011) |
| Operating License Renewal; Memorandum and Order (Denying Pilgrim Watch’s Requests for Hearing on Certain New Contentions) | Docket No. 50-293-LR (ASLBP No. 06-848-02-LR); LBP-11-20, 74 NRC 65 (2011) |
| Operating License Renewal; Memorandum and Order (Corrected Version of September 8, 2011 Memorandum and Order Denying Pilgrim Watch’s Requests for Hearing on New Contentions Relating to Fukushima Accident) | Docket No. 50-293-LR (ASLBP No. 06-848-02-LR); LBP-11-23, 74 NRC 287 (2011) |
| Operating License Renewal; Memorandum and Order (Denying Commonwealth of Massachusetts’ Request for Stay, Motion for Waiver, and Request for Hearing on a New Contention Relating to Fukushima Accident) | Docket No. 50-293-LR (ASLBP No. 06-848-02-LR); LBP-11-35, 74 NRC 701 (2011) |
| Operating License Renewal; Memorandum and Order (Denying Pilgrim Watch’s Request for Hearing on a New Contention Relating to Fukushima Accident) | Docket No. 50-293-LR (ASLBP No. 06-848-02-LR); LBP-12-1, 75 NRC 1 (2012) |
| Operating License Renewal; Memorandum and Order (Denying Petition for Intervention and Request to Reopen the Proceeding and Admit New Contention) | Docket No. 50-293-LR (ASLBP No. 12-917-05-LR-BD01); LBP-12-10, 75 NRC 633 (2012) |
| Operating License Renewal; Memorandum and Order (Denying Petition for Intervention and Request to Reopen Proceeding and Admit New Contention) | Docket No. 50-293-LR (ASLBP No. 12-920-07-LR-BD01); LBP-12-11, 75 NRC 731 (2012) |
OPERATING LICENSE RENEWAL; MEMORANDUM AND ORDER (Denying Petition for Intervention and Request to Reopen Proceeding and Admit New Contention); Docket No. 50-293-LR (ASLBP No. 12-921-08-LR-BD01); LBP-12-16, 76 NRC 44 (2012)
REQUEST FOR ACTION; MEMORANDUM AND ORDER; Docket No. 50-293-LR; CLI-11-5, 74 NRC 141 (2011)
REQUEST FOR ACTION; DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206; Docket No. 50-293 (License No. DPR-35); DD-15-8, 82 NRC 107 (2015)
ENTERGY NUCLEAR INDIAN POINT 2, LLC
REQUEST FOR ACTION; DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206; Docket No. 50-247; DD-12-3, 76 NRC 416 (2012); DD-13-1, 77 NRC 347 (2013)
ENTERGY NUCLEAR INDIAN POINT 3, LLC
REQUEST FOR ACTION; DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206; Docket No. 50-286; DD-12-3, 76 NRC 416 (2012)
ENTERGY NUCLEAR OPERATIONS, INC.
OPERATING LICENSE AMENDMENT; MEMORANDUM AND ORDER; Docket No. 50-255-LA-2; CLI-15-23, 82 NRC 321 (2015)
OPERATING LICENSE AMENDMENT; MEMORANDUM AND ORDER (Ruling on Request for Hearing and Petition to Intervene); Docket No. 50-271-LA (ASLBP No. 15-934-01-LA-BD01); LBP-15-4, 81 NRC 156 (2015)
OPERATING LICENSE AMENDMENT; MEMORANDUM AND ORDER (Ruling on Petition to Intervene and Request for a Hearing); Docket No. 50-255-LA (ASLBP No. 15-936-03-LA-BD01); LBP-15-17, 81 NRC 753 (2015)
OPERATING LICENSE AMENDMENT; MEMORANDUM AND ORDER (Denying Hearing Request); Docket No. 50-271-LA-2 (ASLBP No. 15-937-02-LA-BD01); LBP-15-18, 81 NRC 793 (2015)
OPERATING LICENSE AMENDMENT; MEMORANDUM AND ORDER (Granting Petition to Intervene and Request for a Hearing); Docket No. 50-255-LA-2 (ASLBP No. 15-939-04-LA-BD01); LBP-15-20, 81 NRC 829 (2015)
OPERATING LICENSE AMENDMENT; MEMORANDUM AND ORDER (Granting Petition to Intervene and Hearing Request); Docket No. 50-271-LA-3 (ASLBP No. 15-940-03-LA-BD01); LBP-15-24, 82 NRC 68 (2015)
OPERATING LICENSE AMENDMENT; MEMORANDUM AND ORDER (Denying New York’s Petition to Intervene); Docket No. 50-247-LA (ASLBP No. 15-942-06-LA-BD01); LBP-15-26, 82 NRC 163 (2015)
OPERATING LICENSE AMENDMENT; ORDER (Granting Motion to Withdraw LAR, Denying Motion for Leave to File Reply, and Terminating Proceeding); Docket No. 50-271-LA-3 (ASLBP No. 15-940-03-LA-BD01); LBP-15-28, 82 NRC 233 (2015)
OPERATING LICENSE AMENDMENT; ORDER (Terminating Proceeding); Docket No. 50-255-LA-2 (ASLBP No. 15-939-04-LA-BD01); LBP-15-31, 82 NRC 358 (2015)
OPERATING LICENSE RENEWAL; MEMORANDUM AND ORDER; Docket No. 50-271-LR; CLI-11-2, 73 NRC 333 (2011)
OPERATING LICENSE RENEWAL; MEMORANDUM AND ORDER; Docket Nos. 50-247-LR, 50-286-LR; CLI-11-14, 74 NRC 801 (2011)
OPERATING LICENSE RENEWAL; MEMORANDUM AND ORDER; Docket No. 50-293-LR; CLI-12-1, 75 NRC 39 (2012); CLI-12-3, 75 NRC 132 (2012); CLI-12-6, 75 NRC 352 (2012); CLI-12-10, 75 NRC 479 (2012); CLI-12-15, 75 NRC 704 (2012)
OPERATING LICENSE RENEWAL; MEMORANDUM AND ORDER; Docket Nos. 50-247-LR, 50-286-LR; CLI-12-16, 76 NRC 63 (2012); CLI-12-18, 76 NRC 371 (2012)
OPERATING LICENSE RENEWAL; MEMORANDUM AND ORDER; Docket No. 50-293-LR; CLI-12-21, 76 NRC 491 (2012)
OPERATING LICENSE RENEWAL; MEMORANDUM AND ORDER (Ruling on Motion and Cross-Motions for Summary Disposition of NYS-35/36); Docket Nos. 50-247-LR, 50-286-LR (ASLBP No. 07-858-03-LR-BD01); LBP-11-17, 74 NRC 11 (2011)

OPERATING LICENSE RENEWAL; PARTIAL INITIAL DECISION (Rejecting, Upon Remand, Pilgrim Watch’s Challenge to Meteorological Modeling in SAMA Analysis in Entergy’s License Renewal Application); Docket No. 50-293-LR (ASLBP No. 06-848-02-LR); LBP-11-18, 74 NRC 29 (2011)

OPERATING LICENSE RENEWAL; MEMORANDUM AND ORDER (Denying Pilgrim Watch’s Requests for Hearing on Certain New Contentions); Docket No. 50-293-LR (ASLBP No. 06-848-02-LR); LBP-11-20, 74 NRC 65 (2011)

DIGESTS
ISSUANCES OF THE NUCLEAR REGULATORY COMMISSION

CLI-11-1  PETITION FOR RULEMAKING TO AMEND 10 C.F.R. § 54.17(c), Docket No. PRM-54-6; RULEMAKING PETITION; January 24, 2011; MEMORANDUM AND ORDER

A Even absent an express provision authorizing such relief, the Commission has occasionally considered requests to suspend proceedings or hold them in abeyance in the exercise of its inherent supervisory powers over proceedings.

B Longstanding practice of the Commission has been to limit orders delaying proceedings to the duration and scope necessary to promote the Commission’s dual goals of public safety and timely adjudication.

C Absent extraordinary cause, the Commission seldom interrupts licensing reviews or adjudications—particularly by an indefinite or very lengthy stay—pending the outcome of other Commission actions or adjudications.

D Suspension of licensing proceedings is a drastic action that is not warranted absent immediate threats to public health and safety.

E Interim docketing and Staff review of the Seabrook and similarly situated renewal applications would not jeopardize the public health and safety, prove an obstacle to fair and efficient decisionmaking, or prevent appropriate implementation of any pertinent rule or policy changes that might emerge from ongoing Commission evaluation of licensing policies.

F Holding relicensing applications in abeyance pending petitioners’ rulemaking request was unjustified because the Commission would have the opportunity to take a fresh look at petitioners’ concerns once rulemaking petitions have been scrutinized by public comment and agency review. Such relief would upset the status quo by effectively overturning the license renewal rule in the interim.

G No harm, much less irreparable harm, will occur to petitioners or others by mere continuation of the Staff’s customary license renewal review process.

H Ordinary burden to parties in pursuing litigation pending rulemaking does not justify disrupting ongoing review of license renewal applications in that litigation.

CLI-11-2  ENTERGY NUCLEAR VERMONT YANKEE, LLC and ENTERGY NUCLEAR OPERATIONS, INC. (Vermont Yankee Nuclear Power Station), Docket No. 50-271-LR; LICENSE RENEWAL; March 10, 2011; MEMORANDUM AND ORDER

A A Petition for Review falls short of satisfying 10 C.F.R. § 2.341(b)(4) if it does not specify the subsections upon which it relies and instead merely sets forth a series of general grievances fundamentally going to the correctness of the Board’s decision.

B The Commission generally disfavors the filing of new contentions at the eleventh hour of an adjudication. This policy is grounded in the doctrine of finality, which states that at some point, an adjudicatory proceeding must come to an end. The Commission considers reopening the record for any reason to be an extraordinary action, and the Commission therefore imposes a deliberately heavy burden upon an intervenor who seeks to supplement the evidentiary record after it has been closed, even with respect to an existing contention.

C The Commission frowns on intervenors seeking to introduce a new contention later than the deadline established by our regulations, and the Commission accordingly holds them to a higher standard for the admission of such contentions.

D The Commission and its Licensing Boards generally consider approximately 30-60 days as the limit for timely filings based on new information. See, e.g., Northern States Power Co. (Prairie Island Nuclear Generating Plant, Units 1 and 2), CLI-10-27, 72 NRC 481, 494 (2010) (a 2-month delay is too long); Initial Scheduling Order (Nov. 17, 2006) at 7.
DIGESTS
ISSUANCES OF THE NUCLEAR REGULATORY COMMISSION

E The Commission recognizes that 10 C.F.R. § 2.326(a)(1) provides an exception to the “timeliness” requirement in those rare instances where a petitioner raises an “exceptionally grave issue.”

F Documents merely summarizing earlier documents or compiling preexisting, publicly available information into a single source do not render “new” the summarized or compiled information. The tardy filing of a contention may be excusable only where the facts upon which the amended or new contention is based were previously unavailable.

G Nothing in our rules prevents an applicant from amending its application at any time. Permitting an application to be “modified or improved” throughout the NRC’s review is compatible with the dynamic licensing process followed in Commission licensing proceedings.

H Section 2.326(a)(3) of the Commission’s procedural rules provides that the proponent of a motion to reopen the record must demonstrate that a materially different result would have been likely had the newly proffered evidence been considered initially. The burden of satisfying this requirement (as is the case for each of the reopening requirements) is a heavy one. And, as the Commission recently reiterated, bare assertions and speculation do not supply the requisite support. To justify reopening the record, the moving papers must be strong enough, in the light of any opposing filings, to avoid summary disposition.

CLI-11-3 ENERGYSOLUTIONS, LLC (Radioactive Waste Import/Export Licenses), Docket Nos. 110-05896 (Import), 110-05897 (Export); IMPORT AND EXPORT LICENSES; June 6, 2011; MEMORANDUM AND ORDER

A The Commission denies Petitioners’ requests for hearing, intervention, and waiver of 10 C.F.R. § 51.22(c)(15), and directs the Office of International Programs to issue import license IW029 and export license XW018 to EnergySolutions.

B A participant may petition that a Commission rule or regulation be waived with respect to the license application under consideration. 10 C.F.R. § 110.111(a).

C To waive a Part 110 rule or regulation, the petitioner must show special circumstances concerning the subject of the hearing such that application of the rule or regulation would not serve the purposes for which it was adopted. 10 C.F.R. § 110.111(b).

D Section 51.22(c)(15) of 10 C.F.R. provides a categorical exclusion from the National Environmental Policy Act requirement to prepare an environmental assessment or environmental impact statement for the issuance of a low-level radioactive waste import license.

E Section 189a of the Atomic Energy Act of 1954, as amended (AEA) provides that the Commission shall grant a hearing to any person whose interest may be affected by a proceeding under the AEA for the granting of any license.

F To determine if a petitioner has sufficient interest in a proceeding to be entitled to intervene as a matter of right under section 189a, the Commission has long applied contemporaneous judicial concepts of standing.

G To establish standing, a petitioner must allege a concrete and particularized injury that is fairly traceable to the challenged action and likely to be redressed by a favorable decision.

H An organization may base its standing on immediate or threatened injury to its organizational interests.

I An organization may derive standing from a member if the organization demonstrates that the individual member has standing to participate, and has authorized the organization to represent his or her interests.

J Petitioners’ generalized institutional interest in public forums and in preventing processing of foreign waste is insufficient to confer standing. Petitioners’ claims of potential injury are also so speculative, and separate from the import and export license, that they do not amount to cognizable harm for purposes of standing.

K A presumption of standing based on geographic proximity may be applied in cases involving nonpower reactors where there is a determination that the proposed action involves a significant source of radioactivity producing an obvious potential for offsite consequences. Whether and at what distance a petitioner can be presumed to be affected must be judged on a case-by-case basis, taking into account the nature of the proposed action and the significance of the radioactive source.

L Conclusory allegations about potential radiological harm are insufficient to establish standing.

M Even if Petitioners had shown standing, the Commission would not be required by the Administrative Procedure Act or Atomic Energy Act to grant a hearing because the issues Petitioners raised are not material to the proceeding.
DIGESTS

ISSUANCES OF THE NUCLEAR REGULATORY COMMISSION

N Commission regulations, in 10 C.F.R. § 110.84(a), provide for a discretionary hearing in an export or import licensing proceeding if a hearing would be in the public interest and would assist the Commission in making the statutory determinations required by the AEA.

O A discretionary hearing to discuss the adequacy of the information provided by the applicant in a public forum would not assist the Commission in making its determinations on the export and import license applications because the applicant provided the information required by the Commission’s regulations.

P A discretionary hearing to discuss policy issues related to the import of foreign low-level radioactive waste and domestic incineration and transportation issues is not warranted as these issues are either challenges to the Commission’s regulations or are outside the scope of the proceeding.

A The sole provision of the Commission’s procedural rules explicitly authorizing stay applications is available only to parties to adjudicatory proceedings seeking stays of decisions or actions of a presiding officer pending the filing and resolution of a petition for review. However, the Commission may consider requests to suspend or hold proceedings in abeyance pursuant to its inherent supervisory authority over agency proceedings.

B The Commission considers “suspension of licensing proceedings a ‘drastic’ action that is not warranted absent ‘immediate threats to public health and safety,’” or other compelling reason. Where the Commission faces circumstances analogous to those it considered in the post-September 11 Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation) proceeding (CLI-01-26, 54 NRC 376 (2001)), the criteria articulated then are apt. Thus, the Commission considers, first, whether moving forward will jeopardize the public health and safety. Second, the Commission examines whether continuing...
the review process will prove an obstacle to fair and efficient decisionmaking. Third, the Commission decides whether going forward will prevent appropriate implementation of any pertinent rule or policy changes that might emerge from our ongoing evaluation.

C The Commission’s regulatory processes provide sufficient time and avenues to ensure that design certifications and combined licenses satisfy any Commission-directed changes before any new power plant commences operations. To the extent that the Commission’s comprehensive review of the events in Fukushima, Japan, leads to new rules applicable to any pending application, the Commission has sufficient authority and time to apply them to any new license that may be issued. With respect to license renewals, the NRC’s ongoing regulatory and oversight processes provide reasonable assurance that each facility complies with its “current licensing basis,” which can be adjusted by future Commission order or by modification to the facility’s operating license outside the renewal proceeding (perhaps even in parallel with the ongoing license renewal review). The Commission has well-established processes for imposing any new requirements necessary to protect the public health and safety and the common defense and security.

D The Commission’s regulations specify the circumstances under which the Staff must prepare supplemental environmental review documents. See 10 C.F.R. § 51.72(a). To merit this additional review, information must be both “new” and “significant,” and it must bear on the proposed action or its impacts. As the Commission has explained, the new information must present a seriously different picture of the environmental impact of the proposed project from what was previously envisioned.

E The Commission’s normal processes for filing new or amended contentions, submitting rulemaking comments, and motions (including motions to reopen) carry with them costs typically associated with participation in litigation and rulemaking. Participants accept these costs when they elect to participate in the Commission’s proceedings; the Commission’s rules require a level of engagement that far exceeds simple interest in the outcome of a proceeding. For example, the Commission’s rules deliberately place a heavy burden on proponents of contentions, who must challenge aspects of license applications with specificity, backed up with substantive technical support; mere conclusions or speculation will not suffice. An even heavier burden applies to motions to reopen.

F To the extent that the events at Fukushima, Japan, provide the basis for contentions appropriate for litigation in individual proceedings, the Commission’s procedural rules contain ample provisions through which litigants may seek admission of new or amended contentions, seek stays of licensing board decisions, appeal adverse decisions, and file motions to reopen the record, as appropriate. And, should a licensing board decision raise novel legal or policy questions, boards may certify to the Commission, in accordance with 10 C.F.R. §§ 2.319(l) and 2.323(f), those questions that would benefit from the Commission’s consideration. All of these procedural mechanisms contribute toward guaranteeing the propriety of adjudicatory decisions, and allow proceedings to continue with minimal disruption to all participants. Neither new procedures nor a separate timetable for raising new issues related to the Fukushima events are therefore warranted.

CLI-11-6 NUCLEAR INNOVATION NORTH AMERICA LLC (South Texas Project, Units 3 and 4), Docket Nos. 52-012-COL, 52-013-COL; COMBINED LICENSE; September 9, 2011; MEMORANDUM AND ORDER

A The Board’s denial of a summary disposition motion did not constitute a “de facto partial initial decision” or a “final decision on the merits” ripe for Commission review. Simply because a Board makes a disputed legal ruling does not necessarily warrant immediate Commission action. See Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-10-30, 72 NRC 564, 568 (2010) (rejecting interlocutory review where it was observed that “[p]ortions of the Board’s decision appear[ed] problematic, and may warrant our review later in the proceeding”). See also Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-08-2, 67 NRC 31, 35 (2008); Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), CLI-01-1, 53 NRC 1, 5 (2001).

B The Commission rejects the Staff’s argument that allowing an environmental challenge to continue after the environmental impact statement (EIS) has issued constitutes a “merits” ruling that the Staff’s review document is inadequate. Boards frequently hold hearings on contentions challenging the Staff’s final environmental review documents, in which case the EIS and the adjudicatory record become part of the environmental record of the decision.

CLI-11-7 U.S. DEPARTMENT OF ENERGY (High-Level Waste Repository), Docket No. 63-001-HLW; CONSTRUCTION AUTHORIZATION; September 9, 2011; MEMORANDUM AND ORDER
DIGESTS

ISSUANCES OF THE NUCLEAR REGULATORY COMMISSION

CLI-11-8 SOUTHERN NUCLEAR OPERATING COMPANY (Vogtle Electric Generating Plant, Units 3 and 4), Docket Nos. 52-025-COL, 52-026-COL; COMBINED LICENSE; September 27, 2011; MEMORANDUM AND ORDER

A The Commission’s rules, in 10 C.F.R. § 2.311(b), require briefs on appeal to conform to the requirements stated in 10 C.F.R. § 2.341(c)(2). Section 2.341(c)(2) limits briefs to 30 pages in length, absent Commission order directing otherwise. Briefs on appeal should be comprehensive, concise, and self-contained; the Commission will not augment appellants’ brief by incorporating “by reference” other pleadings or arguments contained in such other pleadings.

B To justify a request for oral argument on an appeal, appellants must show how oral argument will assist the Commission in reaching a decision, as is required by 10 C.F.R. § 2.343. Where the Commission has a thorough written record containing adequate information on which to base a decision, there is no need for oral argument.

C Like issues related to standing and contention admissibility, the question whether a pleading satisfies the requirements of section 2.326 — and therefore justifies reopening a closed proceeding — is a threshold issue. In the absence of clear error or abuse of discretion, the Commission defers to its boards’ rulings on such threshold issues. The Commission will not sustain an appeal that fails to show a board committed clear error or abuse of discretion. Appellants’ conclusory statement that they “proved” their position is not sufficient to show clear error or abuse of discretion on the part of the Board.

D Appellants may not amend their contentions on appeal. Therefore, to the extent appellants’ explanation alters or amends the proposed contention, the amendment must be rejected.

E The evaluation of a contention that is performed at the contention admissibility stage should not be confused with the evaluation that is later conducted at the merits stage of a proceeding. At the contention admissibility stage, a Board evaluates whether a petitioner has provided sufficient support to justify admitting the contention for further litigation. The facts and issues raised in a contention are not “in controversy” and subject to a full evidentiary hearing unless the proposed contention is admitted. In making its contention admissibility decision, the Board appropriately applied its technical and legal expertise to evaluate the proposed contention and the support provided for that contention.

F The Commission’s rules place a heavy burden on petitioners who ask to have a record reopened. Section 2.326(a) makes it clear that a motion to reopen will not be granted unless all three of the criteria listed in that section are satisfied. Additionally, pursuant to section 2.326(b), “[t]he motion must be accompanied by affidavits that set forth the factual and/or technical bases for the movant’s claim that the criteria of paragraph (a) of this section have been satisfied. . . . Each of the criteria must be separately addressed, with a specific explanation of why it has been met.” It is true that those providing affidavits must be competent witnesses or appropriately qualified experts. But satisfying one part of section 2.326(b) is not enough. The balance of the rule also must be satisfied.

G As the Commission has stated before, “the standard for admitting a new contention after the record is closed is higher than for an ordinary late-filed contention.” “New information is not enough . . . to reopen a closed hearing record at the last minute; the information must be significant and plausible enough to require reasonable minds to inquire further.” This is equally true where, as here, not only has the evidentiary record closed, but the entire proceeding has closed. “[T]o justify the granting of a motion to reopen the moving papers must be strong enough, in the light of any opposing filings, to avoid summary disposition.”

H In addition to the three criteria listed in section 2.326(a) and the pleading specificity requirements in section 2.326(b), the Commission’s reopening rule explicitly calls into play the rule governing nontimely filings. When a petitioner proposes a new contention after the record has closed, the petitioner must “address the reopening standards contemporaneously with a late-filed intervention petition, which must satisfy the standards for both contention admissibility and late filing.” Section 2.326(d) provides that “[a] motion to reopen which relates to a contention not previously in controversy among the parties must also satisfy the requirements for nontimely contentions in § 2.309(c).” Section 2.309(c), in turn, requires a balancing of eight factors. These factors must be addressed with specificity. Of the eight factors, the Board accorded the greatest weight to the first factor — good cause — consistent with the Commission’s case law.

I The Commission’s contention admissibility standards, see 10 C.F.R. § 2.309(f)(1), “are deliberately strict,” and the Commission “will reject any contention that does not satisfy” its requirements. Section
DIGESTS

ISSUANCES OF THE NUCLEAR REGULATORY COMMISSION

2.309(f)(1) requires a request for hearing or petition for leave to intervene to explain proposed contentions with particularity.

J As the Board points out, “a contention that attacks a Commission rule, or [that] seeks to litigate a matter that is, or clearly is about to become, the subject of a rulemaking, is inadmissible.” The Commission’s rules, in 10 C.F.R. § 2.335, explicitly provide that “no rule or regulation of the Commission, or any provision thereof, concerning the licensing of production and utilization facilities, source material, special nuclear material, or byproduct material, is subject to attack by way of discovery, proof, argument, or other means in any adjudicatory proceeding.”

K The Commission finds no evidence that prior experience with field application of protective coatings or prior experience with a particular contractor indicates that future work to be performed at the Vogtle site will be unsatisfactory. To the extent that Appellants appear to assert that there will be future misdeeds, they fail to show a nexus between their generalized complaints, the details of the combined license application, and prospective coating application or contractor behavior — that is, management character or integrity — at the Vogtle site. Without such a link, Appellants have raised no viable issue.

CLI-11-9 LUMINANT GENERATION COMPANY, LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), Docket Nos. 52-034-COL, 52-035-COL; COMBINED LICENSE; September 27, 2011 (Re-served October 4, 2011); MEMORANDUM AND ORDER

A We will grant a petition for review at our discretion, giving due weight to the existence of a substantial question with respect to one or more of the following considerations: (i) a finding of material fact is clearly erroneous or in conflict with a finding as to the same fact in a different proceeding; (ii) a necessary legal conclusion is without governing precedent or is a departure from or contrary to established law; (iii) a substantial and important question of law, policy, or discretion has been raised; (iv) the conduct of the proceeding involved a prejudicial procedural error; or (v) any other consideration that we may deem to be in the public interest.

B We defer to licensing board rulings on contention admissibility absent error of law or abuse of discretion.

C Section 50.54(hh)(2) sets forth the mitigative strategies requirements for licensees. It provides that: each licensee shall develop and implement guidance and strategies intended to maintain or restore core cooling, containment, and spent fuel pool cooling capabilities under the circumstances associated with loss of large areas of the plant due to explosions or fire, to include strategies in the following areas: (i) fire fighting; (ii) operations to mitigate fuel damage; and (iii) actions to minimize radiological release.

D Section 52.80(d) applies to combined license (COL) applicants, requiring each COL application to include a “description and plans for implementation of the guidance and strategies” required by section 50.54(hh)(2).

E At the contention admissibility stage, the burden is on intervenors to demonstrate a deficiency in the application.

F The contention standard does not contemplate a determination of the merits of a proffered contention.

G Our rules require intervenors to assert a sufficiently specific challenge that demonstrates that further inquiry is warranted.

H For the purposes of ruling on the petition, we must look to the adjudicatory record before us.

CLI-11-10 PROGRESS ENERGY FLORIDA, INC. (Levy County Nuclear Power Plant, Units 1 and 2), Docket Nos. 52-029-COL, 52-030-COL; COMBINED LICENSE; September 27, 2011; MEMORANDUM AND ORDER

A A denial of summary disposition does not constitute a “full or partial initial decision” warranting immediate Commission review. See Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-08-2, 67 NRC 31, 34 (2008).

B Appellate review of interlocutory Licensing Board orders is disfavored, and will be undertaken as a discretionary matter only in extraordinary circumstances. See Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-09-6, 69 NRC 128, 133-37 (2009).

CLI-11-11 PACIFIC GAS AND ELECTRIC COMPANY (Diablo Canyon Nuclear Power Plant, Units 1 and 2), Docket Nos. 50-275-LR, 50-323-LR; LICENSE RENEWAL; October 12, 2011; MEMORANDUM AND ORDER

A Section 2.311(d)(1) provides for appeals as of right on the question whether a request for hearing should have been wholly denied.
B The Commission will defer to the Board’s rulings on contention admissibility absent an error of law or abuse of discretion.

C Under section 54.29(a), an operating license may be renewed if we find, among other things, that actions have been identified and have been or will be taken with respect to managing the effects of aging during the period of extended operation on the functionality of certain identified structures and components.

D License renewal should not include a new, broadscoped inquiry into compliance that is separate from and parallel to the NRC’s ongoing compliance oversight activity.

E The contention admissibility rules require that contentions be raised with sufficient detail to put the parties on notice of the issues to be litigated.

F The support required for a contention necessarily will depend on the issue sought to be litigated.

G The Commission looks to Council on Environmental Quality (CEQ) regulations for guidance, including section 1502.22. But its longstanding policy is that the NRC, as an independent regulatory agency, is not bound by those portions of CEQ’s NEPA regulations that, like section 1502.22, have a substantive impact on the way in which the Commission performs its regulatory functions.

H The NRC’s regulatory review process for license renewal divides the environmental review into two parts: those issues deemed appropriate for generic analysis and those warranting a site-specific environmental impact assessment. Issues found not to require a plant-specific environmental analysis are designated “Category 1” issues. For “Category 1” issues, the NRC’s Generic Environmental Impact Statement (GEIS) for license renewal provides a generic environmental analysis — generally applicable either to all plants, or to a distinct subcategory of plants. Because “Category 1” issues already have been reviewed on a generic basis, an applicant’s environmental report need not provide a site-specific analysis of these issues.

I Section 2.335(b) provides an exception to the general rule that our regulations are not subject to challenge in adjudicatory proceedings. In accordance with this section, a party to an adjudicatory proceeding may petition for a waiver of “a specified Commission rule or regulation or any provision thereof.” “The sole ground for petition of waiver or exception is that special circumstances with respect to the subject matter of the particular proceeding are such that the application of the rule or regulation (or a provision of it) would not serve the purposes for which it was adopted.” In order to meet this standard, the party seeking a waiver must attach an affidavit that, among other things, “state[s] with particularity the special circumstances [claimed] to justify the waiver or exception requested.”

J A licensing board may not add support where it is lacking.

CLI-11-12 SHIELDALLOY METALLURGICAL CORPORATION (Decommissioning of the Newfield, New Jersey Site), Docket No. 40-7102-MLA; MATERIALS LICENSE AMENDMENT; October 12, 2011; MEMORANDUM AND ORDER

A The pertinent statutory provisions on the scope of our authority in entering section 274 agreements are contained in sections 274b and 274d of the AEA, 42 U.S.C. §§ 2021(b), 2021(d). We construe subsection d as providing the specific conditions under which the Commission “shall” exercise the general legal authority granted to it under subsection b.

B Given the mandatory language used in subsection d of section 274 of the AEA, we construe it as requiring us to enter into an agreement for state regulation of the particular categories of nuclear materials that a state certifies it both desires to regulate and has established a program for — provided that we find the state’s program for regulation of such materials to be adequate and compatible.

C We find nothing in this legislative history or in the statute itself to suggest that we may, over the objections of a state desiring jurisdiction and for reasons other than health and safety or compatibility, retain regulatory authority over pending applications involving a nuclear materials category otherwise transferred to a state.

D We do not construe Criterion 25 as in any way relating to substantive standards or the regulatory outcome of a pending license application, even where as in Shieldalloy’s case a license application has been pending at the NRC for an extended period. The purpose of that criterion is to ensure that licensing records are transferred to and received by the new agreement state in an orderly manner that ensures that no pending licensing actions will be significantly delayed or that no records will be lost or misplaced as a result of the transition of authority.

E In entering into an agreement with any state, we fully anticipate and expect that the state’s regulatory approaches and decisions may differ from ours. We have long recognized that agreement states should be
DIGESTS

ISSUANCES OF THE NUCLEAR REGULATORY COMMISSION

provided with flexibility in program implementation to accommodate individual state preferences, state legislative direction, and local needs and conditions, including the flexibility to incorporate more stringent, or similar, requirements.

F Our regulations neither explicitly nor implicitly require a comparison of the levels of protection afforded by the unrestricted and restricted decommissioning options. This is because the levels of protection of unrestricted release and restricted release are simply not susceptible to being compared meaningfully. Each option uses significantly different methods to achieve adequate protection and has significantly different risks and uncertainties associated with it. Restricted-release dose estimates inherently involve much greater uncertainty than those from unrestricted release.

G Our license termination rule provides that unrestricted release and restricted release are both available as independent regulatory options that would provide adequate protection to the public health and safety if the applicable dose and other criteria are met. Nothing in our license termination regulations states or implies in any way that restricted-release decommissioning, under any circumstances, is a safer, more protective, or more desirable disposal option than unrestricted release. To the contrary, in view of the inherent complexities and uncertainties associated with restricted release, we explicitly expressed a preference for unrestricted release in adopting our license termination rule.

H Our ALARA principle itself, either as a general regulatory principle or as used in our license termination rule, does not incorporate or call for any comparative analysis of doses from restricted and unrestricted release. Under our license termination regulations, the ALARA principle has been implemented for two purposes. The first purpose is traditional — to reduce doses from license termination below the applicable dose criteria to the extent reasonably achievable. This stems from our policy that small doses of radiation below dose limits, while safe and acceptable, may have some associated risk and should be reduced below limits when reasonable. The ALARA principle has also been incorporated into the restricted-use portion of the license termination rule for the purpose of providing a criterion to limit the use of restricted release — effectively, to screen out sites that should be removing contamination to achieve unrestricted use. This purpose is achieved in section 20.1403(a) through the use of a cost-benefit analysis as a regulatory tool to determine initial "eligibility" for restricted release. The eligibility criterion in section 20.1403(a) was intended to support our preference for the unrestricted-release decommissioning option.

I New Jersey’s license termination regulations are not less protective than or incompatible with ours in making the terms of restricted release considerably more difficult than those for unrestricted release. Our regulations likewise heavily favor unrestricted over restricted release. If Shieldalloy has a more difficult time pursuing restricted release in New Jersey than under our regulations, then that is the function of New Jersey’s permissibly more stringent regulatory scheme.

J We decided the compatibility issue in the license termination rulemaking, when we found, through our Level C designation, that states are free to impose more stringent requirements than ours. The New Jersey variances cited by Shieldalloy are aspects of the state’s regulations that are more stringent than ours on the same technical subject areas.

K We do not see anything unfair or unlawful in state regulations that may apply to just one licensee in a state at any given time. An agreement state must have a regulatory program in place for all of the nuclear material categories and activities that a state wishes to regulate, currently and potentially.

L We do not view a state’s regulations as inherently unfair because they may be designed to effectuate a state-desired regulatory outcome. It is the prerogative of a state under the section 274 agreement-state program to decide what local interests, preferences, and needs it wishes to accommodate. Our role under section 274 is to assess whether a state’s program adequately protects the public health and safety and whether it is compatible with ours.

M If a regulated entity believes that a state’s program, as implemented, is unlawful or contrary to public health and safety, it may raise its agreement-state performance concerns through our Integrated Materials Performance Evaluation Program (IMPEP) process or through an independent agreement-state performance concern evaluation, depending on the performance concern raised. We retain power under AEA § 274j, to revoke agreements with states and to restore NRC regulatory authority.

CL-11-13 U.S. DEPARTMENT OF ENERGY (High-Level Waste Repository), Docket No. 63-001-HLW; CONSTRUCTION AUTHORIZATION; November 29, 2011; MEMORANDUM AND ORDER

A The Commission disfavors requests to invoke its inherent supervisory authority over adjudications.
B The procedural rule governing appeals in a 10 C.F.R. Part 2, Subpart J proceeding provides for review only in the limited circumstances prescribed in the rule.

C The Commission generally defers to the Board on case management issues. See generally 10 C.F.R. § 2.319.

CLI-11-14 ENERTGY NUCLEAR OPERATIONS, INC. (Indian Point, Units 2 and 3), Docket Nos. 50-247-LR, 50-286-LR; LICENSE RENEWAL; December 22, 2011; MEMORANDUM AND ORDER
A We permit filings not otherwise authorized by our rules only where necessity or fairness dictates.
B Our rules of practice permit a party to choose whether to submit a petition for review, an answer in support of the petition, or neither (that is, the filing of a petition or answer is optional).
C We expect the parties to adhere to our page-limit requirements, or timely seek leave for an enlargement of the page limitation.
D Section 2.341(b)(3) does not, by its terms, limit the petitioning party to one reply only, but can fairly be read to permit one reply to each answer. Stated another way, the petitioning party may reply separately to each answer, especially considering that the answers may present different views or arguments.
E Replies need not be limited to rebuttal arguments. We have long held that a reply may not contain new information that was not raised in either the petition or answers, but we have not precluded arguments that respond to the petition or answers, whether they are offered in rebuttal or in support.
F Our rules of practice permit parties to file a petition for review of licensing board full or partial initial decisions, both of which we consider to be final.
G A grant of summary disposition where other contentions are pending is not a final decision, and is appealable only upon a showing that the standards for interlocutory review have been met.
H The basis for our allowing immediate appellate review of partial initial decisions rests on prior Appeal Board decisions permitting review of a licensing board ruling that disposes of a major segment of the case or terminates a party’s right to participate.
I A party seeking interlocutory review must show that the issue to be reviewed: (i) threatens the party adversely affected by it with immediate and serious irreparable impact which, as a practical matter, could not be alleviated through a petition for review of the presiding officer’s final decision; or (ii) affects the basic structure of the proceeding in a pervasive or unusual manner.
J Our disfavor of piecemeal appeals leads us to grant interlocutory review only upon a showing of extraordinary circumstances.
K Parties should not seek interlocutory review by invoking the grounds under which the Commission might exercise its supervisory authority.
L NEPA is a procedural statute — although it requires a “hard look” at mitigation measures, it does not, in and of itself, provide the statutory basis for their implementation.
M Licensing boards lack authority to direct the Staff’s nonadjudicatory actions.

CLI-11-15 U.S. DEPARTMENT OF ENERGY (High-Level Waste Repository), Docket No. 63-001; CONSTRUCTION AUTHORIZATION; December 22, 2011; MEMORANDUM AND ORDER

CLI-12-1 ENTERGY NUCLEAR GENERATION COMPANY and ENTERGY NUCLEAR OPERATIONS, INC. (Pilgrim Nuclear Power Station), Docket No. 50-293-LR; LICENSE RENEWAL; February 9, 2012; MEMORANDUM AND ORDER
A The Commission denies review of an Atomic Safety and Licensing Board decision that addressed and rejected a challenge to the Severe Accident Mitigation Alternatives (SAMA) analysis for the Pilgrim Nuclear Power Station.
B The SAMA analysis is a probability-weighted assessment of the benefits and costs of mitigation alternatives that can be used to reduce the risks (probability or consequences or both) of potential severe accidents at nuclear power plants.
C As a mitigation alternatives analysis under the National Environmental Policy Act (NEPA), the SAMA analysis is neither a worst-case nor a best-case impacts analysis. NRC-endorsed guidance on SAMA analysis methodology specifies use of the mean annual off-site dose and economic impact.
D We have long required contention claims to be set forth with particularity. It should not be necessary to speculate about what a pleading is supposed to mean. Petitioners must raise and reasonably specify at the outset their objections to a license application.
E The mitigation measures examined in a SAMA analysis are supplemental to those we already require under our safety regulations for reasonable assurance of safe operation. Through our reactor oversight
process, including generic safety issue reviews, we revisit whether additional mitigation measures should
be imposed as a safety matter under 10 C.F.R. Part 50.

CLI-12-2 SOUTHERN NUCLEAR OPERATING COMPANY (Vogtle Electric Generating Plant, Units 3 and
4), Docket Nos. 52-025-COL, 52-026-COL, COMBINED LICENSE; February 9, 2012; MEMORANDUM
AND ORDER

A In this proceeding, the Commission considers safety issues pursuant to Atomic Energy Act (AEA)
§ 189a, and environmental issues as required by section 102(2)(A), (C), and (E) of the National Environ-

B The Notice of Hearing for this uncontested proceeding sets the parameters for the Commission’s
review. The Commission must determine whether the review of the application by the NRC Staff has
been adequate to support the findings listed in 10 C.F.R. § 52.97 and 10 C.F.R. § 51.107(a), for each of
the combined operating licenses (COLs) to be issued, and in 10 C.F.R. § 50.10 and 10 C.F.R. § 51.107(d)
with respect to the limited work authorizations (LWAs).

C The Commission does not review a COL application de novo in a mandatory hearing; it considers
instead the sufficiency of the Staff’s review of that application. See generally Exelon Generation Co., LLC
(Early Site Permit for Clinton ESP Site), CLI-05-17, 62 NRC 5, 39 (2005); Exelon Generation Co., LLC
(Early Site Permit for Clinton ESP Site), CLI-06-20, 64 NRC 15, 21-22 (2006).

D With respect to the safety of the proposed facility, the Commission examines whether the Staff’s
review of the COL application has been adequate to support its findings, including whether: (1) the
applicable standards and requirements of the AEA and our regulations have been met; (2) any required
notifications to other agencies or bodies have been made; (3) there is reasonable assurance that the facility
will be constructed and will operate in conformity with the license, the provisions of the AEA, and our
regulations; (4) the applicant is technically and financially qualified to engage in the activities authorized;
and (5) issuance of the license will not be inimical to the common defense and security or the health and
safety of the public. 10 C.F.R. § 52.97(a)(1)(i)-(v).

E For an LWA application, the Commission examines whether the Staff’s review of the application has
been adequate to support its findings, including whether: (1) the applicable standards and requirements of
the AEA and our regulations applicable to the activities to be conducted under the LWA have been met; (2)
the applicant is technically qualified to engage in the activities authorized; (3) issuance of the LWA will
provide reasonable assurance of adequate protection to public health and safety and will not be inimical to
the common defense and security; and (4) there are unresolved safety issues relating to the activities to be
conducted under the LWA that would constitute good cause for withholding the authorization. 10 C.F.R.
§ 50.10(e)(iii)-(iv).

F With respect to the environmental impacts of the COL for the proposed facility, the Commission (1)
determines whether the requirements of NEPA § 102(2)(A), (C), and (E), and the applicable regulations
in 10 C.F.R. Part 51, have been met; (2) independently considers the final balance among conflicting
factors contained in the record of the proceeding with a view to determining the appropriate action to be
taken; (3) determines, after weighing the environmental, economic, technical, and other benefits against
environmental and other costs, and considering reasonable alternatives, whether the combined license
should be issued, denied, or appropriately conditioned to protect environmental values; and (4) determines
whether the NEPA review conducted by the NRC Staff has been adequate. 10 C.F.R. § 51.107(a)(1)-(4).

G With respect to a limited work authorization (LWA), the Commission (1) determines whether the
requirements of NEPA § 102(2)(A), (C), and (E), and the regulations in 10 C.F.R. Part 51, Subpart A,
have been met, with respect to the activities to be conducted under the LWA; (2) independently considers
the balance among conflicting factors with respect to the LWA, which is contained in the record of the
proceeding, with a view to determining the appropriate action to be taken; (3) determines whether the site
redress plan will adequately redress the activities performed under the LWA, should LWA activities be
terminated by the holder or the LWA revoked by the NRC, or upon effectiveness of our final decision
denying the COL application; and (4) determines whether the NEPA review conducted by the NRC Staff
for the LWA has been adequate. 10 C.F.R. § 51.107(d)(1)(i)-(iv).

H To satisfy requirements of NEPA, the Commission independently considers the final balance among
conflicting factors in the record.

I In order to reach a finding of reasonable assurance that the public health and safety will be protected,
the Commission imposed a license condition relating to a testing program for squib valves.
DIGESTS
ISSUANCES OF THE NUCLEAR REGULATORY COMMISSION

J Analyses of severe accidents, aircraft impacts, and probabilistic risk assessment are covered in the design control document for the referenced reactor (AP1000) and are incorporated by reference into the combined license application. In contrast, external event risks are site dependent, and therefore must be reevaluated in the COL application.

K After NRC review and acceptance, an applicant’s or licensee’s cyber security plan becomes a condition of the plant’s license. The cyber security plan becomes a part of the plant’s licensing basis.

L Because applicant addressed topics that are optional at the early site permit (ESP) stage — including analyses of the economic, technical, and other costs and benefits of the project, and the evaluation of alternative energy sources — those issues were resolved in the early site permit proceeding, leaving no unresolved environmental issues. As a result, environmental review for the COL application was limited to identifying new and significant information that would have the potential to alter the conclusions reached in the early site permit environmental impact statement.

M Because work encompassed in the applicant’s second request for a limited work authorization was originally part of the first request for a limited work authorization, the early site permit environmental impact statement evaluated all relevant environmental impacts of the requested limited work authorization. The COL FSEIS referenced this analysis, and verified the adequacy of the site redress plan for the second LWA.

N Backfill borrow sources located onsite in previously undisturbed areas were added to the COL and thus not evaluated in the ESP. The applicant voluntarily mitigated impacts to two Georgia state-listed threatened species — the sandhill milkvetch and southeastern pocket gopher — by relocating them away from the backfill borrow area.

O The Commission imposed no license conditions relating to future requirements that may be imposed as a result of its lessons learned from the Fukushima Dai-ichi accident. Because the NRC continues to develop the technical basis for Fukushima-related requirements, any license condition would lack sufficient details necessary to impose meaningful requirements.

CL1-12-3 ENTERGY NUCLEAR GENERATION COMPANY and ENTERGY NUCLEAR OPERATIONS, INC. (Pilgrim Nuclear Power Station), Docket No. 50-293-LR; LICENSE RENEWAL; February 22, 2012; MEMORANDUM AND ORDER

A We will grant a petition for review at our discretion, giving due weight to the existence of a substantial question with respect to one or more of the following considerations: (i) a finding of material fact is clearly erroneous or in conflict with a finding as to the same fact in a different proceeding; (ii) a necessary legal conclusion is without governing precedent or is a departure from or contrary to established law; (iii) a substantial and important question of law, policy, or discretion has been raised; (iv) the conduct of the proceeding involved a prejudicial procedural error; or (v) any other consideration which we may deem to be in the public interest.

B For threshold issues like contention admissibility, we give substantial deference to a board’s determinations. We will affirm decisions on the admissibility of contentions where we find no error of law or abuse of discretion.

C Motions to reopen the record are governed by 10 C.F.R. § 2.326 of our rules of practice. The movant must show that: (1) the motion is timely; (2) the motion addresses a significant safety or environmental issue; and (3) a materially different result would be or would have been likely had the newly proffered evidence been considered initially. Each of the criteria must be separately addressed, with a specific explanation of why it has been met.

D The level of support required for a motion to reopen is greater than that required for a contention under the general admissibility requirements of 10 C.F.R. § 2.309(f)(1). The motion to reopen must be accompanied by affidavits that set forth the factual and/or technical bases for the movant’s claim that the three criteria for reopening have been satisfied.

E Evidence contained in the affidavits must meet the admissibility standards in 10 C.F.R. § 2.337. That is, it must be relevant, material, and reliable. Further, the affidavits must be given by competent individuals with knowledge of the facts alleged, or by experts in the disciplines appropriate to the issues raised.

F A litigant seeking to reopen a closed record necessarily faces a heavy burden. After a record has closed, finality attaches to the hearing process, and after that point, only timely, significant issues will be considered.
DIGESTS
ISSUANCES OF THE NUCLEAR REGULATORY COMMISSION

G The reopening standards in section 2.326 expressly contemplate contentions that raise issues not previously litigated. In particular, subsection (d) anticipates circumstances where the motion to reopen relates to a contention not previously in controversy among the parties.

H We discourage incorporating pleadings or arguments by reference; we expect briefs on appeal to be comprehensive, concise, and self-contained.

I Federal courts leave to an agency’s discretion the manner in which the agency determines whether information is new or significant to warrant supplementation of an environmental impact statement, including the application of its procedural rules.

J Litigants seeking to reopen a record must comply fully with section 2.326(b). We do not expect boards to search the pleadings for information that would satisfy our reopening requirements.

K We do not consider arguments made for the first time on appeal.

L Whether a severe accident mitigation alternative (SAMA) is worthy of more detailed analysis in an Environmental Report or supplemental environmental impact statement hinges upon whether it may be cost-beneficial to implement. It would be unreasonable to trigger full adjudicatory proceedings based merely upon a suggested SAMA under circumstances in which the petitioners have done nothing to indicate the approximate relative cost and benefit of the SAMA.

CLI-12-4 CROW BUTTE RESOURCES, INC. (In Situ Leach Facility, Crawford, Nebraska), Docket No. 40-8943; MATERIALS LICENSE RENEWAL; February 22, 2012; MEMORANDUM AND ORDER

A The Board lacks the authority to supervise the Staff’s review.

B Absent compelling circumstances, the Staff is expected to accord sufficient priority and devote sufficient resources to meeting its estimated safety and environmental review schedules.

CLI-12-5 NEXTERA ENERGY SEABROOK, LLC (Seabrook Station, Unit 1), Docket No. 50-443-LR; LICENSE RENEWAL; March 8, 2012; MEMORANDUM AND ORDER

A The license renewal safety review — and any associated license renewal adjudicatory proceeding — focuses on the detrimental effects of aging posed by long-term reactor operation. New Jersey Environmental Federation v. NRC, 645 F.3d 220, 224 (3d Cir. 2011).

B Longstanding Staff guidance directly addresses the classification of electrical transformers for the purposes of license renewal, and has found them to be “active” components. Any degradation of the transformer’s ability to perform its intended function is readily monitorable by a change in the electrical performance of the transformer and the associated circuits. Therefore, transformers are not subject to an aging management review during a license renewal proceeding and are outside the scope of license renewal.

C As in any proceeding, the Board makes threshold decisions on materiality on a case-by-case basis, given the nature of the issue and the record presented before the Board. An application that complies with existing guidance may be challenged, provided that contention admissibility requirements are met.

D For wind power to merit detailed consideration as an alternative to renewing the license for a nuclear power plant, that alternative should be capable of providing “technically feasible and commercially viable” baseload power during the renewal period.

CLI-12-6 ENTERGY NUCLEAR GENERATION COMPANY and ENTERGY NUCLEAR OPERATIONS, INC. (Pilgrim Nuclear Power Station), Docket No. 50-293-LR; LICENSE RENEWAL; March 8, 2012; MEMORANDUM AND ORDER

A The Commission will grant a petition for review at its discretion, giving due weight to the existence of a substantial question with respect to one or more of the following considerations: (i) a finding of material fact is clearly erroneous or in conflict with a finding as to the same fact in a different proceeding; (ii) a necessary legal conclusion is without governing precedent or is a departure from or contrary to established law; (iii) a substantial and important question of law, policy, or discretion has been raised; (iv) the conduct of the proceeding involved a prejudicial procedural error; or (v) any other consideration which we may deem to be in the public interest.

B For threshold issues like contention admissibility, the Commission gives substantial deference to a board’s determinations. The Commission will affirm decisions on the admissibility of contentions where it finds no error of law or abuse of discretion.

C A litigant is not entitled to challenge a board ruling unless and until that ruling has worked a concrete injury to his personal interests.

D The reopening standards expressly contemplate contentions that raise issues not previously litigated.
Federal courts leave to an agency’s discretion the manner in which the agency determines whether information is new or significant to warrant supplementation of an environmental impact statement, including the application of its procedural rules. As a general matter, the Commission’s regulations are not subject to challenge in adjudicatory proceedings. Section 2.335(b), however, provides an exception to this general rule.

Section 2.335(b) permits a party to an adjudication to petition for a waiver of a rule or regulation upon a showing that special circumstances with respect to the subject matter of the particular proceeding are such that the application of the rule or regulation (or a provision of it) would not serve the purposes for which it was adopted. In order to meet this standard, the party seeking a waiver must attach an affidavit that, among other things, states with particularity the special circumstances claimed to justify the waiver or exception requested.

The waiver petitioner must meet all four Milestone factors, demonstrating that: (i) the rule’s strict application would not serve the purpose for which it was adopted; (ii) there are special circumstances that were not considered, either explicitly, or by necessary implication, in the rulemaking proceeding leading to the rule sought to be waived; (iii) those circumstances are unique to the facility, rather than common to a large class of facilities; and (iv) a waiver of the rule is necessary to reach a significant safety problem.

Motions to reopen a closed record are governed by 10 C.F.R. § 2.326. The movant must show that: (1) the motion is timely; (2) the motion addresses a significant safety or environmental issue; and (3) a materially different result would be or would have been likely had the newly proffered evidence been considered initially. Each of the criteria must be separately addressed, with a specific explanation of why it has been met.

The level of support required to sustain a motion to reopen is greater than that required for a contention under the general admissibility requirements of 10 C.F.R. § 2.309(f)(1). The motion to reopen must be accompanied by affidavits that set forth the factual and/or technical bases for the movant’s claim that the three criteria for reopening have been satisfied.

Evidence contained in the affidavits must meet the admissibility standards in 10 C.F.R. § 2.337. That is, it must be relevant, material, and reliable. Further, the affidavits must be given by competent individuals with knowledge of the facts alleged, or by experts in the disciplines appropriate to the issues raised.

A litigant seeking to reopen a closed record necessarily faces a heavy burden. After a record has closed, finality attaches to the hearing process, and after that point, only timely, significant issues will be considered.

The Commission’s adjudicatory proceedings are not Environmental Impact Statement (EIS) editing sessions. The burden is on the proponent of a contention to show that the Staff’s analysis or methodology is unreasonable or insufficient.

The National Environmental Policy Act (NEPA) allows agencies to select their own methodology as long as that methodology is reasonable.

Failure to challenge the existing severe accident mitigation alternatives (SAMA) analysis would be insufficient to establish a material dispute for the purposes of satisfying the general contention admissibility standards, let alone the reopening standards.

The Commission considers suspension of licensing proceedings a drastic action that is not warranted absent compelling circumstances.

In the Private Fuel Storage dry cask proceeding, the Commission articulated three criteria for determining whether to suspend an adjudication. The Commission balances whether moving forward with the adjudication will: (1) jeopardize the public health and safety; (2) prove an obstacle to fair and efficient decisionmaking; and (3) prevent appropriate implementation of any pertinent rule or policy changes that might emerge from the Commission’s ongoing lessons-learned evaluation.

NEPA requires that the agency conduct its environmental review with the best information available now. It does not, however, require that the NRC wait until inchoate information matures into something that later might affect its review.

The Commission’s rules enable the NRC to supplement a final supplemental EIS if, before a proposed action is taken, new and significant information comes to light that bears on the proposed action or its impacts, consistent with the Supreme Court’s decision in Marsh v. Oregon Natural Resources Council.

LUMINANT GENERATION COMPANY LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4, Docket Nos. 52-034-COL, 52-035-COL, COMBINED LICENSE; ENERGY NORTHWEST (Columbia Generating Station), Docket No. 50-397-LR, LICENSE RENEWAL; SOUTHERN NUCLEAR
DIGESTS

ISSUANCES OF THE NUCLEAR REGULATORY COMMISSION

OPERATING COMPANY (Vogtle Electric Generating Plant, Units 3 and 4), Docket Nos. 52-025-COL, 52-026-COL, COMBINED LICENSE, DUKE ENERGY CAROLINAS, LLC (William States Lee III Nuclear Station, Units 1 and 2), Docket Nos. 52-018-COL, 52-019-COL, COMBINED LICENSE; March 16, 2012; MEMORANDUM AND ORDER

A The Commission will grant a petition for review at its discretion, giving due weight to the existence of a substantial question with respect to one or more of the following considerations: (i) a finding of material fact is clearly erroneous or in conflict with a finding as to the same fact in a different proceeding; (ii) a necessary legal conclusion is without governing precedent or is a departure from or contrary to established law; (iii) a substantial and important question of law, policy, or discretion has been raised; (iv) the conduct of the proceeding involved a prejudicial procedural error; or (v) any other consideration which we may deem to be in the public interest.

B Instead of section 2.311, which permits an appeal as of right on the question of whether an initial intervention petition should have been wholly denied, or alternatively, was granted improperly, in instances where an appeal involves a late-filed contention, 10 C.F.R. § 2.341 is routinely applied.

C The standard for review of contention admissibility determinations is the same, whether an appeal lies under section 2.311 or 2.341 — the Commission will disturb a licensing board’s contention admissibility ruling only if there has been an error of law or an abuse of discretion.

D If new and significant information comes to light that requires consideration as part of the ongoing preparation of application-specific National Environmental Policy Act (NEPA) documents, the agency will assess the significance of that information as appropriate.

E NEPA imposes a continuing obligation on federal agencies to supplement an existing environmental impact statement (EIS), if the proposed action has not been taken, in response to significant new circumstances or information relevant to environmental concerns and bearing on the proposed action or its impacts.

F The Commission will supplement an EIS if there are: (1) substantial changes in the proposed action relevant to environmental concerns, or (2) new and significant circumstances or information relevant to environmental concerns and bearing on the proposed action or its impacts.

G As a general matter, “new” information that may be assessed for its relevance to an ongoing licensing matter may be derived in a wide variety of ways; such information is assessed for significance regardless of whether it has been acted upon in some way by the Commission, or by the NRC Staff.

H The Commission expects the Boards in individual licensing proceedings to assess contentions against applicable procedural standards.

I The contention admissibility rules require a proposed contention to be supported by alleged fact or expert opinion.

J An application-specific NEPA review represents a “snapshot” in time. NEPA requires that we conduct our environmental review with the best information available today. It does not require that we wait until inchoate information matures into something that later might affect our review.

CLI-12-8 FIRSTENERGY NUCLEAR OPERATING COMPANY (Davis-Besse Nuclear Power Station, Unit 1), Docket No. 50-346-LR; LICENSE RENEWAL; March 27, 2012; MEMORANDUM AND ORDER

A For an alternative energy source to be considered reasonable for purpose of this proceeding, the alternative should be commercially viable and technically capable of producing an equal amount of baseload power now or in the near future, but no later than the expiration date of the current operating license.

B The Severe Accident Mitigation Alternatives (SAMA) analysis is a site-specific analysis under NEPA. It looks for potential additional mitigation measures that could be implemented at a particular plant to further reduce severe accident risk (the probability or consequences of a severe accident). The SAMA analysis for license renewal has been a cost-benefit analysis, weighing a particular mitigation measure’s estimated degree of risk reduction against its estimated cost of implementation.

C To challenge an application, a petitioner must show that the SAMA analysis is “unreasonable” under NEPA. A contention proposing alternative inputs or methodologies must present some factual or expert basis for why the proposed changes in the analysis are warranted (e.g., why the inputs or methodology used is unreasonable, and the proposed changes or methodology would be more appropriate). Unless a petitioner...
DIGESTS

ISSUANCES OF THE NUCLEAR REGULATORY COMMISSION

sets forth a supported contention pointing to an apparent error or deficiency that may have significantly skewed the environmental conclusions, there is no genuine material dispute with the application.

SOUTH CAROLINA ELECTRIC & GAS COMPANY and SOUTH CAROLINA PUBLIC SERVICE AUTHORITY (also referred to as SANTIEE COOPER) (Virgil C. Summer Nuclear Station, Units 2 and 3), Docket Nos. 52-027-COL, 52-028-COL; COMBINED LICENSE; March 30, 2012; MEMORANDUM AND ORDER

A In this proceeding, the Commission considers safety issues pursuant to Atomic Energy Act (AEA) § 189(a), and environmental issues as required by section 102(2)(A), (C), and (E) of the National Environmental Policy Act of 1969, as amended (NEPA).

B The Notice of Hearing for this uncontested proceeding sets the parameters for the Commission’s review. The Commission must determine whether the review of the application by the NRC Staff has been adequate to support the findings listed in 10 C.F.R. § 52.97 and 10 C.F.R. § 51.107(a), for each of the combined operating licenses (COLs) to be issued.

C The Commission does not review a COL application de novo in a mandatory hearing; it considers instead the sufficiency of the Staff’s review of that application. See generally Exelon Generation Co., LLC (Early Site Permit for Clinton ESP Site), CLI-05-17, 62 NRC 5, 39 (2005); Clinton ESP, CLI-06-20, 64 NRC 15, 21-22 (2006).

D With respect to the safety of a proposed facility, the Commission examines whether the Staff’s review of the COL application has been adequate to support its findings, including whether: (1) the applicable standards and requirements of the AEA and our regulations have been met; (2) any required notifications to other agencies or bodies have been made; (3) there is reasonable assurance that the facility will be constructed and will operate in conformity with the license, the provisions of the AEA, and our regulations; (4) the applicant is technically and financially qualified to engage in the activities authorized; and (5) issuance of the license will not be inimical to the common defense and security or the health and safety of the public. 10 C.F.R. § 52.97(a)(1)(i)-(v).

E With respect to the environmental impacts of the COL for a proposed facility, the Commission (1) determines whether the requirements of NEPA § 102(2)(A), (C), and (E), and the applicable regulations in 10 C.F.R. Part 51, have been met; (2) independently considers the final balance among conflicting factors contained in the record of the proceeding with a view to determining the appropriate action to be taken; (3) determines, after weighing the environmental, economic, technical, and other benefits against environmental and other costs, and considering reasonable alternatives, whether the combined license should be issued, denied, or appropriately conditioned to protect environmental values; and (4) determines whether the NEPA review conducted by the NRC Staff has been adequate. 10 C.F.R. § 51.107(a)(1)-(4).

F To satisfy requirements of NEPA, the Commission independently considers the final balance among conflicting factors in the record.

G The Staff’s environmental review was conducted in cooperation with the Army Corps of Engineers (ACE), with the NRC acting as lead agency and the ACE as cooperating agency under a memorandum of understanding because the Applicants also needed permits from the ACE under section 404 of the Clean Water Act and section 10 of the Rivers and Harbors Act of 1899 in order to complete construction activities that may potentially affect wetlands.

H In order to reach a finding of reasonable assurance that the public health and safety will be protected, the Commission imposed a license condition relating to a testing program for squib valves.

I The Commission imposed a license condition requiring licensees to develop and implement strategies to maintain or restore core cooling, containment and spent fuel pool cooling capabilities following a beyond-design-basis external event, including a simultaneous loss of all AC power and loss of normal access to the normal heat sink, at all units on the VCSNS site. The requirements of the license condition will be complete prior to fuel load.

J The Commission directed the Director of the Office of New Reactors to issue Order EA-12-051 to the license applicant, concurrent with the issuance of the COLs for VCSNS Units 2 and 3. In Order EA-12-051, the Commission determined that modifications to the spent fuel pool instrumentation required by that order represented a significant enhancement to the protection of public health and safety, and were an appropriate response to the insights from the Fukushima Dai-ichi accident. The Commission administratively exempted Order EA-12-051 from the Backfit Rule and the issue finality requirements in 10 C.F.R. § 52.63 and 10 C.F.R. Part 52, Appendix D, § VIII.
DIGESTS
ISSUANCES OF THE NUCLEAR REGULATORY COMMISSION

K The COL application included a request for a departure from the wet-bulb noncoincident temperature as described in the AP1000 Design Control Document (DCD). Because the wet-bulb noncoincident temperature is considered “Tier 1 information,” or part of the AP1000 certified design, a regulatory exemption is required. 10 C.F.R. Part 52, App. D, §§ IV.A.2.d and VII.A.4. The exemption associated with the wet-bulb temperature departure was granted because it was authorized by law, would not present an undue risk to public health or safety, and was consistent with the common defense and security, and special circumstances were present.

L The Staff found acceptable the applicant’s plan to use a single technical support center for existing Unit 1 and proposed Units 2 and 3 at VCSNS, to be colocated in the basement of the new nuclear operations building, between the protected areas of the three units, which is a departure from the AP1000 DCD. Relocation of the technical support centers to a central facility allows for the relocation of each of the new units’ operational support centers to the technical support center locations designated in the AP1000 DCD, adjacent to the control room. Each unit will have its own operational support center.

CLI-12-10 ENTERGY NUCLEAR GENERATION COMPANY and ENTERGY NUCLEAR OPERATIONS, INC. (Pilgrim Nuclear Power Station), Docket No. 50-293-LR; LICENSE RENEWAL; March 30, 2012; MEMORANDUM AND ORDER
A The Commission denies review of an Atomic Safety and Licensing Board decision that rejected three new contentions submitted by the intervenor.

B The severe accident mitigation alternatives (SAMA) analysis involves extensive predictive judgments, many reflected in the computer modeling inputs used in the analysis. That there may be a range of conceivable choices among inputs used in the SAMA analysis goes without saying, and many alternative inputs may be reasonable choices — reflecting reasonable predictions — even though some may be more conservative and others less so. A mitigation alternatives analysis under the National Environmental Policy Act (NEPA) need not reflect the most conservative, or worst-case, analysis.

C NEPA neither requires nor authorizes the NRC to order implementation of mitigation measures analyzed in an environmental analysis.

D New or amended contentions must be based on new facts not previously available.

E The reopening standards are intended to impose a heavy burden on parties seeking to supplement the evidentiary record at the 11th hour, after the record has closed. The purpose of the rule is to raise the threshold — increase the showing necessary — for last-minute claims for additional hearings. The rule provides no exception for previously unlitigated issues.

F Reopening an evidentiary record will only be allowed where the proponent presents material, probative evidence which either could not have been discovered before or could have been discovered but is so grave that, in the judgment of the presiding officer, it must be considered anyway.

G The reopening standard is not the equivalent of a summary disposition standard. A motion to reopen a record must demonstrate that a materially different result would be likely had the newly proffered evidence been considered initially. This appropriately requires the Board to consider the information in the submitted supporting affidavits. While the Board does not reach an ultimate decision on the merits of the contention, it nonetheless must apply its expertise and make a record-based judgment on the evidence. To meet the reopening standard, it is insufficient merely to point to disputed facts.

CLI-12-11 SOUTHERN NUCLEAR OPERATING COMPANY (Vogtle Electric Generating Plant, Units 3 and 4), Docket Nos. 52-025-COL, 52-026-COL; COMBINED LICENSE; April 16, 2012; MEMORANDUM AND ORDER
A In addition to contested hearings where interested members of the public have the right to participate and air their concerns, uncontested safety and environmental issues are considered in a so-called “mandatory” hearing. The mandatory hearing, which is required by section 189a of the AEA, does not involve public participation — regardless of whether a contested hearing with public participation has occurred. The purpose of a mandatory hearing is to determine whether the Staff’s review of the application has been adequate to support the required regulatory findings.

B Although we have no specific rule governing stays of agency action pending judicial review, federal law requires parties seeking such stays in court to come to the agency first, and we traditionally have entertained such motions.

C Only final NRC action is subject to judicial review. Neither the Board’s decision denying reopening nor the Commission’s decision refusing to suspend proceedings amounts to final agency action.
DIGESTS

ISSUANCES OF THE NUCLEAR REGULATORY COMMISSION

D In deciding motions seeking a stay of agency action pending judicial review, we look to the same four-part test that governs stays of licensing board decisions pending Commission review (10 C.F.R. § 2.342(e)). Of these factors, irreparable injury is the most important. Specifically, “[a] party seeking a stay must show it faces imminent, irreparable harm that is both ‘certain and great.’” Without a showing of irreparable injury, Petitioners must make “an overwhelming showing” of likely success on the merits. This has also been referred to as a demonstration of “virtual certainty.” And if a movant makes neither of these first two showings, then we need not consider the remaining factors.

E To qualify as “irreparable harm” justifying a stay, the asserted harm must be related to the underlying claim.

F For new information to be sufficiently “significant” to merit the preparation of a supplemental FEIS, the information “must paint a seriously different picture of the environmental landscape.” Also, NEPA case law requires EIS supplementation only where new information identifies a “previously unknown” environmental concern, but not where the new information “amounts to mere additional evidence supporting one side or the other of a disputed environmental effect.”

G Because Petitioners did not participate in the mandatory hearing, and were not parties to it, they may not challenge the mandatory hearing decision, as such, in court.

CLI-12-12 STRATA ENERGY, INC. (Ross In Situ Uranium Recovery Project), Docket No. 40-9091-MLA; MATERIALS LICENSE AMENDMENT; May 11, 2012; MEMORANDUM AND ORDER

A Our rules of practice provide for appeals as of right on the question whether an intervention petition should have been “wholly denied.” 10 C.F.R. § 2.311(a)(1), (a)(2), (d)(1). Appeals of a Board’s finding of standing are proper because if that finding is in error, the petitioner would not be entitled to a hearing at all.

B Routine contention admissibility determinations are not generally appropriate for interlocutory review. See, e.g., South Texas Project Nuclear Operating Co. (South Texas Project, Units 3 and 4), CLI-10-16, 71 NRC 486, 491 (2010); Energy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-09-6, 69 NRC 128, 137 (2009); Louisiana Energy Services, L.P. (National Enrichment Facility), CLI-05-21, 62 NRC 538, 539 (2005).

C It is well settled in Commission case law that an applicant may file an interlocutory appeal of board orders admitting contentions, but only if the appeal challenges the admissibility of all admitted contentions. Pa’ina Hawaii, LLC, CLI-06-13, 63 NRC 508, 509 (2006). Similarly, an intervenor may not challenge the Board’s rejection of contentions where the Board has granted a hearing on any contention. See, e.g., South Texas Project, CLI-10-16, 71 NRC at 491; Exelon Generation Co., LLC (Early Site Permit for Clinton ESP Site), CLI-04-31, 60 NRC 461, 465-67 (2004).

E Petitioners are not required to demonstrate their asserted injury with “certainty” with respect to standing. See Sequoyah Fuels Corp. and General Atomics (Gore, Oklahoma Site), CLI-94-12, 40 NRC 64, 74 (1994). Once the Board determines that injury to the petitioners from the proposed project is plausible, it is not required to weigh the evidence to determine whether the potential harm was beyond doubt. Crow Butte Resources, Inc. (In Situ Leach Facility, Crawford, Nebraska), CLI-09-9, 69 NRC 331, 346 (2009).

F The Commission will generally not hold oral argument unless there is a specific showing that oral argument will assist us in reaching a decision. Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-11-8, 74 NRC 214, 219-20 (2011) (citing Progress Energy Carolinas, Inc. (Shearon Harris Nuclear Power Plant, Units 2 and 3), CLI-10-9, 71 NRC 245, 251 (2010) (citing, in turn, Texas Utilities Electric Co. (Comanche Peak Steam Electric Station, Unit 2), CLI-93-2, 37 NRC 55, 59 n.4 (1993); Texas Utilities Electric Co. (Comanche Peak Steam Electric Station, Units 1 and 2), CLI-92-12, 36 NRC 62, 68-69 (1992))).
A Compliance with the National Environmental Policy Act (NEPA) is ultimately the responsibility of the NRC. However, license renewal applicants must submit an environmental report to aid the Staff in its preparation of a supplemental environmental impact statement.

B We encourage our licensing boards to refer rulings that raise significant and novel legal or policy issues, the resolution of which would materially advance the orderly disposition of the proceeding.

C In adjudicatory proceedings, regardless of whether the applicant comes forward with supplemental information, our rules of practice place the initial burden of raising issues based on such new information on petitioners and intervenors. In other words, the “trigger point” for the timely submission of new or amended contentions is when new information becomes available, and our process places on the intervenor the obligation to raise new contentions based on such information.

D By participating in our proceedings, intervenors accept the obligation of uncovering relevant, publicly available information.

E We expect intervenors to file contentions on the basis of the applicant’s environmental report and not delay their contentions until after the Staff issues its environmental analysis.

F We grant interlocutory review only upon a showing of extraordinary circumstances. That is, a petition for interlocutory review must show that the issue to be reviewed: (i) Threatens the party adversely affected by it with immediate and serious irreparable impact which, as a practical matter, could not be alleviated through a petition for review of the presiding officer’s final decision; or (ii) affects the basic structure of the proceeding in a pervasive or unusual manner.

G We have long held that routine contention admissibility decisions do not affect the basic structure of a proceeding in a “pervasive or unusual manner.”

A It is the Commission’s longstanding practice in our proceedings that, once all contentions have been decided, the contested proceeding is terminated. Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-12-3, 75 NRC 132, 140-41 (2012); Luminant Generation Co. LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), CLI-11-9, 74 NRC 233, 236 (2011); Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-11-8, 74 NRC 214, 217 n.1 (2011). The courts of appeals have approved the Commission’s practice of closing the hearing record after resolution of the last live contention, and of holding new contentions to the higher reopening standard. See, e.g., New Jersey Environmental Federation v. NRC, 645 F.3d 220, 232-33 (3d Cir. 2011); State of Ohio v. NRC, 814 F.2d 258, 262-64 (6th Cir. 1987); Oystershell Alliance v. NRC, 800 F.2d 1201, 1207-08 (D.C. Cir. 1986).

A The Commission denies a petition for review of an Atomic Safety and Licensing Board decision that rejected a new contention.

B The Severe Accident Mitigation Alternatives (SAMA) analysis is a probability-weighted analysis carried out for the limited purpose of identifying mitigation alternatives that meet a defined benefit-cost criterion. Mitigation measures assessed in the SAMA analysis under the National Environmental Policy Act (NEPA) are supplemental to those we already require under our safety regulations for reasonable assurance of safe operation, and likewise supplemental to those we may order or require under our ongoing regulatory oversight over reactor safety, pursuant to the Atomic Energy Act (AEA).

C To satisfy the standard for reopening the evidentiary record, a motion to reopen the record must (1) be timely (or, if untimely, raise an exceptionally grave matter); (2) address a significant safety or environmental issue; and (3) demonstrate that a materially different result would be or would have been likely had the newly proffered evidence been considered initially. The motion must be supported by an affidavit written by an individual with knowledge of the facts alleged, and the affidavit must explain why each of the criteria has been met.

D Contentions challenging a SAMA analysis must identify a deficiency that plausibly could alter the overall result of the analysis in a material way.
DIGESTS
ISSUANCES OF THE NUCLEAR REGULATORY COMMISSION

E Our standard for reopening the record requires an affidavit-based showing that a materially different result would have been likely had the newly proffered evidence been considered initially. To meet the reopening standard, it is insufficient merely to point to disputed facts.

F NEPA is not intended to encompass every possible impact, and does not encompass potential losses due merely to individuals’ perception of a risk.

G NEPA does not require that we wait until incomplete information matures into something that might possibly affect the NRC’s review.

CLI-12-16 CALVERT CLIFFS 3 NUCLEAR PROJECT, LLC and UNISTAR NUCLEAR OPERATING SERVICES, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), Docket No. 52-016-COL, COMBINED LICENSE; DETROIT EDISON COMPANY (Fermi Nuclear Power Plant, Unit 3), Docket No. 52-033-COL, COMBINED LICENSE; DUKE ENERGY CAROLINAS, LLC (William States Lee III Nuclear Station, Units 1 and 2), Docket Nos. 52-018-COL, 52-019-COL, COMBINED LICENSE; ENTERGY NUCLEAR OPERATIONS, INC. CLI-12-17 VIRGINIA ELECTRIC AND POWER COMPANY d/b/a DOMINION VIRGINIA POWER and OLD DOMINION ELECTRIC COOPERATIVE (North Anna Power Station, Unit 3), Docket No. 52-017-COL, COMBINED LICENSE; September 25, 2012; MEMORANDUM AND ORDER

A Petitioners’ request, though styled a “Petition for Review,” asked the Commission to reconsider its own prior ruling, and was therefore properly considered according to the standards governing a motion for reconsideration.

B A petition for reconsideration may not be filed except upon leave of the adjudicatory body that rendered the decision. See 10 C.F.R. § 2.323(e). A party’s failure to seek leave is sufficient grounds for denying the request, although the requesting party may seek leave simultaneously with filing its motion. See Progress Energy Carolinas, Inc. (Shearon Harris Nuclear Power Plant, Units 2 and 3), CLI-10-9, 71 NRC 245, 252 (2010).

C A motion for reconsideration must present a compelling argument, such as the existence of a clear and material error in a decision, which the movant could not reasonably have anticipated. See 10 C.F.R. § 2.345(b). Such a motion should be based on an "elaboration of an argument already made, an overlooked controlling decision or principle of law, or a factual clarification," rather than simply reasserting the

CLI-12-18 ENERGTY NUCLEAR OPERATIONS, INC. (Indian Point, Units 2 and 3), Docket Nos. 50-247-LR, 50-286-LR; LICENSE RENEWAL; October 12, 2012; MEMORANDUM AND ORDER

A The Commission denies a petition for interlocutory review of an Atomic Safety and Licensing Board order granting a motion for cross-examination of witnesses.

B Pursuant to 10 C.F.R. § 2.341(f)(2), the Commission may, at its discretion, grant a party’s request for interlocutory review of a Board decision. Review may be granted only where the party demonstrates that the issue for which it seeks review: (1) threatens the party with immediate and serious irreparable impact which cannot be alleviated through an appeal following the presiding officer’s final decision; or (2) affects the basic structure of the proceeding in a pervasive or unusual way.

C Subpart L hearing rules are intended to shift most questioning of witnesses from parties to the Board itself. Given that the parties provide prefiled direct testimony in Subpart L cases, and further submit a list of confidential proposed questions for the board to ask the witnesses, the need for the parties themselves also to conduct questioning should be a rare circumstance, except where questions of credibility, motive, or intent are at issue. Cross-examination should be reserved for cases where the Board determines that it is truly necessary to develop a sound record.

CLI-12-19 EXELON GENERATION COMPANY, LLC (Limerick Generating Station, Units 1 and 2), Docket Nos. 50-352-LR, 50-353-LR; LICENSE RENEWAL; October 23, 2012; MEMORANDUM AND ORDER

A The Commission’s rules of practice provide an appeal as of right on the question whether a hearing request should have been wholly denied.

B The Commission generally defers to board contention admissibility rulings in the absence of an error of law or abuse of discretion.

C In order to grant a hearing request, a board must find that the petitioner has standing and has proposed at least one admissible contention.

D Section 2.335(a) provides that a contention may not challenge an agency rule or regulation in any adjudicatory proceeding absent a waiver from the Commission; subsections (b) through (d) set forth the procedure for obtaining a waiver.

E Section 51.53(c)(3)(ii)(L) requires a license renewal applicant’s environmental report to include a consideration of alternatives to mitigate severe accidents if the Staff has not previously considered them for the applicant’s plant in an environmental impact statement or related supplement or in an environmental assessment.

F As in any case where the viability of an existing rule is questioned in an adjudication, the Commission’s waiver provision in section 2.335(b) provides an avenue for a petitioner who seeks to litigate a contention in an adjudicatory proceeding that otherwise would be outside the permissible scope of the proceeding. Section 2.335(b) requires a showing of “special circumstances” demonstrating that application of the rule would not serve the purpose for which it was adopted.

CLI-12-20 SOUTHERN CALIFORNIA EDISON COMPANY (San Onofre Nuclear Generating Station, Units 2 and 3), Docket Nos. 50-361-CAL, 50-362-CAL; CONFIRMATORY ACTION LETTER; November 8, 2012; MEMORANDUM AND ORDER

A The Atomic Safety and Licensing Board is not the appropriate vehicle for reviewing 2.206 petitions. Instead, interested persons must follow the established 2.206 practice.

B A confirmatory action letter (CAL) may constitute a de facto license amendment that triggers hearing rights. It is appropriate for the Atomic Safety and Licensing Board to evaluate the hearing petition, determine whether the CAL proceeding is, in effect, a license amendment proceeding, and then ultimately determine whether the intervention petition can satisfy the standing and contention admissibility requirements of 10 C.F.R. § 2.309.

CLI-12-21 ENERGTY NUCLEAR GENERATION COMPANY and ENERGTY NUCLEAR OPERATIONS, INC. (Pilgrim Nuclear Power Station), Docket No. 50-293-LR; LICENSE RENEWAL; December 6, 2012; MEMORANDUM AND ORDER

A We will grant a petition for review at our discretion, giving due weight to the existence of a substantial question with respect to one or more of the following considerations: (i) a finding of material fact is clearly erroneous or in conflict with a finding as to the same fact in a different proceeding; (ii) a necessary legal conclusion is without governing precedent or is a departure from or contrary to established law; (iii) a
DIGESTS
ISSUANCES OF THE NUCLEAR REGULATORY COMMISSION

substantial and important question of law, policy, or discretion has been raised; (iv) the conduct of the proceeding involved a prejudicial procedural error; or (v) any other consideration that we may deem to be in the public interest.

B A motion to reopen a closed record must be timely. When determining whether a new contention is timely for the purposes of reopening a record, we look to whether the contention could have been raised earlier — that is, whether the information on which it is based was previously available or whether it is materially different from what was previously available, and whether it has been submitted in a timely fashion based on the information’s availability.

C Although “timely” is not expressly defined by months or days in our regulations, we, as well as our licensing boards, typically consider 30 to 60 days from the initiating event a reasonable deadline for proposing new or amended contentions.

D Our contention pleading rules are designed with the expectation that petitioners will alert us to issues early on — when they arise — so that we may address them as part of the license application review. By participating in our proceedings, intervenors accept the obligation of uncovering relevant, publicly available information.

E Our reopening rule provides an exception to the timeliness requirement, permitting consideration of an exceptionally grave issue even if it is untimely presented.

F An untimely raised environmental issue could be exceptionally grave depending on the circumstances of the case and the facts presented. This narrow exception will be granted rarely and only in truly extraordinary circumstances.

CLI-13-1 HONEYWELL INTERNATIONAL, INC. (Metropolis Works Uranium Conversion Facility), Docket No. 40-3392-MLA; MATERIALS LICENSE AMENDMENT; January 9, 2013; MEMORANDUM AND ORDER

A With limited exceptions, section 40.36 of our regulations requires source material licensees to demonstrate that they can pay for the decommissioning of their regulated facilities. Generally, a nongovernment licensee must demonstrate such financial assurance by using one of three methods — (1) prepayment; (2) use of a surety method, insurance, or other guarantee method; or (3) use of an external sinking fund.

B As a form of “other guarantee method,” section 40.36(e)(2) permits bond-issuing licensees to provide a self-guarantee of funds for decommissioning costs based on a financial test set forth in Appendix C of Part 30.

C The objective of decommissioning is to remove a facility or site safely from service, and to reduce residual radioactivity to a level that permits either release of the property for unrestricted use or release under restricted conditions, followed by termination of the NRC license. To meet this objective, we require source materials licensees to submit a Decommissioning Funding Plan far in advance of submitting the actual plans for decommissioning. This Plan must include a periodically adjusted cost estimate and specify the method for assuring that sufficient funds will be available when needed. The licensee also must certify that the amount assured for decommissioning meets or exceeds estimated decommissioning costs.

D “Unrestricted use” means that, from a radiological standpoint, no hazards exist at the site, the license can be terminated, and the site can be considered an unrestricted area. In practical terms, the objective of decommissioning is to reduce residual radioactivity in structures, soils, groundwater, and other media at the site so that the concentration of each radionuclide that could contribute to residual radioactivity is indistinguishable from the background radiation concentration for that nuclide.

E We recently promulgated a new rule to permit licensees to include intangible assets in their proposed “net worth” calculations, based on our conclusion that this change would not unduly risk a shortfall in decommissioning funds. Our new rule, which went into effect in late 2012, reflects this new feature. The financial test in section II.A.1 of Appendices A, C, and D of Part 30 “allow[s] the use of intangible assets . . . to meet specified criteria in the financial tests for . . . self-guarantees.” This new provision will be balanced by a new minimum tangible net worth requirement for the self-guarantee financial test applicable to bond-issuing companies. The financial tests in 10 C.F.R. Part 30, Appendix A (parent companies), Appendix C (bond-issuing companies), and Appendix D (companies without rated bonds) impose different tangible net worth requirements. The new rule will impose a minimum tangible net worth requirement for all self-guaranteeing licensees, using a cost-adjustment feature to reflect inflation. For licensees covered by Part 30, Appendix C, the adjusted cost at the time of the rule’s adoption will be $21 million.
F A licensee can seek an exemption from the decommissioning financial assurance requirements pursuant to section 40.14(a) of our regulations. That section provides that “[t]he Commission may . . . grant such exemptions from the requirements of the regulation[s] in this part as it determines are authorized by law and will not endanger life or property or the common defense and security and are otherwise in the public interest.” Although our regulations thus authorize exemptions, we consider an exemption to be an “extraordinary” equitable remedy to be used only “sparingly.”

G The reason for this high standard is simple. Every NRC regulation has gone through the rulemaking process, including public notice-and-comment, and its underlying rationale has been explained in our Statements of Considerations. Although our authority under the Atomic Energy Act and other statutes to adopt rules of general application “entails a concomitant authority to provide exemption procedures in order to allow for special circumstances,” our rules presumably apply until an exemption requester has met the high burden we place upon such requests. Our exemption regulations are in place to provide equitable relief only when supported by compelling reasons — they are not intended to serve as a vehicle for challenging the fundamental basis for the rule itself. Challenges to the rule itself are more appropriately lodged through a request for rulemaking. To the extent such challenges are presented in an adjudication, they also contravene our rule prohibiting collateral attacks on regulations.

H An exemption standing alone does not give rise to an opportunity for hearing under our rules. But when a licensee requests an exemption in a related license amendment application, we consider the hearing rights on the amendment application to encompass the exemption request as well.

I In analyzing a board’s findings of fact, we apply the deferential “clear error” standard. Our deference to the Board’s findings in this adjudication is grounded in the fact that exemption requests are by their very nature equitable — and therefore fact-driven. This level of deference is particularly high where a board’s factual determinations are based in significant part on its assessment of expert testimony and the credibility of the witnesses offering that testimony.

J At Honeywell’s request (and without objection by the Staff), the Board reviewed the legal aspects of the exemption request de novo. LBP-12-6, 75 NRC 256, 268 (2012). But the Board did not consider the difference between a license amendment, which is something to which a licensee is entitled if it satisfies our regulatory requirements, and an exemption, which is an action solely within the Staff’s discretion to provide. Here, the exemption was the essence of the requested relief, and the license amendment’s sole function was to document the exemption. For this reason, the Board should have applied the “abuse of discretion” standard of review applicable to an exemption determination rather than the de novo standard applicable to a Staff decision on a license amendment application. This conclusion is consistent with our own standards when reviewing other discretionary Staff actions not subject to a hearing opportunity.

K A proposed rule, by its very nature, cannot impose regulatory criteria upon licensees. We have repeatedly stated — and our hearing rules explicitly provide — that our adjudications are not the proper arena for challenges to our regulations. Under the APA, changes to our regulatory regime must result from a deliberative rulemaking proceeding that provides the public with both notice of the proposed regulation and the opportunity to comment. Otherwise, our agency necessarily would address, on a case-by-case basis, the inevitable multitude of requests for individual exemptions — with the resulting diversion of resources that would be better allocated to the agency’s primary mission of ensuring that licensees comply with safety and environmental standards.

CL1-13-2 ALL OPERATING BOILING WATER REACTOR LICENSEES WITH MARK I AND MARK II CONTAINMENTS: ORDER MODIFYING LICENSES WITH REGARD TO RELIABLE HARDENED CONTAINMENT VENTS (EFFECTIVE IMMEDIATELY), Docket No. EA-12-050; ALL POWER REACTOR LICENSEES AND HOLDERS OF CONSTRUCTION PERMITS IN ACTIVE OR DEFERRED STATUS: ORDER MODIFYING LICENSES WITH REGARD TO RELIABLE SPENT FUEL POOL INSTRUMENTATION (EFFECTIVE IMMEDIATELY), Docket No. EA-12-051; ENFORCEMENT; January 31, 2013; MEMORANDUM AND ORDER

A Before any hearing is granted on an order issued pursuant to 10 C.F.R. § 2.202, a threshold question, intertwined with both standing and contention admissibility issues, is whether the hearing requests are within the scope of the proceeding. The issue to be determined at hearing is whether the order should be sustained or denied, not whether the order should be enhanced. Bellotti v. NRC, 725 F.2d 1380, 1382 (D.C. Cir. 1983), aff’g Boston Edison Co. (Pilgrim Nuclear Power Station), CL1-82-16, 16 NRC 44 (1982); FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station), CL1-04-23, 60 NRC 154, 157 (2004).
DIGESTS
ISSUANCES OF THE NUCLEAR REGULATORY COMMISSION

B Where an enforcement order imposes measures to enhance safety, a petitioner cannot obtain a hearing to litigate whether additional safety measures should be imposed. *Alaska Department of Transportation and Public Facilities*, CLI-04-26, 60 NRC 399, 408 (2004), reconsideration denied, CLI-04-38, 60 NRC 652 (2004).

C As a result of the *Bellotti* decision and subsequent Commission rulings, a petitioner may obtain a hearing on a section 2.202 order only if the measures to be taken under the order would, in themselves, harm the petitioner.

D The Commission rejected the argument that *Bellotti* should apply only to enforcement orders involving “discretionary punishments.” The Commission also rejected the reasoning that the reactors subject to the section 2.202 confirmatory orders would have to shut down if the orders were not sustained, which in turn would benefit the petitioners.

CLI-13-3
*NEXTERA ENERGY SEABROOK, LLC (Seabrook Station, Unit 1), Docket No. 50-443-LR; LICENSE RENEWAL*; February 20, 2013; MEMORANDUM AND ORDER
A Appeals of contention admissibility rulings under section 2.311 are available in two limited circumstances — (1) upon the denial of a petition to intervene and/or request for hearing, on the question of whether it should have been granted; or (2) upon the grant of a petition to intervene and/or request for hearing, on the question of whether it should have been wholly denied.

B Interlocutory review under 10 C.F.R. § 2.341(f)(2) is discretionary, and we will grant it only upon a showing that the issue for which review is sought: (i) Threatens the party adversely affected by it with immediate and serious irreparable impact which, as a practical matter, could not be alleviated through a petition for review of the presiding officer’s final decision; or (ii) Affects the basic structure of the proceeding in a pervasive or unusual manner. These criteria, as well as Commission precedent, reflect disfavor of piecemeal review of licensing board rulings during ongoing proceedings.

C The Commission will address such rulings after a licensing board has issued a final decision in a case, barring “extraordinary circumstances.” As a general matter, the Commission does not consider contention admissibility decisions to be extraordinary, particularly where the petitioner has been admitted as a party and has other contentions pending.

CLI-13-4
*CALVERT CLIFFS 3 NUCLEAR PROJECT, LLC and UNISTAR NUCLEAR OPERATING SERVICES, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), Docket No. 52-016-COL; COMBINED LICENSE*; March 11, 2013; MEMORANDUM AND ORDER
A Section 103d of the AEA prohibits the NRC from issuing a license for a production and utilization facility to “any corporation or other entity if the Commission knows or has reason to believe it is owned, controlled, or dominated by an alien, a foreign corporation, or a foreign government.” 42 U.S.C. § 2133(d).

B Reconsideration of the agency’s guidance, as a general matter, should not be resolved in an application-specific proceeding. But with the passage of time since the agency first issued substantive guidance on the foreign ownership provision of AEA § 103d, a reassessment is appropriate. The Commission is therefore directing the Staff, outside the adjudicatory context, to review issues relating to foreign ownership and recommend whether the Commission should consider modifications to agency guidance or practice. As part of that assessment, we are directing the Staff to consider stakeholder input.

C Given the current status of the application, a review of the Board’s decision now essentially would constitute an advisory opinion, a practice the Commission disfavors. In view of the uncertainty surrounding the application at issue here, we are reluctant to engage in review now, where our opinion might constitute a mere academic exercise.

D If and when Applicants file a revision of their application, the Staff should renotice the application as to its ownership aspect. Any fresh intervention petitions then would be subject to our usual rules of practice, as described in the notice. As to new or amended contentions not related to the question of ownership that an interested person may wish to file during the pendency of the combined license application, our usual rules of practice will apply, including our rules governing reopening the record of a closed proceeding.
DIGESTS
ISSUANCES OF THE NUCLEAR REGULATORY COMMISSION

E Issue-preclusion doctrines such as res judicata and collateral estoppel, if applicable, would preclude re-litigation of issues that already have been adjudicated in this contested proceeding.

CLI-13-5 THE SHAW GROUP INC., NRC Investigation Case No. 2-2013-001; ENFORCEMENT; April 2, 2013; MEMORANDUM AND ORDER
A The Commission denies a motion filed by the Shaw Group Inc. pursuant to 10 C.F.R. § 2.702(f) to quash a subpoena duces tecum issued by the NRC Office of Investigations.
B Subpoenas issued by the NRC Office of Investigations are enforceable if the inquiry is within the scope of the agency’s authority, the subpoena is neither too broad nor too indefinite, and the compelled information is relevant to the NRC’s investigation.
C The recipient of a subpoena issued by the NRC’s Office of Investigations may move to quash the subpoena pursuant to 10 C.F.R. § 2.702(f).
D The Atomic Energy Act of 1954, as amended, provides the NRC authority to conduct any investigations it deems necessary and proper to the administration or enforcement of its authority, which includes any regulations or orders issued pursuant to the AEA, 42 U.S.C. § 2201(c).
E NRC subpoenas have previously been quashed or limited where the subpoena was not closely drawn, or the NRC did not consider alternative means for obtaining the requested information “to avoid unnecessary infringement of [First Amendment] associational rights.” United States v. Garde, 673 F. Supp. 604, 607 (D.D.C. 1987). See also In re Richard E. Dow, CLI-91-9, 33 NRC 473, 479 (1991). A less burdensome alternative need not be considered if the recipient of the subpoena challenges neither the relevance of the requested information, the agency’s need for the information, nor the specificity of the subpoena, and there is no claim of infringement of a legally protectable interest.
F A subpoena recipient’s concerns about the NRC’s administration of FOIA cannot overcome the agency’s duty to investigate alleged violations and its statutory obligation to protect the public health and safety, 42 U.S.C. § 2201(c).
G The NRC protects allegation and investigation information from release consistent with FOIA. These requirements and exemptions reflect a balancing of public disclosure with confidentiality that Congress struck when enacting FOIA. John Doe Agency v. John Doe Corp., 493 U.S. 146, 152 (1989). This balancing does not, however, affect the NRC’s authority to obtain the requested information.
H The NRC recognizes the importance of confidentiality for an effective employee concerns program. However, under certain circumstances, a licensee or vendor might be required to disclose confidential ECP information (including the identity of a concerned individual) at the behest of a government agency (including the NRC), or in response to a subpoena.

CLI-13-6 SHIELDALLOY METALLURGICAL CORPORATION (Decommissioning of the Newfield, New Jersey Site), Docket No. 40-7102-MLA; MATERIALS LICENSE AMENDMENT; August 5, 2013; MEMORANDUM AND ORDER
A Nothing in our license termination regulations, including the ALARA principle incorporated into section 20.1403(a), calls for a comparison of doses of the restricted-release and unrestricted-release decommissioning options. The doses yielded by the restricted-release and unrestricted-release decommissioning options are not susceptible to being compared meaningfully because of the significantly different risks and uncertainties associated with each option.
B Due to the inherent complexities and uncertainties associated with restricted release, our preference is for unrestricted-release decommissioning. In light of our preference for unrestricted release, we incorporated into section 20.1403(a) a threshold eligibility provision for restricted release that requires licensees to demonstrate that remediation to the level of adequate protection for license termination cannot be achieved cost-beneficially through unrestricted release before allowing them to pursue restricted-release decommissioning.
C The eligibility test in section 20.1403(a) postulates a cost-benefit inquiry that, in its technical approach, is modeled on a traditional ALARA cost-benefit analysis (i.e., a comparison of the potential costs and benefits of incremental reductions in radioactivity levels below a particular radiation level), but that, in this context, serves a different regulatory purpose. The ALARA analysis required under section 20.1403(a) calls for a licensee seeking to use restricted release to analyze whether it would be cost-beneficial to remove enough radioactive contamination from the site so that doses to the public are no higher than 25 mrem per year without reliance on restricted-release controls.
D The words “further reductions in residual radioactivity necessary to comply with the provisions of 40
a specific activity — making the “further reductions in residual radioactivity” that would be necessary to
decommission a site pursuant to an unrestricted-release plan — and requires the licensee to demonstrate
why those reductions “were not being made.”
E The phrase “reductions in residual radioactivity” in section 20.1403(a) refers only to dose reductions
to the public that can be accomplished solely through the steps associated with unrestricted-release
decommissioning — i.e., removal of contaminated material or decontamination.
F The first sentence of section 20.1403(a) requires licensees seeking restricted release to examine
why “further reductions in residual radioactivity . . . were not being made” (emphasis added). “Further
reductions” necessarily refers to further reductions from the level of residual radioactivity that a licensee
proposes to leave in place under its proposed restricted-release decommissioning plan.
G A licensee seeking to demonstrate eligibility to pursue restricted release must show that further
reductions — to a dose level of 25 mrem — of the levels of residual radioactivity proposed to be left in
place under a restricted-release plan either “[1] would result in net public or environmental harm or [2]
were not being made because the residual levels associated with restricted conditions are ALARA.” This
means that a licensee is required to demonstrate — through either a “net harm” analysis, or an analysis that
considers the costs and benefits examined under a traditional “ALARA” analysis — that further reducing
proposed residual radioactivity to unrestricted-release levels would not be cost-beneficial.
H The determination expressly required by the text of section 20.1403(a) — whether “further reductions
in residual radioactivity . . . were not being made because the residual levels . . . are ALARA” — is an
inquiry that, by definition, focuses on how far it is possible, on a cost-effective basis, to further reduce
the “residual levels” and thereby reduce the dose to the public solely by taking the actions necessary to
accomplish unrestricted release (i.e., removing or decontaminating radioactive materials).
I Constrained in context with the entire introductory clause in section 20.1403(a), the inquiry whether
“residual levels associated with restricted conditions are ALARA” calls for a licensee to demonstrate that
“further reductions” (that is, further removal of contaminated soil or decontamination) from proposed
residual radioactivity levels to the level necessary to achieve unrestricted release are “not being made”
because the proposed “residual levels” are already as low as is reasonably achievable, such that “further
removal or decontamination would not be cost-beneficial.
J Licensees pursuing restricted release must reduce residual radioactivity levels as low as is reasonably
(i.e., cost-beneficially) achievable through removal and decontamination before relying on engineered
barriers and institutional controls to reduce doses to the public to regulatory compliance levels.
K Even if unrestricted release cannot be achieved cost-effectively, requiring that a licensee reduce
residual radioactivity to the lowest cost-effective level under a restricted-release plan serves the beneficial
regulatory purpose of optimizing protection of public health and safety and is consistent with our preference
for unrestricted release.
L To reasonably calculate the benefits of unrestricted release, the licensee must account for the
costs of restricted release that the licensee will avoid through unrestricted release. But, such a limited
comparison, necessary for the cost-benefit analysis of reducing residual radioactivity to a qualifying level
for unrestricted release, does not constitute a comparison between the doses to the public under restricted
and unrestricted release.

CLI-13-7 EXELON GENERATION COMPANY, LLC (Limerick Generating Station, Units 1 and 2), Docket
Nos. 50-352-LR, 50-353-LR; OPERATING LICENSE RENEWAL; October 31, 2013; MEMORANDUM
AND ORDER
A Challenges to Category 1 findings based on new and significant information require a waiver of 10
C.F.R. Part 51, Subpart A, Appendix B, in order to be litigated in a license renewal adjudication.
B The exception in 10 C.F.R. § 51.53(c)(3)(ii)(L) operates as the functional equivalent of a Category 1
issue, removing SAMAs from litigation in certain license renewal adjudications.
C The Commission reviews waiver petitions under 10 C.F.R. § 2.335, as well as Commission case law.
D In interpreting section 2.335, the Commission identified four factors — often referred to as the
“Millstone factors” — that waiver petitioners must satisfy.
E A licensing board may not disregard binding Commission case law.
F Although the Commission disfavors piecemeal review of licensing board decisions, boards may
refer rulings that, although interlocutory, raise significant and novel legal or policy issues or require the
Commission’s resolution to materially advance the orderly disposition of the proceeding.
Section 2.335(b) provides a limited exception to our general prohibition against challenges to NRC rules or regulations in adjudicatory proceedings. To litigate an issue that otherwise would be outside the scope of an adjudication, a petitioner must file a petition for waiver showing that special circumstances with respect to the subject matter of the particular proceeding are such that the application of the rule or regulation (or a provision of it) would not serve the purposes for which it was adopted. The waiver petitioner must include an affidavit that states with particularity the special circumstances that justify waiver of the rule.

The waiver standard is stringent by design. The NRC has discretion to transact its business broadly, through rulemaking, or case by case, through adjudication. When the Commission engages in rulemaking, it is “carving out” issues from adjudication for generic resolution. Therefore, to challenge the generic application of a rule, a petitioner seeking waiver must show that there is something extraordinary about the subject matter of the proceeding such that the rule should not apply.

In 2005, in the Millstone license renewal proceeding, the Commission compiled the waiver case law to reflect the four-part test that it has long used. To set aside a Commission rule or regulation in an adjudicatory proceeding, a petitioner must demonstrate that: (i) the rule’s strict application would not serve the purposes for which it was adopted; (ii) special circumstances exist that were not considered, either explicitly or by necessary implication, in the rulemaking proceeding leading to the rule sought to be waived; (iii) those circumstances are unique to the facility rather than common to a large class of facilities; and (iv) waiver of the regulation is necessary to reach a significant safety problem.

The fourth Millstone factor also may apply to a significant environmental issue.

Like all of the Commission’s environmental regulations in 10 C.F.R. Part 51, section 51.53(c)(3)(ii)(L) is aimed at satisfying the NRC’s obligations under the National Environmental Policy Act (NEPA). NEPA requires the NRC to prepare a “detailed statement,” i.e., an environmental impact statement (EIS), discussing the environmental impacts, alternatives, and mitigation measures for any “major Federal action] significantly affecting the quality of the human environment.” To assist the NRC in the preparation of a supplemental EIS, the NRC requires license renewal applicants to prepare an environmental report. Section 51.53(c)(3)(ii)(L), in particular, requires that an environmental report include a discussion of SAMA if the NRC has not considered them previously for the applicant’s plant.

To litigate SAMA-related issues in an adjudicatory proceeding, the Commission requires the demonstration of a potentially significant deficiency in the SAMA analysis — that is, a deficiency that credibly could render the SAMA analysis unreasonable under NEPA standards.

The Commission may, in its discretion, exercise its inherent supervisory authority over agency proceedings when a matter is not strictly adjudicatory in nature or otherwise does not fit cleanly within the procedures described in our rules of practice. See, e.g., Shieldalloy Metallurgical Corp. (Decommissioning of the Newfield, New Jersey Site), CLI-13-6, 78 NRC 155 (2013) (responding to judicial remand); AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-08-23, 68 NRC 461, 476 (2008); Pacific Gas and Electric Co. ( Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), CLI-02-23, 56 NRC 230, 237 (2002).

The U.S. Court of Appeals for the District of Columbia Circuit issued a writ of mandamus directing the NRC to resume the licensing process for the Department of Energy’s Yucca Mountain high-level radioactive waste repository construction authorization application. In re Aiken County, 725 F.3d 255 (D.C. Cir. 2013), reh’g en banc denied (Oct. 28, 2013).

The appeals court directed the NRC to expend appropriated funds in completing the license review, but afforded the agency broad discretion in choosing a pragmatic course of action. City of Los Angeles v. Adams, 556 F.2d 40, 49-50 (D.C. Cir. 1977) (“If Congress does not appropriate enough money to meet the needs of a class of beneficiaries prescribed by Congress, and if Congress is silent on how to handle this predicament, the law sensibly allows the administering agency to establish reasonable priorities and classifications.”).

The Commission chose to spend its existing appropriation in completing the safety review of the Yucca Mountain license application without resuming the adjudication. This departure from the agency’s rules was considered necessary for the orderly transaction of business and would not prejudice the litigants if and when the adjudication resumes. See American Farm Lines v. Black Ball Freight Service, 397 U.S. 532, 539 (1970) (“[I]t is
always within the discretion of a court or an administrative agency to relax or modify its procedural rules adopted for the orderly transaction of business before it when in a given case the ends of justice require it.” (citation and internal quotation marks omitted; bracket in original)); National Whistleblower Center v. NRC, 208 F.3d 256, 262 (D.C. Cir. 2002) (“The NRC possesses the authority ‘to change its procedures on a case-by-case basis . . .’ ” (citing City of West Chicago v. NRC, 701 F.2d 632, 647 (7th Cir. 1983)).

CLI-13-9 SOUTHERN CALIFORNIA EDISON COMPANY (San Onofre Nuclear Generating Station, Units 2 and 3), Docket Nos. 50-361-CAL, 50-362-CAL; CONFIRMATORY ACTION LETTER; December 5, 2013; MEMORANDUM AND ORDER

A Section 2.315(d) provides for the filing of amicus curiae briefs when the Commission has taken up a matter pursuant to section 2.341 or sua sponte.

B Generally, a case will be moot when the issues are no longer “live,” or the parties lack a cognizable interest in the outcome.

C While the same legal question may arise in a future proceeding with different litigants, it is appropriate for the Commission to wait and decide it in the context of a concrete dispute, with self-interested parties vigorously advocating opposing positions.

D The Commission has recognized an exception to the mootness doctrine, where a case may not be moot if it is capable of repetition, yet evading review: i.e., if the challenged action were too short in duration to be litigated and there is a reasonable expectation that the same party will be subjected to the same action again.

E Unreviewed board decisions do not create binding legal precedent.

F The Commission will vacate unreviewed board decisions as a prudential matter when appellate review is cut short by mootness.

G When vacating for mootness, the Commission neither approves nor disapproves the underlying board ruling.

H Future litigants can cite a vacated board decision as support for an argument; the Commission or a licensing board then may consider whether such an argument is persuasive.

CLI-13-10 SOUTHERN CALIFORNIA EDISON COMPANY (San Onofre Nuclear Generating Station, Units 2 and 3), Docket Nos. 50-361-LA, 50-362-LA; OPERATING LICENSE AMENDMENT; December 5, 2013; MEMORANDUM AND ORDER

A Upon receipt of a motion to withdraw an application, the Commission may place terms and conditions on the withdrawal, deny the application, or dismiss the application with prejudice.

B The possibility that an issue may arise in the future is not grounds to continue with an appeal in a proceeding where no live controversy remains between the litigants.

C The Commission has recognized an exception to the mootness doctrine when the same litigants are likely to be subject to similar future action. In the same vein, the Commission has recognized an exception to the mootness doctrine when a case is capable of repetition, yet evading review.

D It is the Commission’s customary practice to vacate a challenged licensing board decision when, during the pendency of an appeal, the proceeding becomes moot.

E The Commission’s decision to vacate a Board decision does not intimate any opinion on its soundness.

F Unreviewed board decisions are not binding on future boards. They may, however, be cited by future litigants as persuasive authority.

CLI-14-1 U.S. DEPARTMENT OF ENERGY (High-Level Waste Repository), Docket No. 63-001; CONSTRUCTION AUTHORIZATION; January 24, 2014; MEMORANDUM AND ORDER

A The Commission has inherent authority to supervise both the Staff’s work and adjudicatory proceedings relating to license applications. See Shieldalloy Metallurgical Corp. (Decommissioning of the Newfield, New Jersey Site), CLI-13-6, 78 NRC 155 (2013); AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-08-23, 68 NRC 461, 476 (2008); and Pacific Gas and Electric Co. (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), CLI-02-23, 56 NRC 230, 237 (2002).

B The Commission has the authority to reconsider or clarify its decisions, if necessary. See Florida Power & Light Co. (St. Lucie Nuclear Power Plant, Unit 2), CLI-80-41, 12 NRC 650, 652 (1980) (citing Trujillo v. General Electric Co., 621 F.2d 1084, 1086 (10th Cir. 1980)).

CLI-14-2 CROW BUTTE RESOURCES, INC. (Marsland Expansion Area), Docket No. 40-8943-MLA-2; MATERIALS LICENSE AMENDMENT; February 14, 2014; MEMORANDUM AND ORDER
DIGESTS
ISSUANCES OF THE NUCLEAR REGULATORY COMMISSION

A A party who neglects to fully participate in a proceeding is subject to sanctions including dismissal of its contention. See 10 C.F.R. § 2.320. See also Washington Public Power Supply System (WPPSS Nuclear Project No. 1), LBP-00-18, 52 NRC 9, 13-14 (2000); Boston Edison Co. (Pilgrim Nuclear Generating Station, Unit 2), LBP-76-7, 3 NRC 156, 157 (1976); Northern Indiana Public Service Co. (Bailly Generating Station, Nuclear-1), ALAB-224, 8 AEC 244, 250 (1974).

B An Indian Tribe has an organizational interest in protecting cultural artifacts connected with it.

C A petitioner may claim deficiencies in the application's cultural resources discussion even though it is generally not expected that the applicant's cultural resources discussion will be comprehensive. A petitioner should not wait for the Staff to perform its responsibilities under the NHPA before it raises a claim that information is lacking. The fact that the Staff will develop additional information relevant to cultural resources, as part of its NHPA review, does not preclude a challenge to the application's cultural resources discussion.

D The Commission gives the Board's rulings on contention admissibility substantial deference, even where the support for the contention appears weak, or where the claim's materiality presents a "close question." See NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-12-5, 75 NRC 301, 326-27, 329 (2012).

E Confinement of the aquifers is an issue material to the environmental impacts of an application for a license to operate an ISL uranium recovery facility.

CLI-14-3 TENNESSEE VALLEY AUTHORITY (Sequoyah Nuclear Plant, Units 1 and 2), Docket Nos. 50-327-LR, 50-328-LR; OPERATING LICENSE RENEWAL; February 12, 2014; MEMORANDUM AND ORDER

A Section 2.311 does not provide for the filing of replies.

B We permit filings not otherwise authorized by our rules only where necessity or fairness dictates.

C Electronic filing is required unless we grant an exemption permitting an alternative filing method for good cause shown, or unless the filing falls within the scope of the exception identified in 10 C.F.R. § 2.302(g)(1).

D Section 2.311(c) and (d)(1) of our rules of practice permits an appeal as of right from a board’s ruling on an intervention petition in two limited circumstances: (1) upon the denial of a petition to intervene and/or request for hearing, on the question as to whether it should have been granted; or (2) upon the granting of a petition to intervene and/or request for hearing, on the question as to whether it should have been wholly denied. This limited interlocutory appeal right attaches only when the Board has fully ruled on the initial intervention petition — that is, when it has admitted or rejected all proposed contentions.

E A board must rule on all pending contentions before an appeal may be lodged pursuant to section 2.311(c) or (d)(1).

CLI-14-4 FLORIDA POWER & LIGHT COMPANY (St. Lucie Nuclear Power Plant, Unit 2), Docket No. 50-389; SPECIAL PROCEEDING; April 1, 2014; MEMORANDUM AND ORDER

A A stay pursuant to 10 C.F.R. § 2.342 is available only in those circumstances where a presiding officer or licensing board has issued a decision or taken action in a proceeding to which the movant is a party.

B Merely raising the specter of a nuclear accident does not demonstrate irreparable harm.

CLI-14-5 AEROTEST OPERATIONS, INC. (Aerotest Radiography and Research Reactor), Docket Nos. 50-228-LR, 50-228-LT, 50-228-EA; LICENSE RENEWAL, LICENSE TRANSFER, AND ENFORCEMENT; April 10, 2014; MEMORANDUM AND ORDER

A Any discretionary diversion, in a license transfer case, from the Subpart M procedural track will be rare — requiring "extraordinary" circumstances.

B NRC regulations contemplate separate hearings on individual proceedings unless they are consolidated.

CLI-14-6 EXELON GENERATION COMPANY, LLC (Byron Nuclear Power Station, Units 1 and 2; Braidwood Nuclear Power Station, Units 1 and 2), Docket Nos. 50-454-LR, 50-455-LR, 50-456-LR, 50-457-LR; OPERATING LICENSE RENEWAL; May 2, 2014; MEMORANDUM AND ORDER

A The Commission denies a request for a protective stay of the license renewal proceeding.

B Under 10 C.F.R. § 2.802(d), a rulemaking petitioner may request that a licensing proceeding in which the petitioner is a participant be suspended pending disposition of the rulemaking petition.

C Under NRC practice, once all contentions have been decided, the contested adjudicatory proceeding is terminated. The Commission generally has denied requests to hold adjudicatory proceedings in abeyance.
DIGESTS

ISSUANCES OF THE NUCLEAR REGULATORY COMMISSION

pending the outcome of other Commission actions. Nor do NRC rules contemplate motions filed as a placeholder for a further motion to be filed later.

D The Commission is not inclined to issue a protective stay, suspending a proceeding, based on a petitioner’s bare assertion that it intends to file a petition for rulemaking at some unknown time in the future.

CLI-14-7

DTE ELECTRIC COMPANY (Fermi Nuclear Power Plant, Unit 3), Docket No. 52-033-COL, COMBINED LICENSE; ENTERGY NUCLEAR OPERATIONS, INC. (Indian Point, Units 2 and 3), Docket Nos. 50-247-LR, 50-286-LR, OPERATING LICENSE RENEWAL; FIRSTENERGY NUCLEAR OPERATING COMPANY (Davis-Besse Nuclear Power Station, Unit 1), Docket No. 50-346-LR, OPERATING LICENSE RENEWAL; FLORIDA POWER & LIGHT COMPANY (Turkey Point Nuclear Generating Plant, Units 6 and 7), Docket Nos. 52-040-COL, 52-041-COL, COMBINED LICENSE; NEXTERA ENERGY SEABROOK, LLC (Seabrook Station, Unit 1), Docket No. 50-443-LR, OPERATING LICENSE RENEWAL; NUCLEAR INNOVATION NORTH AMERICA LLC (South Texas Project, Units 3 and 4), Docket Nos. 52-012-COL, 52-013-COL, COMBINED LICENSE; PACIFIC GAS AND ELECTRIC COMPANY (Diablo Canyon Nuclear Power Plant, Units 1 and 2), Docket Nos. 50-275-LR, 50-323-LR, OPERATING LICENSE RENEWAL; PROGRESS ENERGY FLORIDA, INC. (Levy County Nuclear Power Plant, Units 1 and 2), Docket Nos. 52-029-COL, 52-030-COL, COMBINED LICENSE; TENNESSEE VALLEY AUTHORITY (Bellefonte Nuclear Power Plant, Units 3 and 4), Docket Nos. 52-014-COL, 52-015-COL, COMBINED LICENSE; TENNESSEE VALLEY AUTHORITY (Sequoyah Nuclear Plant, Units 1 and 2), Docket Nos. 50-327-LR, 50-328-LR, OPERATING LICENSE RENEWAL; TENNESSEE VALLEY AUTHORITY (Watts Bar Nuclear Plant, Unit 2), Docket No. 50-391-OL, OPERATING LICENSE; VIRGINIA ELECTRIC AND POWER COMPANY d/b/a DOMINION VIRGINIA POWER and OLD DOMINION ELECTRIC COOPERATIVE (North Anna Power Station, Unit 3), Docket No. 52-017-COL, COMBINED LICENSE; July 17, 2014; MEMORANDUM AND ORDER

A The NRC’s rules of practice permit a rulemaking petitioner who is also a participant in a licensing proceeding to request suspension of that proceeding pending the outcome of the rulemaking petition.

B Suspending a proceeding is a drastic action that the Commission will not take absent immediate threats to public health and safety, or other compelling reason.

C To determine whether suspension of an adjudication or licensing decision is warranted, the Commission considers whether moving forward will jeopardize the public health and safety, prove an obstacle to fair and efficient decisionmaking, or prevent appropriate implementation of any pertinent rule or policy changes.

A
The Commission will grant a petition for review at its discretion, upon a showing that the petitioner has raised a substantial question as to whether: (i) a finding of material fact is clearly erroneous or in conflict with a finding as to the same fact in a different proceeding; (ii) a necessary legal conclusion is without governing precedent or is a departure from or contrary to established law; (iii) a substantial and important question of law, policy, or discretion has been raised; (iv) the conduct of the proceeding involved a prejudicial procedural error; or (v) any other consideration that the Commission may deem to be in the public interest.

CLI-14-10 DTE ELECTRIC COMPANY (Fermi Nuclear Power Plant, Unit 3), Docket No. 52-033-COL; COMBINED LICENSE; December 16, 2014; MEMORANDUM AND ORDER
DIGESTS
ISSUANCES OF THE NUCLEAR REGULATORY COMMISSION

B The Commission gives substantial deference to licensing board findings of fact, and it will not overturn a board’s factual findings unless they are not even plausible in light of the record viewed in its entirety.

C Regardless of a party’s resources, fairness to all involved in NRC’s adjudicatory procedures requires that every participant fulfill the obligations imposed by and in accordance with applicable law and Commission regulations.

D The Commission gives broad discretion to licensing boards in the conduct of NRC adjudicatory proceedings, and it generally defers to board case-management decisions.

E Licensing boards are expected to set procedures to ensure the case is managed efficiently, in a manner that is fair to all of the parties.

F A board may take disciplinary action against a party that fails to comply with any prehearing order, as long as the action is just.

CLI-14-11 FLORIDA POWER & LIGHT COMPANY (St. Lucie Nuclear Power Plant, Unit 2), Docket No. 50-389; OPERATING LICENSE AMENDMENT; December 19, 2014; MEMORANDUM AND ORDER

A Agency approval is a necessary component of Commission action that affords a hearing opportunity under section 189a of the Atomic Energy Act. To determine whether an approval constitutes a de facto license amendment, the Commission has articulated two key factors to consider: Whether the approval (1) granted the licensee any greater operating authority or (2) otherwise altered the original terms of a license. Cleveland Electric Illuminating Co. (Perry Nuclear Power Plant, Unit 1), CLI-96-13, 44 NRC 315, 326 (1996).

B NRC Staff oversight activities conducted to gather information about and evaluate plant performance do not alter the conditions of a license and, therefore, do not constitute a de facto license amendment.

CLI-15-1 DTE ELECTRIC COMPANY (Fermi Nuclear Power Plant, Unit 3), Docket No. 52-033-COL; COMBINED LICENSE; January 13, 2015; MEMORANDUM AND ORDER

A The Commission will grant a petition for review at its discretion, upon a showing that the petitioner has raised a substantial question as to whether: (i) a finding of material fact is clearly erroneous or in conflict with a finding as to the same fact in a different proceeding; (ii) a necessary legal conclusion is without governing precedent or is a departure from or contrary to established law; (iii) a substantial and important question of law, policy, or discretion has been raised; (iv) the conduct of the proceeding involved a prejudicial procedural error; or (v) any other consideration that the Commission may deem to be in the public interest.

B The Commission’s rules of practice permit persons who are not parties to file a brief amicus curiae if a matter is taken up by the Commission under 10 C.F.R. § 50.59 by means of a petition for enforcement action under 10 C.F.R. § 2.206. Yankee Atomic Electric Co. (Yankee Nuclear Power Station), CLI-94-3, 39 NRC 95, 101 n.7 (1994).

CLI-15-2 ENTERGY NUCLEAR OPERATIONS, INC. (Indian Point, Units 2 and 3), Docket Nos. 50-247-LR, 50-286-LR; OPERATING LICENSE RENEWAL; February 18, 2015; MEMORANDUM AND ORDER

A The Commission’s rules of practice permit persons who are not parties to file a brief amicus curiae if a matter is taken up by the Commission under 10 C.F.R. § 2.341 or sua sponte. Vermont Yankee Nuclear Power Corp. (Vermont Yankee Nuclear Power Plant), CLI-93-11, 43 NRC 1560, 1580 (1993).
A. The Commission is not required, under the Atomic Energy Act of 1954, as amended, to make predictive findings regarding the technical feasibility of spent fuel disposal as part of its reactor licensing decisions.

B. NRC Staff activities undertaken under its oversight role to ensure a licensee’s compliance with the requirements of its existing license do not trigger hearing rights for the public under section 189a of the Atomic Energy Act.

C. The prospect that license amendments will be necessary in the future does not trigger hearing rights today.
DIGESTS
ISSUANCES OF THE NUCLEAR REGULATORY COMMISSION

C Structures and components are subject to aging management review if they perform an intended function “without moving parts or without a change in configuration or properties” and are not subject to routine replacement. 10 C.F.R. § 54.21(a)(1)(i). These structures and components are generally referred to as “passive” components, although the terms “active” and “passive” do not appear in the license renewal regulations.

D The NRC determined that many of the environmental effects associated with renewing the licenses of existing facilities can be effectively assessed generically. The environmental effects of existing plants are well understood from operating experience, and the future effects of continued operation are reasonably predictable.

E The License Renewal Rule generically excludes active components from aging management review because functional degradation resulting from the effects of aging on active functions is more readily determinable, and existing programs and requirements are expected to directly detect the effects of aging. The Maintenance Rule, along with existing monitoring, surveillance, inspection, and testing programs, serves the purpose for active components that an aging management program would serve for a passive component.

F The Commission typically defers to a Board’s judgment on issues of whether a contention had adequate factual support to raise a genuine dispute. The Commission affords substantial deference to a licensing board’s decision to admit a contention. Crow Butte Resources, Inc. (Marsland Expansion Area), CLI-14-2, 79 NRC 11, 26 (2014).

G Whether the expert opinion supporting a proposed contention petition adequately counters a long-standing Staff factual position reflected in a guidance document is a merits determination.

H Staff guidance documents do not have the force of law, but a Board should afford the Staff’s factual determinations reflected in those documents “special weight.”

I Active components are excluded from aging management review because they are “readily monitorable,” that is, because their function can be directly verified (and their failure immediately detected). While managing the effects of aging for both active and passive components requires the ability to detect degradation prior to failure, a component may still be considered active even if the “direct verification” of its function does not indicate incremental degradation.

J The Staff’s generic analysis in the Generic Environmental Impact Statement for License Renewal determined that the “probability-weighted consequences” of postulated accidents during the period of extended operation are small for all reactors. This determination precluded a discussion of whether the consequences of a severe accident for the “environmental justice population” surrounding the reactor in a specific license renewal proceeding might be “disproportionately high and adverse.”

K The adequacy of emergency planning is evaluated by the Commission on an ongoing basis as part of its oversight of operating reactors, and emergency planning issues are outside the scope of license renewal.

M The environmental record of decision may be supplemented by the hearing and relevant Board and Commission decisions.

CL1-15-7 NUCLEAR INNOVATION NORTH AMERICA LLC (South Texas Project, Units 3 and 4), Docket Nos. 52-012-COL, 52-013-COL; COMBINED LICENSE; April 14, 2015; MEMORANDUM AND ORDER

A The prohibition on foreign ownership, control, and domination is primarily concerned with safeguarding the national defense and security.

B While nuclear safety and security are not the only considerations in determining whether an applicant is under foreign ownership, control, or domination, they are the most significant considerations.

C Board did not err in factual finding that applicant was not under foreign ownership, control, or domination.

D Where the record did not show any means for foreign minority owner of applicant to control applicant’s decisions, nor any attempts by the foreign owner to do so, the Board could permissibly conclude that the foreign minority owner did not “control” the applicant.

CL1-15-8 PPL SUSQUEHANNA, LLC (Susquehanna Steam Electric Station, Units 1 and 2), Docket Nos. 50-387, 50-388, 72-28; LICENSE TRANSFER; April 14, 2015; MEMORANDUM AND ORDER

A The Commission denies a request for a hearing and to intervene in this license transfer proceeding.
DIGESTS

ISSUANCES OF THE NUCLEAR REGULATORY COMMISSION

B  A license transfer applicant must show reasonable assurance of sufficient funds to decommission the facility. Our decommissioning funding rule in 10 C.F.R. § 50.75 cites specific formulas (based on reactor type and power level) for determining the minimum amounts required to demonstrate reasonable assurance of decommissioning funding.

C  Requests for Additional Information (RAIs) are a routine means for the Staff to ask for clarification or additional corroborating information from an applicant. They reflect followup questions, an ongoing dialogue between the Staff and applicant. Rarely will pointing to an RAI, without more, suffice as support for an admissible contention.

D  A license transfer proceeding is not the appropriate venue for raising day-to-day operational safety concerns unconnected to the proposed transaction. Rather, it focuses on the impacts of the proposed license transfer. A license transfer proceeding does not encompass a full-scale safety review of a plant. Through the NRC’s regulatory oversight of operating reactors, all plants are subject to ongoing monitoring and assessment.

E  License transfer applications need not include an environmental analysis under the National Environmental Policy Act. No Environmental Report is required.

CLI-15-9  SHAW AREVA MOX SERVICES, LLC (Mixed Oxide Fuel Fabrication Facility), Docket No. 70-3098-MLA (Possession and Use License); MATERIALS LICENSE; April 23, 2015; MEMORANDUM AND ORDER

A  We review questions of law de novo, but we defer to the Board’s findings with respect to the underlying facts unless they are clearly erroneous. The standard for showing clear error is a difficult one to meet: Intervenors must demonstrate that the Board’s determination is not even plausible in light of the record as a whole.

B  No fundamental principle of regulatory interpretation precludes licensees from using one or more specific actions, commitments, capabilities, structures, systems, or components to address the requirements of more than one regulation.

C  Section 74.57(b) of 10 C.F.R., which requires a licensee to “resolve the nature and cause of any MC&A alarm within approved time periods,” does not specify a particular time period for alarm resolution. A licensee must therefore provide reasonable assurance that it can achieve the performance objectives set out in this section of our regulations.

D  NRC adjudications are limited to the scope of admitted contentions. In interpreting the scope of an admitted contention, we look back to the bases set forth in support of the contention.

E  A licensing proceeding is not the appropriate venue for generic rulemaking issues.

F  The adequacy of the NRC Staff’s review is not a litigable issue in a licensing case.

CLI-15-10  DTE ELECTRIC COMPANY (Fermi Nuclear Power Plant, Unit 3), Docket No. 52-033-COL, COMBINED LICENSE; DUKE ENERGY CAROLINAS LLC (William States Lee III Nuclear Station, Units 1 and 2), Docket Nos. 52-018-COL, 52-019-COL, COMBINED LICENSE; LUMINANT GENERATION COMPANY LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), Docket Nos. 52-034-COL, 52-035-COL, COMBINED LICENSE; NUCLEAR INNOVATION NORTH AMERICA LLC (South Texas Project, Units 3 and 4), Docket Nos. 52-012-COL, 52-013-COL, COMBINED LICENSE; PROGRESS ENERGY FLORIDA, INC. (Levy County Nuclear Power Plant, Units 1 and 2), Docket Nos. 52-029-COL, 52-030-COL, COMBINED LICENSE; STP NUCLEAR OPERATING COMPANY (South Texas Project, Units 1 and 2), Docket Nos. 52-012-COL, 52-013-COL, COMBINED LICENSE; DOMINION VIRGINIA POWER (North Anna Power Station, Unit 3), Docket Nos. 52-017-COL, COMBINED LICENSE; April 23, 2015; MEMORANDUM AND ORDER

A  The Continued Storage Rule (10 C.F.R. § 51.23) deems the environmental impacts of continued storage incorporated into environmental impact statements for initial reactor licensing and subsequent license renewal actions. Additional supplementation of environmental impact statements for these actions is not required.

B  The Continued Storage rulemaking proceeding satisfied the dual goals of the National Environmental Policy Act — it informed decision makers of the environmental impacts of continued storage and made ample information available to interested states, local governments, and members of the public.

C  In completing licensing actions dependent upon the Continued Storage Rule where a final environmental impact statement was completed before the Continued Storage rule was issued, the NRC Staff must consider whether, and to what extent, the impacts of continued storage affect previously completed
environmental impact statements. In conducting this analysis, the NRC Staff must determine whether or not to prepare a supplemental environmental impact statement based on the criteria in 10 C.F.R. § 51.92.

**CLI-15-11**  
**UNION ELECTRIC COMPANY (Callaway Plant, Unit 1), Docket No. 50-483-LR; OPERATING LICENSE RENEWAL; April 23, 2015; MEMORANDUM AND ORDER**

A The Continued Storage Rule (10 C.F.R. § 51.23) generically satisfies the NRC’s obligations to consider the environmental impacts of spent fuel storage after the end of a reactor’s license term in the environmental analyses supporting initial reactor licensing, reactor license renewal, and independent spent fuel storage licensing and renewal actions.

B “[N]o rule or regulation of the Commission . . . is subject to attack . . . in any adjudicatory proceeding” unless the petitioner first obtains a waiver. 10 C.F.R. § 2.335(a).

**CLI-15-12**  
**DTE ELECTRIC COMPANY (Fermi Nuclear Power Plant, Unit 3), Docket No. 52-033-COL; COMBINED LICENSE; April 23, 2015; MEMORANDUM AND ORDER**

A Atomic Energy Act § 189a requires that the Commission hold a hearing on each application to construct a nuclear power plant, regardless of whether an interested member of the public requests a hearing on the application. The Notice of Hearing for the “uncontested” or “mandatory” portion of the proceeding outlines the standards for the Commission’s review.

B On the safety side, the Commission must determine whether: (1) the applicable standards and requirements of the Atomic Energy Act and the Commission’s regulations have been met; (2) any required notifications to other agencies or bodies have been duly made; (3) there is reasonable assurance that the facility will be constructed and will operate in conformity with the license, the provisions of the Atomic Energy Act, and the Commission’s regulations; (4) the applicant is technically and financially qualified to engage in the activities authorized by the license; and (5) issuance of the license will not be inimical to the common defense and security or to the health and safety of the public.

C On the environmental side, the Commission must consider and determine: (1) whether the requirements of NEPA § 102(2)(A), (C), and (E), and the applicable regulations in 10 C.F.R. Part 51 (the NRC regulations implementing NEPA), have been met; (2) the final balance among conflicting factors contained in the record of the proceeding with a view to determining the appropriate action to be taken; after weighing the environmental, economic, technical, and other benefits against environmental and other costs, and considering reasonable alternatives, whether the combined license should be issued, denied, or appropriately conditioned to protect environmental values; and (4) whether the NEPA review conducted by the Staff has been adequate.

D The Commission does not review DTE’s application de novo; rather, it considers the sufficiency of the Staff’s review of the application — that is, whether the Staff’s review was sufficient to support the required findings.

E The scope of an uncontested proceeding is defined by the scope of the contested proceeding: all of the safety and environmental issues in DTE’s combined license application, except for the contested matters, are subject to the Commission’s review in the uncontested proceeding.

F The Board’s jurisdiction terminates when there are no longer any contested matters pending before it.

G When a party requests action from the presiding officer in an NRC adjudicatory proceeding, the request must come in the form of a motion.

H Section 7 of the Endangered Species Act requires an agency, in consultation with and with the assistance of the Secretary of the Interior or the Secretary of Commerce (as appropriate), to ensure that “any action authorized, funded, or carried out by such agency . . . is not likely to jeopardize the continued existence of any endangered species or threatened species or result in the destruction or adverse modification of critical habitat of such species.”

I NEPA § 102(2)(A) requires agencies to use “a systematic, interdisciplinary approach which will insure the integrated use of the natural and social sciences and the environmental design arts” in decisionmaking that may impact the environment.

J NEPA § 102(2)(E) calls for agencies to study, develop, and describe appropriate alternatives.

K NEPA § 102(2)(C) requires agencies to assess the relationship between local short-term uses and long-term productivity of the environment, to consider alternatives, and to describe the unavoidable
adverse environmental impacts and the irreversible and irretrievable commitments of resources associated with the proposed action.

CLI-15-14 PACIFIC GAS AND ELECTRIC COMPANY (Diablo Canyon Nuclear Power Plant, Units 1 and 2), Docket Nos. 50-275, 50-323; SPECIAL PROCEEDING; May 21, 2015; MEMORANDUM AND ORDER

A Claims regarding inadequacies in a licensee’s technical evaluations or noncompliance with its license, standing alone, do not suffice to identify an activity that may constitute a license amendment. Such concerns are appropriately addressed by the NRC Staff in the enforcement context.

B Licensee action without an NRC approval of an increase in authority or alteration of the terms of the license does not constitute a de facto amendment.

C Ordinarily, threshold hearing issues are decided by our Boards in the first instance.

D Although the agency has on occasion suspended final licensing decisions, these and other cases establish that a decision to do so is highly dependent upon the facts and requires a judgment that the significance of the matter raised is so substantial as to warrant suspension.

CLI-15-15 DUKE ENERGY CAROLINAS, LLC (William States Lee III Nuclear Station, Units 1 and 2), Docket Nos. 52-018-COL, 52-019-COL, COMBINED LICENSE; FIRSTENERGY NUCLEAR OPERATING COMPANY (Davis-Besse Nuclear Power Plant, Unit 1), Docket No. 50-346-LR, OPERATING LICENSE RENEWAL; LUMINANT GENERATION COMPANY LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), Docket Nos. 52-034-COL, 52-035-COL, COMBINED LICENSE; NUCLEAR INNOVATION NORTH AMERICA LLC (South Texas Project, Units 3 and 4), Docket Nos. 52-012-COL, 52-013-COL, COMBINED LICENSE; PROGRESS ENERGY FLORIDA, INC. (Levy County Nuclear Power Plant, Units 1 and 2), Docket Nos. 52-029-COL, 52-030-COL, COMBINED LICENSE; STP NUCLEAR OPERATING COMPANY (South Texas Project, Units 1 and 2), Docket Nos. 50-498-LR, 50-499-LR, OPERATING LICENSE RENEWAL; TENNESSEE VALLEY AUTHORITY (Sequoyah Nuclear Plant, Units 1 and 2), Docket Nos. 50-327-LR, 50-328-LR, OPERATING LICENSE RENEWAL; TENNESSEE VALLEY AUTHORITY (Watts Bar Nuclear Plant, Unit 2), Docket No. 50-391-OL, OPERATING LICENSE; VIRGINIA ELECTRIC AND POWER COMPANY d/b/a DOMINION VIRGINIA POWER and OLD DOMINION ELECTRIC COOPERATIVE (North Anna Nuclear Power Station, Unit 3), Docket No. 52-017-COL, COMBINED LICENSE; June 9, 2015; MEMORANDUM AND ORDER

CLI-15-16 EXELON GENERATION COMPANY, LLC (Dresden Nuclear Power Station, Units 2 and 3), Docket Nos. 50-237-EA, 50-249-EA; ENFORCEMENT; June 11, 2015; MEMORANDUM AND ORDER

A The duty to report material significant developments in a matter under adjudication arises immediately upon discovery of that information. This obligation extends to all parties.

CLI-15-17 CROW BUTTE RESOURCES, INC. (In Situ Leach Facility, Crawford, Nebraska), Docket No. 40-8943-OLA (License Renewal); MATERIALS LICENSE AMENDMENT; August 6, 2015; MEMORANDUM AND ORDER

A Board’s order denying Petitioner a stay of the effectiveness of renewed license did not threaten Petitioner with immediate, irreparable, and serious harm because the renewed license did not change the status quo. Therefore, immediate Commission review was not warranted.

B Board’s order denying Petitioner a stay of the effectiveness of renewed license did not threaten Petitioner with immediate, irreparable, and serious harm because Petitioner had not substantiated its claim of immediate harm to cultural resources with particularity, nor had it substantiated its claim that continued operations would contaminate the Petitioner’s drinking water. Therefore, immediate Commission review was not warranted.

C Board’s ruling admitting new contentions did not have a pervasive and unusual effect on the basic structure of the proceeding. Mere expansion of issues for litigation does not warrant immediate Commission review. Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-09-6, 69 NRC 128, 136-37 (2009); Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-08-2, 67 NRC 31, 35 (2008) (“[T]he broadening of issues for hearing caused by the Board’s admission of a contention that the applicant opposes does not constitute a ‘pervasive and unusual effect on the litigation.’”); Connecticut Yankee Atomic Power Co. (Haddam Neck Plant), CLI-01-25, 54 NRC 368, 374 (2001); Sacramento Municipal Utility District ( Rancho Seco Nuclear Generating Station), CLI-94-2, 39 NRC 91, 93-94 (1994).
DIGESTS
ISSUANCES OF THE NUCLEAR REGULATORY COMMISSION

D Claim that the Board expanded the issues for litigation by raising matters \textit{sua sponte} did not show a pervasive and unusual effect on the basic structure of the proceeding. Therefore, immediate Commission review was not warranted.

CLI-15-18 DTE ELECTRIC COMPANY (Fermi Nuclear Power Plant, Unit 2), Docket No. 50-341-LR; OPERATING LICENSE RENEWAL; September 8, 2015; MEMORANDUM AND ORDER

A The Commission’s contention admissibility rules are designed to ensure that only focused, well-supported issues are admitted for hearing.

B Contentions must be set forth with particularity and must meet all six contention admissibility factors.

C The Commission will defer to licensing board rulings on standing and contention admissibility absent error of law or abuse of discretion.

D Although boards have some discretion to reformulate or narrow contentions to eliminate extraneous issues or to consolidate issues for a more efficient proceeding, this authority is not without limit. A licensing board, for example, may not supply information that is lacking in a contention that otherwise would be inadmissible.

E Although a petitioner may respond to the legal or logical arguments presented in the answers to its hearing request, a petitioner may not use its reply to raise new issues for the first time.

F The Commission requires adherence to the deadlines and procedures in the rules so that the other litigants are not taken by surprise and are accorded an appropriate opportunity to respond to new arguments or new information. For any new arguments or new support for a contention, a petitioner must, among other things, explain why it could not have raised the argument or introduced the factual support earlier.

CLI-15-19 TENNESSEE VALLEY AUTHORITY (Watts Bar Nuclear Plant, Unit 2), Docket No. 50-391-OL; OPERATING LICENSE; September 24, 2015; MEMORANDUM AND ORDER

A The Commission will grant a petition for review at its discretion, giving due weight to the existence of a substantial question with respect to one or more of the considerations listed in 10 C.F.R. § 2.341(b)(4).

B Motions to reopen the record in Commission adjudicatory proceedings are governed by 10 C.F.R. § 2.326. The Commission’s case law interpreting 10 C.F.R. § 2.326 makes clear that the regulations place an intentionally heavy burden on parties seeking to reopen the record.

C A motion to reopen will not be granted unless the movant satisfies all three of the criteria listed in 10 C.F.R. § 2.326(a) and the motion is accompanied by an affidavit that satisfies 10 C.F.R. § 2.326(b).

D Section 2.335(a) of 10 C.F.R. prohibits challenges to our rules and regulations in the context of adjudicatory proceedings.

E The Commission considers suspension of licensing proceedings a “drastic” action that is not warranted absent immediate threats to public health and safety or other compelling reason.

CLI-15-20 ENTERGY NUCLEAR VERMONT YANKEE, LLC, and ENTERGY NUCLEAR OPERATIONS, INC. (Vermont Yankee Nuclear Power Station), Docket No. 50-271-LA; OPERATING LICENSE AMENDMENT; October 1, 2015; MEMORANDUM AND ORDER

A The Commission affirms an Atomic Safety and Licensing Board decision that denied a request for hearing and petition to intervene in this license amendment proceeding.

B The Emergency Response Data System (ERDS) is a direct electronic data link between computer data systems used by licensees of operating reactors and the NRC Operations Center. The system is a method of transmitting to the NRC near real-time data from a licensee during an alert or higher emergency classification. The ERDS rule and its Statements of Consideration make clear that the rule is inapplicable to those nuclear power facilities that are permanently or indefinitely shut down.

C Pursuant to 10 C.F.R. § 50.54(q)(3), licensees may make changes to an emergency plan without prior NRC approval if the licensee completes and retains an analysis demonstrating that the revised emergency plan satisfies a two-part test: (1) the plan as changed must continue to meet the requirements in Part 50, Appendix E, and the standards in section 50.47(b); and (2) the changes must not reduce the effectiveness of the plan.

D The NRC’s contention admissibility rules are found in 10 C.F.R. § 2.309(f)(1). They are intentionally strict. For each contention, the petitioner must state the issue of law or fact to be raised or controverted and a brief explanation of the basis for the contention. Contentions cannot be based on speculation but must have some reasonably specific factual or legal basis. Our rules require a petitioner to state the alleged
DIGESTS
ISSUANCES OF THE NUCLEAR REGULATORY COMMISSION

facts or expert opinions that support the petitioner’s position and on which the petitioner intends to rely in litigating the contention at hearing.

E The issue raised in a contention must fall within the scope of the proceeding and be material to the findings that the NRC must make. A contention, therefore, must provide sufficient information to show a genuine dispute with the applicant on a material issue of law or fact. A petitioner must refer to the specific portions of the application that the petitioner disputes, along with the supporting reasons for each dispute; or, if the petitioner believes that an application fails altogether to contain information required by law, the petitioner must identify each failure and provide supporting reasons for the petitioner’s belief.

F The Commission generally defers to Board decisions on contention admissibility unless it finds an error of law or abuse of discretion.

G NRC generic communications regarding ERDS have been addressed to all holders of operating licenses for operating reactors, except those license holders that have ceased operations and have certified that fuel has been permanently removed from the reactor vessel. While the ERDS rule does not address the removal of ERDS, in practice the NRC has allowed licensees that have permanently defueled their reactors to remove ERDS.

H Section 50.54(q)(3), by its own terms, allows a licensee to revise an emergency plan without prior NRC approval if the rule’s screening criteria are met.

CLI-15-21 PACIFIC GAS AND ELECTRIC COMPANY (Diablo Canyon Nuclear Power Plant, Units 1 and 2), Docket Nos. 50-275-LR, 50-323-LR; OPERATING LICENSE RENEWAL; November 9, 2015; MEMORANDUM AND ORDER

A The Commission’s standard of review is highly deferential; the Commission will not overturn a licensing board’s ruling on threshold issues like intervention absent error of law or abuse of discretion.

B For a successful intervention petition or request for hearing, a petitioner must, in addition to demonstrating standing, propose at least one contention that: (1) provides a specific statement of the issue of law or fact to be raised or controverted; (2) provides a brief explanation of its basis; (3) demonstrates that the issue raised is within the scope of the proceeding; (4) demonstrates that the issue raised is material to the findings the NRC must make to support the action that is involved in the proceeding; (5) provides a concise statement of the alleged facts or expert opinions that support the petitioner’s position on the issue and on which the petitioner intends to rely at hearing, together with references to the specific sources and documents on which the petitioner intends to rely to support its position on the issue; and (6) provides sufficient information to show that a genuine dispute exists with the applicant/licensee on a material issue of law or fact, with references to specific portions of the application (including the applicant’s environmental report and safety report) that the petitioner disputes and the supporting reasons for each dispute, or if the petitioner believes that the application fails to contain information on a relevant matter as required by law, the contention must identify each failure and the supporting reasons for the petitioner’s belief.

C The Commission’s contention admissibility requirements are strict by design; only focused, well-supported issues will be admitted for hearing.

D The Commission’s rules of practice also place limits on the types of issues a petitioner may raise. As relevant here, 10 C.F.R. § 2.335(a) prohibits challenges to an agency rule or regulation in an adjudicatory proceeding without a waiver of that rule or regulation.

E Because the Commission’s rules were promulgated with the expectation that they will apply generically, rather than on a case-by-case basis, the Commission sets a high bar for waivers: a waiver request must demonstrate that special circumstances with respect to the subject matter of the particular proceeding are such that the application of the rule or regulation (or a provision of it) would not serve the purposes for which it was adopted.

F To determine whether the waiver standard has been met, the Commission applies a four-factor test. The petitioner must demonstrate that: (i) the rule’s strict application would not serve the purposes for which it was adopted; (ii) special circumstances exist that were not considered, either explicitly or by necessary implication, in the rulemaking proceeding leading to the rule sought to be waived; (iii) those circumstances are unique to the facility rather than common to a large class of facilities; and (iv) waiver of the regulation is necessary to reach a significant safety or environmental problem.

G Contentions that challenge an agency rule or regulation without a waiver, in addition to being expressly prohibited by 10 C.F.R. § 2.335(a), are outside the scope of the proceeding.
HThe Commission’s license renewal regulations rely on the regulatory processes applicable to all currently operating reactors to address most safety and security issues, limiting license renewal proceedings to consideration of only certain issues related specifically to plant aging.

CLI-15-22 ENTERGY NUCLEAR OPERATIONS, INC. (Palisades Nuclear Plant), Docket No. 50-255-LA; OPERATING LICENSE AMENDMENT; November 9, 2015; MEMORANDUM AND ORDER

AWhen the Commission has determined that compliance with a regulation is sufficient to provide reasonable assurance of public health and safety, a licensing board cannot impose requirements that exceed those in the regulation.

BThese regulations in 10 C.F.R. §§ 50.61 and 50.61a provide alternate methods by which a licensee can demonstrate reasonable assurance of protection against pressurized thermal shock events.

CLICENSEES using 10 C.F.R. § 50.61a of the Commission’s regulations are required to use any data that demonstrate the embrittlement trends for materials in the reactor pressure vessel.

DAbsent a waiver granted under 10 C.F.R. § 2.335, challenges to the NRC’s regulations are not permitted in adjudicatory proceedings.

CLI-15-23 ENTERGY NUCLEAR OPERATIONS, INC. (Palisades Nuclear Plant), Docket No. 50-255-LA-2; OPERATING LICENSE AMENDMENT; November 9, 2015; MEMORANDUM AND ORDER

A Proponents of contentions must satisfy the Commission’s contention admissibility criteria in 10 C.F.R. § 2.309(f). Contentions must, among other things, demonstrate a genuine dispute with the application and provide a basis for the contention.

B Licensing Boards may not formulate contentions or provide bases to admit contentions that are not provided by petitioners.

C An expert opinion must provide a reasoned basis or explanation to support the expert’s conclusion; merely stating a conclusion without support is insufficient.

CLI-15-24 ENTERGY NUCLEAR OPERATIONS, INC. (Indian Point, Units 2 and 3), Docket Nos. 50-247-LR, 50-286-LR; OPERATING LICENSE RENEWAL; November 9, 2015; MEMORANDUM AND ORDER

A The Commission disfavors interlocutory review, and is particularly disinclined to interfere with a Board’s case management decisions. Such rulings can be reviewed, if necessary, at the end of the case. See, e.g., Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-12-18, 76 NRC 371, 374 (2012) (declining to take interlocutory review of Board’s decision to allow cross-examination); Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-08-7, 67 NRC 187, 192 (2008) (declining to take interlocutory review of Board’s decision to cancel oral argument).

B Interlocutory Commission review of a Board’s statements concerning the probative value of a particular document was not warranted. The petitioner was not threatened with irreparable harm to its ability to present its case and will be able, following a final decision, to object to the weight afforded to that particular document.

C Board’s decision to allow a third party to argue in favor of protecting its own document as proprietary did not affect the basic structure of the proceeding in a pervasive and unusual manner nor did it pose a serious, irreparable harm to petitioner.

D Board’s decision not to withdraw the proprietary designation of certain documents may be reviewed following the Board’s initial decision, and did not call for immediate Commission review.

CLI-15-25 FLORIDA POWER & LIGHT COMPANY (Turkey Point Nuclear Generating Plant, Units 3 and 4), Docket Nos. 50-250-LA, 50-251-LA; OPERATING LICENSE AMENDMENT; December 17, 2015; MEMORANDUM AND ORDER

A The Commission does not hold pro se petitioners to the same standards of clarity and precision to which a lawyer might reasonably be expected to adhere.

B The Commission’s standard of review of a licensing board’s determination on standing is deferential: the decision will be upheld absent a clear misapplication of facts or law.

C We defer to a Board’s contention admissibility rulings unless the appeal points to an error of law or abuse of discretion.

D The Commission applies contemporaneous judicial concepts of standing. Petitioners must claim an injury in fact that is fairly traceable to the challenged action and is likely to be redressed by a favorable decision.

E We expect our licensing boards to reformulate contentions to eliminate extraneous issues or to consolidate issues for a more efficient proceeding.

LBP-11-1 PROGRESS ENERGY FLORIDA, INC. (Levy County Nuclear Power Plant, Units 1 and 2), Docket Nos. 52-029-COL, 52-030-COL (ASLBP No. 09-879-04-COL-BD01); COMBINED LICENSE; February 2, 2011; MEMORANDUM AND ORDER (Denying Motion to Dismiss Portions of Contention 4 as Moot)

A In this decision, the Board concludes that Intervenors’ challenges to the adequacy of the Applicant’s environmental report (ER) with respect to the environmental impacts of dewatering associated with the proposed Levy Nuclear Plant (LNP) continue to serve as viable challenges to the similar sections of the Staff’s draft environmental impact statement (DEIS) and thus are not moot. The Applicant, Progress Energy Florida (PEF), has not shown that the differences between the DEIS and the ER (e.g., relocation of LNP production wells, DEIS discussion of certain groundwater use conditions imposed by the State of Florida) establish a change in circumstances sufficient to render this Contention 4 (C-4) moot.

B Publication of the NRC Staff’s DEIS in a proceeding may moot a contention challenging the environmental analysis in the applicant’s ER, if the DEIS dispenses with the issues raised in the original contention challenging the ER. In such a case, the intervenor may file a new or amended contention challenging the relevant new or differing portion of the DEIS.

C The DEIS, like the ER, must cover all significant environmental impacts associated with the LNP project, including offsite environmental impacts.

D Contention 4, which challenges the adequacy of the analysis of the environmental impacts associated with dewatering, is not rendered moot by the fact that PEF proposes to move its groundwater production wells from the site to an adjacent property.

E Although the NRC Staff does not need to duplicate the environmental studies done by the State of Florida and may reference and rely on the groundwater use conditions imposed by the State, such studies and conditions do not relieve the NRC of its duty under NEPA to conduct an independent “hard look” analysis of all environmental impacts related to active dewatering during operations at the LNP. The existence of a state study or state conditions does not moot NRC’s obligations under NEPA.

F PEF has not shown that the aspects of the NRC Staff’s DEIS that differ from PEF’s ER sufficiently moot or resolve the issue of adequacy of the environmental impact assessment.

G The Commission’s “migration tenet” applies to C-4 in this proceeding, in that once the NRC Staff issues its DEIS, a contention that was originally admitted as a challenge to the ER may be treated as a challenge to the similar section of the DEIS.

H The migration tenet obviates the requirement to file the same contention (and litigate its admissibility) three times — once against the ER, once against the DEIS, and once against the final environmental impact statement (FEIS).

I The migration tenet applies where, as here, the information in the DEIS is sufficiently similar to the information in the ER.

LBP-11-2 NEXTIERA ENERGY SEABROOK, LLC (Seabrook Station, Unit 1), Docket No. 50-443-LR (ASLBP No. 10-906-02-LR-BD01); LICENSE RENEWAL; February 15, 2011; MEMORANDUM AND ORDER (Ruling on Petitions for Intervention and Requests for Hearing)

A This 10 C.F.R. Part 54 proceeding concerns the application of NextEra Energy Seabrook, LLC, to renew the operating license for Seabrook Station, Unit 1, a nuclear power reactor located in Rockingham County, New Hampshire. Two groups petitioned to intervene and requested a hearing: (1) Beyond Nuclear, the Sea coast Anti-Pollution League, and the New Hampshire Sierra Club; and (2) Friends of the Coast and the New England Coalition. Having determined that each of the petitioning organizations demonstrated standing and that the sole contention proffered by the first group and three of the four contentions proffered
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

by the second group are admissible, in whole or in part, under 10 C.F.R. § 2.309(f)(1), the Board grants
the petitions and admits each petitioner as a party.

B To intervene as a party in an adjudicatory proceeding addressing a proposed license action, a
petitioner must (1) establish it has standing; and (2) proffer at least one admissible contention. 10 C.F.R.
§ 2.309(a).

C To determine whether a late-filed petition will be considered, the licensing board must balance the
eight factors set out in 10 C.F.R. § 2.309(c)(1), of which “good cause . . . for the failure to file on time”
is the most important. Crow Butte Resources, Inc. (North Trend Expansion Project), CLI-09-12, 69 NRC
535, 549 n.61 (2009) (referring to 10 C.F.R. § 2.309(c)(1)(i)).

D Persistent difficulties with the NRC electronic filing system despite good-faith efforts shows good
cause for submitting a petition shortly after the deadline, especially in light of petitioners’ having served
all parties by e-mail just minutes after the deadline.

E Where the board allowed petitioners to file a corrected version of an expert declaration that contained
numerous typographical errors, and where some of petitioners’ corrections clearly went beyond what the
board expected, the board did not try to parse which changes were authorized and did not consider or rely
on the corrected version.

F An organization may represent the interests of its members using representational standing if it can:
(1) show that the interests it seeks to protect are germane to its own purpose; (2) identify, by name
and address, at least one member who qualifies for standing in his or her own right; (3) show that it is
authorized by that member to request a hearing on his or her behalf; and (4) show that neither the claim
asserted nor the relief requested requires an individual member’s participation in the organization’s legal
omitted).

G Traditional judicial standing concepts require a showing that the individual has suffered or might
suffer a concrete and particularized injury that is (1) fairly traceable to the challenged action; (2) likely
redressible by a favorable decision, Georgia Institute of Technology (Georgia Tech Research Reactor,
Atlanta, Georgia), CLI-95-12, 42 NRC 111, 115 (1995) (citing Lujan v. Defenders of Wildlife, 504
U.S. 555, 560-61 (1992)); and (3) arguably within zone of interests protected by the governing statutes,
Florida Power & Light Co. (St. Lucie Nuclear Power Plant, Units 1 and 2), CLI-89-21, 30 NRC 325,
329 (1989) (quoting Metropolitan Edison Co. (Three Mile Island Nuclear Station, Unit 1), CLI-83-25, 18

H The NRC presumes that an individual has standing to intervene without the need to address traditional
standing concepts upon a showing that he or she lives within, or otherwise has frequent contacts with, a
geographic zone of potential harm. St. Lucie, CLI-89-21, 30 NRC at 329. The pertinent zone in operating
license renewal proceedings and other power reactor license matters is the area within a 50-mile radius of
the site. Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-09-20,
70 NRC 911, 917 (2009).

I An admissible contention must: (1) state the specific legal or factual issue sought to be raised; (2)
briefly explain the basis for the contention; (3) demonstrate that the issue raised is within the proceeding’s
scope; (4) demonstrate that the issue raised is material to the findings the NRC must make to support
the action that is involved in the proceeding; (5) concisely state the alleged facts or expert opinions that
support the petitioner’s position and upon which the petitioner intends to rely at the hearing, including
references to the specific sources and documents on which the petitioner intends to rely; and (6) show that
a genuine dispute exists on a material issue of law or fact by referring to specific portions of the application
that the petitioner disputes or, if the application is alleged to be deficient, by identifying such deficiencies
and the supporting reasons for this allegation. 10 C.F.R. § 2.309(f)(1)(i)-(vi).

J “[N]o rule or regulation of the Commission . . . is subject to attack . . . in any adjudicatory proceeding”
unless the petitioner first obtains a waiver. 10 C.F.R. § 2.335(a).

K When a contention alleges the need for further study of an alternative, from an environmental
perspective, “such reasonableness determinations are the merits, and should only be decided after the
contention is admitted.” Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and
2), LBP-09-10, 70 NRC 51, 86 (2009) (emphasis in original), rev’d in part on other grounds, CLI-10-2,
71 NRC 27, 29 (2010).
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

L  Although “remote and speculative” alternatives need not be addressed in an applicant’s environmental report, see Vermont Yankee Nuclear Power Corp. v. Natural Resources Defense Council, Inc., 455 U.S. 519, 551 (1978) (quoting Natural Resources Defense Council, Inc. v. Morton, 458 F.2d 827, 837-38 (1972)), there is an the obligation to consider alternatives “as they exist and are likely to exist.” Carolina Environmental Study Group v. United States, 510 F.2d 796, 801 (D.C. Cir. 1975).

M  Just as the NRC Staff does not accept an applicant’s representation that an aging management plan is consistent with the GALL Report without its own, independent confirmation of the facts, petitioners are not foreclosed from asserting a contention that, at a minimum, likewise requires such confirmation.

N  Whether electrical transformers are active or passive components remains an unresolved issue because the Commission has never directly spoken to the issue. Only passive components are subject to aging management review.

O  The key functions of buried systems, structures, and components that are the focus of the license renewal safety review under 10 C.F.R. Part 54 do not include the prevention of inadvertent radioactive leaks. Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station) CLI-10-14, 71 NRC 449, 461 (2010). Buried pipelines, channels, and tanks that fall under aging management provide safety-related functions by maintaining adequate flow and pressure.

P  In order to demonstrate that their concerns raise a material dispute with a SAMA analysis, petitioners must provide sufficient information to show that, if their proposed refinements were incorporated, it is “genuinely plausible” that cost-benefit conclusions might change.

Q  “NEPA ‘imposes no legal duty on the NRC to consider intentional malevolent acts . . . in conjunction with commercial power reactor license renewal applications.’” Pilgrim, CLI-10-14, 71 NRC at 476 (quoting AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-07-8, 65 NRC 124, 129 (2007)).

R  Spent fuel pool storage is exempt from required analysis of alternatives to mitigate severe accidents because it is a Category 1 issue. 10 C.F.R. Part 51, Subpart A, Appendix B.

S  Citation of studies indicating that source terms from the Modular Accident Analysis Progression (MAAP) code are lower than results from Source Term Code Package or NUREG-1150 satisfies the requirements of 10 C.F.R. § 2.309(f)(i)(v).

T  A contention that applicant’s SAMA analysis improperly ignored radioactive waste disposal is outside the scope of the proceeding because it directly challenges the generic determinations in Table B-1 of Appendix B to Part 51.

U  Challenges to the $2000/person-rem conversion factor, to use of a single dose-rate reduction effectiveness factor, and to evacuation times and assumptions are not admissible because petitioners presented no facts or expert opinion of error.

V  Contention that other costs were ignored is not admissible because petitioners presented no facts or expert opinion that show it to be plausible that including them might affect the outcome of the SAMA analysis.

W  In the absence of any assertion that Subpart G procedures should be used to resolve any of the admitted contentions, the Subpart I hearing procedures will be used to adjudicate each admitted contention.

LBP-11-3 MATTLINGLY TESTING SERVICES, INC. (Molt and Billings, Montana), Docket No. 30-20836-EA (ASLBP No. 10-905-02-EA-BD01); ENFORCEMENT; February 22, 2011; MEMORANDUM AND ORDER (Accepting Proposed Settlement and Dismissing Proceeding)

LBP-11-4 LUMINANT GENERATION COMPANY, LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), Docket Nos. 52-034-COL, 52-035-COL (ASLBP No. 09-886-09-COL-BD01); COMBINED LICENSE; February 24, 2011; MEMORANDUM AND ORDER (Ruling on Motion for Summary Disposition of Contention 18 and Alternatives Contention A)

A  The Licensing Board grants the Applicant’s motion for summary disposition of the last remaining contention in the proceeding, which concerns: (1) Intervenors’ allegation that Applicant had not considered the feasibility under NEPA of an alternative consisting of a combination of solar and wind energy, energy storage methods, and natural gas supplementation, to produce baseload power; (2) the reasonable availability of the parts of the combination for consolidation into an integrated system; (3) the feasibility of the use of the combination in the area served by Applicant’s plant; (4) the extent to which there might be efficiencies arising from overlapping uses of land for each of the four parts of the combination as well as for other reasonable purposes; and, (5) if shown to be environmentally preferable, the extent to which operation and maintenance costs of solar in such combination might be a comparative benefit.
Alternatively, the Board finds the contention most, based on the NRC Staff’s consideration of these matters in its DEIS, and Applicant’s motion and support therefor.

B In 10 C.F.R. Part 2, Subpart L proceedings, NRC regulations require, in 10 C.F.R. § 2.1205(e), that in ruling on motions for summary disposition licensing boards are to apply the standards of 10 C.F.R. Part 2, Subpart G, which in section 2.710(d)(2) provides that summary disposition should be granted “if the filings in the proceeding, depositions, answers to interrogatories, and admissions on file, together with the statements of the parties and the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a decision as a matter of law.”

C In ruling on summary disposition motions it is appropriate for licensing boards to look to NRC regulatory and case law, and also to federal court case law on summary judgment under Rule 56 of the Federal Rules of Civil Procedure. Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-11, 71 NRC 287, 297 (2010).

D The party moving for summary disposition bears the burden of demonstrating that there is no genuine issue as to any material fact and that it is entitled to a decision in its favor. If the proponent of the motion fails to make the requisite showing, the licensing board must deny the motion — even if the opposing party chooses not to respond or its response is inadequate. Advanced Medical Systems, Inc. (One Factory Row, Geneva, Ohio 44041), CLI-93-22, 38 NRC 98, 102 (1993).

E In assessing whether a party moving for summary judgment has met his or her burden, all inferences to be drawn from underlying facts must be viewed in the light most favorable to the party opposing the motion. “[T]he record must show the movant’s right to [summary judgment] ‘with such clarity as to leave no room for controversy,’” and must demonstrate that his opponent “would not be entitled to [prevail] under any discernible circumstances.” Summary judgment “should be awarded only when the truth is quite clear.” “If the moving party meets its burden, then and only then is the nonmoving party required to proffer evidence that contradicts the moving party’s showing and that proves the existence of a genuine issue of material fact. . . . If the moving party does not meet its burden, however, the nonmoving party is, without making any showing, entitled to a denial of the motion. . . . Although it is risky for a nonmoving party to fail to proffer evidence in response to the moving party’s showing, such a failure does not automatically mandate granting of the motion.” McKinney v. Dole, 765 F.2d 1129, 1135 (D.C. Cir. 1985).

F If, considering only the moving party’s support for its motion, the board determines that it has met its burden, the board then looks to whether an opponent of the motion has overcome the movant’s case by showing a genuine dispute on a material issue of fact.

G In attempting to overcome a movant’s case, “a party opposing the motion may not rest upon [ ] mere allegations or denials,” but must state “specific facts showing that there is a genuine issue of fact’’ for hearing. It is not sufficient . . . for there merely to be the existence of some alleged factual dispute between the parties, for ‘the requirement is that there be no genuine issue of material fact.’ ‘Only disputes over facts that might affect the outcome’ of a proceeding would preclude summary disposition. ‘Factual disputes that are . . . unnecessary will not be counted.’ . . . If the evidence in favor of the nonmoving party is ‘merely colorable’ or ‘not significantly probative,’ summary disposition may be granted.” Pilgrim, CLI-10-11, 71 NRC at 297 (quoting 10 C.F.R. § 2.710(b), (d)(2); Anderson v. Libertys Lobby, 477 U.S. 242, 247-52 (1986) (noting emphasis in original)).

H If the question is a close one it must be carefully ascertained whether any factual disputes asserted are genuine and relate to a material issue or issues. If the opposing party fails to meet this standard, and the moving party has successfully shown that there is no genuine dispute on a material issue of fact and that it is entitled to a decision as a matter of law, then the motion must be granted, but any doubt as to the existence of a genuine issue of material fact is resolved against the moving party.

I In this proceeding Applicant agrees that the four-part combination alternative at issue is developed, proven, available, and reasonable, if natural gas provides the majority of the power, and concedesa that, even if natural gas does not provide the majority of power, the four-part combination is at least theoretically feasible, but also points out that no such combination exists anywhere in the world, shows that a wind-solar-storage combination would produce less than half the 3200 MWe the proposed units would produce, and states that it is not reasonable or prudent for a utility or merchant generator to use a technology that has not been demonstrated, either at an existing commercial generating facility or in a pilot project or small-scale facility that shows it works and is cost-effective. Applicant goes into detail on the environmental impacts of the four-part combination, compares these impacts to those of the proposed
new units, and concludes that the impacts of the combination would be greater, primarily as to land use and aesthetics.

Intervenors make various arguments but provide little in the way of facts to support their arguments, and contest only five provisions of Applicant’s statement of material facts. Intervenors contest neither any part of the environmental impacts section of Applicant’s statement, nor the final comparison in Applicant’s statement of the environmental effects of the two new proposed units and the four-part combination.

The Licensing Board finds that Applicant considered all material facts, showed that there existed no genuine issue of material fact, and showed that a decision in its favor was warranted as a matter of law. Considering (1) the only facts in Applicant’s Statement of Material Facts that Intervenors did contest and the manner in which they contested them, and (2) any other parts of Intervenors’ submissions that even arguably contradicted any of the showings of the Applicant, the board finds these do not rise to a level of materiality that would establish a genuine dispute on a material issue of fact. Thus, the Licensing Board finds that Intervenors, in addition to being disorganized and incomplete in some instances, failed to demonstrate any genuine dispute on any material issue of fact, so as to overcome Applicant’s showing of no genuine dispute on a material issue of fact. It may be that future technology will produce renewable energy alternatives or combination alternatives that are environmentally preferable to nuclear and that can also produce equivalent power, but based on the record before the Licensing Board, this is not the case at the present time, even resolving all doubts in Intervenors’ favor. The Board’s preliminary conclusion that Applicant met its burden, of showing that there existed no genuine issue as to any material fact and that it was entitled to a decision in its favor as a matter of law, therefore remains its conclusion, even considering Intervenors’ submissions and resolving any doubts in a light most favorable to them.

In view of the provision of 10 C.F.R. § 2.710(a) that “[a]ll material facts set forth in the statement required to be served by the moving party will be considered to be admitted unless controverted by the statement required to be served by the opposing party,” and the provision that requires a party opposing summary disposition to provide a “statement of the material facts as to which it is contended there exists a genuine issue to be heard,” if a movant for summary disposition asserts certain facts in its statement of material facts, this makes such facts at least arguably material to matters within the scope of the contention, and therefore subject to being disputed and controverted by the opponent of summary disposition, until and unless they are subsequently found to be immaterial by the body deciding the matter. If any response goes beyond the scope of the fact(s) being responded to, then that portion that goes beyond that scope may be ruled inadmissible on that ground, and a party responding to a summary disposition motion may not raise “distinctly new asserted deficiencies.” See Pilgrim, CLI-10-11, 71 NRC at 310. But a party, which has certain rights in an NRC proceeding, could not appropriately be foreclosed from responding at all, by simply and straightforwardly disputing a statement put forward by an opposing party as a material fact. Intervenors were not denied the right to respond to Applicant’s statement of material facts.

In ruling on whether a contention is moot, a licensing board looks to whether a “justiciable controversy” still exists, and whether an issue is still “live,” such that a party still has a legal interest in the issue. The Licensing Board in this case finds, based on both the NRC Staff’s DEIS and the Applicant’s consideration of the matters at issue in its motion for summary disposition and supporting documents, that no justiciable controversy still exists with respect to the contention at issue and that none of the issues contained within the contention are still “live,” such that Intervenors have any further legal interest in those issues.

The Board declines to issue a proposed protective order jointly submitted by the Staff and all of the parties because the Board is concerned that the proposed protective order would violate NRC’s strong...
policy in favor of openness and transparency and cast too broad a cloak of secrecy over adjudicatory hearings that are required to be public under section 181 of the Atomic Energy Act and 10 C.F.R. § 2.328.

D In lieu of issuing the problematic protective order proposed jointly by all of the parties, the Board issues a protective order and nondisclosure agreement that it considers to be clear and legally sound.

LBP-11-6 FLORIDA POWER & LIGHT COMPANY (Turkey Point Nuclear Generating Plant, Units 6 and 7), Docket Nos. 52-040-COL, 52-041-COL (ASLBP No. 10-903-02-COL-BD01); COMBINED LICENSE; February 28, 2011; MEMORANDUM AND ORDER (Ruling on Petitions to Intervene)

A To participate in a proceeding as an intervenor, a petitioner must (1) establish standing and (2) proffer at least one admissible contention. See 10 C.F.R. § 2.309(a).

B The standing requirements for NRC adjudicatory proceedings derive from the Atomic Energy Act (AEA), which requires the NRC to provide a hearing “upon the request of any person whose interest may be affected by the proceeding.” 42 U.S.C. § 2239(a)(1)(A).

C Under the general standing requirements in our implementing regulations, a petitioner must state (10 C.F.R. § 2.309(d)(1)): (i) The name, address and telephone number of the requestor or petitioner; (ii) The nature of the requestor’s/petitioner’s right under the [relevant statute] to be made a party to the proceeding; (iii) The nature and extent of the requestor’s/petitioner’s property, financial or other interest in the proceeding; and (iv) The possible effect of any decision or order that may be issued in the proceeding on the requestor’s/petitioner’s interest.”

D In determining whether a petitioner has demonstrated standing, the Commission applies contemporaneous judicial concepts of standing, which require a petitioner to "(1) allege an 'injury in fact' that is (2) 'fairly traceable to the challenged action' and (3) is 'likely' to be 'redressed by a favorable decision.'” Sequoyah Fuels Corp. and General Atomics (Gore, Oklahoma Site), CLI-94-12, 40 NRC 64, 71-72 (1994) (quoting Lujan v. Defenders of Wildlife, 504 U.S. 555, 560-61 (1992) (citations and internal quotations omitted)). In the context of reactor licensing proceedings, however, a petitioner is deemed to have standing pursuant to the Commission’s so-called “proximity” presumption rule by showing that he or she resides in, or frequents the area within, a 50-mile radius of the facility. See PPL Bell Bend, LLC (Bell Bend Nuclear Power Plant), CLI-10-7, 71 NRC 133, 138 (2010).

E An organization may establish standing to intervene based on a theory of representational standing. To demonstrate representational standing, an organization must: (1) show that at least one of its members might be affected by the proceeding, which can be accomplished by showing that a member satisfies either the 50-mile “proximity” presumption or traditional standing elements; (2) identify that member by name and address; and (3) show that the member has authorized the organization to represent him or her and to request a hearing on his or her behalf. See Consumers Energy Co. (Palsades Nuclear Plant), CLI-07-18, 65 NRC 399, 409 (2007); GPU Nuclear, Inc. (Oyster Creek Nuclear Generating Station), CLI-00-6, 51 NRC 193, 202 (2000). Additionally, the interests the “organization seeks to protect must be germane to its own purpose,” and “neither the asserted claim nor the requested relief must require an individual member to participate in the organization’s legal action.” Palsades, CLI-07-18, 65 NRC at 409; see also Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), CLI-99-10, 49 NRC 318, 323 (1999).

G Pursuant to Commission regulation, a municipality is deemed to have standing in a reactor licensing proceeding that involves a facility located within its boundaries. See 10 C.F.R. § 2.309(d)(2). Where a municipality seeks to participate in a reactor licensing proceeding that does not involve a facility within the municipality’s boundaries, it can, for purposes of establishing standing, rely on the 50-mile “proximity” presumption to the same extent as an individual or an organization. Thus, a municipality satisfies Commission standing requirements in a reactor licensing proceeding by showing either that its residents live within 50 miles of the facility, or that its boundaries extend to within 50 miles of the facility.

H Pursuant to the rationale in Private Fuel Storage, it may reasonably be presumed that the interests a municipality seeks to represent on behalf of its residents are germane to its own purposes. See Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), CLI-98-13, 48 NRC 26, 32 (1998); accord Carolina Power & Light Co. (Shearon Harris Nuclear Power Plant), LBP-99-25, 50 NRC 25, 29 (1999).

I For a timely filed contention to be admissible, it must satisfy the requirements in 10 C.F.R. § 2.309(f).

J Pursuant to those standards, an admissible contention must: (1) “[p]rovide a specific statement of the issue of law or fact to be raised”; (2) “[p]rovide a brief explanation of the basis for the contention”; (3) “[d]emonstrate that the issue raised in the contention is within the scope of the proceeding”; (4)
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

“[d]emonstrate that the issue raised . . . is material to the findings the NRC must make to support the action that is involved in the proceeding”; (5) “[p]rovide a concise statement of the alleged facts or expert opinions . . . together with references to the specific sources and documents on which the requestor/petitioner intends to rely”; and (6) “provide sufficient information to show that a genuine dispute exists . . . on a material issue of law or fact,” including “references to specific portions of the application . . . the petitioner disputes . . . or, if the petitioner believes that the application fails to contain information on a relevant matter as required by law, the identification of each failure . . . .” 10 C.F.R. § 2.309(f)(1).

A contention must be rejected if: (1) it constitutes an attack on applicable statutory requirements; (2) it challenges the basic structure of the Commission’s regulatory process or is an attack on the regulations; (3) it merely expresses the petitioner’s view of what a governing policy ought to be; (4) it seeks to raise an issue improper for adjudication in the proceeding or not applicable to the facility in question; or (5) it seeks to raise an issue that is not concrete or is otherwise not litigable. See Philadelphia Electric Co. (Peach Bottom Atomic Power Station, Units 2 and 3), ALAB-216, 8 AEC 13, 20-21 (1974).

The multifactor contention admissibility test in section 2.309(f)(1) — which is “strict by design” (AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-06-24, 64 NRC 111, 118 (2006)) — was crafted by the Commission to “raise the threshold bar for an admissible contention.” Duke Energy Corp. (Oconee Nuclear Station, Units 1, 2, and 3), CLI-99-11, 49 NRC 328, 334 (1999). Under the previous contention-admissibility rule, a contention could be admitted and litigated “based on little more than speculation . . . . Admitted intervenors often had negligible knowledge of nuclear power issues and, in fact, no direct case to present, but instead attempted to unearth a case through cross-examination.” Id. “Congress therefore called upon the Commission to make ‘fundamental changes’ in its public hearing process to ensure that ‘hearings serve the purpose for which they were intended: to adjudicate genuine, substantive safety and environmental issues placed in contention by qualified intervenors.”’ Id. (quoting H.R. Rep. No. 97-177, at 151 (1981)).

The contention admissibility rule serves to ensure that admitted contentions (1) focus on real disputes that can be resolved in an adjudication, (2) establish a sufficient factual and legal foundation to warrant further inquiry, and (3) put other parties on notice of the disputed issues so they will know precisely those claims they must support or oppose. See Oconee, CLI-99-11, 49 NRC at 334.

Pursuant to Commission regulations that implement the National Environmental Policy Act (NEPA), 42 U.S.C. §§ 4331 et seq., every COL application must be accompanied by an ER to aid the Commission in its preparation of an Environmental Impact Statement (EIS) in compliance with section 102(2) of NEPA. See 10 C.F.R. § 51.14(a). An ER must discuss: (1) the impacts of the proposed action on the environment; (2) adverse environmental effects of the proposed action that cannot be avoided; (3) alternatives to the proposed action; (4) the relationship between local short-term uses of the environment and the maintenance and enhancement of long-term productivity; and (5) any irreversible and irretrievable commitments of resources associated with the proposed action. See 10 C.F.R. § 51.45(b). The ER shall “include an analysis that considers and balances the environmental effects of the proposed action, the environmental impacts of alternatives to the proposed action, and alternatives available for reducing or avoiding adverse environmental effects.” Id. §51.45(c). The ER “must also contain an analysis of the cumulative impacts of the activities to be authorized by the [COL].” Id. The ER shall discuss environmental impacts “in proportion to their significance” (10 C.F.R. § 51.45(b)(1)), and it “should contain sufficient data to aid the Commission in its development of an independent analysis.” Id. § 51.45(c).

In enacting NEPA, Congress’s twin aims were to: (1) require an agency to consider every significant aspect of the environmental impact of a proposed action; and (2) ensure the agency will inform the public that it has considered environmental concerns in its decisionmaking process. See Baltimore Gas & Electric Co. v. Natural Resources Defense Council, Inc., 462 U.S. 87, 97 (1983). To effect these aims, NEPA requires an agency to “take a ‘hard look’ at the environmental consequences before taking a major action” and to report the result of that hard look in an EIS. Id. Section 102(2) of NEPA, 42 U.S.C. § 4332(2), prescribes the scope of environmental concerns that must be considered in the EIS.

In analyzing the admissibility of a proffered contention, a licensing board need not turn a blind eye to those portions of a petitioner’s exhibits that might militate against admissibility. See Vermont Yankee Nuclear Power Corp. (Vermont Yankee Nuclear Power Station), ALAB-919, 30 NRC 29, 48 (1989), vacated on other grounds, CLI-90-4, 31 NRC 333 (1990) (“[B]oards must do more than uncritically accept a party’s mere assertion that a particular document supplies the basis for its contention, without even reviewing the document itself to determine if it . . . appears to support a litigable contention.”).
Preparation of the ER is the first step in the NEPA process. Its purpose is to aid the NRC Staff in the performance of its NEPA responsibilities, which consist of preparing the draft EIS (10 C.F.R. §§ 51.70, 51.71), releasing the draft EIS to the public for comments (id. §§ 51.73, 51.74), and preparing and distributing the final EIS after receipt and consideration of comments. Id. §§ 51.90, 51.91, 51.93, 51.94. A decision by a licensing board rejecting a contention challenging the adequacy of a portion of an ER does not necessarily mean the NRC will satisfy its NEPA obligations by simply importing that portion of the ER into the EIS. Rather, the EIS must comply with NEPA and the above-cited Commission regulations, which describe the scope of the “detailed statement” (42 U.S.C. § 4332(2)(C)) that must be contained in the EIS. When the NRC Staff issues the EIS, Commission regulations provide an opportunity to either amend admitted contentions or proffer new contentions based on “data or conclusions in the NRC draft or final [EIS] . . . or any supplements relating thereto, that differ significantly from the data or conclusions in the applicant’s documents.” 10 C.F.R. § 2.309(i)(2).

The mere existence of requests for additional information, if generated by the NRC Staff, do not, in and of themselves, establish grounds for a litigable contention. See Nuclear Management Co., LLC (Monticello Nuclear Generating Plant), CLI-06-6, 63 NRC 161, 164 (2006). This principle applies a fortiori in the context of comments and questions generated by a state agency that is examining a state application to determine compliance with state legal and technical standards.

The NRC regulations implementing NEPA require an applicant to submit an ER discussing “[t]he impact of the proposed action on the environment” (10 C.F.R. § 51.45(b)(1) (emphasis added)) and “appropriate alternatives to recommended courses of action in any proposal which involves unresolved conflicts concerning alternative uses of available resources” (id. § 51.45(b)(3)) (citing NEPA § 102(2)(E), 42 U.S.C. § 4332(2)(E)). This regulation requires an analysis of the environmental impacts of and alternatives to the proposed action; it does not extend to the impacts on another ongoing or proposed restoration effort in isolation from environmental impacts.

A contention of omission is one that alleges an application suffers from an improper omission, whereas a contention of adequacy raises a specific substantive challenge to how particular information or issues have been discussed in the application. See AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), LBF-06-16, 63 NRC 737, 742 (2006). A contention can contain an omission component and an adequacy component. See id. at 742 n.7.

A contention must “identify the disputed portion of the application, and provide ‘supporting reasons’ for the challenge to the application. Similarly a petitioner believes that an application fails to contain information on a ‘relevant matter as required by law,’ the contention must identify each failure and the supporting reasons for the petitioner’s belief.” USEC Inc. (American Centrifuge Plant), CLI-06-10, 63 NRC 451, 456 (2006) (internal footnotes omitted).

An ER need only discuss reasonably foreseeable environmental impacts of a proposed action. See, e.g., Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), CLI-10-2, 71 NRC 27, 46 (2010).

The NRC Staff, incident to its preparation of the Safety Evaluation Report, has an obligation to ensure an applicant’s proposed plant’s design basis will protect public health and safety (see 10 C.F.R. § 52.97(a)(1)(vi)), and the Staff accomplishes this objective by, inter alia, verifying that the design basis will withstand maximum flooding events. See id. Part 50, App. A. § I. Criterion 2 (“Structures, systems, and components important to safety shall be designed to withstand the effects of natural phenomena such as earthquakes, tornadoes, hurricanes, floods, tsunami, and seiches without loss of capability to perform their safety functions.”). An applicant has a continuing obligation to ensure its design basis will withstand such events. Cf. Supplemental Staff Guidance to NUREG 1555, “Environmental Standard Review Plan,” for Consideration of the Effects of Greenhouse Gases and of Climate Change at 11 (Apr. 8, 2010) (“If it becomes evident that long-term climate changes influence the most severe of natural phenomena reported in the site vicinity, then a license holder may need to take action to ensure the licensing basis is preserved.”). To the extent future climate-related evidence might indicate the design basis of a nuclear power plant will not withstand a maximum flooding event, Commission regulations provide a remedial mechanism for members of the public whereby “[a]ny person may file a request to institute a proceeding . . . to modify, suspend or revoke a license . . . “ 10 C.F.R. § 2.206(a).

NEPA “itself does not mandate a cost-benefit analysis,” but the statute “is generally regarded as calling for some sort of a weighing of the environmental costs against the economic, technical, or other public benefits of a proposal.” Louisiana Energy Services, L.P. (Claiborne Enrichment Center), CLI-98-3,
DIGESTS

ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

47 NRC 77, 88 (1998) (citations omitted). “ ‘Need for power’ is a shorthand expression for the ‘benefit’ side of the cost–benefit balance which NEPA mandates for a proceeding considering the licensing of a nuclear power plant.” Public Service Co. of New Hampshire (Seabrook Station, Units 1 and 2), ALAB-422, 6 NRC 33, 90 (1977), aff’d, New England Coalition on Nuclear Pollution v. NRC, 582 F.2d 87 (1st Cir. 1978)).

The Commission has explained that preparing a “need for power” discussion should not be an onerous task: “[W]hile a discussion of need for power is required, the Commission is not looking for burdensome attempts by the applicant to precisely identify future market conditions and energy demand, or to develop detailed analyses of system generating assets, costs of production, capital replacement ratios, and the like in order to establish with certainty that the construction and operation of a nuclear power plant is the most economical alternative for generation of power.” Nuclear Energy Institute; Denial of Petition for Rulemaking, 68 Fed. Reg. 55,905, 55,910 (Sept. 29, 2003); see also South Carolina Electric & Gas Co. (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-10-1, 71 NRC 1, 17 (2010). A state public service commission’s determination of need for power may be relied on by the NRC in its own analysis, as long as that determination “is neither shown nor appears on its face to be seriously defective.” Carolina Power & Light Co. (Shearon Harris Nuclear Power Plant, Units 1, 2, 3, and 4), ALAB-490, 8 NRC 234, 241 (1978). The NRC Staff has issued guidance for how it evaluates the adequacy of a state determination of need for power; namely, the state’s process must be “(1) systematic, (2) comprehensive, (3) subject to confirmation, and (4) responsive to forecasting uncertainty.” U.S. Nuclear Regulatory Commission, Environmental Standard Review Plan, Standard Review Plans for Environmental Reviews for Nuclear Power Plants, NUREG-1555, at 8.1-2 (Oct. 1999).

Inherent in any forecast of future electric power demands is a substantial margin of uncertainty.” Niagara Mohawk Power Corp. (Nine Mile Point Nuclear Station, Unit 2), ALAB-264, 1 NRC 347, 365 (1975).

Although NUREGs are not legally binding, they are guidance documents (Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), CLI-01-22, 54 NRC 255, 264 (2001)), and an applicant’s failure to comply with such documents can potentially give rise to an admissible contention. The Commission has long acknowledged the uncertainty inherent in long-range demand forecasts: “[E]very prediction has associated uncertainty and . . . long-range forecasts of this type are especially uncertain in that they are affected by trends in usage, increasing rates, demographic changes, industrial growth or decline, the general state of the economy, etc. These factors exist even beyond the uncertainty that inheres to demand forecasts: assumptions on continued use from historical data, range of years considered, the area considered, extrapolations from usage in residential, commercial, and industrial sectors, etc.” Carolina Power & Light Co. (Shearon Harris Nuclear Power Plant, Units 1, 2, 3, and 4), CLI-79-5, 9 NRC 607, 609-10 (1979).

The possible impact of proposed legislation and regulations need not be addressed in the ER, because any effect they might have is not “reasonably foreseeable” until they are enacted or promulgated.

An alternative that fails to meet the purpose of the project does not need to be further examined in the ER. See Exelon Generation Co., LLC (Early Site Permit for Clinton ESP Site), CLI-05-29, 62 NRC 801, 806-08 (2005).

Before issuing a COL under Part 52, the NRC must conclude “there is reasonable assurance that adequate protective measures can and will be taken in the event of a radiological emergency.” 10 C.F.R. § 50.47(a)(1)(ii). The NRC is to “base its finding on a review of the Federal Emergency Management Agency (FEMA) findings,” and “[i]n any NRC licensing proceeding, a FEMA finding will constitute a rebuttable presumption on questions of adequacy and implementation capability.” Id. § 50.47(a)(2).

As the Commission stated in American Centrifuge, CLI-06-10, 63 NRC at 457: “It is simply insufficient . . . for a petitioner to point to an Internet Web site or article and expect the Board on its own to discern what particular issue a petitioner is raising, including what section of the application, if any, is being challenged as deficient and why. A contention must make clear why cited references provide a basis for a contention.”

Governing case law requires a petitioner’s reply to “be ‘narrowly focused on the legal or logical arguments presented in the [applicant] or NRC staff answer.’” Louisiana Energy Services, L.P. (National Enrichment Facility), CLI-04-25, 60 NRC 223, 225 (2004) (citations omitted).

The general emergency class involves actual or imminent substantial core degradation or
DIGESTS

ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

melting with the potential for loss of containment. The preferred initial protective action for this class is to evacuate immediately about 2 miles in all directions from the plant and about 5 miles downwind, unless other conditions make evacuation dangerous.” NUREG-0654, “Criteria for Preparation and Evaluation of Radiological Emergency Response Plans and Preparedness in Support of Nuclear Power Plants,” Rev. 1, Supplement 3, App. 2 at 1-3 (July 1996).

HH Governing regulations (10 C.F.R. § 50.47(b)(10)) require that sheltering be considered in developing the recommended range of protective actions in the emergency plan.

II A contention of omission may be summarily rejected as inadmissible if (1) there is no requirement to address the topic allegedly omitted from the application, or (2) the topic that allegedly is omitted is, in fact, included in the application. See American Centrifuge, CLI-06-10, 63 NRC at 456.

JJ It is not the province of the NRC (and thus this Board) to enforce another agency’s regulations. See Hydro Resources, Inc. (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-98-16, 48 NRC 119, 120-22 & n.3 (1998).

KK Because Greater-Than-Class-C (Low-Level Radioactive Waste) LLRW “is the responsibility of the federal government” and thus unaffected by the closure of the Barnwell facility, the Commission has held that challenges to a COL applicant’s failure to provide information on long-term storage of Greater-Than-Class-C LLRW are outside the scope of a COL proceeding. See Levy County, CLI-10-2, 71 NRC at 47-48.

LL Applicants are obligated under 10 C.F.R. § 51.45(b) to prepare Environmental Reports that discuss, inter alia, “[t]he impact of the proposed action on the environment” and “[a]ny adverse environmental effects which cannot be avoided should the proposal be implemented.” 10 C.F.R. § 51.45(b)(1)-(2).

MM It is not the function of a licensing board to comb through the record searching for arguments in support of a proffered contention. See, e.g., SmithKline Beecham Corp. v. Apotex Corp., 439 F.3d 1312, 1320 (Fed. Cir. 2006) (“Judges are not like pigs, hunting for truffles buried in briefs.”) (quoting United States v. Dunkel, 927 F.2d 955, 956 (7th Cir. 1991)).

NN NRC regulations require that a COLA contain an FSAR that includes “information sufficient to enable the Commission to reach a final conclusion on all safety matters that must be resolved by the Commission before issuance of a combined license . . . regarding the kinds and quantities of radioactive materials expected to be produced in the operation and the means for controlling and limiting radioactive effluents and radiation exposures within the limits set forth in part 20 of this chapter . . . .” 10 C.F.R. § 52.79(a)(3). NRC regulations also require a COLA to “identify . . . the means to be employed, for keeping levels of radioactive material in effluents to unrestricted areas as low as is reasonably achievable [or ALARA].” Id. § 50.34(a).

OO Section 2.309(c)(1) requires balancing the following factors to the extent they apply to the particular late-filed contention: (1) the existence vel non of good cause; (2) the nature of the petitioner’s right to be a party to the proceeding; (3) the nature and extent of the petitioner’s interest in the proceeding; (4) the possible effect of the proceeding’s outcome on the petitioner’s interest; (5) the availability of other means to protect the petitioner’s interest; (6) the extent the petitioner’s interest will be represented by existing parties; (7) the extent the petitioner’s participation will broaden the issues or delay the proceeding; and (8) the extent the petitioner’s participation might assist in developing a sound record. The Commission has instructed that “good cause” is the most important factor. See AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-09-7, 69 NRC 235, 261 (2009).

PP Although citations to factually supported concerns raised by a state agency reviewing a proposed project are not necessarily insufficient to satisfy section 2.309(h)(1)(v), a petitioner may not rely on a document generated by a state agency if that document contains nothing more than a request for information. See, e.g., Crow Butte Resources, Inc. (North Trend Expansion Project), CLI-09-12, 69 NRC 535, 550-52 (2009).

QQ “A petitioner’s issue will be ruled inadmissible if the petitioner ‘has offered no tangible information, no experts, no substantive affidavits,’ but instead only ‘bare assertions and speculation.’” Fansteel, Inc. (Muskogee, Oklahoma, Site), CLI-03-13, 58 NRC 195, 203 (2003) (quoting Oyster Creek, CLI-00-6, 51 NRC at 208).

RR If at least one petitioner demonstrates standing and proffers an admissible contention so that its petition to intervene is granted, section 2.315(c) allows an interested local governmental body that has not been admitted as a party to participate in a hearing as an interested nonparty. A local governmental body that is participating as an interested nonparty may designate a single representative “to introduce
evidence, [to] interrogate witnesses” (if the admitted parties are permitted cross-examination), to “advise the Commission without requiring the [local governmental body’s] representative to take a position with respect to the issue, [to] file proposed findings in those proceedings where findings are permitted, and [to] petition for review by the Commission under [10 C.F.R. § 2.341 with respect to the admitted contentions.” 10 C.F.R. § 2.315(c).

Section 2.310(a) provides that the hearing procedures in Subpart L of 10 C.F.R. Part 2 will ordinarily be used in proceedings for the “grant, renewal, licensee-initiated amendment, or termination of licenses or permits.” See 10 C.F.R. § 2.310(a). Section 2.310(d) describes an exception to this rule in cases where the presiding officer determines by order that a contested matter necessitates resolution of a material issue of fact relating to a past activity “where the credibility of an eyewitness may reasonably be expected to be at issue, and/or issues of motive or intent of the party or eyewitness material to the resolution of the contested matter” (id. § 2.310(d)), in which case the hearing for resolution of the contested matter will be conducted under Subpart G of 10 C.F.R. Part 2. See id. Section 2.309(g) permits a petitioner to “address the selection of hearing procedures, taking into account the provisions of [10 C.F.R. § 2.310…].”

In this 10 C.F.R. Part 52 proceeding regarding the application of Nuclear Innovation North America LLC (NINA or Applicant) for combined licenses (COL) to construct and operate two new nuclear units, using the Advanced Boiling Water Reactor (ABWR) certified design, at its site in Matagorda County, Texas, ruling on motions by Intervenors seeking to admit six new contentions, and by Applicant and Staff seeking summary disposition of a previously admitted contention, as well as ruling on a matter remanded by the Commission regarding access to a draft guidance document, the Licensing Board (1) grants Intervenors’ motion in part, admitting Contention DEIS-1, as narrowed by the Board; (2) denies Applicant’s and Staff’s motion for summary disposition of Contention CL-2; and (3) concludes the matter of Intervenors’ access to the draft document is moot because Intervenors’ have since waived access to it.

Summary disposition, like summary judgment, is an extreme remedy, which should be granted with caution, especially before the parties have been afforded an opportunity to marshal their evidence. Additionally, when presented with conflicting expert opinions, licensing boards should be mindful that summary disposition is rarely proper. During summary disposition, it is not appropriate for boards “to untangle the expert affidavits and decide ‘which experts are more correct.’” Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), LBP-01-39, 54 NRC 497, 509 (2001) (quoting Norfolk Southern Corp. v. Oberly, 632 F. Supp. 1225, 1243 (D. Del. 1986)).

As applied specifically to Severe Accident Mitigation Alternatives (SAMA) analyses, the Commission has explained that a licensing board’s inquiry should not be whether there are “plainly better” methodologies or “whether the SAMA analysis can be refined further.” Rather, a licensing board’s inquiry is to be whether the SAMA analysis resulted in erroneous conclusions on which SAMAs and Severe Accident Mitigation Design Alternatives (SAMDAs) are found cost-beneficial to implement. Accordingly, there is no purpose for further refining a SAMDA analysis, “[u]nless it looks genuinely plausible that inclusion of an additional factor or use of other assumptions or models may change the cost-benefit conclusions for the SAMA candidates evaluated,” Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-11, 71 NRC 287, 317 (2010).

After reviewing the Technical Support Document (TSD) for the ABWR, the Commission determined that General Electric’s SAMDA analysis conclusion that there are no additional cost-beneficial SAMDAs for the ABWR should be applied in future licensing proceedings referencing the ABWR certified design as long as that facility’s site parameters are within the range specified in the TSD. See Standard Design Certification for the U.S. Advanced Boiling Water Reactor Design, 62 Fed. Reg. 25,800, 25,827 (May 12, 1997). However, because there is no list of site parameters specified in the TSD, a prerequisite for resolving SAMDA issues by rule is lacking. It is therefore impossible to demonstrate that the South Texas Project site parameters fall within the envelope defined by that list. This renders impossible the application of 10 C.F.R. Part 52, Appendix A, § VI.B.7 to resolve SAMDA issues by rule. NRC Staff’s creation of a list of site parameters for use in this proceeding cannot cure the absence of a list of site parameters in the TSD.

Although NEPA does not explicitly mention cost-benefit balancing, courts have interpreted the
statute as requiring federal agencies to balance the environmental costs against the anticipated benefits of a proposed action. 

**Louisiana Energy Services, L.P.** (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 88 (1998) (citations omitted). Section 51.107(a)(3) of the NRC’s rules addresses this mandate by requiring a “weighing [of] the environmental, economic, technical, and other benefits against environmental and other costs.” 10 C.F.R. § 51.107(a)(3). Therefore, as part of the NRC’s NEPA analysis for licensing a nuclear power plant, the agency must balance the costs and benefits resulting from issuance of a license.

When balancing benefits and costs under section 51.107(a)(3), one significant benefit of a combined license is the capacity of a new nuclear power plant to satisfy a need for additional electric power. See **Public Service Co. of Oklahoma** (Black Fox Station, Units 1 and 2), ALAB-573, 10 NRC 775, 804 (1979). Concomitantly, the NRC must address any purported need for additional power during its environmental review of the combined license application. See 10 C.F.R. § 51.71(d) (requiring the Draft EIS to “consider[ ] the economic, technical, and other benefits and costs of the proposed action’’); see also id. § 51.103(a)(3) (requiring the record of decision to discuss “relevant factors including economic and technical considerations’’ among alternatives).

A need for power assessment need not “precisely identify future market conditions and energy demand, or . . . develop detailed analyses of system generating assets, costs of production, capital replacement ratios, and the like in order to establish with certainty that the construction and operation of a nuclear power plant is the most economical alternative for generation of power.” See, e.g., 68 Fed. Reg. at 55,910 (citing Claiborne, CLI-98-3, 47 NRC at 88, 94). Rather, it is sufficient if the need for power analysis is at a level of detail “sufficient to reasonably characterize the costs and benefits associated with proposed licensing actions.” **South Carolina Electric & Gas Co.** (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-10-1, 71 NRC 1, 17 (2010) (citing 68 Fed. Reg. at 55,910). Otherwise “[g]nitting over the details of an economic analysis” would effectively “stand[ ] NEPA on its head by asking that the license be rejected not due to environmental costs, but because the economic benefits are not as great as estimated.” **Private Fuel Storage, L.L.C.** (Independent Spent Fuel Storage Installation), CLI-04-22, 60 NRC 125, 145 (2004) (internal quotation marks omitted). Finally, we note that because a need for power assessment necessarily entails forecasting power demands in light of substantial uncertainty and the duty of providing adequate and reliable service to the public, need for power assessments are inherently conservative. See **Niagara Mohawk Power Corp.** (Nine Mile Point Nuclear Station, Unit 2), ALAB-264, 1 NRC 347, 365-68 (1975), cited with approval in **Carolina Power & Light Co.** (Shearon Harris Nuclear Power Plant, Units 1, 2, 3, and 4), CLI-79-5, 9 NRC 607, 609-10 (1979).

Among other requirements for admitting a contention, Intervenors must demonstrate that the issue raised in the contention is material to a licensing decision, i.e., that the issue would make a difference in the licensing decision. **Duke Energy Co.** (Oconee Nuclear Station, Units 1, 2, and 3), CLI-99-11, 49 NRC 328, 333-34 (1999). Intervenors need not demonstrate that the issue will make a difference in the licensing decision. As a recent Board enunciated, at the contention admissibility stage of a proceeding, Intervenors need not marshal their evidence as though preparing for an evidentiary hearing. See, e.g., **Department of Energy** (High-Level Waste Repository), LBP-09-6, 69 NRC 367, 416 (2009) (noting that requiring petitioners to proffer additional and conclusive support for the effect of their proposed contentions “would improperly require . . . Boards to adjudicate the merits of contentions before admitting them”). Our regulations prudently avoid litigating issues whose resolution would not affect the outcome of a proceeding, but also contemplate that a fuller decision may be made at a later stage in litigation and on the merits.

**DIGESTS**

**ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS**

By its terms, EAJA applies to any “adjudication required by statute to be determined on the record after

**March 10,**

A By its terms, EAJA applies to any “adjudication required by statute to be determined on the record after

C After analyzing the relevant statutory provisions, the Commission stated “it is not unreasonable to conclude that no NRC proceeding other than an appeal to a board of contract appeals under the Contract Disputes Act or a Program Fraud Civil Remedies Act hearing is covered by the EAJA.” Equal Access to Justice Act: Implementation, 59 Fed. Reg. 23,119, 23,120 (May 5, 1994).

D The Appeal Board in Advanced Medical Systems thus held that materials license suspension proceedings are not covered by EAJA even though the NRC may voluntarily choose to employ on-the-record formal procedures, because such proceedings are not required by statute to be APA § 554 on-the-record hearings. Advanced Med. Sys., Inc. (One Factory Row, Geneva, OH 44041), ALAB-929, 31 NRC 271, 291 (1990).

E The Applicant’s argument that EAJA should apply to the enforcement proceeding brought against him because it was in fact “an on-the-record hearing that was very much like a trial proceeding,” regardless of whether or not it was statutorily required to be so, runs headlong into holdings that an agency’s discretionary choice to conduct a formal on-the-record hearing is irrelevant when determining whether EAJA applies to a particular proceeding. See, e.g., Ardestani v. Immigration and Naturalization Service, 502 U.S. 129, 137 (1991); Friends of the Earth v. O’Reilly, 966 F.2d 690, 695 (D.C. Cir. 1992); Advanced Med. Sys., ALAB-929, 31 NRC at 289-91 (citing St. Louis Fuel and Supply Co. v. Federal Energy Regulatory Commission, 890 F.2d 446, 448-49 (D.C. Cir. 1989); Owens v. Brock, 860 F.2d 1363, 1366 (6th Cir. 1988); Smeldberg Machine & Tool, Inc. v. Donovan, 730 F.2d 1089, 1092-93 (7th Cir. 1984)); see also Ardestani, 502 U.S. at 134.

F Even if due process did mandate an on-the-record hearing conducted according to APA § 554 in this case, such procedural requirements stemming from the Constitution alone would not suffice to make Mr. Geisen eligible for an EAJA award. Rather, EAJA applies only when an adjudication is “required by statute” to be conducted on the record, and, peculiarly, not when it is so required by the higher authority of the Constitution. See Advanced Med. Sys., ALAB-929, 31 NRC at 291 n.14.

G The underlying purpose of EAJA is twofold: (1) “to eliminate financial disincentives for those who would defend against unjustified governmental action” and thereby (2) “to deter the unreasonable exercise of Government authority.” See Ardestani, 502 U.S. at 138.

H With regard to the assertion that the meaning of “incur” in the context of EAJA is clear, “[n]either EAJA nor the legislative history provides a definition of the word ‘incur[,]’” and courts of appeals have interpreted and applied the term differently. Securities and Exchange Commission v. Conserv. 908 F.2d 1407, 1413 (8th Cir. 1990); see also Ed A. Wilson, Inc. v. General Services Administration, 126 F.3d 1406, 1408 (Fed. Cir. 1997). For instance, although the Fourth Circuit and the Eighth Circuit, through Pateley and Conserv, have held that otherwise eligible applicants who have been indemnified by an ineligible third party have not “incurred” fees under EAJA, the Seventh Circuit and the Federal Circuit have held that eligible applicants who have had their fees paid by ineligible third parties did “incur” fees under EAJA. See, e.g., United States v. Thouvenot, Wade & Moerschen, Inc., 596 F.3d 378, 383 (7th Cir. 2010); Wilson, 126 F.3d at 1410; cf. Morrison v. Commissioner of Internal Revenue, 565 F.3d 658, 666 (7th Cir. 2009).

I According to the Supreme Court, for the purposes of EAJA, the government’s position should be considered substantially justified if “a reasonable person could think it correct, that is, if it has a reasonable basis in law and fact.” Pierce v. Underwood, 487 U.S. 552, 566 n.2 (1988). Thus, for the NRC Staff’s position in this case to have been substantially justified, it did not have to be “‘justified to a high degree,’” but instead only had to be “[j]ustified in substance or in the main” — that is, justified to a degree that could satisfy a reasonable person.” Id. at 565.

J In determining whether the government’s position was substantially justified, courts must look to the totality of the circumstances. Roanoke River Basin Association v. Hudson, 991 F.2d 132, 139 (4th Cir. 1993). Thus, the Board “must examine the government’s conduct in both the prelitigation and litigation contexts.” United States v. Hallmark Construction Co., 200 F.3d 1076, 1080 (7th Cir. 2000) (citation omitted); see also Role Models America, Inc. v. Brownee, 353 F.3d 962, 967 (D.C. Cir. 2004). In doing so, however, the Board “does not make separate determinations regarding each stage but ‘arrive[s] at one conclusion that simultaneously encompasses and accommodates the entire civil action.’” Hallmark, 200 F.3d at 1080 (quoting Jackson v. Chater, 94 F.3d 274, 278 (7th Cir. 1996)). This determination is made on the basis of the written record, and, in this case, oral argument. 10 C.F.R. § 12.306(a).

K A judgment against the government on the merits, such as is the case here, does not create a presumption that the government’s case was not substantially justified. Scarborough v. Principi, 541 U.S. 69.

ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

401, 415 (2004) (citations omitted); Pierce, 487 U.S. at 569. “While a court’s ‘merits reasoning may be quite relevant to the resolution of the substantial justification question,’ we have cautioned that ‘[t]he inquiry into the reasonableness of the Government’s position . . . may not be collapsed into our antecedent evaluation of the merits.’” Halverson v. Slater, 206 F.3d 1205, 1208 (D.C. Cir. 2000) (quoting F.J. Vollmer Co., Inc. v. Magaw, 102 F.3d 591, 595 (D.C. Cir. 1996)).

LBP-11-9 SHAW AREVA MOX SERVICES (Mixed Oxide Fuel Fabrication Facility), Docket No. 70-3098-MLA (ASLBp No. 07-856-02-MLA-BD01); MATERIALS LICENSE AMENDMENT; April 1, 2011; MEMORANDUM AND ORDER (Admitting New Contentions 9, 10, and 11)

A Contentions based on new information in a document that was not previously available and that is materially different from a document that was previously available are not untimely simply for not being included in an intervenor’s initial hearing request filed at the outset of a proceeding.

B An applicant’s change of legal position, its claims that such change in legal position no longer entails a need for an exemption from the regulations, and its identification of new means/systems to satisfy the regulations are all types of materially different new information that can enable a contention to satisfy the timely new or amended contention requirements of 10 C.F.R. § 2.309(f)(2)(i)-(ii).

C Intervenors’ challenges to an enhanced version of an application alone are insufficient to vitiate the Intervenors’ obligation to file any challenges to the original version of that application at the outset of the proceeding. Where, however, an applicant deletes a material portion of its application and replaces it with a changed explanation of legal compliance, that replacement is materially different information that was previously unavailable and thus can satisfy the requirements of 10 C.F.R. § 2.309(f)(2)(i)-(ii).

D The Commission’s directive to treat pro se litigants more leniently than litigants with counsel allows a board to take into account complex procedural hurdles presented to intervenors and to structure its rulings accordingly.

E Understandable misapprehension of the start of the filing period for contentions, leading to inadvertent late filing of new contentions, establishes good cause to excuse missing the filing deadline pursuant to 10 C.F.R. § 2.309(c)(1).

F Considering that the filing deadline for new contentions is triggered only when a defined set of somewhat imprecise circumstances exists under 10 C.F.R. § 2.309(f)(2), the exact time at which those circumstances come into being is not always entirely clear. The trigger date for this filing period can be especially unclear where both public and nonpublic documents associated with a proceeding are produced and where an applicant’s stated compliance with NRC regulations shifts over time. This is sufficient good cause for Intervenors’ uncertainty, over a 10-day period, regarding the start of a rolling deadline for submitting new contentions.

G Commission precedent allows the finding that a petitioner, who had constructive and actual notice of a filing deadline, lacks good cause to excuse missing the filing deadline pursuant to 10 C.F.R. § 2.309(c)(1).

H Lack of clarity in the terms and application of the agency’s newly established sensitive unclassified nonsafeguards information (SUNSI) policy contributed to Intervenors’ misapprehension that they were required to demonstrate a “need for the information” in order to request SUNSI documents, and thus makes excusable their belated awareness of the information in those documents.

I Where Intervenors are the only parties admitted, they satisfy the criteria, contained in 10 C.F.R. § 2.309(c)(1)(v) and (vi), related to showing that their interests are not adequately represented by other means or by other parties. Especially after the NRC Staff has already issued requests for information and its safety evaluation report, there is no other means to represent Intervenors’ interests.

J Looking to 10 C.F.R. § 2.309(c)(vii), where the public interest has been served by an applicant taking almost 4 years to submit the entirety of its application and associated documents and changing its position on the underlying justification for an aspect of its license, and the NRC Staff has taken over 2-1/2 years to address a problem with an applicant’s noncompliance with NRC regulations through requests for additional information, Intervenors’ pursuit of newly filed contentions on those subjects cannot be said to be the cause of untoward delay in the proceeding.

K The public interest can well be served by revisions to an application that ends up “getting it right” and by the Staff’s expected thorough analysis of such revisions. Those necessary processes, invoked by the Applicants or at their behest, can be quite time-consuming. By the same token, an inquiry launched by the Intervenors after a 10-day delay does not unduly prolong the proceeding.
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

L. Litigation of substantively admissible contentions addressing important security issues that are of the highest safety order deserve to be heard and thus will not inappropriately broaden the issues in the proceeding, especially in light of the varied approaches that have been presented to justify an applicant’s proposal and the applicant’s previous admission that it failed to satisfy the relevant security regulations.

LBP-11-10 VIRGINIA ELECTRIC AND POWER COMPANY d/b/a DOMINION VIRGINIA POWER and OLD DOMINION ELECTRIC COOPERATIVE (North Anna Power Station, Unit 3), Docket No. 52-017-COL (ASLBP No. 08-863-01-COL); COMBINED LICENSE; April 6, 2011; MEMORANDUM AND ORDER (Declining to Admit New Contentions 12 and 13)

A. To issue the Early Site Permit (ESP), the NRC must comply with the National Environmental Policy Act (NEPA). That statute requires that an Environmental Impact Statement (EIS) include a detailed statement by the responsible agency official on, among other things, (i) “the environmental impact of the proposed action,” (ii) “any unavoidable adverse environmental effects which cannot be avoided should the proposal be implemented,” and (iii) “alternatives to the proposed action.” The agency responsible for preparing the EIS must define the scope of the issues it will address.

B. Section 1502.4 of 40 C.F.R. directs that “[a]gencies shall use the criteria for scope (40 C.F.R. § 1508.25) to determine which proposal(s) shall be the subject of a particular statement. Proposals or parts of proposals which are related to each other closely enough to be, in effect, a single course of action shall be evaluated in a single impact statement.” Section 1508.25 directs that, in defining the scope of the EIS, all “connected actions” must be analyzed in one statement. Separate actions may be considered “connected” if, among other things, they “[a]re interdependent parts of a larger action and depend on the larger action for their justification.” An ESP authorizes the use of a specific site for the construction and operation of a new nuclear power plant, with the actual construction and operation authorized by a subsequently issued COL. Although a licensee that has obtained an ESP is not required to apply for a COL or to actually construct and operate a nuclear power plant at the authorized site, it is difficult to see any reason to obtain an ESP other than as an initial step toward those actions. The ESP and the COL are therefore “in effect, a single course of action” and “interdependent parts of a larger action [that] depend on the larger action for their justification.” Thus, the issuance of an ESP and the subsequent authorization of construction and operation of a new nuclear power plant qualify as “connected actions” under section 1508.25, and should be evaluated in one EIS.

C. New and amended contentions submitted after an intervenor’s initial hearing request are evaluated under 10 C.F.R. § 2.309(f)(2) for timeliness and, if found timely, their general admissibility is analyzed pursuant to 10 C.F.R. § 2.309(f)(1).

D. If a contention is not timely filed, it must meet the eight-factor test under section 2.309(c)(1) to be deemed admissible as a nontimely contention. The Commission has considered the “good cause” factor to be the most important of those eight.

E. NRC regulations permit a COL applicant to make a reference to a docketed-but-not-yet-certified design “at its own risk.” As the Summer licensing board noted: “along the way, and certainly once a final design is certified, each COLA applicant will have to determine whether it will adopt in toto the certified design, or whether it will take exemptions thereto and/or departures therefrom. An applicant will also have to demonstrate that the site-specific parameters are bounded by the parameters developed for the certified design.” South Carolina Electric & Gas Co. (Virgil C. Summer Nuclear Station, Units 2 and 3), LBP-09-2, 69 NRC 87, 100 (2009), aff’d in part and rev’d and remanded on other grounds, CL-10-1, 71 NRC 1 (2010) (footnotes and internal citations omitted).

F. Under NRC regulations, a COL applicant incorporating a certified design may include in its COLA a “request for an exemption from any part of a referenced design certification rule,” which may be granted as long as the NRC “determines that the exemption complies with any exemption provisions of the referenced design certification rule, or with [10 C.F.R.] § 52.63 if there are no applicable exemption provisions in the referenced design certification rule.” In turn, section 52.63(b)(1) conditions grants of exemptions from referenced design certification rules on the Commission’s finding that the request complies with section 52.7 and that the “special circumstances” provided for in section 52.7 “outweigh any decrease in safety that may result from the reduction in standardization caused by the exemption.” For COL applicants, section 52.7 itself cross-references the standards of section 50.12 for granting exemptions to NRC regulations.

G. NRC regulations require that, for an ESP or COL site and associated design bases to be deemed geologically and seismically suitable, “[t]he geological, seismological, and engineering characteristics of a
DIGESTS

ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

site and its environs must be investigated in sufficient scope and detail to permit an adequate evaluation of
the proposed site, to provide sufficient information to support evaluations performed to arrive at estimates
of the Safe Shutdown Earthquake [SSE] Ground Motion, and to permit adequate engineering solutions to
actual or potential geologic and seismic effects at the proposed site.” Appendix S of 10 C.F.R. Part 50
defines SSE as “the vibratory ground motion for which certain structures, systems, and components must
be designed to remain functional.”

LBP-11-11 AREVA ENRICHMENT SERVICES, LLC (Eagle Rock Enrichment Facility), Docket No. 70-7015-ML (ASLBP No. 10-899-02-ML-BD01); MATERIALS LICENSE; April 8, 2011; FIRST PARTIAL INITIAL DECISION (Uncontested/Mandatory Hearing on Safety Matters)

A In this 10 C.F.R. Part 70 proceeding regarding the application of AREVA Enrichment Services, LLC (AES), for authorization to possess and use source, byproduct, and special nuclear material to enrich natural uranium by the gas centrifuge process at its planned Bonneville County, Idaho Eagle Rock Enrichment Facility (EREF), the Licensing Board provides its findings and conclusions concerning uncontested Atomic Energy Act (AEA)safety-related matters, concluding that (1) the AES application contains sufficient information to support license issuance; and (2) the NRC Staff’s review of the application has been adequate to support license issuance, subject to a license condition regarding the qualifications of the
facility’s nuclear criticality safety (NCS) manager and an unresolved decommissioning funding financial assurance issue that awaits Commission consideration of a pending Board-certified question.

B Because the Commission received no petitions to intervene in response to a notice of hearing and opportunity to intervene, no contested hearing was convened. Nonetheless, if an applicant seeks authorization to construct and operate a uranium enrichment facility, a mandatory/uncontested hearing must still be held. AEA § 193(b)(1) provides that “[t]he Commission shall conduct a single adjudicatory hearing on the record with regard to the licensing of the construction and operation of a uranium enrichment facility,” 42 U.S.C. § 2243(b)(1) (emphasis added).

C AEA § 274c(1), 42 U.S.C. § 2021(c)(1), gives the NRC a clear statutory mandate to regulate the construction and operation of a uranium enrichment facility. See 74 Fed. Reg. 38,052, 38,057 (July 30, 2009) (CLI-09-15, 70 NRC 1, 17 (2009)). Further, AEA §§ 53 and 63, 42 U.S.C. §§ 2073, 2093, which concern special nuclear material and byproduct material, provide the general statutory basis under which the NRC has adopted the variety of regulations that govern a proposed enrichment facility’s construction and operation. Finally, AEA §§ 189a and 193, id. §§ 2239a, 2243, provide the statutory footing for the procedural precepts that apply to a uranium enrichment facility licensing action, including the need for (1) the NRC to conduct only a single licensing action and adjudicatory proceedings to authorize the construction and operation of a uranium enrichment facility; and (2) a mandatory hearing regarding the application and the Staff’s associated safety and environmental reviews, even in the absence of a petitioner seeking to interpose a challenge to the applicant’s request for such a single license.

D Part 70 of Title 10 of the Code of Federal Regulations establishes the basic regulatory framework that
governs the licensing of an entity to construct and operate an enrichment facility. Nonetheless, a number
of other rules and regulations in 10 C.F.R. Chapter I, including Parts 19, 20, 21, 25, 30, 40, 51, 71, 73, 74, 75, 77, 78, 79, 85, 140, 170, 171, are applicable to licensing a facility to receive, possess, use, transfer, deliver, and process byproduct, source, and special nuclear material in the quantities necessary to conduct the activities contemplated at a uranium enrichment facility. See 74 Fed. Reg. at 38,057 (CLI-09-15, 70 NRC at 17).

E A significant body of case law exists indicating what a licensing board’s responsibilities are, and
are not, in the context of licensing a proposed uranium enrichment facility. Essentially a licensing board
is to “conduct a simple ‘sufficiency’ review” rather than a de novo review on both AEA and National
Environmental Policy Act (NEPA) issues. Exelon Generation Co., LLC (Early Site Permit for Clinton
ESP Site), CLI-05-17, 62 NRC 5, 39 (2005). Thus, boards “should decide simply whether the safety and environmental record is ‘sufficient’ to support license issuance. In other words, the boards should inquire whether the NRC Staff performed an adequate review and made findings with reasonable support in logic and fact.” Id. There is, however, a caveat in that boards are instructed to make independent environmental judgments with respect to certain NEPA findings, though even then they “need not rethink or redo every aspect of the NRC Staff’s environmental findings or undertake their own fact-finding activities.” Id. at 44; see also Dominion Nuclear North Anna, LLC (Early Site Permit for North Anna ESP Site), LBP-07-9, 65 NRC 539, 559-60, permit issuance authorized, CLI-07-27, 66 NRC 215 (2007). The board’s role thus is to “carefully probe [Staff] findings by asking appropriate questions and by requiring supplemental information when necessary,” but “the NRC Staff’s underlying technical and factual findings are not
open to board reconsideration unless, after a review of the record, the board finds the NRC Staff review inadequate or its findings insufficient.” Clinton ESP, CLI-05-17, 62 NRC at 39-40.

F The NEPA findings associated with a mandatory hearing require the licensing board independently to (1) determine whether the requirements of section 102(2)(A), (C), and (E) of NEPA and Subpart A of 10 C.F.R. Part 51 have been complied with in the proceeding; (2) consider the final balance among conflicting factors contained in the record of the proceeding with a view to determining the appropriate action to be taken; and (3) determine, after weighing the environmental, economic, technical, and other benefits against the environmental and other costs, and considering reasonable alternatives, whether a license should be issued, denied, or appropriately conditioned to protect environmental values. See Licensing Board Initial Scheduling Order attach. A, at 9 (May 19, 2010) (unpublished) [hereinafter Initial Scheduling Order]. In addition, relative to NEPA, the licensing board is to determine whether the review conducted by the Staff pursuant to 10 C.F.R. Part 51 has been adequate. See id.

G In a mandatory hearing for the licensing of a uranium enrichment facility, a licensing board “must narrow its inquiry to those topics or sections in Staff documents that it deems most important and should concentrate on portions of the documents that do not on their face adequately explain the logic, underlying facts, and applicable regulations and guidance.” Exelon Generation Co., LLC (Early Site Permit for Clinton ESP Site), CLI-06-20, 64 NRC 15, 21-22 (2006).

H In a mandatory hearing for the licensing of a uranium enrichment facility, relative to AEA-related hazards, and accident sequences, which includes a description of every process analyzed in the ISA, the characteristics that could affect safety and potential accidents and their consequences; (2) processes, consequences that exceed the section 70.61 performance requirements; (3) the methods and team used by the applicant to perform the ISA; and (4) IROFS and the IROFS management measures used to ensure that the procedures described in sufficient detail to allow a Staff reviewer to understand the IROFS’s functions in relation to a Staff reviewer to understand the theory of operation for the process. Similarly, the IROFS should be described in sufficient detail to allow a Staff reviewer to understand the IROFS’s functions in relation to the performance standards in section 70.61, which specifies limitations on the levels of risk for credible high- and intermediate-consequence accidents and nuclear criticality accidents. See Revised Staff Fuel Cycle SRP at 3-9 to -10.

I Under 10 C.F.R. § 70.62, each applicant for a Part 70 license is required to establish and maintain a safety program, which includes performing an integrated safety analysis (ISA). See 10 C.F.R. § 70.62(c).

Among other things, the ISA must consider potential accident sequences caused either by deviations in the processes that will be conducted at the proposed facility or by credible external events, including natural phenomena. See id. § 70.62(c)(1)(iv).

J To perform an appropriate ISA, the Staff’s NUREG-1520 standard review plan (SRP) guidance for fuel cycle facilities indicates that the applicant should identify the process designs, accident sequences, and items relied upon for safety (IROFS) that are associated with the facility. See NMSS, NRC, [SRP] for the Review of a License Application for a Fuel Cycle Facility, NUREG-1520, at 3-9 (rev. 1 May 2010)) [hereinafter Revised Staff Fuel Cycle SRP]; see also NMSS, NRC, [SRP] for the Review of a License Application for a Fuel Cycle Facility, NUREG-1520, at 3-8 to -9 (Mar. 2002) [hereinafter Staff Fuel Cycle SRP]. In that regard, the process designs should be described in a level of detail that is sufficient to allow a Staff reviewer to understand the theory of operation for the process. Similarly, the IROFS should be described in sufficient detail to allow a Staff reviewer to understand the IROFS’s functions in relation to the performance standards in section 70.61, which specifies limitations on the levels of risk for credible high- and intermediate-consequence accidents and nuclear criticality accidents. See Revised Staff Fuel Cycle SRP at 3-9 to -10.

K Along with the requirement to perform an ISA is the requirement to provide the Staff with an ISA summary (ISAS). See 10 C.F.R. § 70.65(b). The ISAS is to contain descriptions of (1) site and facility characteristics that could affect safety and potential accidents and their consequences; (2) processes, hazards, and accident sequences, which includes a description of every process analyzed in the ISA, the hazards for each process, and the accident sequences associated with such hazards having unmitigated consequences that exceed the section 70.61 performance requirements; (3) the methods and team used by the applicant to perform the ISA; and (4) IROFS and the IROFS management measures used to ensure that
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

IROFS are available and reliable to perform their functions when needed. See id.; see also Revised Staff Fuel Cycle SRP at 3-8.

L The AEA and agency regulations govern the extent to which a foreign entity may own or control an NRC-licensed activity. The form of that regulatory oversight depends on the type of license sought. Because applications for uranium enrichment facilities are governed by AEA §§ 53 and 63, 42 U.S.C. §§ 2073, 2093, foreign ownership and control issues are evaluated under AEA §§ 57 and 69, id. §§ 2077, 2099, rather than AEA §§ 103, 104, or 193(f). See 74 Fed. Reg. at 38,058 (CLI-09-15, 70 NRC at 19). The principal difference between those two respective sets of provisions (i.e., AEA §§ 57 and 69 v. AEA §§ 103, 104, and 193(f)) is that while both prohibit the Commission from granting a license that would be “inimical to the common defense and security or the health and safety of the public,” only under the latter would the Commission be prohibited from granting a license “if the Commission knows or has reason to believe [the applicant] is owned, controlled, or dominated by an alien, a foreign corporation, or a foreign government.” Compare 42 U.S.C. § 2099 with id. § 2133(d). Therefore, in a proceeding for the licensing of a uranium enrichment facility the agency may deny the applicant a license based on foreign ownership, control, or domination concerns to the extent it concludes granting such a license would be inimical to the common defense and security or the health and safety of the public. See Crowe Butte Resources, Inc. (North Trend Expansion Project), CLI-09-12, 69 NRC 535, 571 (2009) (materials license regulations contain no express prohibition on foreign ownership, but require Staff to make a finding that license issuance will not be inimical to the common defense and security or the health and safety of the public).

M The Commission implemented AEA §§ 57 and 69 in 10 C.F.R. § 70.31(d) and 10 C.F.R. § 40.32(d), respectively. See 74 Fed. Reg. at 38,058 (CLI-09-15, 70 NRC at 19). In both regulatory sections, the pertinent language tracks the statutory language identically, i.e., “inimical to the common defense and security or the health and safety of the public.”

N The Commission implemented AEA §§ 103, 104, and 193(f) in various regulations, including 10 C.F.R. § 40.38(a) (relating to the United States Enrichment Corporation (USEC)), 10 C.F.R. § 50.38 (concerning nuclear power reactors), and 10 C.F.R. § 70.40 (also relating to USEC), in which the pertinent language again tracks the statutory language identically. While sections 40.38(a) and 70.40 do apply to enrichment facility licensee USEC, their application is limited to USEC alone, so that they have no relevance to any other enrichment facility applicant.

O For power reactors, in implementing these regulations the agency developed a Commission-approved SRP to assist in evaluating applications for reactor licenses or applications for the transfer of such licenses. See Final [SRP] on Foreign Ownership, Control, or Domination, 64 Fed. Reg. 52,355, 52,355 (Sept. 28, 1999). The SRP indicates that after conducting a threshold review, as supplemented by additional information, if the Staff concludes that “the applicant may be considered to be foreign owned, controlled, or dominated, or that additional action would be necessary to negate the foreign ownership, control, or domination,” the applicant “shall be promptly advised and requested to submit a negation action plan.” Id. at 52,359. The purpose of the negation action plan would be to implement measures that effectively negate or deny foreign control or domination. See id.

P Relative to the issue of foreign ownership or control, the NRC also imposes restrictions on the physical security and control of information at licensed facilities to safeguard restricted data and national security information. See 10 C.F.R. Part 95. Under 10 C.F.R. § 70.22(m), the application for a uranium enrichment facility is required to contain a description of the security program to protect against unauthorized disclosure of classified matter in accord with Part 95. And under Part 95, the applicant would be required, among other things, to complete the NRC facility security clearance process, which entails an NRC-approved classified matter plan, onsite inspections, and the granting of individual NRC personnel security clearances. A facility security clearance also requires a determination that granting the clearance “would not be inconsistent with the national interest, including a finding that the facility is not under foreign ownership, control, or influence to such a degree that a determination could not be made.” 10 C.F.R. § 95.17(d)(1). Thus, for a uranium enrichment facility, foreign ownership or control is evaluated in the context of the facility security clearance process as well.

Q Consistent with the Commission’s direction that foreign ownership and control concerns about a uranium enrichment facility application should be evaluated pursuant to AEA §§ 57 and 69, the pertinent analysis becomes whether granting a license to the facility would be “inimical to the common defense and security or the health and safety of the public.” 74 Fed. Reg. at 38,058 (CLI-09-15, 70 NRC at 19).
At the same time, Commission regulations require a uranium enrichment facility applicant to obtain a facility security clearance, which would include a determination that granting the clearance "would not be inconsistent with the national interest, including a finding that the facility is not under foreign ownership, control, or influence to such a degree that a determination could not be made." 10 C.F.R. § 95.17. Thus, for a uranium enrichment facility, foreign ownership and control also are evaluated by way of the facility clearance process.

As was noted in the Commission’s recent staff requirements memorandum regarding the procedures the Commission will employ in conducting the mandatory hearings associated with the 10 C.F.R. Part 52 combined license proceedings for new reactors, a principal focus of the Commission will be upon “non-routine matters.” Memorandum from Annette L. Vietti-Cook, NRC Secretary, to Stephen G. Burns, NRC General Counsel, and Brooke Poole, Director, NRC Office of Commission Appellate Adjudication at unnumbered p. 2 (Dec. 23, 2010) (ADAMS Accession No. ML103570203). Almost by definition, license conditions imposed on an applicant as a result of the Staff’s review process and applicant-requested exemptions from agency regulatory requirements that are granted by the Staff have a strong potential to fall into such a “non-routine matter” category. Indeed, these items have been the subject of scrutiny in a variety of other mandatory hearing contexts. See, e.g., Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), LBP-09-19, 70 NRC 433 (2009), Commission review declined, Memorandum from Annette L. Vietti-Cook, NRC Secretary, to Board and Parties (Jan. 4, 2010) (ADAMS Accession No. ML100040233); USEC Inc. (American Centrifuge Plant), LBP-07-6, 65 NRC 429 (2007), Commission review declined, Letter from Annette L. Vietti-Cook, NRC Secretary, to Geoffrey Sea (June 11, 2007) (ADAMS Accession No. ML071620395).

Under Parts 70, 40, and 30, which provide the regulatory basis for the licensing of the different types of nuclear materials utilized in the operation of the EREF, the agency is permitted in issuing a license to impose such additional conditions, requirements, and limitations as may have been necessary to effectuate the purposes of the AEA and the agency’s regulations. See 10 C.F.R. §§ 30.34(e), 40.41(e), 70.31(a), (b)(2). Regarding the Staff’s evaluation findings concerning a particular application, in its fuel cycle facility SRP guidance the Staff notes that it may “recommend license conditions to address any issues that were not previously resolved by an applicant’s commitments. Such conditions are discussed with an applicant before issuing the license (or license amendment) and become commitments to performance in addition to those commitments that the applicant presented in the application.” Revised Staff Fuel Cycle SRP at 7.

Additionally, Parts 30, 40, and 70 provide for exemptions to their requirements, with each containing a provision stating that the agency may grant exemptions to the requirements imposed by that part if the agency determines such an exemption is authorized by law and will not endanger life or property or the common defense and security and is otherwise in the public interest. See 10 C.F.R. §§ 30.11(a), 40.14(a), 70.17(a). According to the Staff’s SRP guidance for fuel cycle facilities, an applicant seeking an exemption should “clearly describe[] any exemptions or authorizations of an unusual nature and adequately justify[] them for the NRC’s consideration.” Revised Staff Fuel Cycle SRP at 1-7.

Several of the license conditions imposed on an applicant appear to be in the nature of standard directives that could be incorporated into the rules that govern Part 70 applicants and licensees. Nonetheless, given that the choice between rulemaking and adjudication (i.e., issuing orders or other license revisions) is within the agency’s discretion, see Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), CLI-01-12, 53 NRC 459, 474 (2001), this ultimately is a matter of efficiency for the Staff to determine.

Under sections 40.41(g) and 70.32(k) of the NRC’s regulations, a uranium enrichment facility cannot be operated until the agency verifies through inspection that the facility has been constructed in accordance with the license. As a consequence, an inspection manual chapter (IMC) is developed for the facility that defines the construction inspection program (CIP) intended to (1) provide reasonable assurance that the design, construction, and implementation of IROFS will protect against natural phenomena and the consequences of potential accidents; (2) verify the quality assurance program was adequately implemented during construction; and (3) verify that the construction of the IROFS was completed in accordance with the documents comprising the license application, including the applicant’s safety analysis report (SAR) and the ISAS, and the Staff’s safety evaluation report (SER). The CIP applies to all construction activities, including design, procurement, fabrication, construction, and preoperational testing activities. See NMSS, NRC, NRC IMC 2696, LES Gas Centrifuge Facility Construction and Pre-operational Readiness Review
Digests

Issuances of the Atomic Safety and Licensing Boards

Inspection Programs (Oct. 19, 2006).

An applicant’s commitment as part of the license review process to undertake certain actions to satisfy the Staff’s technical or other safety-related concerns, and a license condition imposed by the Staff to require that an applicant take certain actions deemed necessary to protect the public health and safety, are important aspects of the licensing process. Both are intended to address matters that fall outside the specific coverage of the requirements of Parts 30, 40, and 70 that implement the AEA mandate to protect the public health and safety. As a consequence, ensuring that each commitment or condition is tracked by the Staff and is the subject of appropriate followup to assure the applicant does what it committed or is required to do is a hallmark of an effective regulatory process.

The following technical issues are discussed: Availability of IROFS Boundary Information for Preoperational Inspections; Axial Volcanic Zone; Construction Inspection Program; Decommissioning/Decontamination (Financial Assurance); Emergency Response Preparedness Training Frequency; Financial Qualifications (Construction Funding Availability); Fire Protection Measures; Foreign Owners and Control; IROFS Commercial Grade Component Designation; IROFS Relating to Human Factors Engineering; IROFS Relating to Digital Instrumentation and Controls; Information Security; Loss of Offsite Power; Nuclear Criticality Safety Manager Qualifications; Nuclear Liability Insurance; Preconstruction Activities; Preconstruction Radiation Survey; Probabilistic Seismic Hazard Assessment; Probabilistic Volcanic Hazard Analysis; Site-Specific Process-Related Hazards (Uranium Enrichment Facility); Source Material Control and Accounting Program Changes; Volcanic Hazards; Wildfires.

LBP-11-12 PATINA HAWAII, LLC, Docket No. 30-36974-ML (ASLBP No. 06-843-01-ML); MATERIALS LICENSE; April 22, 2011; MEMORANDUM AND ORDER (Terminating Proceeding)

The Licensing Board grants the NRC Staff’s unopposed motion to terminate the proceeding.

LBP-11-13 FIRSTENERGY NUCLEAR OPERATING COMPANY (Davis-Besse Nuclear Power Station, Unit 1), Docket No. 50-346-LR (ASLBP No. 11-907-01-LR-BD01); LICENSE RENEWAL; April 26, 2011; MEMORANDUM AND ORDER (Ruling on Petition to Intervene and Request for Hearing)

This 10 C.F.R. Part 54 proceeding concerns the application of FirstEnergy Nuclear Operating Company to renew the operating license for Davis-Besse Nuclear Power Station, Unit 1, located on the southwestern shore of Lake Erie in Ottawa County in northwestern Ohio. Four organizations petitioned to intervene and requested a hearing: Beyond Nuclear, Citizens Environment Alliance of Southwestern Ontario, Don’t Waste Michigan, and the Green Party of Ohio. Having determined that each of the petitioning organizations demonstrated standing and they collectively proffered at least one contention that is admissible, in whole or in part, under 10 C.F.R. § 2.309(f)(1), the Board grants the petition and admits the Petitioners as a party.

Any person or organization seeking to intervene as a party in an NRC adjudicatory proceeding addressing a proposed licensing action must: (1) establish standing; and (2) proffer at least one admissible contention. 10 C.F.R. § 2.309(a).

C

While the petition itself — complete with active embedded links to most of the exhibits — the standing declarations, and eight exhibits were submitted before the deadline, nearly seventy more exhibits were filed overnight and into the next day. Because the pro se first-time filer experienced problems with the E-Filing system, the Board concludes the Petitioners’ efforts demonstrate the requisite good cause for acceptance of the untimely exhibits for consideration with the timely filed petition.

When an organization seeks to intervene in a representative capacity on behalf of its members’ interests, it must: (1) show that the interests it seeks to protect are germane to its own purpose; (2) identify, by name and address, Power Authority of the State of New York (James A. FitzPatrick Nuclear Power Plant; Indian Point, Unit 3), CLI-00-22, 52 NRC 266, 293 (2000), at least one member who qualifies for standing in his or her own right; and (3) show that it is authorized by that member to request a hearing on his or her behalf. Consumers Energy Co. (Palisades Nuclear Plant), CLI-07-18, 65 NRC 399, 409 (2007).

The NRC generally applies traditional judicial standing concepts, which require a showing that the individual has suffered or might suffer a concrete and particularized injury that is (1) fairly traceable to the challenged action; (2) likely redressible by a favorable decision, Georgia Institute of Technology (Georgia Tech Research Reactor, Atlanta, Georgia), CLI-05-12, 42 NRC 111, 115 (1995) (citing Lujan v. Defenders of Wildlife, 504 U.S. 555, 560-61 (1992)); and (3) arguably within the zone of interests protected by the governing statutes, Yankee Atomic Electric Co. (Yankee Nuclear Power Station), CLI-96-1, 43 NRC 1, 6 (1996) (citing Cleveland Electric Illuminating Co. (Perry Nuclear Power Plant, Unit 1), CLI-93-21,
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

F In reactor license renewal cases, petitioners are entitled to invoke the proximity presumption, which excuses the need to show an injury “if a petitioner (or a representative of a petitioner organization) resides within approximately 50 miles of the facility in question” or “has frequent contacts with” this geographic zone of potential harm. Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-09-20, 70 NRC 911, 915-16 (2009) (emphasis added). This presumption’s rationale is that “persons living within the roughly 50-mile radius of the facility ‘face a realistic threat of harm’ if a release from the facility of radioactive material were to occur.” Id. at 917 (quoting Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), LBP-09-4, 69 NRC 170, 183 (2009)) (emphasis added).

G A “duly authorized member or officer” may represent his or her “partnership, corporation, or unincorporated association” even if he or she is not an attorney at law, but the representative’s notice of appearance must state “the basis of his or her authority to act on behalf of the party.” 10 C.F.R. § 2.314(b).

H Although a member should have demonstrated that his organization authorized him to represent it pro se, subsequent notice of appearance by an attorney cured any possible deficiency in representation.

I An individual may not intervene in his or her own right while simultaneously being represented by another petitioner in the same proceeding. Powertech (USA), Inc. (Dewey-Burdock In Situ Uranium Recovery Facility), LBP-10-16, 72 NRC 361, 390 (2010).

J An admissible contention must: (i) provide a specific statement of the issue of law or fact to be raised; (ii) provide a brief explanation of the basis for the contention; (iii) demonstrate that the issue raised is within the proceeding’s scope; (iv) demonstrate that the issue raised is material to the findings the NRC must make to support the action that is involved in the proceeding; (v) provide a concise statement of the alleged facts or expert opinions, including references to specific sources and documents, that support the petitioner’s position and upon which the petitioner intends to rely at hearing; and (vi) show that a genuine dispute exists on a material issue of law or fact by referring to specific portions of the application that the petitioner disputes or, if the application is alleged to be deficient, by identifying such deficiencies and the supporting reasons for this allegation. 10 C.F.R. § 2.309(f)(1)(i)-(vi).

K To be evaluated in depth as a reasonable alternative to license renewal, an alternative must be available now or in the near future and in any event no later than the expiration date of the current license.

L Any argument about the need for power from the nuclear power plant during the license renewal period is outside the scope of the license renewal proceeding and inadmissible under 10 C.F.R. § 2.309(f)(1)(iii) because it challenges 10 C.F.R. § 51.53(c)(2), which states that a license renewal ER “is not required to include discussion of need for power.”

M Having claimed that interconnectedness and energy storage allow wind and solar power to provide baseload power and having proffered expert support and specific references to support this claim, petitioners have pled an admissible contention concerning reasonable alternatives to the relicensing application.

N Challenge to the agency regulation codifying the Commission’s determination that, for any license renewal of a nuclear power plant, the probability-weighted consequences of a severe accident are small, 10 C.F.R. Part 51, Subpart A, App. B, tbl. B-1, is outside the scope of the license renewal proceeding.

O Because Petitioners have not obtained a waiver or exception to the regulations that, for all plants, onsite dry or pool storage can “safely accommodate” spent fuel accumulated from a 20-year license extension with “small environmental effects,” 10 C.F.R. Part 51, Subpart A, App. B, tbl. B-1, and “additional plant-specific mitigation measures are likely not to be sufficiently beneficial to warrant implementation,” see id. tbl. B-1 n.2, their challenge is outside the scope of the license renewal proceeding.

P Intentional malevolent acts, such as sabotage and terrorism, are not material to the SAMA findings the NRC must make in deciding whether to extend a commercial power reactor license.

Q Because the petitioners do not explain how the cost of a severe accident could have been underestimated due to the MACCS2 code’s conservative assumption that decontaminating farmlands by fire hosing and plowing would not reduce ingestion doses, their criticism of these decontamination methods does not dispute the application.

R For SAMA contentions, the materiality standard requires only that petitioners “provide sufficient information to show that, if their proposed refinements were incorporated, it is ‘genuinely plausible’ that cost-benefit conclusions might change.” NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), LBP-11-2, 73 NRC 28, 62 (2011)).
The environmental report’s (“ER’s”) adequacy is examined under the National Environmental Protection Act (“NEPA”), as well as under Part 51, because the ER is the basis upon which the NRC’s Environmental Impact Statement (“EIS”) for Fermi Unit 3 will be prepared. The ER must therefore contain a sufficient analysis of potential environmental consequences and alternatives to enable the NRC Staff to prepare an EIS that fulfills the agency’s obligations under NEPA.

The scientific reports on which Intervenors rely are hearsay under the rules of evidence; that is, they are out-of-court statements offered to prove the truth of the matter asserted. Fed. R. Evid. 801(c). The Board is not precluded, however, from considering these documents despite their hearsay nature. 10 C.F.R. § 2.319(d) (“In proceedings under this part, strict rules of evidence do not apply to written submissions.”). Even though the Board is not precluded from considering hearsay, under section 2.319(d) it may on motion or on its own initiative strike any portion of a written presentation that is unreliable.

The Board recognizes that NEPA is a procedural statute. Thus, “[i]f the adverse environmental impacts of the proposed action are adequately identified and evaluated, the agency is not constrained by NEPA from deciding that other values outweigh the environmental costs.” Accordingly, NEPA does not require that Applicant or the NRC Staff eliminate adverse impacts of the proposed action. Instead, NEPA requires sufficient public disclosure of environmental consequences and a rigorous exploration of reasonable alternatives to the proposed action.

The Commission’s rule that the scope of an admitted contention is determined by “the bases set forth in support of the contention” means that a contention’s scope is bounded by the “brief explanation of the basis for the contention” required by 10 C.F.R. § 2.309(f)(1)(ii). As long as the facts now relied on by Intervenors in opposition to the summary disposition motion fall within the scope of that explanation, they are properly before the Board. No more is required because a petitioner does not have to set forth all of its factual evidence at the admissibility stage.

Under NRC regulations, a power reactor’s emergency plan must contain and describe “[a]dequate provisions . . . for emergency facilities and equipment, including . . . [a] telephone and off-site communications system; each system shall have a backup power source.” 10 C.F.R. Part 50, App. E, §IV.E.9. This regulation, on its face, eschews an inflexible “one size fits all” approach to planning for radiological emergencies.

Pursuant to 10 C.F.R. § 50.47(b)(10), a COL application must include an Emergency Plan that contains, in the event of a reactor emergency resulting in a radiological release, “[a] range of protective actions . . . for the public [located within about a 10-mile radius from the plant]. In developing this range of actions, consideration [will be] given to evacuation, sheltering, and, as a supplement to these, the prophylactic use of potassium iodide (KI), as appropriate.” 10 C.F.R. § 50.47(b)(10). Section 50.47(b)(10) thus requires an Emergency Plan to have “[a] range of protective actions” for persons within about a 10-mile radius (id.), and it also requires that “[g]uidelines for the choice of protective actions during an emergency, consistent with Federal guidance, are developed and in place . . . .” Id. This regulation, on its face, eschews an inflexible “one size fits all” approach to planning for radiological emergencies.

NRC regulations provide for two emergency planning zones (EPZs) around nuclear power plants in the event of a nuclear accident: (1) the plume exposure pathway EPZ, which consists of an area about 10 miles in radius around a plant, the principal concern of which is radiation exposure to the public (whole-body external exposure and inhalation exposure) from a radioactive plume; and (2) the ingestion exposure pathway EPZ, which consists of an area about 50 miles in radius around a plant, the principal concern of which is ingestion of contaminated water or foods (e.g., milk or fresh vegetables). See 10 C.F.R.
§ 50.47(c)(2); id., Part 50, App. E; cf. 44 C.F.R. § 350.2(g)-(i) (defining plume and ingestion exposure pathway EPZs for federal emergency management purposes).

G During a nuclear emergency in the United States, the individual licensee and the appropriate state and local government officials have direct responsibilities for the coordinated response to the event. See 10 C.F.R. Part 50, App. E, § IV.A. The NRC — in its capacity as the federal agency charged with regulating the nuclear industry in a manner that protects public health and safety (Atomic Energy Act, 42 U.S.C. § 2232(a); 10 C.F.R. § 1.11(b)) — monitors the emergency (10 C.F.R. Part 50, App. E, § VI) and is available to provide recommendations for emergency actions to either the licensee or local government officials, including a recommendation for a more extensive evacuation area as warranted by actual circumstances.

LBP-11-16 EXELON NUCLEAR TEXAS HOLDINGS, LLC (Victoria County Station Site), Docket No. 52-042 (ASLBP No. 11-908-01-ESP-BD01); EARLY SITE PERMIT; June 30, 2011; MEMORANDUM AND ORDER (Rulings on Standing, Contention Admissibility, and Selection of Hearing Procedures)

A In this Memorandum and Order, the Board addresses Texans for a Sound Energy Policy’s (TSEP or Petitioner) petition to intervene and request for hearing challenging the environmental report and site safety analysis report filed by Exelon Nuclear Texas Holdings, LLC (Exelon or Applicant) regarding the early site permit for one or more nuclear power reactors at the Victoria County Station site. After finding that TSEP does have standing and admitting TSEP as a party in the proceeding, the Board admits eight contentions, in part or in whole, for further adjudication.

B Under the 10 C.F.R. Part 52, Subpart A, licensing process, an entity may apply for an early site permit authorizing it to resolve key site-related environmental, safety, and emergency planning issues before selecting the design of a nuclear power facility for the subject site.

C In cases involving the possible construction or operation of a nuclear power reactor, the NRC considers proximity to the proposed facility to be sufficient to establish standing. This “proximity presumption” applies when an individual or organization, or an individual authorizing an organization to represent his/her interests, seeks to establish its representational standing, resides within 50 miles of the proposed facility, or has “frequent contacts” with the area affected by the proposed facility.

D To demonstrate representational standing, the petitioner must show that at least one of its members would be affected by the proceeding and must identify that member by name and address. Further, the organization must show that the member would have standing to intervene in his/her own right and that the identified members have authorized the organization to request a hearing on their behalves. To determine if these elements are met, the petition is construed in favor of the petitioner.

E To become a party in an adjudicatory proceeding, a petitioner must submit at least one admissible contention. A contention must satisfy six criteria to be admissible in a given adjudicatory proceeding: It must (1) provide a specific statement of the issue of law or fact to be raised or controverted; (2) provide a brief explanation of the basis for the contention; (3) demonstrate that the issue raised in the contention is within the scope of the proceeding; (4) demonstrate that the issue raised in the contention is material to the findings the NRC must make to support the action that is involved in the proceeding; (5) provide a concise statement of the alleged fact or expert opinions which support the petitioner’s position on the issue and on which the petitioner intends to rely, together with references to the specific sources and documents on which the petitioner intends to rely; and (6) provide sufficient information to show that a genuine dispute exists with regard to a material issue of law or fact, including either references to specific portions of the application that the petitioner disputes, or where the application is alleged to be deficient, the identification of such deficiencies and supporting reasons for this belief.

F The petitioner’s supporting information may be viewed in a light most favorable to the petitioner, but the petitioner is required to supply all of the required elements for a valid intervention petition. Mere notice pleading is insufficient.

G A petitioner need not prove its contentions at the admissibility stage, as boards do not adjudicate disputed facts at this juncture. The factual support required for an admissible contention need not be of
the quality necessary to withstand a summary disposition motion, but need only demonstrate that material facts are in dispute.

H Absent a waiver, contentions challenging applicable statutory requirements or Commission regulations are not admissible in agency adjudications.

I To the extent growth faults constitute a mechanism of nontectonic deformation, the agency’s siting criteria in 10 C.F.R. § 100.23(d) require their analysis in an early site permit application.

J Even though this plant’s cooling pond is not a safety-related structure under paragraph VI(b)(3) to Appendix A of 10 C.F.R. Part 100, Appendix A nevertheless requires knowledge of the faulting under the pool and the impact this faulting might have on the pool’s operation.

K Under 10 C.F.R. § 52.17, an applicant need not submit information regarding control room habitability and ventilation system design in the site safety analysis report portion of an early site permit application.

L A contention claiming that the application insufficiently addresses the safety implications of low water availability is inadmissible for failure to raise a genuine dispute with the application because the contention does not provide specific references to relevant sections of the site safety analysis report that address low water considerations.

M To show that it is within the realm of reason that the federal government may assert an implied water right, which would obligate an applicant to address this hypothetical scenario in its environmental report under 10 C.F.R. § 51.45, a petitioner must provide some indicia of an attempt, plan, or intention that the federal government will assert this hypothetical water right.

N Climate change is considered an environmental impact that must be addressed, when applicable, to satisfy Commission regulations in 10 C.F.R. § 51.45.

O A contention that alleges an omission, not an inadequacy, of an environmental report’s analysis of socioeconomic impacts raises an issue that is not material to any finding the NRC must make in this early site permit proceeding because (1) 10 C.F.R. § 51.50(b)(2) states that the environmental report section of an early site permit application need not include an assessment of the economic, technical, or other benefits and costs of the proposed action and (2) 10 C.F.R. § 51.105(b) provides that the presiding officer in any early site permit hearing shall not admit contentions concerning the benefits assessment if the applicant does not address those issues in the early site permit application.

P Applicants must evaluate alternative sites to determine whether there is any obviously superior alternative to the site proposed. The alternatives analysis is the “heart” of the environmental impacts analysis.

Q A contention challenging the Waste Confidence Rule may not be admitted absent a waiver or exception. A ubiquitous issue that clearly applies to a large class of people or facilities is ineligible for a waiver.

R Where a contention alleges the omission of particular information or an issue from an application, and the information is later supplied by the applicant, the contention is moot.

A Summary disposition of a contention is appropriate when there no longer exists any genuine dispute over a material fact and the moving party is entitled to judgment as a matter of law. Section 2.1205(c) of 10 C.F.R. (directing that, in a proceeding governed by Subpart L, the Board is to apply the standards of Subpart G when ruling on motions for summary disposition); id. § 2.710(d)(2) (permitting a motion for summary disposition to be granted in a proceeding governed by Subpart G “if the filings in the proceeding, depositions, answers to interrogatories, and admissions on file, together with the statements of the parties and the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a decision as a matter of law.”).

B To evaluate a license renewal application for a nuclear power reactor, the NRC reviews (1) the management of aging effects and time-limited aging analysis of particular safety-related functions of the plant’s systems, structures, and components pursuant to 10 C.F.R. Part 54, in which the NRC addresses its obligations under the Atomic Energy Act, and (2) the environmental impacts and alternatives to the proposed action in accordance with 10 C.F.R. Part 51, in which the NRC addresses its obligations under NEPA. 10 C.F.R. §§ 51.10(a) (declaring that the regulations in 10 C.F.R. Part 51 implement NEPA),
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

54.29(a)-(b) (outlining the scope of reactor operating license renewal reviews); see also LBP-08-13, 68 NRC 43, 66 (2008) (citations omitted).

C The “aging-based safety review” set out in Part 54 is analytically separate from Part 51’s environmental inquiry and “does not in any sense ‘restrict NEPA.’” Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 13 (2001) (citations omitted). Accordingly, the NEPA review in license renewal proceedings, which is conducted pursuant to Part 51, is not limited to aging management related issues. Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), LBP-10-15, 72 NRC 257, 288 (2010).

D The Commission’s Part 51 regulations, which implement NEPA in NRC proceedings, classify the environmental impacts of license renewal as either Category 1 impacts, which are generically addressed by the NRC’s Generic Environmental Impact Statement for License Renewal, or Category 2 impacts, which are analyzed on a site-specific basis.

E Where the Staff has not already considered site-specific severe accident mitigation alternatives (SAMAs) for a facility, alternatives to mitigate severe accidents must be considered as part of an applicant’s Environmental Report (ER) and, ultimately, as part of the NRC Staff’s supplemental EIS in a power reactor license renewal proceeding. 10 C.F.R. § 51.53(c)(i)(iii)(L); id. Part 51, Subpart A, App. B, tbl. B-1. SAMA review identifies and assesses possible plant changes — such as improvements in hardware, training, or procedures — that could cost-effectively mitigate the environmental impacts that would otherwise flow from a potential severe accident. Duke Energy Corp. (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-02-17, 56 NRC 1, 5 (2002).

F The sufficiency of the NRC’s hard look at the benefits of SAMAs in comparison to their costs is subject to litigation in a license renewal proceeding. LBP-10-13, 71 NRC at 679 n.17 (2010) (citing Duke Energy Corp. (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-03-17, 58 NRC 419, 431 (2003) (citing Robertson v. Methow Valley Citizens Council, 490 U.S. 332, 352 (1989))).

G While a license renewal applicant is compelled to implement those safety SAMAs that deal with aging management, LBP-10-13, 71 NRC 673, 679 & n.18 (2010) (citing Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-11, 71 NRC 287, 293-94 n.26 (2010)), the Staff’s obligations under Part 51 and NEPA are not limited to only those SAMAs that address aging management.

H The NRC Staff is bound to take a hard look, consistent with NEPA and the APA, at all SAMAs (both aging-related and non-aging-related) before deciding whether to grant a license renewal application. Cf. Kleppe v. Sierra Club, 427 U.S. 390, 410 n.21 (1976) (“The only role for a court is to insure that the agency has taken a ‘hard look’ at environmental consequences.”); Nuclear Fuel Services, Inc. (Erwin, Tennessee), LBP-05-6, 61 NRC 202, 207 (2005) (citations omitted) (“NEPA . . . imposes a procedural requirement on an agency’s decision-making process by mandating that an agency consider the environmental impacts of a proposed action and inform the public that it has taken those impacts into account in making its decision. In other words, an agency must take a ‘hard look’ at the environmental consequences of a proposed action before taking that action.”).

I The NRC Staff has the authority to require implementation of non-aging management SAMAs through its current licensing basis (CLB) backfit review under Part 50 or through setting conditions of the license renewal. LBP-10-13, 71 NRC at 679 & n.19 (2010) (citing Duke Energy Corp. (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-02-28, 56 NRC 373, 388 n.77 (2002); 10 C.F.R. § 50.109(a)(3) (“The Commission shall require the backfiting of a facility only when it determines, based on the analysis described in paragraph (c) of this section, that there is a substantial increase in the overall protection of the public health and safety or the common defense and security to be derived from the backfit and that the direct and indirect costs of implementation for that facility are justified in view of this increased protection.”)).

J A federal agency, such as the NRC, would be acting arbitrarily and capriciously if it did not look at relevant data and sufficiently explain a rational nexus between the facts found in its review and the choice it makes as a result of that review. Shieldalloy Metallurgical Corp. v. NRC, 624 F.3d 489, 492-93 (D.C. Cir. 2010) (citations omitted).

LBP-11-18 ENTERGY NUCLEAR GENERATION COMPANY and ENTERGY NUCLEAR OPERATIONS, INC. (Pilgrim Nuclear Power Station), Docket No. 50-293-LR (ASLBP No. 06-848-02-LR); LICENSE RENEWAL; July 19, 2011; PARTIAL INITIAL DECISION (Rejecting, Upon Remand, Pilgrim Watch’s Challenge to Meteorological Modeling in SAMA Analysis in Entergy’s License Renewal Application)
A This proceeding concerns the application of Entergy Nuclear Generation Company and Entergy Nuclear Operations, Inc. for renewal of the operating license for its Pilgrim Nuclear Power Station, located in Plymouth, Massachusetts. On remand, a majority of the Licensing Board concludes that accounting for the meteorological patterns, atmospheric transport modeling, and data issues raised by Intervenor Pilgrim Watch cannot credibly alter which severe accident mitigation alternatives are potentially cost-beneficial to implement.

B The requirements of the National Environmental Policy Act (NEPA) as applied to severe accident mitigation alternatives (SAMA) analysis do not demand a fully developed plan or detailed examination of specific measures that will be employed to mitigate adverse environmental effects. SAMA analysis is neither a worst-case nor a best-case impacts analysis, and the agency’s obligations under NEPA are tempered by a practical rule of reason.

C Use of mean consequences in severe accident mitigation alternatives analysis is consistent with Commission policy and precedent, whereas the 95th percentile approach requested by Intervenor is akin to a worst-case scenario analysis — which is not required by the Commission.

D The goal of a severe accident mitigation alternatives analysis is to identify potential changes to a nuclear power plant, or its operations, that might reduce the risk (the likelihood or the impact, or both) of a severe reactor accident for which the benefit of implementing the changes outweighs the cost of the implementation.

E Based on uncontroverted evidence, the effects of the two meteorological patterns at issue, the “sea breeze” effect and the “hot spot” effect, must cause the expected average offsite damages to increase by at least a factor of two for the next most costly severe accident mitigation alternative to be cost-effective, i.e., to credibly alter the conclusions regarding which severe accident mitigation alternatives are cost-beneficial to implement. Uncontroverted expert testimony establishes that more accurate modeling of the meteorology would not result in differences approaching a factor of two for any particular meteorological condition, and therefore could not cause the computed resultant deposition of radioactive products released during any particular severe accident scenario to be in error by more than a factor of two.

F The evidence before us indicates that more accurate meteorological modeling of the “hot spot” phenomenon cannot alter the severe accident mitigation alternatives cost-benefit analysis because (1) experts testified that the phenomenon is unsubstantiated and would not affect the severe accident mitigation alternatives cost-benefit conclusions if it did exist, (2) the Intervenor has not provided any scientific or technical support for its generalized assertions about “hot spots,” and (3) Intervenor’s declarant’s unsubstantiated assertion of the phenomenon’s importance was made without his being qualified as an expert in meteorology.

LBP-11-19  HONEYWELL INTERNATIONAL, INC. (Metropolis Works Uranium Conversion Facility), Docket No. 40-3392-MLA (ASLBP No. 11-910-01-MLA-BD01); MATERIALS LICENSE AMENDMENT; July 27, 2011; MEMORANDUM AND ORDER (Granting Request for Hearing)

A If the 20-day deadline for requesting a hearing in 10 C.F.R. § 2.103(b) applies, the Staff’s failure to comply with its own responsibilities under that provision bars the Staff from invoking it. Having failed to notify Applicant of the regulatory deadline for requesting a hearing — as 10 C.F.R. § 2.103(b) requires — the Staff will not be heard to enforce it.

B Where Applicant has raised sufficient question as to the appropriate deadline, the Board may conclude that it would be unfair to penalize Applicant on account of what might be ambiguity in the NRC’s own regulations.

LBP-11-20  ENTERGY NUCLEAR GENERATION COMPANY and ENTERGY NUCLEAR OPERATIONS, INC. (Pilgrim Nuclear Power Station), Docket No. 50-293-LR (ASLBP No. 06-848-02-LR); LICENSE RENEWAL; August 11, 2011; MEMORANDUM AND ORDER (Denying Pilgrim Watch’s Requests for Hearing on Certain New Contentions)

A This proceeding concerns the application of Entergy Nuclear Generation Company and Entergy Nuclear Operations, Inc. for renewal of the operating license for its Pilgrim Nuclear Power Station, located in Plymouth, Massachusetts. Between the time when the Commission remanded a limited issue to the Board and when the Board disposed of that issue, Intervenor Pilgrim Watch filed requests for hearing on five proposed new contentions. The first concerns agency responsibility for and regulation of accident cleanup, and the second and third challenge the aging management plan for non-environmentally qualified inaccessible cables. Addressing only the first three proposed new contentions in this order, a majority
of the Licensing Board denies the requests for hearing because Intervenor did not address or meet the standards for reopening a closed evidentiary record.

B Intervenor’s failure to address the reopening standards set out in 10 C.F.R. § 2.326 creates a yawning deficiency in its submissions because the evidentiary record in this Board hearing has been closed and the Board’s jurisdiction in this remanded proceeding does not extend to, nor does the remand reopen, except for its narrow scope, any other aspect of this hearing or any other issue regarding the requested license renewal.

C The board cannot reconstruct the intervenor’s pleadings to find that they might be interpreted to satisfy the requirements for reopening a closed evidentiary record where the intervenor itself has explicitly argued it need not, and explicitly elected not to attempt to do so, and the intervenor’s arguments fail to supply the necessary substance.

D Arguments along the lines of the need to perform more conservative severe accident mitigation alternatives analysis, to use 95th percentile computations, and not to use a discount factor to evaluate the time effects of cleanup costs regard policy matters that are solely within the jurisdiction of the Commission and represent inadmissible challenges to binding Commission rulings regarding what is required in a severe accident mitigation alternatives analysis.

E Possible new information, from studies of the events at the Fukushima reactors, as to potential consequences of a severe accident at Applicant’s nuclear power plant is simply irrelevant to any uncertainty that might exist regarding which agency has authority over cleanup after a severe accident in the United States. To the extent that such information might become a future basis for modifications of SAMA analysis standards, such speculation is outside the scope of this proceeding.

F The contention is inadmissible for its failure to satisfy the explicit and intentionally stringent requirements for reopening a record. When a motion to reopen is required, 10 C.F.R. § 2.326(b) requires an expert’s affidavit to supply the factual and legal foundation for assertions that the reopening criteria are satisfied.

G For this contention to be admissible the “new” information must, in and of itself, be sufficient to support its admissibility because the proposed new contention’s subject — inaccessible cables — was addressed in the Applicant’s original license renewal application. The particular information notice upon which Intervenor relies as a foundation for its assertion that there is new information merely summarized information that was previously available which does not, therefore, present new information upon which a new contention can be based. Therefore, Intervenor’s proposed new contention fails to satisfy 10 C.F.R. § 2.326(a)(1) and therefore is inadmissible.

H The subject of inaccessible cable inspection and maintenance was covered by aging management plans in Applicant’s original license renewal application and any shortcomings of those plans were appropriate for contention at the time. Although Applicant later elected to enhance its existing aging management plan for non-environmentally qualified inaccessible medium-voltage cables, an enhancement to a program does not constitute new information sufficient to support a new contention.

LBP-11-21   SOUTH TEXAS PROJECT NUCLEAR OPERATING COMPANY (South Texas Project, Units 1 and 2), Docket Nos. 50-498-LR, 50-499-LR (ASLBP No. 11-909-02-LR-BD01); LICENSE RENEWAL; August 26, 2011; MEMORANDUM AND ORDER (Ruling on Petition for Leave to Intervene and Request for Hearing)

A In this 10 C.F.R. Part 54 proceeding regarding the application of South Texas Project Nuclear Operating Company (STPNOC) for renewal of licenses authorizing operation of its two nuclear power reactors, STP Units 1 and 2, located near Wadsworth, Texas, ruling on a petition for leave to intervene and request for a hearing by the Sustainable Energy and Economic Development (SEED) Coalition, the Licensing Board denies the petition, finding the four proffered contentions inadmissible.

B License renewal applicants must file pursuant to the NRC’s license renewal regulations, 10 C.F.R. Part 54. The general requirements regarding the contents of a license renewal application are set forth in 10 C.F.R. §§ 54.19-54.23. The environmental requirements regarding the contents of a license renewal application are set forth in 10 C.F.R. § 51.53(c). Additionally, in accordance with 10 C.F.R. § 51.95(c), the NRC Staff will prepare a Supplemental Environmental Impact Statement (SEIS) to the Commission’s Generic Environmental Impact Statement for License Renewal of Nuclear Power Plants, NUREG-1437. The standard for issuing the renewed license is set forth in 10 C.F.R. § 54.29.

C Under NRC regulations, a petitioner must demonstrate standing to intervene in a licensing process, 10 C.F.R. § 2.309(a). In general, a proper showing includes (1) the name, address, and telephone number
The purpose of the contention rule is to "focus litigation on concrete issues and result in a clearer and

of the petitioner; (2) the nature of the petitioner’s right under a relevant statute to be made a party to
the proceeding; (3) the nature and extent of the petitioner’s property, financial, or other interest in
the proceeding; and (4) the possible effect of any decision or order that might be issued in the proceeding
on the petitioner’s interest. Id. § 2.309(d)(1)(i)-(iv). In reactor license renewal proceedings, the Commission
recognizes a proximity presumption, whereby a petitioner is presumed to have standing to intervene
without the need to specifically plead injury, causation, and redressability if the petitioner lives within 50
miles of the nuclear power facility. Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power
Plant, Unit 3), CLI-09-20, 70 NRC 911, 915-16 & n.15 (2009); see also Florida Power & Light Co. (St.

If the petitioner is an organization seeking to intervene in an NRC proceeding in its own right, it
must allege that the challenged action will cause a cognizable injury to its interests or to the interests
of its members. Yankee Atomic Electric Co. (Yankee Nuclear Power Station), CLI-94-3, 39 NRC 95, 102
n.10 (1994). Alternatively, when seeking to intervene in a representational capacity, as is the case here, an
organization must identify at least one member who is affected by the licensing action and who qualifies
for standing in his or her own right, and show that the member has authorized the organization to intervene
on his or her behalf. Vermont Yankee Nuclear Power Corp. (Vermont Yankee Nuclear Power Station),
CLI-00-20, 52 NRC 151, 163 (2000).

A petitioner bears the burden of providing facts sufficient to establish its standing. See PPL Bell
Bend, LLC (Bell Bend Nuclear Power Plant), CLI-10-7, 71 NRC 133, 139 (2010).

The purpose of the contention rule is to “focus litigation on concrete issues and result in a clearer and
more focused record for decision.” Changes to Adjudicatory Process, 69 Fed. Reg. 2182, 2202 (Jan. 14,
2004). The Commission has stated that it “should not have to expend resources to support the hearing
process unless there is an issue that is appropriate for, and susceptible to, resolution in an NRC hearing.”
Id. The Commission has emphasized that the rules on contention admissibility are “strict by design.” See,
e.g., Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Unit 2), CLI-03-14, 58 NRC
207, 213 (2003). Further, absent a waiver, contentions challenging applicable statutory requirements or
Commission regulations are not admissible in agency adjudications. See 10 C.F.R. § 2.335(a). Failure to
comply with any of these requirements precludes admission of a contention. See Dominion Nuclear

The license renewal process is not an open invitation for new, broad-scoped inquiries into compliance
that are separate from and parallel to the Commission’s day-to-day operational oversight duties. 56 Fed.
Reg. at 64,952. The Commission has rejected many such broad-based conceptual inquiries as beyond
the bounds of a license renewal proceeding: safety culture, operational history, quality assurance, quality
(Prairie Island Nuclear Generating Plant, Units 1 and 2), CLI-10-27, 72 NRC at 481, 491 (2010) (citing 56
Fed. Reg. at 64,959, 64,967-68); Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units
3 and 4), CLI-01-17, 54 NRC 3, 10 (2001). To require a full reassessment of these issues during license
renewal would be both unnecessary and wasteful. Turkey Point, CLI-01-17, 54 NRC at 7. Accordingly,
the NRC’s license renewal review focuses upon those potential detrimental effects of aging that are not
routinely addressed by ongoing regulatory oversight programs.

Section 50.54(hh)(2), which arose as a post-9/11 security regulation, requires licensees to develop
guidance and strategies for addressing the loss of large areas of the plant due to explosions or fires from
(Mar. 27, 2009). Section 50.54(hh)(2) applies to both current reactor licensees under Part 50 and new
applicants for licenses under Part 52. Id. at 13,957. Thus, section 50.54(hh)(2) focuses on preplanning for
beyond-design basis events and applies to all nuclear facilities regardless of age; consequently, challenges
to that provision are neither germane to age-related degradation nor unique to the license renewal period.
Cf. Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Units 2 and 3), CLI-05-24, 62

As with safety contentions, the NRC’s regulations put limits on NEPA contentions in a license
renewal proceeding. 10 C.F.R. § 2.309(f)(1)(iii). The ER for the operating license renewal stage need
not contain environmental analysis of the “Category 1” issues identified in Appendix B to Subpart A of
10 C.F.R. Part 51. Id. § 51.53(c)(3)(i). Category 1 issues are not subject to challenge in a relicensing
proceeding, absent a waiver under 10 C.F.R. § 2.335, because they “involve environmental effects that are
essentially similar for all plants [and] need not be assessed repeatedly on a site-specific basis.”
DIGESTS

ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

Point. CLI-01-17, 54 NRC at 11. But the ER must contain analyses of the environmental impacts of the proposed action for those matters identified as “Category 2” license renewal issues in Appendix B. 10 C.F.R. § 51.53(c)(3)(i). The ER must also “contain a consideration of alternatives for reducing adverse impacts, as required by [10 C.F.R. § 51.45(c)], for all Category 2 license renewal issues in [Appendix B].” Id. § 51.53(c)(3)(iii). Finally, “if the staff has not previously considered severe accident mitigation alternatives for the applicant’s plant in an environmental impact statement or related supplement or in an environmental assessment, a consideration of alternatives to mitigate severe accidents must be provided” in the ER. Id. § 51.53(c)(3)(ii). Category 2 issues must be reviewed on a site-specific basis because they have not been determined to be “essentially similar” for all plants. 10 C.F.R. Part 51, Subpart A, App. B, n.2. Therefore, challenges relating to these issues are properly part of a license renewal proceeding.

The agency’s regulations require that an ER provide sufficient information about alternatives to enable the NRC Staff to prepare an Environmental Impact Statement in compliance with NEPA. See 10 C.F.R. § 51.45(b)(3). An ER that provides an incomplete or misleading picture of an alternative would fail in that essential purpose. See Animal Defense Council v. Hodel, 840 F.2d 1432, 1439 (9th Cir. 1988) (an EIS that contains an incomplete or misleading comparison of alternatives is deficient).

LBP-11-22 VIRGINIA ELECTRIC AND POWER COMPANY d/b/a DOMINION VIRGINIA POWER and OLD DOMINION ELECTRIC COOPERATIVE (North Anna Power Station, Unit 3), Docket No. 52-017-COL (ASLBP No. 08-863-01-COL); COMBINED LICENSE; September 1, 2011; MEMORANDUM AND ORDER (Denying Dominion’s Motion for Clarification of LBP-11-10)

A Terminating an adjudication has significant implications for the rights of intervenors under AEA § 189a, which instructs the Commission to grant a hearing to and to admit as a party to any licensing proceeding “any person whose interest may be affected by the proceeding.”

B Until the SER and Staff NEPA documents have been issued, a licensing board is generally prohibited from holding the hearing on the license application. See Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), CLI-07-17, 65 NRC 392, 395 (2007). In the interim, the intervenor may submit proposed new contentions based on new information. 10 C.F.R. § 2.309(f)(2). The filing of new contentions based on the SER and Staff NEPA documents is expressly contemplated by the Model Milestones in 10 C.F.R. Part 2, App. B.

C The Board’s authority is not confined to a specific set of previously admitted contentions; rather, the Board’s delegated authority to provide the hearing mandated by AEA § 189a is sufficient to permit it to keep adjudication open to take account of the dynamic nature of the licensing process.

D The proceeding before the Licensing Board will terminate when (1) the deadlines in the Board’s scheduling orders for filing new or amended contentions have expired and (2) the Board has resolved all contentions that were admitted or proposed before those deadlines expired.

E Terminating this adjudication for lack of pending contentions would force the Inter凭什么 to meet the stringent requirements for reopening the proceeding in order to propose new contentions based on information not currently available or that has only recently become available, and such action would thus be inconsistent with the agency’s obligation under AEA § 189a to provide a hearing at the Interpolator’s request on any issue material to the licensing decision.

F A licensing board may exercise only the jurisdiction conferred upon it by the Commission. The Commission’s hearing notice defines both the nature of the proceeding and the Board’s jurisdiction over the proceeding. See Duke Power Co. (Catawba Nuclear Station, Units 1 and 2), ALAB-825, 22 NRC 785, 790 (1985).

G Where the hearing notice does not restrict the hearing to any particular set of issues, the hearing should be understood as encompassing all issues raised by a party to the licensing proceeding that may properly be litigated under AEA § 189a. The potential subject matter of the hearing includes all material issues that have a bearing on the licensing decision, which necessarily includes material issues based on new information in the SER and the required Staff NEPA document.

H The plain language of 10 C.F.R. § 2.318(a) supports the conclusion that a licensing board does not lose its jurisdiction whenever there is no pending contention during some period of the lengthy and dynamic licensing process. Section 2.318(a) delineates three occasions that could trigger termination of the presiding officer’s jurisdiction: “when the period within which the Commission may direct that the record be certified to it for final decision expires, when the Commission renders a final decision, or when the presiding officer withdraws from the case upon considering himself or herself disqualified, whichever is
Nothing in the regulations suggests that an intervenor loses its status as a party to the licensing proceeding or forfeits its right to a hearing whenever its admitted contention has become moot prior to the issuance of the SER and required Staff NEPA documents. Although intervenor status may only be granted to a petitioner if it proffers at least one admissible contention, and the intervenor must have at least one pending contention by the time of the evidentiary hearing, nothing in section 2.309 requires that throughout the course of the adjudicatory proceeding there must always be at least one contention pending before the board.

This proceeding concerns the application of Entergy Nuclear Generation Company and Entergy Nuclear Operations, Inc. for renewal of the operating license for its Pilgrim Nuclear Power Station, located in Plymouth, Massachusetts. Between the time when the Commission remanded a limited issue to the Board and when the Board disposed of the remanded issue, Intervenor Pilgrim Watch filed several requests for hearing on proposed new contentions. In this Order, a majority of the Licensing Board denies two hearing requests that Pilgrim Watch filed after the accident at the Fukushima Daiichi Nuclear Power Plant in Japan.

The standards for reopening apply not only when a party is seeking to introduce new evidence on a previously admitted contention after the evidentiary record is closed, but also when a party is seeking to introduce a new contention after the record is closed.

A contention regards limitations and phenomena that were widely known, and should have been known to intervenor, at the outset of this proceeding, and thus could have been raised long ago, rendering it untimely now.

Unsupported speculation that fresh analysis might lead the NRC to require additional mitigation measures simply does not rise to the level required to raise a significant safety issue or a fortiori an exceptionally grave issue.

Because severe accident mitigation alternatives analysis is a cost-benefit analysis (which has no bearing on safety significance) and is not a direct safety analysis, it does not, and by its very nature cannot, raise any exceptionally grave issue.

The standard for when an environmental issue is “significant” in the context of reopening a closed record is the same as the standard for when supplementation of an environmental impact statement is required; i.e., the new and significant information must paint a seriously different picture of the environmental landscape.

Because intervenor does not provide an affidavit substantively addressing why a materially different result is likely, the contention fails to satisfy the regulatory requirement to demonstrate that a materially different result would have been likely in this proceeding. Bare unsupported assertions do not (and cannot) demonstrate that a materially different result would have been likely and thus will not support reopening.

The contention is not supported by a concise statement of alleged fact or expert opinion. The intervenor’s vague claim that it will rely on testimony from an expert witness and government documents does not provide the requisite concise statement of facts or expert support.

A material issue means one where resolution of the dispute would make a difference in the outcome of the licensing proceeding.

The contention is not timely because all of the information the intervenor asserts to be newly derived was analyzed in the original license renewal application and regards issues that have been widely recognized for many years.

Matters challenging the design of the nuclear power plant are outside the scope of the license renewal proceeding.
The absence of a competent affidavit, as required by 10 C.F.R. § 2.326(b), deprives the Licensing Board of the ability (even the opportunity) substantively to consider whether a materially different result would be obtained.

U.S. DEPARTMENT OF ENERGY (High-Level Waste Repository), Docket No. 63-001-HLW (ASLBP No. 09-892-HLW-CAB04); CONSTRUCTION AUTHORIZATION; September 30, 2011; MEMORANDUM AND ORDER (Suspending Adjudicatory Proceeding)

In light of current fiscal constraints and consistent with the Commission’s Memorandum and Order of September 9, 2011, CLI-11-7, 74 NRC 212, the Board suspends the proceeding on the Department of Energy’s application for authorization to construct a national high-level nuclear waste repository at Yucca Mountain, Nevada.

NUCLEAR INNOVATION NORTH AMERICA LLC (South Texas Project, Units 3 and 4), Docket Nos. 52-012-COL, 52-013-COL (ASLBP No. 09-885-08-COL-BD01); COMBINED LICENSE; September 30, 2011; MEMORANDUM AND ORDER (Ruling on Admissibility of Intervenors’ New Foreign Control Contention)

Alicia Complaint guidance, an entity is under foreign ownership, control, or domination “whenever a foreign interest has the ‘power,’ direct or indirect, whether or not exercised, to direct or decide matters affecting the management or operations of the applicant.” Final Standard Review Plan on Foreign Ownership, Control, or Domination, 64 Fed. Reg. 52,355, 52,358 (Sept. 28, 1999), cited with approval in Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-09-20, 70 NRC 911, 920 (2009). However, the Commission has cautioned that there is no specific ownership percentage above which it would conclusively find that an applicant is per se controlled by foreign interests. 64 Fed. Reg. at 52,358; Calvert Cliffs, CLI-09-20, 70 NRC at 920. Rather, foreign control “must be interpreted in light of all the information that bears on who in the corporate structure exercises control over what issues and what rights may be associated with certain types of shares.” 64 Fed. Reg. at 52,358; Calvert Cliffs, CLI-09-20, 70 NRC at 920-21.

Even substantial foreign funding or involvement — where “a foreign entity contributes 50% or more, of the costs of constructing a reactor” or “participates in the project review” and is “consulted on policy and costs issues” — does not require a finding of foreign control, where safeguards ensure U.S. national defense and security. 64 Fed. Reg. at 52,358.

The Atomic Energy Act (AEA) and the Commission’s FOCD regulations prohibit licensees from being owned, controlled, or dominated by a foreign entity. Therefore, as a prospective licensee, an applicant must not be owned, controlled, or dominated by a foreign entity for it to obtain a license. That an applicant’s Combined License Application (COLA) parses duties under the license, envisioning that it would have sole authority to construct the proposed facility while a co-license applicant would have sole authority to operate the proposed facility, is simply an irrelevant distinction for claiming that one of the applicants should not be subject to a FOCD inquiry. Both are prospective licensees subject to the limitations on foreign ownership, control, or domination.

At the contention admissibility stage of a proceeding, intervenors need not marshal their evidence as though preparing for an evidentiary hearing. See, e.g., U.S. Department of Energy (High-Level Waste Repository), LBP-09-6, 69 NRC 367, 416 (2009) (noting that requiring petitioners to proffer additional and conclusive support for the effect of their proposed contention “would improperly require . . . Boards to adjudicate the merits of contentions before admitting them”). Intervenors need only raise a genuine dispute as to the COLA, e.g., the effectiveness of the negation action plan at combating unlawful foreign ownership, control, or domination.

AREVA ENRICHMENT SERVICES, LLC (Eagle Rock Enrichment Facility), Docket No. 70-7015-ML (ASLBP No. 10-899-02-ML-BD01); MATERIALS LICENSE; October 7, 2011; SECOND AND FINAL PARTIAL INITIAL DECISION (Uncontested/Mandatory Hearing on Environmental Matters)

In this 10 C.F.R. Part 70 proceeding regarding the application of AREVA Enrichment Services, LLC (AES) for authorization to possess and use source, byproduct, and special nuclear material to
enrich natural uranium by the gas centrifuge process at its planned Bonneville County, Idaho Eagle Rock Enrichment Facility (EREF), the Licensing Board provides its findings and conclusions concerning uncontested National Environmental Policy Act (NEPA)/environmental-related matters, concluding, *inter alia*, that (1) the application and record of the proceeding, including the NRC Staff’s environmental impact statement (EIS), contain sufficient information to support license issuance; (2) the review conducted by the Staff pursuant to 10 C.F.R. Part 51 has been adequate; and (3) after independently weighing the environmental, economic, technical, and other benefits against the environmental and other costs, and considering reasonable alternatives, the license requested under the AES application at issue in this proceeding should be issued.

**B** Atomic Energy Act (AEA) § 274c(1), 42 U.S.C. § 2021(c)(1), gives the NRC a clear statutory mandate to regulate the construction and operation of a uranium enrichment facility. See LBP-11-11, 73 NRC 455, 474 (2011). Further, AEA §§ 53 and 63, 42 U.S.C. §§ 2073, 2093, which concern special nuclear material and byproduct material, provide the general statutory basis under which the NRC has adopted the variety of regulations that govern a proposed enrichment facility’s construction and operation. Finally, AEA §§ 189a and 193, id. §§ 2239a, 2243, provide the statutory footing for the procedural precepts that apply to a uranium enrichment facility licensing action, including the need for (1) the NRC to conduct only a single licensing action and adjudicatory proceeding to authorize the construction and operation of a uranium enrichment facility; and (2) a mandatory hearing regarding the application and the Staff’s associated safety and environmental reviews, despite the absence of a petitioner seeking to interpose a challenge to the applicant’s request for such a single license.

**C** Part 70 of Title 10 of the Code of Federal Regulations establishes the basic regulatory framework that governs the licensing of an entity to construct and operate an enrichment facility. Nonetheless, a number of other rules and regulations in 10 C.F.R. Chapter I, including Parts 19, 20, 21, 25, 30, 40, 71, 73, 74, 95, 140, 170, 171, and the agency’s NEPA regulations in Part 51, are applicable to licensing a facility to receive, possess, use, transfer, deliver, and process byproduct, source, and special nuclear material in the quantities necessary to conduct the activities contemplated at a uranium enrichment facility. See LBP-11-11, 73 NRC at 474-75.

**D** With regard to a licensing board’s responsibilities in the context of a mandatory hearing, a board is to “conduct a simple ‘sufficiency’ review” rather than a de novo review on both AEA and NEPA issues. *Exelon Generation Co., LLC* (Early Site Permit for Clinton ESP Site), CLI-05-17, 62 NRC 5, 39 (2005). Thus, boards “should decide simply whether the safety and environmental record is sufficient to support license issuance. In other words, the boards should inquire whether the NRC Staff performed an adequate review and made findings with reasonable support in logic and fact.” *Id.* There is, however, a caveat in that boards are instructed to make independent environmental judgments with respect to certain NEPA findings, though even then they “need not rethink or redo every aspect of the NRC Staff’s environmental findings or undertake their own fact-finding activities.” *Id.* at 44; *see also Dominion Nuclear North Anna, LLC* (Early Site Permit for North Anna ESP Site), LBP-07-9, 65 NRC 539, 559-60 (2007). The board’s role thus is to “carefully probe [Staff] findings by asking appropriate questions and by requiring supplemental information when necessary,” but “the NRC Staff’s underlying technical and factual findings are not open to board reconsideration unless, after a review of the record, the board finds the NRC Staff review inadequate or its findings insufficient.” *Clinton ESP*, CLI-05-17, 62 NRC at 39-40.

**E** In a mandatory hearing for the licensing of a uranium enrichment facility, a licensing board “must narrow its inquiry to those topics or sections in Staff documents that do not on their face adequately explain the logic, underlying facts, and applicable regulations and guidance.” *Exelon Generation Co., LLC* (Early Site Permit for Clinton ESP Site), CLI-06-20, 64 NRC 15, 21-22 (2006).

**F** The NEPA findings associated with a mandatory hearing require the licensing board to (1) determine whether the requirements of section 102(2)(A), (C), and (E) of NEPA and Subpart A of 10 C.F.R. Part 51 have been complied with in the proceeding; (2) independently consider the final balance among conflicting factors contained in the record of the proceeding with a view to determining the appropriate action to be taken; and (3) determine, after weighing the environmental, economic, technical, and other benefits against the environmental and other costs, and considering reasonable alternatives, whether a license should be issued, denied, or appropriately conditioned to protect environmental values. See Licensing Board Initial Scheduling Order (May 19, 2010), Attach. A, at 9 (unpublished) [hereinafter Initial Scheduling Order]. Additionally, the Commission has directed that if a proceeding is not a contested proceeding, i.e., the
proceeding is an uncontested/mandatory hearing rather than one in which a petitioner seeks to challenge the AES application in accord with the procedures specified in 10 C.F.R. Part 2, Subpart C, then in connection with environmental matters the licensing board is to determine whether (1) the application and record of the proceeding contain sufficient information to support license issuance; (2) the Staff’s review of the application has been adequate to support findings to be made by the Office of Nuclear Materials Safety and Safeguards (NMSS) Director with respect to whether (a) the application satisfies the standards set forth in the Commission’s hearing notice and the applicable standards in 10 C.F.R. Parts 30, 40, and 70, and (b) the requirements of NEPA and the agency’s implementing regulations in Part 51 have been met; and (3) the review conducted by the Staff pursuant to 10 C.F.R. Part 51 has been adequate. See Notice of Hearing and Commission Order and Order Imposing Procedures for Access to Sensitive Unclassified Non-Safeguards Information and Safeguards Information for Contention Preparation; In the Matter of AREVA Enrichment Services, LLC (Eagle Rock Enrichment Facility), 74 Fed. Reg. 38,052, 38,053-54 (July 30, 2009) (CLI-09-15, 70 NRC 1, 7 (2009)); see also Initial Scheduling Order, Attach. A, at 9. G

As part of its NEPA analysis, the agency must provide information that addresses the purpose and need for the proposed action. See 10 C.F.R. Part 51, App. A, § 4. H

Staff materials licensing-related guidance regarding the preparation of the purpose and need analysis in the applicant’s environmental report (ER) and the Staff’s EIS state that the Applicant and Staff treatment of this subject should explain “why the proposed action is needed,” going on to indicate that the discussions should describe “the underlying need for the proposed action and should not be written merely as a justification of the proposed action, nor to alter the choice of alternatives. . . . Examples of need include a benefit provided if the proposed action is granted or descriptions of the detriment that will be experienced without approval of the proposed action. In short, the need describes what will be accomplished as a result of the proposed action.” Exh. NRC000189, at 5-2, 6-1 (NMSS, NRC, Environmental Review Guidance for Licensing Actions Associated with NMSS Programs, NUREG-1748 (Aug. 2003)).

In the context of the agency’s NEPA-related review of the need for a uranium enrichment facility, several factors ultimately sustain a finding of “need” for the facility. The first supporting element is the need to ensure the continued availability of diverse, reliable sources of domestic enrichment services to provide low-enriched uranium for domestic power reactors. The importance of this general principle has been recognized in previous licensing proceedings. See USEC Inc. (American Centrifuge Plant), LBP-07-6, 65 NRC 429, 473 (2007); Louisiana Energy Services, L.P. (National Enrichment Facility), LBP-05-13, 61 NRC 385, 443, petition for review denied, CLI-05-28, 62 NRC 721, 726 (2005).

Another factor bolstering the need for a facility is the recognized “margin level” that exists in the existing enrichment market to offset potential supply problems as well as maintain a level of reasonable market competition.

Support for the need for a facility also comes from the current status of industry commitments for the proposed facility’s enrichment services. Evidence of significant actual utility commitments provides a compelling showing in support of the need for an enrichment facility. See LES, LBP-05-13, 61 NRC at 444-45.

As was noted in the Vogtle ESP proceeding, see Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), LBP-09-19, 70 NRC 433, 503-04 (2009), in contrast to the regulatory scheme that permits certain “construction” activities to be undertaken at a reactor site pursuant to a limited work authorization so long as a site redress plan is submitted, see 10 C.F.R. § 50.10(d), (g), there is no agency requirement that an applicant submit a redress plan relative to preconstruction activities nor, absent state or local requirements, take any remediation action regarding preconstruction activities if it decides not to complete the project or is denied agency authorization to construct and operate the facility.

At all levels of government, policymakers are attempting to account for and address greenhouse gas (GHG) emissions. At the NRC, the Commission has directed the Staff to consider GHGs in its environmental reviews for major licensing actions. The Commission also directed that in the interest of consistency, for power reactors the Staff review should encompass emissions from the uranium fuel cycle as well as from construction and operation of the reactor facility to be licensed. See Duke Energy Carolinas, LLC (William States Lee III Nuclear Station, Units 1 and 2), CLI-09-21, 70 NRC 927, 931 (2009).

Under NEPA, the NRC must assess the environmental impacts of a proposed facility, including those impacts associated with GHG emissions by the proposed facility. See Lee, CLI-09-21, 70 NRC at 444-45.
In assessing GHG impacts, the NRC must devote its resources to taking a “hard look” at the issue. See Pa’ina Hawaii, LLC, CLI-10-18, 72 NRC 56, 74 (2010); Louisiana Energy Services, L.P. (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 87-88 (1998). This standard requires the agency to rigorously explore and objectively analyze impacts, so that merely offering “general statements about “possible” effects and “some risk” do[es] not constitute a “hard look” absent a justification regarding why more definitive information could not be provided.” Pa’ina, CLI-10-18, 72 NRC at 74 (quoting Blue Mountains Biodiversity Project v. Blackwood, 161 F.3d 1208, 1213 (9th Cir. 1998)). Taking a hard look “[fosters] both informed decision-making and informed public participation,” and thus ensures that the agency does not act upon “incomplete information, only to regret its decision after it is too late to correct.” Claiborne, CLI-98-3, 47 NRC at 88 (quoting Marsh v. Oregon Natural Resources Council, 490 U.S. 360, 371 (1989)).

At the same time, the agency need not undertake an unceasing impacts analysis. Rather, because NEPA is premised on a “rule of reason,” the agency need only consider the reasonable alternatives to a proposed action. See Pa’ina, CLI-10-18, 72 NRC at 75. As a result, the NRC may decline to examine “remote and speculative risks” or events with “inconsequentially small” probabilities. See Vermont Yankee Nuclear Power Corp. (Vermont Yankee Nuclear Power Station), ALAB-919, 30 NRC 29, 44 (1989). In that regard, according to the Council on Environmental Quality (CEQ), the “rule of reason” is “a judicial device to ensure that common sense and reason are not lost in the rubric of regulation.” Final Rule: “National Environmental Policy Act Regulations; Incomplete or Unavailable Information,” 51 Fed. Reg. 15,618, 15,621 (Apr. 25, 1986).

Irrespective of the cause of the impact or the appropriate level of administrative scrutiny, for the purpose of NEPA evaluation NRC regulations categorize impacts into three types: direct, indirect, and cumulative. See 10 C.F.R. § 51.14(b) (adopting various CEQ regulations, including definitions of direct, indirect, and cumulative effects/impacts in 40 C.F.R. §§ 1508.7, 1508.8, 1508.25). Direct impacts are those caused by the action that is the subject of the EIS, and occurring at the same time and place as that action, while indirect impacts are caused by the action at a later time or more distant place, yet are still reasonably foreseeable. See id. § 1508.8. In contrast, cumulative impacts are those that “result[] from the incremental impact of the action when added to other past, present, and reasonably foreseeable future actions regardless of what agency (federal or nonfederal) or person undertakes such other actions. Cumulative impacts can result from individually minor but collectively significant actions taking place over a period of time.” Id. § 1508.7. But regardless of their classification as direct, indirect, or cumulative, impacts that are reasonably foreseeable are to be assessed. See 10 C.F.R. Part 51, App. A, § 7.

As a tool for assessing the significance of potential impacts, NRC regulations establish a standard scheme. See, e.g., id. Part 51, App. B, Table B-1 n.3. This protocol was created based on the approach outlined in section 1508.27 of the CEQ regulations, which indicates that agencies should consider both the context and intensity of impacts. See 40 C.F.R. § 1508.27. The NRC has established three levels of impacts — SMALL, MODERATE, and LARGE — that are defined as follows:

- SMALL. The environmental effects are not detectable or are so minor that they would neither destabilize nor noticeably alter any important attribute of the resource.
- MODERATE. The environmental effects are sufficient to noticeably alter but not to destabilize important attributes of the resource.
- LARGE. The environmental effects are clearly noticeable and are sufficient to destabilize important attributes of the resource.

Under NEPA, the agency must assess the environmental impacts of a proposed facility. See 42 U.S.C. § 4332(2)(C)(i). Following this general NEPA directive to evaluate impacts, the Staff assesses air quality impacts as a matter of course. See, e.g., USEC Inc. (American Centrifuge Plant), LBP-07-6, 65 NRC 429, 487-88 (2007). In keeping with its standard impact evaluation protocol, the Staff categorizes these impacts as SMALL, MODERATE, or LARGE.

In parallel with the Staff’s role under NEPA to assess environmental impacts, the Environmental Protection Agency (EPA) possesses authority under the Clean Air Act to set numerical standards for air pollutants from emission sources. See 42 U.S.C. § 7411. EPA’s National Ambient Air Quality Standards (NAAQS) set maximum levels for air pollutants in the ambient air deemed to provide protection for human

DIGESTS

ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

90
DIGESTS

ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

health and welfare. EPA also has granted authority to some states to implement, maintain, and enforce their own EPA-compliant air quality programs through State Ambient Air Quality Standards (SAAQS). See 42 U.S.C. § 7410(a)(1). That, however, does not relieve the NRC of its duty under NEPA to assess the environmental impacts of air pollutants associated with a proposed facility, including giving appropriate consideration both to whether any pollutant surpasses the NAAQS and the consequences of that pollutant exceeding the NAAQS.

Under 10 C.F.R. Part 20, App. B, and section 70.59, Part 70 applicants are required to establish a radiological monitoring program to monitor and report the release of radiological gaseous and liquid effluents to the environment. Although the question of the sufficiency and adequacy of the applicant’s program for radiological effluent monitoring and radiological environmental monitoring would be part of the Staff’s AEA/safety-related review of the application and would be addressed in the Staff’s safety evaluation report, in the context of the agency’s NEPA responsibility to consider the radiological effects of a proposed action and the alternatives available for reducing or avoiding such impacts, see 10 C.F.R. § 51.71(d), an applicant’s radiological measurements and monitoring program also is subject to scrutiny.

Two Staff guidance documents set forth the information that should be provided in the ER and the EIS regarding a radiological monitoring program and monitoring program acceptance criteria, see Exh. NRC000189, at 5-26, 6-29 to -30 (NMSS, NRC, Environmental Review Guidance for Licensing Actions Associated with NMSS Programs, NUREG-1748 (Aug. 2003) [hereinafter Staff Environmental Review Guidance]; Exh. NRC000031, at 9-12 to -15 (NMSS, NRC, [SRP] for the Review of a License Application for a Fuel Cycle Facility, NUREG-1520 (Mar. 2002)); while two other Staff guidance documents outline what the Staff believes are acceptable methods for designing a radiological monitoring program and submitting required semiannual reports specifying principal radionuclide releases to unrestricted areas for the purpose of estimating maximum potential annual public doses from such releases, see Exh. NRC000208, at 6-16 (Office of Nuclear Regulatory Research (RES), NRC, Quality Assurance for Radiological Monitoring Program, Regulatory Guide [(RG)] 4.15 (rev. 2 July 2007)); Exh. NRC000209, at 3-7, A-1 (RES, NRC, Monitoring and Reporting Radioactive Materials in Liquid and Gaseous Effluents from Nuclear Fuel Cycle Facilities, RG 4.16 (rev. 2 Dec. 2010)).

The National Historic Preservation Act of 1966 (NHPA), 16 U.S.C. § 470, requires that all adverse effects to any National Register of Historic Places (NRHP)-eligible historic or cultural resource be considered during any federal undertaking, such as an NRC licensing action for a proposed uranium enrichment facility. NRC fulfills its responsibilities under the NHPA in the context of the historical and cultural resources impact assessment that is part of its NEPA environmental review. See Staff Environmental Review Guidance at 1-7 to -8. An historical/cultural resource is considered eligible for listing on the NRHP if it meets one or more of the following criteria: (1) association with an historic person; (2) association with an historic event; (3) representation of the work of a master; or (4) potential to provide information on the history or prehistory of the United States. See 36 C.F.R. § 60.4. Further, under NHPA § 106, the area of potential effect (APE) of the federal undertaking must be designated, e.g., the area directly affected by preconstruction/construction of a proposed facility, and the lead federal agency associated with the undertaking must conduct a consultation with the State Historic Preservation Officer regarding the presence and protection of historic and cultural resources in the designated APE, as well as any federally recognized Native American groups with an ancestral interest in the property, to determine if resources important to the tribe are present. See FEIS at 4-5.

The following technical issues are discussed: AERMOD Model; Albedo; Bowen Ratio; Construction Inspection Program; Effluent Monitoring Program; Enriched Uranium Availability; Fugitive Dust; Greenhouse Gas Emissions; Historic/Cultural Resource Monitoring and Preservation; Hydrate Plug; Need for Uranium Enrichment Services; Particulate Matter; Planetary Boundary Layer; Preconstruction Activities; Preconstruction/Construction Air Quality Impacts; Radiological Environmental Monitoring Program; Seismic Avoidance Area; Site Remediation; Site Selection Criteria (Winter Weather- and Earthquake-related); Surface Roughness; Visual Impacts.

LBP-11-27 PPL BELL BEND, LLC (Bell Bend Nuclear Power Plant), Docket No. 52-039-COL (ASLBP No. 11-914-02-COL-BD01), COMBINED LICENSE; LUMINANT GENERATION COMPANY LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), Docket Nos. 52-034-COL, 52-035-COL (ASLBP No. 11-914-02-COL-BD01), COMBINED LICENSE; ENERGY NORTHWEST (Columbia Generating Station), Docket No. 50-397-LR (ASLBP No. 11-912-03-LR-BD01), LICENSE RENEWAL; SOUTHERN NUCLEAR OPERATING COMPANY (Vogtle Electric Generating Plant, Units 3 and 4), Docket Nos.
DIGESTS

ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

52-025-COL, 52-026-COL (ASLBP Nos. 11-914-02-COL-BD01, 11-913-01-COL-BD01), COMBINED LICENSE; DUKE ENERGY CAROLINAS, LLC (William States Lee III Nuclear Station, Units 1 and 2), Docket Nos. 52-018-COL, 52-019-COL (ASLBP No. 11-913-01-COL-BD01), COMBINED LICENSE; October 18, 2011; MEMORANDUM AND ORDER (Denying Motions to Reopen Closed Proceedings and Intervention Petition/Hearing Request as Premature)

LBP-11-28 NEXTERA ENERGY SEABROOK, LLC (Seabrook Station, Unit 1), Docket No. 50-443-LR (ASLBP No. 10-906-02-LR-BD01); LICENSE RENEWAL; October 19, 2011; MEMORANDUM AND ORDER (Denying Motions to Admit New Contention)

A In this license renewal proceeding, the licensing board denies motions to admit a new contention arguing that the Applicant’s environmental report for Seabrook Station, Unit 1 (Seabrook) fails to satisfy the National Environmental Policy Act because it does not address findings and recommendations raised by the July 2011 NRC Near-Term Task Force Report on the Fukushima Dai-ichi accident in Japan. The Board denies the motions because the proffered contention is premature and insufficiently focused on the license renewal application for Seabrook.

B The purpose of an applicant’s environmental report is to assist the NRC in preparing the agency’s own environmental analysis. 10 C.F.R. § 51.14(a)(3), 51.71(a). Once the NRC performs its own analysis, alleged defects in an applicant’s environmental report may be moot.

C A draft supplemental environmental impact statement need only address “new” and “significant” information. 10 C.F.R. § 51.72(a)(2). To constitute “new” and “significant” information, the information must “present a seriously different picture of the environmental impact of the proposed project from what was previously envisioned.” Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 167-68 (2011).

D To proffer an admissible contention, interveners must demonstrate a genuine dispute suitable for evidentiary hearing. 10 C.F.R. § 2.309(vi).

LBP-11-29 FLORIDA POWER & LIGHT COMPANY (St. Lucie Nuclear Power Plant, Unit 1), Docket No. 50-335-LA (ASLBP No. 11-911-01-LA-BD01); LICENSE AMENDMENT; October 19, 2011; MEMORANDUM AND ORDER (Denying Petition for Leave to Intervene and Request for Hearing)

A In a proceeding regarding the amendment of a license granted under the Atomic Energy Act (AEA), section 189a of the AEA requires the NRC to “grant a hearing upon the request of any person whose interest may be affected by the proceeding, and ... admit such person as a party to such proceeding.” 42 U.S.C. § 2239(a)(1)(A). To be granted a hearing, a petitioner seeking a hearing must demonstrate standing pursuant to 10 C.F.R. § 2.309(d) and proffer at least one admissible contention in accordance with 10 C.F.R. § 2.309(f). 10 C.F.R. § 2.309(a).

B In license amendment proceedings, petitioners may not claim “standing simply upon a residence or visits near the plant, unless the proposed action quite ‘obviously’ entails an increased potential for offsite consequences.” Commonwealth Edison Co. (Zion Nuclear Power Station, Units 1 and 2), CLI-99-4, 49 NRC 185, 191 (1999) (quoting Florida Power & Light Co. (St. Lucie Nuclear Power Plant, Units 1 and 2), CLI-89-21, 30 NRC 325, 329-30 (1989)) (emphasis added).

C Extended power uprate (EPU) proceedings necessarily trigger application of the 50-mile proximity presumption given that such license applications entail an obvious increase in the potential for offsite consequences.

D The NRC follows contemporaneous judicial concepts of standing, which call for a particularized showing of “a concrete and particularized injury that is fairly traceable to the challenged action and is likely to be redressed by a favorable decision,” where the injury is “to an interest arguably within the zone of interests protected by the governing statute.” Calvert Cliffs, CLI-09-20, 70 NRC at 915 (citing Cleveland Electric Illuminating Co. (Perry Nuclear Power Plant, Unit 1), CLI-93-21, 38 NRC 87, 92 (1993)).

E To demonstrate representational standing, an organization must (1) show that at least one of its members would be affected by the agency’s approval of the requested license, (2) identify such members, and (3) establish (preferably through an affidavit) that such members of the organization have authorized it to act as the members’ representative and to request a hearing on the members’ behalf.

F Petitioners may not raise in adjudicatory proceedings contentions attacking the agency’s rules and regulations (or contentions that are the subject of ongoing rulemakings).

G The Commission’s regulations are “strict by design” in order to “help assure that our hearing process will be appropriately focused upon disputes that can be resolved in the adjudication.” Dominion Nuclear
DIGESTS

ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

Connecticut, Inc. (Millstone Nuclear Power Station, Unit 3), CLI-08-17, 68 NRC 231, 233 (2008) (citations omitted). Therefore, to be admissible, contentions must include specific grievances beyond mere notice pleading.

H The proposed contention does not provide “sufficient information to show that a genuine dispute exists” with the license amendment request (LAR). Additionally, the petition lacks “alleged facts or expert opinions” to support the contention. Because the petitioner neither explains the “factual differences” it has with the applicant’s LAR nor provides alleged facts or expert opinions to support them, the contention is deficient under 10 C.F.R. § 2.309(b)(1)(v) and (vi). The proposed contention is thus inadmissible.

I We infer from the structure of 10 C.F.R. § 50.47(a)(1)(i) that a license amendment request does not require an updated or separate emergency plan unless such a plan would be germane to the type of LAR under review or is part of a licensee’s periodic update of emergency plans.

J Section 51.53(c)(3) requires a license renewal applicant to include in its ER “any new and significant information regarding the environmental impacts of license renewal of which the applicant is aware.” It does not apply to license amendment applicants.

LBP-11-30 CROW BUTTE RESOURCES, INC. (In Situ Leach Facility, Crawford, Nebraska), Docket No. 40-8943 (ASLBP No. 08-867-08-OLA-BD01); LICENSE RENEWAL; October 31, 2011; MEMORANDUM (Bringing Matter of Concern to Commission’s Attention)

A The Commission, but not the Licensing Board, has the power to address a protracted delay in the proceeding and to direct, if so inclined, appropriate remedial measures.

B The extreme delay in the completion of the Staff’s environmental review, and thus the equal delay in hearing the Intervenors’ claim of injury, raises issues of compliance with section 189a of the Atomic Energy Act. It is reasonable to conclude that Congress assumed that individuals establishing a right to be heard in opposition to a license application would be heard with reasonable expedition. A delay exceeding 3 years, and possibly extending to 4 years or more, hardly so qualifies. Particularly is this the case where the petitioner is an Indian Tribe, to which the federal government owes a fiduciary duty.

C The licensing boards were long ago informed by the Commission that they are not empowered to superintend, to any extent, the conduct of Staff technical reviews. See, e.g., Duke Energy Corp. ( Catawba Nuclear Station, Units 1 and 2), CLI-04-6, 59 NRC 62, 67 (2004).

LBP-11-31 PROGRESS ENERGY FLORIDA, INC. (Levy County Nuclear Power Plant, Units 1 and 2), Docket Nos. 52-029-COL, 52-030-COL (ASLBP No. 09-879-04-COL-BD01); COMBINED LICENSE; November 4, 2011; MEMORANDUM AND ORDER (Granting Motion for Summary Disposition of Contention 8A)

A The Board grants the Applicant’s motion for summary disposition because there is no genuine issue of material fact as to the contents of the Applicant’s plan for onsite management of low-level radioactive waste and the plan satisfies the legal requirements of 10 C.F.R. § 52.79(a)(3).

B In a Subpart L adjudication, a motion for summary disposition will be granted “if there is no genuine issue as to any material fact and . . . the moving party is entitled to a favorable decision as a matter of law.” 10 C.F.R. §§ 2.710(d)(2), 2.1205(c).

C No genuine factual dispute exists as to the contents of the challenged portion of a combined license application — the applicant’s plan for onsite management of low-level radioactive waste in the period beyond the initial 2 years of operation. The only question is a legal one: Does the plan satisfy 10 C.F.R. § 52.79(a)(3)?

D Under 10 C.F.R. § 52.79(a), a combined license application must specify the means the applicant will use for controlling and limiting radioactive effluents and radiation exposures within the limits set forth in 10 C.F.R. Part 20 (see 10 C.F.R. § 52.79(a)(3)) at a level of information sufficient to enable the Commission to reach a final conclusion on these safety matters before the license may be issued.

E It is permissible for the final safety analysis report to give the applicant several options whereby it will control and limit radioactive effluents and radiation exposures “within the limits set forth in part 20” as required by 10 C.F.R. § 52.79(a)(3), provided that each option is described with a “level of information sufficient to enable the Commission to reach a final conclusion” on these safety determinations before the license is issued. Postponing the choice between several options, each of which is concretely stated and compliant with 10 C.F.R. § 52.79(a), does not violate the regulation.

F The Applicant’s Revised Extended LLRW Plan makes affirmative, concrete, and enforceable commitments as to how and where the Applicant will manage its low-level radioactive wastes onsite if offsite facilities are not available. These commitments can be examined to determine if they provide a
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

“level of information sufficient to enable the Commission to reach a final conclusion” on the relevant safety matters before the issuance of any combined license, pursuant to 10 C.F.R. § 52.79(a).

G The Applicant’s Revised Extended LLRW Plan satisfies 10 C.F.R. § 52.79(a) because its concrete and enforceable commitments provide a “level of information sufficient to enable the Commission to reach a final conclusion” before the issuance of the combined license, and confirm that the Applicant has demonstrated that it has the means for controlling and limiting radioactive effluents and radiation exposures within the limits set forth in 10 C.F.R. Part 20.

LBP-11-32 PACIFIC GAS AND ELECTRIC COMPANY (Diablo Canyon Nuclear Power Plant, Units 1 and 2), Docket Nos. 50-275-LR, 50-323-LR (ASLBP No. 10-900-01-LR-BD01); LICENSE RENEWAL; November 18, 2011; MEMORANDUM, ORDER, AND REFERRAL (Denying Motion to Admit New Contention and Referring Ruling to Commission)

A The Board denies a motion filed by the San Luis Obispo Mothers for Peace seeking to admit a new environmental contention based on the “findings and recommendations raised by the Nuclear Regulatory Commission’s Fukushima Task Force Report” issued on July 12, 2011.

B The National Environmental Policy Act applies to agencies of the Federal Government, such as the NRC, but does not apply to private parties such as applicants for NRC licenses.

C Environmental Reports (ERs) are creatures of 10 C.F.R. Part 51, not NEPA. Part 51 is the source of the legal requirement that an applicant submits an ER, and it prescribes the required contents thereof.

D Although NEPA and Part 51 require that the NRC Staff supplement its draft or final Environmental Impact Statement (EIS) if new and significant information arises after the publication of the EIS, see 10 C.F.R. §§ 51.72(a)(2), 51.92(a)(2), an applicant has no such legal duty to supplement or update its Environmental Report (ER) to incorporate new and significant information that arises after submission of an originally compliant ER. This is because NEPA does not apply to private parties such as the applicant, and Part 51 does not mandate that the ER be supplemented in such circumstances.

E Although 10 C.F.R. §§ 51.72(a)(2) and 51.92(a)(2) specifically mandate that the draft Environmental Impact Statement (EIS) and final EIS, respectively, be supplemented if new and significant information arises after they are issued, 10 C.F.R. § 51.53(c)(3)(iv), in contrast, does not mandate that the Environmental Report (ER) be supplemented if new and significant information arises after the ER is submitted.

F The requirement in 10 C.F.R. § 51.53(c)(3)(iv) that the Environmental Report (ER) “contain any new and significant information regarding the environmental impacts of license renewal of which the applicant is aware” refers to new and significant information that has arisen in the time period subsequent to the issuance of the initial operating license. This regulation does not require an applicant to supplement a license renewal ER if new and significant information arises after the ER was submitted.

G The requirements in 10 C.F.R. §§ 50.9(a) and 54.13(a) that the “[i]nformation provided to the Commission by an applicant . . . shall be complete and accurate in all material respects” does not require an applicant to supplement an originally compliant Environmental Report if new and significant information arises after it was submitted.

H The requirements in 10 C.F.R. §§ 50.9(b) and 54.13(b) that “[e]ach applicant shall notify the Commission of information identified by the applicant as having, for the regulated activity, a significant implication for public health and safety or common defense and security” does not require an applicant to supplement an originally compliant Environmental Report if new and significant information arises after it was submitted.

I The requirement in 10 C.F.R. § 54.21(b) that specifies that “an amendment to the renewal application must be submitted [annually] that identifies any changes to the [Current Licensing Basis] of the facility that materially affects the contents of the license renewal application, including the [Final Safety Analysis Report] supplement” does not require an applicant to supplement an originally compliant Environmental Report if new and significant information arises after it was submitted.

J Although the NRC regulations do not require a license renewal applicant to supplement its Environmental Report (ER) based on new and significant information arising after the ER was filed, so too, the regulations do not bar the applicant from voluntarily doing so. Nor do the regulations bar the Staff from filing a request for additional information asking the applicant to supplement the ER.

K The conclusion that 10 C.F.R. § 51.53(c)(3)(iv) does not require that an Environmental Report (ER) be supplemented to include “new and significant information” associated with events that occur after the ER was filed, does not mean that a “new” contention, challenging the adequacy of the ER, can never be
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

filed under 10 C.F.R. § 2.309(f)(2). The latter regulation authorizes the filing of a new environmental contention, if it is based on information that was “not previously available” and that is “materially different” and that shows that the ER, as originally filed, was inadequate.

LBP-11-33 FLORIDA POWER & LIGHT COMPANY (Turkey Point Nuclear Generating Plant, Units 6 and 7), Docket Nos. 52-040-COL, 52-041-COL (ASLBP No. 10-903-02-COL-BD01); COMBINED LICENSE; November 21, 2011; MEMORANDUM AND ORDER (Denying Request to Suspend Licensing Proceeding, Granting Motion to Supplement, and Denying Admission of Proposed New Fukushima Contention)

A The regulations that govern the conditions for supplementing environmental review documents direct the NRC Staff, not the license applicant, to supplement the draft Environmental Impact Statement if “[t]here are substantial changes in the proposed action that are relevant to environmental concerns” or “[t]here are significant new circumstances or information relevant to environmental concerns and bearing on the proposed action or its impacts.” 10 C.F.R. § 51.72(a); see also id. § 51.92(a) (requiring similar supplementation after issuance of final EIS).

B Until the NRC Staff issues its draft or final Environmental Impact Statement, it cannot plausibly be argued that the document is inadequate or otherwise fails to satisfy NEPA.

C The NRC Staff, pursuant to its obligation to prepare an adequate Environmental Impact Statement (see LBP-11-6, 73 NRC 149, 177 n.25 (2011)), is empowered to issue requests for additional information relevant to an applicant’s Environmental Report (see 10 C.F.R. § 51.41), and an applicant may update an Environmental Report if relevant new and significant information becomes available. An applicant, however, is under no regulatory or statutory obligation to effect such an update.

D The governing regulations provide that a “petitioner may amend [its] contentions or file new contentions if there are data or conclusions in the NRC draft or final environmental impact statement [EIS], . . . or any supplements relating thereto, that differ significantly from the data or conclusions in the applicant’s documents.” 10 C.F.R. § 2.309(f)(2). This regulation confers a remedy on intervenors to the extent they believe the Staff’s draft or final EIS fails to account for new and significant information.

E NEPA only mandates an examination of “reasonably foreseeable environmental impacts of the proposed project.” Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), CLI-10-2, 71 NRC 27, 46 (2010). Until the Commission defines and imposes on licensees new requirements arising from the Fukushima events, such requirements are highly speculative. And any potential environmental impacts they might cause are likewise highly speculative and not ripe for challenge. Further, until any requirements are finalized and implemented, it is impossible to foresee what environmental impacts they would yield.

LBP-11-34 FIRSTENERGY NUCLEAR OPERATING COMPANY (Davis-Besse Nuclear Power Station, Unit 1), Docket No. 50-346-LR (ASLBP No. 11-907-01-LR-BD01); LICENSE RENEWAL; November 23, 2011; MEMORANDUM AND ORDER (Denying Motion to Admit New Contention)

A This proceeding concerns FirstEnergy Nuclear Operating Company’s application to renew its operating license for the Davis-Besse Nuclear Power Station. The intervenors have proposed a new contention based upon the near-term report of the task force that the Nuclear Regulatory Commission created to investigate the implications for United States nuclear power plants of the events and accident at the Fukushima Dai-ichi plant in Japan. Their motion to admit the proposed new contention must be rejected under 10 C.F.R. § 2.323(b), and their proposed new contention is inadmissible under subsections (iii), (iv), and (vi) of 10 C.F.R. § 2.309.

B The Board does not consider intervenor’s petition, which requests rulemaking and suspension of the proceeding, because the discussion in the petition’s body specifically directs those requests to the Commission, which has already responded to these requests.

C Intervenors have not shown good cause for filing their opposition to the motions 3 days late. Intervenors’ explanation that their counsel “has been overwhelmed with work” and inadvertently confused federal court procedural rules with this agency’s is wholly inadequate. The Commission has repeatedly stated that failure to read carefully NRC regulations does not constitute good cause for accepting late-filed petitions. Nor do parties’ other professional obligations relieve them of their obligation to meet regulatory deadlines.

D The proper scope of a reply brief is limited to the scope of the arguments set forth in the original motion or petition. Intervenors cannot mend their original contention, which lacked any reference to the
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

Davis-Besse license renewal application or environmental report, by providing those references in their reply brief.

Section 2.323(b) provides that a motion must be rejected if it does not include a certification by the attorney or representative of the moving party that the movant has made a sincere effort to contact other parties in the proceeding and resolve the issue raised in the motion, and that the movant’s efforts to resolve the issue have been unsuccessful.干预者之动因提出新内容的请求应当被拒绝，因为他们在提出该动因时没有联系申请者或其律师来解决该动因所提出的问题，并且他们的动因不包括第2.323(b)部分所要求的认证。

While the Atomic Safety and Licensing Appeal Panel is no longer in existence, the decisions of its Appeal Board continue to be binding on Licensing Boards to the degree they concern a regulation or regulatory matter that has not been revised or otherwise materially altered.

Having merely slapped a two-sentence introduction onto a pleading filed in an unrelated license renewal proceeding, intervenors have not proposed an admissible new contention because the contention does not refer to the license renewal application or environmental report at issue in this proceeding.

H The National Environmental Policy Act, which applies to agencies of the federal government, cannot be read to require a license applicant to update its environmental report.

LBP-11-35 ENTERGY NUCLEAR GENERATION COMPANY and ENTERGY NUCLEAR OPERATIONS, INC. (Pilgrim Nuclear Power Station), Docket No. 50-293-LR (ASLBP No. 06-848-02-LR); LICENSE RENEWAL; November 28, 2011; MEMORANDUM AND ORDER (Denying Commonwealth of Massachusetts’ Request for Stay, Motion for Waiver, and Request for Hearing on a New Contention Relating to Fukushima Accident)

This proceeding concerns the application of Entergy Nuclear Generation Company and Entergy Nuclear Operations, Inc. for renewal of the operating license for its Pilgrim Nuclear Power Station, located in Plymouth, Massachusetts. Between the time when the Commission remanded a limited issue to the Board and when the Board disposed of the remanded issue, the Commonwealth of Massachusetts filed (1) a motion to hold this proceeding in abeyance, (2) a motion to admit a proposed new contention based on information about the events at the Fukushima Dai-ichi Nuclear Power Plant in Japan, (3) a request to waive agency regulations providing that spent fuel pool issues are outside the scope of license renewal proceedings, and (4) a motion to supplement the basis of its proposed new contention. A majority of the Licensing Board grants the motion to supplement and denies the abeyance motion, the waiver request, and the motion to admit the proposed new contention.

B The Majority denies petitioner’s request to hold the licensing proceeding in abeyance until the Commission resolves petitioner’s request to suspend the proceeding pending evaluation of the events at the Fukushima Dai-ichi Nuclear Power Plant because the Commission has denied the suspension request.

C Absent demonstration that the petitioner’s alleged special circumstances are unique to the facility rather than common to a large class of facilities, the request for waiver of regulations excluding spent fuel pool issues from license renewal proceedings is denied. There are more than 20 Boiling Water Reactor Mark-I plants which share the characteristics of the facility at issue, and each and every nuclear power plant in the country has a spent fuel pool.

D Having indicated no linkage whatsoever between the events at the Fukushima Dai-ichi Plant and the potential for a beyond-design-basis duration of station blackout at the applicant’s nuclear plant, petitioner proffers no new information relevant to the subject plant regarding station blackout or mitigation measures to prevent or ameliorate its effects, and the events therefore cannot form the basis for an assertion of timeliness for the purposes of 10 C.F.R. § 2.326.

E Because the issue of whether the proposed alternative method for estimating a macroscopic frequency of occurrence of a severe offsite radiological release should have been used in the SAMA analysis could have been raised at the time of the submittal of the original license renewal application, it is not timely now.

F Because petitioner indicates neither any particular positive impact from severe accident mitigation alternative implementation nor any specific negative environmental impact from failure to do so, its contention can hardly be said to paint the required “seriously different picture of the environmental landscape” that would satisfy 10 C.F.R. § 2.326(a)(2).

G To show under 10 C.F.R. § 2.326(a)(3) that a materially different result in the outcome of the severe accident mitigation alternatives analysis would be or would have been likely had the newly proffered evidence been considered initially, the petitioner would have at least had to provide some information
indicating how much the mean consequences of the severe accident scenarios could reasonably be expected to change as a result of considering the proffered information, together with at least some minimal information as to the cost of implementation of other severe accident mitigation alternatives the petitioner believes might become cost-effective.

H Petitioner’s declaration fails to specifically explain, to the level required by 10 C.F.R. § 2.326(b), (1) why a materially different result would have been likely had the information presently available from the Fukushima accident been considered ab initio in the severe accident mitigation alternatives analysis or (2) why that information presents a significant safety or environmental issue. The declaration sets out no factual or technical basis; it merely represents a statement of belief.

I The contention fails to satisfy the good cause requirements of 10 C.F.R. § 2.309(c)(i) because its foundational argument does not rest upon new and materially different information and could (and should) have been filed at the outset of this proceeding. And section 2.309(c)(vii) weighs heavily against granting admission of the contention because the addition of a hearing on its subject matter will unduly broaden the issues presently being considered and undoubtedly materially delay this proceeding.

J The proposed new contention fails to satisfy the requirements of 10 C.F.R. § 2.309(f)(1), and is therefore inadmissible, because neither it nor the supporting declaration has indicated with any specificity how the severe accident mitigation alternatives analysis results could be affected. Further, neither points to nor references any specific portion of the application that is disputed, simply asserting that the severe accident mitigation alternatives results might be different.

LBP-11-36 LUMINANT GENERATION COMPANY LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), Docket Nos. 52-034-COL, 52-035-COL (ASLBP No. 11-914-02-COL-BD01), COMBINED LICENSE; ENERGY NORTHWEST (Columbia Generating Station), Docket No. 50-397-LR (ASLBP No. 11-912-03-LR-BD01), LICENSE RENEWAL; SOUTHERN NUCLEAR OPERATING COMPANY (Vogtle Electric Generating Plant, Units 3 and 4), Docket Nos. 52-025-COL, 52-026-COL (ASLBP Nos. 11-914-02-COL-BD01, 11-913-01-COL-BD01), COMBINED LICENSE; DUKE ENERGY CAROLINAS, LLC (William States Lee III Nuclear Station, Units 1 and 2), Docket Nos. 52-018-COL, 52-019-COL (ASLBP No. 11-913-01-COL-BD01), COMBINED LICENSE; November 30, 2011; MEMORANDUM AND ORDER (Denying Motions to Reinstate Contention)

LBP-11-37 TENNESSEE VALLEY AUTHORITY (Bellefonte Nuclear Power Plant, Units 3 and 4), Docket Nos. 52-014-COL, 52-015-COL (ASLBP No. 08-864-02-COL-BD01); COMBINED LICENSE; November 30, 2011; MEMORANDUM AND ORDER (Ruling on Request to Admit New Contention)

A In this 10 C.F.R. Part 52 proceeding regarding the application of the Tennessee Valley Authority (TVA) for issuance of combined licenses (COLs) authorizing the construction and operation of two new Advanced Passive (AP1000) design reactors at TVA’s existing Bellefonte Nuclear Power Plant (BNPP) site, the Licensing Board rules on the admissibility of Joint Intervenors’ new contention regarding the Nuclear Regulatory Commission’s (NRC) Fukushima Near-Term Task Force (Task Force) July 11, 2011 report, concluding that the contention is inadmissible for litigation in this proceeding because it fails to meet the timeliness standards of 10 C.F.R. § 2.309(c)(i), (f)(2) and does not present a genuine dispute on a material issue of law or fact as required by section 2.309(f)(1)(vi).

B In an ongoing proceeding in which a hearing petition has been granted and there are contentions pending for merits resolution, intervenors must satisfy two sets of requirements to gain the admission of a newly proffered contention. The first relates to “timeliness” under 10 C.F.R. § 2.309(f)(2) or section 2.309(c)(i). The second concerns section 2.309(f)(1) which governs contention admissibility. See LBP-08-16, 68 NRC 361, 383-86 (2008) (contention admission standards); Licensing Board Memorandum and Order (Ruling on Request to Admit New Contention) (Apr. 29, 2009) at 5, 9 (unpublished) (timeliness standards).

C In rejecting the Task Force report-related contentions before them that are, for all practical purposes, identical to the contention before the Board in this proceeding, other licensing boards have identified two principal deficiencies. One is the fact that the Commission’s recent disposition of a petition to suspend the issuance of new or renewed licenses for nuclear power plants in the United States, see Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141 (2011), essentially renders premature the claim for relief in the similarly situated licensing proceeding contentions. In its decision on those petitions, the boards note, the Commission indicated that whether any new regulatory requirements will arise out of the Task Force report, and when the applicability/impact of those requirements in individual licensing adjudications will be appropriate for consideration, is a matter for future determination. As a consequence, given that the
Fukushima contentions before them are based on the same information that was before the Commission, in light of the Commission’s disposition of the petition, the licensing boards have determined that the issue statements before them were filed prematurely and/or failed to establish the requisite genuine dispute on a material issue of law or fact so as to fulfill the section 2.309(f)(1)(vi) contention admissibility requirement. See PPL Bell Bend, LLC (Bell Bend Nuclear Power Plant), LBP-11-27, 74 NRC 591, 599-602 (2011), motion to reinstate contention denied. Luminant Generation Co., LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), LBP-11-36, 74 NRC 768 (2011); NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), LBP-11-28, 74 NRC 604, 607-10 (2011); Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), LBP-11-32, 74 NRC 654, 670-71 (2011); Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 6 and 7), LBP-11-33, 74 NRC 675, 682 (2011).

Other licensing boards also have found that a Commission staff requirements memorandum (SRM) issued subsequent to the Task Force report that directs the NRC Staff to take steps to suggest possible regulatory and policy changes and appropriate implementing mechanisms, such as rulemakings, orders, section 50.54 letters, or generic letters, or does not define or impose any new requirements arising from the events at Fukushima, likewise fails to establish a genuine dispute on a material issue of law or fact under section 2.309(f)(1)(vi). See Diablo Canyon, LBP-11-32, 74 NRC at 671; Turkey Point, LBP-11-33, 74 NRC at 683; FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), LBP-11-34, 74 NRC 685, 698-99; see also Comanche Peak, LBP-11-36, 74 NRC at 771-72.

The other deficiency identified by the licensing boards regarding the Task Force report-related contentions is that those contentions allege that the Task Force report evidences a shortcoming in the applicant’s environmental report (ER) that must be corrected. This is insufficient to frame a litigable issue, the boards have maintained, because there is no agency regulatory requirement that an applicant needs to update or otherwise supplement an ER subsequent to the time that the Staff finds that report acceptable for review as part of a license application. According to the boards, absent some voluntary action on the part of the applicant to amend its ER, an intervenor wishing to raise some new or revised post-ER environmental concern must await the issuance of the Staff’s draft environmental impact statement. See Diablo Canyon, LBP-11-32, 74 NRC at 665-70; Turkey Point, LBP-11-33, 74 NRC at 681-82; Davis-Besse, LBP-11-34, 74 NRC at 697-98.

The additional support Joint Intervenors seek to provide for their new contention in the form of an affidavit likewise is unavailing because, at a minimum, that information causes the contention to run afoul of the timeliness requirements of section 2.309(c)(1), (f)(2). There is nothing material provided in the affidavit in support of the contention that could not have been introduced at the outset of this proceeding as part of an environmental or safety contention.

In the absence of some future change in the Commission’s requirements or policies relative to the subject matter of the affidavit supporting a new contention that might provide the all-important “good cause” under section 2.309(c)(1) or the “new information” mandated by section 2.309(f)(2), as a basis for a new contention the information in the affidavit is no more than a belated attempt to introduce a material issue of law or fact under section 2.309(f)(1)(vi). In light of the Commission's disposition of the petition, the boards have determined that the issue statements before them were filed prematurely and/or failed to establish the requisite genuine dispute on a material issue of law or fact so as to fulfill the section 2.309(f)(1)(vi) contention admissibility requirement. See PPL Bell Bend, LLC (Bell Bend Nuclear Power Plant), LBP-11-27, 74 NRC 591, 599-602 (2011), motion to reinstate contention denied. Luminant Generation Co., LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), LBP-11-36, 74 NRC 768 (2011); NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), LBP-11-28, 74 NRC 604, 607-10 (2011); Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), LBP-11-32, 74 NRC 654, 670-71 (2011); Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 6 and 7), LBP-11-33, 74 NRC 675, 682 (2011).

In the absence of some future change in the Commission’s requirements or policies relative to the subject matter of the affidavit supporting a new contention that might provide the all-important “good cause” under section 2.309(c)(1) or the “new information” mandated by section 2.309(f)(2), as a basis for a new contention the information in the affidavit is no more than a belated attempt to introduce a material that could have been identified for litigation when the hearing petition was filed initially. See Bell Bend, LBP-11-27, 74 NRC at 602 n.54 (intervenor attempt to tie National Environmental Policy Act environmental justice claim to Task Force report is improper effort to interpose concerns that could have been raised at the outset of the Vogtle COL proceeding).

The additional support Joint Intervenors seek to provide for their new contention in the form of an affidavit likewise is unavailing because, at a minimum, that information causes the contention to run afoul of the timeliness requirements of section 2.309(c)(1), (f)(2). There is nothing material provided in the affidavit in support of the contention that could not have been introduced at the outset of this proceeding as part of an environmental or safety contention.

In the absence of some future change in the Commission’s requirements or policies relative to the subject matter of the affidavit supporting a new contention that might provide the all-important “good cause” under section 2.309(c)(1) or the “new information” mandated by section 2.309(f)(2), as a basis for a new contention the information in the affidavit is no more than a belated attempt to introduce a material that could have been identified for litigation when the hearing petition was filed initially. See Bell Bend, LBP-11-27, 74 NRC at 602 n.54 (intervenor attempt to tie National Environmental Policy Act environmental justice claim to Task Force report is improper effort to interpose concerns that could have been raised at the outset of the Vogtle COL proceeding).

LBP-11-38 NUCLEAR INNOVATION NORTH AMERICA LLC (South Texas Project, Units 3 and 4), Docket Nos. 52-012-COL, 52-013-COL (ASLB No. 09-885-08-COL-BD01); COMBINED LICENSE; December 29, 2011; FIRST PARTIAL INITIAL DECISION (Ruling on Contention CL-2).

In this 10 C.F.R. Part 52 proceeding regarding the application of Nuclear Innovation North America LLC (NINA or Applicant) for combined licenses (COLs) to construct and operate two new nuclear units, using the Advanced Boiling Water Reactor (ABWR) certified design, at its site in Matagorda County, Texas, after conducting an evidentiary hearing on the merits of Contention CL-2 that challenges the estimated replacement power costs used in the Applicant’s Environmental Report (ER) analysis of the proposed units, the Licensing Board rules that Applicant and the NRC Staff (Staff) have carried their respective burdens of proof to demonstrate the adequacy of the environmental review in accordance with NEPA and 10 C.F.R. Part 51.

Severe accidents are reactor accidents more severe than design basis accidents and involve substantial damage to the reactor core. Policy Statement on Severe Reactor Accidents Regarding Future Designs and Existing Plants, 50 Fed. Reg. 32,138, 32,138 (Aug. 8, 1985). Although the likelihood of severe
accidents occurring is lower than that for design basis accidents (i.e., those accidents the reactor is designed to withstand), the consequences of severe accidents are generally greater. Id. Design or procedural modifications that could mitigate the consequences of a severe accident are known as severe accident mitigation alternatives (SAMAs). SAMAs are somewhat broader than Severe Accident Mitigation Design Alternatives (SAMDAs), which focus on design changes and do not consider procedural modifications. A SAMDA analysis examines whether implementing a SAMDA would decrease the probability-weighted consequences of severe accidents. See Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-11, 71 NRC 287, 291 (2010).

C Generally, an applicant in a licensing proceeding, 10 C.F.R. § 2.325, must meet its burden of proof by a preponderance of the evidence. Pacific Gas and Electric Co. (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), CLI-08-26, 68 NRC 509, 521 (2008). But for NEPA contentions, the burden shifts to Staff, because the NRC, not the applicant, bears the ultimate burden of complying with NEPA. See, e.g., Duke Power Co. ( Catawba Nuclear Station, Units 1 and 2), CLI-83-19, 17 NRC 1041, 1049 (1983).

D In judging the adequacy of a SAMDA analysis, the pertinent legal question becomes not whether “plainly better” SAMDA analysis assumptions or methodologies could have been employed, or whether a particular SAMDA analysis could have been refined further. Pilgrim, CLI-10-11, 71 NRC at 315-16 (citations omitted). Rather, the inquiry is to ascertain whether “it looks genuinely plausible that inclusion of an additional factor or use of other assumptions or models may change the cost-benefit conclusions” for the SAMDA analysis. See id. at 316-17. The reason for this, in the Commission’s words, is that “[u]ltimately, NEPA requires the NRC to provide a ‘reasonable’ mitigation alternatives analysis, containing ‘reasonable’ estimates, including, where appropriate, full disclosures of any known shortcomings in available methodology, disclosure of incomplete or unavailable information and significant uncertainties, and a reasoned evaluation of whether and to what extent these or other considerations credibly could or would alter” the analysis on which SAMDAs are considered. See Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-22, 72 NRC 202, 208-09 (2010) (citations omitted); see also 10 C.F.R. § 51.53(c)(3)(L).

E The scope of a contention is limited to the issues of law and fact pled with particularity in the contention and any factual and legal material in support thereof. Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), CLI-10-5, 71 NRC 90, 100 (2010); Duke Energy Corp. (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-02-28, 56 NRC 373, 379 (2002); see also Public Service Co. of New Hampshire ( Seabrook Station, Units 1 and 2), ALAB-899, 28 NRC 93, 97 & n.11 (1986) (stating that the “intervenor is not free to change the focus of its admitted contention, at will, as the litigation progresses”), aff’d in part and remanded in part on other matters, Massachusetts v. NRC, 924 F.2d 311 (D.C. Cir. 1991), cert. denied, 502 U.S. 899 (1991).

F The following technical issues are discussed: Scaling SAMDA Implementation Costs (Inflation Rate, Regional Cost-of-Living Adjustment, Risk Reduction Factor), and Scaling SAMDA Implementation Benefits (Discount Rate, Power Pricing Data, Power Market Effects, Consumer Impacts, Power Price Spikes, Loss of Grid).

LBP-11-39 NUCLEAR INNOVATION NORTH AMERICA LLC (South Texas Project, Units 3 and 4), Docket No. 52-012-COL, 52-013-COL (ASLBP No. 09-885-08-COL-BD01); COMBINED LICENSE; December 29, 2011; MEMORANDUM AND ORDER (Ruling on Admissibility of Intervenors’ New Contention Regarding Fukushima Task Force Report)

A New contentions may be admitted as long as they (1) meet the timely contention criteria in 10 C.F.R. § 2.309(f)(2) or the non timely contention criteria in 10 C.F.R. § 2.309(c)(1), and (2) fulfill the contention admissibility requirements of 10 C.F.R. § 2.309(f)(1).

B A timely new contention challenging the sufficiency of Staff’s National Environmental Policy Act (NEPA) documents may be filed where data or conclusions in these documents “differ significantly” from data or conclusions in previous versions of these documents or in the applicant’s environmental report. Alternatively, a party may seek leave of the Board to file a new contention that challenges the sufficiency of Staff’s NEPA documents where: (i) the information upon which the new contention is based was not previously available; (ii) the information upon which the new contention is based is materially different than information previously available; and (iii) the new contention has been submitted in a timely fashion based on the availability of the subsequent information.
NEPA imposes procedural obligations on federal agencies proposing to take “actions significantly affecting the quality of the human environment.” This procedural obligation is carried out through an agency’s issuance of an environmental impact statement (EIS) documenting the agency’s “hard look” at the potential environmental impacts of the proposed action and reasonable alternatives to the proposed action. Although the EIS’s hard look must examine “reasonably foreseeable” environmental impacts emanating from the proposed action, the EIS is subject to a rule of reason that grants the agency a degree of deference exempting it from examining impacts that it in good faith deems to be “remote and speculative” or “inconsequentially small.”

The NRC’s review of a COL application is the type of proposed action obliging the Staff to prepare an EIS or a supplement thereto. Before taking the proposed action, the Staff must issue a supplemental EIS where there are substantial changes in the proposed action that are relevant to environmental concerns or there are new and significant circumstances or information relevant to environmental concerns and bearing on the proposed action or its impacts. Only where new information presents a seriously different picture of the environmental impact of the proposed project from what was previously envisioned is supplementation of an EIS required.

Unless and until it is reasonably clear that the NRC’s Near-Term Task Force on Fukushima’s recommendations will result in new safety or design basis prerequisites for granting a combined license, it is not evident that those recommendations could have any material impact on the conclusions made by Staff in an already-issued FEIS, or that they present a seriously different picture of the already-analyzed impacts of the proposed action.

This proceeding concerns the application of Entergy Nuclear Generation Company and Entergy Nuclear Operations, Inc. for renewal of the operating license for its Pilgrim Nuclear Power Station, located in Plymouth, Massachusetts. After the Board disposed of a limited issue on remand from the Commission, but before disposing of several hearing requests filed while the remanded issue was pending, Intervenor Pilgrim Watch filed a request for hearing on a proposed new contention concerning the accident at the Fukushima Dai-ichi Nuclear Power Plant in Japan. In this Order, a majority of the Licensing Board denies the hearing request.

Because the evidentiary record in this proceeding had been previously closed, the Commission’s demanding requirements for reopening the record must be satisfied in order for the hearing request to be granted.

Regarding the requirements of 10 C.F.R. § 2.326(a)(1) that the motion be timely, the motion must be based on new information, relevant to the application and the plant at issue, that is materially different from information previously available.

A contention based on the Fukushima accident must be relevant to the present proceeding, and must link the events at Fukushima to the risk of a severe accident at the site that is the subject of the proceeding.

For an environmental issue to be “significant” for the purposes of reopening a closed record, there must be new and significant information which will “paint a seriously different picture of the environmental landscape.” Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), CLI-06-3, 63 NRC 19, 28 (2006).

An assertion that other severe accident mitigation alternatives (SAMAs) might become cost-effective if implemented, without an indication of any particular positive environmental impact from any such implementation or any specific negative environmental impact from failure to do so, fails to present an exceptionally grave issue.

For an intervenor to demonstrate that a revised SAMA analysis would produce a materially different result requires, at least, that the intervenor provide some information indicating how much the mean consequences of the severe accident scenarios could reasonably be expected to change as a result of
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

consideration of the new information, together with at least some minimal information as to the cost of implementation of other SAMAs it believes might become cost-effective.

I A speculative assertion that the NRC would consider other SAMAs than have been previously considered does not “demonstrate” that the issue raised is material to the NRC’s decision, as required by 10 C.F.R. § 2.309(f)(1)(iv).

LBP-12-2 SHAW AREVA MOX SERVICES (Mixed Oxide Fuel Fabrication Facility), Docket No. 70-3098-MLA (ASLBP No. 07-856-02-MLA-BD01); MATERIALS LICENSE AMENDMENT; February 9, 2012 (January 7, 2013, abridged adaptation for publication); MEMORANDUM AND ORDER (Dismissing Contention 4)

A The Board proceeded with this motion to dismiss an admitted contention by analogy to Rule 12(d) of the Federal Rules of Civil Procedure. That Rule permits courts to treat motions to dismiss for failure to state a claim upon which relief can be granted (under Rule 12(b)(6)) and motions for judgment on the pleadings (under Rule 12(c)) as motions for summary judgment under Rule 56 if “matters outside the pleadings are presented to and not excluded by the court.” Fed. R. Civ. P. 12(d).

LBP-12-3 STRATA ENERGY, INC. (Ross In Situ Recovery Uranium Project), Docket No. 40-9091-MLA (ASLBP No. 12-915-01-MLA-BD01); MATERIALS LICENSE AMENDMENT; February 10, 2012; MEMORANDUM AND ORDER (Ruling on Standing and Contention Admissibility)

A In this proceeding regarding the application of Strata Energy, Inc. (SEI) for a combined source and Atomic Energy Act (AEA) § 11e(2) byproduct materials license pursuant to 10 C.F.R. Part 40 that would authorize SEI to construct and operate an in situ recovery (ISR) uranium project at the Ross site in Crook County, Wyoming, the Licensing Board concludes that Joint Petitioners Natural Resources Defense Council and the Powder River Basin Resource Council have provided sufficient support to establish their standing “as of right” to intervene in the proceeding and have proffered four admissible National Environmental Policy Act (NEPA)/environmental-related contentions so as to warrant the grant of their hearing petition and their admission into the proceeding as parties.

B For an individual or organization to be deemed a “person whose interest may be affected by the proceeding” under AEA § 189a, 42 U.S.C. § 2239(a)(1)(A), so as to have standing “as of right” such that party status can be granted in an agency adjudicatory proceeding, the intervention petition must include a statement of (1) the petitioner’s name, address, and telephone contact information; (2) the nature of the petitioner’s right under the AEA to be made a party; (3) the nature of the petitioner’s interest in the proceeding, whether property, financial, or otherwise; and (4) the possible effect of any decision or order that might be issued in the proceeding on the petitioner’s interest. See 10 C.F.R. § 2.309(d)(1)(i)-(iv). In assessing this information to determine whether the petitioner has established its standing, the Commission generally applies contemporaneous judicial standing concepts in section 189a adjudicatory proceedings, inquiring whether the participant has established that (1) it has suffered or will suffer a distinct and palpable injury that constitutes injury-in-fact within the zones of interest arguably protected by the governing statutes (e.g., the AEA, NEPA); (2) the injury is fairly traceable to the challenged action; and (3) the injury is likely to be redressed by a favorable decision. See Yankee Atomic Electric Co. (Yankee Nuclear Power Station), CLI-96-1, 43 NRC 1, 6 (1996).

C An organization that asserts it has standing to intervene in its own right, i.e., organizational standing, must establish a discrete institutional injury to the organization’s interests, which must be based on something more than a general environmental or policy interest in the subject matter of the proceeding. See International Uranium (USA) Corp. (White Mesa Uranium Mill), CLI-01-21, 54 NRC 247, 252 (2001). Alternatively, an entity may seek to demonstrate its standing to intervene on behalf of its members, i.e., representational standing, but that entity must then show it has an individual member who can fulfill all the necessary standing elements and who has authorized the organization to represent his or her interests. See Vermont Yankee Nuclear Power Corp. (Vermont Yankee Nuclear Power Station), CLI-00-20, 52 NRC 151, 163 (2000).

D In assessing a petition to determine whether the elements of standing are met, which a presiding officer must do even if there are no objections to a petitioner’s standing, there are a number of important benchmarks that the presiding officer is to apply. Initially, “the petitioner bears the burden to provide facts sufficient to establish standing.” PPL Bell Bend, LLC (Bell Bend Nuclear Power Plant), CLI-10-7, 71 NRC 133, 139 (2010). Generally speaking, to meet this burden it is sufficient “if the petitioner provides plausible factual allegations that satisfy each element of standing.” U.S. Army Installation Command (Schofield Barracks, Oahu, Hawaii, and Pohakuloa Training Area, Island of Hawaii, Hawaii), LBP-10-4, 71 NRC 101.
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

216, 229 (2010) (citing Lujan v. Defenders of Wildlife, 504 U.S. 555, 561 (1992)), aff’d, CLI-10-20, 72 NRC 185 (2010). Moreover, in assessing whether a petitioner has demonstrated its standing, a licensing board is to “construe the petition in favor of the petitioner.” Georgia Institute of Technology (Georgia Tech Research Reactor, Atlanta, Georgia), CLI-05-12, 42 NRC 111, 115 (1995). At the same time, however, if a petitioner’s factual claims in support of its standing are contested, untenable, conjectural, or conclusory, a board need not uncritically accept such assertions, but may weigh those informational claims and exercise its judgment about whether the standing element at issue has been satisfied. See Schofield Barracks, LBP-10-4, 71 NRC at 230 & n.14 (citing Bell Bend, CLI-10-7, 71 NRC at 139); Consumers Energy Co. (Palisades Nuclear Plant), CLI-07-18, 65 NRC 399, 410 (2007); Commonwealth Edison Co. (Zion Nuclear Power Station, Units 1 and 2), CLI-09-5, 51 NRC 90, 98 (2000)).

The precept that a licensing board must afford latitude to a pro se petitioner in considering that petitioner’s pleadings, see PPL Bell Bend, LLC (Bell Bend Nuclear Power Plant), LBP-09-18, 70 NRC 385, 396-97 (2009)), aff’d on other grounds, CLI-10-7, 71 NRC at 41, is not a consideration when a petitioner is represented by counsel.

General environmental and policy interests that an organization champions, whether on a national or more regional/local basis, and that the organization asserts could be degraded or impaired by licensing action are “of the sort [that] repeatedly have [been] found insufficient for organizational standing.” White Mesa, CLI-01-21, 54 NRC at 252; see Cogema Mining, Inc. (Stiganay and Christensen Ranch Facilities), LBP-09-13, 70 NRC 168, 191 (2009).

In a materials licensing action, for the purpose of ascertaining if a hearing requestor has standing based on radiological impacts, “whether a petitioner could be affected by the licensing action must be determined on a case-by-case basis, taking into account the petitioner’s distance from the source, the nature of the licensed activity, and the significance of the radioactive source.” Schofield Barracks, CLI-10-20, 72 NRC at 188 (footnote omitted). And the standing regime to which a presiding officer must look in the first instance is whether, in lieu of the usual injury and causation showings, the petitioner has been able to establish “proximity plus” by showing “(1) that the proposed licensing action involves a ‘significant source’ of radiation, which has (2) an ‘obvious potential for offsite consequences.’” Id. at 189 (footnote omitted) (quoting Sequoyah Fuels Corp. and General Atomics (Gore, Oklahoma Site), CLI-94-12, 40 NRC 64, 75 n.22 (1994)). If these elements of proximity-based standing are not demonstrated, then standing must be established according to traditional standing principles that, along with the usual showing of redressability, require a specific showing of injury and causation. See id.; see also Exelon Generation Co., LLC (Peach Bottom Atomic Power Station, Units 2 and 3), CLI-05-26, 62 NRC 577, 581 (2005).

If a petitioner makes no attempt to establish that any “proximity plus” presumption should be applicable to the licensing action being challenged, see Crow Butte Resources, Inc. (North Trend Expansion Project), LBP-08-6, 67 NRC 241, 272-73 (2008), aff’d as to ruling on standing, CLI-09-12, 69 NRC 535, 544-48 (2009) (hereinafter Crow Butte I), the presiding officer must look to the traditional standing precepts of injury and causation, as well as redressability, to determine whether the petitioner has made a sufficient factual and legal demonstration regarding its standing to intervene.

When petitioners “considerably upgradient of the mining area . . . fail to explain how contaminated material from the [ISR] site might plausibly enter their drinking water, they fail to demonstrate they fulfill the causation element necessary to establish their standing.” Powertech (USA), Inc. (Dewey-Burdock In Situ Uranium Recovery Facility), LBP-10-16, 72 NRC 361, 388 (2010). And this is particularly so when the challenged allegation lacks any relevant scientific or technical support. See Schofield Barracks, LBP-10-4, 71 NRC at 230 n.14.

As the distance increases from an ISR facility, the petitioner with an upgradient water source must expect that it will be called upon to deal with the factual circumstances that exist and provide the licensing board with some analysis as to how any contamination will come to affect any wells alleged to be impacted by the facility, given the distance involved. See Dewey-Burdock, LBP-10-16, 72 NRC at 385.

Standing claims based on economic impacts are only cognizable in agency proceedings with regard to NEPA-based concerns. See Houston Lighting and Power Co. (Allens Creek Nuclear Generating Station), ALAB-582, 11 NRC 239, 242 (1989) (citing Tennessee Valley Authority (Watts Bar Nuclear Plant, Units 1 and 2), ALAB-413, 5 NRC 1418, 1420-21 (1977)).

What is necessary to establish standing based on economic loss is a showing from the petitioner (or the individual it seeks to represent) that the purported economic loss has some objective fundament, rather than being based solely on the petitioner’s (or affiant’s) perception of the economic loss in light of the proposed
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

licensing action. See Pacific Gas and Electric Co. (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), LBP-02-23, 56 NRC 413, 432 (2002) (generic, unsubstantiated claims regarding health, safety, and property devaluation impacts are insufficient to establish standing). aff'd, CLI-03-1, 57 NRC 1 (2003). This nonsubjective showing could, for example, be provided by demonstrating that the value of property at a comparable distance from another ISR facility had dropped from what it was prior to the submission of a license application. Alternatively, such a showing might be based on actual sales/offers before and after the licensing proposal at issue in the proceeding, or by providing the declaration of a local realtor or property appraiser who furnishes an independent assessment of the property’s value before and after the licensing action was proposed before the agency.

A more subjective appraisal of declining property values might be permissible in the context of a licensing action associated with an applicant or facility shown to have engaged in a “continuous and pervasive” course of illegal conduct. Friends of the Earth, Inc. v. Laidlaw Environmental Services (TOC), Inc., 528 U.S. 167, 184 (2000).

While a petitioner has some latitude to supplement or cure a standing showing in its reply pleading, any additional arguments should be supported by either the declaration that accompanied the original hearing request or a supplemental affidavit. See South Carolina Electric & Gas Co. (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-10-1, 71 NRC 1, 7 (2010) (reply pleading and supplemental declarations appropriately clarified original affidavits).

There is no “contention-based” requirement mandating that to have standing, besides showing that a cognizable injury is associated with a proposed licensing action and that granting the relief sought will address that injury, a petitioner also must establish a link between that injury and the issues it wishes to litigate in challenging an application. See Crow Butte Resources, Inc. (In Situ Leach Facility, Crawford, Nebraska), CLI-09-9, 69 NRC 331, 339-40 (2009); Yankee Nuclear, CLI-96-1, 43 NRC at 6.

Section 2.309(f)(1) of the Commission’s rules of practice specifies the requirements that must be met if a contention is to be deemed admissible. Specifically, a contention must provide (1) a specific statement of the legal or factual issue sought to be raised; (2) a brief explanation of its basis; (3) a concise statement of the alleged facts or expert opinions, including references to specific sources and documents, that support the petitioner’s position and upon which the petitioner intends to rely at hearing; and (4) sufficient information demonstrating that a genuine dispute exists in regard to a material issue of law or fact, including references to specific portions of the application that the petitioner disputes, or in the case when the application is alleged to be deficient, the identification of such deficiencies and supporting reasons for this belief. See 10 C.F.R. § 2.309(f)(1)(i), (ii), (iv). In addition, the petitioner must demonstrate that the issue raised in the contention is both “within the scope of the proceeding” and “material to the findings the Nuclear Regulatory Commission (NRC) must make to support the action that is involved in the proceeding.” Id. § 2.309(f)(1)(ii), (iv). Failure to comply with any of these requirements is grounds for dismissing a contention. See Summer, CLI-10-1, 71 NRC at 7 & n.33.

All proffered contentions must be within the scope of the proceeding as defined by the Commission in its initial hearing notice and order referring the proceeding to the licensing board. See 10 C.F.R. § 2.309(f)(1)(ii); Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-00-23, 52 NRC 327, 329 (2000); Duke Power Co. (Catawba Nuclear Station, Units 1 and 2), ALAB-825, 22 NRC 785, 790-91 (1985). As a consequence, any contention that falls outside the specified scope of the proceeding must be rejected. See Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-11-11, 74 NRC 427, 435-36 (2011).

It is the petitioner’s obligation to present factual allegations and/or expert opinion necessary to support its contention. See 10 C.F.R. § 2.309(f)(1)(iv); USEC Inc. (American Centrifuge Plant), CLI-06-10, 63 NRC 451, 457 (2006). While a licensing board may appropriately view a petitioner’s supporting information in a light favorable to the petitioner, failure to provide such information regarding a proffered contention requires that the contention be rejected. See Arizoma Public Service Co. (Palo Verde Nuclear Generating Station, Units 1, 2, and 3), CLI-91-12, 34 NRC 143, 155 (1991). Neither mere speculation nor bare or conclusory assertions, even by an expert, alleging that a matter should be considered will suffice to allow the admission of a proffered contention. See Fansteel, Inc. (Muskogee, Oklahoma Site), CLI-03-13, 58 NRC 195, 203 (2003). If a petitioner neglects to provide the requisite support for its contentions, it is not within the board’s power to make assumptions or draw inferences that favor the petitioner, nor may the board supply information that is lacking. See Crow Butte I, CLI-09-12, 69 NRC at 553; Palo Verde, CLI-01-12, 34 NRC at 155. Likewise, simply attaching material or documents as a basis for a
contention, without setting forth an explanation of that information’s significance, is inadequate to support the admission of the contention. See Fansteel, CLI-03-13, 58 NRC at 204-05.

S All properly formulated contentions must focus on the license application in question, challenging either specific portions of or alleged omissions from the application (including the safety analysis report/technical report and the environmental report (ER)) so as to establish that a genuine dispute exists with the applicant on a material issue of law or fact. See 10 C.F.R. § 2.309(f)(1)(vii). Any contention that fails directly to controvert the application or that mistakenly asserts the application does not address a relevant issue will be dismissed. See Crow Butte I, CLI-09-12, 69 NRC at 357; American Centrifuge Plant, CLI-06-10, 63 NRC at 462-63.

T For a contention that a petitioner characterizes as firmly rooted in NEPA, the additional assertion, intended to preserve a future AEA-based challenge, that issuing a license with the alleged NEPA deficiency unresolved would violate the AEA’s mandate to issue only licenses that are not inimical to the common defense and security and the public health and safety is a “bootstrap” approach that is neither necessary nor appropriate relative to the contention. If a petitioner is unable to prevail under NEPA with respect to the issues raised in the licensing board’s decision, the AEA will not afford additional solace.

U While NEPA requires that the NRC consider the reasonably foreseeable environmental impacts of the proposed licensing action, the agency need not consider remote and speculative impacts, particularly if the impact cannot easily be estimated at the current time, and an appropriate future opportunity will exist for the agency to analyze the impact. See Sierra Club v. Marsh, 769 F.2d 868, 878 (1st Cir. 1985).

V NRC regulations implementing NEPA require the agency to consider the cumulative impacts of a proposed licensing action, i.e., those that result from the incremental effects of the proposed action in conjunction with past, present, and reasonably foreseeable future actions. In particular, the definitions in 10 C.F.R. § 51.14(b) incorporate the CEQ regulations that define the scope of an environmental impact statement (EIS) to include cumulative impacts, see 40 C.F.R. §§ 1508.7, 1508.25(c). To assist the Staff with preparing its cumulative impacts analysis, the Staff guidance document for environmental reports requests that license applicants include their own cumulative impacts analysis. See Office of Nuclear Material Safety and Safeguards, [NRC], NUREG-1748, “Environmental Review Guidance for Licensing Actions Associated with NMSS Programs” at 6-4 (2003).

W Because the Staff uses the ER as the basis for its EIS, and because hearing petitioners are required to style their NEPA contentions against the ER, see 10 C.F.R. § 2.309(f)(2), a contention would be admissible if it raises a genuine dispute with the sufficiency of the cumulative impacts analysis, or the lack thereof, in the ER. See, e.g., Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), LBP-09-10, 70 NRC 51, 102 (2009) (admitting cumulative impacts contention relative to applicant’s ER); aff’d in part and rev’d in part on other grounds, CLI-10-2, 71 NRC 27 (2010); Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), LBP-07-3, 65 NRC 237, 258-59 (2007) (same).

X It is not the licensing board’s responsibility to provide support for an intervenor’s contention so as to make it admissible. See Crow Butte I, CLI-09-12, 69 NRC at 553 & n.81; Commonwealth Edison Co. (Zion Station, Units 1 and 2), ALAB-226, 8 AEC 381, 406 (1974).

Y The generic EIS (GEIS) for ISR mining, not having been incorporated into the agency’s regulations, can be challenged in an adjudicatory proceeding concerning an ISR licensing request. But a petitioner’s failure to provide any citation to what it is among a GEIS’s programmatic discussions that the ER neglects to address leaves it to the licensing board to identify the grounds that support the petitioner’s contention, which is something the board need not do. See Fansteel, CLI-03-13, 58 NRC at 204-05; see also Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-09-11, 69 NRC 529, 534 (2009) (“The Commission should not be expected to sift unaided through . . . documents filed before the Board to piece together and discern a party’s argument and the grounds for its claims”) (internal quotations omitted).

LBP-12-4 FLORIDA POWER & LIGHT COMPANY (Turkey Point Nuclear Generating Plant, Units 6 and 7), Docket Nos. 52-040-COL, 52-041-COL (ASLBP No. 10-903-02-COL-BD01); COMBINED LICENSE; February 28, 2012; MEMORANDUM AND ORDER (Granting FPL Motion for Summary Disposition of CASE Contention 7)

A The hearing procedures of 10 C.F.R. Part 2, Subpart L provide that motions for summary disposition “must be in writing and must include a written explanation of the basis of the motion, and affidavits to support statements of fact.” 10 C.F.R. § 2.1205(a). Such motions are to be evaluated pursuant to the same “standards for summary disposition set forth in [10 C.F.R. Part 2,] subpart G.” Id. § 2.1205(c). Those Subpart G standards state that a motion for summary disposition shall be granted “if the filings in the
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

proceeding, depositions, answers to interrogatories, and admissions on file, together with the statements of the parties and the affidavits, if any, show that there is no genuine dispute as to any material fact and that the moving party is entitled to a decision as a matter of law.” Id. § 2.710(d)(2).

B

The standards governing summary disposition “are based upon those the federal courts apply to motions for summary judgment under Rule 56 of the Federal Rules of Civil Procedure.”

C

The level of low-level radioactive waste (LLRW) “storage information required by 10 C.F.R. § 52.79(a)(3) is tied to the COL applicant’s particular plans for compliance through design, operational organization, and procedures” (Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), CLI-10-2, 71 NRC 27, 46 (2010) (citing Vogtle, CLI-09-16, 70 NRC at 37)), including how that applicant “intends to handle an accumulation of LLRW.” Id. at 47.

D

A combined license (COL) application must include a Final Safety Analysis Report (FSAR) containing certain “information, at a level of information sufficient to enable the Commission to reach a final conclusion on all safety matters that must be resolved by the Commission before issuance of” the COL, including “[t]he kinds and quantities of radioactive materials expected to be produced in the operation and the means for controlling and limiting radioactive effluents and radiation exposures within the limits set forth in [10 C.F.R. Part 20].” 10 C.F.R. § 52.79(a)(3). Part 20 “outlines a number of radiation protection requirements with which licensees must comply,” such as “procedures and controls to reduce occupational doses and doses to members of the public to levels that are as low as reasonably achievable.”

E

Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-09-16, 70 NRC at 37 (2009) (referencing 10 C.F.R. § 20.1101(b)).

F

The level of low-level radioactive waste (LLRW) “storage information required by 10 C.F.R. § 52.79(a)(3) is tied to the COL applicant’s particular plans for compliance through design, operational organization, and procedures” (Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), CLI-10-2, 71 NRC 27, 46 (2010) (citing Vogtle, CLI-09-16, 70 NRC at 37)), including how that applicant “intends to handle an accumulation of LLRW.” Id. at 47.

G

The scope and specificity of information required under section 52.79(a)(3) is a fact-bound determination that “is tied to the applicant’s particular plans for compliance through,” but not necessarily the details of, ‘design, operational organization, and procedures’ associated with any contingent long-term LLRW facility.” Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), LBP-10-8, 71 NRC 444 (2010) (quoting Vogtle, CLI-09-16, 70 NRC at 37). To comply with section 53.79(a)(3)’s “requirement to provide sufficient information to enable the Commission to reach a final conclusion on all safety matters” regarding the means a COL applicant will use to comply with 10 C.F.R. Part 20 (10 C.F.R. § 52.79(a)(3)), a COL applicant’s FSAR must identify particular plans pertaining to “design, operational organization, and procedures” that demonstrate how it intends “to comply with relevant substantive radiation protection requirements in 10 C.F.R. Part 20 [including, but not limited to [LLRW] handling and storage.” Vogtle, CLI-09-16, 70 NRC at 37.

LBP-12-5 NUCLEAR INNOVATION NORTH AMERICA LLC (South Texas Project, Units 3 and 4), Docket Nos. 52-12-COL, 52-13-COL (ASLBP No. 09-885-08-COL-BD01); COMBINED LICENSE; February 29, 2012; SECOND PARTIAL INITIAL DECISION (Contention DEIS-1-G)
DIGESTS

ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

A In this 10 C.F.R. Part 52 proceeding regarding the application of Nuclear Innovation North America LLC (NINA or Applicant) for combined licenses (COLs) to construct and operate two new nuclear units, using the Advanced Boiling Water Reactor (ABWR) certified design, at its site in Matagorda County, Texas, after conducting an evidentiary hearing on the merits of Contention DEIS-1-G that challenges the estimated need for power that proposed STP Units 3 and 4 would satisfy, the Licensing Board rules that the NRC Staff (Staff) has carried its burden to demonstrate the adequacy of the environmental review in accordance with the National Environmental Policy Act (NEPA) and 10 C.F.R. Part 51.

C In emphasizing that need-for-power forecasts are required only to be reasonable, see Niagara Mohawk Power Corp. (Nine Mile Point Nuclear Station, Unit 2), ALAB-264, 1 NRC 347, 366-67 (1975), cited with approval in U.S. Energy Research and Development Administration (Clinch River Breeder Reactor Plant), CLI-76-13, 4 NRC 67, 77 (1976), the Commission has observed that such forecasts need not “precisely identify future market conditions and energy demand, or . . . develop detailed analyses of system generating assets, costs of production, capital replacement ratios, and the like in order to establish with certainty that the construction and operation of a nuclear power plant is the most economical alternative for generation of power.” See, e.g., Nuclear Energy Institute; Denial of Petition for Rulemaking, 68 Fed. Reg. 55,905, 55,910 (Sept. 29, 2003) (citing Louisiana Energy Services, L.P. (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 88, 94 (1998)). Rather, it is sufficient if the need-for-power assessment is at a level of detail “sufficient to reasonably characterize the costs and benefits associated with proposed licensing actions.” South Carolina Electric & Gas Co. (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-10-1, 71 NRC 1, 17 (2010) (citing 68 Fed. Reg. at 55,910). Otherwise “[q]uibbling over the details of an economic analysis” would effectively “stand[ ] NEPA on its head by asking that the license be rejected not due to environmental costs, but because the economic benefits are not as great as estimated.” Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), CLI-04-22, 60 NRC 125, 145 (2004) (internal quotation marks omitted).

D When a contention of omission is cured by the subsequent issuance of licensing-related documents, “the contention must be disposed of or modified.” Duke Energy Corp. (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-02-28, 56 NRC 373, 382 (2002) (emphasis added) (citing Catawba, CLI-83-19, 17 NRC at 1050). At that time, the intervenor must timely file a new or amended contention if it intends to challenge the sufficiency of the new information. See 10 C.F.R. § 2.309(f)(1); McGuire/Catawba, CLI-02-28, 56 NRC at 383 (footnote and citations omitted). Resolution of the mooted contention requires no more than a finding by the presiding officer that the matter has become moot. USEC Inc. (American Centrifuge Plant), CLI-06-9, 63 NRC 433, 444-45 (2006).

E As the Commission has affirmed, “[b]oard[s] frequently hold hearings on contentions challenging the Staff’s final environmental review documents. In such cases, “[t]he adjudicatory record and Board decision (and . . . any Commission appellate decisions) become, in effect, part of the FEIS.”” Nuclear Innovation North America LLC (South Texas Project, Units 3 and 4), CLI-11-6, 74 NRC 203, 208-09 (2011) (citing Claiborne, CLI-98-3, 47 NRC at 89, and Philadelphia Electric Co. (Limerick Generating Station, Units 1 and 2), ALAB-819, 22 NRC 681, 705-07 (1985)). In other words, Staff’s review (the FEIS itself) and the adjudicatory record become the pertinent environmental record of decision. See, e.g., Pacific Gas and Electric Co. (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), CLI-08-26, 68 NRC 509, 526 (2008), petition for review denied on other grounds, San Luis Obispo Mothers for Peace v. NRC, 635 F.3d 1109 (9th Cir. 2011).

F The following technical issues are discussed: energy savings from renovations for existing building, energy savings from energy-efficient building codes, assessing need for power from a proposed power plant.
A In accordance with 10 C.F.R. § 40.36, a source materials licensee must demonstrate that sufficient funds will be available to cover the cost of decommissioning its facility. Through its regulations, the NRC seeks to ensure “that decommissioning can be carried out in a safe and timely manner and that lack of funds does not result in delays that may cause potential health and safety problems.” Proposed Rule: “Decommissioning Planning,” 73 Fed. Reg. 3812, 3812-13 (Jan. 22, 2008).

B A licensee has numerous options for meeting its decommissioning funding obligation, including: (1) prepayment into an account segregated from the licensee’s assets and outside its control; (2) an external sinking fund in which deposits are made annually, coupled with a surety method or insurance that decreases in value as the accumulated assets in the sinking fund increase; or (3) a surety or insurance method (surety bond, letter of credit, line of credit, or insurance policy) where proceeds are payable to a trust established for decommissioning costs. See 10 C.F.R. § 40.36(e). Only one permissible method — a guarantee of available funds by the licensee itself — does not involve the protection of either a prepaid segregated account or having a third party committed to paying the licensee’s projected decommissioning costs if the licensee is unable, or otherwise fails, to do so. Understandably, the Commission requires a licensee that wishes to be the sole guarantor of its own liabilities to satisfy a stringent test.

C To use the self-guarantee mechanism to fulfill its decommissioning funding obligation, a licensee that issues bonds must annually satisfy the financial test set forth in 10 C.F.R. Part 30, Appendix C, § II.B.3.

D Section 40.14 of 10 C.F.R. provides that the NRC “may” grant such exemptions from the applicable regulatory requirements “as it determines are authorized by law and will not endanger life or property or the common defense and security and are otherwise in the public interest.”

E The Board concludes, as a matter of law, that special circumstances must exist before it may grant the requested exemption. A Licensing Board is not free to reexamine fundamental policy judgments that are reflected in Commission regulations by creating exceptions to them in situations that will frequently recur. In such situations, the proper recourse lies in petitioning the Commission to change the regulation, not in seeking piecemeal revision of the Commission’s rules by a licensing board. It is the role of the Commission to review licensing board decisions, and not the role of licensing boards to review and to reconsider the wisdom of the Commission’s regulations.

F When interpreting “special circumstances” under 10 C.F.R. § 2.335 — which employs language very similar to the definition of “special circumstances” under 10 C.F.R. § 50.12(a)(2)(ii) upon which Applicant relies — the Commission has made clear that more is required than that enforcement of a regulation might not be necessary in certain individual circumstances. Rather, it is also required that those circumstances be unusual if not unique, and that the Commission did not previously consider such circumstances — either explicitly or by necessary implication — when it promulgated the relevant regulation in the first place.

G The Commission’s regulations do not operate as a one-way street or safe harbor. In other words, they do not merely establish a standard that an applicant is entitled to invoke for its benefit, but that may then be disregarded whenever an applicant wants to argue its case on an individual, fact-specific basis. Not only would such a practice in effect transfer much ultimate policymaking from the Commission to its Staff, but addressing case by case the inevitable multitude of requests for individual exemptions would divert resources that are better allocated to the agency’s primary mission of ensuring that licensees comply with safety and environmental standards.

H The Licensing Board will not consider an exemption request that was not made to the NRC Staff in the first instance. Although the Commission has delegated to the Board authority to adjudicate the issues raised by Applicant’s hearing request, it has not empowered the Board to serve as an initial reviewer of exemption requests. See 10 C.F.R. §§ 2.319, 2.321(c). That role belongs to the NRC Staff. See 10 C.F.R. §§ 2.100-2.103; Southern California Edison Co. (San Onofre Nuclear Generating Station, Units 2 and 3), LBP-77-35, 5 NRC 1290, 1291 (1977).

I In the circumstances of the case, Applicant’s request for an exemption fails to satisfy the requirements of 10 C.F.R. § 40.14. Because granting the requested exemption could adversely affect the likelihood that adequate funds would be available to decommission Applicant’s facility, granting the exemption would potentially endanger life or property. Thus, granting Applicant’s requested exemption would not be in the public interest.

LBP-12-7 FLORIDA POWER & LIGHT COMPANY (Turkey Point Nuclear Generating Plant, Units 6 and 7), Docket Nos. 52-040-COL, 52-041-COL (ASLBP No. 10-903-02-COL-BD01); COMBINED LICENSE;

March 29, 2012; MEMORANDUM AND ORDER (Denying CASE’s Motions to Admit Newly Proffered Contentions 9 and 10, and Dismissing CASE from This Proceeding)

A The “good cause” factor in 10 C.F.R. § 2.309(c)(1) is the “most important” and entitled to the most weight. AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-09-7, 69 NRC 235, 261 (2009). Where a petitioner fails to establish good cause, “petitioner’s demonstration on the other factors must be particularly strong.” Texas Utilities Electric Co. (Comanche Peak Steam Electric Station, Units 1 and 2), CLI-92-12, 36 NRC 62, 73 (1992). A petition that attempts to proffer a non timely contention without addressing the balancing factors in section 2.309(c) may be summarily rejected. See Oyster Creek, CLI-09-7, 69 NRC at 260-61.

B The Commission has stressed that the standards governing contention admissibility are “strict by design.” Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Units 2 and 3), CLI-01-24, 54 NRC 349, 358 (2001). Failure to comply with any of the admissibility criteria in section 2.309(f)(1) warrants rejection of a contention. USEC Inc. (American Centrifuge Plant), CLI-06-9, 63 NRC 433, 437 (2006).

C It is well established that an environmental report need only discuss reasonably foreseeable environmental impacts of a proposed action. Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), CLI-02-25, 56 NRC 340, 348-49 (2002).

D A petitioner may not, by design or neglect, fail to include critical admissibility-related information in its initial pleading, and then attempt to remedy that failure by including the information in a reply to which the respondent has no right of response. See Louisiana Energy Services, L.P. (National Enrichment Facility), CLI-04-35, 56 NRC 619, 623 (2004) (the NRC’s procedural rules do not allow “using reply briefs to provide, for the first time, the necessary threshold support for contentions,” as that “would effectively bypass and eviscerate [its] rules governing timely filing, contention amendment, and submission of late-filed contentions”); Nuclear Management Co. (Palisades Nuclear Plant), CLI-06-17, 63 NRC 727, 732 (2006) (petitioner may not remediate deficient contention “by introducing in the reply documents that were available to it during the time frame for initially filing contentions”).

LBP-12-8 EXELON GENERATION COMPANY, LLC (Limerick Generating Station, Units 1 and 2), Docket Nos. 50-352-LR, 50-353-LR (ASLBp No. 12-916-LR-BD01); LICENSE RENEWAL; April 4, 2012; MEMORANDUM AND ORDER (Ruling on Petition to Intervene and Request for Hearing)

A In this proceeding under 10 C.F.R. Part 54 regarding the application of Exelon Generation Co., LLC, to renew the operating licenses for Limerick Generating Station, Units 1 and 2, the Licensing Board concludes that petitioner Natural Resources Defense Council (NRDC) has established standing and has proffered at one contention that is admissible in part pursuant to 10 C.F.R. § 2.309(f)(1). In accordance with 10 C.F.R. § 2.309(a), we therefore grant the request for public hearing and admit NRDC as a party to this proceeding.

B It is well established that the NRC applies “contemporaneous judicial concepts of standing.” See, e.g., Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-09-20, 70 NRC 911, 915 (2009) (quotation omitted). In other words, “a petitioner must demonstrate that (1) it has suffered a distinct and palpable harm that constitutes injury-in-fact within the zone of interests arguably protected by the governing statute; (2) that the injury can fairly be traced to the challenged action; and (3) that the injury is likely to be redressed by a favorable decision.” Yankee Atomic Electric Co. (Yankee Nuclear Power Station), CLI-96-1, 43 NRC 1, 6 (1996).

C The Commission has found that geographic proximity to a facility (i.e., living or working within 50 miles) is presumptively sufficient to meet these traditional standing requirements in certain types of proceedings, including operating license renewal proceedings. See Calvert Cliffs 3, CLI-09-20, 70 NRC at 915 n.15 (citing with approval Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-01-6, 53 NRC 138, 150 (2001), aff’d on other grounds, CLI-01-17, 54 NRC 3 (2001) (applying proximity presumption in reactor operating license renewal proceeding)). This is because a license renewal allows operation of a reactor over an additional period of time during which the reactor could be subject to the same equipment failures and personnel errors as during operations over the original period of the license. See Duke Energy Corp. (Oconee Nuclear Station, Units 1, 2, and 3), LBP-98-33, 48 NRC 381, 385 n.1 (1998).

D When the petitioner is an organization rather than an individual (as is the case here), it must demonstrate organizational or representational standing. “An organization may base its standing on either immediate or threatened injury to its organizational interests, or to the interests of identified members.
DIGESTS

ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

To derive standing from a member, the organization must demonstrate that the individual member has standing to participate, and has authorized the organization to represent his or her interests.” Georgia Institute of Technology (Georgia Tech Research Reactor, Atlanta, Georgia), CLI-95-12, 42 NRC 111, 115 (1995) (citations omitted).

To intervene in a proceeding, a petitioner must not only demonstrate that it has standing, but it must also put forward at least one admissible contention. Section 2.309(f)(1) of 10 C.F.R. requires that each proffered contention must meet all of the following requirements: (i) provide a specific statement of the issue of law or fact to be raised; (ii) provide a brief explanation of the basis for the contention; (iii) demonstrate that the issue raised is within the scope of the proceeding; (iv) demonstrate that the issue raised is material to the findings the NRC must make to support the action that is involved in the proceeding; (v) provide a concise statement of the alleged facts or expert opinions that support the petitioner’s position and upon which the petitioner intends to rely at hearing; and (vi) show that a genuine dispute exists on a material issue of law or fact. 10 C.F.R. § 2.309(f)(1)(i)-(vi).

The NRC regulations in 10 C.F.R. § 51.53 require a license renewal application to include an Environmental Report (ER) to assist the NRC Staff in preparing its EIS. See 10 C.F.R. § 51.53(c)(4). The ER must address both the impacts of the proposed renewal and alternatives to those impacts. See id. § 51.53(c)(2). Applicants are further subject to the requirements of 10 C.F.R. § 51.53(c)(3), which lists the issues that an applicant must address in the ER, as well as those that it need not address.

A license renewal applicant’s ER is further required to consider any “new and significant” information that might alter previous environmental conclusions. 10 C.F.R. § 51.53(c)(3)(iv). NEPA requires the agency to reevaluate any prior analysis if it is presented any new and significant information which would cast doubt on a previous environmental analysis. Marsh v. Oregon Natural Resources Council, Inc., 490 U.S. 360, 374 (1999).

Part 51 of 10 C.F.R. divides the environmental requirements for license renewal into Category 1 and Category 2 issues. See 10 C.F.R. Part 51, Subpart A, App. B, tbl. B-1. Category 1 issues are those resolved generically by the Generic Environmental Impact Statement (GEIS) and need not be addressed as part of license renewal. Category 2 issues require plant-specific review. See 61 Fed. Reg. at 28,467; see also 10 C.F.R. Part 51, Subpart A, App. B, tbl. B-1 n.2. For each license renewal application, Part 51 requires that the NRC Staff prepare a plant-specific supplement to the GEIS that adopts applicable generic impact findings from the GEIS and analyzes site-specific impacts. See 10 C.F.R. §§ 51.95(c), 51.71(d).

NEPA requires the NRC to take a “hard look” at alternatives, including Severe Accident Mitigation Alternatives (SAMAs), and to provide a rational basis for rejecting alternatives that are cost-effective. Robertson v. Methow Valley Citizens Council, 490 U.S. 332, 350 (1989); accord Limerick Ecology Action, Inc. v. NRC, 869 F.2d 719, 737 (3d Cir. 1989).

NRC regulations clearly specify that the SAMA analysis is a Category 2 issue. Table B-1 of 10 C.F.R. Part 51 “summarizes the Commission’s findings on the scope and magnitude of environmental impacts of renewing the operating license for a nuclear power plant.” 10 C.F.R. Part 51, Subpart A, App. B. Acknowledging that the risks posed by severe accidents are small for all plants, Table B-1 declares that severe accidents are a Category 2 issue, and provides that SAMAs “must be considered for all plants that have not considered such alternatives,” repeating the admonition in 10 C.F.R. § 51.53(c)(3)(ii)(L). Id. Part 51, Subpart A, App. B, tbl. B-1 (Postulated Accidents).

We reject the proposition that 10 C.F.R. § 51.53(c)(3)(ii)(L) converts the Category 2 (site-specific) issue of SAMAs into a Category 1 issue. If the Commission intended SAMAs to be a Category 1 issue for Limerick and other plants that had previously considered SAMAs or SAMDAs, it would have said so explicitly. It is, of course, within the Commission’s authority to declare an issue to be Category 1 for all plants or a subset of plants. However, this Board is unaware of any provision in our governing regulations that would transform an issue listed as a Category 2 issue into a Category 1 issue absent an explicit statement from the Commission.

Determining whether information regarding SAMAs is “new” and “significant” does not involve the same analysis as performing an entirely new SAMA analysis, as the Applicant suggests. Insofar as this contention challenges the ER’s lack of consideration of new and significant information regarding potentially new, previously unanalyzed SAMAs, it is admissible.

This Board finds that the intent of the Commission in promulgating 10 C.F.R. § 51.53(c)(3)(ii)(L) is clear — to exempt applicants from being required to submit SAMA analyses in the license renewal proceedings for Limerick, Watts Bar, and Comanche Peak.

LBP-12-9 FLORIDA POWER & LIGHT COMPANY (Turkey Point Nuclear Generating Plant, Units 6 and 7), Docket Nos. 52-040-COL, 52-041-COL (ASLBP No. 10-903-02-COL-BD01); COMBINED LICENSE; May 2, 2012; MEMORANDUM AND ORDER (Granting, in Part, Joint Intervenors’ Motion to Admit Amended Contention NEPA 2.1)

A The “good cause” factor of 10 C.F.R. § 2.309(c)(1) is the “most important” and is entitled to receive the most weight. AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-09-7, 69 NRC 235, 261 (2009); see Duke Power Co. (Catawba Nuclear Station, Units 1 and 2), ALAB-687, 16 NRC 460, 469 (1982) (describing good cause). Where a petitioner fails to show good cause, “petitioner’s demonstration on the other factors must be particularly strong.” Texas Utilities Electric Co. (Comanche Peak Steam Electric Station, Units 1 and 2), CLI-92-12, 36 NRC 62, 73 (1992) (internal quotations omitted). A petition that attempts to proffer a untimely contention without addressing the balancing factors in section 2.309(c) may be summarily rejected. See Oyster Creek, CLI-09-7, 69 NRC at 260-61.

B Failure to comply with any of the 10 C.F.R. § 2.309(f)(1) admissibility criteria is grounds for rejection of a contention. USEC Inc. (American Centrifuge Plant), CLI-06-9, 63 NRC 433, 437 (2006).

C The regulations in 10 C.F.R. Part 51 implement the NRC’s obligations arising from section 102(2) of NEPA, 42 U.S.C. § 4332(2). See 10 C.F.R. § 51.10(a). Pursuant to Part 51 (id. § 51.50(c)), every COL application must be accompanied by an ER, the purpose of which is to aid the Commission in its preparation of an Environmental Impact Statement (EIS). See id. § 51.14(a). The EIS must “disclose the significant health, socioeconomic and cumulative consequences of the environmental impact of a proposed action.” Baltimore Gas & Electric Co. v. Natural Resources Defense Council, Inc., 462 U.S. 87, 106-07 (1983).

D Regarding the level of detail in an ER, the governing regulations require it to discuss environmental impacts “in proportion to their significance” (10 C.F.R. § 51.45(b)(1)), and it “should contain sufficient data to aid the Commission in its development of an independent analysis.” Id. § 51.45(c). NEPA documents need consider only those environmental impacts that are “reasonably foreseeable” (Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), CLI-02-25, 56 NRC 340, 348-49 (2002)), not those that are “remote and speculative possibilities.” Vermont Yankee Nuclear Power Corp. v. Natural Resources Defense Council, Inc., 435 U.S. 519, 551 (1978) (quoting Natural Resources Defense Council, Inc. v. Morton, 458 F.2d 827, 837-38 (D.C. Cir. 1972)); see also Louisiana Energy Services, L.P. (National Enrichment Facility), CLI-05-20, 62 NRC 523, 536 (2005) (“NEPA . . . does not call for certainty or precision, but an estimate of anticipated (not unduly speculative) impacts.” (emphasis in original)).

E Where the NRC Staff has deemed certain data to be material for ensuring the accuracy and reliability of an environmental report (ER), an applicant — to promote consistency in the ER and to ensure its accuracy and reliability — might elect to include similar related data in the ER. Alternatively, the NRC Staff might require an applicant to include these data, or the Staff might acquire these data independently for its own analysis in the EIS. Cf. Baltimore Gas & Electric Co. (Calvert Cliffs Nuclear Power Plant, Units 1 and 2), CLI-98-25, 48 NRC 325, 348-50 (1998) (describing NRC Staff’s responsibilities, parallel to the adjudicatory process, to seek additional information from an applicant after docketing of pending license application).

F Although aspects of a newly proffered environmental contention may be time-barred from resolution through administrative adjudication, NEPA nevertheless obligates the NRC Staff to undertake a full and independent evaluation of the environmental impacts of a license applicant’s proposed action. See 10 C.F.R. § 51.41; see also USEC Inc. (American Centrifuge Plant), CLI-06-9, 63 NRC at 448 (describing the NRC’s NEPA responsibilities of conducting a “rigorous” and “objective” review).

G The ER must, inter alia, discuss reasonably foreseeable environmental impacts of the proposed action in proportion to their significance, as well as adverse environmental effects that cannot be avoided if the proposed plan is implemented. See 10 C.F.R. § 51.45(b)(1)-(2); Private Fuel Storage, CLI-02-25, 56 NRC at 348-49.

LBP-12-10 ENTERGY NUCLEAR GENERATION COMPANY and ENTERGY NUCLEAR OPERATIONS, INC. (Pilgrim Nuclear Power Station), Docket No. 50-293-LR (ASLBP No. 12-917-05-LR-BD01); LICENSE RENEWAL; May 24, 2012; MEMORANDUM AND ORDER (Denying Petition for Intervention and Request to Reopen the Proceeding and Admit New Contention)

A This proceeding concerns the application of Entergy Nuclear Generation Company and Entergy Nuclear Operations, Inc. for renewal of the operating license for its Pilgrim Nuclear Power Station, located
The board is not empowered to rehabilitate the failure of the submitted affidavits to address the reopening requirements and explain why each has been met.

H The NRC satisfies its consultation obligations under the ESA when it submits to the National Marine Fisheries Service (NMFS) a biological assessment concluding that the licensing action will have “no effect” on listed species or critical habitat, regardless of whether the NMFS concurs with the NRC’s conclusions.

LBP-12-11 ENTERGY NUCLEAR GENERATION COMPANY and ENTERGY NUCLEAR OPERATIONS, INC. (Pilgrim Nuclear Power Station), Docket No. 50-293-LR (ASLB No. 12-920-07-LR-BD01); LICENCE RENEWAL; June 18, 2012; MEMORANDUM AND ORDER (Denying Petition for Intervention and Request to Reopen Proceeding and Admit New Contention)

A In this previously terminated proceeding on the application for renewal of the Pilgrim Nuclear Power Station’s operating license, the licensing board denies as untimely a motion to reopen the proceeding and admit a new contention concerning the Licensee’s impacts on the roseate tern, a federally listed endangered species.

B In order for a motion to reopen to be granted and new contention admitted after termination of a proceeding, the motion must meet all of the requirements of 10 C.F.R. § 2.326 for reopening a closed record, and the new contention must have been submitted in a timely fashion and demonstrate admissibility as required at 10 C.F.R. § 2.309.

C Under the ESA, a federal agency must consult with the U.S. Fish and Wildlife Service and the National Marine Fisheries Service to ensure that any action authorized, funded, or carried out by the agency is not likely to jeopardize the continued existence of any species listed as threatened or endangered, or to destroy or adversely modify critical habitat. The agency must request information whether any listed or proposed species may be present in the area of the action, and if the Services advise that any such species may be present, the agency must prepare a biological assessment to identify any species that is likely to be affected by the action.

D The contention at issue was filed several years after issuance of both the draft and final EIS in this case, and petitioners’ claimed new information was either not materially different from information that was previously available, or otherwise not really new, with the contention filed a year or more after the availability of the most recent information cited by petitioners. Under these circumstances the contention is found to be untimely.

E Section 2.326(a)(1) of 10 C.F.R. allows a motion to reopen to be granted, even if untimely, when the motion presents an “exceptionally grave issue,” which the Commission has defined as one which raises “a sufficiently grave threat to public safety.” Although noncompliance with the ESA is a serious matter, which may warrant further attention by the NRC Staff, the board concludes that any possibility of adverse
Concluding that the motion to reopen does not meet all the requirements of 10 C.F.R. § 2.326 and that
the contention fails to meet the timeliness requirements of 10 C.F.R. § 2.309, the licensing board denies
the petition to intervene and motion.

This 10 C.F.R. Part 52 proceeding concerns the application of Detroit Edison Company (DTE) to
construct and to operate a new boiling water reactor on its existing Fermi nuclear facility site near Newport
City in Monroe County, Michigan. The proposed reactor is designated Unit 3 and would employ the
GE-Hitachi Economic Simplified Boiling Water Reactor (ESBWR) design. The Licensing Board granted
the Intervenors’ motion for leave to file ten new or amended contentions but denied the contentions as
inadmissible.

A delay caused by the schedule of counsel in other matters can support a finding of good cause. See
Carolina Power & Light Co. (Shearon Harris Nuclear Power Plant), LBP-00-19, 52 NRC 85, 92 (2000).

Because three contentions are already set for hearing in this proceeding, the admission of further
contentions would not substantially delay the proceeding. And, because two of the previously admitted
contentions allege NEPA violations, the new NEPA contentions put forward by the Intervenors would not
unreasonably broaden the issues.

As a general rule, Intervenors must file their NEPA contentions based on the ER. Thus, a contention
submitted for the first time after the DEIS is issued will be deemed untimely. But there are exceptions to
this rule. A petitioner “may amend [NEPA] contentions or file new [NEPA] contentions if there are data
or conclusions in the NRC draft or final environmental impact statement, environmental assessment,
or any supplements relating thereto, that differ significantly from the data or conclusions in the applicant’s
documents.” 10 C.F.R. § 2.309(f)(2). Alternatively, the Intervenors may file new or amended contentions
in response to the DEIS if they can satisfy the test of section 2.309(f)(2)(iii). Thus, a new or amended
contention may be filed based upon the DEIS if it is based upon new and materially different information,
whether contained in the DEIS itself or some other source, and if it is filed in a timely manner once the
new information becomes available (or any delay is excused pursuant to section 2.309(c)(1)).

Although NRC regulations provide that petitioners may file amended contentions “if there are data
or conclusions in the [DEIS] . . . that differ significantly from the data or conclusions in the applicant’s
documents,” 10 C.F.R. § 2.309(f)(2), this does not mean that the publication of the DEIS simply provides
an opportunity to renew previously filed (and rejected) contentions. Rather, the petitioner must demonstrate
that the DEIS actually contains new data or conclusions.

Intervenors claim that, because the permitting processes of the Army Corps of Engineers and the state
Department of Environmental Quality were not completed before the DEIS was issued for public comment,
Intervenors have been deprived of their right to comment publicly on mitigation plans at the DEIS stage.
Intervenors fail to cite any legal authority, however, supporting their theory that the permitting processes
of other agencies must be completed before the DEIS may be issued for public comment. Although the
NRC must respond to the significant views of other agencies, particularly if they are critical of the NRC’s
analysis, that duty applies at the FEIS stage, after the DEIS has been circulated to interested federal and
state agencies for their review and comment in accordance with the NRC’s regulations.

Contentions that concern duties of the NRC Staff and not an applicant, such as consultation with other
federal agencies, could not be raised at the ER stage, and therefore we will not reject such a contention as
untimely when filed after the release of the DEIS.

There is no requirement in the Endangered Species Act (ESA), or in the NRC regulations enumerating
the required contents of a DEIS, that the NRC complete the required ESA consultation before publication
of the DEIS.

Intervenors’ challenge concerning the DEIS’s alleged failure to discuss the Great Lakes Compact’s
process for regional review of its application for a consumptive water use permit is inadmissible because
it does not raise a genuine dispute with the DEIS. The Compact Agreement binds and imposes certain
obligations on its member states, not on other governmental agencies or on utility companies. Where
Fermi 3 is concerned, if the Michigan Department of Environmental Quality decides to grant Applicant a
water withdrawal permit, it is Michigan that must seek approval from the Compact, not Applicant or the NRC.

J A licensing board is precluded from admitting a contention alleging that the project may not be consistent with the requirements of another federal, state, or local agency. That issue must be resolved by the other agency, not the NRC.

K The Board may construe an admitted contention contesting the ER as a challenge to the subsequently issued DEIS or FEIS without the necessity for Intervenors to file a new or amended contention. This concept has been referred to as the “migration tenet.” The migration tenet helps to expedite hearings by obviating the need to file and litigate the same contention up to three times — once against the ER, once against the DEIS, and one final time against the FEIS. This tenet, however, applies only so long as the DEIS analysis or discussion at issue is essentially in para materia with the ER analysis or discussion that is the focus of the contention. If it is not, an intervener may need to amend the admitted contention, or file a new contention altogether.

L Although NEPA requires that the environmental impact statement discuss the impacts of the proposed action and any alternatives to that action (including options for mitigating impacts), the statute does not require that any specific mitigation strategies must be adopted.

M The General Design Criteria require that “[t]he reactor core and associated coolant systems shall be designed so that in the power operating range the net effect of the prompt inherent nuclear feedback characteristics tends to compensate for a rapid increase in reactivity.” In other words, the General Design Criteria require that the reactor exhibit a negative void coefficient in the power operating range. The Design Control Document for the ESBWR shows that throughout core life the ESBWR exhibits a negative void coefficient. Thus, there was no need for the DEIS to discuss accidents encompassing the potential of “Positive Void Coefficient” because the design does not exhibit such a characteristic.

N In order to avoid an unlawful segmentation of the project, the FEIS must evaluate the environmental impact not only of the construction and operation of the project itself but of all connected actions. The NRC Staff argues that the construction of a transmission line is defined as a “preconstruction activity,” and that the NRC lacks regulatory authority over construction of the transmission corridor, which will be built by an entity other than the Applicant. But even if the transmission corridor is a preconstruction activity and outside the NRC’s regulatory jurisdiction, the construction and maintenance of the transmission corridor likely qualifies as a connected action under governing NRC and Council on Environmental Quality (CEQ) regulations, and therefore must be analyzed in the FEIS.

O By raising the public health consequences of all radiological releases from Fermi 3, Intervenors seem to suggest that any release, even those within limits set by NRC regulations, must be prohibited. To the extent that Intervenors challenge all radiological releases from nuclear power plants, the contention presents an impermissible challenge to the NRC’s regulations. See 10 C.F.R. § 2.335(a).

LBP-12-13 PACIFIC GAS AND ELECTRIC COMPANY (Diablo Canyon Nuclear Power Plant, Units 1 and 2), Docket Nos. 50-275-LR, 50-323-LR (ASLBP No. 10-090-01-LR-BD01); LICENSE RENEWAL; June 27, 2012; MEMORANDUM AND ORDER (Denying Motion to Admit New Contentions Challenging the Environmental Report)

A The Board denies a motion filed by the San Luis Obispo Mothers for Peace seeking to admit two new environmental contentions because PG&E is under no legal duty to update its originally compliant 2009 Environmental Report (ER) based on events that occurred in 2012 and, absent any such duty, the contentions fail to allege any legal omission or deficiency in the ER and the 2012 events are not “material” under 10 C.F.R. § 2.309(a)(2).

C If an Environmental Report is compliant as of its date of issuance, then subsequent events and information are not material to the compliance status of the ER.

D Absent any duty under Part 51 requiring an applicant to supplement its Environmental Report to address subsequent events or information, subsequent events and information do not create a “genuine dispute” as to the compliance status of the ER.

E Although the trigger point for timely submission of new or amended contentions is when new information becomes available, and our rules require the filing of contentions in a timely manner after such new information becomes available, the core element of an admissible contention is that it must allege that
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

there is some legal omission or deficiency in the Environmental Report. If the new information does not give rise to an alleged omission or deficiency (because there is no duty for the Environmental Report to address the new information), then the new information is not material and cannot form the basis of an admissible contention.

LBP-12-14 ALL OPERATING BOILING WATER REACTOR LICENSEES WITH MARK I AND MARK II CONTAINMENTS: ORDER MODIFYING LICENSES WITH REGARD TO RELIABLE HARDENED CONTAINMENT VENTS (EFFECTIVE IMMEDIATELY), Docket No. EA-12-050 (ASLBP No. 12-918-01-EA-BD01); ALL POWER REACTOR LICENSEES AND HOLDERS OF CONSTRUCTION PERMITS IN ACTIVE OR DEFERRED STATUS: ORDER MODIFYING LICENSES WITH REGARD TO RELIABLE SPENT FUEL POOL INSTRUMENTATION (EFFECTIVE IMMEDIATELY), Docket No. EA-12-051 (ASLBP No. 12-918-01-EA-BD01); ENFORCEMENT; July 10, 2012; MEMORANDUM AND ORDER (Denying Petitions for Hearing)

A In this proceeding regarding challenges to two enforcement orders, each of which implements lessons learned from the Fukushima Dai-ichi accident, ruling on petitions to intervene and requests for hearing on claims that the enforcement orders are inadequate to ensure adequate safety, the Licensing Board denies the petitions as outside the scope of the proceeding.

B Section 189a of the Atomic Energy Act of 1954 confers upon the Commission authority to define the scope of its proceedings, which, in enforcement proceedings, the Commission takes to permit challenges solely on whether an order should be sustained. Challenges seeking the imposition of additional license modifications are beyond the scope of such proceedings. *Bellotti v. NRC*, 725 F.2d 1380, 1381 (D.C. Cir. 1983), aff'g, sub nom., *Boston Edison Co.* (Pilgrim Nuclear Power Station), CLI-82-16, 16 NRC 44 (1982); see also *Detroit Edison Co.* (Fermi Power Plant Independent Spent Fuel Storage Installation), CLI-10-3, 71 NRC 49, 53 (2010); *Alaska Department of Transportation and Public Facilities*, CLI-04-26, 60 NRC 399, 404 (2004); *Maine Yankee Atomic Power Co.* (Maine Yankee Atomic Power Station), CLI-04-5, 59 NRC 52, 58 (2004).

LBP-12-15 UNION ELECTRIC COMPANY (Callaway Plant, Unit 1), Docket No. 50-483-LR (ASLBP No. 12-919-06-LR-BD01); LICENSE RENEWAL; July 17, 2012; MEMORANDUM AND ORDER (Ruling on Standing and Hearing Petition Contention Admissibility)

A For an individual or organization to be deemed a “person whose interest may be affected by the proceeding” under Atomic Energy Act (AEA) § 189a, 42 U.S.C. § 2239(a)(1)(A), so as to have standing “as of right” such that party status can be granted in an agency adjudicatory proceeding, the intervention petition must include a statement of (1) the petitioner’s name, address, and telephone contact information; (2) the nature of the petitioner’s right under the AEA to be made a party; (3) the nature of the petitioner’s interest in the proceeding, whether property, financial, or otherwise; and (4) the possible effect of any decision or order that might be issued in the proceeding on the petitioner’s interest. See 10 C.F.R. § 2.309(d)(1)(i)-(iv). In assessing this information in a section 189a adjudicatory proceeding to determine whether the petitioner has established its standing, the Commission generally applies contemporaneous judicial standing concepts, inquiring whether the participant has established that (1) it has suffered or will suffer a distinct and palpable injury that constitutes injury-in-fact within the zones of interest arguably protected by the governing statutes (e.g., the AEA, NEPA, 42 U.S.C. § 4321 et seq.); (2) the injury is fairly traceable to the challenged action; and (3) the injury is likely to be redressed by a favorable decision. See *Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-96-1, 43 NRC 1, 6 (1996).

B An entity may seek to demonstrate its standing to intervene on behalf of its members, i.e., representational standing, but that entity must then show it has an individual member who can fulfill all the necessary standing elements and who has authorized the entity to represent his or her interests. See *Vermont Yankee Nuclear Power Corp.* (Vermont Yankee Nuclear Power Station), CLI-00-20, 52 NRC 151, 163 (2000).
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

D In assessing a petition submitted in a 10 C.F.R. Part 54 power reactor license renewal proceeding to determine whether these standing elements are met, which a licensing board must do even if there are no objections to a petitioner’s standing, the board may apply the proximity presumption. Under this presumption, for an entity seeking representational standing, the standing elements associated with causation are deemed fulfilled if a member of the entity that is seeking representational standing resides or has significant contacts in an area within a 50-mile radius of the facility in question.

E Section 2.309(f)(1) of the Commission’s rules of practice specifies the requirements that must be met if a contention is to be deemed admissible. Specifically, a contention must provide (1) a specific statement of the legal or factual issue sought to be raised; (2) a brief explanation of its basis; (3) a concise statement of the alleged facts or expert opinions, including references to specific sources and documents, that support the petitioner’s position and upon which the petitioner intends to rely at hearing; and (4) sufficient information demonstrating that a genuine dispute exists with regard to a material issue of law or fact, including references to specific portions of the application that the petitioner disputes, or in the case when the application is alleged to be deficient, the identification of such deficiencies and supporting reasons for this belief. See 10 C.F.R. § 2.309(f)(1)(i), (ii), (v), (vi). In addition, the petitioner must demonstrate that the issue raised in the contention is both “within the scope of the proceeding” and “material” to the findings the NRC must make to support the action that is involved in the proceeding.” Id. § 2.309(f)(1)(iii), (iv). Failure to comply with any of these requirements is grounds for dismissing a contention. See South Carolina Electric & Gas Co. (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-10-1, 71 NRC 1, 7 & n.33 (2010).

F All proffered contentions must be within the scope of the proceeding as defined by the Commission in its initial hearing notice and directive referring the proceeding to the Licensing Board. See 10 C.F.R. § 2.309(f)(1)(iii); Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-00-23, 52 NRC 327, 329 (2000); Duke Power Co. ( Catawba Nuclear Station, Units 1 and 2), ALAB-825, 22 NRC 785, 790-91 (1985). As a consequence, any contention that falls outside the specified scope of the proceeding must be rejected. See Pacific Gas and Electric Co. ( Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-11-11, 74 NRC 427, 435-36 (2011).

G To be admissible, the regulations require that all contentions assert an issue of law or fact that is material to the outcome of a licensing proceeding, meaning that the subject matter of the contention must impact the grant or denial of a pending license application. See 10 C.F.R. § 2.309(f)(1)(iv); Luminant Generation Co., LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), CLI-12-7, 75 NRC 379, 388-89 (2012). This requirement of materiality often dictates that any contention alleging deficiencies or errors in an application also indicate some significant link between the claimed deficiency and either the public health and safety or the environment. See Yankee Atomic Electric Co. ( Yankee Nuclear Power Station), LBP-96-2, 43 NRC 61, 75-76 (1996), rev’d in part on other grounds, CLI-96-7, 43 NRC 235 (1996); see also Pacific Gas and Electric Co. ( Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), LBP-02-23, 56 NRC 413, 439-41 (2002), petition for review denied. CLI-03-12, 58 NRC 185, 191 (2003).

H It is the petitioner’s obligation to present the factual allegations and/or expert opinion necessary to support its contention. See 10 C.F.R. § 2.309(f)(1)(v); USEC Inc. ( American Centrifuge Plant), CLI-06-10, 63 NRC 451, 457 (2006). While a board may appropriately view a petitioner’s supporting information in a light favorable to the petitioner, failure to provide such information regarding a proffered contention requires that the contention be rejected. See Arizona Public Service Co. ( Palo Verde Nuclear Generating Station, Units 1, 2, and 3), CLI-91-12, 34 NRC 149, 155 (1991). Neither speculation nor conclusory assertions, even by an expert, alleging that a matter fails to satisfy the AEA or NEPA will suffice to allow the admission of a proffered contention. See Diablo Canyon, CLI-11-11, 74 NRC at 452 n.139; Amer. Centrifuge Plant, CLI-06-10, 63 NRC at 472; Fansteel, Inc. ( Muskogee, Oklahoma Site), CLI-03-13, 58 NRC 195, 203 (2003). If a petitioner neglects to provide the requisite support for its contentions, it is not within the board’s power to make assumptions or draw inferences that favor the petitioner, nor may the board supply information that is lacking. See Crow Butte Resources, Inc. ( North Trend Expansion Project), CLI-09-12, 69 NRC 535, 553 (2009); Palo Verde, CLI-91-12, 34 NRC at 155. Likewise, simply attaching material or documents as a basis for a contention, without setting forth an explanation of that information’s significance, is inadequate to support the admission of the contention. See Fansteel, CLI-03-13, 58 NRC at 204-05.

I All properly formulated contentions must focus on the license application in question, challenging

either specific portions of, or alleged omissions from, the application (including the safety analysis report/technical report and the ER) so as to establish there is a genuine dispute with the application on a material issue of law or fact. See 10 C.F.R. § 2.309(f)(1)(vi). Any contention that fails directly to controvert the application or that mistakenly asserts the application does not address a relevant issue will be dismissed. See N. Trend Expansion Project, CLI-09-12, 69 NRC at 557; see also Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-12-6, 75 NRC 352, 371 (2012); NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-12-5, 75 NRC 301, 342-44 (2012), petition for review filed sub nom. Beyond Nuclear v. NRC, No. 12-1561 (1st Cir. May 7, 2012). Similarly, a petitioner that fails to provide sufficient factual or expert support for the claims in its contention in contravention of section 2.309(f)(1)(v) also may have failed to show a genuine dispute with the application as required under section 2.309(f)(1)(vi). See FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), CLI-12-8, 75 NRC 393, 404, 405 (2012); see also Comanche Peak, CLI-12-7, 75 NRC at 390 & n.43.

J If at the time a hearing petition is filed, the exact nature of the measures that will be proposed by an applicant under an agency enforcement order are simply too uncertain to permit a determination whether one or more of them will require a NEPA analysis of their environmental impact implications as part of a license renewal proceeding, an appropriate challenge and a board determination will need to abide at least the applicant’s proposal regarding the particular measures it intends to implement to comply with the requirements of the enforcement order.

K Contention that NRC Staff enforcement order and information request are “approvals” under section 51.45(d), which has implication that any agency prerequisite with which a license renewal applicant must comply to operate a reactor facility during an extended term constitutes an “approval” under section 51.45(d), would entail an unreasonably strained definition of “approval.” An applicant must comply with any number of NRC regulations to continue operating a reactor facility, but those regulations cannot be considered “approvals” such that an applicant would be required to describe its compliance with each provision in its ER. This is clearly not the intent of section 51.45(d). Moreover, the plain meaning of the word “approval,” which requires an affirmative action on the part of an approver, clearly establishes that requiring compliance is different from granting an approval. See Webster’s Third New International Dictionary 106 (Philip B. Gove ed. in chief, unabr. 1976) (defining “approval” as “the act of approving” and “certification as to acceptability”).

L With regard to a Staff information request, if that information directive simply requires that licensees provide certain information to the agency and explains that the NRC will evaluate the information provided by licensees to determine whether further regulatory actions are required, but does not state that the information is required for the NRC to grant (or deny) a permit, license, approval, or other entitlement, the Staff’s information request is not an “approval” under section 51.45(d).

M A Staff enforcement order is essentially a directive to a licensee to achieve compliance with the order’s requirements by a certain date. That an enforcement order has the unique feature of allowing a licensee to propose its own strategies for coming into compliance, rather than mandating a certain set of plant alterations, does not change the fundamental character of the order and transform it into an “approval.” Such an enforcement order, which will be treated by the licensing board as it would any other enforcement order, does not establish an “approval” process under section 51.45(d). A licensee, therefore, is not required to list that order, or the licensee’s compliance with the order’s terms, in the ER supporting its application for renewal of its reactor operating license.

N Even if compliance with an information request and/or an enforcement order were deemed to be a prerequisite for license renewal, an applicant arguably would have already satisfied its duty under section 51.45(d) in an instance when its ER notes that one of the “Federal permits, licenses, approvals [or] other entitlements” that it must receive is a license renewal from the NRC. By noting that it must receive a license renewal from the NRC, the applicant necessarily implies that it must satisfy all of the requirements established by the NRC to receive that renewal. Section 51.45(d) surely does not require that an applicant explain every aspect of the process it must pursue in the course of obtaining a federal permit, license, or approval. See Detroit Edison Co. (Fermi Nuclear Power Plant, Unit 3), LBP-12-12, 75 NRC 742, 764-65 (2012). Accordingly, the applicant would not have to list either of these items as a required permit, license, or approval given that the applicant already has listed its NRC license renewal generally as a federal permit, license, or approval.

O In implementing NEPA § 102, 42 U.S.C. § 4332(2)(C)(i)-(iii), section 51.53(c)(2) of the Commis-
DIGESTS

ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

sion’s regulations requires that an ER submitted by a license renewal applicant address the environmental impacts of the proposed action and compare those impacts to the impacts of alternative actions. But the Commission has held repeatedly that an applicant need only consider those alternatives that are reasonable. See, e.g., Seabrook, CLI-12-5, 75 NRC at 341.

P The Commission has held that the Staff’s environmental impact statement (EIS) “need only discuss those alternatives that . . . ‘will bring about the ends’ of the proposed action,” Hydro Resources, Inc. (P.O. Box 15910, Rio Rancho, NM 87174), CLI-01-4, 53 NRC 31, 55 (2001) (quoting Citizens Against Burlington, Inc. v. Busey, 938 F.2d 190, 195 (D.C. Cir.), cert. denied, 502 U.S. 994 (1991)), a principle equally applicable to an ER, see Detroit Edison Co. (Fermi Nuclear Power Plant, Unit 3), LBP-09-16, 70 NRC 227, 263, aff’d, CLI-09-22, 70 NRC 932 (2009).

Q In its reactor license renewal rulings on wind-related NEPA alternatives contentions, the Commission was very clear that petitioners must demonstrate that wind generation can provide sufficient baseload power to replace the nuclear plant at issue by showing that such wind power is both technically feasible and commercially viable in the near future. See Davis-Besse, CLI-12-8, 75 NRC at 402; Seabrook, CLI-12-5, 75 NRC at 342.

R The showing needed under the Commission’s Seabrook and Davis-Besse cases relates to the discussion necessary to support a NEPA alternatives contention in a 10 C.F.R. Part 54 reactor license renewal proceeding, which involves the replacement of an existing electrical generation source with an alternative source that likely has yet to be constructed, rather than in a Part 52 combined license proceeding, in which the proposed construction of an entirely new generation source seemingly would involve a different, and likely broader, set of considerations.

S Per the Commission’s Seabrook decision, see CLI-12-5, 75 NRC at 342, 343, the use of the terms “in the relatively near term” and “in the near future” describe the period within which an otherwise technically feasible generation alternative would become commercially viable. These terms clearly denote temporal proximity to the present rather than measuring possible feasibility nearer to the extended term of the subject reactor, at least absent a showing that the technology “while not commercially viable at the time of the application, is under development for large-scale use and is ‘likely to’ be available during the period of extended operation,” id. at 342 n.245.

LBP-12-16 ENTERGY NUCLEAR GENERATION COMPANY and ENTERGY NUCLEAR OPERATIONS, INC. (Pilgrim Nuclear Power Station), Docket No. 50-293-LR (ASLBP No. 12-921-08-LR-BD01); LICENSE RENEWAL; July 20, 2012; MEMORANDUM AND ORDER (Denying Petition for Intervention and Request to Reopen Proceeding and Admit New Contention)

A In this previously terminated proceeding on the application for renewal of the Pilgrim Nuclear Power Station’s operating license, the licensing board denies as untimely a motion to reopen the proceeding and admit a new contention alleging that the licensee lacks certain required environmental permits and approvals from state and federal agencies.

B In order for a motion to reopen to be granted and new contention admitted after termination of a proceeding, the motion must meet all of the requirements of 10 C.F.R. § 2.326 for reopening a closed record, and the new contention must have been submitted in a timely fashion and demonstrate admissibility as required at 10 C.F.R. § 2.309.

C Petitioners’ claim that the NRC Staff and the applicant should be estopped from arguing that petitioners’ motion is untimely, based on the NRC’s alleged failure to ensure the applicant’s compliance with state and federal law, fails because petitioners do not show the necessary elements of an estoppel against the government that: (1) there was a “definite” representation to the party claiming estoppel; (2) the party relied on the government’s conduct in such a manner as to change his position for the worse; (3) the party’s reliance was reasonable; and (4) the government engaged in affirmative misconduct.

D Petitioners allege that the applicant lacks permits and approvals that are within the domain of other state or federal agencies. The board does not have jurisdiction to determine whether other government entities have properly followed their regulations or procedures, or the authority to compel other such agencies to provide the petitioners with relief.

E Section 2.326(a)(1) allows a motion to reopen to be granted, even if untimely, when the motion presents an “exceptionally grave issue,” which the Commission has defined as one which raises “a sufficiently grave threat to public safety.” Because Petitioners fail to show that any alleged failure to obtain required permits and approvals, or any discharge or other alleged harm, poses any grave threat to
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

the safety of the public, the board concludes that there is no showing of an exceptionally grave issue so as to warrant reopening the adjudicatory proceeding.

F Concluding that the motion to reopen does not meet all the requirements of 10 C.F.R. § 2.326 and that the contention fails to meet the timeliness requirements of 10 C.F.R. § 2.309, the licensing board denies the petition to intervene and motion.

LBP-12-17 CALVERT CLIFFS 3 NUCLEAR PROJECT, LLC, and UNISTAR NUCLEAR OPERATING SERVICES, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3, Docket No. 52-016-COL (ASLBP No. 09-874-02-COL-BDO1)); COMBINED LICENSE; August 30, 2012; PARTIAL INITIAL DECISION (Ruling on Contention 10C)

A This proceeding concerns the application of Calvert Cliffs 3 Nuclear Project, LLC, and UniStar Nuclear Operating Services, LLC, under 10 C.F.R. Part 52 for a combined license (COL) to construct and operate a new nuclear unit, using the U.S. Evolutionary Power Reactor certified design, at its site in Lusby, Calvert County, Maryland. The licensing board conducted an evidentiary hearing on the merits of Contention 10C, which challenges the adequacy of the wind and solar power contribution estimates contained in the Final Environmental Impact Statement’s (FEIS’s) alternative based on a combination of energy sources. The licensing board finds that the FEIS, as supplemented by the evidence and testimony introduced at the evidentiary hearing, satisfies the requirements of the National Environmental Policy Act (NEPA) and 10 C.F.R. Part 51.

B In general, an applicant in a licensing proceeding bears the burden of proving by a preponderance of the evidence that it is entitled to the applied-for license. See 10 C.F.R. § 2.325. Nonetheless, for contentions based on NEPA, such as the one at issue here, the burden shifts to the Staff, because the NRC, not the applicant, bears the ultimate burden of establishing compliance with NEPA. See, e.g., Duke Power Co. (Catawba Nuclear Station, Units 1 and 2), CLI-83-19, 17 NRC 1041, 1049 (1983).

C An EIS shall include “a detailed statement by the responsible official on...(a) alternatives to the proposed action.” 42 U.S.C. § 4332(2)(C)(iii); see Louisiana Energy Services, L.P. (Calalbome Enrichment Center), CLI-98-3, 47 NRC 77, 104 (1998). When considering alternatives, agencies must: “(a) Rigorously explore and objectively evaluate all reasonable alternatives, and for alternatives which were eliminated from detailed study, briefly discuss the reasons for their having been eliminated. (b) Devote substantial treatment to each alternative considered in detail including the proposed action so that reviewers may evaluate their comparative merits.” 40 C.F.R. § 1502.14. NRC regulations state that the alternatives analysis is the “heart of the environmental impact statement.” 10 C.F.R. Part 51, Appendix A, § 5. The Council on Environmental Quality (CEQ) and the federal courts agree. 40 C.F.R. § 1502.14. “The existence of a reasonable but unexamined alternative renders an EIS inadequate.” Friends of Southeast’s Future v. Morrison, 153 F.3d 1059, 1065 (9th Cir. 1998).

D The Commission has explained that “[b]oard hearings on contentions challenging the Staff’s final environmental review documents. In such cases, “[t]he adjudicatory record and Board decision (and...any Commission appellate decision) become, in effect, part of the FEIS.” Nuclear Innovation North America LLC (South Texas Project, Units 3 and 4), CLI-11-6, 74 NRC 203, 208-09 (2011) (citing Calabome, CLI-98-3, 47 NRC 77, 104 (1985); and Philadelphia Electric Co. (Limerick Generating Station, Units 1 and 2), ALAB-819, 22 NRC 681, 705-07 (1985)). Thus, the Staff’s FEIS, in conjunction with the adjudicatory record, becomes the relevant record of decision for the environmental portion of this proceeding. See, e.g., Pacific Gas and Electric Co. ( Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), CLI-08-26, 68 NRC 509, 526 (2008), petition for review denied on other grounds, San Luis Obispo Mothers for Peace v. NRC, 635 F.3d 1109 (9th Cir. 2011). Federal courts of appeal have approved this process in which an EIS is effectively amended through the adjudicatory process. New England Coalition on Nuclear Pollution v. NRC, 582 F.2d 87, 93-94 (1st Cir. 1978); Citizens for Safe Power, Inc. v. NRC, 524 F.2d 1291, 1294 n.5 (D.C. Cir. 1975); Ecology Action v. AEC, 492 F.2d 998, 1001-02 (2d Cir. 1974).

E Where an issue arises over the scope of an admitted contention, NRC opinions have long referred back to the bases set forth in support of the contention.” Duke Energy Corp. (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-02-28, 56 NRC 373, 379 (2002). Information offered in evidence, even if not specifically stated in the original contention and bases may be relevant if it falls within the “envelope,” “reach,” or “focus” of the contention when read with the original bases offered for it. Duke Energy Corp. (Catawba Nuclear Station, Units 1 and 2), LBP-04-12, 59 NRC 388, 391 (2004).Thus, as long as the facts relied on by Joint Intervenors fall within the “envelope” of the contention,
DIGESTS

ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

they are properly before the Board. A petitioner is not required to set forth all its evidence or to prove its contentions at the admissibility stage. Mississippi Power and Light Co. (Grand Gulf Nuclear Station, Units 1 and 2), ALAB-130, 6 ASC 423, 426 (1973). The Commission has instructed licensing boards that they may not stretch "the scope of admitted contentions beyond their reasonably inferred bounds," but this statement also implies that we may consider issues that, although not expressly stated, can reasonably be inferred from the arguments presented.

In considering alternatives under NEPA, an agency should take into account the needs and goals of the parties involved in the application. Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), CLI-04-22, 60 NRC 125, 146 (2004). "However, agencies are not permitted ‘to define the objectives [of a proposed action] so narrowly as to preclude a reasonable consideration of alternatives.’" Wyoming v. U.S. Department of Agriculture, 661 F.3d 1209, 1244 (10th Cir. 2011) (quoting Citizens’ Committee to Save Our Canyons v. U.S. Forest Service, 297 F.3d 1012, 1030 (10th Cir. 2002)). Although the agency’s alternatives analysis should reflect the applicant’s goals, the underlying goal should not be purposefully narrowed to predetermine the outcome. City of Grapevine v. Department of Transportation, 17 F.3d 1502, 1506 (D.C. Cir. 1994). Blindly adopting the applicant’s statement of the purpose of the action is a “losing position” because it does not allow for the full consideration of alternatives required by NEPA. Simmons v. U.S. Army Corps of Engineers, 120 F.3d 664, 669 (7th Cir. 1997). NEPA requires an agency to “‘exercise a degree of skepticism in dealing with the self-serving statements from the prime beneficiary of the project’” and to look at the general goal of the project, rather than only those alternatives preferred by the applicant. Id. (quoting Citizens Against Burlington, Inc. v. Busey, 938 F.2d 190, 209 (D.C. Cir. 1991) (Buckley, J., dissenting)).

A This proceeding concerns the application of Calvert Cliffs 3 Nuclear Project, LLC, and UniStar Nuclear Operating Services, LLC, under 10 C.F.R. Part 52 for a combined license (COL) to construct and operate a new nuclear unit, using the U.S. Evolutionary Power Reactor certified design, at its site in Lusby, Calvert County, Maryland. Joint Intervenors filed a motion to admit proposed Contention 11, which alleges that the Final Environmental Impact Statement violates the National Environmental Policy Act (NEPA) because it fails to address the environmental and safety implications of the findings and recommendations of the Nuclear Regulatory Commission’s Fukushima Task Force. The Licensing Board concludes that the new contention was timely filed, but that under controlling Commission precedent it is not admissible.

B Under section 2.309(f)(2), new contentions filed after the initial filing may only be admitted “upon a showing that . . . (i) the information upon which the . . . new contention is based was not previously available; (ii) the information upon which the . . . new contention is based is materially different than information previously available; and (iii) the . . . new contention has been submitted in a timely fashion based on the availability of the subsequent information.” 10 C.F.R. § 2.309(f)(2).

C The impact of the proposed action on public safety is an issue that must be considered under NEPA, as well as the Atomic Energy Act. City of Las Vegas v. Federal Aviation Administration, 570 F.3d 1109, 1115 (9th Cir. 2009) (citing Metropolitan Edison Co. v. People Against Nuclear Energy, 460 U.S. 766, 772, 775 (1983)).

D The Commission has held that “reference to [generic agency] recommendations alone, without facts or expert opinion that explain their significance for the unique characteristics of the sites or reactors that are the subject of [a] petition[,] does not provide sufficient support for [a] common contention.” See Luminant Generation Co. LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), CLI-12-7, 75 NRC 379, 390 (2012).

E When a petitioner “[d]oes not relate [its] contention to any unique characteristics of the particular site at issue,” a licensing board may properly find that the contention was not adequately supported by alleged facts or expert opinions and did not raise issues material to the NRC’s reviews of the pending license application. Comanche Peak, CLI-12-7, 75 NRC at 388, 389, 390.
A This proceeding concerns the application of Calvert Cliffs 3 Nuclear Project, LLC, and UniStar Nuclear Operating Services, LLC, under 10 C.F.R. Part 52 for a combined license (COL) to construct and operate a new nuclear unit, using the U.S. Evolutionary Power Reactor certified design, at its site in Lusby, Calvert County, Maryland. The licensing board grants summary disposition in favor of Joint Intervenors as to Contention 1 and finds Applicants ineligible to obtain a license because they are owned by a United States (U.S.) corporation that is 100% owned by a foreign corporation, failing to meet the requirements of section 103(d) of the Atomic Energy Act (AEA) and 10 C.F.R. § 50.38.

B Under 10 C.F.R. § 2.710(d)(2), a moving party is entitled to summary disposition “if the filings in the proceeding, . . . together with the statements of the parties and the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a decision as a matter of law.” Generally, when ruling on motions for summary disposition, the Commission applies standards analogous to the standards used by the federal courts when ruling on motions for summary judgment under the comparable Rule 56 of the Federal Rules of Civil Procedure.

C Section 103(d) of the AEA, prohibits the NRC from issuing a reactor license to “any corporation or other entity if the Commission knows or has reason to believe it is owned, controlled, or dominated by an alien, a foreign corporation, or a foreign government.” 42 U.S.C. § 2133(d). This proscription is reiterated in 10 C.F.R. § 50.38 of the NRC regulations, “Ineligibility of certain applicants,” which states that: “[a]ny person who is a citizen, national, or agent of a foreign country, or any corporation, or other entity which the Commission knows or has reason to believe is owned, controlled, or dominated by an alien, a foreign corporation, or a foreign government, shall be ineligible to apply for and obtain a license.”

D According to the NRC’s Standard Review Plan on Foreign Ownership, Control, or Domination (SRP), an entity is considered to be under foreign ownership, control, or domination (FOCD) “whenever a foreign interest has the ‘power,’ direct or indirect, whether or not exercised, to direct or decide matters affecting the management or operations of the applicant.” 64 Fed. Reg. at 52,358. The SRP cautions that there is generally no specific ownership percentage above which the NRC Staff would conclusively determine that an applicant is per se controlled by foreign interests. Id. Instead, foreign control “must be interpreted in light of all the information that bears on who in the corporate structure exercises control over what issues and what rights may be associated with certain types of shares.” Id.

E Although, in general, the SRP on foreign ownership, control, or domination avoids designating a foreign ownership percentage that would make an applicant per se controlled by foreign interests, it nonetheless repeatedly states that a completely (i.e., 100%) foreign-owned applicant would be ineligible to receive a license. The SRP provides that “[w]here an applicant that is seeking to acquire a 100 percent interest in the facility is wholly owned by a U.S. company that is wholly owned by a foreign corporation, the applicant will not be eligible for a license.” 64 Fed. Reg. at 52,358.

F The AEA clearly prohibits the NRC from issuing a reactor license to “any corporation or other entity if the Commission knows or has reason to believe it is owned, controlled, or dominated by an alien, a foreign corporation, or a foreign government.” 42 U.S.C. § 2133(d). The fact that Congress connected the three prohibitions with the conjunction “or” rather than “and” shows that a license may not be granted if any of the three prohibitions is violated. The same proscription is reiterated in 10 C.F.R. § 50.38.

G The prohibition of foreign ownership in 10 C.F.R. § 50.38 would be rendered superfluous if 100% foreign ownership is acceptable. Therefore, section 103(d) of the AEA and 10 C.F.R. § 50.38 must be interpreted, at a minimum, as making a 100% foreign-owned applicant ineligible to receive a license.

H Under 10 C.F.R. § 50.38 and 10 C.F.R. § 52.75, a foreign-owned, -controlled, or -dominated entity is ineligible to apply for, let alone obtain, a COL.

LBP-12-20 EXELON NUCLEAR TEXAS HOLDINGS, LLC (Victoria County Station Site), Docket No. 52-042 (ASLB No. 11-908-01-ESP-BD01); EARLY SITE PERMIT; September 5, 2012; ORDER (Granting Unopposed Motion to Withdraw Application Without Prejudice and Terminating the Proceeding)

A In this Order, the Board granted Exelon Nuclear Texas Holdings, LLC’s motion to withdraw its pending early site permit application without prejudice or imposition of any additional terms. intervenor, Texas for a Sound Energy Policy, and the NRC Staff did not oppose the motion.

B Withdrawal of an application after a notice of hearing is permitted on such terms as the presiding officer may prescribe.
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

C When a motion to withdraw an application is unopposed and the withdrawal causes no apparent harm to the public or any party, it is appropriate to grant the motion without prejudice or imposition of additional terms.

LBP-12-21 GE-HITACHI GLOBAL LASER ENRICHMENT LLC (GLE Commercial Facility), Docket No. 70-7016-ML (ASLBP No. 10-901-03-ML-BD01); MATERIALS LICENSE; September 19, 2012; INITIAL DECISION

A In this Initial Decision, the Atomic Safety and Licensing Board (the Board) determines that the NRC Staff conducted an adequate review of GE-Hitachi Global Laser Enrichment, LLC’s (GLE’s) application for a license to possess and use source, byproduct, and special nuclear material and to enrich natural uranium to a maximum of 8% 235U by a laser-based enrichment process. The Board was directed to conduct a mandatory hearing pursuant to section 193b(1) of the Atomic Energy Act, which was conducted in several stages and allowed the Board to probe issues of concern throughout the proceeding. The Board concluded that the application and record contained sufficient information to support issuance of GLE’s requested license and that the Staff’s review of the application was adequate to support its independent safety and environmental findings. The Board also independently considered the final balance among conflicting environmental costs and benefits and found the proposed action preferable. Thus, the Board authorizes the Directors of the Office of Nuclear Materials Safety and Safeguards and of the Office of Federal and State Materials and Environmental Management Programs to license the GLE facility when each makes all required findings not within the scope of the Board’s decision.

B Section 193b(1) of the Atomic Energy Act states that the Commission shall conduct a single adjudicatory hearing on the record with regard to the licensing of the construction and operation of a uranium enrichment facility.

C Licensing boards conducting mandatory hearings on uncontested issues must take an independent hard look at NRC Staff safety and environmental findings without replicating the NRC Staff’s work.

D Licensing boards conducting mandatory hearings should conduct a sufficiency review of uncontested issues, not a de novo review.

E Licensing boards conducting mandatory hearings should not second-guess the underlying technical or factual findings by the NRC Staff.

F While safety issues are reviewed under the adequacy and sufficiency standard, licensing boards conducting mandatory hearings must independently consider the final balance among the conflicting costs and benefits when reviewing National Environmental Policy Act (NEPA) issues.

G The level of detail required for a licensing decision does not require a final facility design or an absolutely complete identification of all items relied on for safety and accident sequences, but instead sufficient information must be provided to understand the process and functions of items relied on for safety and to afford reasonable assurance that the integrated safety analysis is complete.

H Nuclear proliferation and terrorism are addressed in very specific ways by the NRC. The Atomic Energy Act grants the NRC broad regulatory authority to address issues of defense, security, unauthorized disclosure of protected information, diversion of nuclear materials, and materials control as part of its delegation of licensing authority. Although the Act does not grant express nonproliferation authority, key NRC regulations, such as 10 C.F.R. Parts 73, 74, and 95, clearly have nonproliferation, security, and terrorism objectives.

I NEPA requires a reasonably close causal relationship between an environmental effect and the alleged cause. The Commission has determined there is no such relationship between NRC licensing actions and terrorism.

J In the NEPA context, the Commission has determined that nuclear nonproliferation issues are far removed from the NRC’s decision to license a uranium enrichment facility.

K The Waste Confidence Rule facially does not apply to uranium enrichment facilities.

L The Atomic Energy Act does not prescribe a specific structure for mandatory hearings, and the Commission has granted licensing boards considerable flexibility to select the most appropriate approach in the circumstances of each individual case.

M Licensing boards should concentrate on a relatively thorough examination of selected issues of concern, rather than undertake a comparatively shallow analysis of all possible issues.

N Formal rules of evidence rarely have a useful role in licensing board proceedings. NRC regulations state that strict rules of evidence do not apply to written submissions.
O In licensing board cases, written prefiled testimony and exhibits are typically submitted well in advance of the evidentiary hearing, and in the most common types of hearings, the licensing boards themselves — not the parties — orally examine the witnesses. Therefore, rulings excluding evidence have little effect in eliminating delay, waste of time, or the needless presentation of cumulative evidence in the record.

P If a licensing board deems prefiled evidence to be of little or no value, it simply need not ask about it at the evidentiary hearing and is free to accord such evidence little or no weight.

Q A licensing board may exclude witness from the hearing room during the testimony of other witnesses testifying on the same topic.

LBP-12-22 CALVERT CLIFFS 3 NUCLEAR PROJECT, LLC, and UNISTAR NUCLEAR OPERATING SERVICES, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), Docket No. 52-016-COL (ASLBP No. 09-874-02-COL-BD01); COMBINED LICENSE; November 1, 2012; ORDER (Terminating the Adjudicatory Proceeding)

LBP-12-23 DETROIT EDISON COMPANY (Fermi Nuclear Power Plant, Unit 3), Docket No. 52-033-COL (ASLBP No. 09-880-05-COL-BD01); COMBINED LICENSE; November 9, 2012; MEMORANDUM AND ORDER (Granting Motion for Summary Disposition of Contention 6; Denying Motions for Summary Disposition of Contentions 8 and 15; Denying Motion to Admit Contention 25; and Resolving Remaining Issues Regarding Contentions 20 and 21)

A In this 10 C.F.R. Part 52 proceeding regarding the application of DTE to construct and operate a GE-Hitachi Economic Simplified Boiling Water Reactor, designated Unit 3, on its existing Fermi nuclear facility site in Monroe County, Michigan, the Board grants summary disposition of Contention 6, denies summary disposition of Contentions 8 and 15, and denies the Motion to Admit Contention 25. The Board also declines to admit those parts of previously submitted Contentions 20 and 21 that the Board did not previously reject.

B If Intervenors raise issues that are not within the scope of an admitted contention and have not sought to amend the contention to include those issues, the Board will not consider the issues because they are outside the scope of the admitted contention.

C The scope of an admitted contention depends in large part on the bases set forth in the “brief explanation of the basis for the contention” required by 10 C.F.R. § 2.309(f)(1)(ii). As long as the facts now relied on by Intervenors in opposition to the summary disposition motion fall within the scope of that explanation, they are properly before the Board. In addition, while a party may not raise new arguments that are outside the scope of its contention, it may “legitimately amplify” arguments presented in support of the contention in order to fairly respond to arguments raised by the opposing party.

D If an agency commits to mitigation measures in its Environmental Impact Statement (EIS), then it should take steps to ensure that mitigation commitments are implemented, monitor the effectiveness of such mitigation commitments, and be able to remedy failed mitigation. See U.S. Council on Environmental Quality, Final Guidance for Federal Departments and Agencies on the Appropriate Use of Mitigation and Monitoring and Clarifying the Appropriate Use of Mitigated Findings of No Significant Impact, 76 Fed. Reg. 3843, 3847 (Jan. 21, 2011).

E If mitigation is used to support a finding of no significant impact (FONSI), it should either have been included in the original proposal or required by statute or regulation.

F Federal agencies may rely on mitigation that will be imposed by other agencies; however, this does not relieve the federal agency conducting the NEPA review of the burden to explain the statutory or regulatory requirements it is relying on and its reasons for concluding that the application of those requirements will actually result in the mitigation and monitoring it assumes will occur.

G The Board may construe an admitted contention contesting the Environmental Report (ER) as a challenge to a subsequently issued DEIS or FEIS without the necessity for Intervenors to file a new or amended contention. This concept has been referred to as the “migration tenet.” The tenet applies when the information contained in a subsequently released document is sufficiently similar to the information contained in the original document upon which the original contention was filed. See Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), LBP-11-1, 73 NRC 19, 26 (2011).

H An adequate quality assurance (QA) “program must provide for control over activities affecting the quality of ‘structures, systems, and components, to an extent consistent with their importance to safety.’ The program must also include provisions requiring that the applicant regularly review its status and adequacy. The regulations further mandate that the program establish measures to assure that conditions
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

‘adverse to quality’ are promptly identified and corrected.” Cleveland Electric Illuminating Co. (Perry Nuclear Power Plant, Units 1 and 2), ALAB-802, 21 NRC 490, 492-93 (1985) (internal citation omitted).

I
Once Intervenors show that safety-related design information in the Final Safety Analysis Report (FSAR) is infected by a pattern of QA violations, the burden then shifts to the Applicant to reestablish confidence in the safety-related aspects of the design.

J
If the Staff uses the process and documentation required for the preparation of an EIS/ROD to comply with National Historic Preservation Act (NHPA) § 106, as it is its duty to do, then Intervenors must identify some requirement applicable to that process and documentation with which the Staff arguably failed to comply.

K
The NHPA and its implementing regulations require only that agencies consider the impacts of an undertaking on historic preservation and measures to mitigate those impacts in their decisionmaking. It does not require that the agency implement any mitigation measures, let alone that those measures meet a certain standard of protection for historic properties.

L
This proceeding concerns the application of Northern States Power Company for renewal of the operating license for its 10 C.F.R. Part 72 license to operate an Independent Spent Fuel Storage Installation at the Prairie Island Nuclear Generating Plant in Red Wing, Minnesota. The Prairie Island Indian Community (PIIC) petitioned to intervene and raised seven contentions. The Board granted PIIC’s petition, admitted three of the contentions, and held one additional contention in abeyance.

B
Although no party contests the petitioner’s standing, the Board has an independent obligation to determine whether this threshold criterion has been met. 10 C.F.R. § 2.309(d)(3).

C
NRC regulations require a petitioner to establish standing by demonstrating (1) the nature of its right under the Atomic Energy Act to be made a party to the proceeding, (2) the nature and extent of its interest in the proceeding, and (3) the possible effect of any decision in the proceeding on the petitioner’s interest. 10 C.F.R. § 2.309(d)(1). Additionally, the Commission has instructed that, in assessing a petitioner’s standing, the Board should look to contemporary judicial concepts of standing and determine whether (1) a petitioner is threatened with a concrete injury, (2) the injury is fairly traceable to the licensing action, and (3) the injury is capable of being redressed by a favorable decision. See, e.g., EnergySolutions, LLC (Radioactive Waste Import/Export Licenses), CLI-11-3, 73 NRC 613, 621 (2011).

D
In materials licensing actions such as this one, a petitioner is entitled to a presumption of standing if the petitioner resides in the “zone of reasonably foreseeable harm from the source of radioactivity,” and if “the proposed action involves a significant source of radioactivity producing an obvious potential of offsite consequences.” U.S. Department of Energy (Plutonium Export License), CLI-04-17, 59 NRC 357, 364-65 (2004). There is no predefined distance marking the area of potential offsite consequences on which to establish standing — instead this must be “judged on a case-by-case basis.” Id. at 365.

E
In light of the vacatur of the Waste Confidence Decision and Temporary Storage Rule in New York v. NRC, 681 F.3d 471 (D.C. Cir. 2012), NRC’s rules require that the environmental report consider the reasonably foreseeable impacts of permanent storage of spent fuel. Contentions concerning the failure of the ER to do so must be held in abeyance pursuant to the Commission’s direction in Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-12-16, 76 NRC 63 (2012).

F
A license applicant is required to address cumulative impacts in its environmental report. Section 51.45 directs an applicant to discuss in its ER “the impact of the proposed action on the environment.” A regulation of the Council on Environmental Quality, 40 C.F.R. § 1508.25, which is incorporated into NRC regulations, see 10 C.F.R. § 51.14(b), makes clear that the scope of the term “impact” includes cumulative impacts. NUREG-1748, the NRC Staff’s nonbinding environmental review guidance document for materials license applicants, instructs applicants to “discuss any past, present, or reasonably foreseeable future actions which could result in cumulative impacts when combined with the proposed action.”

G
Incorporation by reference in an application of a large volume of material is insufficient to defeat a contention of omission absent a clear notice of the specific information incorporated. As the Commission has made clear in scrutinizing the information brought before a licensing board in support of a contention, incorporation by reference of information should not force one “to sift through it in search of asserted
The federal trust responsibility rests solely with the federal government and cannot be discharged by an applicant. Furthermore, nothing in 10 C.F.R. § 51.45, which governs the contents of environmental reports, requires an applicant to discuss the federal government’s trust responsibility.

NRC regulations require that applications for renewal of an ISFSI license contain “[a] description of the AMP [aging management plan] for management of issues associated with aging that could adversely affect structures, systems, and components important to safety.” 10 C.F.R. § 72.42(a)(2). Where the current licensing basis defines a given system as not important to safety, the time to challenge that classification was when it was originated, during initial licensing of the ISFSI, and not at the license renewal stage.

Challenges to the current licensing basis of a facility are outside the scope of license renewal proceedings, and contentions that pose a challenge to Commission regulations are inadmissible in licensing proceedings, absent a waiver.

The Commission’s decision in Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Units 2 and 3), CLI-01-24, 54 NRC 349 (2001), compels the rejection of the contention challenging the “relocation” of various technical specifications (dealing with surveillance frequencies) from the license to certain licensee-controlled documents. While the effect of “relocation” of technical specifications from the license to the licensee-controlled documents is to delete these as “technical specifications” under 10 C.F.R. § 50.36, to authorize the licensee to unilaterally make future changes in the surveillance frequencies, and to deprive the public of the opportunity to scrutinize or challenge such future changes, Millstone holds that this alone does not give rise to an admissible contention. The Petitioner must also explain with specificity, particular safety or legal reasons why moving a specific requirement from the license to a licensee-controlled document would be of safety significance, i.e., why it is material under 10 C.F.R. § 2.309(f)(1)(iv).

The scope of the hearing opportunity is limited to challenging the proposed license amendments or any health, safety, or environmental issues fairly raised by them. Contentions that attack provisions of the current license that are not being changed and that are not fairly related to the license amendment request are outside the scope and inadmissible under 10 C.F.R. § 2.309(f)(1)(iii).

The applicant’s motion for summary disposition of Contention 4 is granted because there exists no genuine dispute of material fact concerning Contention 4, and the applicant is entitled to judgment as a matter of law. The standard governing motions for summary disposition establishes a two-part test: first, the Board must determine if any material facts remain genuinely in dispute; and second, if no such disputes remain, the Board must determine if the movant’s legal position is correct. The proponent of the motion for summary disposition bears the burden of establishing that no facts remain in dispute, even if the motion is unopposed.

Summary disposition is an appropriate vehicle to resolve a purely legal dispute. To challenge an application, a petitioner must point with support to an asserted deficiency that renders the Severe Accident Mitigation Alternatives (SAMA) analysis unreasonable under the National Environmental Policy Act.

Practically speaking, a SAMA analysis requires a baseline Probabilistic Risk Assessment (PRA) for each plant and a set of plant or operational changes (i.e., mitigation alternatives) that could reduce the frequency or consequences (or both) of a severe accident sequence or set of sequences. The cost of implementing the mitigation alternative is then compared to the “monetized” value of the benefit received in terms of risk averted.
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

G While NEPA requires that the NRC take a “hard look” at SAMA analyses, we have found no legal basis for the suggestion that this “hard look” includes some sort of independent validation of the computer codes used to generate source terms within SAMA analyses.

H The Commission’s NEPA jurisprudence explicitly provides that an analysis of mitigation alternatives within an ER or an EIS need not present a worst-case analysis.

I There is no requirement that applicants use NUREG-1465 source terms in their SAMA analysis.

J Differences between source terms calculated from MAAP4 or calculated in NUREG-1465 are simply not relevant to whether the applicant’s SAMA analysis was conducted in a reasonable manner.

K Intervenors have not put forward a credible argument that use of the MAAP code “renders[s] the SAMA analysis altogether unreasonable under NEPA,” as required by the Commission.

LBP-12-27 FIRSTENERGY NUCLEAR OPERATING COMPANY (Davis-Besse Nuclear Power Station, Unit 1), Docket No. 50-346-LR (ASLBP No. 11-907-01-LR-BD01); LICENSE RENEWAL; December 28, 2012; MEMORANDUM AND ORDER (Denying Motions to Admit, to Amend, and to Supplement Proposed Contention 5)

A Section 2.309(f)(1) of 10 C.F.R. provides the general requirements for admissibility for all contentions. Specifically, a contention must provide (1) a specific statement of the legal or factual issue sought to be raised; (2) a brief explanation of its basis; (3) a concise statement of the alleged facts or expert opinions, including references to specific sources and documents, that support the petitioner’s position and upon which the petitioner intends to rely at hearing; and (4) sufficient information demonstrating that a genuine dispute exists with regard to a material issue of law or fact, including references to specific portions of the application that the petitioner disputes, or in the case when the application is alleged to be deficient, the identification of such deficiencies and supporting reasons for this belief. In addition, the petitioner must demonstrate that the issue raised in the contention is both “within the scope of the proceeding” and “material to the findings the NRC must make to support the action that is involved in the proceeding.”

B The strict contention rule is designed to avoid resource-intensive hearings where petitioners have not provided sufficient support for their technical claims, and do not demonstrate a potential to meaningfully participate and inform a hearing.

C If a contention is submitted after the initial filing period for receipt of petitions to intervene, Intervenors must satisfy section 2.309(f)(2). To file an admissible contention under section 2.309(f)(2), with leave of the Board, Intervenors must show that: “(i) The information upon which the amended or new contention is based was not previously available; (ii) The information upon which the amended or new contention is based is materially different than information previously available; and (iii) The amended or new contention has been submitted in a timely fashion based on the availability of the subsequent information.”

D A contention that does not meet the timeliness requirements of 10 C.F.R. § 2.309(f)(2)(i)-(iii) might be admissible as a non timely contention under 10 C.F.R. § 2.309(c). Section 2.309(c) sets out an eight-factor balancing test to determine whether the non timely contention should be admitted. Of the eight factors, the first factor — good cause for the failure to file on time — is afforded the most weight. The burden is on the Intervenor to demonstrate that a balancing of the factors weighs in favor of granting the petition.

E NRC regulations make clear that a motion must be rejected if it does not include a certification by the attorney or representative of the moving party that the movant has made a sincere effort to contact other parties in the proceeding and resolve the issue(s) raised in the motion, and that the movant’s efforts to resolve the issue(s) have been unsuccessful.

F Intervenors’ second Motion to Amend highlights the differences between the February Root Cause Report and the Shield Building AMP. There is no showing as to the significance of any of the “differences” highlighted. Intervenors’ challenge to the AMP must consist of more than allegations that the AMP is deficient. Intervenors must point to specific ways the AMP is inadequate or wrong.

G Asking questions and seeking additional information is an essential part of the NRC’s licensing process, and it is clear that such questioning does not automatically give rise to an admissible contention.

H Intervenors need not prove their case at the contention admissibility stage. However, a petitioner must present sufficient information to show a genuine dispute and reasonably indicating that a further inquiry is appropriate.
DIGESTS

ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

J Where a contention alleges the omission of particular information or an issue from an application, and the information is later supplied by the applicant the contention is moot.

K The Commission has made abundantly clear that contentions based on pure speculation are not admissible.

LBP-13-1 EXELON GENERATION COMPANY, LLC (Limerick Generating Station, Units 1 and 2), Docket Nos. 50-352-LR, 50-353-LR (ASLBP No. 12-916-04-LR-BD01); LICENSE RENEWAL; February 6, 2013; ORDER (Denying Petition for Waiver of 10 C.F.R. § 51.53(c)(3)(ii)(L) and Referring This Decision to the Commission)

A In this proceeding under 10 C.F.R. Part 54 regarding the application of Exelon Generation Co., LLC, to renew the operating licenses for Limerick Generating Station, Units 1 and 2, the Licensing Board denied petitioner Natural Resources Defense Council’s (NRDC’s) petition for waiver of 10 C.F.R. § 51.53(c)(3)(ii)(L), but referred the ruling to the Commission pursuant to 10 C.F.R. § 2.323(f)(1), as it related to a novel issue of law.

B Generally, NRC regulations may not be challenged in any NRC adjudicatory proceeding. However, a petitioner that believes a regulation should not be applied in a particular proceeding may seek a waiver of that regulation pursuant to 10 C.F.R. § 2.335(b). Section 2.335(b) states: “The sole ground for petition of waiver or exception is that special circumstances with respect to the subject matter of the particular proceeding are such that the application of the rule or regulation (or a provision of it) would not serve the purposes for which the rule or regulation was adopted.”

C The Commission has elaborated on this standard in its case law, establishing a more arduous four-part test for waiver petitions. The Commission stated in its Millstone decision that for a waiver to be granted, a petitioner must demonstrate the following: “(i) the rule’s strict application would not serve the purposes for which it was adopted; (ii) the movant has alleged special circumstances that were not considered, either explicitly or by necessary implication, in the rulemaking proceeding leading to the rule sought to be waived; (iii) those circumstances are unique to the facility rather than common to a large class of facilities; and (iv) a waiver of the regulation is necessary to reach a significant safety problem.” Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Units 2 and 3), CLI-05-24, 62 NRC 551, 559-60 (2005). The Commission made clear that “all four factors must be met” for a waiver to be granted.

D The role of the Board when a request for a waiver is filed is limited to determining whether the petitioner has made a prima facie showing that it has satisfied 10 C.F.R. § 2.335(b). If not, the Board “may not further consider the matter.” Id. § 2.335(c). However, where the petitioner has successfully made such a prima facie showing, the Board “shall, before ruling on the petition, certify the matter directly to the Commission,” and the Commission shall determine whether to grant or deny the waiver request. Id. § 2.335(d).

E It is clear to us that the Millstone test establishes an appreciably higher burden for would-be waiver seekers than does 10 C.F.R. § 2.335(b). Indeed, on its face, section 2.335(b) appears to only require a petitioner to satisfy the first two prongs of the Millstone test. In other words, section 2.335(b) does not require petitioners to demonstrate that their complaint is “unique” to the facility in question or that their complaint reflects a “significant safety issue.”

F To determine whether a petitioner has demonstrated that application of a regulation “would not serve the purposes for which it was adopted,” a board must first determine the purpose of rule or regulation for which waiver is sought. 10 C.F.R. § 2.335(b).

G The language of 10 C.F.R. § 51.53(c)(3)(ii)(L) makes its purpose quite clear. It states, “If the staff has not previously considered severe accident mitigation alternatives for the applicant’s plant , , , , a consideration of alternatives to mitigate severe accidents must be provided.” The clear implication of this language is that, once the Staff has considered severe accident mitigation alternatives for the applicant’s plant, no further consideration of alternatives to mitigate severe accidents is needed. Indeed, subsection (L) evidences a Commission determination that, in effect, one SAMA analysis is enough. Once an applicant has performed a SAMA analysis, even if it was performed almost 25 years ago, the applicant does not need to perform another, regardless of whether new SAMA candidates have been discovered in the interim.

H This plain-meaning reading of 10 C.F.R. § 51.53(c)(3)(ii)(L) is bolstered by looking to the Statement of Considerations accompanying the Commission’s final rule adopting subsection (L). The Commission stated, “NRC staff considerations of severe accident mitigation alternatives have already been completed and included in an EIS or supplemental EIS for Limerick, Comanche Peak, and Watts Bar. Therefore, severe accident mitigation alternatives need not be reconsidered for these plants for license renewal.” It is
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

noteworthy that the Commission did not say that those severe accident mitigation alternatives considered
in the previous analysis need not be reconsidered. Rather, the Commission made a general statement that
mitigation alternatives, as a class of items, need not be reconsidered at license renewal. As such, we find
that the purpose of subsection (L) is to exempt those plants that have already performed SAMA analyses
from considering severe accident mitigation alternatives at license renewal.

I If the purpose of 10 C.F.R. § 51.53(c)(3)(ii)(L) is simply to grant to a set of plants an exemption from
the otherwise applicable requirement to consider severe accident mitigation alternatives at license renewal,
then that purpose will always be met if no further analysis is required or submitted by the applicant.
Accordingly, it is unclear how any petitioner could ever demonstrate that the purpose of subsection (L)
is frustrated by the application of subsection (L). Even if a petitioner could demonstrate that there exists
a group of cost-effective SAMA candidates that would greatly reduce the impacts of severe accidents
and that have not been considered in the previous analysis, that petitioner could not successfully seek
a waiver of subsection (L), because the purpose of subsection (L) — to grant the plant an exemption
from considering any SAMA candidates at license renewal — is not frustrated. Given its clear purpose,
subsection (L) becomes, in effect, unwaivable.

J When it enacted 10 C.F.R. § 51.53(c)(3)(ii)(L) the Commission understood that technology would
change, and that new SAMA candidates could emerge over time. However, the possibility that new
SAMA candidates may become available cannot be the basis for a successful waiver petition, because the
Commission knew that SAMA technology would change, but was confident that processes, other than the
SAMA analysis process, would adequately address any such developments.

LBP-13-2 SOUTHERN CALIFORNIA EDISON COMPANY (San Onofre Nuclear Generating Station, Units 2
and 3), Docket Nos. 50-361-CAL, 50-362-CAL (ASLBP No. 13-924-01-CAL-BD01); CONFIRMATORY
ACTION LETTER; February 8, 2013; ORDER (Denying SCE’s Motion for Sanctions Against Friends of
the Earth for Violating the Protective Order, but Imposing an Enhanced Document-Review Requirement)

A The Board denies a motion seeking sanctions against Petitioner for violating the governing Protective
Order and Non-Disclosure Agreement, but imposes a document-review requirement upon Petitioner in
light of its misconduct and to enhance future compliance with the proceeding’s Protective Order.

B The regulatory authority empowering a Licensing Board to impose sanctions is found in 10 C.F.R.
§§ 2.314(c) and 2.319.

C In determining whether to impose a sanction, and in determining what sanction is appropriate, a
Licensing Board must consider the totality of circumstances in accordance with the following multifactor
sanction test announced by the Commission: “In selecting a sanction, boards should consider [1] the
relative importance of the unmet obligation, [2] its potential for harm to other parties or the orderly conduct
of the proceeding, [3] whether its occurrence is an isolated incident or a part of a pattern of behavior, [4] the
importance of the safety or environmental concerns raised by the party, and [5] all of the circumstances.”

D “Boards should attempt to tailor sanctions to mitigate the harm caused by the failure of a party to
fulfill its obligations and bring about improved future compliance.” Id.

E Although Petitioner’s inadvertent publication of protective information was a serious offense that
exposed the movant to potential economic harm and undermined the integrity of this adjudicative
proceeding, the significance of Petitioner’s misconduct is alleviated to some degree by the immediate
corrective action taken by Petitioner.

F The harm factor of the sanction test has two components, requiring the Licensing Board to consider
the potential harm to the other parties and the potential harm to the orderly conduct of the proceeding.

G When considering whether a disclosure of proprietary information was an isolated incident or part
of a pattern of behavior, the Licensing Board may consider, inter alia, the circumstances underlying the
disclosure, the corrective action taken, and Petitioner’s representation that no disclosure will occur in the
future.

H An important health and safety issue referred to a Licensing Board by the Commission satisfies the
importance factor of the multifactor sanction test.

LBP-13-3 CHARLISSA C. SMITH (Denial of Senior Reactor Operator License), Docket No. 55-23694-SP
(ALSLBP No. 13-925-01-SP-BD01); SPECIAL PROCEEDING; February 19, 2013; DECISION (Granting
Demand for Hearing)

A An applicant for a Senior Reactor Operator (SRO) license filed a demand for hearing pursuant to 10
C.F.R. § 2.103(b)(2) after she was denied a license. The Board grants the applicant’s demand for hearing.
Section 2.103(b)(2) of 10 C.F.R. grants SRO license applicants who have been denied a license "the right ... to demand a hearing within twenty (20) days from the date of the [denial notice]." By contrast, the requirement of 10 C.F.R. § 2.309(f)(1) to file contentions, and thus the requirement to satisfy the contention admissibility requirements, applies only to "hearing requests" and "petitions to intervene.

A person authorized to make a "demand" is generally understood to have the right to the matter that is the subject of the demand. One authorized to make a "request," by contrast, is merely given permission to ask for something, not to demand it.

The usual rule of regulatory interpretation is that "different language is intended to mean different things." Sequoyah Fuels Corp. and General Atomics (Gore, Oklahoma Site Decontamination and Decommissioning Funding), LBP-94-5, 39 NRC 54, 72 (1994) (citing United States v. Stauffer Chemical Co., 684 F.2d 1174, 1186 (6th Cir. 1982), aff’d, 464 U.S. 165 (1984)). The application of this precept may be suspended if the purpose or regulatory history behind the language shows that no difference was intended.

A hearing "demand" under 10 C.F.R. § 2.103(b)(2) is not the same as a "hearing request" under 10 C.F.R. § 2.309(f)(1). Therefore, a hearing demand under 10 C.F.R. § 2.103(b)(2) need not meet the admissibility standards of section 2.309(f)(1).

"Equivalent words have equivalent meaning when repeated in the same statute." Cohen v. de la Cruz, 523 U.S. 213, 220 (1998) (citing Ratzlaf v. United States, 510 U.S. 135, 143 (1994)).

The rules of interpretation applicable to statutes are equally germane in determining a regulation’s meaning. Cleveland Electric Illuminating Co. (Perry Nuclear Power Plant, Unit 1), LBP-95-17, 42 NRC 137, 143 (1995), rev’d on other grounds, CLI-96-13, 44 NRC 315 (1996).

An applicant denied an SRO license has the right to demand a hearing, rather than being required to negotiate the contention admissibility requirements and a possible appeal.

An applicant for an SRO license is entitled to take an NRC-issued denial letter at face value, including its instructions and references to applicable regulations.

The NRC Staff cannot saddle an applicant with the consequences of its having improvidently furnished her a denial letter that contained apparent boilerplate that was incomplete and perforce misleading. This does not accord with concepts of fundamental fairness.

Section 2.103(b)(2) of 10 C.F.R. requires the appropriate office director to "inform" the SRO applicant of the right to demand a hearing. If the applicant indeed must comply with section 2.309(f)(1), but the office director failed to comply with his responsibility to "inform" the applicant of such a requirement, then the agency cannot take advantage of the applicant’s ignorance of information the agency itself was obligated to provide.

The Commission justifiably expects that all applicable provisions of the Rules of Practice will be observed in adjudicatory submissions. It is reasonable to assume, however, that it also expects the Staff to turn square corners with those with whom it deals, including applicants for SRO licenses.

LBP-13-4 PROGRESS ENERGY FLORIDA, INC. (Levy County Nuclear Power Plant, Units 1 and 2), Docket Nos. 52-029-COL, 52-030-COL (ASLB P No. 69-876-04-COL-BD01); COMBINED LICENSE; March 26, 2013; PARTIAL INITIAL DECISION (Ruling on Contention 4A)

A In this Partial Initial Decision concerning an application submitted by Progress Energy Florida, Inc. (PEF) for combined licenses (COLs) to construct and operate two AP1000 nuclear reactors in Levy County, Florida, the Board concludes that the NRC’s analysis, in its Final Environmental Impact Statement (FEIS), of issues relating to dewatering associated with construction and operation of the proposed plants was adequate and satisfied the National Environmental Policy Act (NEPA) and 10 C.F.R. Part 51.

B Section 102 of NEPA “directs that, to the fullest extent possible . . . all agencies of the Federal Government shall . . . include in every . . . major Federal action significantly affecting the quality of the human environment, a detailed statement by the responsible official on . . . (i) the environmental impact of the proposed action.” The issuance of a COL is such a “major federal action.”

C The FEIS must review and consider all significant environmental impacts, whether direct, indirect, cumulative, onsite, or offsite, that are a reasonably foreseeable consequence of the proposed action.
The legal adequacy of an FEIS is assessed under the “rule of reason.” The Commission has stated, “NEPA should be construed in the light of reason if it is not to demand virtually infinite study and resources.” The Commission added that an EIS is not “intended to be a research document” and does not require the NRC to use the absolutely “best scientific methodology” available. The Commission stated “while there will always be more data that could be gathered [agencies] must have some discretion to draw the line and move forward with decisionmaking.”

We acknowledge that NRC could have gathered additional data, and could have used different methodologies in conducting the FEIS. But the appropriate inquiry under NEPA is not whether there are alternative models that NRC could have used, or whether the analysis could have been refined, or improved by gathering additional data, but is whether the NRC’s chosen methodology is reasonable.

NEPA requires that NRC exercise its independent judgment in identifying and assessing the significant and reasonably foreseeable impacts of a proposed licensing action. The duty to exercise independent judgment does not, however, mean that NRC must reinvent every wheel or duplicate professional environmental studies and data that have already been performed or gathered by competent state or local agencies.

The FEIS shows that NRC gathered, assessed, and grappled with a very large amount of environmental information and that the agency satisfied its legal obligation under NEPA to exercise its independent judgment in the identification, assessment, and quantification of the reasonably foreseeable environmental impacts of the proposed LNP.

NEPA requires each EIS to include a detailed discussion of mitigation, i.e., measures that might mitigate the adverse environmental consequences of the proposed action.

NEPA does not require that “a complete mitigation plan be actually formulated and adopted” before the agency makes its decision. All that is required is that “mitigation be discussed in sufficient detail to ensure that environmental consequences have been fairly evaluated.”

As a general rule, NEPA does not mandate that the identified mitigation measures be implemented. This follows logically from the basic precept that NEPA does not mandate particular results.

The fact that, as a general rule, NEPA does not require the implementation of mitigation measures to avert adverse environmental impacts, does not mean that NEPA or NRC are neutral on the subject of environmental protection, or that NRC is powerless to act. NRC regulations, such as 10 C.F.R. § 50.36(b) and 10 C.F.R. § 51.107(a) (3), clearly authorize the agency to impose environmental conditions in a license to prevent or mitigate adverse environmental impacts that might otherwise be caused by the construction or operation of a nuclear power plant. Environmental protection is a central part of NRC’s core mission and is in its mission statement.

NRC may rely on competent and professionally developed data and studies performed by the applicant or by appropriate federal, state, and local governmental entities, provided that NRC exercises its own independent judgment with regard to the ultimate conclusions about the environmental impacts of the project.

Absent information to the contrary, NRC may properly assume that an applicant or licensee will comply with concrete and enforceable conditions and requirements imposed by statutes, regulations, licenses, or permits issued by competent federal, state, or local governmental entities.

As a general rule, NEPA does not require that mitigation be implemented. But if, as here, an FEIS relies on monitoring and mitigation as a necessary basis for concluding that the environmental impacts of issuing a license will be SMALL, then the NRC must have reasonable assurance that the monitoring and mitigation will actually be implemented and successful.

Reasonable assurance that monitoring and mitigation measures will be successful does not always require that these measures be incorporated as a condition in the NRC license. Here, given that legally binding monitoring and mitigation measures have been imposed via a thorough certificate of compliance issued by the appropriate state and local agencies, this Board has reasonable assurance that these measures will be implemented and that these agencies will actively monitor and enforce appropriate compliance with these environmental monitoring and mitigation measures.

LBP-13-5 CHARLISSA C. SMITH (Denial of Senior Reactor Operator License), Docket No. 55-23694-SP (ASLB No. 13-925-01-SP-BD01); SPECIAL PROCEEDING; April 24, 2013; MEMORANDUM AND ORDER (Granting Motion to Compel Disclosure)

An applicant for a Senior Reactor Operator (SRO) license filed a demand for hearing pursuant to 10 C.F.R. § 2.103(b)(2) after she was denied a license. The Board granted the applicant’s demand for hearing.
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

LBP-13-3, 77 NRC 82 (2013). Subsequently, the applicant moved to compel the NRC Staff to produce documents that had been withheld under a claim of deliberative process privilege. The Board granted the motion to compel.

B

NRC regulations mandate that, in a Subpart L proceeding, the Staff disclose or provide documents that support the Staff’s review of the application or proposed action, together with “[a] list of all otherwise-discoverable documents for which a claim of protected or privileged status is being made.” 10 C.F.R. § 2.336(b)(3), (5). Among the categories of privileged documents, and the one at issue here, are “[i]nteragency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the Commission.” 10 C.F.R. § 2.390(a)(5). This is similar to Exemption 5 under the Freedom of Information Act (FOIA). The Board may therefore employ case law interpreting FOIA Exemption 5 when determining whether the deliberative process privilege applies in this NRC proceeding.

C

Under FOIA, an agency may avoid disclosing documents only if it proves that the documents fall within one of the nine exemptions. Otherwise, the documents are presumed to be available for public inspection. FOIA’s purpose is to encourage disclosure, and, to that end, its exemptions are to be interpreted narrowly. The government has the burden of proving that a requested document falls within one of FOIA’s exemptions.

D

The FOIA exemption for inter- or intra-agency materials incorporates the deliberative process privilege, which protects documents that are prepared to assist an agency, board, or official to arrive at a decision.

E

To qualify for the deliberative process privilege, “a document must be both (1) ‘predecisional’ or ‘antecedent to the adoption of agency policy’ and (2) ‘deliberative,’ meaning ‘it must actually be related to the process by which policies are formulated.’” National Wildlife Federation v. U.S. Forest Service, 861 F.2d 1114, 1117 (9th Cir. 1988) (quoting Jordan v. U.S. Department of Justice, 591 F.2d 753, 774 (D.C. Cir. 1978) (en banc)).

F

The privilege must be asserted by an individual who holds a sufficiently senior position such that he or she has control over the requested information and possesses a balanced perspective that enables him or her to discern the nature of the material at issue.

G

The party invoking the deliberative process privilege bears the burden of explaining with particularity how and why disclosure of the documents’ substance would harm an identified deliberative function.

H

“[C]onclusory assertions of privilege will not suffice to carry the Government’s burden of proof in defending FOIA cases.” Coastal States Gas Corp. v. U.S. Department of Energy, 617 F.2d 854, 861 (D.C. Cir. 1980). Thus, “vague, general and conclusory statements — all purporting to apply to many documents but not connected to any particular document — fail to meet the requirement that defendant supply the court with precise and certain reasons for maintaining the confidentiality of the requested documents.” Pacific Gas and Electric Co. v. United States, 70 Fed. Cl. 128, 140 (2006) (quoting Walsky Construction Co. v. United States, 20 Cl. Ct. 317, 320 (1990) (internal quotation marks omitted)).

I

An agency waives the deliberative process privilege for a document when it discloses the same document or one containing equivalent text.

J

Privilege logs that contain only cursory statements are inadequate to permit a court to decide whether the privilege was properly claimed.

K

A claim of deliberative process privilege, even when properly established, is not absolute. Thus, “[s]trong competing interests must be weighed against the government’s interest in nondisclosure. Foremost is the interest of the litigants, and ultimately of society, in accurate judicial fact finding.” In re Franklin National Bank Securities Litigation, 478 F. Supp. 577, 582 (E.D.N.Y. 1979).

L

The factors the Board should consider in balancing the need for disclosure against the agency’s interest in confidentiality include: (i) the relevance of the evidence sought to be protected; (ii) the availability of other evidence; (iii) the seriousness of the litigation and the issues involved; (iv) the role of the government in the litigation; and (v) the possibility of future timidity by government employees who will be forced to recognize that their secrets are violable.

LBP-13-6

CROW BUTTE RESOURCES, INC. (Marsland Expansion Area), Docket No. 40-8943-MLA-2 (ASLBP No. 13-926-01-MLA-BD01); MATERIALS LICENSE AMENDMENT; May 10, 2013; MEMORANDUM AND ORDER (Ruling on Intervention Petitions)

A

In this proceeding concerning the application of Crow Butte Resources, Inc. (CJR), for an amendment to the 10 C.F.R. Part 40 source materials license for its existing in situ uranium recovery (ISR) facility near
Crawford, Nebraska, that would authorize CBR to operate a satellite ISR facility, the Marsland Expansion Area (MEA) site, the Licensing Board concludes that while a group of individuals and organizations denominated as the Consolidated Petitioners have failed to demonstrate their standing to intervene in this proceeding, petitioner Oglala Sioux Tribe has both established its standing and proffered two admissible environmental contentions so as to be afforded party status in this proceeding.

For an individual or organization to be deemed a “person whose interest may be affected by the proceeding” under section 189a of the Atomic Energy Act of 1954 (AEA), 42 U.S.C. § 2239(a)(1)(A), so as to have standing “as of right” such that party status can be granted in an agency adjudicatory proceeding, the intervention petition must include a statement of (1) the petitioner’s name, address, and telephone contact information; (2) the nature of the petitioner’s right under the AEA to be made a party; (3) the nature of the petitioner’s interest in the proceeding, whether property, financial, or otherwise; and (4) the possible effect of any decision or order that might be issued in the proceeding on the petitioner’s interest. See 10 C.F.R. § 2.309(d)(1)(i)-(iv). In assessing this information to determine whether a petitioner has established standing, the Commission generally applies contemporaneous judicial standing concepts to section 189a adjudicatory proceedings, inquiring whether the participant has established that (1) it has suffered or faces the genuine threat that it will suffer a distinct and palpable injury that constitutes injury in fact within the zones of interest arguably protected by the governing statutes (e.g., the AEA, the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. § 4321 et seq.); (2) the injury is fairly traceable to the challenged action; and (3) the injury is likely to be redressed by a favorable decision. See, e.g., Yankee Atomic Electric Co. (Yankee Nuclear Power Station), CLI-96-1, 43 NRC 1, 6 (1996) (citing cases).

An organization that asserts it has standing to intervene in its own right, i.e., organizational standing, must establish a discrete institutional injury to the organization’s interests, which must be based on something more than a general environmental or policy interest in the subject matter of the proceeding. See, e.g., International Uranium (USA) Corp. (White Mesa Uranium Mill), CLI-01-21, 54 NRC 247, 252 (2001) (citing cases). Alternatively, an entity may seek to demonstrate its standing to intervene on behalf of its members, i.e., representational standing, by showing it has an individual member who can fulfill all the necessary standing elements and who has authorized the organization to represent his or her interests. See, e.g., Vermont Yankee Nuclear Power Corp. (Vermont Yankee Nuclear Power Station), CLI-00-20, 52 NRC 151, 163 (2000) (citing cases).

In assessing whether a petition meets these standing elements, which a presiding officer must do even if there are no objections to a petitioner’s standing, the board must apply a number of important benchmarks. Initially, “[t]he petitioner bears the burden of providing facts sufficient to establish standing.” PPL Bell Bend, LLC (Bell Bend Nuclear Power Plant), CLI-10-7, 71 NRC 133, 139 (2010). Generally speaking, this burden is met if “the petitioner provides plausible factual allegations that satisfy each element of standing.” U.S. Army Installation Command (Schofield Barracks, Oahu, Hawaii, and Pohakuloa Training Area, Island of Hawaii, Hawaii), LBP-10-4, 71 NRC 216, 229 (2010) (citing Lujan v. Defenders of Wildlife, 504 U.S. 555, 561 (1992)), aff’d, CLI-10-20, 72 NRC 185 (2010). Moreover, in assessing whether a petitioner has demonstrated its standing, a licensing board is to “construe the petition in favor of the petitioner.” Georgia Institute of Technology (Georgia Tech Research Reactor, Atlanta, Georgia), CLI-95-12, 42 NRC 111, 115 (1995). At the same time, however, if a petitioner’s factual claims in support of its standing are contested, untenable, conjectural, or conclusory, a board need not uncritically accept such assertions, but may weigh those informational claims and exercise its judgment about whether the standing element at issue has been satisfied. See Schofield Barracks, LBP-10-4, 71 NRC at 230 & n.14 (citing Bell Bend, CLI-10-7, 71 NRC at 139); Consumers Energy Co. (Palisades Nuclear Plant), CLI-07-18, 65 NRC 399, 410 (2007); Commonwealth Edison Co. (Zion Nuclear Power Station, Units 1 and 2), CLI-00-5, 51 NRC 90, 98 (2000)).

In a materials licensing action, in ascertaining whether a hearing requestor has demonstrated an “injury in fact” so as to have standing, often the initial focus is on whether the activity for which licensed authorization is sought may have any radiological impacts upon the petitioner. At the same time, however, it is not imperative that the potential harm involve physical or bodily injury caused by a radioactive source; nonradiological impacts can be a basis for standing as well. See, e.g., Strata Energy, Inc. (Ross In Situ Uranium Recovery Project), CLI-12-12, 75 NRC 603, 612-13 & n.49 (2012) (upholding standing based on dust impacts from ISR facility trucks using dirt road in front of petitioner’s home).
G In a materials licensing case in which an important factor in determining whether there is a cognizable injury for standing purposes is the actual distance the petitioner or its property is from the source of a radiological or other alleged health or safety impairment, the use of an imprecise and otherwise unexplicated reference to the term “proximity” to describe where the property the petitioner leases to others is situated relative to the applicant’s proposed facility is not particularly helpful to a presiding officer in making an informed standing decision.

H Previous agency case law has acknowledged that in instances when a governmental organization, including a federally recognized Native American tribe, is unable to establish standing because the facility or nuclear material in question does not fall within its jurisdictional boundaries, see 10 C.F.R. § 2.309(d)(2), by reason of such an entity’s interest in protecting individuals and territory that fall within its sovereign guardianship, that entity nonetheless may be accorded standing if its boundaries come within a distance from the nuclear facility or material that otherwise would establish standing for an individual or nongovernmental organization, whether via a proximity presumption or otherwise. See Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 6 and 7), LBP-11-6, 73 NRC 149, 169-70 (2011); Northern States Power Co. (Prairie Island Nuclear Generating Plant, Units 1 and 2), LBP-08-26, 68 NRC 905, 912-14 (2008); Carolina Power & Light Co. (Shearon Harris Nuclear Power Plant), LBP-99-25, 50 NRC 25, 29-31 (1999); see also Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), CLI-98-13, 48 NRC 26, 33 (1998) (holding that, as sovereign body, a Native American tribe maintains a strong interest in its members’ welfare such that its organizational purpose is germane to the interests it seeks to represent in the proceeding).

I A Native American tribe’s statutorily recognized interest in the tribal cultural resources that may still be extant on its recognized aboriginal lands seemingly would provide a cognizable interest for the purpose of establishing its standing. See Crow Butte Resources, Inc. (In Situ Leach Facility, Crawford, Nebraska), CLI-09-9, 69 NRC 331, 337-39 (2009) [hereinafter Crow Butte Renewal].

J Assuming that the tribal interest in cultural resources on established aboriginal lands is sufficient to provide the requisite injury in fact, it cannot be the case that simply because a cultural resources survey conducted at the behest of an applicant finds no artifacts or possible tribal sites, the tribe is deprived of standing to challenge the adequacy of that survey. For standing purposes, the focus is on the nature of the tribal interest in the cultural resources that might still exist on a federally recognized tribe’s aboriginal lands, not the adequacy of the applicant’s survey.

K Longstanding agency precedent makes clear that there is no “contention-based” requirement mandating that a petitioner establish a link between the injury in fact asserted to justify its standing and the particular issues the petitioner wants to litigate in challenging an application. Rather, to have standing, existing case law indicates that a petitioner need only show that a cognizable injury is associated with a proposed licensing action and that granting the relief sought, e.g., denial of the application, will address that injury. See Crow Butte Renewal, CLI-09-9, 69 NRC at 339-41; Yankee Nuclear, CLI-96-1, 43 NRC at 6.

L Standing in each agency proceeding depends on the factual circumstances associated with that case. See PPL Bell Bend LLC (Bell Bend Nuclear Power Plant), CLI-10-7, 71 NRC 133, 138 & n.27 (2010) (citing Crow Butte Renewal, CLI-09-9, 69 NRC at 343).

M Any interest an individual member of a Native American tribe might have in tribal cultural resources does not have same parameters as that of the tribe relative to a proposed site and any artifacts it might contain. Instead, for standing purposes an individual tribal member would need to demonstrate that the site holds some particular importance personally. For example, the individual might demonstrate that some particular activity on the property or specific location on the site, such as a place of worship or burial...
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

ground, has cultural or religious significance for that tribal member as an individual. See Crow Butte Resources, Inc. (North Trend Expansion Project), LBP-08-6, 67 NRC 241, 288-89 (2008) (petitioner asserts standing based on use of ISR expansion area to gather eagle feathers for ceremonial and religious uses), aff’d in part and rev’d in part, CLI-09-12, 69 NRC 535 (2009) [hereinafter Crow Butte N. Trend].

Organizational standing is rooted in the capacity of an organization to show, consistent with the Supreme Court’s decision in Sierra Club v. Morton, 405 U.S. 727 (1972), a discrete injury to its organizational interests. See Powertech (USA), Inc. (Dewey-Burdock In Situ Uranium Recovery Facility), LBP-10-16, 72 NRC 361, 389 (2010).

A purported interest in preventing abusive mining clearly is a generalized interest that will not support organizational standing. See Dewey-Burdock, LBP-10-16, 72 NRC at 389 (ruling organizational interest in protecting “the natural resources of the Black Hills of South Dakota with a focus on groundwater contamination from uranium mining” insufficient to establish organizational standing (quoting Consolidated Request for Hearing and Petition for Leave to Intervene, Powertech (USA), Inc. (Dewey-Burdock In Situ Uranium Recovery Facility), Docket No. 40-0075-MLA (Mar. 8, 2010) at 27)).

Section 2.309(f)(1) of the Commission’s rules of practice specifies the requirements that must be met for a contention to be deemed admissible. Specifically, a contention must provide (1) a specific statement of the legal or factual issue sought to be raised; (2) a brief explanation of its basis; (3) a concise statement for a contention to be deemed admissible. Specifically, a contention must provide (1) a specific statement of the issue raised in the contention is both “within the scope of the proceeding” and “material to the findings the NRC must make to support the action that is involved in the proceeding.” Id. § 2.309(f)(1)(iii), (iv). Failure to comply with any of these requirements is grounds for dismissing a contention. See FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), CLI-12-8, 75 NRC 393, 395-96 (2012).

An adjudication is not the proper forum for challenging applicable statutory requirements or the basic structure of the agency’s regulatory process. See Philadelphia Electric Co. (Peach Bottom Atomic Power Station, Units 2 and 3), ALAB-216, 8 AEC 13, 20, aff’d in part on other grounds, CLI-74-32, 8 AEC 217 (1974). Similarly, a contention that attacks a Commission rule, or which seeks to litigate a matter that is, or clearly is about to become, the subject of a rulemaking, is inadmissible. See 10 C.F.R. § 2.335; Potomac Electric Power Co. (Douglas Point Nuclear Generating Station, Units 1 and 2), ALAB-218, 8 AEC 79, 85, 89 (1974). This includes contentions that advocate stricter requirements than agency rules impose or that otherwise seek to litigate a generic determination established by a Commission rulemaking. See Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-01-6, 53 NRC 138, 159 (2001); Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), LBP-91-1, 37 NRC 29-30 (1993); Public Service Co. of New Hampshire (Seabrook Station, Units 1 and 2), LBP-82-6, 16 NRC 1649, 1656 (1982); see also Yankee Atomic Electric Co. (Yankee Nuclear Power Station), CLI-96-7, 43 NRC 235, 251 (1996); Arizona Public Service Co. (Palo Verde Nuclear Generating Station, Units 1, 2, and 3), LBP-91-19, 33 NRC 397, 410, aff’d in part and rev’d in part on other grounds, CLI-91-12, 34 NRC 149 (1991). By the same token, a contention that simply states the petitioner’s views about what regulatory policy should be does not present a litigable issue. See Peach Bottom, ALAB-216, 8 AEC at 20-21 & n.33.

All proffered contentions must be within the scope of the proceeding as defined by the Commission in its initial hearing notice and directive referring the proceeding to the licensing board. See 10 C.F.R. § 2.309(f)(1)(iii); Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-00-23, 52 NRC 327, 329 (2000); Duke Power Co. (Catawba Nuclear Station, Units 1 and 2), ALAB-825, 22 NRC 785, 790-91 (1985). As a consequence, any contention that falls outside the specified scope of the proceeding must be rejected. See Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-11-11, 74 NRC 427, 435 (2011).

It is the petitioner’s obligation to present the factual allegations and/or expert opinion necessary to support its contention. See 10 C.F.R. § 2.309(f)(1)(vi); USEC Inc. (American Centrifuge Plant), CLI-06-10, 63 NRC 451, 457 (2006). While a board may appropriately view a petitioner’s supporting information
in a light favorable to the petitioner, failure to provide such information regarding a proffered contention requires that the contention be rejected. See Arizona Public Service Co. (Palo Verde Nuclear Generating Station, Units 1, 2, and 3), CLI-91-12, 34 NRC 149, 155 (1991). Neither mere speculation nor bare or conclusory assertions, even by an expert, alleging that a matter should be considered will suffice to allow the admission of a proffered contention. See Fansteel, Inc. (Muskegee, Oklahoma Site), CLI-03-13, 58 NRC 195, 203 (2003). If a petitioner neglects to provide the requisite support for its contentions, it is not within a board’s power to make assumptions or draw inferences that favor the petitioner, nor may the board supply information that is lacking. See Crow Butte N. Trend, CLI-09-12, 69 NRC at 553; Palo Verde, CLI-91-12, 34 NRC at 155. Likewise, simply attaching material or documents as a basis for a contention, without setting forth an explanation of that information’s significance, is inadequate to support the admission of the contention. See Fansteel, CLI-03-13, 58 NRC at 204-05.

All properly formulated contentions must focus on the license application in question, challenging either specific portions of or alleged omissions from the application (including the safety analysis report/technical report and the environmental report) so as to establish that a genuine dispute exists with the applicant on a material issue of law or fact. See 10 C.F.R. § 2.309(f)(1)(vi). Any contention that fails directly to controvert the application or that mistakenly asserts the application does not address a relevant issue will be dismissed. See Crow Butte N. Trend, CLI-09-12, 69 NRC at 557; Am. Centrifuge Plant, CLI-06-10, 63 NRC at 462-63.

Claim that second tribal cultural resources survey corrected any deficiencies in applicant’s original survey has the hallmarks of an attempt to obtain a board “merits” determination regarding the contention, something the Commission has indicated is inappropriate at the contention admissibility stage. See Diablo Canyon, CLI-11-11, 74 NRC at 443 (“for the purposes of contention admissibility, we do not consider the merits of [a petitioner’s] arguments”).

The Commission has made clear that section 2.309(f)(1)(vi) “does not call upon the intervenor to make its case at this stage of the proceeding, but rather to indicate what facts or expert opinions, be it one fact or opinion or many, of which it is aware at that point in time which provide the basis for its contention.” Rules of Practice for Domestic Licensing Proceedings — Procedural Changes in the Hearing Process, 54 Fed. Reg. 33,168, 33,170 (Aug. 11, 1989).

Carrying out the National Historic Preservation Act § 106 consultation requirement, as implemented by the Staff’s NUREG standard review plan is merely a guidance document and thus is not legally binding. See, e.g., Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), CLI-01-22, 54 NRC 255, 264 & n.37 (2001) (citing cases). NUREG provisions nonetheless are informative to the degree they support the commonsensical approach that technical analyses and conclusions should be presented in a scientifically defensible manner. This is an obvious and reasonable threshold when documenting technical arguments associated with a complex scientific evaluation. In addition, guidance documents, while not binding, “describe an approach to compliance with [NRC] rules that is acceptable to the NRC,” and so can be informative for that reason. AREVA Enrichment Services, LLC (Eagle Rock Enrichment Facility), CLI-11-4, 74 NRC 1, 8 n.35 (2011).

The Staff’s NUREG standard review plan is merely a guidance document and thus is not legally binding. See, e.g., Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), CLI-01-22, 54 NRC 255, 264 & n.37 (2001) (citing cases). This is an obvious and reasonable threshold when documenting technical arguments associated with a complex scientific evaluation. In addition, guidance documents, while not binding, “describe an approach to compliance with [NRC] rules that is acceptable to the NRC,” and so can be informative for that reason. AREVA Enrichment Services, LLC (Eagle Rock Enrichment Facility), CLI-11-4, 74 NRC 1, 8 n.35 (2011).

The purpose for the requirement in section 2.309(f)(1)(vi) that petitioners reference specific sections of an application appears to be twofold: (1) to demonstrate to the presiding officer that the petitioner’s dispute with the applicant is indeed genuine and thereby assist the presiding officer in determining the scope of a potential evidentiary hearing; and (2) to put the applicant on notice regarding what portions of the application it needs to defend. Cf. International Uranium (USA) Corp. (Receipt of Material from Tonawanda, New York), LBP-98-21, 48 NRC 137, 142 n.7 (1998) (“A simple reference to a large number of documents is not enough to put the parties on notice as to the basis for intervention; rather, a petitioner must clearly identify and summarize the facts being relied on in the specific portions of the documents cited.”)

Requiring that a petitioner point to specific portions of the application allows (1) the board to determine what issues it must probe at an evidentiary hearing; (2) the applicant to determine what areas...
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

of its application it must defend; and (3) the Staff to determine what issues it may need to consider and address more carefully in its EIS or safety evaluation report. However, a petitioner can, in certain limited circumstances, put the other participants and the board on adequate notice of what sections of the application are being challenged even when the petitioner does not explicitly cite those sections in its petition.

AA The recognized precept that a board may not consider the merits of a contention at the admissibility stage of the proceeding does not excuse a petitioner from providing a sound basis for its contention in its petition or in an expert affidavit or other supporting information that specifically corroborates the contested issues framed by the contention. See Luminant Generation Co., LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), CLI-11-9, 74 NRC 233, 244 (2011).

BB Given the current structure of the agency’s adjudicatory process, petitioner’s claim that NEPA-related challenges to a proposed licensing action should not be filed until the agency’s NEPA analysis is completed clearly is not litigable in this proceeding. See Dewey-Burdock, LBP-10-16, 72 NRC at 435-38. This contention is a challenge to the agency’s rules, specifically 10 C.F.R. § 2.309(3)(2), that, in the absence of a section 2.335 waiver request, a board cannot consider.

CC Any NEPA-based challenge to the efficacy of, or the Staff’s reliance on, a state water usage permitting process relative to the Staff’s environmental review, must await the Staff’s initial environmental review document. Dewey-Burdock, LBP-10-16, 72 NRC at 438-40; see Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), LBP-13-4, 77 NRC 107, 175 n.77 (2013).

DD A contention challenging the adequacy/propriety of a Staff determination to prepare an environmental assessment (EA) in lieu of a supplemental EIS would need to await the issuance of the draft EA as well. See Carolina Power & Light Co. (Shearon Harris Nuclear Power Plant), LBP-00-19, 52 NRC 85, 93-98 (2000) (admitting post-EA submitted contention challenging Staff’s determination to issue EA rather than EIS).

LBP-13-7 SOUTHERN CALIFORNIA EDISON COMPANY (San Onofre Nuclear Generating Station, Units 2 and 3), Docket Nos. 50-361-CAL, 50-362-CAL (ASLBP No. 13-924-01-CAL-BD01); CONFIRMATORY ACTION LETTER; May 13, 2013; MEMORANDUM AND ORDER (Resolving Issues Referred by the Commission in CLI-12-20)

A The Board resolves two issues referred by the Commission in CLI-12-20, holding that (1) the Confirmatory Action Letter (CAL) process in this case constitutes a de facto license amendment proceeding that is subject to a hearing opportunity under section 189a of the Atomic Energy Act, and (2) the resolution of the first issue grants Petitioner all the relief it seeks in its contention, thus mooting the contention and terminating the proceeding before the Board.

B The NRC Enforcement Manual (rev. 7, Oct. 1, 2010) at 3-30, describes CALs as “flexible and valuable tools available to the staff to resolve licensee issues in a timely and efficient manner, e.g., when an order is warranted to address a specific issue, a CAL is a suitable instrument to confirm initial, agreed upon, short-term actions covering the interval period prior to the actual issuance of the order.”

C The CAL process, as described in the NRC Enforcement Manual and as explained by the NRC Staff, involves (1) the identification of a significant concern regarding health and safety, safeguards, or the environment; (2) the NRC Staff’s issuance of a specific CAL; (3) a licensee responding by taking action and/or providing information as prescribed in the CAL; and (4) when the circumstances that prompted the NRC to issue the CAL have been addressed, the closing out of the CAL.

D The NRC Enforcement Manual describes the process for closing out a CAL as follows:

3.5.7 Closing Out CALs

A. A CAL may or may not require follow-up inspection to verify completion of the specified licensee actions. Whether the staff believes that an inspection is necessary to close a CAL will be determined on a case-by-case basis and will depend on the circumstances of the case.

B. The issuing office (i.e., region, NRR, NMSS, FSME, NRO or NSIR) will issue documentation formally closing out the CAL.

C. Correspondence closing out a CAL should be sent to the same person/address as the CAL; however, verbal notification, in advance of written correspondence, may be sufficient to permit plant restart or resumption of affected licensee activities.
E  The CAL process can be a lengthy, complex, and evolving procedure. To determine whether that process constitutes a de facto license amendment proceeding, a Licensing Board must look beyond the four corners of the confirmatory action letter itself and consider the entire CAL process, including the documents generated incident to that process.

F  Licensing Boards are not empowered “to supervise or direct NRC Staff regulatory reviews.” Duke Energy Corp. ( Catawba Nuclear Station, Units 1 and 2), CLI-04-6, 59 NRC 62, 74 (2004).

G  “[T]he substance of the NRC action that determines entitlement to a section 189a hearing, not the particular label the NRC chooses to assign to its action.” Citizens Awareness Network, Inc. v. NRC, 59 F.3d 284, 295 (1st Cir. 1995).

H  There can be no actual license amendment until (and unless) it is issued by the NRC Staff. See 10 C.F.R. § 50.92.

I  The hearing provision in section 189a of the AEA is to serve its intended purpose, the parties in interest should be afforded a meaningful opportunity to request a hearing before the NRC Staff takes final action that could result in authorizing a licensee to operate in a manner that is beyond the ambit of its existing license. Cf. Citizens Awareness Network, Inc., 59 F.3d at 294-95 (“[I]f section 189a is to serve its intended purpose, surely it contemplates that parties in interest be afforded a meaningful opportunity to request a hearing before the Commission retroactively reinvents the terms of an extant license by voiding its implicit limitations on the licensee’s conduct.”).

K  A party’s policy arguments that are advanced during the adjudicatory process before a Licensing Board cannot trump directives issued by the Commission.

L  It is imperative that the terms of a reactor operating license be clear and unambiguous, and also that a licensee scrupulously adhere to those terms, because section 101 of the AEA makes it “unlawful . . . for any person within the United States to . . . use . . . any utilization . . . facility except under and in accordance with a license issued by the Commission.” 42 U.S.C. § 2131.

M  Section 182a of the AEA addresses what must be included in a reactor operating license. It states that such licenses must include “technical specifications” that include, inter alia, “the specific characteristics of the facility, and such other information as the Commission may, by rule or regulation, deem necessary in order to enable it to find that the utilization . . . of special nuclear material . . . will provide adequate protection to the health and safety of the public.” 42 U.S.C. § 2232(a).

N  “The AEA, however, leaves it up to the Commission to determine, and prescribe by rule or regulation, what additional information should be included in technical specifications to ensure public health and safety and the common defense and security.” Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Units 2 and 3), CLI-01-24, 54 NRC 349, 351 (2001).

O  The Commission is empowered to issue an order amending any license as it deems necessary to “effectuate the provisions of [the AEA]” (42 U.S.C. § 2233) — that is, to “promote the common defense and security or to protect health or to minimize danger to life or property.” 42 U.S.C. § 2201; see also 42 U.S.C. § 2237.

P  The Commission “may at any time . . . before the expiration of the license, require further written statements [from the licensee] to determine whether . . . a license should be modified.” 42 U.S.C. § 2232(a).

Q  Section 189a of the AEA states that “[i]n any proceeding under [the AEA], for the . . . amending of any license . . . the Commission shall grant a hearing upon the request of any person whose interest may be affected by the proceeding, and shall admit any such person as a party to such proceeding.” 42 U.S.C. § 2239(a)(1)(A).

R  Sections 50.90 to 50.92 of 10 C.F.R. provide the applicable process when a licensee wishes to request a license amendment. Specifically, section 50.90 authorizes applications to amend existing operating licenses; section 50.91 provides for notice and comment regarding license amendment applications, as well as consultation with the state in which the facility is located; and section 50.92 provides the standard considered by the NRC when determining whether to issue an amendment.

S  Section 50.59 establishes standards for a licensee to request a license amendment before it may make “changes in the facility as described in the [updated] final safety analysis report [UFSAR], make changes in the procedures as described in the [UFSAR], and conduct tests or experiments not described in the [UFSAR].” 10 C.F.R. § 50.59(c)(1).
The term "design bases" to which section 50.59(c)(2)(vii) and (viii) refers is defined in 10 C.F.R. Because changes to technical specifications require a license amendment, the Commission has Section 50.59 states that a licensee need not request a license amendment pursuant to section 50.90 T A final safety analysis report (FSAR) is part of the application for an operating license, and it de facto AA Although determining whether a CAL process constitutes a X Section 2.105 of 10 C.F.R. implements the hearing opportunity provision for license amendment Y Congress has commanded that licensees may not, under penalty of law, deviate from the terms of BB The Board’s use of 10 C.F.R. § 50.59 as a tool in deciding whether a CAL process is a de facto license amendment is to be distinguished from a Board entertaining a challenge to the actions taken by a licensee under section 50.59. The latter is prohibited by case law, which establishes that “[a] member of the public may challenge an action taken under 10 C.F.R. § 50.59 only by means of a petition under 10 C.F.R. § 2.206,” Yankee Atomic Electric Co. (Yankee Nuclear Power Station), CLI-94-3, 39 NRC 95, 101 n.7 (1994). The former is manifestly appropriate in circumstances where the Commission has
DIGESTS

ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

directed a Licensing Board to determine whether a CAL process constitutes a de facto license amendment proceeding.

Although the term “scope of an operating license” does not have a regulatory definition, it is a useful concept in this context, because the Court of Appeals for the First Circuit has held that actions by the NRC Staff constitute a de facto license amendment when they authorize a licensee to “engage in [activities] beyond the ambit [i.e., scope] of [its] original license.” Can. 59 F.3d at 295; accord Perry, CLI-96-13, 44 NRC at 327. As described by the Commission, an operating license reflects a specific facility-design basis, a safety analysis documented in an FSAR, facility-specific technical specification, and NRC regulations. See 63 Fed. Reg. 56,098, 56,099-100. These factors comprise the scope of an operating license as we use the term here.

“Tests or experiments not described in the [UFSAR]” constitute “any activity where any structure, system, or component is utilized or controlled in a manner which is either: (i) outside the reference bounds of the design bases as described in the [UFSAR] or (ii) inconsistent with the analyses or descriptions in the [UFSAR].” 10 C.F.R. § 50.59(a)(6).

The General Design Criteria in Appendix A of 10 C.F.R. Part 50 establish minimum requirements for the principal design criteria for water-cooled nuclear reactor plants. 10 C.F.R. Part 50, App. A — General Design Criteria for Nuclear Power Plants, Criterion 14, states: “Reactor Coolant Pressure Boundary. The reactor coolant pressure boundary shall be designed, fabricated, erected, and tested so as to have an extremely low probability of abnormal leakage, of rapidly propagating failure, and of gross rupture.”

When a current analysis described in the FSAR fails to achieve its intended purpose, it must be changed. Such a change is sufficiently significant to trigger the license amendment requirement of section 50.59(c)(2)(viii) because it is “[i]nconsistent with the analyses or descriptions in the [UFSAR].” 10 C.F.R. § 50.59(c)(6)(ii).

A CAL process constitutes a de facto license amendment proceeding that is subject to a hearing opportunity under section 189a of the AEA, if it (1) grants a licensee’s authority to operate without the ability to comply with all technical specifications; (2) grants a licensee’s authority to operate beyond the scope of its existing license; or (3) grants a licensee’s authority to operate a test or experiment that meets the criteria in 10 C.F.R. § 50.59(c)(2)(viii).

To adjudicate either (1) the admissibility of a moot contention, or (2) the standing of a petitioner who sought to adjudicate a moot contention, a Board would be issuing an advisory opinion in derogation of Commission precedent. See U.S. Department of Energy (High-Level Waste Repository), CLI-08-21, 68 NRC 351, 352 (2008); accord Texas Utilities Generating Co. (Comanche Peak Steam Electric Station), ALAB-714, 17 NRC 86, 94 (1983).

”[A]bsent compelling reasons, the Commission adheres to the ‘case’ or ‘controversy’ doctrine in its adjudicatory proceedings.” Hydro Resources, Inc. (P.O. Box 777, Crownpoint, New Mexico 87313), LBP-05-17, 62 NRC 77, 91 (2005) (citing Texas Utilities Electric Co. (Comanche Peak Steam Electric Station), CLI-93-10, 37 NRC 192, 200 n.28 (1993)). Pursuant to this doctrine, a justiciable controversy must involve parties who raise questions “presented in an adversary context and in a form historically viewed as capable of resolution through the judicial process.” Flast v. Cohen, 392 U.S. 83, 95 (1968). When a petitioner obtains the relief it is seeking before the admissibility of its contention is resolved, the admissibility vel non of the contention is no longer justiciable, because it no longer presents a live controversy involving a true clash of interests that is susceptible to meaningful adjudicative relief. Cf. Moore v. Charlotte-Mecklenburg Board of Education, 402 U.S. 47, 48 (1971) (per curiam) (dismissing appeal for lack of live controversy where both litigants desired the same result); David B. Kuhl (Denial of Senior Reactor Operator License), LBP-09-14, 70 NRC 193, 195-96 (2009) (dismissing hearing request as moot where petitioner’s claim was not susceptible to meaningful adjudicative relief).
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

abeyance, without being admitted or denied, pending further order from the Commission, in accordance with Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-12-16, 76 NRC 63 (2012).

B Petitioner Blue Ridge Environmental Defense League (BREDL) established standing by submitting declarations from sixteen individuals who each stated that he or she (a) is a member of BREDL; (b) resides within 50 miles of the Sequoyah Nuclear Plant; and (c) authorizes BREDL to represent him or her in this proceeding.

C Petitioners Bellefonte Efficiency and Sustainability Team (BEST) and Mothers Against Tennessee River Radiation (MATRR) did not establish standing because they did not submit any declarations from individuals asserting that he or she (a) is a member of BEST or MATRR; (b) resides within 50 miles of the proposed facility; and (c) authorizes the organization to represent him or her in this proceeding.

D The fact that a petitioner is a “chapter” or a “project” of another petitioner that has established standing, does not mean that the chapter or project also has standing. If a chapter or project wants to participate in an adjudication as a separate party, then it must show its own standing, either organizational or representational.

E Although BEST and MATRR had the opportunity to cure the defects in their showing of standing in their replies, see South Carolina Electric & Gas Co. (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-10-1, 71 NRC 1, 7 (2010), they failed to do so.

F Determining whether a contention is within the scope of the proceeding, as required by 10 C.F.R. § 2.309(f)(1)(iii), or is material to the proceeding, as required by 10 C.F.R. § 2.309(f)(1)(iv), requires an understanding as to what legal requirement has allegedly not been met. The scope and/or materiality of a contention alleging that the application “fails to adequately address the risk of flooding” necessitates the identification of the law, regulation, or case law that has allegedly not been met, i.e., that requires the application to address the risk of flooding.

G Contention A, which alleges that the application fails to adequately address the risk of flooding, is an allegation that TVA is not in compliance with the requirements of its current licensing basis and therefore the contention is not admissible because CLB compliance is not within the scope of a license renewal proceeding pursuant to 10 C.F.R. §§ 54.30(b), 2.309(f)(1)(iii).

H Contention B is based on a recent decision (New York v. NRC, 681 F.3d 471 (D.C. Cir. 2012)) that vacated NRC’s regulation assessing the environmental impact of the storage and disposal of spent nuclear fuel generated by nuclear power reactors such as Sequoyah Units 1 and 2. To the extent that Contention B raises safety issues, it is denied as being outside of the scope of this license renewal process. To the extent that Contention B raises environmental issues, it is held in abeyance, without being admitted or denied, pending further order from the Commission, in accordance with Calvert Cliffs Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-12-16, 76 NRC 63 (2012).

I To the extent that Contention C is a “safety” contention, alleging that the existence of higher cancer death rates in four counties suggests that the Sequoyah nuclear plant is not operating in accordance with its current licensing basis (CLB), the contention is not admissible because CLB compliance is not within the scope of a license renewal proceeding pursuant to 10 C.F.R. §§ 54.30(b), 2.309(f)(1)(iii).

J To the extent that Contention C is an “environmental” contention, alleging that the existence of higher cancer death rates in four counties means that TVA’s environmental report is erroneous when it concludes that the environmental impacts (human health impacts) of radiation from the Sequoyah nuclear plant will be “small,” the contention is not admissible due to the failure to satisfy the requirements of 10 C.F.R. § 2.309(f)(1)(v) to provide sufficient supporting information.

K Contention D, which alleges that the time-limited aging analysis (TLAA) in the application is inadequate because it fails to discuss a number of safety-related incidents that allegedly occurred at the Sequoyah nuclear plant over the last 14 years is not admissible because NRC regulates compliance with such incidents under TVA’s current licensing basis, and they are not within the scope of a license renewal proceeding pursuant to 10 C.F.R. §§ 54.30(b), 2.309(f)(1)(iii).

L Contention E, which alleges that the license renewal application is deficient because it fails to consider the use of plutonium fuel at the Sequoyah nuclear plant is speculative and not admissible because TVA has not proposed to use plutonium fuel at these reactors. If and when TVA endeavors to use such fuel at the Sequoyah nuclear plant, TVA will need to seek a license amendment from NRC, and the petitioners will have an opportunity to challenge the proposal at that time.
Contention F-1, which alleges that the license renewal application lacks an acceptable aging management plan to adequately maintain the ice condenser containment system is not admissible because the Petitioner fails to acknowledge and confront the ice condenser aging management plans that are contained in the application and to show that there is a genuine dispute with these plans, as required by 10 C.F.R. § 2.309(f)(1)(vi).

Contention F-2, which alleges that the license renewal application is deficient because TVA fails to prove that the containment system at the Sequoyah nuclear plant can withstand a severe accident without leaking, is not material under 10 C.F.R. § 2.309(f)(1)(iv) because there is no legal requirement that a nuclear power plant be completely leakproof during a severe accident.

Contention F-3 alleges that TVA has “ongoing systemic problems” such as a “longstanding breakdown in dealing with the mismanagement of its whistleblower complaints” and that these problems reflect a “lack of integrity” indicating that the “accuracy and validity of the license renewal application cannot be assured and therefore must be rejected.” While allegations regarding whistleblower retaliation and management integrity are a serious matter, they are precisely the sort of issues that NRC continuously regulates as part of the current licensing basis and which are excluded from the scope of license renewal proceedings under 10 C.F.R. § 54.30(b), Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-11-11, 74 NRC 427, 432 (2011), and Northern States Power Co. (Prairie Island Nuclear Generating Plant, Units 1 and 2), CL1-10-27, 72 NRC 481, 484 (2010).

To be admissible, like a contention that is submitted with an initial hearing request, a post-hearing petition contention, i.e., a new or amended contention, also must satisfy the substantive contention admissibility standards set forth in 10 C.F.R. § 2.309(f)(1).

Admitted contentions challenging an applicant’s Environmental Report may, in appropriate circumstances, function as challenges to similar portions of the Staff’s Environmental Impact Statement. This “migration tenet” applies when “the information in the DEIS is sufficiently similar to the information in the ER.” Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), LBP-11-1, 73 NRC 19, 26 (2011). In this circumstance, a party need not file a new or amended contention; the previously admitted contention will simply be viewed as applying to the relevant portion of the DEIS.

The migration tenet is appropriate only so long as the DEIS analysis or discussion at issue is essentially in pari materia with the ER analysis or discussion that is the focus of the contention.

If the “new” contention raises the same concern admitted at the initial stage of the proceeding, its admissibility need not be relitigated and redetermined at each step of the NEPA process, namely the issuances of the DSEIS and the FSEIS.

Until the DSEIS is issued, the intervenors have no way to know in what form or manner, if any, the ERC will use information from an RAI response. As a consequence, the intervenors can only file their contentions when the information appears in or is omitted from the DSEIS. It would be patently unreasonable to require an intervenor, or a potential intervenor, to divine what use the information collected by the ERC will or will not serve in the DSEIS.

Intervenors and potential intervenors have a period of time to file new or amended contentions in response to a DSEIS. They are not required to file their contentions on information or studies that are published in the period between the date for initial contentions and the date the DSEIS is published.

Intervenors cannot be expected to raise a claim each time a document is created relating to a proceeding, especially if that document is a mere part of a larger, arguably incomplete, process. The Board...
does not expect intervenors to raise a concern regarding each portion of the process, but instead notes that intervenors need not file a contention until all relevant parts of a process are completed.

J The NRC Staff need not recirculate a supplemental NEPA document every time new information becomes available. Recirculation is required only when the information presents a "seriously different picture of the environmental impacts." Hydro Resources, Inc. (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-95-22, 50 NRC 3, 14 (1999).

LBP-13-10 STRATA ENERGY, INC. (Ross In Situ Recovery Uranium Project), Docket No. 40-9091-MLA (ASLBP No. 12-915-01-MLA-BD01), MATERIALS LICENSE AMENDMENT; July 26, 2013; MEMO-RANDUM AND ORDER (Ruling on Motion to Resubmit Contentions and to Admit a New Contention)

A In this 10 C.F.R. Part 40 proceeding regarding the application of Strata Energy, Inc., for a license to possess and use the nuclear source material that would be generated by its operation of an in situ uranium recovery (ISR) facility on the Ross ISR Uranium Project site, the Licensing Board grants the request of Joint Intervenors Natural Resources Defense Council and the Powder River Basin Resource Council to "resubmit" (i.e., migrate) three of four previously admitted National Environmental Policy Act (NEPA)/environmental-related contentions so as to frame them as challenges to the NRC Staff’s draft supplemental environmental impact statement (DSEIS) regarding the proposed Ross ISR facility and denies Joint Intervenors’ motion to admit a new environmental contention.

B Under 10 C.F.R. § 2.309(c)(1), after the section 2.309(b) deadline has passed for submitting an initial hearing petition with one or more accompanying contentions, a petitioner/intervenor that wishes either to (1) amend an already submitted or admitted contention; or (2) gain the admission of a new contention must file a motion for leave to file such a new or amended contention.

C Under section 2.309(c)(1), the timing of the submission of a new/amended contention comes into play to the extent that consideration of whether a new/amended contention can be admitted/adopted is dependent on whether, regardless of the issue statement’s substantive sufficiency, a presiding officer can conclude that the petitioner/intervenor has demonstrated “good cause” for its post-initial hearing petition deadline filing, based on the following three factors: “(i) The information upon which the filing is based was not previously available; (ii) The information upon which the filing is based is materially different from information previously available; and (iii) The filing has been submitted in a timely fashion based on the availability of the subsequent information.” 10 C.F.R. § 2.309(c)(1)(i)-(iii).

D While the first two “good cause” factors relate to the nature of the information that is being employed as the basis for the new/amended contention, the third concerns the timeliness of the submission of that information in support of a request to admit the new/amended contention. This factor involves the question whether the new/amended contention and the associated information that is the basis for the contention, even if newly available and materially different from any information that was previously available, nonetheless were seasonably submitted. And, in contrast to section 2.309(b)’s provisions relating to an initial hearing petition, see 10 C.F.R. § 2.309(b) (defining the timeliness of an initial hearing petition in different situations as being filed between 20 and 60 days after certain specified events), section 2.309(c)(1)(i)-(iii) does not stipulate what is considered “timely.” As it turns out, the degree to which the new/amended contention and its otherwise newly available and materially different supporting information will be considered timely submitted is, as in this case, generally defined by the presiding officer as a specific period following the “triggering event” that makes the not previously available/materially different information available so as to be the basis for the new/amended contention.

E As is made clear in the discussion in the statement of considerations supporting the September 2012 10 C.F.R. Part 2 rule change, see Final Rule: “Amendments to Adjudicatory Process Rules and Related Requirements,” 77 Fed. Reg. 46,562, 46,571-72 (Aug. 3, 2012), the time for submitting a new/amended contention motion based on information that would be newly available, materially different, and otherwise timely submitted given the information’s availability can be extended if the extension request is based on “good cause,” as that term is defined in 10 C.F.R. § 2.307, or the presiding officer approves the parties’ stipulation of a different filing time.

F As is the case with a contention submitted in support of an initial hearing petition, under section 2.309(c)(4) a new or amended contention generally must meet the six admissibility factors specified in section 2.309(f)(1), which in relevant part require that for each contention the submitter “(i) Provide a specific statement of the issue of law or fact to be raised or controverted . . . ; (ii) Provide a brief explanation of the basis for the contention; (iii) Demonstrate that the issue raised in the contention is within the scope of the proceeding; (iv) Demonstrate that the issue raised in the contention is material to the finding the
G Although a motion addressing the section 2.309(c)(1) and (f)(1) factors generally must be submitted to permit the admission of a new/amended contention, there is a recognized exception for licensing proceedings in the case of NEPA-related contentions. Such contentions initially are based on the environmental report (ER) submitted by the applicant to fulfill its NEPA-related responsibilities under 10 C.F.R. Part 51 to provide the Staff with information and analysis that will inform the Staff’s NEPA review. See 10 C.F.R. § 2.309(f)(2). And if the Staff in preparing its NEPA impact statement does indeed adopt the ER-associated information/analysis that was challenged as inadequate, or, alternatively, maintains the same omission that was alleged to be in the ER, it has been acknowledged that the issues those ER-based admitted contentions raise can essentially transmute into challenges to the Staff’s NEPA statement. See Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), LBP-01-23, 54 NRC 163, 172 n.3 (2001); see also Louisiana Energy Services, L.P. (Clairolene Enrichment Center), CLI-98-3, 47 NRC 77, 84 (1998).

H It has been recognized that the issues framed in contentions challenging an application generally encompass two categories, i.e., those that allege an informational or analytical omission from the application and those that allege that the information/analysis in the application is inadequate (as opposed to missing). See Duke Energy Corp. (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-02-28, 56 NRC 373, 382-83 (2002) (“There is, in short, a difference between contentions that merely allege an ‘omission’ of information and those that challenge substantively and specifically how particular information has been discussed in a license application.”); see also Powertech USA, Inc. (Dewey-Burdock In Situ Uranium Recovery Facility), LBP-13-9, 78 NRC 37, 47-48 (2013) (providing general discussion about contentions of omission and contentions of adequacy).

I Consistent with the general principle that, because the primary responsibility to address and comply with Atomic Energy Act safety-related requirements resides with a license applicant, so that the application, not the Staff’s application review, is the focus of any safety-related contentions, see Curators of the University of Missouri (TRUMP-S Project), CLI-95-8, 41 NRC 386, 396 (1995); Curators of the University of Missouri (TRUMP-S Project), CLI-95-1, 41 NRC 71, 121-22 (1995), issuance of the Staff’s safety evaluation report (SER) generally would not trigger the migration tenet. Rather, if anything in the Staff’s SER is considered as impacting an admitted license application-based safety contention or creating a new safety concern, as a general rule that matter would need to be raised, relative to an admitted safety contention, in the context of the merits disposition of the already admitted safety contention or, in the case of a new issue (and presuming such a Staff safety review-triggered contention is admissible), as a wholly new safety contention.

J Somewhat ironically, the migration tenet reflects a situation that, strictly speaking, is in juxtaposition to what is contemplated as necessary under the “not previously available” and “materially different” provisos of section 2.309(c)(1)(i)-(iii) governing new/amended contention admission. This is because the invocation of this tenet has the effect of automatically “amending” the contention to substitute the Staff’s environmental review impact statement information/analysis (relative to a contention of adequacy) or lack of information/analysis (relative to a contention of omission) as the foundational support for the contention without filing a new/amended contention motion addressing either the section 2.309(c)(1) or (d)(1) factors.

K The migration tenet is applicable only if the information in the Staff’s post-ER NEPA statement is “sufficiently similar to the information in the ER,” i.e., essentially in pari materia with the ER information/analysis, or lack of information/analysis, that is the focus of the contention. See Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), LBP-08-2, 67 NRC 54, 63-64 (2008); see also Dewey-Burdock, LBP-13-9, 78 NRC at 46-47; Detroit Edison Co. (Fermi Nuclear Power Plant, Unit 3), LBP-12-23, 76 NRC 445, 470-71 (2012); Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), LBP-11-1, 73 NRC 19, 26 (2011).

L The “migration tenet” serves a useful administrative efficiency purpose in that it dispenses with the need for (1) the applicant/Staff to file a dismissal/dispositive motion, with the accompanying party filings and Board decision, so as to have the admitted contention declared moot; and (2) the intervenor to file a new/amended contention, with the accompanying briefing and Board decision, so as to have the wording
of the previously admitted contention changed to reflect that the issue statement’s focus is now the Staff’s environmental document rather than the applicant’s ER.

M The critique of the impact of a Staff environmental document on an already-admitted ER-based environmental contention usually goes to whether (1) a contention of omission can migrate or has been cured, to the degree that purported missing information/analysis has been provided so that a summary disposition/dismissal motion may be appropriate for the admitted contention and a new contention is necessary to challenge the fresh information/analysis; or (2) a contention of adequacy can migrate or, because of information/analysis changes, can be sustained as a new/amended contention. Nonetheless, it also is possible that the Staff’s environmental document might contain no information/analysis on a matter that was addressed in the ER and was the subject of an admitted contention of adequacy challenging the ER information/analysis. In such an instance, an intervenor challenge to the adequacy of an ER’s information/analysis seemingly would, for all practical purposes, envelop a challenge based on the total lack of such information/analysis (assuming the challenge was not that the information/analysis should not be in ER), thereby permitting a contention of adequacy to migrate into a contention of omission.

N Post-ER an intervenor would need to file a motion to amend an already-admitted contention or to admit a new contention if the information in the Staff’s NEPA statement is sufficiently different from the information in the ER that supported the original contention’s admission. See Vogtle, LBP-08-2, 67 NRC at 63-64. And a new/amended contention regarding portions of the Staff’s post-ER NEPA statement that differ from the ER also must meet the “good cause” and contention admissibility standards of section 2.309(c)(1) and (f)(1) to be admitted. See McGuire/Catawba, CLI-02-28, 56 NRC at 382 (“While a contention contesting an applicant’s [ER] generally may be viewed as a challenge to the NRC Staff’s subsequent draft EIS, new claims must be raised in a new or amended contention.”); Vogtle, LBP-08-2, 67 NRC at 64 (explaining that, if the portion of the ER that an admitted contention challenges is not sufficiently similar to the draft EIS, “an intervenor attempting to litigate an issue based on expressed concerns about the [draft EIS] may need to amend the admitted contention or, if the information in the [draft EIS] is sufficiently different from that in the ER that supported the contention’s admission, submit a new contention”).

O Nothing in the agency’s rules of practice precludes an intervenor from submitting a motion that attempts to invoke the migration tenet or a board from considering that precept’s application in response to such a motion.

P In appropriate circumstances, a board should endeavor to define the scope of a contention in light of the foundational support that leads to its admission, see Crow Butte Resources, Inc. (North Trend Expansion Project), CLI-09-12, 69 NRC 535, 553 (2009) (observing that to define scope of admitted contention properly, board should have specified which bases were admitted); see also Public Service Co. of New Hampshire (Seabrook Station, Units 1 and 2), ALAB-899, 28 NRC 93, 97 (1988) (“The reach of a contention necessarily hinges upon its terms coupled with its stated bases.”), aff’d sub nom. Massachusetts v. NRC, 924 F.2d 311 (D.C. Cir. 1991).

Q Regarding the argument that the Staff’s SER and/or one or more of an applicant’s post-hearing petition licensing review submissions to the Staff, whether in response to a Staff request for additional information (RAI) or otherwise, have the consequence of rendering a resubmitted environmental contention moot or untimely under section 2.309(c)(1), expressing no view on whether it is possible for an SER to moot an environmental contention, to the degree this argument is footed in NEPA-related RAIs, assertions of contention mootness or untimeliness based on such documents generally should be raised prior to the issuance of a Staff environmental document. Such a timely filed motion would be based on the SER or applicant information having become available and having mooted or otherwise enervated the admitted environmental contention as it alleges an omission/analysis deficiency relative to the ER so as to require the filing of a new/amended contention that has not been properly proffered. In the absence of such a motion filed prior to the Staff environmental document, the Staff SER or such applicant information generally would become relevant as impacting an admitted environmental contention only to the degree the SER or applicant information is actually utilized as part of a subsequent Staff environmental document. Moreover, the timeliness of a new/amended contention motion relating to that information seemingly would be determined based on the availability of the Staff’s environmental document, rather than the SER or the applicant’s information, as the filing “trigger” for the motion.

R If there is any question about whether the migration tenet is applicable, in the absence of a timely analysis of the section 2.309(c)(1) and (f)(1) new/amended contention precepts by the contention’s sponsor,
A board is not obligated to determine whether those new/amended contention requirements could have been met relative to the “migrated” environmental contention. See *Boston Edison Co. (Pilgrim Nuclear Power Station), ALAB-816, 22 NRC 461, 465-68 (1985)*. Accordingly, a contention’s sponsor may choose not to make any submission regarding an admitted ER-based environmental contention it believes properly will migrate and can simply await an applicant or Staff filing challenging the contention’s continued viability in light of the Staff’s environmental document. But if there is any question whether an admitted contention merits a new/amended contention motion relative to the Staff’s environmental document, the best approach seemingly would be to make a filing that treats the contention as if it were new/amended or, perhaps most prudently, argues in the alternative.

Under NEPA §102(2)(C), 42 U.S.C. § 2332(2)(C), which requires that an agency create an environmental impact statement (EIS), “the moment at which an agency must have a final statement ready ‘is the time at which it makes a recommendation or report on a proposal for federal action.’” *Kleppe v. Sierra Club*, 427 U.S. 390, 405-06 (1976) (quoting *Aberdeen & Rockfish R.R. Co. v. Students Challenging Regulatory Agency Procedures*, 422 U.S. 289, 320 (1975)). An EIS should be issued to include other related actions only when those related actions have been formally proposed and are pending before the relevant agency. NEPA “does not require an agency to consider the possible environmental impacts of less imminent actions when preparing the impact statement on proposed actions.” *Kleppe*, 427 U.S. at 410 & n.20; *see id. at 410* (“[W]hen several proposals for . . . actions that will have cumulative or synergistic environmental impact upon a region are pending concurrently before an agency, their environmental consequences must be considered together.” (emphasis added)).

To bring NEPA into play, a possible future action must at least constitute a ‘proposal’ pending before the agency (i.e., ripeness) and must be in some way interrelated with the action that the agency is actively considering (i.e., nexus).” *Duke Energy Corp. (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2)*, CLI-02-14, 55 NRC 278, 295 (2002).

Under 40 C.F.R. § 1508.25(a), the Council on Environmental Quality regulation that outlines the scope or range of actions that should be considered in an EIS, three types of actions are to be considered in looking to the scope of an EIS: connected, cumulative, and similar. To determine whether actions are “connected” such that they should be discussed in the same EIS, section 1508.25(a)(1) indicates that an agency is to consider whether the actions (1) “automatically trigger” other actions that may require an EIS; (2) “[c]annot or will not proceed unless other actions are taken previously or simultaneously”; or (3) “[a]re interdependent parts of a larger action and depend on the larger action for their justification.” 40 C.F.R. § 1508.25(a)(1)(i)-(iii). “Cumulative” actions, on the other hand, are those that, “when viewed with other proposed actions[,] have cumulatively significant impacts” so that they should be discussed in the same EIS. *Id.* § 1508.25(a)(2). And finally “similar” actions are those that, “when viewed with other reasonably foreseeable or proposed agency actions, have similarities that provide a basis for evaluating their environmental impacts together, such as common timing or geography,” so that the agency “may wish to analyze them together.” *Id.* § 1508.25(a)(3).

With respect to whether potential ISR sites are “connected” proposals per section 1508.25(a)(1), the relevant criterion appears to be whether, in accord with paragraph (iii), the requisite “interdependence” exists among the various actions at issue. In making this determination, courts generally have looked to see whether the first action has “independent utility.” *Thomas v. Peterson*, 753 F.2d 754, 759 (9th Cir. 1985); *see also McGuire/Catawba*, CLI-02-14, 55 NRC at 297 (“[W]hen developing an EIS, an agency must consider the impact of other proposed projects ‘only if the projects are so interdependent that it would be unwise or irrational to complete one without the other.’” (quoting *Webb v. Gorsuch*, 699 F.2d 157, 161 (4th Cir. 1983))).

Recognizing that a board may appropriately view a petitioner’s supporting information in a light favorable to the petitioner, *see Arizona Public Service Co. (Palo Verde Nuclear Generating Station, Units 1, 2, and 3)*, CLI-91-12, 34 NRC 143, 155 (1991); it is also the case that neither mere speculation nor bare or conclusory assertions, even by an expert, will suffice to allow the admission of a proffered contention, *see Fansteel, Inc. (Muskogee, Oklahoma Site)*, CLI-03-13, 58 NRC 195, 203 (2003).

An intervenor’s failure to provide anything concrete to support the central premise that the ISR facility at issue in a proceeding “may” not be economically viable without licensing/operating the other proposed ISR facilities in the vicinity is wholly inadequate to support the admission of an illegal segmentation contention.
Z Denoting aspects of the ISR facility licensing proposal at issue in the proceeding that will permit economic and operational efficiency if the applicant successfully carries out its apparent plan to have other nearby sites licensed is not the same as showing that the ISR facility at issue itself lacks any “independent utility” such that its licensing and operation would not go forward absent the licensing and operation of the other ISR sites.

AA Assertions all supporting the premise that there is a strong likelihood that an applicant intends that eventually all its nearby ISR sites will be licensed and operating are not the same as showing, as would be pertinent to the question of whether the ISR facility at issue in a proceeding is a “connected” action as defined in section 1508.25(a)(1), that the ISR facility at issue lacks any independent utility in the absence of the completion of the other ISR sites.

BB The fact that the Staff previously supported the need for a cumulative impacts analysis, see LBP-12-3, 75 NRC at 200, 203, which it now has provided in the DSEIS regarding the applicant’s other nearby ISR sites, at least suggests that, consistent with section 1508.25(a)(2), there are “cumulative actions” that might need full NEPA consideration in the same impact statement.

CC While the courts have recognized that the permissive “may” language of section 1508.25(a)(3) affords an agency more discretion in making a choice about whether a single EIS is the “best way” to assess “similar” actions, Klamath-Siskiyou Wildlands Center v. Bureau of Land Management, 387 F.3d 989, 1001 (9th Cir. 2004), the geographic proximity of the ISR site at issue in this proceeding to the other nearby ISR sites and the apparent timing of the future licensing actions for these other ISR sites vis-a-vis the ISR site at issue seemingly would be relevant in determining whether they are “similar” actions under that provision so as to merit consideration in a single impact statement.

LBP-13-11 FIRSTENERGY NUCLEAR OPERATING COMPANY (Davis-Besse Nuclear Power Station, Unit 1), Docket No. 50-346-LA (ASLBP No. 13-928-02-LA-BD01); LICENSE AMENDMENT; August 12, 2013; MEMORANDUM AND ORDER (Denying Petition for Intervention and Request for Hearing)

A In this Memorandum and Order, the Atomic Safety and Licensing Board (Board) determines that petitioners failed to submit an admissible contention in accordance with 10 C.F.R. § 2.309(f)(1), denies their petition to intervene for this reason, and terminates the proceeding before the Board.

B “A member of the public may challenge an action taken under 10 C.F.R. § 50.59 only by means of a petition under 10 C.F.R. § 2.206,” which must be submitted to the Executive Director for Operations for consideration by the appropriate office director. Yankee Atomic Electric Co. (Yankee Nuclear Power Station), CLI-94-3, 39 NRC 95, 101 n.7 (1994).

C A challenge to an applicant’s analysis pursuant to 10 C.F.R. § 50.59 is not the proper subject of an adjudicatory hearing before a licensing board.

LBP-13-12 EXELON GENERATION COMPANY, LLC (Braidwood Nuclear Power Station, Units 1 and 2; Byron Nuclear Power Station, Units 1 and 2), Docket Nos. 50-454-LR, 50-455-LR, 50-456-LR, 50-457-LR (ASLBP No. 13-929-02-LR-BD01); OPERATING LICENSE RENEWAL; November 19, 2013; MEMORANDUM AND ORDER (Denying Hearing Request and Petition to Intervene)

A In this proceeding regarding the application of Exelon Generation Co., LLC to renew its operating licenses for Byron Nuclear Power Station, Units 1 and 2, and Braidwood Nuclear Power Station, Units 1 and 2, the Board denies a hearing request and petition to intervene because each of petitioner’s two contentions challenges a Commission regulation in violation of 10 C.F.R. § 2.335(a).

B Absent a petition for a waiver, no rule or regulation of the Commission “is subject to attack by way of discovery, proof, argument, or other means in any adjudicatory proceeding.” 10 C.F.R. § 2.335(a) (2015).

C An applicant for renewal of a license to operate a nuclear power plant “is not required to include discussion of need for power.” 10 C.F.R. § 51.53(c)(2) (2013).

D An application for renewal of a license to operate a nuclear power plant may be submitted as early as 20 years before expiration of the license then in effect. 10 C.F.R. § 54.17(c) (2013).

LBP-13-13 ENTERGY NUCLEAR OPERATIONS, INC. (Indian Point, Units 2 and 3), Docket Nos. 50-247-LR, 50-286-LR (ASLBP No. 07-858-03-LR-BD01); OPERATING LICENSE RENEWAL; November 27, 2013; PARTIAL INITIAL DECISION (Ruling on Track 1 Contentions)

A In this proceeding arising from the License Renewal Application (LRA) of Entergy Nuclear Operations, Inc. (Entergy or Applicant) for two reactors located at the Indian Point Energy Center (IPEC), one of which expired on September 28, 2013 (IP2), and one of which will expire on December 12, 2015 (IP3), which requested authorization for the continued operation of these reactors for up to 20 years beyond these expiration dates, the Licensing Board — ruling on the merits of nine contentions — concludes
that, with regard to the issues raised regarding the adequacy of Entergy’s Aging Management Plans in contentions RK-TC-2 (flow-accelerated corrosion), NYS-5 (buried piping), and NYS-6/7 (inaccessible low- and medium-voltage cables), Entergy has demonstrated that the effects of aging will be adequately managed during the period of extended operation as required by 10 C.F.R. § 54.21(a)(3). With regard to the issues raised regarding input parameters in SAMA analysis in contentions NYS-12C (decontamination cost estimates), and NYS-16B (population estimates), and with regard to the issues raised with regard to the impact of continued operation of these reactors on surrounding property values in NYS-17B, and the consideration of the no-action alternative in NYS-37, the NRC Staff has demonstrated that the FEIS complies with NEPA and with 10 C.F.R. Part 51. With regard to CW-EC-3A, the Board found that while the NRC Staff’s Environmental Justice analysis was flawed, the record as developed during the hearing cured the defect and with regard to NYS-8, because the Board found that transformers were “passive” components, they fall within the scope of 10 C.F.R. Part 54 and must undergo AMR pursuant to 10 C.F.R. § 54.21(a)(1).

B In determining whether an applicant’s LRA provides the requisite “reasonable assurance,” the Board must conclude that the applicant has properly scoped the aging management review; that the existing or planned aging management programs conform to the descriptions in the license renewal application; and that the documentation used to support the application is auditable, retrievable, and in fact does support the application.

C Sections 54.21(a)(3) and 54.29(a) of 10 C.F.R. provide the applicable legal standards for the evaluation of Indian Point’s AMP for buried pipes and tanks. These regulations require that Entergy must demonstrate, to the point of providing “reasonable assurance,” that the intended functions of these components will be maintained in accordance with the CLB for the PEO.

D If an AMP is consistent with GALL, it is adequate. However, to simply claim consistency with GALL is insufficient. An applicant must present an AMP with sufficient information that the Board will be able to draw its own independent conclusion as to whether the applicant’s programs are in fact consistent with GALL.

E A commitment by a license renewal applicant to implement one of the AMPs detailed in GALL is sufficient to provide “reasonable assurance” that the effects of aging will be adequately managed so that intended functions will be maintained consistent with the CLB for the period of extended operations as required by 10 C.F.R. § 54.21(a)(3).

F In the license renewal context, the scope of the Staff’s NEPA review is substantially different from, and broader than the scope of, the Staff’s review of Part 54 safety issues. The Commission’s AEA review under Part 54 does not compromise or limit NEPA.

G NEPA’s “hard look requirement” does not allow sweeping generalities about possible effects and risk without a justification as to why more definitive information was not provided.

H Under the NEPA “rule of reason,” “the agency’s environmental analysis need only consider environmental impacts that are reasonably foreseeable, and need not consider remote and speculative scenarios.”

I As a NEPA analysis, the SAMA analysis is not based on either the best-case or the worst-case accident scenarios, but on mean accident consequence values, averaged over the many hypothetical severe accident scenarios. When a board is called upon to assess a SAMA analysis, the question is not whether more or different analysis can be done.

J Contentions challenging a SAMA analysis must identify a deficiency that plausibly could alter the overall result of the analysis in a material way. The question of material impacts hinges upon whether a SAMA alternative may be cost-beneficial to implement. However, like other NEPA evaluations, a SAMA analysis is governed by the rule of reason and alternatives must be bounded by some notion of feasibility.

K Performed under NEPA, a SAMA analysis evaluates the degree to which specific additional mitigation measures may reduce the probability or consequences of various accident scenarios on a site-specific basis.

L A SAMA analysis must necessarily be site specific because the potential consequences of a severe accident will largely be the product of the location of the plant.

M SAMA analyses, as issues of mitigation, need only be discussed in sufficient detail to ensure that environmental consequences of the proposed project have been fairly evaluated.

N In the SAMA context NEPA requires the FSEIS to include an analysis containing reasonable estimates.
O In order to satisfy its obligations under NEPA, the FSEIS need only explain any known shortcomings in available methodology, disclosure of incomplete or unavailable information and significant uncertainties, and a reasoned evaluation of whether and to what extent these or other considerations credibly could alter the SAMA analysis conclusions.

P The proper question is not whether there are plausible alternative choices for use in the analysis, but whether the analysis that was done is reasonable under NEPA.

Q To be successful, an Intervenor must point to a deficiency that renders the SAMA analysis unreasonable under NEPA.

R Category 1 impacts are those that the Commission has determined are common across plants — they have been evaluated generically in the GEIS for license renewal. These impacts are outside the scope of individual license renewal proceedings.

S Category 2 impacts are those that require plant-specific analysis in a supplemental EIS.

T When taking the requisite hard look at the environmental consequences of the alternatives to the proposed licensing action, NRC regulations require the EIS to discuss the “no-action alternative.”

U The Staff is instructed to analyze the potential environmental impacts associated with not renewing the license within the “no-action alternative” section of the energy-alternatives chapter in the EIS.

V Commission regulations, however, do not require the inclusion of an analysis within the EIS regarding the need for the power generated by an existing plant in license renewal proceedings.

W Disparate impact analysis is the NRC’s principal tool for advancing environmental justice under NEPA. The NRC’s goal is to identify and adequately weigh, or mitigate, effects on low-income and minority communities that become apparent only by considering factors peculiar to those communities.

X Environmental justice, as applied to the NRC, means that the agency will make an effort under NEPA to become aware of the demographic and economic circumstances of local communities.

Y Environmental justice was not addressed in NUREG-1437 GEIS and accordingly, EJ must be addressed in individual license renewal reviews.

Z In the event that a Board finds that the Staff’s NEPA analysis is insufficient, it need not require that the agency staff “go back to the drawing board” and amend or supplement the EIS. Rather, the Board’s review and admitted exhibits are part of the environmental record upon which the Commission makes its ultimate balancing judgment.

AA The adjudicatory record and Board decision (and, of course, any Commission appellate decisions) become, in effect, part of the FEIS.

BB Accordingly, to the extent that any environmental findings by the Presiding Officer (or the Commission) differ from those in the FEIS, the FEIS is deemed modified by the decision.

CC Typically, the Staff prepares the record of decision, but when, as here, a hearing is held, the Board’s initial decision constitutes the record of decision as to those issues that were litigated during the hearing and the hearing can provide the public venting that the circulation of an amended EIS would otherwise provide.

DD But if modification of the FEIS by Staff testimony or the Board’s decision is too substantial, recirculation of the FEIS would be required. In a given instance, the Staff’s evidence may depart so markedly from the positions espoused or information reflected in the FEIS as to require formal redrafting and recirculation for comment of the environmental statement (or at least those portions which are affected by the changes) before the licensing board gives any further consideration to the subjects involved.

EE In this proceeding regarding the application of Shaw AREVA MOX Services, LLC (“Applicant”) for a license to possess and use strategic special nuclear material (“SSNM”) at a Mixed Oxide Fuel Fabrication Facility being constructed at the U.S. Department of Energy’s Savannah River Site, the Licensing Board concludes that Applicant has provided reasonable assurance that the challenged portions of its material control and accounting (“MC&A”) system satisfy the applicable regulatory requirements. For Contention 9, Applicant has demonstrated, as required by 10 C.F.R. § 74.55(b)(1), the ability to verify the presence and integrity of SSNM items with a 99% power of detecting item losses of 5 formula
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

kilograms within specified time periods. For Contention 10, Applicant has demonstrated, as required by 10 C.F.R. § 74.57(b), the ability to resolve MC&A alarms within approved time periods. For Contention 11, Applicant has demonstrated, as required by 10 C.F.R. § 74.57(c), the ability to rapidly assess alleged thefts.

B The NRC may issue a license to possess and use five or more formula kilograms of SSNM, under 10 C.F.R. Part 70, only if an applicant can establish, implement, and maintain an approved MC&A system that will achieve general performance objectives. To achieve these SSNM loss-related performance objectives, the MC&A system must provide the capabilities described in sections 74.55 and 74.57, among other capabilities.

C The NRC’s MC&A regulations in 10 C.F.R. Part 74 require the tracking of SSNM items during storage and processing in order to safeguard these materials from diversion.

D The NRC’s MC&A regulations in 10 C.F.R. Part 74 are intended to “provide flexibility for licensees to select the most cost-effective ways of achieving performance objectives.” Though flexible, an applicant’s proposed controls must still be “adequate” to show compliance with the regulations.

E For an applicant’s MC&A system to be found adequate, a licensing board must make a case-by-case determination, guided by the Atomic Energy Act’s mandate that no license to possess special nuclear material may be issued if issuance “would be inimical to the common defense and security or would constitute an unreasonable risk to the health and safety of the public.” This board finds that use of the reasonable assurance standard to determine MC&A adequacy, as suggested by the NUREG-1718 guidance, is consistent with our statutory mandate.

F Even though performance-oriented regulations provide applicants with flexibility to determine how best to achieve stated performance objectives, the method chosen must still demonstrate reasonable assurance of compliance with the underlying regulatory standard. It is incumbent on the NRC Staff to scrutinize an applicant’s chosen approach and determine whether or not it provides reasonable assurance that the regulation will be met. Mere compliance with regulatory guidance is not sufficient.

G An applicant for an NRC license bears the ultimate burden of proof. With respect to each contention, an intervenor has the initial “burden of going forward” and must provide sufficient evidence to support the claims made. If an intervenor makes that showing, the applicant has the burden of demonstrating by a preponderance of the evidence that it has met the relevant NRC regulations and that the licensing board should reject each contention on the merits.

H NRC regulatory guidance documents are intended merely to assist the Staff (and applicant) in understanding the underlying objective of the regulatory requirements. Guidance documents describe particular means of satisfying regulatory requirements in ways acceptable to the NRC Staff, but they do not bind applicants who remain free to choose different means.

I NRC regulatory guidance documents are not binding upon a licensing board, so mere applicant compliance with guidance does not ensure sufficient compliance with the regulations or the grant of a license. Guidance documents are not binding law and should not be treated as such by applicants, the NRC Staff, or a licensing board.

J Section 74.55(b) of 10 C.F.R. applies only to those licensees that are authorized to possess 5 or more formula kilograms of SSNM. Licensees must satisfy section 74.55(b)’s detection requirements for tamper-safed or sealed SSNM items in order to achieve the performance objectives set out in section 74.51(a). The regulation calls for the use of statistical sampling to achieve verification of item presence and integrity, stating that statistical sampling must result in “at least 99 percent power of detecting losses that total five formula kilograms or more.” An applicant may satisfy the regulation if it can provide reasonable assurance that its proposed verification methods will meet this 99% power of detection within the stated time periods.

K The sufficiency of an applicant’s system for verification of SSNM item presence and integrity under 10 C.F.R. § 74.55(b) hinges upon the accuracy of the data used and its ability to meet the specific quantitative performance criteria set out in the regulation. Whether collected through automation or not, the data must be sufficiently accurate to enable a licensing board to find compliance with the overarching requirements of the Atomic Energy Act that there be reasonable assurance of compliance with the regulation.

L Section 74.57(b) of 10 C.F.R. requires an applicant applying to possess 5 or more formula kilograms of SSNM to maintain alarm resolution capabilities designed to achieve the performance objectives of section 74.51(a). An applicant may propose a time period for alarm resolution, which must be approved by
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

the NRC Staff. The fact that a time period has been approved by the NRC Staff does not, however, ensure
that an applicant’s commitment satisfies the regulation. Ultimately, the time period approved by the NRC
Staff must be adequate to provide reasonable assurance that the applicant will achieve the performance
objectives.

M Section 74.57(b) of 10 C.F.R. does not require that an applicant demonstrate the ability to resolve
an MCA alarm through the use of any one alarm resolution method, such as an inventory, within the
approved time period.

N Section 74.57(e) of 10 C.F.R. requires an applicant applying to possess 5 or more formula kilograms
of SSNM to maintain rapid theft assessment capabilities designed to achieve the performance objectives
of section 74.51(a). The regulation provides an applicant with the flexibility to determine the most
cost-effective means of meeting the requirement. Ultimately, an applicant’s proposed approach to rapid
theft assessment must provide reasonable assurance that it will achieve the performance objectives.

O Section 74.57(e) of 10 C.F.R. does not require an applicant to show the ability to rapidly assess the
validity of alleged thefts in every conceivable theft scenario.

LBP-14-2 CHARLISSA C. SMITH (Denial of Senior Reactor Operator License), Docket No. 55-23694-SP
(ASLBP No. 13-925-01-SP-BD01); REACTOR OPERATOR LICENSE; March 18, 2014; INITIAL
DECISION

A In this Initial Decision, the Atomic Safety and Licensing Board (Board) resolves the claim of Charlissa
C. Smith that the Nuclear Regulatory Commission Staff (Staff) unlawfully denied her 2012 application for
a senior reactor operator (SRO) license. The Board concludes that the Staff acted inconsistently with its
own guidance and applied that guidance in an inconsistent manner when it denied Ms. Smith’s application
for an SRO license in 2012. The Board directs the Staff to issue an SRO license to Ms. Smith, subject
to the satisfaction of any other licensing requirements not considered in this proceeding, such as health,
that the Staff must also assess before issuing a license pursuant to 10 C.F.R. § 55.33. The license shall be
effective as of the date it is issued and shall be subject to the usual terms and conditions. See 10 C.F.R.
§ 55.1.

B Part 55 of the Commission’s regulations establishes procedures and criteria for the issuance of
licenses to operators and senior operators of nuclear facilities licensed under the Atomic Energy Act of

C Any individual who manipulates the controls of any facility licensed under Parts 50, 52, or 54 of the
agency’s regulations is required to have an operator’s license. See 10 C.F.R. § 55.2.

D An SRO is “any individual licensed under [10 C.F.R. Part 55] to manipulate the controls of a facility
and to direct the licensed activities of licensed operators.” 10 C.F.R. § 55.4. To obtain an SRO license, the
applicant must pass both a written test and an operating test and meet the other requirements specified in
10 C.F.R. Part 55. See id. § 55.33(a).

E Section 55.40 of 10 C.F.R. states that the Commission shall use NUREG-1021 to prepare and
evaluate licensing examinations. Pursuant to 10 C.F.R. § 55.40, the Commission “shall use the criteria
in NUREG-1021, ‘Operator Licensing Examination Standards for Power Reactors,’ in effect six months
before the examination date to prepare the written examinations required by [10 C.F.R.] §§ 55.41 and
55.43 and the operating tests required by [10 C.F.R.] § 55.45.” 10 C.F.R. § 55.40(a). Thus, NUREG-1021
criteria that apply to the preparation of written examinations and operating test are binding upon the Staff.

F NUREG-1021 specifies the Staff’s policies, procedures, and practices for administering the initial
and requalification written examinations and operating tests. It lists both goals and specific procedures
for the preparation, administration, and grading of the operator license examination. NUREG-1021 states that
the goal of the tests is to determine “whether the applicant’s level of knowledge and understanding meet
the minimum requirements to safely operate the facility for which the license is sought.” NUREG-1021
further states that it is intended to “ensure the equitable and consistent administration of examinations
for all applicants.” Additionally, NUREG-1021 provides that the NRC’s regional offices shall obtain
approval from the Office of Nuclear Reactor Regulation (NRR) operator licensing program office at
government headquarters before knowingly deviating from the intent of any of the NUREG-1021 standards.

G Under the agency’s regulations and NUREG-1021 standards, an applicant who was denied a license
after the first examination may elect to retake the tests. In this scenario, the regulations governing the
application process provide that “[a]n applicant who has passed either the written examination or
operating test and failed the other may request in a new application on Form NRC-398 to be excused
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

from re-examination on the portions of the examination or test which the applicant has passed." 10 C.F.R. §55.35(b).

The NRC regional office has the discretion to grant a waiver request "if it determines that sufficient justification is presented." 10 C.F.R. §55.35(b).

NUREG-1021 includes conflict of interest provisions that address the assignment of examiners to an examination team. NUREG-1021 instructs that "[t]he regional office shall not assign an examiner who failed an applicant on an operating test to administer any part of that applicant’s retake operating test." This specific prohibition is supplemented by a broader requirement, which directs that "[i]f an examiner is assigned to an examination that might appear to present a conflict of interest, the examiner shall inform his or her immediate supervisor of the potential conflict." When informed of a potential conflict, the supervisor “must apply sound judgment to the facts of each case” and, if any doubt exists, “consult with regional management and/or the NRR operator licensing program office to resolve the issue.”

Pursuant to Subpart L, each party and the NRC Staff are required to make initial disclosures under paragraphs (a) and (b) of section 2.336, based on the information and documentation reasonably available to it. A party, including the NRC Staff, is not excused from making the required disclosures because it has not fully completed its investigation of the case, it challenges the sufficiency of another entity’s disclosures, or that another entity has not yet made its disclosures. See 10 C.F.R. § 2.336(c). All disclosures under this section must be accompanied by a certification (in the form of a sworn affidavit) that all relevant materials required by this section have been disclosed, and that the disclosures are accurate and complete as of the date of the certification. See id. The duty of disclosure is continuing.

Parties must update their disclosures every month after initial disclosures on a due date selected by the presiding officer in the order admitting contentions. See id. § 2.336(d). Disclosure updates shall include any documents subject to disclosure that were not included in any previous disclosure update. See id. A party, including the Staff, may be sanctioned for noncompliance with the disclosure regulations. See id. § 2.336(e)(1). The presiding officer may impose sanctions on a party that fails to provide any document required to be disclosed, unless the party demonstrates good cause for its failure to make the disclosure. See id. § 2.336(e)(2).

The NRC Staff is under a special obligation to create and to maintain a hearing file. See 10 C.F.R. § 2.1203(a). The NRC Staff has a continuing duty to keep the hearing file up to date. See id. § 2.1203(c).

The standard of review in this case, as in most administrative proceedings, is a preponderance of the evidence, with the applicant or proponent of an order bearing the burden of proof. See Advanced Medical Systems, Inc. (One Factory Row, Geneva, Ohio 44041), CLI-94-6, 39 NRC 285, 302 n.22 (1994) (citations omitted), aff’d, Advanced Medical Systems, Inc. v. NRC, 61 F.3d 903 (6th Cir. 1995). This is consistent with 10 C.F.R. § 2.325 which states ["t]he burden of proof otherwise orders, the applicant or the proponent of an order has the burden of proof." 10 C.F.R. § 2.325.

In assessing whether an applicant satisfies the burden of establishing that the Staff’s determination of the applicant’s performance was inappropriate, unjustified, arbitrary, or an abuse of discretion, the Board should consult NUREG-1021. See Frank J. Calabrese Jr. (Denial of Senior Reactor Operator License), LBP-97-16, 46 NRC 66, 86 (1997).

NUREG documents do not generally establish regulatory requirements, but NUREG-1021 states that it is intended to “help NRC examiners and facility licensees [to] better understand the . . . initial and requalification [examination processes and to] ensure the equitable and consistent administration of examinations for all applicants.”

While public officials are afforded a presumption of regularity in the discharge of their duties (see McIntyre-Handy v. West Telemarketing Corp., 97 F. Supp. 2d 718, 727 (E.D. Va. 2000)), this presumption can be shifted upon the presentation of evidence showing official actions that are irregular. If the facts
before the Board do not appear regular, then the presumption does not attach. See Collins v. Shinseki, 2013
WL 6000535 at *6 (Vet. App. 2013). The presumption “does not help to sustain an action that on its face
appears irregular. . . . [In fact,] the presumption operates in reverse. If it appears irregular, it is irregular,
and the burden shifts to the proponent to show the contrary.” United States v. Roses Inc., 706 F.2d 1563,
1567 (Fed. Cir. 1983).

The idea behind the prejudicial error rule (also known as the harmless error rule) is that if the
agency’s error did not affect the outcome, it did not prejudice the petitioner. See Jicarilla Apache Nation v.
U.S. Department of the Interior, 613 F.3d 1112, 1121 (D.C. Cir. 2010). In general, the burden of proving
prejudicial error by a federal agency rests with the party challenging the agency’s action. See Shinseki v.
Sanders, 556 U.S. 396 (2009). However, this is “not . . . a particularly onerous requirement.” Jicarilla
Apache Nation, 613 F.3d at 1121 (quoting Shinseki v. Sanders, 556 U.S. at 410). It is sufficient “that
the agency’s error may have affected the outcome.” Charlton v. Donley, 846 F. Supp. 2d 76, 85 (D.D.C.

The NRC Staff has an obligation to lay all relevant materials before the Board to enable it to
adequately dispose of the issues before it. Consolidated Edison Co. of New York (Indian Point, Units 1, 2,
and 3), CLI-77-2, 5 NRC 13 (1977); Louisiana Power and Light Co. (Waterford Steam Electric Station,
Unit 3), ALAB-732, 17 NRC 1076, 1091 n.18 (1983), citing Indian Point, CLI-77-2, 5 NRC at 15. See
generally Tennessee Valley Authority (Browns Ferry Nuclear Plant, Units 1, 2, and 3), ALAB-677, 15
NRC 1387 (1982); Allied-General Nuclear Services (Barnwell Nuclear Fuel Plant Separation Facility),
ALAB-296, 2 NRC 671, 680 (1975). All parties, including the Staff, are obligated to bring any significant
new information to the Board’s attention. Metropolitan Edison Co. (Three Mile Island Nuclear Station,
Unit 1), ALAB-738, 18 NRC 177, 197 n.39 (1983), rev’d in part on other grounds, CLI-85-2, 21 NRC 282
(1983), citing Tennessee Valley Authority (Browns Ferry Nuclear Plant, Units 1, 2, and 3), ALAB-677, 15
NRC at 1394; Union Electric Co. (Callaway Plant, Unit 1), ALAB-750, 18 NRC 1205, 1210 n.11 (1983);
Sacramento Municipal Utility District (Rancho Seco Nuclear Generating Station), CLI-93-3, 37 NRC
135, 152-53 n.46 (1993). An agency of the government must scrupulously observe the rules, regulations,
or procedures which it has established. See United States ex rel. Accardi v. Shaughnessy, 347 U.S. 260

In this Order, the Atomic Safety and Licensing Board (Board) determines that the Applicant
has carried its burden of demonstrating by a preponderance of the evidence that it is not subject to
impermissible foreign ownership, control, or domination and that its revised combined license application
does not contravene section 103d of the Atomic Energy Act (AEA) and 10 C.F.R. § 50.38.

In context with the other provisions of section 104d of the AEA, the foreign control limitation should
be given an orientation toward safeguarding the national defense and security. And the restriction on foreign ownership, control, or domination and that its revised combined license application does not contravene section 103d of the Atomic Energy Act (AEA) and 10 C.F.R. § 50.38. Section 103d of the AEA states that no license may be issued to any corporation or other entity if the Commission knows or has reason to believe it is owned, controlled, or dominated by an alien, a foreign corporation, or a foreign government.

Control or domination must be of such a degree that the will of the licensee is subjugated to the
will of the foreign entity, and the foreign entity must have the power to direct the actions of the licensee.
And the restriction on foreign ownership, control, or domination should be given an orientation toward
safeguarding the national defense and security. When an applicant that is seeking to acquire a 100% interest in the facility is wholly owned by a U.S. company that is wholly owned by a foreign corporation, the applicant will not be eligible for a license. There is no specific threshold above which it would be conclusive that an applicant is controlled by foreign interests through ownership.

If an applicant was in fact subject to foreign control or domination, it is reasonable to expect that there
would be manifestations of this in the corporate organization and management, and, further, that there
would be recognition of such circumstances by those corporate officers who must furnish the Commission
with the sworn information prescribed by 10 C.F.R. § 50.33.
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

I An applicant with foreign ownership can still be eligible for a license if certain conditions are imposed, such as requiring that officers and employees of the applicant responsible for special nuclear material must be U.S. citizens.

J If a license applicant’s negotiation action plan can successfully wall off the foreign entity from influencing the applicant’s decisionmaking regarding nuclear safety, security, and reliability concerns, then the AEA’s prohibition on foreign control or domination will not stand in the way of the applicant seeking that license.

K A negation action plan is part of an applicant’s Final Safety Analysis Report and, therefore, is part of the licensing basis of the facility. An applicant, if granted its license, must comply with those commitments — regardless of the fact that they do not take the form of formal license conditions. If an applicant subsequently wished to change those commitments to any significant extent, it would need to file a license amendment request, which could then be challenged by seeking a hearing.

L While the pertinent language of the AEA is certainly written in present tense, a Board’s inquiry does not end with evaluating foreign ownership, control, or domination concerns posed only by the current corporate structure and financing. Although section 103d of the AEA states that an applicant who “is” subject to foreign ownership, control, or domination is ineligible to apply for or obtain a license, once a license is granted, the prohibition on foreign ownership, control, or domination remains. Put another way, the license an applicant seeks encompasses more than merely the present — it extends decades into the future. And that “is” the corporate structure and financing that an application describes for the entire temporal span encompassed by the license it seeks. Concomitantly, an applicant’s negation action plan addresses not only how it avoids foreign ownership, control, or domination now, but how it will continue to avoid foreign ownership, control, or domination throughout the entire license period.

M If a license applicant’s NAP can successfully wall off the foreign entity from influencing the applicant’s decisionmaking regarding nuclear safety, security, and reliability concerns, then the AEA’s prohibition on foreign control or domination will not stand in the way of the applicant seeking that license.

N While a Standard Review Plan lacks the legal force of duly issued regulations, the Commission has written that it is to be given special weight as a guidance document that has been approved by the Commission but is nonbinding guidance.

LBP-14-4 EXELON GENERATION COMPANY, LLC (Dresden Nuclear Power Station, Units 2 and 3), Docket Nos. 50-237-EA, 50-249-EA (ASLBP No. 14-930-01-EA-BD01); ENFORCEMENT; April 17, 2014; MEMORANDUM AND ORDER (Denying Petition to Intervene and Request for Hearing)

A In this Memorandum and Order, the Atomic Safety and Licensing Board (Board) determines that petitioner failed to establish standing under 10 C.F.R. § 2.309(d) and failed to proffer an admissible contention under 10 C.F.R. § 2.309(f)(1), denies its petition to intervene and request for hearing, and terminates the proceeding before the Board.

B To intervene as a party in an adjudicatory proceeding concerning an NRC enforcement order, a petitioner must (1) establish it has standing; and (2) proffer at least one admissible contention.

C Unlike demands for a hearing by the subject of an enforcement order, which are automatic without regard to satisfying 10 C.F.R. § 2.309, both the Commission and other licensing boards have consistently required third parties seeking intervention with respect to an enforcement order to meet the 10 C.F.R. § 2.309 criteria, and have not considered such requests to be automatic.

D Although on its face the language of 10 C.F.R. § 2.202(a)(3) might be ambiguous, its regulatory history makes clear that the Commission did not intend to relieve third-party individuals who are not the subject of an enforcement order (but who nonetheless seek a hearing on the order) from satisfying the requirements for a petition for intervention set forth in 10 C.F.R. § 2.309.

E Generally, a nonparty petitioner may not challenge a confirmatory order embodying a settlement if the order improves the safety situation over what it was in the absence of the order.

F The critical inquiry in a proceeding involving any confirmatory order is whether the order somehow diminishes the licensee’s health and safety conditions.

G Settlements of NRC enforcement actions are favored. If employees do not assert a plausible adverse effect on safety or the environment, they may not initiate an NRC adjudicatory proceeding to void the decision of their company’s management to settle an enforcement action.

H Discretionary intervention may be considered only when at least one requestor/petitioner has established standing and at least one admissible contention has been admitted so that a hearing will be held.
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

I The NRC’s proximity presumption to establish standing has no application in an enforcement proceeding such as this. The presumption is limited to reactor licensing proceedings and to other cases where there is an obvious potential of offsite radiological consequences.

LBP-14-5 POWERTECH USA, INC. (Dewey-Burdock In Situ Uranium Recovery Facility), Docket No. 40-9075-MLA (ASLBP No. 10-898-02-MLA-BD01); MATERIALS LICENSE; April 28, 2014; MEMORANDUM AND ORDER (Ruling on Proposed Contentions Related to the Final Supplemental Environmental Impact Statement)
A To be admissible, a new or amended contention must satisfy the substantive contention admissibility standards set forth in 10 C.F.R. § 2.309(f)(1).
B A new or amended contention related to portions of the FSEIS that differ from the DSEIS must be timely filed under section 2.309(c) and must meet the contention admissibility standards of section 2.309(f)(1) to be admitted.
C If a party submits a proposed contention after the initial filing deadline announced in the applicable Federal Register notice for submitting a hearing petition, it must not only meet the contention admissibility standards of section 2.309(f)(1), but must also satisfy the timeliness requirements of section 2.309(c) or section 2.307(a).
D If the reason a motion to admit a new or amended contention was filed after the initial deadline does not relate to the substance of the filing itself, the standard contained in 10 C.F.R. § 2.307(a) applies in determining whether the motion can be considered timely. Section 2.307(a) provides that a filing deadline “may be extended or shortened either by the Commission or the presiding officer for good cause, or by stipulation approved by the Commission or the presiding officer.” Good cause exists when 10 C.F.R. § 2.309(c)(1)(i)-(iii) is fulfilled.
E Admitted contentions challenging NRC Staff’s DSEIS may function as challenges to portions of the FSEIS when the information is sufficiently similar. If the FSEIS analysis or discussion is in pari materia with the DSEIS analysis or discussion, a party need not file a new or amended contention; the previously admitted contention will simply be viewed as applying to the relevant portion of the FSEIS. Parties need not file additional statements with the Board concerning contentions which migrate to the FSEIS.
F An admitted contention remains an admitted contention until it is adjudicated by the Board or eliminated prior to the hearing by the filing of a dispositive motion. To remove an admitted contention from the proceeding, a party must file, and a Board must grant, a motion for summary disposition in conformance with 10 C.F.R. § 2.1205.
G There are two primary types of contentions — contentions of omission and contentions of adequacy. “A contention of omission is one that alleges an application suffers from an improper omission, whereas a contention of adequacy raises a specific substantive challenge to how particular information or issues have been discussed in the application.” Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 6 and 7), LBP-11-6, 73 NRC 149, 200 n.53 (2011). Based on its language, a contention can be characterized as a contention of omission, a contention of adequacy, or both.
H A contention of omission which has been admitted may be rendered moot by subsequent license-related documents filed by the NRC Staff that address the alleged omission.
I In the case of an admitted contention that challenges the adequacy of an environmental document, the inclusion of additional information in a subsequent environmental document may or may not moot the contention.

LBP-14-6 NORTHERN STATES POWER COMPANY (Prairie Island Nuclear Generating Plant Independent Spent Fuel Storage Installation), Docket No. 72-10-ISFSI-2 (ASLBP No. 12-922-01-ISFSI-MLR-BD01); INDEPENDENT SPENT FUEL STORAGE INSTALLATION; April 30, 2014; MEMORANDUM AND ORDER (Ruling on Motion to Admit New and Amended Contentions)
A This proceeding concerns the application of Northern States Power Company for renewal of the operating license for its 10 C.F.R. Part 72 license to operate an Independent Spent Fuel Storage Installation (ISFSI) at the Prairie Island Nuclear Generating Plant in Red Wing, Minnesota. The Prairie Island Indian Community (PIIC) moved to admit three new and amended contentions challenging the Nuclear Regulatory Commission’s Draft Environmental Assessment (EA). The Board held in abeyance amended Contention 1, in whole, and amended Contention 2, in part. It also admitted amended Contention 2, in part, and a renewed and amended Contention 3, in part.
B In light of the vacatur of the Waste Confidence Decision and Temporary Storage Rule in New York v. NRC, 681 F.3d 471 (D.C. Cir. 2012), NRC’s rules require that the EA must consider the impact of...
long-term storage at the Prairie Island ISFSI. Contentsions concerning the failure of the EA to do so must be held in abeyance pursuant to the Commission’s direction in Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-12-16, 76 NRC 63 (2012).

C Under regulations promulgated by the Council on Environmental Quality (CEQ), “cumulative impact” is defined as the “impact on the environment which results from the incremental impact of the action when added to other past, present, and reasonably foreseeable future actions regardless of what agency (Federal or non-Federal) or person undertakes such other actions.” 40 C.F.R. § 1508.7.

D The failure to include all connected actions within the scope of the proposed action is generally referred to as “segmentation.” “Segmentation” or ‘piecemealing’ occurs when an action is divided into component parts, each involving action with less significant environmental effects. Town of Huntington v. Marsh, 859 F.2d 1134, 1142 (2d Cir. 1988). “Segmentation is to be avoided in order to ‘insure that interrelated project[s], the overall effect of which is environmentally significant, not be fractionalized into smaller, less significant actions.’” Id.

E If actions are “reasonably foreseeable future actions” within the meaning of 40 C.F.R. § 1508.7, the CEQ regulations require that they be included in a cumulative impact analysis. See Kern v. U.S. Bureau of Land Management, 284 F.3d 1062, 1079 (9th Cir. 2002).

F The NRC has acknowledged that a cumulative impact analysis is required for actions covered by CEQ regulation 40 C.F.R. § 1508.7 — that is, reasonably foreseeable future actions — without suggesting that the test for connected actions in CEQ regulation 40 C.F.R. § 1508.25 must also be satisfied. See Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), CLI-10-5, 71 NRC 90, 102 n.60 (2010); Hydro Resources, Inc. (P.O. Box 777, Crownpoint, NM 87313), CLI-06-29, 64 NRC 417, 422 & n.23 (2006).

G Under 40 C.F.R. §§ 1508.25, separate actions are “connected” if they cannot or will not proceed unless other actions are taken previously or simultaneously, as well as when they are interdependent parts of a larger action and depend on the larger action for their justification. See 40 C.F.R. § 1508.25(a)(1)(ii).

H The Commission has ruled that only those NRC-regulated facilities located within the Ninth Circuit’s jurisdictional boundaries are required to conduct environmental analyses of possible terrorist acts. See Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-14, 71 NRC 449, 476-77 (2010).

I The federal government bears a trust responsibility to the Tribe, and the NRC, as a federal agency, owes a fiduciary duty to the Tribe and its members. See, e.g., Seminole Nation v. United States, 316 U.S. 286, 296-97 (1942).

J A motion to strike may be granted where a pleading or other submission contains information that is irrelevant. See Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), LBP-05-20, 62 NRC 187, 228 (2005) (citing Power Authority of the State of New York (James A. FitzPatrick Nuclear Power Plant; Indian Point, Unit 3), CLI-01-14, 53 NRC 488, 514 (2001)).

LBP-14-7 DTE ELECTRIC COMPANY (Fermi Nuclear Power Plant, Unit 3), Docket No. 52-033-COL (ASLBP No. 09-880-05-COL-BD01); COMBINED LICENSE; May 23, 2014; PARTIAL INITIAL DECISION (Ruling on Contentions 8 and 15)

A This proceeding involves challenges to the combined license application of the DTE Electric Company (“Applicant”) to operate a new reactor, designated Unit 3, on its existing Fermi nuclear facility site near Newport City in Monroe County, Michigan. The Licensing Board rules in favor of the NRC Staff on Contention 8, which challenges the adequacy of the assessment of impacts on the eastern fox snake contained within the Final Environmental Impact Statement (“FEIS”), and in favor of the Applicant on Contention 15, which challenges the adequacy of the quality assurance (“QA”) program developed and implemented by the Applicant.

B While an applicant in a licensing decision bears the burden of proving by a preponderance of the evidence that it is entitled to the applied-for license, the NRC Staff bears the burden of establishing compliance with the National Environmental Policy Act (“NEPA”) when an environmental contention alleges noncompliance. Because the Staff typically relies on an applicant’s Environmental Report in preparing the FEIS, an applicant is free to support positions set forth in the FEIS that are under challenge.

C Under NEPA, the NRC is required to take a hard look at the environmental impacts of a proposed action. The hard look requirement, however, is tempered by a rule of reason that requires agencies to address only impacts that are reasonably foreseeable — not those that are remote and speculative.
D One important part of an agency’s hard look at the environmental consequences of a proposed federal action is the duty to discuss measures to mitigate potential environmental harm. NEPA does not require a fully developed, enforceable, or funded plan to mitigate all environmental harm. But mitigation must be discussed in sufficient detail to ensure that the environmental consequences have been fully evaluated.

E Consistent with CEQ guidance, a federal agency may rely upon the ameliorative effects of mitigation in evaluating the environmental impacts of an activity in an EIS only if reliance is justified by (1) the proposed mitigation being more than a mere possibility because it is imposed by statute or regulation or sufficiently integrated into the initial proposal such that it is impossible to define the proposal without mitigation, and (2) there being some assurance, either through supporting evidence or accountability measures, that the mitigation will adequately protect against the negative environmental impacts of the activity.

F Neither the Atomic Energy Act nor the NRC’s regulations require an applicant to show that its quality assurance program is perfect as a precondition to the issuance of a license. Rather, an applicant must provide reasonable assurance that the plant, as built, can and will be operated without endangering the public health and safety.

G Regulatory interpretation, like the interpretation of a statute, begins with the language and structure of the provisions, and the entirety of each provision must be given effect. Where the meaning of a regulation is clear, the regulatory language is conclusive and the Board may not disregard the letter of the regulation, but must enforce the regulation as written.

H Appendix B’s use of the past tense when referring to “quality assurance applied to the design” shows that safety-related design activities must have been performed under an acceptable QA program even if those activities were performed prior to the date on which the application was filed with the NRC.

I The Appendix B requirements apply to the design of the safety-related functions of the structures, systems, and components that prevent or mitigate the consequences of postulated accidents. The regulation draws no distinction between safety-related design activities performed before the application is submitted and those performed later. For licensing purposes, all safety-related design activities must be performed under a QA program that satisfies the requirements of Appendix B.

J Section 52.79(a)(25) of 10 C.F.R. establishes the requirements for an applicant’s Final Safety Analysis Report, including a requirement that safety-related design activities must have been performed under an acceptable QA program prior to the date on which the application is filed. The regulation also confirms that the QA program must meet the requirements of Appendix B.

K Appendix B allows an applicant to “delegate to others . . . the work of establishing and executing the quality assurance program, or any part thereof, but [requires that the applicant] shall retain responsibility for the quality assurance program.” Appendix B does not define what is meant by “retain responsibility.” The Board will, therefore, consider all relevant facts and circumstances to determine whether the applicant has exercised sufficient supervision, oversight, and contractual control of a contractor’s QA program during the preapplication period.

LBP-14-8 VIRGINIA ELECTRIC AND POWER COMPANY d/b/a DOMINION VIRGINIA POWER and OLD DOMINION ELECTRIC COOPERATIVE (North Anna Power Station, Unit 3), Docket No. 52-017-COL (ASLBP No. 08-863-01-COL); COMBINED LICENSE; June 13, 2014; MEMORANDUM AND ORDER (Denying BREDL’s Motion to Reopen and Admit Contention 14)

A In this previously terminated proceeding regarding the combined license application of Virginia Electric and Power Company, d/b/a Dominion Virginia Power, to operate a new unit at its existing North Anna Power Station, the Licensing Board denies the Blue Ridge Environmental Defense League’s (“Petitioner”) motion to reopen the proceeding and admit a new contention (“Contention 14”) related to the August 23, 2011 earthquake in Mineral, Virginia. The Board declines to admit Contention 14 because Petitioner fails to satisfy the 10 C.F.R. § 2.309(f)(1) standard for admission of a new contention. The accompanying request to reopen the proceeding to admit the new contention is therefore moot.

B The 10 C.F.R. § 2.326 standard for reopening a previously terminated proceeding sets a high bar for a petitioner, requiring that a motion be supported by affidavit, be timely, address a significant safety or environmental issue, and demonstrate that a materially different result would have been likely if the new evidence had been available.

C Mere mention by a petitioner that it will rely on an expert’s analysis to support its motion to reopen, without offering any details of that analysis, does not satisfy the 10 C.F.R. § 2.326(b) requirement that a
motion to reopen be “accompanied by affidavits that set forth the factual and/or technical bases for the movant’s claim.”

D In addition to satisfying the 10 C.F.R. § 2.326 reopening standard, the petitioner must also show that the proposed new contention meets the standard for new or amended contentions in 10 C.F.R. § 2.309(c) and the underlying admissibility standards of 10 C.F.R. § 2.309(f)(1). Failure to satisfy any of these standards will lead to denial of the motion to reopen.

E Failure to comply with any of the 10 C.F.R. § 2.309(f)(1) requirements renders a contention inadmissible. Should a petitioner’s proffered contention fail to satisfy the underlying admissibility requirements, an accompanying motion to reopen a terminated proceeding under 10 C.F.R. § 2.326 becomes moot.

F An applicant’s mere request of a regulatory exemption, absent any showing that the request is improper or unsupported, does not give rise to a litigable issue sufficient to satisfy 10 C.F.R. § 2.309(f)(1)(i)’s requirement that a petitioner “[p]rovide a specific statement of the issue of law or fact to be raised or controverted.”

G Resolution of all contentions pending before a Licensing Board gives rise to an immediate right of appeal under 10 C.F.R. § 2.341.

LBP-14-9 DETROIT EDISON COMPANY (Fermi Nuclear Power Plant, Unit 3), Docket No. 52-033-COL (ASLBP No. 09-880-05-COL-BD01); COMBINED LICENSE; July 7, 2014; MEMORANDUM (Determining That Issues Related to Intervenors’ Proposed Contention 23 Merit Sua Sponte Review Pursuant to 10 C.F.R. § 2.340(b) and Requesting Commission Approval)

A This proceeding involves the combined license application of the DTE Electric Company (“Applicant”) to operate a new reactor, designated Unit 3, on its existing Fermi nuclear facility site near Newport City in Monroe County, Michigan. The Licensing Board determines that the following two related issues merit sua sponte review, and requests Commission approval, under 10 C.F.R. § 2.340(b), to undertake such review: (1) whether the building of offsite transmission lines intended solely to serve the new Fermi Unit 3 qualifies as a connected action under the National Environmental Policy Act (“NEPA”) and, therefore, requires the Staff to consider its environmental impacts as a direct effect of the construction of Fermi Unit 3; and (2) whether the Staff’s consideration of environmental impacts related to the transmission corridor, performed as a cumulative impact review, satisfied NEPA’s hard look requirement.

B The NRC’s 2007 limited work authorization (“LWA”) rule revised 10 C.F.R. § 50.10 to narrow the scope of activities requiring permission from the NRC in the form of an LWA by eliminating the concept of “commencement of construction” formerly described in section 50.10(c) and the authorization formerly described in section 50.10(c)(1). “Instead, under the final LWA rule, NRC authorization would only be required before undertaking activities that have a reasonable nexus to radiological health and safety and/or common defense and security for which regulatory oversight is necessary and/or most effective in ensuring reasonable assurance of adequate protection to public health and safety or common defense and security.” Final Rule: “Limited Work Authorizations for Nuclear Power Plants,” 72 Fed. Reg. 57,416, 57,426 (Oct. 9, 2007). Under the 2007 LWA rule, the building of transmission lines to serve a nuclear power plant is no longer classified as a construction activity and no longer requires authorization from the NRC. The agency’s NEPA regulations (10 C.F.R. Part 51) also exclude the building of transmission lines from the definition of “construction.”

C The NRC Staff must comply with NEPA regardless of whether an intervenor has filed a timely contention challenging NEPA compliance.

D Under 10 C.F.R. § 2.340(b), a licensing board may request Commission approval to consider the merits of a serious environmental issue that has not been put into controversy, even when it was excluded from the proceeding for procedural reasons. The regulation does not define what constitutes a serious environmental issue, leaving that determination to the presiding officer subject to the Commission’s approval.

E “The centerpiece of environmental regulation in the United States, NEPA requires federal agencies to pause before committing resources to a project and consider the likely environmental impacts of the preferred course of action as well as reasonable alternatives.” New Mexico ex rel. Richardson v. Bureau of Land Management, 565 F.3d 683, 703 (10th Cir. 2009) (citing 42 U.S.C. § 4331(b)). When an agency proposes a major federal action significantly affecting the quality of the human environment, NEPA requires the preparation of an environmental impact statement (“EIS”) concerning the proposed action. The requirement to prepare an EIS is a procedural mechanism designed to assure that agencies give proper
considersation to the environmental consequences of their actions. However, NEPA does not require agencies to elevate environmental concerns over other appropriate considerations.

F The scope of an EIS is defined as “the range of actions, alternatives, and impacts to be considered in an environmental impact statement.” 40 C.F.R. § 1508.25. “Proposals or parts of proposals which are related to each other closely enough to be, in effect, a single course of action shall be evaluated in a single impact statement.” Id. § 1502.4(a). The proposed action that is the subject of the EIS must, therefore, include all connected actions.

G The NRC has adopted the Council on Environmental Quality (“CEQ”) regulation (40 C.F.R. § 1508.25(a)(1)) defining connected actions as, in part, those separate actions that “[c]annot or will not proceed unless other actions are taken previously or simultaneously,” or “[a]re interdependent parts of a larger action and depend on the larger action for their justification.” In general, NEPA case law defines “connected actions” as those that lack “independent utility.” Projects lack independent utility when it would be irrational, or at least unwise, to build one without the other.

H The failure to include all connected actions within the scope of the proposed action is generally referred to as “segmentation.” “Segmentation” or “piecemealing” occurs when an action is divided into component parts, each involving action with less significant environmental effects.” Town of Huntington v. Marsh, 859 F.2d 1134, 1142 (2d Cir. 1988) (citing City of West Chicago v. NRC, 701 F.2d 632, 650 (7th Cir. 1983)). “Segmentation is to be avoided in order to ‘insure that interrelated project[s]’ the overall effect of which is environmentally significant, not be fractionalized into smaller, less significant actions.” Id. (quoting Taxpayers Watchdog, Inc. v. Stanley, 819 F.2d 294, 298 (D.C. Cir. 1987)).

I The NRC’s evaluation of a proposed action’s environmental effects “must address all reasonably foreseeable environmental impacts . . . even if the probability of such an occurrence is low.” Blue Ridge Environmental Defense League v. NRC, 716 F.3d 183, 188 (D.C. Cir. 2013) (citing 40 C.F.R. § 1502.22(b)). NEPA requirements, however, are subject to a rule of reason, and an EIS need not address “remote and highly speculative consequences.” Deskmejian v. NRC, 751 F.2d 1287, 1300 (D.C. Cir. 1984) (quoting Trout Unlimited v. Morton, 509 F.2d 1276, 1283 (9th Cir. 1974)). The impacts that must be considered include both direct impacts, “which are caused by the action and occur at the same time and place,” and indirect impacts, “which are caused by the action and are later in time or farther removed in distance, but are still reasonably foreseeable.” 40 C.F.R. § 1508.8.

J When information relevant to a reasonably foreseeable environmental effect is incomplete or unavailable, 40 C.F.R. § 1502.22 requires an agency to obtain the unavailable information and include it in the EIS so long as the costs are not exorbitant. If the cost of obtaining the information is exorbitant, the agency must still include in the EIS a statement that the information is unavailable, the relevance of the unavailable information, a summary of existing credible scientific evidence, and the agency’s evaluation of the impacts that might be caused.

K An EIS must include a detailed statement of reasonable alternatives to the proposed action. The alternatives analysis is the “heart of the environmental impact statement.” “The existence of reasonable but unexamined alternatives renders an EIS inadequate.” Friends of Southeast’s Future v. Morrison, 153 F.3d 1059, 1065 (9th Cir. 1998). The NRC’s NEPA regulation governing preparation of a Draft EIS directs that it “include a preliminary analysis that considers and weighs the environmental effects of the proposed action; the environmental impacts of alternatives to the proposed action; and alternatives available for reducing or avoiding adverse environmental effects . . . .” 10 C.F.R. § 51.71(d).

L Activities excluded from the scope of the proposed action may still be relevant to the NRC’s NEPA analysis to the extent they affect the environmental baseline for the evaluation of cumulative impacts. Under CEQ regulations (40 C.F.R. § 1508.7), “cumulative impact” is defined as the “impact on the environment that results from the incremental impact of the [proposed] action when added to other past, present, and reasonably foreseeable future actions regardless of what agency (Federal or non-Federal) or person undertakes such other actions.”

M Under 10 C.F.R. § 51.101(a), when an EIS is prepared under 10 C.F.R. §51.20, “[n]o action concerning the proposal may be taken by the Commission which would (i) have an adverse environmental impact, or (ii) limit the choice of reasonable alternatives” until a record of decision has been issued. Also, “[n]o action concerning the proposal taken by an applicant which would (i) have an adverse environmental impact, or (ii) limit the choice of reasonable alternatives may be grounds for denial of the license.” For separate activities, on the other hand, there is no obligation on the Commission to avoid regulatory action before the record of decision is issued that would allow the activity to proceed, regardless
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

of its environmental impact or its effect on the range of alternatives. And the applicant may proceed with
(or allow its contractor to proceed with) an activity outside the scope of the proposal that would have an
adverse environmental impact or limit the choice of reasonable alternatives even though the NEPA review
is ongoing or has not even begun.

N In order for construction of the transmission corridor to constitute a connected action under 40 C.F.R.
§ 1508.25, three requirements must be met. First, the transmission corridor must be a proposed action
rather than one that is merely conceivable. Second, the transmission corridor must lack independent utility;
that is, its sole purpose must be serving Fermi Unit 3. Third, for an action such as the transmission corridor
that will not be constructed by or expressly permitted by the federal agency preparing the EIS, there must
be sufficient federal control and responsibility that the action qualifies as a federal action.
O Under 40 C.F.R. § 1508.23, the fact that the NRC Staff declares the transmission lines to be a
proposed action is significant because “[a] proposal may exist in fact as well as by agency declaration that
one exists.”

P An action with potential impacts subsequent to the initial federal action may not constitute a proposed
action if it is insufficiently certain.

Q Whether a project qualifies as a “proposal” is somewhat intertwined with the “independent utility”
question. Section 1508.23 of 40 C.F.R. states that a “[p]roposal exists at that stage in the development of
an action when an agency subject to the Act has a goal and is actively preparing to make a decision on
one or more alternative means of accomplishing that goal and the effects can be meaningfully evaluated.
Preparation of an environmental impact statement on a proposal should be timed so that the final statement
may be completed in time for the statement to be included in any recommendation or report on the
proposal.” Where the granting of a license makes the building of offsite transmission lines inevitable, an
evaluation of their direct environmental impacts will only be meaningful if engaged in before the license
issuance.

R The requirement to prepare an EIS applies to “major Federal actions,” not to private or state actions.
Thus, only those activities that have sufficient federal involvement to qualify as federal actions need be
included in the scope of the proposed action evaluated in an EIS. But this does not necessarily mean
that the action in question must be taken or expressly authorized by a federal agency. “[T]here are
two alternative bases for finding that a non-federal project constitutes a ‘major Federal action’ such that
NEPA requirements apply: (1) when the non-federal project restricts or limits the statutorily prescribed
federal decision-makers’ choice of reasonable alternatives; or (2) when the federal decision-makers have
authority to exercise sufficient control or responsibility over the non-federal project so as to influence the
outcome of the project. If either test is satisfied, the non-federal project must be considered a major federal
action. Both tests require a situation-specific and fact-intensive analysis.” Southwest Williamson County
Community Ass’n, Inc. v. Slater, 243 F.3d 270, 281 (6th Cir. 2001).

S The NRC may, consistent with the AEA and NEPA, impose environmental restrictions on transmission
lines built to serve nuclear power plants should it choose to do so. The NRC’s regulations, including 10
C.F.R. §§ 50.36(b) and 51.107(a)(3), authorize the agency to impose environmental conditions in a license
to prevent or mitigate adverse environmental impacts that might otherwise be caused by the construction
or operation of a nuclear power plant.

T An agency’s narrowed construction of its statutory authority, as distinct from an express prohibition
by Congress, may not be used to limit the agency’s obligations under NEPA. “NEPA’s legislative history
reflects Congress’s concern that agencies might attempt to avoid any compliance with NEPA by narrowly
construing other statutory directives to create a conflict with NEPA. Section 102(2) of NEPA therefore
requires government agencies to comply ‘to the fullest extent possible.’” Center for Biological Diversity v.
National Highway Traffic Safety Administration, 538 F.3d 1172, 1213 (9th Cir. 2008) (quoting Forelaws
on Board v. Johnson, 743 F.2d 677, 683 (9th Cir. 1985)). The Supreme Court has explained that this
statutory directive was “neither accidental nor hyperbolic.” Flint Ridge Development Co. v. Scenic Rivers
Ass’n of Oklahoma, 426 U.S. 776, 787 (1976). Thus, courts have held that NEPA obligations supplement
existing statutory authority and “must be complied with to the fullest extent, unless there is a clear conflict
of statutory authority.” Calvert Cliffs Coordinating Committee, Inc. v. AEC, 449 F.2d 1109, 1115 (D.C. Cir.
1971). In short, absent clear conflict an agency cannot interpret its way out of its NEPA responsibilities.

U Multiple projects are often deemed connected actions despite being undertaken by separate entities.
In fact, projects undertaken by separate entities may still be considered connected actions even in the
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

absence of formal agreement between the parties. After all, “NEPA mandates a case-by-case balancing judgment on the part of federal agencies,” not the private parties seeking federal action.

V While NEPA does not require “an agency preparing an EIS to respond to EPA concerns, [an agency’s] failure even to address them in the EIS at the very least brings into question the sufficiency of the agency’s analysis.” Hammond v. Norton, 370 F. Supp. 2d 226, 251 (D.D.C. 2005).

W The NRC Staff is responsible for defining the scope of the proposed action that is to be the subject of an EIS, and is instructed by 10 C.F.R. § 51.29(a)(1) to use 40 C.F.R. § 1502.4 for that purpose, which directs that “[p]roposals or parts of proposals which are related to each other closely enough to be, in effect, a single course of action shall be evaluated in a single impact statement.” Section 51.45(c) of 10 C.F.R. does not alter that obligation or the obligation to include within the scope of the proposed action all connected actions as defined in 40 C.F.R. § 1508.25.

X Courts regularly rely upon the preamble to an agency rule when interpreting that rule. Similarly, the Commission often refers to the NRC’s Statement of Considerations as an aid in interpreting the agency’s regulations. But the preamble, unlike the rule itself, does not have the force of law and, while it may be used to interpret any ambiguous text, it may not be used to expand the reach of the regulations.

Y When an activity is excluded from the scope of a proposed action, the effect is to allow construction to begin — or even be completed — before the agency has completed its NEPA review. But NEPA’s purpose “is to influence the decision making process by focusing the [federal] agency’s attention on the environmental consequences of a proposed project,” so as to “ensure . . . that important effects will not be overlooked or underestimated only to be discovered after resources have been committed or the die otherwise cast.”” Colorado Wild, Inc. v. U.S. Forest Service, 523 F. Supp. 2d 1213, 1219 (D. Colo. 2007) (quoting Robertson v. Methow Valley Citizens Council, 490 U.S. 332, 349 (1989)). “[W]hen a decision to which NEPA obligations attach is made without the informed environmental consideration that NEPA requires, the harm that NEPA intends to prevent has been suffered.” Id. (emphasis omitted) (quoting Sierra Club v. Marsh, 872 F.2d 497, 500 (1st Cir. 1989) (Breyer, J.). Thus, the NEPA analysis of the proposed action must be completed before, not after, construction begins.

Z An impact statement cannot fulfill its role of providing “a springboard for public comment” if it defers indefinitely and delegates to other agencies the duty to inform the public of the environmental impacts of the proposed action and potential measures to mitigate those impacts.

AA Section 1502.22 of 40 C.F.R. requires an agency to provide information that is lacking if it is “essential to a reasoned choice” and “costs of obtaining it are not exorbitant.” If the costs are exorbitant, the regulation still requires the agency to state that the information is unavailable, explain the relevance of the unavailable information, summarize existing credible scientific evidence, and evaluate potential impacts. The regulation “clearly contemplates original research if necessary.” Save Our Ecosystems v. Clark, 747 F.2d 1240, 1249 (9th Cir. 1984). A determination of minimal environmental impact would make little sense when an agency lacks essential information and has not sought to compile it through independent research. To rule otherwise “would turn NEPA on its head, making ignorance into a powerful factor in favor of immediate action where the agency lacks sufficient data.” Sierra Club v. Norton, 207 F. Supp. 2d 1310, 1334-35 (S.D. Ala. 2002).

BB Merely referencing an actual or anticipated certification by another agency fails to satisfy NEPA requirements. “Certification by another agency that its own environmental standards are satisfied involves an entirely different kind of judgment [from that required by NEPA]. Such agencies, without overall responsibility for the particular federal action in question, attend only to one aspect of the problem: the magnitude of certain environmental costs. They simply determine whether those costs exceed an allowable amount. Their certification does not mean that they found no environmental damage whatever. In fact, there may be significant environmental damage (e.g., water pollution), but not quite enough to violate applicable (e.g., water quality) standards. Certifying agencies do not attempt to weigh that damage against the opposing benefits. Thus the balancing analysis remains to be done. It may be that the environmental costs, though passing prescribed standards, are nonetheless great enough to outweigh the particular economic and technical benefits involved in the planned action. The only agency in a position to make such a judgment is the agency with overall responsibility for the proposed federal action — the agency to which NEPA is specifically directed.” Calvert Cliffs, 449 F.2d at 1123.

CC Courts have held that an EIS must include “a serious and thorough evaluation of environmental mitigation options.” Mississippi River Basin Alliance v. Westphal, 230 F.3d 170, 178 (5th Cir. 2000).
“Mitigation must be discussed in sufficient detail to ensure that environmental consequences have been fairly evaluated.” Id. at 176-77 (quoting Robertson, 490 U.S. at 352).

DD The rule against segmentation seeks to avoid the problems that arise “when the environmental impacts of projects are evaluated in a piecemeal fashion and, as a result, the comprehensive environmental impacts of the entire Federal action are never considered or are only considered after the agency has committed itself to continuation of the project.” 72 Fed. Reg. at 57,427-28.

EE “Licensing boards have independent responsibilities in the realm of the enforcement of the NEPA command; i.e., their role is not confined to the arbitration of those environmental controversies as may happen to have been placed before them by the litigants in the particular case.” Tennessee Valley Authority (Hartsville Nuclear Plant, Units 1A, 2A, 1B, and 2B), ALAB-380, 5 NRC 572, 575 (1977). Though this responsibility has changed — now requiring Commission approval before a board may exercise its responsibility — the authority still exists, as the Commission has made clear.

FF *Sua sponte* authority cannot reasonably be limited to only a situation which involves a significant environmental impact of a type not considered previously and could destabilize an environmental resource or involves severe adverse environmental impacts. A serious environmental issue also exists when a Final EIS only cursorily deals with important environmental issues and concludes that impacts will be small based largely on unavailable and incomplete information and predicted future certifications from other agencies. A serious issue is also presented when the Staff’s NEPA analysis significantly understates the scope of the proposed federal action, particularly when it does so on a basis that conflicts with the law of the federal judicial circuit where the new facility will be located.

GG When an FEIS is deficient in significant respects, a contested hearing may enable a Licensing Board to cure those deficiencies and thus bring the agency into compliance with NEPA and 10 C.F.R. Part 51. “Boards frequently hold hearings on contentions challenging the Staff’s final environmental review documents . . . . In such cases, [t]he adjudicatory record and Board decision (and . . . any Commission appellate decisions) become, in effect, part of the FEIS.” Nuclear Innovation North America LLC (South Texas Project, Units 3 and 4), CLI-11-6, 74 NRC 203, 208-09 (2011) (citing Louisiana Energy Services, L.P. (Clairborne Enrichment Center), CLI-98-3, 47 NRC 77, 89 (1998) and Philadelphia Electric Co. (Limerick Generating Station, Units 1 and 2), ALAB-819, 22 NRC 681, 705-07 (1985)). Thus, the Staff’s FEIS, along with the adjudicatory record, becomes the relevant record of decision for the environmental portion of the proceeding. Federal courts of appeal have approved of this process in which an EIS is effectively amended through the adjudicatory process.

LBP-14-10 AEROTEST OPERATIONS, INC. (Aerotest Radiography and Research Reactor), Docket No. 50-228-LT (ASLBP No. 14-931-01-LT-BD01); LICENSE TRANSFER; September 5, 2014; CERTIFICATION OF RECORD TO COMMISSION

LBP-14-11 JAMES CHAISSON, Docket No. 1A-14-025-EA (ASLBP No. 14-932-02-EA-BD01); ENFORCEMENT; September 8, 2014; NOTICE OF HEARING AND INITIAL SCHEDULING ORDER

A This proceeding concerns a July 11, 2014 enforcement order issued by the Director of the U.S. Nuclear Regulatory Commission’s Office of Enforcement (Director) against Mr. James P. Chaisson. The order alleges that Mr. Chaisson failed to comply with certain provisions of a confirmatory order issued to him in 2012. Mr. Chaisson requested a hearing and filed an answer denying certain aspects of the 2014 Order. This Notice of Hearing and Initial Scheduling Order (ISO) (1) provides notice of the Licensing Board’s intent to conduct a hearing in Salt Lake City, Utah, under 10 C.F.R. Part 2, Subpart G; (2) identifies disputed issues; and (3) establishes an initial schedule for the conduct of this matter, including any discovery pursued by the parties under Subpart G.

B When the target of an enforcement action is unrepresented, the Licensing Board will carefully scrutinize any agreement or consent purporting to waive or abandon any of the individual’s substantive or procedural rights to ensure that he is fully informed. NRC counsel should be especially scrupulous in informing him of the nature and extent of the rights they might suggest he waive or abandon.

C NRC counsel owes an ethical duty of candor to the tribunal (e.g., the duty to disclose to a tribunal any relevant information and/or legal authority adverse to its position) that is especially important in cases such as this one, where the target of the government’s enforcement action is not represented by counsel.

D Under 10 C.F.R. § 2.202(a)(3), the target of the Director’s enforcement order has the right to demand and receive, not merely request, a hearing.
Section 2.329(e) of 10 C.F.R. requires that an ISO set forth “the issues or matters in controversy to be determined in the proceeding. This is important because the scope and content of the adjudication, including mandatory disclosures under 10 C.F.R. §§ 2.704(a)(2) and 2.709(a)(6) and discovery under 10 C.F.R. § 2.705(b)(1), are defined by the issues and matters that are disputed by the parties.

Under 10 C.F.R. § 2.709, the target of a Director’s enforcement action may pursue discovery, in addition to mandatory disclosures, against the Director in the form of written questions (interrogatories), or oral questions under oath posed to a member of the Director’s staff at a prehearing meeting (deposition). Likewise, counsel for the Director may take the deposition of the target of an enforcement action or any other person, under 10 C.F.R. § 2.706(a), file written interrogatories, under 10 C.F.R. § 2.705(b), or require the target of an enforcement action to provide a copy of any designated relevant document that is within his possession, custody, or control, under 10 C.F.R. § 2.707(a). Neither party is required to pursue such discovery.

In this 10 C.F.R. Part 54 proceeding regarding the application of Union Electric Company d/b/a Ameren Missouri (Ameren) for the renewal of its 10 C.F.R. Part 50 operating license for the Callaway Plant, Unit 1, that would authorize Ameren to operate that facility in Callaway County, Missouri, for an additional 20 years, in accord with the Commission’s direction in Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-14-8, 80 NRC 71, 79 (2014), the Licensing Board (1) dismisses the sole pending contention of petitioner Missouri Coalition for the Environment (MCE) claiming that Ameren’s environmental report fails to comply with the National Environmental Policy Act by not including a discussion of the environmental impacts of spent fuel pool (SFP) leakage, SFP fires, and the lack of a spent fuel repository, as required by the decision of the United States Court of Appeals for the District of Columbia Circuit in New York v. NRC, 681 F.3d 471 (D.C. Cir. 2012); and (2) terminates this proceeding.

In this proceeding, applicant Nuclear Innovation North America (NINA) seeks combined licenses (COLs) under 10 C.F.R. Part 52 for the construction and operation of two new nuclear reactor units — proposed South Texas Project (STP) Units 3 and 4. On July 9, 2012, Intervenors, the Sustainable Energy and Economic Development Coalition, the South Texas Association for Responsible Energy, and Public Citizen, sought admission of a contention concerning continued storage of spent nuclear fuel. In accordance with the Commission’s direction in CLI-12-16, this contention was held in abeyance pending further direction from the Commission. This Order now finds that Intervenors’ contention is inadmissible and dismisses it from the proceeding, in accord with the Commission’s direction in CLI-14-8. There being no other admitted or pending contentions in this proceeding, the case is terminated.
DIGESTS

ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-14-8, 80 NRC 71 (2014), this Order finds that NRDC’s contention is inadmissible and dismisses it from the proceeding. Because there is no other admitted or pending contention in this proceeding, the case is terminated.

LBP-14-16 NORTHERN STATES POWER COMPANY (Prairie Island Nuclear Generating Plant Independent Spent Fuel Storage Installation), Docket No. 72-10-ISFSI-2 (ASLBP No. 12-922-01-ISFSI-MLR-BD01); INDEPENDENT SPENT FUEL STORAGE INSTALLATION; December 23, 2014; ORDER (Denying Motion to File a New Contention Concerning the Continued Storage of Spent Nuclear Fuel)

A Clearly, the Commission’s Continued Storage Rule and GEIS preclude any discussion of the environmental impacts of storage of spent nuclear fuel in individual licensing proceedings: NUREG-2157 provides the determinations of the environmental impacts of continued storage to be used in site-specific environmental reviews. No additional analysis of the impacts of continued storage is required.

B The Commission has repeatedly expressed its preference that generic issues regarding the management of high-level waste be addressed through rulemaking and not through individual adjudications. The Commission maintains that storage and disposal of high-level waste are a national problem of essentially the same degree of complexity and uncertainty for every renewal application and it would not be useful to have a repetitive reconsideration of the matter.

C It is apparent that the purpose of 10 C.F.R § 51.23, as updated by 79 Fed. Reg. 56,240, is to restrict repetitive litigation at the Licensing Board level on the continued storage and disposal of spent nuclear fuel.

D Subsequent to Seabrook, the Commission’s Millstone decision set forth a four-part test for granting a waiver under 10 C.F.R. § 2.335(b): “(i) the rule’s strict application ‘would not serve the purposes for which [it] was adopted’; (ii) the movant has alleged ‘special circumstances’ that were ‘not considered, either explicitly or by necessary implication, in the rulemaking proceeding leading to the rule sought to be waived’; (iii) those circumstances are ‘unique’ to the facility rather than ‘common to a large class of facilities’; and (iv) a waiver of the regulation is necessary to reach a ‘significant safety [or environmental] problem.’” Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Units 2 and 3), CLI-05-24, 62 NRC 551, 559-60 (2005).

E Although the waiver issue in Millstone involved a significant safety concern, subsequent case law makes clear Millstone applies equally to significant environmental concerns.

F There has been some discussion as to whether the Millstone factors entail more than 10 C.F.R. § 2.335(b)’s sole requirement for “special circumstances.” The Commission’s view, however, is that all four of the Millstone requirements derive from the language and purpose of section 2.335(b), and that all must be met in order for a waiver to be granted.

G A petition for a waiver must be accompanied by an affidavit stating with particularity the special circumstances alleged to justify the waiver or exception requested.

H Apart from the Prairie Island Indian Community’s (PIIC’s) own communications with the NRC, the agency also considered trust responsibility comments raised by other tribes with regards to the Continued Storage Rule. In particular, a comment lodged by the Santa Ynez Band of Chumash Indians was addressed directly in the Continued Storage GEIS.

I The Commission’s recently issued Proposed Tribal Policy Statement, 79 Fed. Reg. 71,136, 71,140 (Dec. 1, 2014), states that it owes a trust responsibility to Indian Tribes: “As an independent agency of the Federal government, the NRC shares the unique trust relationship with, and responsibility to, Indian Tribes.” In its Draft Tribal Protocol Manual, the NRC Staff also asserts that the NRC owes a trust responsibility to Indian Tribes.

J While it is possible to demonstrate that a trust responsibility concern is unique to a particular facility, PIIC merely asserts that its adjacency to the Prairie Island independent spent fuel storage installation by itself presents a legitimately unique fact situation. PIIC, however, does not explain why its adjacency to the facility creates a fundamentally different situation from those facing other tribes, which were addressed by the NRC in the Continued Storage GEIS.

LBP-15-1 FIRSTENERGY NUCLEAR OPERATING COMPANY (Davis-Besse Nuclear Power Station, Unit 1), Docket No. 50-346-LR (ASLBP No. 11-907-01-LR-BD01); OPERATING LICENSE RENEWAL; January 15, 2015; MEMORANDUM AND ORDER (Denying Intervenors’ Motion to Admit Contention No. 7)

A The requirements for demonstrating “good cause” under 10 C.F.R. § 2.309(c)(1)(i)-(iii) are the same as the requirements for filing late contentions previously available under 10 C.F.R. § 2.309(f)(2)(i)-(iii).
Therefore, despite the change in the rules, in general, contentions proposed after the filing deadline, which would have been allowable under the previous 10 C.F.R. § 2.309(f)(2) requirements, will also be allowable under the current 10 C.F.R. § 2.309(c)(1) requirements.

B If a petitioner cannot meet the requirements for filing a contention under the new 10 C.F.R. § 2.309(c)(1), he or she can still take advantage of an extension request under 10 C.F.R. § 2.307 “if unanticipated events, such as a weather event or unexpected health issues, prevented the participant from filing for a reasonable period of time after the deadline.”

C Under AmerGen Energy Co. (Oyster Creek Nuclear Generating Station), CLI-09-7, 69 NRC 235 (2009), in general, if the applicant’s enhanced monitoring program is inadequate, then an unenhanced monitoring program would have been a fortiori inadequate, and petitioners would have had a regulatory obligation to challenge it earlier. However, Oyster Creek cannot be read so broadly as to exclude contentions that are founded upon genuinely new safety concerns.

D Oyster Creek instead stands for the more limited proposition that enhancements to a license renewal application (LRA) or environmental impact statement (EIS), not made in the presence of a newly discovered safety or environmental concern, generally cannot be grounds for a new contention. However, if a newly discovered safety or environmental concern presents itself, a petitioner can file a new contention alleging that the LRA or EIS does not adequately address the new concern. Furthermore, preemptive amendment of an LRA or EIS in response to the new discovery does not insulate the LRA or EIS from public oversight.

E The crux of the “genuine dispute” prong under 10 C.F.R. § 2.309(f)(1)(vi) is the requirement for specificity: a contention must have more than general allegations. Rather, it must explain “what” specific deficiencies exist and “why” they materially impact the LRA or EIS. Stated another way, in addition to stating what they disagree with, petitioners must also explain, with specific support, why the disagreed-upon issue will have a material impact.

F Requests for more testing, more methods of testing, and more information, all of which are sought without explaining why the current program is inadequate, are insufficient to create a genuine dispute with the application.

G “[T]he Commission expects that in almost all instances a petitioner must go beyond merely quoting an RAI [NRC Staff request for more information] to justify admission of a contention into the proceeding. . . . This means they must develop a fact-based argument that actually and specifically challenges the application.” Duke Energy Corp. (Oconee Nuclear Station, Units 1, 2, and 3), CLI-99-11, 49 NRC 328, 341 (1999).

H In explaining why there is a genuine material dispute, the contention must give the Board a reason to believe that the alleged deficiency will lead to a material safety or environmental outcome, based on factual or expert support. Because of the need to provide specific support for a contention in order to raise a genuine dispute, the genuine dispute admissibility requirement is sometimes discussed together with the requirement for petitioners to provide alleged factual or expert support for their allegations under 10 C.F.R. § 2.309(f)(1)(v).

I To meet the section 2.309(f)(1)(v) requirement for providing factual and expert support, petitioners must “proffer at least some minimal factual and legal foundation in support of their contentions.” Neither mere speculation nor bare or conclusory assertions, even by an expert, alleging that a matter should be considered will suffice to allow the admission of a proffered contention.

J Where a petitioner neglects to provide the requisite support for its contentions, it is not within the board’s power to make assumptions or draw inferences that favor the petitioner, nor may the board supply information that is lacking. Likewise, simply attaching material or documents as a basis for a contention, without setting forth an explanation of that information’s significance, is inadequate to support the admission of the contention.

L The Commission has clearly stated that “[g]eneralized ‘economic cost’ arguments, unsupported by asserted facts or expert opinion, are insufficient to show a genuine dispute with the application.” NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-12-5, 75 NRC 301, 334 n.199 (2012).
The Commission stated that the right to appeal under 10 C.F.R. § 2.311 “attaches only when the Board has fully ruled on the initial intervention petition — that is, when it has admitted or rejected all proposed contentions.” Tennessee Valley Authority (Sequoyah Nuclear Plant, Units 1 and 2), CLI-14-3, 79 NRC 31, 36 (2014).

A Notification of the issuance of a renewed Source Materials License under 10 C.F.R. § 2.1202(a) triggers the 5-day filing deadline to file an application for the stay of the effectiveness of the license under 10 C.F.R. § 2.1213.

B Boards must balance four separate interests in determining whether to grant or to deny an application for a stay: (1) Whether the requestor will be irreparably injured unless a stay is granted; (2) Whether the requestor has made a strong showing that it is likely to prevail on the merits; (3) Whether the granting of a stay would harm other participants; and (4) Where the public interest lies.

C The Commission, but not the Licensing Board, has the power to address a protracted delay in the proceeding and to direct, if so inclined, appropriate remedial measures. Crow Butte Resources, Inc. (In Situ Leach Facility, Crawford, Nebraska), CLI-12-4, 75 NRC 154, 158 (2012).

D The extreme delay in the completion of the Staff’s environmental review, and thus the equal delay in hearing the Intervenors’ claim of injury, raises issues of compliance with section 189a of the Atomic Energy Act. It is reasonable to conclude that Congress assumed that individuals establishing a right to be heard in opposition to a license application would be heard with reasonable expedition. A delay exceeding 7 years hardly so qualifies.

E The licensing boards are not empowered to superintend, to any extent, the conduct of Staff technical reviews. Duke Energy Corp. ( Catawba Nuclear Station, Units 1 and 2), CLI-04-6, 59 NRC 62, 67 (2004).

A In this proceeding regarding the application of Strata Energy, Inc. (SEI), for a combined license to possess and use source and Atomic Energy Act (AEA) § 11e(2) byproduct materials pursuant to 10 C.F.R. Part 40 so as to authorize SEI to construct and operate a facility for the in situ recovery (ISR) of uranium at the Ross ISR Uranium Project (Ross Project) site in Crook County, Wyoming, in an Initial Decision the Licensing Board rules in favor of the Nuclear Regulatory Commission (NRC) Staff and SEI on the merits of Joint Intervenors’ three admitted environmental contentions challenging the Staff’s final supplemental environmental impact statement (FSEIS) analysis regarding proper characterization of baseline groundwater quality, the impacts of failing to restore groundwater to primary or secondary limits, and groundwater migration containment.

B The nonstatic nature of a website, as illustrated by a party’s acknowledgment that its witness could modify the information input utilized to generate the website information, precluded the Board, in the absence of a stand-alone compact disc/digital video disc (CD/DVD) that would allow the Board or the parties to run a “locked down” version of the website application, from allowing the website and the information it could generate from being considered as evidence. See Licensing Board Memorandum and Order (Responding to Motion for Clarification) (Sept. 19, 2014) at 1-5 (unpublished).

C The Council on Environmental Quality (CEQ) has implemented regulations that provide guidance on agency compliance with the National Environmental Policy Act (NEPA), see 40 C.F.R. Part 1500, that, while not binding on the NRC when the agency has not expressly adopted them, are entitled to considerable deference. See Limerick Ecology Action, Inc. v. NRC, 869 F.2d 719, 725, 743 (3d Cir. 1989).

D NEPA requires federal agencies to take a “hard look” at the environmental impacts of a proposed action, as well as reasonable alternatives to that action. See Louisiana Energy Services, L.P. (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 87-88 (1998). This “hard look” is intended to “‘foster both informed agency decision-making and informed public participation’” so as to ensure that the agency does not act upon “‘incomplete information, only to regret its decision after it is too late to correct.’” Id. at 88 (quoting Marsh v. Oregon Natural Resources Council, 490 U.S. 360, 371 (1989)). This “hard look” is, however, subject to a “rule of reason” in that consideration of environmental impacts need not address all
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

theoretical possibilities," but rather only those that have some "reasonable possibility" of occurring, Long Island Lighting Co. (Shoreham Nuclear Power Station), ALAB-156, 6 AEC 831, 836 (1973).

E With regard to such reasonably foreseeable impacts, "NEPA . . . does not call for certainty or precision, but an estimate of anticipated (not unduly speculative) impacts." Louisiana Energy Services, L.P. (National Enrichment Facility), CLI-05-20, 62 NRC 523, 536 (2005). As a consequence, agencies are given broad discretion "to keep their inquiries within appropriate and manageable boundaries." Claiborne, CL-I-98-3, 47 NRC at 103. Therefore, in preparing an environmental impact statement (EIS), which "is not intended to be 'a research document,'" Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-22, 72 NRC 202, 208 (2010) (quoting Town of Winthrop v. Federal Aviation Administration, 535 F.3d 1, 13 (1st Cir. 2008)), NEPA does not call upon the Staff to make an "examination of every conceivable aspect of federally licensed projects," Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), CLI-02-25, 56 NRC 340, 349 (2002) (quoting Claiborne, CL-I-98-3, 47 NRC at 102-03). Nor is there a "NEPA requirement to use the best scientific methodology, and NEPA ["]should be construed in the light of reason if it is not to demand"]' virtually infinite study and resources." Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-11, 71 NRC 287, 315 (2010) (quoting Natural Resources Defense Council, Inc. v. Hodel, 865 F.2d 288, 294 (D.C. Cir. 1988) (quoting Natural Resources Defense Council, Inc. v. Morton, 458 F.2d 827, 837 (D.C. Cir. 1973))).

F "[i]n the context of an NRC adjudicatory proceeding, even if an EIS prepared by the Staff is found to be inadequate in certain respects, the Board’s findings, as well as the adjudicatory record, ‘become, in effect, part of the [final EIS].’" Thus, the Board’s ultimate NEPA judgments can be made on the basis of the entire adjudicatory record in addition to the Staff’s [final EIS]." See Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), LBP-09-7, 69 NRC 613, 632 (2009) (quoting Hydro Resources, Inc. (P.O. Box 15910, Rio Rancho, NM 87174), CLI-01-4, 53 NRC 31, 53 (2001), and citing Louisiana Energy Services, L.P. (National Enrichment Facility), LBP-05-13, 61 NRC 385, 404 (2005), aff’d, CLI-06-22, 64 NRC 37 (2006), petition for review denied sub nom. Nuclear Information & Resource Service v. NRC, 509 F.3d 562 (D.C. Cir. 2007), petition for review denied, CLI-10-5, 71 NRC 90 (2010).

G As the proponent of the agency action at issue, an applicant generally has the burden of proof in a licensing proceeding. See 10 C.F.R. § 2.325. The statutory obligation of complying with NEPA, however, rests with the NRC. See, e.g., Duke Power Co. (Catawba Nuclear Station, Units 1 and 2), CLI-83-19, 17 NRC 1041, 1049 (1983). Consequently, when NEPA contentions are involved, the burden shifts to the Staff. See Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), CLI-10-2, 71 NRC 27, 34 (2010); see also Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), CLI-07-17, 65 NRC 392, 395 (2007) (stating "NRC hearings on NEPA issues focus entirely on the adequacy of the Staff’s work."). Nonetheless, because "the Staff, as a practical matter, relies heavily upon the Applicant’s ER in preparing the EIS, should the Applicant become a proponent of a particular challenged position set forth in the EIS, the Applicant, as such a proponent, also has the burden on that matter." Louisiana Energy Services, L.P. (Claiborne Enrichment Center), LBP-96-25, 44 NRC 331, 339 (1996) (citing Public Service Co. of New Hampshire (Seabrook Station, Units 1 and 2), ALAB-471, 7 NRC 477, 489 n.8 (1978)), rev’d on other grounds, CLI-97-15, 46 NRC 294 (1997). And relative to factual matters, to carry that burden, the Staff and/or the applicant must establish that its position is supported by a preponderance of the evidence. See Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), ALAB-763, 19 NRC 571, 577 & n.22 (citing cases), rev. declined, CLI-84-14, 20 NRC 285 (1984).

H In light of the Commission’s Hydro Resources decision, Hydro Resources, Inc. (P.O. Box 777, Crownpoint, New Mexico 87313), CLI-06-1, 63 NRC 1, 6 (2006), and the language of 10 C.F.R, Part 40, Appendix A, Criterion 7A, there is no legal basis for concluding that the Appendix A, Criterion 7 prelicensing monitoring program for the purpose of establishing existing characterization values for certain site groundwater constituents must be coextensive with the Criterion 7A preoperational monitoring, license condition-based program intended to provide the information needed for setting Appendix A, Criterion 5B groundwater protection standards and upper control limits (UCLs). At the same time, nothing in Appendix A, Criteria 5B, 7, or 7A precludes an inquiry, based on a well-pled contention, into whether the particular measures used in an applicant’s prelicensing program were adequate to provide the necessary information to characterize properly the environmental impacts of employing an ISR mining process in the aquifers below a proposed site.

I Under the NEPA directive to provide a detailed statement of reasonable alternatives to a proposed
Three standards are accepted by the Commission as the bases for approval of an ISR operator’s alternative concentration limit (ACL), which is permitted only when restoration to a primary or the secondary Table 5C standard is not “practically achievable.” Id. Criteria 5B(5)(c) 5B(6).

To have an ACL approved, a licensee must demonstrate that the hazardous constituent value is “as low as reasonably achievable, after considering practicable corrective actions, and that the constituent will not pose a substantial present or potential hazard to human health or the environment as long as the alternate concentration limit is not exceeded.” 10 C.F.R. Part 40, App. A, Criterion 5B(5)(a). The second is restoration of constituent levels to the drinking water limits enumerated in Appendix A, Table 5C. Id. Criterion 5B(5)(b). The third is restoration to an alternate concentration limit (ACL), which is permitted only when restoration to a primary or the secondary Table 5C standard is not “practically achievable.” Id. Criteria 5B(5)(c) 5B(6).

A A licensing board likewise is to assume that licensees will contravene our regulations. (“The NRC does not presume that a licensee will violate agency regulations wherever the opportunity arises.”) (citing GPU Nuclear, Inc. (Oyster Creek Nuclear Generating Station), CLI-00-6, 51 NRC 193, 207 (2000) (declaring the intervenor “also fails to offer documentary support for its argument that [the licensee] is likely to violate our safety regulations. Absent such support, this agency has declined to assume that licensees will contravene our regulations.”)).

The following technical issues are discussed: Aquifer Sampling (Drilling Methods, Monitoring Well-Screening Intervals, Statistical Validity); Groundwater Fluid Migration (Excursion Detection, Historical Boreholes, Natural Attenuation, Prelicense Pump Test); Uranium ACL Bounding Analysis.

ENERGY NUCLEAR VERMONT YANKEE, LLC, and ENTERGY NUCLEAR OPERATIONS, INC. (Vermont Yankee Nuclear Power Station), Docket No. 50-271-LA (ASLBP No. 15-934-01-LA-BD01); OPERATING LICENSE AMENDMENT, January 28, 2015; MEMORANDUM AND ORDER (Ruling on Request for Hearing and Petition to Intervene)
nuclear power facilities that are “shut down permanently” from the requirement of providing an ERDS link.

B A state government has standing to challenge a license amendment request for a utilization facility when the facility is located within the boundaries of the state. 10 C.F.R. § 2.309(b)(2).

C A petitioner demonstrates good cause for a 2-day delay in e-filing when the petition was submitted to the NRC by e-mail before the deadline lapsed, the delay does not prejudice the other parties, and it is clear that the delay was purely a matter of technical trouble in obtaining digital credentials with the E-Filing system, not an attempt to gain extra time to prepare a pleading or otherwise to flout the NRC’s procedural requirements.

D Failure to comply with the NRC’s e-filing requirements without good cause or without obtaining an exemption from the requirements under 10 C.F.R. § 2.302(g) can result in rejection of a pleading. In particular, when a filing deadline is approaching, notwithstanding that an attorney is engaged in good-faith settlement discussions, prudence should compel the attorney to take all necessary actions to ensure the deadline will be met in the event that settlement discussions are unsuccessful. See Justice v. Town of Cicero, Illinois, 682 F.3d 662, 665 (7th Cir. 2012).

E Appendix E, section VI.2 of 10 C.F.R. Part 50 exempts all nuclear power reactors that have permanently ceased operations and defueled from the requirement of providing an ERDS link.

G Under 10 C.F.R. § 50.72, only operating nuclear power reactors are required to activate an ERDS link during an emergency, which convincingly supports the conclusion that the ERDS link need not be maintained by a licensee after its reactor is permanently shut down and defueled.

H A petitioner’s contention that an ERDS link or another ERDS-like system is required after a reactor has permanently shut down and defueled is an impermissible collateral attack on a regulation in derogation of 10 C.F.R. § 2.335(a) because it seeks to impose a requirement more stringent than the applicable regulation, 10 C.F.R. Part 50, Appendix E, § VI.

I A petitioner in an adjudicatory proceeding cannot use one regulation to challenge another without first obtaining a waiver by showing “special circumstances.” 10 C.F.R. § 2.335(b).

J A licensee cannot change its emergency plan to discontinue ERDS without first showing that the change will not reduce the effectiveness of the site emergency plan. 10 C.F.R. § 50.54(q)(3).

LBP-15-5 DTE ELECTRIC COMPANY (Fermi Nuclear Power Plant, Unit 2), Docket No. 50-341-LR (ASLBP No. 14-933-01-LR-BD01); OPERATING LICENSE RENEWAL; February 6, 2015; MEMORANDUM AND ORDER (Ruling on Petitions to Intervene and Requests for a Hearing)

A DTE Electric Company seeks to renew for 20 years its license for the Fermi Nuclear Power Plant, Unit 2 (Fermi 2). Two sets of petitioners — Don’t Waste Michigan, Citizens Environment Alliance of Southwestern Ontario, and Beyond Nuclear (Joint Petitioners) and Citizens’ Resistance at Fermi 2 (CRAFT) — challenge the application and request a hearing. This Order concludes that Joint Petitioners and CRAFT have standing and have each proffered at least one admissible contention. The Board grants their hearing requests with respect to three contentions. The Joint Petitioners’ admissible contention concerns DTE’s failure to include in its Severe Accident Mitigation Alternatives (SAMA) analysis the impact that a severe accident at Fermi 2 would have on the operation of the proposed nearby Fermi 3. CRAFT’s admissible contentions allege negative impacts on tribal hunting and fishing near Fermi 2 and assert that Canadians living within 50 miles of the site were excluded from the SAMA analysis.

B An organization may demonstrate standing to challenge a reactor license renewal application by providing declarations from members who reside within 50 miles of the reactor site.

C Section 51.71(d) requires the Draft Environmental Impact Statement to discuss important qualitative factors. Although this section applies to the Draft Environmental Impact Statement, it is instructive in evaluating the adequacy of the applicant’s Environmental Report.

D Under 10 C.F.R. § 51.71(d), a SAMA analysis, like other parts of the NRC’s NEPA document, should take into account important qualitative considerations or factors that cannot be quantified. But a contention challenging a deficiency in the SAMA analysis is not admissible unless petitioners can show
that the deficiency, if corrected, would plausibly tip the cost-benefit balance in favor of implementing one or more mitigation alternatives.

E The Environmental Review need not contain environmental analysis of the “Category 1” issues identified in Appendix B to Subpart A of 10 C.F.R. Part 51. Category 1 issues are not subject to challenge in a relicensing proceeding, absent a waiver under 10 C.F.R. § 2.335, because they involve environmental effects that have been addressed generically for all reactors.

F The SAMA analysis does not need to consider spent fuel accidents because these accidents are a Category 1 issue.

G Contentions challenging the lack of site-specific environmental analysis of the storage and disposal of spent nuclear fuel are moot because the Commission has adopted a Continued Storage Rule and a generic environmental impact statement analyzing the impacts of the storage and disposal of spent nuclear fuel. See 10 C.F.R. § 51.23.

H Contentions challenging the lack of site-specific safety analysis of the storage and disposal of spent nuclear fuel are not admissible before a Licensing Board Panel because the Commission has exercised its authority to consolidate and review the pending safety-related issues.

I The Commission has resolved by regulation the adequacy of certified plant designs. Although a party may petition the Commission for permission to challenge a particular design, that party must make a showing of “special circumstances.”

J Petitioners cannot use the license renewal proceedings to challenge the adequacy of an earlier SAMA analysis for a different reactor.

K The NRC Staff, not the applicant, has the duty under section 51.28(a)(5) to notify affected tribes of the license renewal application.

L Publication in the Federal Register is legally sufficient notice to all affected people of the NRC’s scoping process and the opportunity to challenge the license renewal application.

M Under the NRC’s NEPA regulations, impacts to subsistence consumption must be evaluated as part of the site-specific Environmental Justice analysis.

N Although a reply brief must not be used to raise entirely new arguments, a board may consider information in a reply that legitimately amplifies an issue presented in the original petition.

O Pleadings submitted by pro se petitioners are afforded greater leniency than petitions drafted with the assistance of counsel.

P A party may not rely on wholesale incorporation by reference of another party’s arguments because arguments must be contained within the pleadings.

Q Compliance with NRC’s ongoing enforcement programs is part of the current licensing basis, and thus not within the scope of a license renewal proceeding.

R To challenge the adequacy of the SAMA analysis, petitioners must point to a specific error or deficiency in the analysis and provide support to show that fixing the error or deficiency would change the outcome of the cost-benefit analysis.

S Reasonable assurance of safety for aging management plans requires a case-by-case determination of safety instead of a fixed level of assurance.

T Petitioners have the “burden of going forward” at the initial stage of the proceeding, which requires the petitioner to support contentions with factual allegations or expert testimony.

U In calculating the costs of a severe accident, the SAMA analysis must include all populations within 50 miles of the licensed power reactor, regardless of international borders.

V A challenge to the adequacy of the emergency plan itself is not within the scope of a license renewal proceeding.

W Claims of past and current mismanagement — such as those involving operational history, quality assurance, quality control, management competence, and human factors — are outside the scope of the license renewal proceeding.

X The SAMA analysis does not need to consider public health because it is a Category 1 issue.

Y Contentions based on alleged “new and significant information” must provide a reasoned basis for how the new information might plausibly change the analysis in the environmental report.

Z Contentions challenging the adequacy of another agency’s regulations are not admissible.

AA The generic environmental impact statement for spent fuel pools covers both normal operations and potential accidents, so neither issue requires site-specific analysis.
A Digests

ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

LBP-15-6 PACIFIC GAS AND ELECTRIC COMPANY (Diablo Canyon Nuclear Power Plant, Units 1 and 2), Docket Nos. 50-275-LR, 50-323-LR (ASLBP No. 10-900-01-LR-BD01); OPERATING LICENSE RENEWAL; February 11, 2015; MEMORANDUM AND ORDER (Denying Petition to Intervene and Petition for Waiver)

A In this proceeding regarding an application by Pacific Gas & Electric Company to renew its operating licenses for two nuclear power reactors at the Diablo Canyon Nuclear Power Plant located near San Luis Obispo, California, the Board denies a hearing request and petition to intervene because each of Petitioner’s proffered contentions either raises issues that are outside the scope of a license renewal proceeding or fails to satisfy one or more requirements of 10 C.F.R. § 2.309(f)(1).

B The scope of a license renewal safety review is narrow. It is limited to “plant structures and components that will require an aging management review for the period of extended operation and the plant’s systems, structures, and components that are subject to an evaluation of time-limited aging analyses.” Duke Energy Corp. (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-01-20, 54 NRC 211, 212 (2001) (citing 10 C.F.R. §§ 54.21(a), (c), 54.4).

C A license renewal proceeding does “not include a new, broad-scoped inquiry into compliance that is separate from and parallel to [our] ongoing compliance oversight activity.” Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-11-11, 74 NRC 427, 435 (2011) (quoting 56 Fed. Reg. 64,943, 64,952 (Dec. 13, 1991)).

D Pursuant to 10 C.F.R. § 2.335(a), except as provided in 10 C.F.R. § 2.335(b)-(d), “no rule or regulation of the Commission, or any provision thereof, concerning the licensing of production and utilization facilities . . . is subject to attack by way of discovery, proof, argument, or other means in any adjudicatory proceeding subject to this part.” 10 C.F.R. § 2.335(a).

LBP-15-7 TENNESSEE VALLEY AUTHORITY (Sequoyah Nuclear Plant, Units 1 and 2), Docket Nos. 50-327-LR, 50-328-LR (ASLBP No. 13-927-01-LR-BD01); OPERATING LICENSE RENEWAL; March 3, 2015; ORDER (Terminating Proceeding)

A In this proceeding, applicant Tennessee Valley Authority seeks renewed licenses to operate two nuclear power reactors in Hamilton County, Tennessee. On September 29, 2014, prior to this Board’s dismissal of a then-pending environmental waste confidence contention, the Blue Ridge Environmental Defense League (BREDL) moved for admission of a new safety-related waste confidence contention. On February 26, 2015, the Commission declined to admit the new contention. There being no other pending contentions or outstanding issues, the contested adjudicatory hearing before this Board is terminated.

LBP-15-8 PROGRESS ENERGY FLORIDA, INC. (Levy County Nuclear Power Plant, Units 1 and 2), Docket Nos. 52-029-COL, 52-030-COL (ASLBP No. 09-879-04-COL-BD01); COMBINED LICENSE; March 3, 2015; ORDER (Terminating Proceeding)

A In this proceeding, applicant Progress Energy Florida, Inc. seeks combined licenses to construct and operate two nuclear power reactors in Levy County, Florida. On September 29, 2014, prior to this Board’s dismissal of a then-pending environmental waste confidence contention, the Nuclear Information and Resource Service and the Ecology Party of Florida moved for admission of a new safety-related waste confidence contention. On February 26, 2015, the Commission declined to admit the new contention. There being no other pending contentions or outstanding issues, the contested adjudicatory hearing before this Board is terminated.

LBP-15-9 FIRSTENERGY NUCLEAR OPERATING COMPANY (Davis-Besse Nuclear Power Station, Unit 1), Docket No. 50-346-LR (ASLBP No. 11-907-01-LR-BD01); OPERATING LICENSE RENEWAL; March 10, 2015; ORDER (Terminating Proceeding)

LBP-15-10 SHEILDALLOY METALLURGICAL CORPORATION (Decommissioning of the Newfield, New Jersey Facility), Docket No. 40-7102-MLA (ASLBP No. 07-852-01-MLA-BD01); MATERIALS LICENSE AMENDMENT; March 12, 2015; ORDER (Terminating Proceeding by Reason of Loss of Jurisdiction over the Subject Matter)

LBP-15-11 CROW BUTTE RESOURCES, INC. (In Situ Leach Facility, Crawford, Nebraska), Docket No. 40-8943 (ASLBP No. 08-867-02-OLA-BD01); MATERIALS LICENSE AMENDMENT; March 16, 2015; MEMORANDUM AND ORDER (Ruling on Proposed Contentions Related to the Environmental Assessment)

A To be admissible, a new or amended contention must satisfy the substantive contention admissibility standards set forth in 10 C.F.R. § 2.309(f)(1).

B A new or amended contention must be timely filed under 10 C.F.R. § 2.309(c).
DIGESTS

ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

C If a party submits a proposed contention after the initial filing deadline announced in the applicable Federal Register notice for submitting a hearing petition, it must not only meet the contention admissibility standards of section 2.309(f)(1), but must also satisfy the timeliness requirements of section 2.309(c) or section 2.307(a).

D Timely filing of an Intervenor’s challenge to the adequacy of the NRC Staff’s National Environmental Policy Act (NEPA) review process is generally triggered by the release of a NEPA document.

E Timely filing of an Intervenor’s challenge to the information or analysis in an applicant’s license application is triggered on the date of public disclosure of that information or analysis. Intervenors are not allowed to postpone filing a contention challenging this information or analysis until the NRC Staff issues some document “that collects, summarizes, and places into context the facts supporting that contention.” Northern States Power Co. (Prairie Island Nuclear Generating Plant, Units 1 and 2), CLI-10-27, 72 NRC 481, 496 (2010).

F In certain circumstances, admitted contentions challenging an applicant’s Environmental Report (ER) may function as challenges to similar portions of the Staff’s NEPA document. When applicable, a party need not file a new or amended contention; the previously admitted contention will simply be viewed as applying to the relevant portion of the EA. Detroit Edison Co. (Fermi Nuclear Power Plant, Unit 3), LBP-12-23, 76 NRC 445, 470-71 (2012). This is appropriate, however, only where the Environmental Assessment (EA) analysis or discussion at issue is essentially in pari materia with the applicant’s analysis or discussion that is the focus of the contention. Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), LBP-08-2, 67 NRC 54, 63-64 (2008).

LBP-15-12 DTE ELECTRIC COMPANY (Fermi Nuclear Power Plant, Unit 3), Docket No. 52-033-COL (ASLBP No. 09-880-05-COL-BD01); COMBINED LICENSE; March 20, 2015; ORDER (Terminating Licensing Board Adjudicatory Proceeding)

A Applicant DTE Electric Company seeks a combined license (COL) for a proposed Economic Simplified Boiling Water Reactor designated as Fermi Nuclear Power Plant, Unit 3 (Fermi 3). The Board issued a Partial Initial Decision ruling against the Intervenors on their two admitted contentions on May 23, 2014, but left the proceeding open because of pending matters related to the continued storage of spent fuel and the Board’s request for sua sponte authority to review an otherwise inadmissible contention regarding the environmental impacts of Fermi 3’s proposed transmission lines. On September 29, 2014, Beyond Nuclear and other intervenors moved for admission of a new contention claiming that NRC’s Draft Environmental Impact Statement fails to comply with the National Environmental Policy Act by not discussing the safety of spent fuel storage at Fermi 3 given the lack of a high-level waste repository. The Commission chose to review that motion along with other similar motions, and on February 26, 2015, the Commission denied the motions to admit continued waste storage safety contentions. The Commission has also denied the Board’s request for sua sponte authorization to review the environmental impacts of Fermi 3’s proposed transmission lines. Because there is no other admitted or pending contention in this proceeding, the case is terminated.

LBP-15-13 FLORIDA POWER & LIGHT COMPANY (Turkey Point Nuclear Generating Plant, Units 3 and 4), Docket Nos. 50-250-LA, 50-251-LA (ASLBP No. 15-935-02-LA-BD01); OPERATING LICENSE AMENDMENT; March 23, 2015; MEMORANDUM AND ORDER (Granting CASE’s Petition to Intervene)

A This proceeding involves a challenge by Citizens Allied for Safe Energy, Inc. (CASE) to license amendments issued to the Florida Power & Light Company’s (FPL) Turkey Point Nuclear Generating Units 3 and 4. The Licensing Board rules that CASE has standing to intervene and has submitted one admissible contention challenging the adequacy of the environmental assessment’s discussion of the impact of increased temperature in Turkey Point’s cooling canal system on saltwater intrusion arising from (1) migration out of the cooling canals; and (2) the withdrawal of freshwater from surrounding aquifers to mitigate conditions within the cooling canals.

B A petitioner’s reply, under 10 C.F.R. § 2.309(i)(2), cannot raise for the first time new arguments in support of its contentions. Rather, the right to reply is intended to provide an opportunity to cure potential defects in standing or to legitimately amplify arguments made in the petition in response to answers filed by the applicant and the NRC Staff.

C A petitioner bears the burden of establishing standing to intervene in an NRC licensing proceeding, but licensing boards should evaluate a petitioner’s standing construing the petition in favor of the petitioner.
To determine whether a petitioner satisfies the standing requirements of 10 C.F.R. § 2.309(d)(1), the Commission has traditionally applied contemporaneous judicial concepts of standing, requiring a showing of concrete and particularized injury that is fairly traceable to the challenged action and is likely to be redressed by a favorable decision.

In certain situations involving obvious potential for offsite consequences — including reactor licensing, license renewal, and at least some license amendment proceedings — the Commission has routinely granted standing to petitioners who live within a certain distance of the facility at issue under the “proximity presumption,” effectively dispensing with the need to make an affirmative showing of injury, causation, and redressability.

When an organization seeks to intervene on behalf of its members, it may establish standing by showing that (1) one or more of its members would individually meet the standing requirements; (2) the member has authorized the organization to represent its interest; and (3) the interest represented is germane to the organization’s purpose.

A petitioner must not only establish its standing to intervene, but must also submit at least one admissible contention. An admissible contention must be timely, under 10 C.F.R. § 2.309(b)(3)(i), and satisfy the requirements of 10 C.F.R. § 2.309(f)(1). Failure to comply with any of the 10 C.F.R. § 2.309(f)(1) requirements renders a contention inadmissible.

Pleadings submitted by pro se petitioners are afforded greater leniency than petitions drafted with the assistance of counsel.

Licensing boards may reformulate contentions to eliminate extraneous issues or to consolidate issues for a more efficient proceeding.

When drafting an environmental assessment (EA), the NRC cannot simply import the analysis from a previously completed EA while disregarding intervening events. To hold otherwise would render meaningless NEPA’s 40 C.F.R. § 1502.9(c)(1)(ii) requirement for supplementation of environmental review documents.

The granting of a license amendment cannot be considered final agency action until the agency’s internal adjudicatory process has run its course. Section 2.340(a)(2)(ii) of 10 C.F.R. specifically provides that, when an adjudicatory proceeding has been initiated with respect to a license amendment issued with a no significant hazards determination, “[o]nce the presiding officer’s initial decision becomes effective, the appropriate official shall take action with respect to that amendment in accordance with the initial decision.”

The NRC Staff’s “no significant hazards determination” may not be challenged before the Commission or a licensing board.

The Atomic Energy Act does not guarantee the right to request a prelicense amendment hearing. Delaying a hearing until after a license amendment has been issued does not, therefore, deprive a petitioner of its opportunity to request a hearing.

LBP-15-14  TENNESSEE VALLEY AUTHORITY (Watts Bar Nuclear Plant, Unit 2), Docket No. 50-391-OL (ASLBP No. 09-893-01-OL-BD01); OPERATING LICENSE; April 22, 2015; MEMORANDUM AND ORDER (Denying Motion to Reopen)

LBP-15-15  CROW BUTTE RESOURCES, INC. (In Situ Leach Facility, Crawford, Nebraska), Docket No. 40-8943 (ASLBP No. 08-867-02-OLA-BD01); MATERIALS LICENSE AMENDMENT; April 28, 2015; MEMORANDUM AND ORDER (Denying Motion to Admit Additional Contentions Based on EPA Proposed Rules)

An EPA notice of proposed rulemaking has been issued to address the shift toward in situ leach recovery as the dominant form of uranium recovery in the United States. 80 Fed. Reg. at 4156. When final, these rules will be implemented by the NRC.

Proposed rules are not binding upon administrative agencies and are not ripe for review by this Board. American Petroleum Institute v. Environmental Protection Agency, 683 F.3d 382, 387 (D.C. Cir. 2012). However, studies or data disclosed in the notice of proposed rulemaking preamble, if timely utilized, may form the basis for an admissible contention.

To be admissible, a new or amended contention must satisfy the substantive contention admissibility standards set forth in 10 C.F.R. § 2.309(f)(1).
D Pursuant to 10 C.F.R. § 2.309(c), if a party submits a proposed contention after the initial filing deadline for submitting a hearing request, it “will not be entertained absent a determination by the presiding officer that a participant has demonstrated good cause.”

LBP-15-16 POWERTECH USA, INC. (Dewey-Burdock In Situ Uranium Recovery Facility), Docket No. 40-9075-MLA (ASLBP No. 10-898-02-MLA-BD01); MATERIALS LICENSE; April 30, 2015; PARTIAL INITIAL DECISION

A The AEA and the Uranium Mill Tailings Radiation Control Act of 1978 authorize the NRC to issue licenses for the possession and use of source material and byproduct material. Section 11(e)(2) byproduct material is regulated by the NRC under 10 C.F.R. Part 40. These statutes require the NRC to license facilities that meet NRC regulatory requirements developed to protect public health and safety from radiological hazards. To operate, ISL uranium recovery facilities must meet NRC regulatory requirements and obtain a source materials license.

B NEPA requires that federal agencies prepare a detailed environmental impact statement for proposed actions “significantly affecting the quality of the human environment.” 40 U.S.C. § 4332(2)(C). The adverse environmental effects that must be assessed under NEPA include “aesthetic, historic, cultural, economic, social, or health” effects. 40 C.F.R. § 1508.8(b).

C While reviewing any adverse effects, federal agencies must take a hard look at the environmental impacts of a proposed action. See Louisiana Energy Services, L.P. (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 87-88 (1998). This hard look must emerge from engagement in informed and reasoned decisionmaking, as the agency “obtains opinions from its own experts, obtains opinions from experts outside the agency, gives careful scientific scrutiny and responds to all legitimate concerns that are raised.” Hughes River Watershed Conservancy v. Johnson, 165 F.3d 283, 288 (4th Cir. 1999) (citing Marsh v. Oregon Natural Resources Council, 490 U.S. 360, 378-85 (1989)).

D In an NRC adjudicatory proceeding, the Board’s findings, as well as the adjudicatory record, “become, in effect, part of the [final EIS].” Claiborne, CLI-98-3, 47 NRC at 89.

E The statutory obligation of complying with NEPA rests with the NRC. See, e.g., Duke Power Co. ( Catawba Nuclear Station, Units 1 and 2), CLI-83-19, 17 NRC 1041, 1049 (1983). When NEPA contentions are involved, the burden of proof lies with the NRC Staff, but because “the Staff, as a practical matter, relies heavily upon the Applicant’s [Environmental Report] in preparing the EIS, should the Applicant become a proponent of a particular challenged position set forth in the EIS, the Applicant, as such a proponent, also has the burden on that matter.” Louisiana Energy Services, L.P. (Claiborne Enrichment Center), LBP-96-25, 44 NRC 331, 339 (1996) (citing Public Service Co. of New Hampshire (Seabrook Station, Units 1 and 2), ALAB-471, 7 NRC 477, 489 n.8 (1978)), rev’d on other grounds, CLI-97-15, 46 NRC 294 (1997).

F Under NEPA regulations, defining the scope of effects of a project requires engagement with the governments of affected tribes through an “early and open process,” aimed at identifying concerns, potential impacts, relevant effects of past actions, and possible alternative actions. 40 C.F.R. § 1501.7. The Commissioner’s regulations in 10 C.F.R. § 51.71(b) require the NRC Staff to include in the FSEIS “an analysis of significant problems and objections raised by . . . any affected Indian tribes, and by other interested persons.”

G Under the National Historic Preservation Act, a federal agency must make a reasonable and good faith effort to identify historic properties, determine whether identified properties are eligible for listing on the National Register based on the criteria in 36 C.F.R. § 60.4, assess the effects of the undertaking on any eligible historic properties found, determine whether the effect will be adverse, and avoid or mitigate any adverse effects. 36 C.F.R. §§ 800.4(b), (c); 800.5(c); 800.8(c); 800.9(b), (c).

H Although the NHPA and NEPA resemble each other in certain respects, compliance with the NHPA “does not relieve a federal agency of the duty of complying with the [environmental] impact statement requirement ‘to the fullest extent possible.’” Preservation Coalition, Inc. v. Pierce, 667 F.2d 851, 859 (9th Cir. 1982) (quoting 42 U.S.C. § 4332). It does not follow that a review that satisfies the NHPA necessarily satisfies NEPA requirements to take a hard look at cultural resources affected by a project.

I The NHPA requires federal agencies, prior to approving any “undertaking,” to “take into account the effect of the undertaking on any district, site, building, structure, or object that is included in or eligible for inclusion in the National Register.” 16 U.S.C. § 470h.

J The NHPA requires federal agencies to “consult with any Indian tribe . . . that attaches religious and cultural significance” to a site. 16 U.S.C. § 470a(d)(6)(B). Consultation must provide the tribe “a reasonable
opportunity to identify its concerns about historic properties, advise on the identification and evaluation of historic properties, including those of traditional religious and cultural importance, articulate its views on the undertaking’s effects on such properties, and participate in the resolution of adverse effects.” 36 C.F.R. § 800.2(c)(2)(ii)(A). The NHPA further requires that consultation with Indian tribes “recognize the government-to-government relationship between the Federal Government and Indian tribes.” Id.

K Adequate NRC face-to-face meaningful government-to-government consultation requirements are not satisfied by large group meetings, with members of many diverse tribes, all with varying degrees of attachment to the project area. Tribal Protocol Manual, NUREG-2173, at 10. Quantity of correspondence does not necessarily equate with meaningful or reasonable consultation, and “doesn’t in itself show the NHPA-required consultation occurred.” Quechan Tribe of Fort Yuma Indian Reservation v. U.S. Department of Interior, 755 F. Supp. 2d 1104, 1118 (S.D. Cal. 2010).

L A Programmatic Agreement may be used to implement the section 106 process in situations where the effects to historic properties cannot be fully determined prior to the approval of an undertaking, such as where an applicant proposes a phased approach to developing its project. 36 C.F.R. §§ 800.13, 800.14(b)(1). In such cases, the Programmatic Agreement establishes a phased process for consultation, review, and compliance with the NHPA.

M A Board can require the immediate suspension of an issued materials license. Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-06-8, 63 NRC 235, 238 (2008) (“If the Board determines after full adjudication that the license amendment should not have been granted, it may be revoked (or conditioned).”).

N Criterion 7 of 10 C.F.R. Part 40, Appendix A requires an applicant to establish “a preoperational monitoring program [that] must be conducted to provide complete baseline data on a milling site and its environs.” These criteria were developed for conventional uranium milling facilities, but have been applied, in at least limited fashion, to ISL facilities. Hydro Resources, Inc. (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-99-22, 50 NRC 3, 8-9 (1999).

O Background water quality data are used to establish existing hazardous constituent concentrations in an aquifer, which can then be used to set 10 C.F.R. Part 40, Appendix A, Criterion 5B(5) post-operational concentration limits. Both NUREG-1569 and Regulatory Guide 4.14 also discuss environmental monitoring.

P The language of Appendix A regarding the relationship between Criteria 5 and 7 is ambiguous and the terms “baseline” and “background” are not explicitly defined. But in Hydro Resources, Inc. (P.O. Box 777, Crownpoint, New Mexico 87313), CLI-06-1, 63 NRC 1, 6 (2006), the Commission affirmed that given the sequential development of ISL wellfields, waiting until after licensing (although before mining operations begin) to establish definitively the groundwater quality baselines and upper control limits is consistent with industry practice and NRC methodology.

Q Geologic confinement of an ore zone is required for an ISL license. This decision discusses issues surrounding the continuous thickness of the Fuson Shale, leakage shown by pumping tests, rapid groundwater flow, faults, fractures, and joints, breccia pipes, boreholes, the ability to contain fluid migration, artesian flow, and groundwater quantity impacts.

R Mitigation under NEPA is defined as (a) avoiding an impact by not taking an action, (b) minimizing an impact by limiting the degree or magnitude of an action, (c) rectifying the impact of an action by repairing, rehabilitating, or restoring the impacted area, (d) reducing or eliminating the impact over time by preservation and maintenance operations, or (e) compensating for the impact or replacing or substituting resources or environments. 40 C.F.R. § 1508.20.

S The NRC Staff is required to confirm whether applicant/licensee mitigation measures are effective by establishing a monitoring program. 76 Fed. Reg. at 3849 (citing 40 C.F.R. § 1505.2(c)).

T Actions are connected to the proposed project when they “(i) Automatically trigger other actions which may require environmental impact statements. (ii) Cannot or will not proceed unless other actions are taken previously or simultaneously. (iii) Are interdependent parts of a larger action and depend on the larger action for their justification.” 40 C.F.R. § 1508.25(a)(1)(ii)-(iii). When drafting an EIS, an agency’s scope of review must include analysis of any connected or cumulative actions to the central proposed action. 40 C.F.R. § 1508.25; 10 C.F.R. § 51.14(b).

U Cumulative impacts are impacts resulting “from the incremental impact of the [proposed] action when added to other past, present, and reasonably foreseeable future actions regardless of what agency (Federal or non-Federal) or person undertakes such other actions.” 40 C.F.R. § 1508.7. All aspects of the

173
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

FSEIS, including the connected and cumulative actions discussions, must have been subjected to a hard look by the NRC Staff.

To be admissible, a new or amended contention must satisfy the substantive contention admissibility standards set forth in 10 C.F.R. § 2.309(f)(1).

V To be admissible, a new or amended contention must be timely filed under 10 C.F.R. § 2.309(c).

LBP-15-17 ENERGY NUCLEAR OPERATIONS, INC. (Palisades Nuclear Plant), Docket No. 50-255-LA (ASLB No. 15-936-03-LA-BD01); OPERATING LICENSE AMENDMENT; May 8, 2015; MEMORANDUM AND ORDER (Ruling on Petition to Intervene and Request for a Hearing)

In certain circumstances, the Commission has adopted a proximity presumption that allows a petitioner living, having frequent contacts, or having a significant property interest within 50 miles of a nuclear power reactor to establish standing without the need to make an individualized showing of injury, causation, and redressability. Florida Power and Light Co. (St. Lucie Nuclear Power Plant, Units 1 and 2), CLI-89-21, 30 NRC 325, 329 (1989). The Commission has explained that the proximity presumption applies when there are “clear implications for the offsite environment, or major alterations to the facility with a clear potential for offsite consequences.” Id. Therefore, for the presumption to apply in license amendment proceedings, the proposed amendment must have clear implications for the offsite environment or otherwise create an increased potential for offsite consequences.

A A change in the safety-related requirements intended to ensure the integrity of the reactor pressure vessel “obviously bears on the health and safety of those members of the public who reside in the plant’s vicinity.” Cleveland Electric Illuminating Co. (Perry Nuclear Power Plant, Unit 1), CLI-93-21, 38 NRC 87, 95-96 (1993). Thus, a license amendment related to RPV embrittlement presents an obvious potential for offsite public health and safety consequences.

B To demonstrate “frequent contacts” within the 50-mile site radius under the proximity presumption, the petitioner (or its member, if the petitioner is an organization claiming representational standing) must show that her contacts are “substantial” and “regular,” and must describe them with specificity. See PPL Bell Bend, LLC (Bell Bend Nuclear Power Plant), CLI-10-7, 71 NRC 133, 140 (2010). Although a member of the petitioning organization states she may spend time by the Palisades site, these statements are too vague to demonstrate a substantial or regular presence within 50 miles of Palisades.

D As the Commission noted, “[t]he Atomic Energy Act authorizes the Commission ‘to accord protection from radiological injury to both health and property interests.’ Thus, a genuine property interest . . . is sufficient to accord [the petitioner] standing, given that the home is located” within close proximity to the facility. USEC Inc. (American Centrifuge Plant), CLI-05-11, 61 NRC 309, 314 (2005) (quoting Gulf States Utilities Co. (River Bend Station, Unit 1), CLI-94-10, 40 NRC 43, 48 (1994) (citing 42 U.S.C. §§ 2133(b), 2201(b)) (footnote omitted). The petitioning organization’s member maintains that an accident at Palisades could render her 5 acres of land “permanently uninhabitable.” The Board thus finds that she has demonstrated a sufficient property interest to warrant standing based on proximity.

E The NRC regulations define the Commission’s scope of review of a license amendment application broadly: “In determining whether an amendment to a license, construction permit, or early site permit will be issued to the applicant, the Commission will be guided by the considerations which govern the issuance of initial licenses, construction permits, or early site permits to the extent applicable and appropriate.” 10 C.F.R. § 50.92(a). The “considerations” the Commission should review include those defined in 10 C.F.R. §50.40, titled “Common standards.”

F When the Commission has opted to address a safety or environmental concern through regulation, it has uniformly prohibited litigation of that same issue in a site-specific adjudicatory proceeding: “Contentions that are the subject of general rulemaking by the Commission may not be litigated in individual license proceedings.” Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-14-8, 80 NRC 71, 79 n.27 (2014) (citing Duke Energy Corp. (Oconee Nuclear Station, Units 1, 2, and 3), CLI-99-11, 49 NRC 328, 345 (1999)).

G Petitioners apparently want the Board to preclude Entergy from relying on 10 C.F.R. § 50.61a to avoid meeting the requirements of 10 C.F.R. § 50.61, but that is what section 50.61a allows. The evident purpose of the Alternate Pressurized Thermal Shock Rule’s “Alternate Fracture Toughness Requirements” is to provide an alternative to satisfying the more demanding requirements of section 50.61. Therefore, Petitioners are in substance asking that the Board prohibit what section 50.61a allows. Under 10 C.F.R. § 2.335, the Board may not consider such a contention except under specific conditions not present here.
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

H The Commission noted when it promulgated 10 C.F.R. § 50.61a that this rule “provides reasonable assurance” of public health and safety, thereby endorsing the 50.61a embrittlement model approach and precluding requests to create requirements more restrictive than the rule. Final Rule: “Alternate Fracture Toughness Requirements for Protection Against Pressurized Thermal Shock Events,” 75 Fed. Reg. 13, 22 (Jan. 4, 2010). “When a Commission regulation permits the use of a particular analysis, a contention asserting that a different analysis or technique should be utilized is inadmissible because it indirectly attacks the Commission’s regulations.” Detroit Edison Co. (Fermi Nuclear Power Plant, Unit 3), LBP-09-16, 70 NRC 227, 235 (2009) (citing Metropolitan Edison Co. (Three Mile Island Nuclear Station, Unit 1), LBP-83-76, 18 NRC 1266, 1273 (1983), aff’d on other grounds, CLI-09-22, 70 NRC 932, 933 (2009)).

I The purpose of the consistency check — the only portion of the Alternate Pressurized Thermal Shock Rule that may require use of sister plant data — is to validate the basic operation of the embrittlement model with surveillance data. The consistency check seeks to compare, for a specific material type, the model’s projected embrittlement with the actual embrittlement values at the same fluence provided by material samples. 10 C.F.R. § 50.61a(f)(6)(i)(B). If a capsule had in fact been tested, the resulting data could constitute surveillance data relevant to evaluating embrittlement trends.

J Section 50.61a defines surveillance data broadly, to include “any data that demonstrates the embrittlement trends for the beltline materials.” 10 C.F.R. § 50.61a(a)(10). A state government has standing to challenge a nuclear power reactor’s license amendment request when the facility is located within the boundaries of the state. 10 C.F.R. § 2.309(h)(2).

K The Alternate Pressurized Thermal Shock Rule clearly states that surveillance data must be used in the consistency check when it is (A) “a heat-specific match for one or more of the materials for which RT_{MAX,Y} is being calculated,” and (B) “three or more different neutron fluences exist for a specific material.” 10 C.F.R. § 50.61a(f)(6)(i)(A), (B). Thus, the use of a material sample in the consistency check is not dependent on its location inside an RPV, or which RPV it comes from. If the Board were to limit the material samples that may be used in the consistency check to those from a particular location from a particular RPV, we would be adding a new requirement to 10 C.F.R. § 50.61a(f)(6)(i), which is prohibited by 10 C.F.R. § 2.335.

L Section 50.61a(f)(6)(i), when the fluence of a material sample is known it must be used in the consistency check if it is of the appropriate chemical composition. The regulation’s consistency check does not rely on information that is unique to a particular RPV, but instead on the chemical properties and fluence of the material samples. See 10 C.F.R. § 50.61a, equations 5-7. From the standpoint of the consistency check, a material sample of the same fluence and material type is no different whether obtained from the Palisades RPV or a sister plant RPV.

M A “no significant hazards consideration” determination is a procedural decision barred from litigation by 10 C.F.R. § 50.58(b)(6) and licensing board precedent. Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), LBP-04-28, 60 NRC 548, 560-61 (2004). LBP-15-18 ENTERGY NUCLEAR VERMONT YANKEE, LLC, and ENTERGY NUCLEAR OPERATIONS, INC. (Vermont Yankee Nuclear Power Station), Docket No. 50-271-LA-2 (ASLBP No. 15-937-02-LA-BD01); OPERATING LICENSE AMENDMENT; May 18, 2015; MEMORANDUM AND ORDER (Denying Hearing Request)

A Entergy Nuclear Vermont Yankee, LLC, and Entergy Nuclear Operations, Inc., request a license amendment to reduce emergency planning requirements at Vermont Yankee Nuclear Power Station to reflect the plant’s permanently defueled status. Because the current levels of emergency planning are required by regulation, Entergy cannot make these changes without first receiving certain regulatory exemptions. On February 9, 2015, the State of Vermont, through the Vermont Department of Public Service, moved for admission of two contentions arguing that the license amendment was not ready for review until the exemptions were granted and the requested changes would hamper the state’s ability to protect its residents during an emergency. This order concludes that Vermont’s first contention is moot since the Commission granted the exemptions on March 2, 2015. The second contention is inadmissible because it challenges the adequacy of the exemption request; the correctness of Commission-approved regulatory exemptions is not subject to review in a hearing before a Licensing Board.

B A state government has standing to challenge a nuclear power reactor’s license amendment request when the facility is located within the boundaries of the state. 10 C.F.R. § 2.309(h)(2).

C A Licensing Board assumes the correctness of the Commission’s decision to grant regulatory exemptions. The Board’s role is therefore limited to determining whether the petitioner has proffered an admissible contention based on the NRC’s regulations as exempted.

175
A In this proceeding, applicant Florida Power & Light Company seeks combined licenses to construct and operate two new nuclear power reactors in Homestead, Florida. The City of Miami, Florida, petitioned to intervene, proffering three contentions challenging the adequacy of the NRC Staff’s Draft Environmental Impact Statement (DEIS), or, in the alternative, seeking to participate in the proceeding as an interested local governmental body. In this Memorandum and Order, the Licensing Board denies Miami’s petition to intervene because, although it established standing, Miami failed to proffer an admissible contention. The Board, however, grants Miami’s request to participate as an interested local governmental body.

B To determine whether a petitioner satisfies the standing requirements of 10 C.F.R. § 2.309(d)(1), the Commission traditionally applies contemporaneous judicial concepts of standing.

C When a governmental body within close proximity of a proposed nuclear reactor unit seeks to intervene in a combined license proceeding, the Commission grants standing under the “proximity presumption,” effectively dispensing with the need to make an affirmative showing of injury, causation, and redressability.

D Pursuant to 10 C.F.R. § 2.309(f)(2), contentions arising under the National Environmental Policy Act (NEPA) must initially be filed based on an applicant’s environmental report.

E If a petitioner seeks leave to intervene after the initial deadline for the filing of contentions, it must demonstrate good cause for its belated filing under 10 C.F.R. § 2.309(c)(1).

F The Commission has emphasized that the contention admissibility standards in 10 C.F.R. § 2.309(f)(1) are “strict by design” and that failure to comply with any of the requirements renders a contention inadmissible.

G It is well established that NEPA itself does not mandate particular results, but simply prescribes the necessary process that agencies must follow in evaluating environmental impacts. So long as an agency’s DEIS takes a “hard look” at the environmental impacts arising from the licensing action, nothing in NEPA requires the analysis to preclude any particular environmental impact.

H The Commission has said that although a licensing board may appropriately view petitioners’ support for its contention in a light that is favorable to the petitioner, it cannot do so by ignoring the 10 C.F.R. § 2.309(f)(1)(v) requirement that all petitioners provide a statement of fact or expert opinion upon which they intend to rely.

A Entergy Nuclear Operations, Inc. seeks a license amendment concerning the fracture toughness of the reactor pressure vessel at Palisades Nuclear Power Plant. The amendment relies on an “equivalent margins analysis” to show that three plate and weld materials will continue to provide adequate margins of safety after dropping below the regulatory screening criterion. On March 9, 2015, Beyond Nuclear, Don’t Waste Michigan, Michigan Safe Energy Future — Shoreline Chapter, and the Nuclear Energy Information Service requested a hearing and argued that the analysis is inadequate because it does not include recent test data from capsules inside the reactor vessel and does not analyze the potential for “microcracking,” a phenomenon recently detected at two Belgian reactors. Concluding that these issues form an admissible contention, the Board grants the petitioners’ hearing request.

B Under the Commission’s proximity presumption, a person living, having frequent contacts, or having a significant property interest within 50 miles of a nuclear power reactor has standing when a license amendment involves an obvious risk of offsite radiological releases.

C The Board’s review of a license amendment includes challenges concerning whether the applicant has complied with all applicable regulations and whether the issuance of the amendment will be inimical to the health and safety of the public.

D Appendix H sets the minimum frequency for testing capsules inside the reactor vessel for neutron embrittlement and fracture toughness.

E Appendix G grants licensees the option of demonstrating that levels of fracture toughness below the regulatory screening criterion will provide margins of safety against fracture equivalent to those required...
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

by the American Society of Mechanical Engineers’ Boiler and Pressure Vessel Code, Section XI, Appendix G.

F The Staff’s decision to approve a withdrawal schedule in accordance with Appendix H of 10 C.F.R. Part 50 does not preclude modification of the schedule, much less allow the existing schedule to be a defense to compliance with other regulations.

G Regulatory Guide 1.161 provides guidance on how to conduct a successful equivalent margins analysis in several areas not covered by regulation, such as analyzing different fracture event sequences, calculating transients (e.g., pressure along the vessel wall and other physical changes in the vessel), and selecting appropriate material properties as inputs for the models.

H A challenge to the sufficiency of the methodologies described in Staff regulatory guidance is not prohibited by 10 C.F.R. § 2.335(a).

I The requirement of 10 C.F.R. § 2.309(f)(1)(ii), that the petition include a “brief explanation of the basis” for the contention, merely requires an explanation of the rationale or theory of the contention, not evidence or supporting factual information.

J Under 10 C.F.R. § 2.309(f)(1)(iv), there must be some significant link between the claimed deficiency and the agency’s ultimate determination whether the applicant will adequately protect the health and safety of the public and the environment.

K With respect to the requirement for petitioners to provide sufficient factual support to demonstrate a genuine dispute, they are required to make “a minimal showing that material facts are in dispute, thereby demonstrating that an ‘inquiry in depth’ is appropriate.” Gulf States Utilities Co. (River Bend Station, Unit 1), CLI-94-10, 40 NRC 43, 51 (1994) (citing Final Rule: “Rules of Practice for Domestic Licensing Proceedings — Procedural Changes in the Hearing Process,” 54 Fed. Reg. 33,168, 33,171 (Aug. 11, 1989)).

L At the contention admissibility stage, petitioners are not required to prove their case on the merits or even to provide expert or factual support as strong as that necessary to withstand a summary disposition motion.

M Although the admissibility criteria are strict by design, the Commission has also repeatedly warned against turning them into a “fortress to deny intervention.” Consumers Energy Co. (Palisades Nuclear Plant), CLI-07-18, 65 NRC 399, 414 n.49 (2007).

N The Board does not consider evidentiary objections made for the first time after briefing has been completed because to do so would unfairly deprive the petitioners of the opportunity to file the response expressly provided in the NRC’s procedural rules.

O The requirement to dispute specific portions of the application is satisfied when a commonsense reading of the petition makes abundantly clear which sections of the application the petitioners are challenging, even though the petitioners do not specifically cite particular sections.

LBP-15-21 JAMES CHAISSON, Docket No. IA-14-025-EA (ASLBP No. 14-932-02-EA-BD01); ENFORCEMENT ACTION; July 2, 2015; MEMORANDUM AND ORDER (Approving Settlement Agreement and Terminating Proceeding)

A In this proceeding regarding a challenge by hearing requestor James Chaission to a July 2014 NRC Staff enforcement order that, among other things, would have imposed significant restrictions on Mr. Chaission’s ability to engage in NRC-licensed radiographic activities, pursuant to 10 C.F.R. § 2.338(i) the Licensing Board grants a joint motion by the parties to approve their June 2015 revised settlement agreement and terminate the proceeding.

B NRC regulations, specifically section 2.338 of Title 10 of the Code of Federal Regulations, encourage “[t]he fair and reasonable settlement of issues proposed for litigation” in NRC adjudicatory proceedings, with the strictures that govern such settlements set forth in the balance of section 2.338. Thus, subsection (g) outlines the form for such settlements: “A settlement must be in the form of a proposed settlement agreement, a consent order, and a motion for its entry that includes the reasons why it should be accepted. It must be signed by the consenting parties or their authorized representatives.” 10 C.F.R. § 2.338(g).

C In addition, subsection (h) of section 2.338 states that a proposed settlement agreement must contain the following items: “(1) An admission of all jurisdictional facts; (2) An express waiver of further procedural steps before the presiding officer, of any right to challenge or contest the validity of the order entered into in accordance with the agreement, and of all rights to seek judicial review or otherwise contest the validity of the consent order; (3) A statement that the order has the same force and effect as an
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

order made after full hearing; and (4) A statement that matters identified in the agreement, required to be adjudicated have been resolved by the proposed settlement agreement and consent order.” Id. § 2.338(h).

D Finally, subsection (i) of section 2.338 describes the settlement agreement approval process: “Following issuance of a notice of hearing, a settlement must be approved by the presiding officer . . . to be binding in the proceeding. The presiding officer . . . may order the adjudication of the issues that the presiding officer . . . finds is required in the public interest. In an enforcement proceeding under subpart B of this part, the presiding officer shall accord due weight to the position of the NRC staff when reviewing the settlement. If approved, the terms of the settlement . . . must be embodied in a decision or order. Settlements approved by a presiding officer are subject to the Commission’s review in accordance with § 2.341.” Id. § 2.338(i).

E Regarding section 2.338(i)’s direction that in an enforcement proceeding “due weight” must be given to the Staff’s position, the Commission’s decision in the Sequoyah Fuels Corp. proceeding indicates that while the Staff’s position “is not itself dispositive of whether an enforcement agreement should be approved,” the regulatory instruction to accord that position “due weight” nonetheless is “dispositive proof of the importance of the Staff’s views.” Sequoyah Fuels Corp. (Gore, Oklahoma Site), CLI-97-13, 46 NRC 195, 207 (1997).

F The Commission has noted that “[i]n any pending proceeding [in which presiding officer approval of a settlement agreement is required], the presiding officer’s approval of settlement is a matter that must give due consideration to the public interest.” Id. (quoting Sequoyah Fuels Corp. and General Atomics (Gore, Oklahoma Site), CLI-94-12, 40 NRC 64, 71 (1994)) (footnote omitted). The Commission then went on to explain that this “public interest” inquiry requires the presiding officer to consider: “(1) whether, in view of the agency’s original order and the risks and benefits of further litigation, the settlement result appears unreasonable; (2) whether the terms of the settlement appear incapable of effective implementation and enforcement; (3) whether the settlement jeopardizes the public health and safety; and (4) whether the settlement approval process deprives interested parties of meaningful participation.” Id. at 209 (footnote omitted).

G Regarding the first of the Sequoyah Fuels Corp. “public interest” criteria, i.e., the risks and benefits of further litigation for both parties, as is pertinent in this instance, in assessing this factor, id., the Commission focused on “(1) the likelihood (or uncertainty) of success at trial, (2) the range of possible recovery . . . , and (3) the complexity, length, and expense of continued litigation.”

H Absent some future directive from the Commission, a licensing board ruling approving a settlement agreement and terminating a proceeding also terminates the board’s jurisdiction over the parties’ agreement. Nonetheless, if in the future, after seeking a reasonable accommodation with the Staff, the hearing requestor has a concern about how some aspect of a settlement agreement is being implemented or enforced, that concern can be brought to the attention of the Commission, which retains supervisory authority over the parties’ agreement. See Eastern Testing & Inspection, Inc., LBP-96-11, 43 NRC 279, 282 n.1 (1996) (citing Carolina Power & Light Co. (Shearon Harris Nuclear Power Plant, Units 1, 2, 3, and 4), CLI-80-12, 11 NRC 514, 517 (1980)).

I A “with prejudice” termination designation in an enforcement proceeding means that the Staff would effectively be barred from filing any new enforcement claim against the subject of the challenged enforcement order based on the subject matter that was the focus of that order. See Yankee Atomic Electric Co. (Yankee Nuclear Power Station), LBP-99-27, 50 NRC 45, 50 (1999) (with prejudice termination bars “the relitigation of similar issues”).

J As is the case with the federal courts, a licensing board’s authority under section 2.338(i) is to approve or reject a settlement agreement, and so a board cannot amend the agreement without the consent of the parties. See Eastern Testing, LBP-96-11, 43 NRC at 282 n.1 (citing cases).

LBP-15-22 NEXTERA ENERGY SEABROOK, LLC (Seabrook Station, Unit 1), Docket No. 50-443-LR (ASLBNo. 10-906-02-LR-BDO1); OPERATING LICENSE RENEWAL; August 5, 2015; MEMORANDUM AND ORDER (Dismissing Contention 4D and Terminating the Proceeding)

A Friends of the Coast and the New England Coalition; NextEra Energy Seabrook, LLC; and the NRC Staff moved the Board to accept a settlement agreement in this license renewal proceeding for Seabrook Station, Unit 1. On August 8, 2013, pursuant to 10 C.F.R. § 2.338(i), this Board approved the settlement, under which the parties agreed that additional analysis in the Final Supplemental Environmental Impact Statement (FSEIS) would be sufficient to address the only contention remaining in this proceeding. On July 29, 2015, the NRC Staff complied with the Board’s order to submit a letter identifying that relevant
analysis following issuance of the FSEIS. Accordingly, this order dismisses the sole remaining contention
per the parties’ agreement and terminates the proceeding.

LBP-15-23 FLORIDA POWER & LIGHT COMPANY (Turkey Point Nuclear Generating Plant, Units 6 and 7),
Docket Nos. 52-040-COL, 52-041-COL (ASLBP No. 10-903-02-COL-BD01); COMBINED LICENSE;
August 21, 2015; MEMORANDUM AND ORDER (Denying Joint Intervenors’ Motion to Admit New
Contention)

A In this combined license (COL) proceeding, the Intervenors move for leave to file a new contention
challenging the adequacy of the discussion of mitigation measures in the NRC Staff’s Draft Environmental
Impact Statement (DEIS). The Board denies the motion, concluding that the proffered contention is not
admissible because (1) contrary to the Intervenors’ assertion, the DEIS need not include the Army Corps
of Engineers’ Clean Water Act § 404 permit analysis inorder to satisfy the procedural requirements of the
National Environmental Policy Act (NEPA); and (2) the Intervenors fail to identify any specific deficiency
in the DEIS’s discussion of proposed mitigation measures.

B An intervenor who moves to file a new contention must demonstrate good cause for proffering the
contention after the initial deadline for the filing of contentions. See 10 C.F.R. § 2.309(c)(1). In addition
to being timely, the proposed new contention must satisfy the six-factor contention admissibility standard

C An agency cannot relinquish its NEPA responsibility to evaluate environmental impacts by relying
on expected compliance with another agency’s environmental standards. Calvert Cliffs’ Coordinating
Committee, Inc. v. AEC, 449 F.2d 1109, 1122-23 (D.C. Cir. 1971).

D Because NEPA and the Clean Water Act are different statutes using different standards to achieve
different goals, NEPA cannot reasonably be interpreted to require that the NRC delay issuance of a DEIS
until the Army Corps of Engineers (Corps) completes its substantive review under the Clean Water Act.
See City of Carmel-by-the-Sea v. U.S. Department of Transportation, 123 F.3d 1142, 1152 (9th Cir. 1997).
Accordingly, a contention based solely on the assertion that a DEIS is deficient unless it includes the
Corps’ 404 Permit Review is not admissible for failing to raise a material issue pursuant to 10 C.F.R.
§ 2.309(f)(1)(iv).

E Although NEPA requires “that an EIS contain a detailed discussion of possible mitigation measures,”
it “does not mandate particular results” and, accordingly, does not “demand the presence of a fully
developed plan that will mitigate environmental harm before an agency can act.” Robertson v. Methow

F An intervenor’s challenge to the adequacy of the NRC Staff’s review of mitigation measures fails to
raise a genuine dispute with a DEIS pursuant to 10 C.F.R. § 2.309(f)(1)(vi) when an intervenor fails to
(1) allege a deficiency in the analytic methodology for assessing mitigation; (2) identify a deficiency in
the discussion of proposed mitigation measures; or (3) articulate how the DEIS’s analysis of mitigation
proposals lacked an adequate assessment of effectiveness.

LBP-15-24 ENTERGY NUCLEAR VERMONT YANKEE, LLC, and ENTERGY NUCLEAR OPERATIONS,
INC. (Vermont Yankee Nuclear Power Station), Docket No. 50-271-LA-3 (ASLBP No. 15-940-05-LA-
BD01); OPERATING LICENSE AMENDMENT; August 31, 2015; MEMORANDUM AND ORDER
(Granting Petition to Intervene and Hearing Request)

A Entergy Nuclear Vermont Yankee, LLC and Entergy Nuclear Operations, Inc. (“Entergy”) seek a
license amendment request (“LAR”) to replace certain site-specific license conditions on the decommis-
sioning trust fund for Vermont Yankee Nuclear Power Station with the regulatory requirements of 10
C.F.R. § 50.75(h). On April 20, 2015, the State of Vermont, represented by the Vermont Department
of Public Service, proffered four contentions challenging this LAR. Among other arguments, Vermont
asserts that the license condition requiring a 30-day notice for withdrawals from the decommissioning trust
fund remains necessary in light of Entergy’s alleged plans to spend the fund on impermissible expenses
and also argues that the LAR is incomplete because it does not discuss a related exemption request that
would allow Entergy to use the decommissioning trust fund for spent fuel management. Vermont moved
to file a new contention on July 6 based on the NRC Staff’s decision to grant Entergy’s exemption
request. In this Memorandum and Order, the Board concludes that two of Vermont’s five contentions are
admissible because the State has proffered sufficient support to show that Entergy’s expenses contravene
the regulations and has also raised a valid legal contention challenging the failure of the LAR to discuss
directly relevant exemptions that would only go into effect if the LAR were approved. The Board therefore
grants Vermont’s hearing request.
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

B A state government has automatic standing to challenge a nuclear power reactor’s license amendment request when the facility is located within the boundaries of the state.

C Under 10 C.F.R. § 50.75(h)(1)(iv), the decommissioning trust fund can be used only for decommissioning expenses, defined in 10 C.F.R. § 50.2 as activities to remove a facility from service safely and reduce residual radioactivity at the site.

D The decommissioning trust fund cannot be used for spent fuel expenses under NRC regulations because spent fuel management is not a decommissioning activity.

E Because applicants must provide information that is complete and accurate in all material respects, a claim that a LAR contains incomplete and incorrect statements is within the scope of a license amendment proceeding.

F The claim that a LAR would conflict with applicable NRC regulations if granted is not an impermissible challenge to the regulations themselves.

G Although the merits of an exemption request are outside the scope of a license amendment proceeding, a Board may appropriately consider citations to documents that an applicant filed with the NRC, such as an exemption request, as factual support for a contention.

H Exemption-related issues are within the scope of a license amendment proceeding when the exemptions are directly dependent on a LAR and will go into effect only if the LAR is approved.

I The NRC Staff’s ongoing enforcement of regulations and license conditions does not trigger hearing rights, but petitioners may challenge the correctness of a statement in the LAR related to compliance if that challenge is supported by sufficient documentary evidence.

J Allegations that an applicant will violate state law are not within the scope of a license amendment proceeding.

K A contention raises a material issue if there is some significant link between the claimed deficiency and the agency’s ultimate determination whether granting the LAR will adequately protect the health and safety of the public and the environment.

L There is no time restriction on when a licensee can seek to amend license conditions relating to its decommissioning trust fund that existed before promulgation of 10 C.F.R. § 50.75(b), but those amendments must bring the license into compliance with 10 C.F.R. § 50.75(b).

M The merits of an NRC Staff decision to grant an exemption request are outside the scope of a license amendment proceeding.

N Under 10 C.F.R. § 51.53(d), an applicant need not submit an environmental report until the final stage of decommissioning as part of its license termination plan.

O The purpose of the timeliness rules is not to trap petitioners into a no-win situation where a contention is called premature if filed in the original petition and untimely if petitioners wait for a potential event to actually transpire.

P A contention that a LAR is incorrect and incomplete is squarely within the scope of a license amendment proceeding under 10 C.F.R. § 2.309(l)(1)(iii) because the regulations are clear that the applicant must fully describe the changes desired in the LAR and that the LAR must be complete and accurate in all material respects.

Q When there is no factual dispute between the parties on a matter, a Board may decide the legal issues on the basis of briefs and oral argument.

LBP-15-25 DTE ELECTRIC COMPANY (Fermi Nuclear Power Plant, Unit 2), Docket No. 50-341 (ASLBP No. 14-933-01-LR-BD01); OPERATING LICENSE RENEWAL; September 11, 2015; ORDER (Terminating Proceeding)

LBP-15-26 ENTERGY NUCLEAR OPERATIONS, INC. (Indian Point, Unit 2), Docket No. 50-247-LA (ASLBP No. 15-942-06-LA-BD01); OPERATING LICENSE AMENDMENT; September 25, 2015; MEMORANDUM AND ORDER (Denying New York’s Petition to Intervene)

A Entergy Nuclear Operations, Inc. filed a license amendment request to reduce the frequency of the reactor containment Integrated Leak Rate Test (ILRT) conducted at Indian Point Nuclear Generating Station, Unit 2 from once every 10 years to once every 15 years permanently. The State of New York petitioned to intervene, contending that (1) the requested amendment poses a significant health and safety hazard to the public; and (2) Entergy and the NRC Staff failed to perform allegedly required environmental reviews of the amendment request. The Board concludes that New York fails to proffer an admissible contention and denies its petition.
B Appendix J requires that licensees conduct periodic containment leakage tests to provide assurance that (1) leakage from the containment, including components that penetrate the containment, does not exceed the allowable leakage rates specified in the technical specifications; and (2) the containment will perform its design function following an accident up to and including the plant design-basis accident. See 10 C.F.R. Part 50, App. J, Option B, § I.

C The containment leakage tests required by Appendix J consist of (1) Type A tests, or ILRTs, that measure the containment’s total leakage rate; (2) Type B pneumatic tests that detect and measure local leakage rates across pressure-retaining, leakage-limiting boundaries (other than valves); and (3) Type C pneumatic tests that measure containment isolation valve leakage rates. See 10 C.F.R. Part 50, App. J, Option B, §§ III.A and III.B.

D Of the containment leakage tests, Type B and C tests assure that containment penetrations are essentially leak tight, while Type A tests measure the containment system’s overall leakage rate, thereby enabling a licensee to verify the leakage integrity of the containment liner.

E The acceptance criteria for Type A tests embodied in the technical specification leakage limits are established to ensure that, in the event of a design-basis accident, the dose received by a member of the general public will not exceed the limits in 10 C.F.R. Part 100. See 10 C.F.R. Part 50, App. J, Option B, §§ II.

F The “no significant hazards consideration” determination is a determination that, if reached by the NRC, permits it to make an authorized license amendment effective immediately pursuant to 10 C.F.R. § 50.58(b)(5), rather than awaiting the outcome of an adjudicatory challenge. As explained by the Commission, it “is a procedural device to determine when, not whether, petitioners’ right to a hearing under the Atomic Energy Act will occur.” Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-86-12, 24 NRC 1, 6 n.3 (1986); see also 10 C.F.R. § 50.91 (discussing process for making the no significant hazards consideration determination).

G Before a Licensing Board may grant a timely filed petition to intervene, it must conclude that the petitioner has (1) established standing; and (2) proffered at least one admissible contention. See 10 C.F.R. § 2.309(a).

H Where a State seeks to participate as a party in a proceeding pertaining to a “utilization facility located within [its boundaries] . . . no further demonstration of standing is required.” 10 C.F.R. § 2.309(h)(2).

I To be admissible, a contention must satisfy the six-factor admissibility test in 10 C.F.R. § 2.309(f)(1). The Commission has stressed that the contention admissibility standard is “strict by design.” Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Units 2 and 3), CLI-01-24, 54 NRC 349, 358 (2001).

J No “historical event” criterion exists within the “performance criteria” specified in Appendix J, Option B concerning the frequency for performing containment ILRTs. See 10 C.F.R. Part 50, App. J, Option B, §§ II and III.

K A petitioner’s attempt to graft a “historical event” criterion onto the “performance criteria” specified in Appendix J, Option B is an impermissible challenge to Commission regulations pursuant to 10 C.F.R. § 2.335(a), which, inter alia, bars contentions that seek to impose a requirement beyond those imposed by a Commission regulation. See, e.g., NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-12-5, 75 NRC 301, 315 & n.88 (2012).

L Pursuant to 10 C.F.R. § 50.58(b)(6), apart from discretionary review by the Commission, the NRC Staff’s no significant hazards consideration determination under section 50.92(c) — whose sole effect is to permit the Staff to make an authorized license amendment immediately effective despite the tendency of an adjudication — may not be contested. Issues regarding when an authorized license amendment should become effective are irrelevant to a proceeding that involves a challenge to the merits of a license amendment request. Hence, the adequacy of the no significant hazards consideration determination, in addition to being immune from challenge pursuant to section 50.58(b)(6), is not material to, or within the scope of, the proceeding.

M Simply referencing a study without explaining the information’s significance relative to the alleged defect does not establish a contention’s materiality as is required by 10 C.F.R. § 2.309(f)(1)(iv), nor does it establish a genuine dispute of fact as is required by 10 C.F.R. § 2.309(f)(1)(vi).

N Section 51.22 identifies categories of actions that are exempt from NEPA review because the NRC has made a generic finding that the “actions do[ ] not individually or cumulatively have a significant effect on the human environment.”
on the human environment." 10 C.F.R. § 51.22(a). Section 51.22(c)(9), in turn, establishes a categorical exemption for the issuance of a reactor license amendment that changes a requirement, provided that: "(i) The amendment or exemption involves no significant hazards consideration; (ii) There is no significant change in the types or significant increase in the amounts of any effluents that may be released offsite; and (iii) There is no significant increase in individual or cumulative occupational radiation exposure." Id. § 51.22(c)(9).

O The Staff’s no significant hazards consideration determination in section 51.22(c)(9)(i) may not be contested pursuant to 10 C.F.R. § 51.58(b)(6).

P A petitioner with supporting facts may seek review of a section 51.22(c)(9) determination by at least two methods: (1) challenging either of the findings made under section 51.22(c)(9)(ii) or (iii); and (2) if the requirements of section 51.22(c)(9) are satisfied, by showing the existence of "special circumstances" pursuant to 10 C.F.R. § 51.22(b) that would justify excepting a proposed license amendment from the categorical exclusion of section 51.22(c).

Q It is well established in NRC proceedings that a reply brief cannot introduce new issues or expand the scope of arguments advanced in the original petition; rather, a reply brief must focus on the actual or logical arguments presented in the original petition or raised in answers to it.

LBP-15-27 PACIFIC GAS AND ELECTRIC COMPANY (Diablo Canyon Nuclear Power Plant, Units 1 and 2), Docket Nos. 50-275, 50-323 (ASLBP No. 15-941-05-LA-BD01); OPERATING LICENSE AMENDMENT; September 28, 2015; MEMORANDUM AND ORDER (Denying Petition to Intervene and Request for Hearing)

A Petitioner alleges a de facto license amendment involving the operating licenses held by Pacific Gas and Electric Company for Diablo Canyon Nuclear Power Plant, Units 1 and 2. Because the NRC has neither granted PG&E greater authority than that provided by its existing licenses nor otherwise altered the terms of those licenses, the Board concludes Petitioner is not entitled to an opportunity to request a hearing pursuant to the Atomic Energy Act (AEA) § 189a.

B AEA § 189a hearing rights may be triggered when the substance of an NRC action, while not formally labeled as a license amendment, in effect accomplishes the same thing. A de facto license amendment would exist, and hearing rights would be triggered, if the NRC were to grant a licensee “greater operating authority” or otherwise alter “the terms of the license” or permit the licensee to go beyond its existing license authority. Cleveland Electric Illuminating Co. (Perry Nuclear Power Plant, Unit 1), CLI-96-13, 44 NRC 315, 328 (1996).

C A de facto license amendment proceeding is not initiated merely because a licensee takes an action that requires some type of NRC approval, or because a licensee makes a change to its facility that is allowed under 10 C.F.R. § 50.59 without prior NRC approval.

D Speculative changes to a plant’s licensing basis that may or may not occur do not constitute a proper ground on which to seek an adjudicatory hearing.

E Actions taken by a licensee under the authority of section 50.59 do not give rise to hearing rights under the AEA, but rather are monitored by the NRC Staff’s inspections and oversight, which may be challenged only by a petition for enforcement pursuant to 10 C.F.R. § 2.206.

F Staff oversight activities that ensure compliance with existing requirements do not constitute de facto license amendments. NRC inspection reports, even inspection reports documenting violations, are not de facto license amendments.

LBP-15-28 ENTERGY NUCLEAR VERMONT YANKEE, LLC, and ENTERGY NUCLEAR OPERATIONS, INC. (Vermont Yankee Nuclear Power Station), Docket No. 50-271-LA-3 (ASLBP No. 15-940-03-LA-BD01); OPERATING LICENSE AMENDMENT; October 15, 2015; ORDER (Granting Motion to Withdraw LAR, Denying Motion for Leave to File Reply, and Terminating Proceeding)

A Entergy Nuclear Vermont Yankee, LLC, and Entergy Nuclear Operations, Inc. (“Entergy”), seek to withdraw the license amendment request (“LAR”) that formed the basis of this contested license amendment proceeding, which concerned disbursements and notifications for the decommissioning trust fund for Vermont Yankee Nuclear Power Station. The Board grants Entergy’s motion to withdraw the LAR without prejudice on the conditions that (1) Entergy must provide written notice to Vermont of any new LAR relating to the decommissioning trust fund at the time such application is submitted to the NRC and (2) Entergy must specify in its 30-day notice to the NRC if any proposed disbursement includes one of the six line items or legal expenses to which Vermont objected in its admitted contention.
DIGESTS
ISSUANCES OF THE ATOMIC SAFETY AND LICENSING BOARDS

B Once a Board has issued a Notice of Hearing, voluntary withdrawal of the LAR is subject to the Board’s approval and under the terms prescribed by the presiding officer. These terms are set on a case-by-case basis, with any conditions on the withdrawal tailored to address the particular circumstances of that proceeding.

C An applicant’s unconditional withdrawal is generally appropriate if it would cause no prejudice to either the intervenors’ or the public’s interest.

D A dismissal with prejudice is a harsh sanction reserved for unusual situations because it is the equivalent of a decision on the merits of the LAR. The possibility of future litigation is not sufficient legal harm to justify a dismissal with prejudice.

E Where a withdrawal concerns a legal dispute that is not resolved by the withdrawal itself, a Board may take steps to ensure that the nonmoving party is not deprived of a chance to litigate that potentially meritorious issue in the future.

F Under NRC regulations, a moving party has no right to reply and may be granted such permission only in compelling circumstances.

G A party has not demonstrated compelling circumstances justifying a reply where that party could reasonably have anticipated the arguments to which it seeks leave to reply.

LBP-15-29 PACIFIC GAS AND ELECTRIC COMPANY (Diablo Canyon Nuclear Power Plant, Units 1 and 2), Docket Nos. 50-275-LR, 50-323-LR (ASLBP No. 10-900-01-LR-BD01); OPERATING LICENSE RENEWAL; October 21, 2015; MEMORANDUM AND ORDER (Denying Motion to File Amended Contention, Granting Summary Disposition, and Terminating Proceeding)

A Applicant moves for summary disposition regarding the sole remaining contention, a contention of omission, concerning its license renewal application to operate two reactors at the Diablo Canyon Nuclear Power Plant in San Luis Obispo, California, for an additional 20 years. Because the alleged omission has been cured, the Board (1) grants the motion for summary disposition; (2) rejects a motion to amend a proffered but inadmissible contention; and (3) terminates the case.

B It is not enough to suggest a preferred method for performing a SAMA analysis. An intervenor must come forward with a plausible demonstration that the existing analysis is unreasonable and that any alleged deficiency would materially change conclusions regarding the cost-effectiveness of particular SAMAs.

C The purpose of scheduling orders is to ensure proper case management, with the objective of expediting the disposition of the proceeding; establishing early and continuing control so that the proceeding will not be protracted because of lack of management; and discouraging wasteful prehearing activities.

D Unless a schedule is so onerous or unfair that it deprives a party of procedural due process, “scheduling is a matter of Licensing Board discretion.” Cleveland Electric Illuminating Co. (Perry Nuclear Power Plant, Units 1 and 2), ALAB-841, 24 NRC 64, 95 (1986). A Licensing Board may modify or waive the provisions of its scheduling orders as it deems appropriate in the interest of sound case management.

A NRC regulations permit licensing boards broad powers necessary to “conduct a fair and impartial hearing according to law, to take appropriate action to control the prehearing and hearing process, to avoid delay and to maintain order.” Under this authority and the provisions of 10 C.F.R. § 2.338, boards are empowered to approve settlements proposed by the parties.

B In the Board’s estimation, it is not necessary for a notice of hearing to be issued before the Board can approve this settlement. The Commission’s regulations, viewed in context, contemplate presiding officer approval of proposed settlements in proceedings with admitted contentions.

C Before 2004, the settlement provision for Subpart L proceedings was found in 10 C.F.R. § 2.1241, and stated explicitly that “[a] settlement must be approved by the presiding officer or the Commission as appropriate in order to be binding in the proceeding.” While this provision was replaced by the more general one governing settlements found in 10 C.F.R. § 2.338, the Commission explicitly noted that this change was made to consolidate regulatory text and provide guidance on the use of alternative dispute resolution; it was not adopted to effect any material alteration in the process for accepting settlements.

D That the Commission still requires presiding officer approval for settlements in contested proceedings with admitted contentions is evidenced from other provisions of section 2.338.
Of the three provisions that were combined in the 2004 rulemaking, only 10 C.F.R. § 2.203 (2003), which was itself limited to enforcement proceedings, referred to a notice of hearing as part of the settlement procedure. It is the Board’s estimation that the regulatory language in no way limits the Board’s responsibility to approve settlements to instances only where a notice of hearing, a procedural document, has previously been issued.

Licensing boards are to approve settlements when they are fair and reasonable and comport with the public interest. The parties appear in agreement that Northern States’ revisions to its license and Aging Management Program satisfy the Prairie Island Indian Community’s concerns, and the Prairie Island Indian Community has consented in its Settlement Agreement to the dismissal of Contention 6. The Board finds dismissal of this contention, in accordance with the terms of the parties’ Settlement Agreement, to be in the public interest and consistent with the Commission’s policy to encourage fair and reasonable settlement and resolution of issues proposed for litigation.

LBP-15-31 ENTERGY NUCLEAR OPERATIONS, INC. (Palisades Nuclear Plant), Docket No. 50-255-LA-2 (ASLB No. 15-939-06-LA-BD01); OPERATING LICENSE AMENDMENT; November 13, 2015; ORDER (Terminating Proceeding)
DIGESTS
ISSUANCES OF DIRECTORS’ DECISIONS

DD-11-1
ENTEY NUCLEAR VERMONT YANKEE, LLC and ENTERGY NUCLEAR OPERATIONS, INC. (Vermont Yankee Nuclear Power Station), Docket No. 50-271 (License No. DPR-28); REQUEST FOR ACTION; January 27, 2011; DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206

A By letter dated April 19, 2010, Congressman Paul W. Hodes, U.S. House of Representatives, filed a Petition pursuant to Title 10 of the Code of Federal Regulations (10 C.F.R.), section 2.206, with the Nuclear Regulatory Commission (NRC). The Petition requested that the NRC not allow the Vermont Yankee Nuclear Power Station to restart after its scheduled refueling outage until all environmental remediation work and relevant reports on leaking tritium at the plant have been completed. Specifically, the Petition requested that Vermont Yankee be prevented from resuming power production until the following efforts have been completed to the Commission’s satisfaction: (1) the tritiated groundwater remediation process; (2) the soil remediation process scheduled to take place during the refueling outage, to remove soil containing not only tritium, but also radioactive isotopes of cesium, manganese, zinc, and cobalt; (3) the ongoing root cause analysis being performed by Entergy; and (4) the Commission’s review of the documents presented by Entergy as a result of the Commission’s Demand for Information, which was imposed on the Licensee on March 1, 2010.

B This Petition was assigned to the NRC’s Office of Nuclear Reactor Regulation (NRR) for review. NRR’s Petition Review Board’s recommendation was to accept the Petition for review, but not to prohibit restart of Vermont Yankee as there was reasonable assurance that the health and safety of the public was being protected and there were no immediate safety concerns.

C The final Director’s Decision (DD) was issued on January 27, 2011. The final DD stated that the NRC did not see cause to prohibit the restart of Vermont Yankee. The final DD also stated that the activities requested by the Petitioner have been completed with the exception of preventing the restart of Vermont Yankee. Therefore, NRR staff concluded that the Petition has been granted in part and denied in part.

DD-11-2
FIRSTENERGY NUCLEAR OPERATING COMPANY (Davis-Besse Nuclear Power Station, Unit 1), Docket No. 50-346 (License No. NPF-3); REQUEST FOR ACTION; February 15, 2011; DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206

A The Petition requested that the NRC issue a Show Cause Order, or comparable enforcement action, preventing the DBNPS from restarting following the shutdown in February 2010, until adequate protection standards were met. As the basis for the April 5, 2010, request, the Petitioner states that FirstEnergy Nuclear Operating Company (the Licensee for DBNPS) has violated federal regulations and the explicit conditions of its operating license by operating for longer than 6 hours with pressure boundary leakage.

B The final Director’s Decision was issued on February 15, 2011. The Petitioner raised issues related to the DBNPS adequate protection standard regarding zero pressure boundary leakage and operation of the reactor at DBNPS. NRC Region III Inspection Report 05000346/2010-008(DRS) issued October 22, 2010 (ADAMS Accession No. ML102930380), focused on these concerns. The NRC Special Inspection Team was chartered to assess the circumstances surrounding the identification of the flaws in the RVCH CRDM nozzle penetrations at DBNPS.

C The NRC has found the Licensee response to the identified conditions to be reasonable and technically sound. The NRC has reviewed in detail the CRDM nozzle cracking, as well as the circumstances surrounding the causes of this cracking and previous opportunities for identification and intervention. The NRC’s inspection determined that the public health and safety have not been, nor are likely to be, adversely affected. The inspection determined that the Licensee conformed to the subject NRC regulatory
The Petitioners requested that the Nuclear Regulatory Commission (NRC) take enforcement actions against Entergy Nuclear Operations, Inc., the operator of Vermont Yankee, as a result of a tritium leak. Mr. Mulligan requested in his petition that: (1) the radioactive leak into the environment of VY be immediately stopped; (2) VY be immediately shut down, and all leaking paths be isolated; and (2) VY disclose its preliminary “root cause analysis,” and the NRC release its preliminary investigative report on that analysis before plant startup. Mr. Shadis on behalf of New England Coalition (NEC) requested in his petition that the NRC: (1) require VY to go into cold shutdown and depressurize all systems in order to slow or stop the leak; (2) act promptly to stop or mitigate the leak(s); (3) require VY to reestablish its licensing basis by physically tracing records and reporting physical details of all plant systems that would be within scope as “Buried Pipes and Tanks,” in NUREG-1801, “Generic Aging Lessons Learned (GALL) Report,” and under the requirements of 10 C.F.R. § 50.54, “Conditions of licenses”; (4) investigate and determine why Entergy has been allowed to operate VY since 2002 without a working knowledge of all plant systems and why the NRC’s Reactor Oversight Process (ROP) and review process for license renewal amendment did not detect this dereliction; (5) take notice of VY’s many maintenance and management failures (from 2000 to 2010) and the ROP’s failure to detect them early and undertake a full diagnostic evaluation team inspection using NRC Inspection Procedure 95003, “Supplemental Inspection for Repetitive Degraded Cornerstones, Multiple Degraded Cornerstones, Multiple Yellow Inputs or One Red Input”; and (6) require VY to apply for an amendment to its license renewal application that would address both aging analysis and aging management of all buried piping carrying or with the potential to carry radioisotopes and/or the potential to interact with any safety or safety-related system. Mr. Saporito requested in his petition that the NRC: (1) order a cold shutdown mode of operation for VY because of leaking radioactive tritium; and (2) issue a confirmatory order modifying the NRC-issued license for VY so that the Licensee must bring the nuclear reactor to a cold shutdown mode of operation until the Licensee can provide definitive reasonable assurance to the NRC, under affirmation, that the reactor will be operated in full compliance with the regulations in 10 C.F.R. Part 50, “Domestic Licensing of Production and Utilization Facilities,” and Appendix A, “General Design Criteria for Nuclear Power Plants,” to 10 C.F.R. Part 50, Criterion 60, “Control of Releases of Radioactive Materials to the Environment,” and Criterion 64, “Monitoring Radioactivity Releases,” and other NRC regulations and authority.

The final Director’s Decision on this petition was issued on March 11, 2011. On January 7, 2010, Entergy reported to the NRC that water samples taken from groundwater monitoring well GZ-3 onsite at VY showed tritium levels above background. GZ-3 is about 70 feet from the Connecticut River. Tritium was initially measured at levels up to about 17,000 pCi/L in monitoring well GZ-3, which is not used for drinking water. Samples at other monitoring wells have also shown some tritium. The highest reading from any monitoring well has been about 2.5 million pCi/L, from monitoring well GZ-10. Entergy immediately started an investigation to identify the source of the tritium, and later installed additional monitoring wells to help locate the source. Upon notification on January 7, 2010, of the detection of tritium in the monitoring well, the NRC Staff initiated actions to review and assess the condition, by reviewing all available sampling data, hydrologic information, and analyses; conducting an onsite inspection and assessment of Entergy’s plans and process for investigating the condition; and making an independent determination of public health and safety consequence based on available information. NRC inspectors provided close regulatory oversight of Entergy’s investigation in order to independently assure conformance with applicable NRC regulatory requirements, assess Licensee performance, and evaluate the condition with respect to NRC’s radiological release limits. On February 27, 2010, following excavation and leak testing of the Advanced Off Gas (AOG) system pipe tunnel, Entergy reported that it had identified leakage into the surrounding soil, and therefore to the groundwater, from an unsealed joint in the concrete tunnel wall. The AOG pipe tunnel is located about 15 feet underground. Also, piping inside the tunnel had previously been found to be leaking, and the drain inside the tunnel had been found to be clogged. Soil samples in the vicinity showed traces of radioactive isotopes. Entergy reported that the leakage to the environment had been stopped by isolating piping and containing the water leaking from the AOG pipe tunnel. However, on May 28,
2010, Entergy reported a second leak from AOG piping into the soil. Entergy quickly isolated this leak and has sealed off that piping to prevent further leaks in that area. The contaminated soil was removed from the excavated area and is being stored in containers onsite for eventual disposal in accordance with NRC regulatory requirements. As part of its oversight effort, NRC Staff conducted an evaluation in accordance with NRC Manual Chapter 0309, “Reactive Inspection Decision Basis for Reactors,” from January 25 to April 10, 2010, to determine if the occurrence with the AOG piping constituted a significant operational event (i.e., a radiological, safeguards, or other safety-related operational condition) that posed an actual or potential hazard to public health and safety, property, or the environment. The evaluation reviewed the condition against the specified deterministic criteria that are based on regulatory safety limits, and determined that none of the criteria were met. Notwithstanding that determination, the NRC Staff continued its review, oversight, and assessment of the condition, including an independent evaluation of any potential public health and safety consequences. The Staff’s activities included: (1) Several onsite inspections and reviews to assess radiological and hydrological data to establish reasonable assurance that members of the public were not, nor were they expected to be, exposed to radiation in excess of the dose limits for individual members of the public specified in 10 C.F.R. § 20.1301 (i.e., 100 millirem in a year) or the As Low As Is Reasonably Achievable (ALARA) dose objectives specified in 10 C.F.R. Part 50, Appendix I; (2) Engagement of hydrological scientists from NRC’s Office of Nuclear Reactor Regulation, Office of Regulatory Research, and the U.S. Geological Survey to independently assess the Licensee’s hydrological and geological data and conclusions on groundwater flow characteristics of the area; (3) Inspection in accordance with NRC Temporary Instruction TI-2515/173, “Review of the Implementation of the Industry Ground Water Protection Voluntary Initiative,” to determine the Licensee’s implementation of the specifications in the industry’s groundwater initiative document NEI-07-07, “Industry Ground Water Protection Initiative — Final Guidance Document” (ADAMS Accession No. ML072610036); (4) Confirmation of the basis, calculational methodology, and results obtained by the Licensee to estimate a contaminated groundwater effluent release and off-site dose consequence to members of the public; (5) Analysis of selected groundwater and environmental samples to aid in determining the adequacy of the Licensee’s analytical methods; (6) Approval for additional NRC inspection resources above the baseline inspection program to fully evaluate and provide continuing regulatory oversight of the Licensee’s investigation and remediation activities; (7) Documentation of the inspection scope and conclusions in publicly available NRC Inspection Reports. As a result of these activities, the NRC established reasonable assurance, in a timely manner, that this groundwater condition would not result in any dose consequence that would jeopardize public health and safety. To date, information and data continue to support that the dose consequence attributable to the groundwater condition at VY remains well below the “As Low As Reasonably Achievable” (ALARA) dose objectives specified in 10 C.F.R. Part 50, Appendix I; and that the NRC regulatory criteria of 10 C.F.R. § 20.1301, “Dose limits for individual members of the public,” was never approached.

C The NRC Staff did not identify any violations and the public health and safety remain reasonably assured. Thus, no enforcement action against VY is warranted. The NRC Staff concludes that the Petitioners’ concerns have been addressed and resolved such that no further action is needed in response to the petitions.

DD-11-4 FIRSTENERGY NUCLEAR OPERATING COMPANY (Three Mile Island Nuclear Station, Unit 2), Docket No. 50-320 (License No. DPR-73); REQUEST FOR ACTION; June 2, 2011; DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206

A The Petitioner requested that the NRC take enforcement action in the form of a Demand for Information from FirstEnergy Nuclear Operating Company (FENOC) relating to inadequate financial assurances provided by the Licensee for Three Mile Island Unit-2’s (TMI-2’s) nuclear decommissioning fund prior to the consummation of FENOC’s proposed merger with Allegheny Energy. As the basis for this request, the Petitioner states that the current radiological decommissioning cost estimate is $831.5 million and the current amount in the decommissioning trust fund is $484.5 million, as of December 31, 2008. Further, the Petitioner asserts that FirstEnergy does not provide adequate financial assurance for decommissioning funding of TMI-2: (1) FirstEnergy’s annual report fails to account for the special status of TMI-2, (2) the current level of the decommissioning trust fund demonstrates underfunding, and (3) that the underfunding would increase once decommissioning rate recovery payments from Metropolitan Edison and Pennsylvania Electric were terminated on December 31, 2010, pursuant to Pennsylvania Public Utility Commission orders.
B The final Director’s Decision (DD) on this petition was signed on June 3, 2011. The petition was denied and the Staff addressed the Petitioner’s comments as follows:

1. As stated in the petition, the Petitioner evaluated the 2008 Decommissioning Funding Status Report, which was the most current information at the time. However, in order to determine the current state of the Licensee’s decommissioning funding assurance, the Staff critically reviewed and evaluated the site-specific 2009 Decommissioning Funding Status Report for TMI-2, which was submitted by GPU Nuclear (the Licensee) on March 29, 2010. The Licensee submitted additional information on November 9, 2010, and February 10, 2011, as part of the 2.206 process. The Staff reviewed the Licensee’s submittals and determined that GPU Nuclear provided the information required by NRC regulations in 10 C.F.R. § 50.75. The Staff found that the Licensee’s decommissioning trust fund demonstrates adequate decommissioning funding assurance, and that no modification of the Licensee’s schedule for the accumulation of decommissioning funds is necessary at this time.

2. The merger between FirstEnergy and Allegheny Energy is outside the regulatory authority of the NRC; specifically, under NRC regulations the NRC does not have authority to analyze the impact of the merger. NRC evaluates mergers when nuclear interests are involved; no evidence has been provided by the Petitioner of any nuclear interests that were under the control of Allegheny Energy. Moreover, the Licensee’s Decommissioning Funding Status Report meets the requirements of 10 C.F.R. § 50.75, and the Staff’s review was conducted in accordance with NRC guidance documents, NUREG-1307, Rev. 14, and LIC-205, Rev. 4.

The Staff concludes that the Petitioner’s comments reflect dissatisfaction with the regulatory requirements of 10 C.F.R. § 50.75. Changes to this regulation are outside the scope of the 2.206 petition process.

DD-11-5 U.S. ARMY INSTALLATION MANAGEMENT COMMAND, Docket No. 40-09083; REQUEST FOR ACTION; October 29, 2011; DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206

A The Petitioner requested that the Nuclear Regulatory Commission (NRC) investigate whether, counter to applicable law and regulations, the United States Army (the Army) possessed or released into the environment depleted uranium (DU) from spent spotting rounds after the expiration of NRC License SUB-459 and, were the NRC to determine that such a violation had occurred, to assess against the Army the maximum penalty permitted by law. The Petitioner requested that any assessed monetary penalties be applied to the environmental remediation of DU contamination at the Schofield Barracks and Pohakuloa Training Area installations in Hawaii.

B The final Director’s decision on this petition was issued on October 29, 2011. That decision addressed the three items requested by the Petitioner. The activities requested by the Petitioner were granted in part and denied in part.

C With respect to the first item, the NRC Staff initiated an investigation into the apparent violation of the NRC’s regulations in 10 C.F.R. § 40.3 and took enforcement action against the Army.

D With respect to the second and third items, consistent with the NRC Enforcement Policy, the NRC chose not to impose any civil penalty against the Army for the noticed violation because: (1) the Army installations in Hawaii have not been previously the subject of escalated enforcement action; (2) the Army identified and notified the NRC of the presence of radioactive material; and, finally, (3) the Army implemented corrective actions in response to the discovery of the presence of the DU. Further, if the NRC were to have chosen to impose a civil penalty, the law does not provide for the application of that assessed civil penalty to the environmental remediation of DU contamination as requested by the Petitioner because fines assessed for violations of NRC requirements are sent to the U.S. Treasury. Therefore, these portions of the Petition were denied.

DD-11-6 ENTERGY NUCLEAR VERMONT YANKEE, LLC and ENTERGY NUCLEAR OPERATIONS, INC. (Vermont Yankee Nuclear Power Station), Docket No. 50-271 (License No. DPR-28); REQUEST FOR ACTION; September 9, 2011; DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206

A The Petitioner requested that the Nuclear Regulatory Commission (NRC) take enforcement actions against Entergy Nuclear Operations, Inc., the operator of Vermont Yankee, as result of inoperability of main steam safety relief valves (SRVs). Mr. Thomas Saporito requested in his petition that the NRC: (1) issue a confirmatory order requiring the Licensee to immediately bring the reactor in question to a cold shutdown mode of operation; (2) issue a civil penalty against the Licensee; (3) remove the Licensee’s employees responsible for this matter from NRC-licensed activities for a period of no less than 5 years; and (4) perform an immediate NRC investigation and inspection of the VY nuclear facility to ensure that
all nuclear safety-related systems are properly operational in accordance with the Licensee’s Technical Specifications (TS) and NRC license.

B The final Director’s Decision on this petition was issued on September 9, 2011. The petition cited problems related to inoperability of main steam SRVs due to leakage through the shaft to piston thread seals. Due to the redundancy in Automatic Depressurization System (ADS) design, the availability of the high-pressure core injection system, and the availability of a safety-class backup nitrogen supply, the ability to depressurize the reactor was maintained, and there was no potential adverse impact to public health and safety. Therefore, no reports were required pursuant to 10 C.F.R. § 50.72. On December 22, 2010, under the LER timely reporting requirements of 10 C.F.R. § 50.73(a)(24)(ii)(B), Entergy submitted LER 05000271/2010-002-00&01: Inoperability of Main Steam Safety Relief Valves Due To Degraded Thread Seals within 60 days after the discovery of the event that was determined to be reportable, on October 25, 2010. The NRC resident inspectors reviewed LER 05000271/2010-002-00&01 and documented their inspection results in the NRC Integrated Inspection Report 05000271/2011002 dated April 29, 2011 (ADAMS Accession No. ML111190386), which also included the LER closeout review and two licensee-identified violations related to the discovery of the SRV issue.

C The NRC has decided to deny Petitioner’s request to bring VY to a cold shutdown mode of operation and to perform an immediate NRC investigation and inspection of VY, but has granted the petition, in part, concerning the inoperability of main steam SRVs. The NRC Integrated Inspection Report 05000271/2011002 dated April 29, 2011, documented an LER closeout review and two licensee-identified violations related to the discovery of the SRV issue. Petitioner’s concern regarding the inoperability of SRVs at VY has been adequately resolved such that no further action is needed.

DD-11-7 ENTERGY NUCLEAR OPERATIONS, INC. (Vermont Yankee Nuclear Power Station), Docket No. 50-271 (License No. DPR-28); ENTERGY OPERATIONS, INC. (River Bend Station, Unit 1), Docket No. 50-458 (License No. NPF-47); REQUEST FOR ACTION; November 8, 2011; FINAL DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206

A By electronic mail dated August 22, 2009, and supplemented on December 22 and 28, 2009, Mr. Sherwood Martinelli, the Petitioner, submitted a 10 C.F.R. § 2.206 petition related to projected shortfalls in decommissioning trust funds for nuclear power plants operated by Entergy. The Petitioner requested that the NRC take enforcement actions by suspending the operating license of any Entergy plant with a projected shortfall in decommissioning trust funds due to the economic downturn of late 2008, a number of other actions including the imposition of daily fines and the immediate suspension of all Entergy licensing actions before the Commission.

B Under 10 C.F.R. § 50.75(f)(1) and (2), the NRC requires power reactor licensees to report decommissioning funding assurance information to the agency at least once every 2 years. As a result, all nuclear power plant owners were required to submit their decommissioning funding assurance information to the NRC based on financial data as of December 31, 2008. Due to the economic downturn of late 2008, a number of licensees reported projected shortfalls. This included five reactor sites operated by Entergy. The NRC Staff performed an independent analysis of each of these reports, and required Entergy to provide a written plan of action to indicate how they will meet their minimum funding assurance level. Based on a case-by-case review of each response, the Staff concluded that all Entergy facilities have provided reasonable assurance that sufficient funding for radiological decommissioning of their respective facilities will be available at the time of permanent termination of operation.

C In DD-11-7, the Office of Nuclear Reactor Regulation denied the Petitioner’s request to suspend the operating licenses of the Entergy facilities that had projected shortfalls in their decommissioning trust funds. The NRC also denied the Petitioner’s request that the NRC take additional actions including ordering immediate actions by Entergy to redress the projected shortfalls, imposing daily fines until the Licensee deposits adequate funds to make the decommissioning funds fully whole, and suspend all Entergy licensing actions before the Commission. The NRC granted the Petitioner’s request that the agency make available to the Petitioner all data and information presented by Entergy and used by the NRC Staff to decide whether facilities owned and licensed by Entergy have adequate decommissioning funds as required by the regulations. All information supplied by Entergy and used by the Staff is publicly available in ADAMS. In addition, the Staff responded to the Petitioner’s FOIA request (FOIA 2010-0090) that asked for the same information.
DIGESTS  
ISSUANCES OF DIRECTORS’ DECISIONS

Docket Nos. 50-338, 50-339 (License Nos. NPF-4, NPF-7); REQUEST FOR ACTION; April 26, 2012; DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206  
A  
By letter dated September 8, 2011, and supplements, Thomas Saporito (the Petitioner) filed a 10 C.F.R. 2.206 petition. The Petitioner requested that the NRC take the following actions: (1) take escalated enforcement action against Virginia Electric and Power Company (the Licensee) and suspend, or revoke, the operating licenses for North Anna Power Station, Units 1 and 2 (North Anna 1 and 2), (2) issue a notice of violation against the Licensee with a proposed civil penalty in the amount of 1 million dollars, and (3) issue an order to the Licensee requiring the Licensee to keep North Anna 1 and 2, in a “cold shutdown” mode of operation until such time as a series of actions described in the petition are completed.  
B  
The final Director’s Decision (DD) on this petition was issued on April 26, 2012. The final DD addresses the Petitioner’s requested actions as follows: (1) With respect to the first two requests, the evaluations of two NRC inspection teams as documented in inspection reports dated October 31, 2011, and November 30, 2011, did not find any violation of NRC regulations that would merit such enforcement actions. (2) With respect to the Petitioner’s third request, the NRC Staff concluded that it has partially granted that request in that the NRC issued CAL No. 2-2011-001, dated September 30, 2011, which documented that North Anna 1 and 2 could not be restarted unless and until the Licensee had demonstrated to the NRC Staff’s satisfaction that “no functional damage has occurred to those features necessary for continued operation without undue risk to the health and safety of the public,” consistent with the requirements of 10 C.F.R. Part 100, Appendix A, § V(a)(2).  
C  
Issues in the petition, identified and discussed in the Director’s Decision as concerns 1, 2, 3, 5, 6, 7, and 8, were discussed and substantially addressed, either in the inspection reports issued October 31, 2011, and November 30, 2011, or in the NRC technical evaluation dated November 11, 2011. The activities by the NRC Staff were completed before restart to ensure that, before resuming operations, the Licensee had demonstrated no functional damage had occurred to those features at North Anna 1 and 2, necessary for continued operation without undue risk to the health and safety of the public. In that respect, these concerns described in the petition as requiring completion before the restart of North Anna 1 and 2 were addressed before restart, consistent with the request for enforcement action described in the petition. Issues in the petition, identified and discussed in the Director’s Decision as concerns 4 and 9, were evaluated by the NRC Staff before restart of North Anna 1 and 2, but disposition of these concerns by the NRC Staff differs from the course of action requested in the petition. In that respect, these aspects of the petition were denied.  

DD-12-2  
VIRGINIA ELECTRIC AND POWER COMPANY (North Anna Power Station, Units 1 and 2), Docket Nos. 50-338, 50-339 (License Nos. NPF-4, NPF-7); REQUEST FOR ACTION; October 19, 2012; PARTIAL DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206  
A  
By letter dated October 20, 2011, and supplements, Paul Gunter et al. (the Petitioners) filed a 10 C.F.R. § 2.206 petition. The Petitioners requested that the NRC suspend the operating licenses of North Anna Power Station, Units 1 and 2, until the completion of a set of activities described in the petition are completed.  
B  
A final Partial Director’s Decision (DD) on this petition was issued on October 19, 2012. The final Partial DD addresses the Petitioners’ requested action as follows: With respect to the Petitioners’ request, the NRC Staff concluded that it has partially granted that request in that the NRC issued CAL No. 2-2011-001 dated September 30, 2011, which documented that North Anna 1 and 2 could not be restarted unless and until the Licensee had demonstrated to the NRC Staff’s satisfaction that “no functional damage has occurred to those features necessary for continued operation without undue risk to the health and safety of the public,” consistent with the requirements of 10 C.F.R. Part 100, Appendix A, § V(a)(2).  
C  
Issues in the petition, identified and discussed in the Partial Director’s Decision as Concerns 1, 2, 3, 4, and 5, were discussed and substantially addressed, either in the inspection reports issued October 31, 2011, and November 30, 2011, or in the NRC technical evaluation dated November 11, 2011. The activities by the NRC Staff were completed before restart to ensure that, before resuming operations, the Licensee had demonstrated no functional damage had occurred to those features at North Anna 1 and 2 necessary for continued operation without undue risk to the health and safety of the public. In that respect, these concerns described in the petition as requiring completion before the restart of North Anna 1 and 2 were addressed before restart, consistent with the request for enforcement action described in the petition.  
D  
The issue in the petition, identified and discussed in the Partial Director’s Decision as Concern 6, was evaluated by the NRC Staff before restart of North Anna 1 and 2, but disposition of this concern by
the NRC Staff differs from the course of action requested in the petition. In that respect, this aspect of the petition was denied.

E  Six of the issues in the petition, identified and discussed in the Partial Director’s Decision as Concerns 7, 8, 9, 10, 11, and 12, were accepted for review by the NRC Staff and were initially identified as concerns that may take longer than the target time frame for reaching a decision on a petition based on the fact that these concerns were undergoing NRC review as part of the agency’s response to the Fukushima event in Japan. After reviewing the NRC’s progress in responding to the Fukushima event since acceptance of the petition for review, the NRC Staff has determined that Concerns 10 and 12 have been addressed by NRC activities which responded to the Fukushima event. Concerns 7, 8, 9, and 11 are still identified as concerns that will take longer than the target time frame for reaching a decision. The NRC Staff commits to providing periodic status updates to the Petitioners on the resolution of these concerns. Concerns 7, 8, 9, and 11 were not fully addressed in the Partial DD. Therefore, this DD was partial.

DD-12-3 ENTERGY NUCLEAR OPERATIONS, INC., ENTERGY NUCLEAR INDIAN POINT 2, LLC, and ENTERGY NUCLEAR INDIAN POINT 3, LLC (Indian Point, Units 1, 2, and 3), Docket Nos. 50-003, 50-247, 50-286 (License Nos. DPR-5, DPR-26, DPR-64); REQUEST FOR ACTION; October 24, 2012; DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206

A  By e-mail dated March 28, 2011, the Attorney General of the State of New York submitted a 10 C.F.R. § 2.206 petition. The Petitioner asked the NRC to take immediate action and issue an Order requiring the following actions regarding Indian Point Nuclear Generating Units No. 1, 2, and 3:

- Compel Entergy Nuclear Operations, Inc. (Entergy), and its affiliates to comply on or before September 20, 2011, with the requirements of paragraphs F and G for all fire zones at Indian Point Units 2 and 3, and any Indian Point Unit 1 fire zone or system, structure, or component that Indian Point Units 2 and 3 rely upon.

- Convene an evidentiary hearing before the Commission to adjudicate the violations at Indian Point by Entergy and its affiliates of paragraphs F and G of 10 C.F.R. Part 50, § III of Appendix R.

B  A final Director’s Decision was issued on October 24, 2012.

C  With respect to the Petitioner’s request, the NRC Staff concluded that there were no violations of the Commission’s fire protection regulations on March 28, 2011. However, through subsequent inspections, NRC inspectors identified violations and the Licensee agreed to take appropriate actions to be in full compliance by spring 2014. Therefore, the NRC granted the Petitioner’s request to identify violations of fire protection regulations and to take appropriate enforcement actions.

D  The NRC Staff denied the Petitioner’s request to compel full compliance with all fire protection requirements by September 20, 2011. However, subsequent violations were identified and the Licensee has provided its plans and schedules for resolution. Therefore, the NRC granted the Petitioner’s request that the Licensee be brought into full compliance with the Commission’s fire protection regulations. This is planned to be accomplished by spring 2014.

E  The NRC Staff denied the Petitioner’s request for an evidentiary hearing before the Commission.

DD-13-1 ENTERGY NUCLEAR OPERATIONS, INC., and ENTERGY NUCLEAR INDIAN POINT 2, LLC (Indian Point, Unit 2), Docket No. 50-247 (License No. DPR-26); REQUEST FOR ACTION; June 7, 2013; DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206

A  By electronic transmission dated April 16, 2012 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML12108A052), Dr. C. Jordan Weaver of the Natural Resources Defense Council, Inc. (NRDC), the Petitioner, submitted a petition under Title 10 of the Code of Federal Regulations (10 C.F.R.), section 2.206, “Requests for Action Under This Subpart,” to Mr. R. W. Borchardt, Executive Director for Operations, U.S. Nuclear Regulatory Commission (NRC or Commission). The Petitioner requested that the NRC take enforcement action by ordering Entergy Nuclear Operations, Inc. (Entergy), the licensee for Indian Point Nuclear Generating Unit No. 2 (Indian Point 2), to remove the passive autocatalytic recombiners (PARs) from the Indian Point 2 containment. The Petitioner subsequently supplemented the petition by requesting that the PARs be replaced with electrically powered thermal hydrogen recombiners.
In the petition, the Petitioner requested that the NRC order the licensee to remove the PARs from the Indian Point 2 containment because the PAR system could have unintended ignitions in the event of a severe reactor accident, which, in turn, could cause a hydrogen detonation (i.e., a combustion wave traveling at a supersonic speed, relative to the unburned gas). The Petitioner stated that experimental data demonstrate that Indian Point 2’s two PAR units could have at least one unintended ignition on their catalytic surfaces after a severe reactor accident.

In this Director’s Decision, the Deputy Director of the Office of Nuclear Reactor Regulation denied the Petitioner’s request. The NRC Staff has reviewed the petition and does not agree that the presence of PARs represents a sufficient risk to warrant their removal by order. Following a severe reactor accident, multiple ignition sources, besides PARs, would be present in containment to initiate combustion at lower flammability limits, which would be expected to keep hydrogen concentrations below detonable levels. Furthermore, the NRC Staff believes that the presence of PARs could prove beneficial in the event of an extended station blackout.

By letter dated July 19, 2010, as supplemented by letter dated August 6, 2010, Pilgrim Watch (the Petitioner) filed a 10 C.F.R. § 2.206 petition. The Petitioner requested that the NRC take the following actions: (1) issue a Demand for Information (DFI) requiring Entergy Nuclear Operations, Inc. (Entergy or the Licensee) to demonstrate that all non-environmentally qualified inaccessible cables at Pilgrim Nuclear Power Station (Pilgrim) are capable of performing their required function; (2) certify that the location, age, and repair history of all cables (accessible and inaccessible) have been identified; (3) ensure that the Licensee monitors all cables before continued operation to demonstrate that the cables can perform their design functions; (4) ensure that the Licensee incorporates in its monitoring program, at a minimum, recommendations from certain aging management guidelines and NRC generic guidance; (5) verify, during the license renewal period, Entergy’s implementation through routine baseline inspections; and (6) commit to a timely upgrade of the regulatory guidance for maintaining cable qualification and the verification that the cables can perform their design functions.

The final Director’s Decision (DD) on this petition was issued on September 26, 2013. The final DD responds to the Petitioner’s requested actions as follows: (1) denied the Petitioner’s request to issue a DFI and to take certain non-enforcement actions (items 2-4) to demonstrate that accessible and inaccessible cables can perform their design functions, (5) considered the requested action as addressed by the completion of NRC’s baseline inspection of license renewal activities in which the NRC determined that the Licensee’s commitment associated with the non-EQ inaccessible cables program was adequately implemented and inspected with no findings of significance identified, and (6) considered the requested action as addressed by the issuance of NRC Regulatory Guide 1.218.

Regarding the Petitioner’s request to issue a DFI and to take certain non-enforcement actions to demonstrate that accessible cables can perform their design functions, the NRC Staff concluded that the Licensee’s programs for cable condition monitoring and managing aging effects of inaccessible power cables have been adequately implemented, to the extent that there is reasonable assurance that cables subject to moisture will be adequately managed during the period of extended operation. The NRC did not identify any violations of regulatory requirements during its review. Accordingly, NRC denied the Petitioner’s requests as stated above.

By letter dated July 10, 2012, Mr. David Lochbaum, on behalf of the Union of Concerned Scientists; the North Carolina Waste Awareness & Reduction Network; and the Nuclear Information and Resource Service (the Petitioners) filed a petition (Agencywide Documents Access and Management System (ADAMS) Accession No. ML12193A123) under Title 10 of the Code of Federal Regulations (10 C.F.R.), Part 2, section 2.206, “Requests for action under this subpart.” The Petitioners requested that the U.S. Nuclear Regulatory Commission (NRC, or the Commission) take enforcement action in the form of an order either modifying the Brunswick Steam Electric Plant operating licenses or requiring the licensee to submit amendment requests for these licenses. Specifically, the Petitioners requested that the order result in specified revisions of these technical specifications (TSs) for Brunswick Units 1 and 2:
DIGESTS

ISSUANCES OF DIRECTORS’ DECISIONS

(1) Revise TS 2.1, “Safety Limits (SL),” to include a requirement like the one in TS 2.1.1.3 that the water level shall be greater than the top of active irradiated fuel in the spent fuel pool (SFP).

(2) Revise footnote (b) for TS Table 3.3.6.2-1, “Secondary Containment Isolation Instrumentation,” to require the Reactor Building Exhaust Radiation—High function to be applicable whenever irradiated fuel is stored in the SFP.

(3) Revise footnote (a) for TS Table 3.3.7.1-1, “Control Room Emergency Ventilation (CREV) System Instrumentation,” to require the Control Building Air Intake Radiation—High function to be applicable whenever irradiated fuel is stored in the SFP.

(4)-(8) Revise the APPLICABILITY for these TSs to include whenever irradiated fuel is stored in the SFP:

- TS 3.6.4.1, “Secondary Containment,”
- TS 3.6.4.2, “Secondary Containment Isolation Dampers,”
- TS 3.6.4.3, “Standby Gas Treatment System,”
- TS 3.7.3, “Control Room Emergency Ventilation (CREV) System,”
- TS 3.7.4, “Control Room Air Conditioning (AC) System.”

(9)-(12) Revise the APPLICABILITY for the following TSs to be whenever irradiated fuel is stored in the SFP instead of only when irradiated fuel assemblies are being moved in the SFP or secondary containment:

- TS 3.8.5, “DC [direct current] Sources — Shutdown,”
- TS 3.8.8, “Distribution Systems — Shutdown.”

(13) Revise TS 3.9.7, “Residual Heat Removal (RHR) — High Water Level,” and TS 3.9.8, “Residual Heat Removal (RHR) — Low Water Level,” or add a new limiting condition for operation (LCO) to require one RHR subsystem to be operable whenever the entire reactor core is offloaded into the SFP.

B In Director’s Decision DD-13-3, dated December 30, 2013, the Deputy Director of the Office of Nuclear Reactor Regulation denied the Petitioner’s request. The NRC Staff evaluated the Petitioners’ requests against the requirements and guidance for modifying the operating license. The Staff’s conclusions are summarized below:

Requested Action 1 — Addition of an SFP Level Safety Limit: The NRC Staff found the proposed safety limit is not appropriate and would be redundant to TSs already in place.

Requested Actions 2 through 12 — Modify the applicability of each LCO to apply whenever irradiated fuel is stored in the SFP rather than during movement of irradiated fuel: The NRC Staff determined that the systems and functions described in the Petitioners’ Requested Actions 2 through 12 would not need to have conditions or limitations established in the TSs when all irradiated fuel is seated in the SFP storage racks or in the reactor vessel.

Requested Action 13 — The Petitioners requested that the NRC revise TS 3.9.7, “Residual Heat Removal (RHR) — High Water Level,” and TS 3.9.8, “Residual Heat Removal (RHR) — Low Water Level,” or add a new limiting condition for operation (LCO) to require one RHR subsystem to be operable whenever the entire reactor core is offloaded into the SFP: The NRC Staff found out that the requested Action 13 does not satisfy the TS policy and the requested action is denied.

DD-14-1 FLORIDA POWER & LIGHT COMPANY (St. Lucie Nuclear Power Plant, Units 1 and 2), Docket Nos. 50-335, 50-389 (License Nos. DPR-67, NPF-16); (Turkey Point Nuclear Generating Plant, Units 3 and 4), Docket Nos. 50-250, 50-251 (License Nos. DPR-31, DPR-41); REQUEST FOR ACTION; January 14, 2014; FINAL DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206

A On April 23, 2012, Mr. Thomas King (the Petitioner) e-mailed (Agencywide Documents Access and Management System (ADAMS) Accession No. ML13295A021) the U.S. Nuclear Regulatory Commission (NRC, or the Commission). The Petitioner requested that the NRC take enforcement action against the St. Lucie Plant, Units 1 and 2, and the Turkey Point Nuclear Generating Plant, Units 3 and 4 (St. Lucie and Turkey Point plants). Florida Power & Light Company is the Licensee for these plants. The NRC Staff treated the request for enforcement action as a petition according to Title 10 of the Code of Federal Regulations (10 C.F.R.), section 2.206, “Requests for Action Under This Subpart.”

B The Petitioner requested that the NRC take immediate enforcement action in the form of shutting down or prohibiting the restart of the St. Lucie and Turkey Point plants until a criminal investigation of
DIGESTS
ISSUANCES OF DIRECTORS' DECISIONS

the AMES Group, LLC (AMES, a contractor that performed work for the Licensee at the St. Lucie and Turkey Point plants) is complete and everything has been verified safe. As the basis for the request, the Petitioner stated the Licensee was in violation of its policies and procedures on contractor trustworthiness and that work on safety-related equipment may have been done by unqualified contractor employees. The Petitioner specifically requested that the NRC prevent the St. Lucie and Turkey Point plants from starting up until the Licensee’s contractor is cleared, all documents and work performed on safety-related equipment at both plants is independently verified, and all critical work and motor-operated valve testing is redone.

C In this Director’s Decision, the Director of the Office of Nuclear Reactor Regulation denied the Petitioner’s request. The NRC did not substantiate the Petitioner’s concern that AMES had sought to misrepresent the capabilities of its technicians to NRC-licensed facilities. As discussed in the letter to the Licensee dated May 23, 2013 (ADAMS Accession No. ML13205A243), based on the evidence obtained, the NRC did not substantiate that the contractor willfully submitted falsified training and qualification documents for any AMES employee for consideration by the Licensee. Therefore, the NRC found no basis for expanding its current level of regulatory oversight or otherwise taking enforcement action against the Licensee based on the Petitioner’s concerns.

DD-14-2 ALL OPERATING REACTOR LICENSEES; REQUEST FOR ACTION; May 6, 2014 (Revised June 17, 2014); REVISED DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206

A On July 27, 2011, Mr. Geoff Fettus, Senior Project Attorney for the Natural Resources Defense Council (NRDC), submitted a petition under Title 10, “Energy,” of the Code of Federal Regulations (10 C.F.R.) section 2.206, “Requests for Action Under This Subpart,” to Annette Vietti-Cook, Secretary of the U.S. Nuclear Regulatory Commission (NRC) (Agencywide Documents Access and Management System (ADAMS) Accession No. ML11216A085). Mr. Fettus submitted the petition on behalf of the NRDC (the Petitioner). The petition was submitted in the form of twelve letters, which the NRC treated as one petition.

B The Petitioner requested that the NRC order licensees to comply with twelve specific recommendations in the NRC Near-Term Task Force (NTTF) Report, “Recommendations for Enhancing Reactor Safety in the 21st Century,” issued July 12, 2011 (ADAMS Accession No. ML111861807). The Petitioner cited the NTTF Report as the rationale for and basis of the petition.

C In Director’s Decision DD-14-2, issued May 6, 2014, the Deputy Director of the Office of Nuclear Reactor Regulation determined that the Petitioner’s requests were addressed through the issuance of orders, 10 C.F.R. 50.54(f) letters, rulemaking, and the Emergency Response Data System initiative.

D Subsequently, the NRC found two revisions necessary, and on June 17, 2014, issued a revised Director’s Decision DD-14-2 (ADAMS Accession No. ML14148A152). The NRC’s response to the Petitioner’s Request 7 is corrected to reference the final regulatory basis issued on October 1, 2013 (ADAMS Accession No. ML13101A344) instead of the draft regulatory basis as originally stated. The NRC’s response to the part of Request 8 stating that licensees should be required to “maintain ERDS [Emergency Response Data System] capability throughout the accident” is corrected to state that the request will be addressed by an advance notice of proposed rulemaking (ANPR).

DD-14-3 DUKE ENERGY FLORIDA, INC. (Crystal River Nuclear Generating Plant, Unit 3), Docket No. 50-302 (License No. DPR-72); REQUEST FOR ACTION; May 6, 2014; DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206

A The Petitioners requested that the U.S. Nuclear Regulatory Commission (NRC) engage enforcement action to prevent Crystal River, Unit 3 (CR-3) from restarting with regard to potential violations of NRC regulations for containment integrity. Specifically, the petition requested the following actions: (1) Physically remove the outer 25 centimeters (10 inches) of concrete surrounding the CR-3 containment building from the top of the containment building to the bottom of the containment building and encompassing 360 degrees around the entire containment building; (2) Test samples of the concrete removed from the CR-3 containment building for composition and compare the test results to a sample of concrete from a similarly designed facility like the Florida Power and Light Company, Turkey Point Nuclear Plant; (3) Keep the CR-3 in cold shutdown mode until such time as the licensee can demonstrate full compliance with its NRC operating license for CR-3 within the safety margins delineated in the Licensee’s final safety analysis report (FSAR) and within the CR-3 site-specific technical specifications; and (4) Provide the public with an opportunity to intervene at a public hearing before the NRC Atomic Safety and Licensing Board to challenge any certification made by the Licensee to the NRC that it has

B The final Director’s Decision on this petition was issued on May 6, 2014. The final Director’s Decision determined that the Petitioner obtained the requested actions without the NRC initiating an enforcement action. Since the submission of the petitions and supplement, CR-3 certified the permanent cessation of power operations and permanent removal of fuel from the reactor vessel. As such, the Petitioner’s request for the NRC to issue an order for CR-3 to remain in a shutdown mode is moot because the Licensee decided to retire the plant.

DD-14-4 SCIENCE APPLICATIONS INTERNATIONAL CORPORATION (SAIC) and CSMI, LLC, Docket No. 030-38594 (License No. 20-35022-01); REQUEST FOR ACTION; May 27, 2014; DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206

A By letter dated August 10, 2013, George E. Walther-Meade from Science Applications International Corporation (SAIC or the Petitioner) filed a petition (Agencywide Documents Access and Management System (ADAMS) Accession No. ML13226A020) pursuant to Title 10 of the Code of Federal Regulations (10 C.F.R.) § 2.206, “Requests for Action Under This Subpart”). The Petitioner requested that the U.S. Nuclear Regulatory Commission (NRC or the Commission) take immediate enforcement action by issuing an order to revoke CSMI, LLC (CSMI) License Number 20-35022-01. As the basis for the request, the Petitioner stated that CSMI (the Licensee) had committed a willful violation involving falsification of information. Such violations are of particular concern to the NRC because the NRC’s regulatory program is based on licensees acting with integrity and communicating with candor.

B In Director’s Decision DD-14-4, dated May 27, 2014, the Deputy Director of the Office of Federal and State Materials and Environmental Management Programs denied the Petitioner’s request. The NRC Staff evaluated the information provided by the Petitioner, obtained during the PRB public meeting, information gathered during an onsite inspection at CSMI, and comments received on the proposed Director’s Decision. Based on its review, the NRC Staff did not substantiate the Petitioner’s concern that CSMI committed a willful violation involving falsification of information. Additionally, the Staff did not identify any safety basis for revoking or suspending CSMI License Number 20-35022-01. However, the NRC addressed certain issues raised by the Petitioner in its comments on the Proposed Director’s Decision in a separate letter (ADAMS Accession No. ML14128A268) and process. As noted in that letter, as a result of its review of the additional information provided by the Petitioner, the Staff corrected CSMI’s license to authorize only the provision of routine maintenance services.

DD-14-5 EXELON GENERATION COMPANY, LLC (Braidwood Nuclear Power Station, Units 1 and 2; Byron Nuclear Power Station, Units 1 and 2), Docket Nos. STN 50-456, STN 50-457, STN 50-454, STN 50-455 (License Nos. NPF-72, NPF-77, NPF-77, NPF-66); REQUEST FOR ACTION; December 22, 2014; DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206

A By e-mail to Mr. R. W. Borchardt, dated April 20, 2012 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML 12130A318), Mr. Barry Quigley (the Petitioner) filed a petition under Title 10, “Energy,” of the Code of Federal Regulations (10 C.F.R.) § 2.206, “Requests for Action Under This Subpart”). The Petitioner requested that the U.S. Nuclear Regulatory Commission (NRC or the Commission) immediately shut down Braidwood Station, Units 1 and 2, and Byron Station, Units 1 and 2, until all turbine building (TB) high-energy line break (HELB) concerns were identified and those important to safety were corrected. The Petitioner raised several concerns related to potential consequences of TB HELBs to support his request for immediate shutdown of the Braidwood and Byron plants.

B In this Director’s Decision, the Director of the Office of Nuclear Reactor Regulation (the Director) denied the Petitioner’s request to immediately shut down the Braidwood and Byron Station units. The Director partially granted the petition in that the Petitioner’s concern related to the licensing basis requirements for HELB was addressed during the review of the license amendment request for the Braidwood and Byron Stations’ measurement uncertainty recapture (MUR) uprate. The results of that review are documented in the safety evaluation that was issued with the MUR uprate amendment on February 7, 2014 (ADAMS Accession No. ML13281A000).

C With regard to the three other concerns raised in the petition, the NRC Staff concluded that there were reasonable expectations of equipment operability for emergency diesel generator operability, high temperature in the engineered safety feature switchgear rooms, and structural limits on the block wall between the engineered safety feature switchgear rooms.

DIGESTS
ISSUANCES OF DIRECTORS’ DECISIONS

DD-15-1 ALL GENERAL ELECTRIC MARK I BOILING-WATER REACTOR OPERATING LICENSEES; REQUEST FOR ACTION; January 15, 2015; DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206
A On April 13, 2011, Mr. Paul Gunter, along with Mr. Kevin Kamps, of Beyond Nuclear (the Petitioner) requested that the NRC order the immediate suspension of the operating licenses of all General Electric (GE) boiling-water reactors (BWRs) that use the Mark I primary containment system. The Petitioner cited the Fukushima Dai-ichi accident in Japan as the rationale for and basis of the petition.
B On January 15, 2015, the NRC evaluated and provided final resolutions to each of the Petitioner’s requests.

DD-15-2 ENTERGY NUCLEAR OPERATIONS, INC. (James A. FitzPatrick Nuclear Power Plant), Docket No. 50-333 (License No. DPR-059); REQUEST FOR ACTION; October 17, 2014; DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206
A By electronic mail dated July 25, 2013, as supplemented on November 13, 2013, Mr. David Lochbaum filed a petition under section 2.206, “Request for Action Under This Subpart,” of Title 10 of the Code of Federal Regulations. Mr. Lochbaum filed the petition on behalf of Alliance for a Green Economy, Beyond Nuclear, Citizens Awareness Network, and the Union of Concerned Scientists (Agencywide Documents Access and Management System (ADAMS) Accession No. ML13217A061).
B The Petitioners requested that the U.S. Nuclear Regulatory Commission (NRC) take an enforcement action by imposing a regulatory requirement that all the condenser tubes be replaced at the James A. FitzPatrick Nuclear Power Plant (FitzPatrick) prior to the reactor restarting from its fall 2014 refueling outage.

C As a basis for their petition, the Petitioners asserted that FitzPatrick is experiencing abnormally high occurrences of condenser tube failures. To repair the leaks, Entergy Nuclear Operations Inc. routinely reduces power, makes the repairs needed, and returns to full power. The Petitioners assert that these power excursions constitute a risk to public health and safety. Operating experience indicates that condenser tube leaks have contaminated the reactor coolant water with impurities from the condenser cooling water and have caused extensive damage to nuclear power plant components.

D In this Director’s Decision, the Director of the Office of Nuclear Reactor Regulation (NRR) determined that the licensee’s evaluation of condenser tube failures was thorough, but its corrective actions were not effective in reducing the unplanned power changes. The Director of NRR also determined that the NRC’s evaluations of the Petitioners’ concerns, including consideration of tube leaks, unplanned power changes, and potential primary coolant contamination, did not constitute any violations that were more than minor. Thus, the violations did not warrant the requested enforcement action. The NRC will continue its normal regulatory oversight of FitzPatrick to ensure its safe operation. Consequently, the Petitioners’ request for the enforcement action was denied. Incidentally, the replacement of all condenser tubes was completed by the Licensee in the fall 2014 refueling outage.

DD-15-3 ENTERGY NUCLEAR OPERATIONS, INC. (Palisades Nuclear Plant), Docket No. 50-255 (License No. DPR-20); REQUEST FOR ACTION; April 6, 2015; DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206

DD-15-4 OMAHA PUBLIC POWER DISTRICT (Fort Calhoun Station, Unit 1), Docket No. 50-285 (Renewed License No. DPR-40); REQUEST FOR ACTION; June 3, 2015; DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206

DD-15-5 OMAHA PUBLIC POWER DISTRICT (Fort Calhoun Station, Unit 1), Docket No. 50-285 (Renewed License No. DPR-40); NEBRASKA PUBLIC POWER DISTRICT (Cooper Nuclear Station), Docket No. 50-298 (Renewed License No. DPR-46); REQUEST FOR ACTION; June 3, 2015; DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206

DD-15-6 ALL OPERATING REACTOR LICENSEES; REQUEST FOR ACTION; June 17, 2015; DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206

DD-15-7 SOUTHERN CALIFORNIA EDISON COMPANY (San Onofre Nuclear Generating Station, Units 2 and 3), Docket Nos. 50-361, 50-362 (License Nos. NPF-10, NPF-15); REQUEST FOR ACTION; October 2, 2015; REVISED DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206
A On June 18, 2012, the Petitioner filed a petition for intervention and hearing on behalf of Friends of the Earth, requesting the Nuclear Regulatory Commission (NRC) to order Southern California Edison (SCE) to submit a license amendment application for the design and installation of the San Onofre Nuclear Generating Station (SONGS), Units 2 and 3, replacement steam generators (SGs). As the basis for the petition request, the Petitioner stated that the Licensee violated Title 10 of the Code of Federal

196
Regulations (10 C.F.R.), section 50.59, “Changes, tests, and experiments,” when it replaced its SGs in 2010 and 2011 without first obtaining NRC approval of the design changes through a license amendment. In its November 8, 2012 Memorandum and Order, CLI-12-20, 76 NRC 437 (2012), on this matter, the Commission referred the portion of the petition that concerns the asserted 10 C.F.R. § 50.59 violation to the NRC’s Office of the Executive Director for Operations for consideration under 10 C.F.R. § 2.206, “Request for action under this subpart.” The Petitioner supplemented the petition by letters dated November 16, 2012, and February 6, 2013.

B The NRC Staff determined that the Petitioner requested the NRC to order SCE to submit a license amendment application for the design and installation of the SONGS, Units 2 and 3, replacement SGs. The Petitioner also requested an additional enforcement action that the NRC suspend SCE’s licenses until they are amended.

C On July 28, 2015, the NRC issued a final director’s decision (DD). The decision stated that, because the request for the NRC to order the Licensee to submit a license amendment application for the design and installation of the replacement SGs and to suspend SCE’s licenses until they are amended is moot, the Director of the Office of Nuclear Reactor Regulation (NRR) would not be instituting the proceeding Petitioner requested, either in whole, or in part.

D Subsequently, the NRC identified portions of the DD that required clarification regarding the scope of the petition and the decision. Accordingly, on October 2, 2015, the DD was revised to clarify that the scope of the petition referred to the NRC Staff in CLI-12-20 includes the underlying question of whether the Licensee violated 10 C.F.R. § 50.59 when it replaced the SGs at SONGS, Units 2 and 3, without first obtaining a license amendment. The decision also addresses the Staff’s resolution of this underlying question and the conclusion is updated to reflect the resolution of this underlying question. The revised DD also clarifies additional Staff activities associated with the SONGS SG event followup that support the Staff’s conclusion regarding whether the Licensee violated 10 C.F.R. § 50.59 by replacing the SGs without a license amendment.

E Notwithstanding the clarifications in the revised DD, the Director of NRR will not be instituting the requested proceeding.
DIGESTS

ISSUANCES OF DIRECTORS’ DECISIONS

financial condition is adequate and allows for the continued safe operation at Pilgrim. The NRC Staff also determined that ENO remains financially qualified to hold the operating authority under the Pilgrim license.

DD-15-9 VIRGINIA ELECTRIC AND POWER COMPANY (North Anna Power Station, Units 1 and 2), Docket Nos. 50-338, 50-339 (License Nos. NPF-4, NPF-7); REQUEST FOR ACTION; October 30, 2015; REVISED DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206

A By letter dated October 20, 2011, Paul Gunter, Kevin Kamps, Thomas Saporito, Paxus Calta, Alex Jack, Scott Price, and John Cruickshank (Petitioners) filed a petition under Title 10 of the Code of Federal Regulations (10 C.F.R.), section 2.206, “Requests for Action Under This Subpart.” The NRC Staff reviewed the petition and the Petitioners’ supplemental correspondences on November 2, 2011, and December 15, 2011. The Petitioners requested in the petition that the NRC suspend the operating licenses for the North Anna Power Station, Units 1 and 2 (North Anna 1 and 2), until the completion of a set of activities described in the petition. On March 16, 2012, the NRC Staff acknowledged receiving the petition and stated that, under 10 C.F.R. § 2.206, out of the sixteen concerns presented, twelve concerns were accepted for review, and that the NRC intended to use the results of the Fukushima review to inform its final decision on whether to implement the requested actions.

B The NRC Staff issued the partial director’s decision (DD) on October 19, 2012. As detailed in the partial DD, the NRC’s Office of Nuclear Reactor Regulation (NRR) decided to partially grant the Petitioners’ request. As also detailed in the partial DD, eight of the accepted twelve concerns were closed. The remaining four concerns accepted for review were identified as those that may take longer than the target time frame for reaching a decision on a petition based on the fact that they were undergoing NRC review as part of the agency’s response to the Fukushima event in Japan.

C On August 21, 2015, the NRC issued a final DD stating that the NRC had evaluated the Petitioner’s remaining four concerns, including comments received on the April 17, 2015 proposed DD. Based upon the progress in responding to the Fukushima event since acceptance of the petition for review, the NRC Staff determined that these four remaining concerns have been adequately addressed. Therefore, the NRC decided to close the remaining four concerns.

D Subsequently, the NRC identified portions of the final DD on the Petitioners’ concern regarding long-term storage of spent fuel in the spent fuel pool at North Anna 1 and 2 and at the North Anna ISFSI that required clarification. Accordingly, the DD’s response to that concern (Concern 8) has been revised to clarify the NRC’s resolution of the concern. In addition, the responses to the other three concerns addressed in the DD (Concerns 7, 9, and 11) have been updated to reflect developments that have occurred since the August 21, 2015 issuance of the Director’s Decision.

E None of the above-described revisions or updates change the conclusion in the Director’s Decision issued on August 21, 2015, that enforcement action is not warranted. Therefore, notwithstanding the clarifications in the revised DD, the Director of NRR will not be instituting the requested enforcement proceeding.

DD-15-10 FLORIDA POWER & LIGHT COMPANY (Turkey Point Nuclear Generating Plant, Units 3 and 4), Docket Nos. 50-250, 50-251 (License Nos. DPR-31, DPR-41); REQUEST FOR ACTION; September 23, 2015; FINAL DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206

A On July 18, 2014, as supplemented by e-mail and the transcripts from a teleconference on September 3, 2014 (Agencywide Documents Access and Management System (ADAMS) package Accession No. ML14202A521), Mr. Thomas Saporito (the Petitioner) of Saprodani Associates filed a petition under Title 10 of the Code of Federal Regulations (10 C.F.R.), section 2.206, “Requests for Action Under This Subpart.” The Petitioner requested that the U.S. Nuclear Regulatory Commission (NRC or the Commission) take enforcement action against Florida Power & Light Company (FPL, the Licensee) related to the Turkey Point Nuclear Generating Plant, Units 3 and 4 (Turkey Point).

B The Petitioner requested that the NRC suspend or revoke the licenses for Turkey Point, issue a violation with a civil penalty of $1 million, and issue a confirmatory order that the plant stays in a cold shutdown mode until the Licensee completes an independent assessment (via a contractor) to assess, fully understand, and correct the root cause of the rise in ultimate heat sink (UHS) temperature; a comprehensive evaluation of all nuclear safety-related equipment and components that may have been affected; and an independent evaluation of all nuclear safety-related equipment and components that may have been affected. As the basis for his request, the Petitioner stated that operation at an UHS temperature in excess of 100 degrees Fahrenheit would result in a loss of control of the reactors and an accident at the plant.
DIGESTS
ISSUANCES OF DIRECTORS’ DECISIONS

By letter dated January 30, 2015 (ADAMS Accession No. ML14349A597), the NRC accepted a portion of the petition for review in the 10 C.F.R. § 2.206 process and explained why the NRC did not accept the remaining portions of the petition for review under the 10 C.F.R. § 2.206 process. The portion of the petition that the NRC accepted for review under the 10 C.F.R. § 2.206 process was the Petitioner’s request that the NRC take enforcement action until the Licensee completes an independent root-cause assessment for the rise in UHS temperature. The letter also states that the NRC Staff would determine the resolution of the petition after the NRC regional staff completes its inspection of the Licensee’s root-cause assessment and associated corrective actions.

In Director’s Decision DD-15-10, the Director of the Office of Nuclear Reactor Regulation denied the Petitioner’s request. The NRC did not identify any inspection findings related to its review of the Licensee’s root-cause assessment for the UHS temperature. Therefore, the NRC did not have a basis for expanding its current level of regulatory oversight or for taking the Petitioner’s requested enforcement actions against the Licensee. The NRC did not find that the continued operation of the plants would adversely affect the health and safety of the public. Therefore, the NRC denied the Petitioner’s requested enforcement actions against the Licensee.

BOILING-WATER REACTOR OPERATING POWER REACTORS WITH MARK I AND MARK II CONTAINMENT DESIGNS; REQUEST FOR ACTION; November 2, 2015; DIRECTOR’S DECISION UNDER 10 C.F.R. § 2.206

The U.S. Nuclear Regulatory Commission (NRC) Staff has reviewed the petition dated July 29, 2011, filed under section 2.206, “Requests for action under this subpart,” of Title 10 of the Code of Federal Regulations (10 C.F.R.), by the Union of Concerned Scientists. The petition requested that the NRC issue a demand for information (DFI) to a number of boiling-water reactor (BWR) licensees with Mark I and Mark II containment designs regarding compliance of the facility design for spent fuel pool (SFP) heat removal with General Design Criterion (GDC) 44, “Cooling Water,” of Appendix A to 10 C.F.R. Part 50 and section 50.49, “Equipment Qualification,” of 10 C.F.R. Part 50. The NRC Staff does not believe that its response to this issue needs to involve issuance of a DFI.

The NRC Staff considers GDC 61, “Fuel Storage and Handling and Radioactivity Control,” applicable to the SFP heat removal function rather than GDC 44. Criterion 61 requires, in part, that the fuel storage system be designed to prevent significant reduction in coolant inventory under accident conditions and requires a residual heat removal capability having reliability and testability that reflects the importance to safety of decay heat and other residual heat removal. This criterion is appropriate for the SFP heat removal function because the SFP contains a very large inventory of coolant that mitigates the effect of any temporary loss of the SFP heat removal function, which provides time to take corrective action, and the heat that the cooling system is intended to remove from the SFP only rarely approaches the design heat removal rate even with maximum SFP heat load.

The NRC Staff has determined that the heat removal design of all SFPs provides adequate assurance of public health and safety. During the operating license review and subsequent operating license amendment reviews involving SFP cooling, the Staff accepted the SFP cooling system designs at all subject facilities because, in part, these designs provide a reliable decay heat removal capability that reflects the importance to safety of decay heat removal, which is consistent with the criteria in GDC 61.

Because the design criterion applicable to SFP cooling specifies reliability of the decay heat removal function consistent with its importance to safety, the Staff determined that the probability of damage to the SFP forced cooling system, the redundancy of components, and the time available for recovery of the cooling function are appropriate considerations in assessing the consequences of design-basis events. With those considerations, the NRC Staff found that the existing designs of the SFP forced cooling systems adequately protect against a sustained loss of the cooling function. Consequently, electrical equipment important to safety is not required to be qualified for the environmental effects of sustained SFP boiling under 10 C.F.R. § 50.49, because that state has not been included within the design bases of the subject facilities.

After the earthquake and tsunami at the Fukushima Dai-ichi Nuclear Power Plant in March 2011, the NRC Staff issued Order EA-12-049, on March 12, 2012 (ADAMS Accession No. ML12056A045), which imposed additional requirements to ensure that strategies to maintain or restore core cooling, containment, and SFP cooling are available for a range of external initiating events. Guidance for implementation of these capabilities includes measures to manage the environmental effects created by an SFP at saturation
conditions. While this NRC order required licensees to have enhanced mitigation strategies for beyond-design-basis external events, it is reasonable to assume that these mitigation capabilities would also be available for plant operators to use following design-basis events.

The NRC denies the petition because the NRC Staff has reasonable assurance that the design and operation of SFP cooling systems for BWRs with Mark I and Mark II containment designs satisfy the current design and licensing basis. The NRC Staff has found that existing structures, systems, or components related to the storage of irradiated fuel provide adequate protection for public health and safety. Information supporting this conclusion is readily available in the licensees’ safety analysis reports. However, this petition was considered in the development of the implementing guidance for strategies addressing beyond-design-basis events, and the guidance includes measures to manage environmental conditions that could result from SFPs at saturation conditions.

NRC administrative proceedings have applied a “preponderance of the evidence” standard in reaching the ultimate conclusions after hearing in resolving a proceeding; LBP-14-2, 79 NRC 149 n.78 (2014)
NRC has never adopted a “clear and convincing” standard as the evidentiary yardstick in its enforcement proceedings, nor is it required to do so under the Atomic Energy Act or the Administrative Procedure Act; LBP-14-2, 79 NRC 149 n.78 (2014)
“preponderance of the evidence” standard is the one generally applied in proceedings under the Administrative Procedure Act; LBP-14-2, 79 NRC 149 n.78 (2014)
Advanced Medical Systems, Inc. (One Factory Row, Geneva, Ohio 44041), CLI-94-6, 39 NRC 285, 306 n.31 (1994)
even if a witness’s testimony was entirely hearsay, evidence of that kind is generally admissible in administrative proceedings; LBP-11-14, 73 NRC 600 n.59 (2011)
in upholding summary disposition in a proceeding to enforce a suspension order, the Commission ruled that the hearsay nature of a witness’s statement did not preclude the licensing board from considering it, at least in the absence of evidence questioning its reliability; LBP-11-14, 73 NRC 600 n.59 (2011)
Advanced Medical Systems, Inc. (One Factory Row, Geneva, Ohio 44041), CLI-94-6, 39 NRC 285, 312-13 (1994), aff’d, 61 F.3d 903 (6th Cir. 1995)
in any enforcement action, especially one that has been settled to NRC’s satisfaction without creating a formal record, NRC’s choice of sanctions is quintessentially a matter of the Commission’s sound discretion; LBP-14-4, 79 NRC 335, 336 (2014)
Advanced Nuclear Fuels Corp. (Import of South African Enriched Uranium Hexafluoride), CLI-87-9, 26 NRC 109 (1987)
a discretionary hearing on an import/export license application was allowed where the Commission was concerned with legal interpretations of the Anti-Apartheid Act, and the hearing involved written submissions on this issue; CLI-11-3, 73 NRC 625 n.62 (2011)
nonlicensee with a purely economic interest has an automatic right to demand a hearing under section 2.202(a)(3) without showing standing or proffering an admissible contention; LBP-14-4, 79 NRC 342 (2014)
Afshar v. U.S. Department of State, 702 F.2d 1125, 1133 (D.C. Cir. 1983)
when an agency waives the deliberative process privilege for a document when it discloses the same document or one containing equivalent text, the question necessarily arises whether the NRC Staff has waived any deliberative process privilege that might otherwise apply; LBP-13-5, 77 NRC 244 (2013)
Airport Neighbors Alliance v. United States, 90 F.3d 426, 432 (10th Cir. 1996)
reasonable alternatives under NEPA do not include alternatives that are impractical, present unique problems, or cause extraordinary costs; LBP-15-3, 81 NRC 431 (2015)
Akiak Native Community v. U.S. Postal Service, 213 F.3d 1140, 1147 (9th Cir. 2000)
NEPA does not require that environmental assessments include a discussion of mitigation strategies; LBP-15-11, 81 NRC 431 (2015)
Alabama Power Co. (Joseph M. Farley Nuclear Plant, Units 1 and 2), CLI-81-27, 14 NRC 795, 797 (1981)
stay movant has the burden of persuasion on the four factors of 10 C.F.R. 2.1213(d); LBP-15-2, 81 NRC 53 (2015)
Alabama Power Co. v. Costle, 636 F.2d 323, 357 (D.C. Cir. 1979)
limited grounds for creation of exemptions are inherent in the administrative process, and agencies may use equitable discretion to afford case-by-case treatment, taking into account circumstances peculiar to individual parties in the application of a general rule or even in appropriate cases to grant dispensation from the rule’s operation; CLI-13-1, 77 NRC 9 n.33 (2015)
Alamance Industries, Inc. v. Filene’s, 291 F.2d 142, 146 (1st Cir. 1961) purpose of rule to dismiss proceedings on conditions is primarily to prevent voluntary dismissals that unfairly affect the other side, and to permit the imposition of curative conditions; LBP-15-28, 82 NRC 242 n.67 (2015)

Alaska Department of Transportation and Public Facilities, CLI-04-26, 60 NRC 399, 403 (2004) challenge to enforcement order was denied because petitioner sought to strengthen the order; LBP-14-4, 79 NRC 358 n.37 (2014)

Alaska Department of Transportation and Public Facilities, CLI-04-26, 60 NRC 399, 404 (2004), rev'g LBP-04-16, 60 NRC 99 (2004) if the remedy sought by petitioner is that the board should mandate that the enforcement order be strengthened, then petitioner lacks judicial standing because, given the limited scope of the proceeding, the board has no power to grant such relief; LBP-14-4, 79 NRC 358 (2014) only issue in an NRC enforcement proceeding is whether the order should be sustained, and boards are not to consider whether such orders need strengthening; LBP-12-14, 76 NRC 6 (2012); LBP-14-4, 79 NRC 358 (2014)

Alaska Department of Transportation and Public Facilities, CLI-04-26, 60 NRC 399, 405, reconsideration denied, CLI-04-38, 60 NRC 652 (2004) for an enforcement order, the threshold question, related to both standing and admissibility of contentions, is whether the hearing request is within the scope of the proceeding as outlined in the order; LBP-14-4, 79 NRC 358 (2014) in seeking rescission of an enforcement order, although petitioner said he was not seeking a harsher penalty, that is precisely what he wanted; CLI-13-2, 77 NRC 47 n.39 (2013) request to impose either different or additional enforcement measures is in contravention of NRC doctrine in enforcement actions; LBP-14-4, 79 NRC 359 n.38 (2014)

Alaska Department of Transportation and Public Facilities, CLI-04-26, 60 NRC 399, 406 (2004) concern that involves safety will not support standing in an enforcement proceeding if petitioner seeks merely a better settlement, i.e., one that promises greater improvements to safety than the settlement that was actually negotiated; LBP-14-4, 79 NRC 329 (2014) no one can challenge an enforcement order as long as the order, in any way, improves the safety situation over what it was in the absence of the order; LBP-14-4, 79 NRC 359 (2014) nonparty petitioners may not challenge a confirmatory order embodying a settlement if the order improves the safety situation over what it was in the absence of the order; LBP-14-4, 79 NRC 321 (2014)

Alaska Department of Transportation and Public Facilities, CLI-04-26, 60 NRC 399, 406 n.28, reconsideration denied, CLI-04-38, 60 NRC 652 (2004) it is unlikely that petitioners will often obtain hearings on confirmatory enforcement orders; LBP-14-4, 79 NRC 321, 329 (2014) NRC’s notice of opportunity for hearing on a confirmatory order provides the public a safety valve because conceivably the order might remove a restriction upon a licensee or otherwise have the effect of worsening the safety situation; LBP-14-4, 79 NRC 321 (2014) standing to challenge a confirmatory order exists only when a petitioner credibly alleges that a settlement somehow actually reduces safety; LBP-14-4, 79 NRC 329 (2014) third-party petitioners would have standing where the terms of a confirmatory order, as written, would harm the petitioner; CLI-13-2, 77 NRC 46 (2013)

Alaska Department of Transportation and Public Facilities, CLI-04-26, 60 NRC 399, 407 (2004) NRC’s choice of sanctions is a matter of the Commission’s sound discretion; LBP-14-4, 79 NRC 336 (2014)

Alaska Department of Transportation and Public Facilities, CLI-04-26, 60 NRC 399, 408, reconsideration denied, CLI-04-38, 60 NRC 652 (2004) petitioner is not adversely affected by a confirmatory order that improves the safety situation over what it was in the absence of the order; LBP-14-4, 79 NRC 359 (2014)
settlements may become illusory if licensees consent to confirmatory orders and are nonetheless subjected to formal proceedings, possibly leading to different or more severe enforcement actions; LBP-14-4, 79 NRC 333 (2014)
that the corrective measures outlined in a confirmatory order do not improve petitioner’s personal situation does not provide grounds to rescind the confirmatory order; CLI-13-2, 77 NRC 46 n.29 (2013)
too freely allowing third parties to contest enforcement settlements at hearings would undercut NRC’s policy favoring enforcement settlements; LBP-14-4, 79 NRC 333 (2014)
where an enforcement order imposes measures to enhance safety, no hearing will be granted to litigate additional measures the petitioner would like to see imposed; CLI-13-2, 77 NRC 45 (2013)
Alaska Department of Transportation and Public Facilities, CLI-04-26, 60 NRC 399, 408-09 (2004)
holding that “petitioner does not have standing is dispositive of this case and the board need not decide this issue” is dicta; LBP-14-4, 79 NRC 368 (2014)
to allow third parties to contest enforcement settlements at hearings would undercut NRC policy favoring enforcement settlements; LBP-14-4, 79 NRC 367 (2014)
section 2.309 criteria are applied when evaluating a third-party request for hearing on a confirmatory order; LBP-14-4, 79 NRC 327 n.40 (2014)
Alaska Survival v. Surface Transportation Board, 705 F.3d 1073, 1089 (9th Cir. 2013)
when an agency otherwise complies with NEPA’s requirement of a reasonably thorough mitigation analysis, there is no error in the agency’s reliance on the Clean Water Act section 404’s substantive requirements as mitigation measures even though the section 404 permit review is not yet complete; LBP-15-23, 82 NRC 63 (2015)
one cost that must be weighed by decisionmakers is the cost of uncertainty; LBP-15-3, 81 NRC 119-20 (2015)
alternatives analysis is the heart of the environmental impact statement; LBP-14-9, 80 NRC 43 (2014)
EPA’s determination that an environmental impact statement is unsatisfactory gives rise to a heightened obligation on the lead agency’s part to explain clearly and in detail its reasons for proceeding; LBP-14-9, 80 NRC 51 n.152 (2014)
claims of deliberative process privilege, even when properly established, are not absolute; LBP-13-5, 77 NRC 248 (2013)
deliberative process privilege is qualified, requiring the court to balance the interests of the parties for and against disclosures; LBP-13-5, 77 NRC 248 (2013)
deliberative process privilege may be defeated by a showing of evidentiary need by a plaintiff that outweighs the harm that disclosure of such information may cause to the defendant; LBP-13-5, 77 NRC 248 (2013)
Alfred J. Morabito (Senior Operator License for Beaver Valley Power Station, Unit 1), LBP-88-16, 27 NRC 583 (1988)
senior reactor operator licenses shall be effective as of the date issued and shall be subject to the usual terms and conditions; LBP-14-2, 79 NRC 139 (2014)
All Indian Pueblo Council v. United States, 975 F.2d 1437, 1444 (10th Cir. 1992)
agency need not analyze environmental consequences of alternatives it has in good faith rejected as too remote, speculative, or impractical or ineffective; LBP-13-9, 78 NRC 88 n.353 (2013)
All Operating Boiling Water Reactor Licensees with Mark I and Mark II Containments: Order Modifying Licenses with Regard to Reliable Hardened Containment Vents (Effective Immediately), CLI-13-2, 77 NRC 39, 44 n.20 (2013)
section 2.311 does not provide for the filing of replies; CLI-14-3, 79 NRC 34 (2014)
LEGAL CITATIONS INDEX

CASES

All Operating Boiling Water Reactor Licensees with Mark I and Mark II Containments: Order Modifying Licenses with Regard to Reliable Hardened Containment Vents (Effective Immediately), LBP-12-14, 76 NRC 1, 8 n.36 (2012)

record before the board falls far short of rebutting the presumption that 10 C.F.R. 2.206 is a meaningful avenue for seeking administrative relief; CLI-12-20, 76 NRC 439-30 n.11 (2012)

All Operating Boiling Water Reactor Licensees with Mark I and Mark II Containments: Order Modifying Licenses with Regard to Reliable Hardened Containment Vents (Effective Immediately), LBP-12-14, 76 NRC 1, 12 (2012)

meaningfulness of section 2.206 petitions is discussed; LBP-12-24, 76 NRC 539 (2012)

Alliance to Protect Nantucket Sound, Inc. v. U.S. Department of the Army, 398 F.3d 1235, 1240 (1st Cir. 2005)

NEPA does not require circulation of a draft environmental assessment in all cases; CLI-15-17, 82 NRC 41 n.53 (2015)

Allied-General Nuclear Services (Barnwell Nuclear Fuel Plant Separation Facility), ALAB-296, 2 NRC 671, 680 (1975)

NRC Staff is obliged to lay all relevant materials before the board to enable it to adequately dispose of the issues before it; LBP-14-2, 79 NRC 243 (2014)

if modification of the final environmental impact statement by NRC Staff testimony or the board’s decision is too substantial, recirculation of the FEIS would be required; LBP-13-13, 78 NRC 525 (2013)

Constitution permits the Supreme Court to decide legal questions only in the context of actual cases or controversies; CLI-13-9, 78 NRC 557 n.22 (2013)

future cases are appropriately decided in the context of a concrete dispute, with self-interested parties vigorously advocating opposing positions; CLI-13-9, 78 NRC 557-58 (2013)

AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-06-24, 64 NRC 111 (2006)

challenges to board rulings on late-filed contentions normally fall under NRC rules for interlocutory review; CLI-12-7, 73 NRC 385-86 n.17 (2012)

AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-06-24, 64 NRC 111, 117-18 (2006)

review of a license renewal application does not reopen issues relating to a plant’s current licensing basis; LBP-12-24, 76 NRC 538 n.5 (2012)

AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-06-24, 64 NRC 111, 118 (2006)

contention admissibility test in 10 C.F.R. 2.309(f)(1) is strict by design; LBP-11-6, 73 NRC 170-71 (2010); LBP-14-4, 79 NRC 374 n.70 (2014)

AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-06-24, 64 NRC 111, 119 (2006)

license applicant may take an appeal under section 2.311(d)(1) if it contends that, after considering all pending contentions, the board has erroneously granted a hearing to petitioner; CLI-14-3, 79 NRC 36 n.31 (2014)

AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-06-24, 64 NRC 111, 121 (2006)

boards are appropriate arbiters of fact-specific questions of contention admissibility, and the Commission will not second-guess their evaluation of factual support, absent an error of law or abuse of discretion; CLI-12-5, 75 NRC 326-27 (2012)

on appeal, Commission defers to board’s rulings on contention admissibility absent an error of law or abuse of discretion; CLI-11-8, 74 NRC 220 (2011); CLI-11-11, 74 NRC 431 (2011); CLI-15-22, 82 NRC 315 (2016); CLI-15-23, 82 NRC 324-25 (2015)

AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-06-24, 64 NRC 111, 123 n.71 (2006)

petitioners have an affirmative obligation to request confidential and proprietary information that has not been made publicly available, in order to support a proposed contention; LBP-11-9, 73 NRC 416 (2011)

AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-06-24, 64 NRC 111, 125 (2006)

under 10 C.F.R. 2.311, appeal of a ruling on contentions is allowed only if the order wholly denies an intervention petition or a party other than the petitioner alleges that a petition for leave to
intervene or a request for hearing should have been wholly denied; CLI-12-7, 75 NRC 385 n.16 (2012)

_AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-07-8, 65 NRC 124 (2007), aff’d, New Jersey Department of Environmental Protection v. NRC, 561 F.3d 132 (3d Cir. 2009)_

applicants should rely on the generic environmental impact statement for terrorism-related issues in a license renewal application; CLI-11-11, 74 NRC 455 (2011)

the Commission has determined that there is no relationship between NRC licensing actions and terrorism; LBP-12-21, 76 NRC 241 (2012)

_AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-07-8, 65 NRC 124, 128 (2007), aff’d, New Jersey Department of Environmental Protection v. NRC, 561 F.3d 132 (3d Cir. 2009)_

within the geographic boundary of the Ninth Circuit, NRC may not exclude NEPA terrorism contentions categorically; CLI-11-11, 74 NRC 456 (2011)

_NEPA does not require NRC to consider the environmental consequences of hypothetical terrorist attacks on NRC-licensed facilities; CLI-11-11, 74 NRC 456 (2011)_

NEPA imposes no legal duty on NRC to consider intentional malevolent acts in conjunction with commercial power reactor license renewal applications; LBP-11-2, 73 NRC 64 (2011); LBP-11-13, 73 NRC 571 (2011)

_AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-07-8, 65 NRC 124, 130 n.28 (2007), aff’d, New Jersey Department of Environmental Protection v. NRC, 561 F.3d 132 (3d Cir. 2009)_

NRC’s security program addresses not only current operations, but also extends into the license renewal term; CLI-11-11, 74 NRC 458 (2011)

_AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-07-8, 65 NRC 124, 131 (2007)_

NRC has analyzed terrorist acts in connection with license renewal and concluded that the core damage and radiological release from such acts would be no worse than the damage and release expected from internally initiated events; LBP-11-2, 73 NRC 64 (2011)

_AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-07-8, 65 NRC 124, 131-32 (2007), aff’d, New Jersey Department of Environmental Protection v. NRC, 561 F.3d 132 (3d Cir. 2009)_

as an alternative ground for excluding a NEPA terrorism contention, NRC Staff’s determination in the generic environmental impact statement that the environmental impacts of a terrorist attack were bounded by those impacts resulting from internally initiated events is sufficient to address the environmental impacts of terrorism; CLI-11-11, 74 NRC 456 (2011)

_AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-07-8, 65 NRC 124, 132-33 & n.38 (2007), aff’d, New Jersey Department of Environmental Protection v. NRC, 561 F.3d 132 (3d Cir. 2009)_

new claims cannot be raised for the first time on appeal; CLI-12-1, 75 NRC 59 (2012)

_AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-07-8, 65 NRC 124, 133-34 (2007)_

concerns that apply generically to all spent fuel pools at all reactors are more appropriately addressed via rulemaking or other appropriate generic activity; CLI-12-6, 79 NRC 450 n.32 (2014)

_AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-08-13, 67 NRC 396, 399 (2008)_

section 2.342(e) standards are applied to motion to stay issuance of a license; CLI-14-6, 79 NRC 449 n.30 (2014)

_AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-08-13, 67 NRC 396, 399-400 (2008)_

petitioner’s request that the Commission defer a decision on the license renewal applications pending disposition of its forthcoming rulemaking and other potential events is premature and is therefore denied; CLI-14-6, 79 NRC 450 n.32 (2014)

_AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-08-13, 67 NRC 396, 400 (2008)_

even if a party moving for a stay fails to show irreparable injury, a board may still grant a stay if movant has made an overwhelming showing or a demonstration of virtual certainty that it will prevail on the merits; LBP-15-2, 81 NRC 54, 58 (2015)

without a showing of irreparable injury, petitioners seeking a stay of effectiveness must demonstrate that reversal of the licensing board is a virtual certainty; CLI-12-11, 75 NRC 529 (2012)
AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-08-13, 67 NRC 396, 400, 401 (2008)

if motions for stay of effectiveness demonstrate neither irreparable injury nor that reversal of the licensing board is a virtual certainty, then the remaining factors need not be considered; CLI-12-11, 75 NRC 529 n.32 (2012)

AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-08-23, 68 NRC 461, 466 (2008)

license renewal applicants must conduct aging management reviews of any structure, system, or component that performs one of these intended functions if the SSC is passive (performs its intended function(s) without moving parts or without a change in configuration or properties) or long-lived (not subject to replacement based on a qualified life or specified time period); CLI-12-5, 75 NRC 303-04 (2012)

NRC Staff’s safety review pursuant to 10 C.F.R. Part 54 is principally guided by two documents, GALL and the SRP-LR; LBP-13-13, 78 NRC 290 (2013)

passive systems, structures, and components are subject to an aging management review only if they are long-lived, that is, not subject to replacement based on a qualified life or specified time period; LBP-13-13, 78 NRC 280 (2013)

AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-08-23, 68 NRC 461, 466-67 (2008)

existing regulatory programs can be expected to directly detect the effects of aging on active functions; CLI-12-5, 75 NRC 304 n.10 (2012)

if NRC concludes that an aging management program is consistent with the GALL Report, then it accepts applicant’s commitment to implement that AMP, finding the commitment itself to be an adequate demonstration of reasonable assurance under 10 C.F.R. 54.29(a); CLI-12-5, 75 NRC 304, 315 (2012)

AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-08-23, 68 NRC 461, 468 (2008)

for each plant-specific aging management program for which there is no corresponding program in the GALL Report, the application must briefly describe licensee’s operating experience in implementing that program; LBP-13-13, 78 NRC 283 (2013)

if applicant uses a method other that identified in NUREG-1801, Generic Aging Lessons Learned Report, for managing effects of aging at its plant, then applicant should demonstrate to NRC Staff reviewers that its program includes the 10 elements cited in the GALL Report and will likewise be effective; LBP-13-13, 78 NRC 283 (2013)

license renewal applicants’ use of an aging management program identified in the GALL Report constitutes reasonable assurance that it will manage the targeted aging effect during the renewal period; CLI-12-10, 75 NRC 497 n.93 (2012); LBP-13-13, 78 NRC 282-83, 386 (2013)

NRC Staff’s review is intended to verify that applicant has properly scoped the aging management review, that existing or planned aging management programs conform to the descriptions in the license renewal application, and that documentation supporting the application is auditable, retrievable, and supports the application; LBP-13-13, 78 NRC 290 (2013)

AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-08-23, 68 NRC 461, 476 (2008)

although NRC rules require that motions be addressed to the presiding officer when a proceeding is pending, suspension motions are best addressed to the Commission; CLI-11-5, 74 NRC 158 (2011)

Commission has inherent authority to supervise both NRC Staff’s work and adjudicatory proceedings relating to license applications; CLI-14-1, 79 NRC 2 (2014)

intervention petitioners may not challenge the adequacy of the safety evaluation report, but may file contentions challenging the combined license application based on new information in the SER; LBP-11-22, 74 NRC 273 n.72 (2011)

when a matter is not strictly adjudicatory in nature or otherwise does not fit cleanly within the procedures described in NRC rules of practice, the Commission undertakes a decision as an exercise of its inherent supervisory authority over agency proceedings; CLI-13-8, 78 NRC 224 (2013)

AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-08-23, 68 NRC 461, 484 (2008)

suspension of licensing proceedings is a drastic action that is not warranted absent immediate threats to public health and safety or other compelling reason; CLI-11-1, 73 NRC 4 (2011); CLI-11-5, 74 NRC 158 (2011); CLI-12-6, 75 NRC 373 (2012); CLI-15-19, 82 NRC 158 (2015)
LEGAL CITATIONS INDEX

CASES

AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-08-23, 68 NRC 461, 484 n.103 (2008)
  deliberative process privilege applied under 10 C.F.R. 2.390(a)(5) to interagency or intra-agency memorandums or letters is similar to Exemption 5 under the Freedom of Information Act; LBP-13-5, 77 NRC 238 (2013)

AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-08-23, 68 NRC 461, 484-85 (2008)
  Commission may consider the rulemaking request of a nonparty as an exercise of its inherent supervisory powers authority over agency proceedings; CLI-11-5, 74 NRC 174 n.132 (2011)
  Commission has occasionally considered requests to suspend proceedings or hold them in abeyance in the exercise of its inherent supervisory powers over proceedings; CLI-11-1, 73 NRC 3 n.5 (2011)
  petitions to suspend multiple license renewal proceedings in view of an Inspector General’s report on the agency’s license renewal process were considered pursuant to the Commission’s inherent supervisory authority over agency proceedings; CLI-11-5, 74 NRC 158 (2011)

AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-08-28, 68 NRC 658, 668 (2008)
  intervenors’ speculation that further review of certain issues might change some conclusions in the final safety evaluation report does not justify restarting the hearing process; LBP-11-20, 74 NRC 76 (2011); LBP-11-23, 74 NRC 295, 321 (2011); LBP-11-35, 74 NRC 718 (2011)

AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-08-28, 68 NRC 658, 668-69 (2008)
  because petitioner seeks both to reopen the record and to submit a late contention, it must successfully satisfy two elevated standards; CLI-11-2, 73 NRC 338 (2011)
  Commission practice holds that the standard for admitting a new contention after the record is closed is higher than for an ordinary late-filed contention; CLI-12-10, 75 NRC 483 (2012); CLI-12-15, 75 NRC 709 (2012); LBP-11-20, 74 NRC 77 n.75 (2011); LBP-11-35, 74 NRC 743 (2011)

AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-08-28, 68 NRC 658, 668-69 (2008)
  proponents of a motion to reopen bear a heavy burden; CLI-11-8, 74 NRC 221 (2011)

AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-08-28, 68 NRC 658, 670, 674 (2008)
  a mere showing that changes to the severe accident mitigation alternatives analysis results are possible or likely or probable is not enough to reopen a record; LBP-11-35, 74 NRC 729 (2011)

AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-08-28, 68 NRC 658, 672 (2008)
  a “significant” issue is not shown merely by showing that a plant component performs safety functions; CLI-12-10, 75 NRC 499 n.104 (2012)

AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-08-28, 68 NRC 658, 672-73 (2008)
  the ability of a totally unfunded group to provide testimony from experts is not taken into account in ruling on motions to reopen; LBP-11-20, 74 NRC 94 n.15 (2011)

AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-08-28, 68 NRC 658, 673 (2008)
  denial or conditioning of a license would obviously be a materially different result; CLI-12-14, 75 NRC 702 n.66 (2012)

AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-08-28, 68 NRC 658, 673-74 (2008)
  although the quality of evidence presented for reopening must be at least of a level sufficient to withstand a motion for summary disposition, more is required; CLI-12-10, 75 NRC 498 (2012)

AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-08-28, 68 NRC 658, 674 (2008)
  bare assertions and speculation do not supply the requisite support for a motion to reopen; CLI-11-2, 73 NRC 346 (2011)
  bare assertions and speculation, even by an expert, are insufficient to trigger a full adjudicatory proceeding; CLI-12-15, 75 NRC 714 (2012)
  bare assertions are insufficient to show an exceptionally grave issue for reopening the record; CLI-11-8, 74 NRC 226 n.48 (2011); LBP-11-23, 74 NRC 313 n.136, 321 (2011)
  NRC imposes a deliberately heavy burden on petitioners seeking to reopen a record; CLI-11-2, 73 NRC 338 (2011); LBP-11-20, 74 NRC 77-78 (2011); LBP-15-14, 81 NRC 594-95 (2015)
LEGAL CITATIONS INDEX

CASES

*AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station)*, CLI-08-28, 68 NRC 658, 674-75 (2008)

interpretation of regulations, like interpretation of a statute, begins with the language and structure of the provisions, and the entirety of each provision must be given effect; LBP-14-7, 79 NRC 473 (2014)

*AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station)*, CLI-08-28, 68 NRC 658, 675-76 (2008)

conclusory language is not sufficient to support an appeal; CLI-11-8, 74 NRC 225 (2011)

*AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station)*, CLI-08-28, 68 NRC 658, 677 (2008)

because it relates to NRC Staff’s position on the reviewability of the Board’s decision, Staff’s statement regarding its inclination not to revise the FSEIS is presented for the first time in Staff’s answer; CLI-11-14, 74 NRC 808 (2011)

filings not otherwise authorized by NRC rules are allowed only where necessity or fairness dictate; CLI-11-14, 74 NRC 807 (2011); CLI-14-3, 79 NRC 35 (2014)

parties could reasonably anticipate the argument that petitioners’ contention was moat simply based on the board’s request for an explanation of the significance of the request-for-additional-information response; LBP-15-28, 82 NRC 244 n.78 (2015)

replies may not contain new information that was not raised in either the petition or answers, but arguments that respond to the petition or answers are not precluded, whether they are offered in rebuttal or in support; CLI-11-14, 74 NRC 809 n.45 (2011)

*AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station)*, CLI-09-7, 69 NRC 235 (2009), petition for review denied sub nom. New Jersey Environmental Federation v. NRC, 645 F.3d 220 (3d Cir. 2011)

attempts by petitioners to challenge aspects of an aging management plan that they could have challenged earlier were rejected; LBP-15-1, 81 NRC 31 (2015)

challenges to board rulings on late-filed contentions normally fall under NRC rules for interlocutory review; CLI-12-7, 75 NRC 385-86 n.17 (2012)

*AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station)*, CLI-09-7, 69 NRC 235, 259 (2009)

grant of discretionary review must show that a board’s ruling was a departure from, or contrary to, established law; CLI-15-7, 81 NRC 496 (2015)

*AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station)*, CLI-09-7, 69 NRC 235, 259-61 (2009)

NRC rules deliberately place a heavy burden on proponents of contentions, who must challenge aspects of license applications with specificity, backed up with substantive technical support, mere conclusions or speculation being insufficient; CLI-11-5, 74 NRC 169 (2011)

*AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station)*, CLI-09-7, 69 NRC 235, 260 (2009)

although a board may view petitioner’s supporting information in a light favorable to the petitioner, petitioner (not the board) is required to supply all of the required elements for a valid intervention petition; LBP-11-16, 73 NRC 655 (2011); LBP-11-20, 74 NRC 78 (2011); LBP-11-29, 74 NRC 618 (2011); LBP-12-25, 76 NRC 545 (2012)

decisions on the admissibility of contentions will be affirmed where the Commission finds no error of law or abuse of discretion; CLI-12-3, 75 NRC 138 (2012); CLI-12-6, 75 NRC 361 (2012)

standard for review of contention admissibility determinations is the same, whether an appeal lies under section 2.311 or 2.341, and the Commission will disturb a licensing board’s contention admissibility ruling only if there has been an error of law or an abuse of discretion; CLI-12-7, 75 NRC 386 (2012)

*AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station)*, CLI-09-7, 69 NRC 235, 260, 275-77 (2009)

absent error of law or abuse of discretion, the Commission defers to licensing board rulings on contention admissibility; CLI-11-9, 74 NRC 237 (2011)

*AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station)*, CLI-09-7, 69 NRC 235, 260, 276 (2009)

intervenors must assert a sufficiently specific challenge that demonstrates that further inquiry is warranted; CLI-11-9, 74 NRC 247 (2011)
at the contention admissibility stage, the burden is on intervenors to demonstrate a deficiency in the application; CLI-11-9, 74 NRC 243-44 (2011)

because petitioner made no effort to demonstrate that its contention, despite its lateness, should be considered for admission pursuant to 10 C.F.R. 2.309(c)(1), it is rejected as inexcusably late; LBP-11-15, 73 NRC 637, 643 n.23 (2011)

intervenors carry the burden of showing that any late-filed contentions are admissible; LBP-15-16, 81 NRC 703 n.567 (2015)

petitions that proffer a nontimely contention without addressing the balancing factors in section 2.309(c) may be summarily rejected; LBP-12-7, 75 NRC 510, 512 n.13 (2012); LBP-12-9, 75 NRC 622 (2012)

good cause is the most important of the late-filing factors and is entitled to the most weight; LBP-12-7, 75 NRC 510 (2012); LBP-12-9, 75 NRC 621 (2012)

petitioner, having failed in its revised petition to challenge applicant’s reliance on the generic environmental impact statement, cannot raise that challenge for the first time in its reply; LBP-11-6, 73 NRC 235 (2010)

in context of a license renewal application, reasonable assurance is based on sound technical judgment of the particulars of a case and on compliance with NRC regulations; LBP-14-1, 79 NRC 52 (2014)

licensee must show with reasonable assurance that its proposed methodology for material control and accounting will not be inimical to the common defense and security and will not constitute an unreasonable risk to the health and safety of the public; CLI-15-9, 81 NRC 517 (2015)

reasonable assurance is not quantified as equivalent to a 95% (or any other percent) confidence level, but is based on sound technical judgment of the particulars of a case and on compliance with NRC regulations; LBP-13-13, 78 NRC 282 (2013)

“reasonable assurance” standard for aging management programs does not require a 95% confidence level of compliance; LBP-11-18, 74 NRC 37 n.46 (2011)

to meet the reasonable assurance standard, applicant must make a showing that meets the preponderance-of-the-evidence threshold of compliance with the applicable regulations; LBP-13-13, 78 NRC 282 (2013); LBP-14-1, 79 NRC 52 (2014)

the NRC Staff’s safety review for license renewal applications is guided by NUREG-1800, Standard Review Plan for Review of License Renewal Applications for Nuclear Power Plants, and NUREG-1801, Generic Aging Lessons Learned Report; LBP-13-13, 78 NRC 282 (2013)

petitioners have the burden of going forward, which requires them to provide factual allegations or expert testimony to show a potential deficiency in applicant’s aging management plan; LBP-15-5, 81 NRC 295 (2015)

moving party properly bears the burden of meeting the reopening standards and applicant retains the burden of proof on the question whether the license should be issued; CLI-15-19, 82 NRC 157 n.29 (2015)

current licensing basis issues cannot be challenged in license renewal proceedings; LBP-15-5, 81 NRC 291 (2015)
enforcement orders are outside the scope of license renewal proceedings; LBP-15-5, 81 NRC 292 (2015)

*AmerGen Energy Co., LLC* (Oyster Creek Nuclear Generating Station), CLI-09-7, 69 NRC 235, 271-72 (2009)

NRC’s expanding adjudicatory docket makes it critically important that parties comply with its pleading requirements and that boards enforce those requirements; CLI-11-2, 73 NRC 339 n.22 (2011)

there simply would be no end to NRC licensing proceedings if petitioners could ignore timeliness requirements and add new contentions at their convenience based on information that could have formed the basis for a timely contention at the outset of the proceeding; LBP-11-20, 74 NRC 85 n.109 (2011)

*AmerGen Energy Co., LLC* (Oyster Creek Nuclear Generating Station), CLI-09-7, 69 NRC 235, 272 n.209 (2009)

challenge to the adequacy of the acceptance criteria or any other component of the current licensing basis is not within the scope of a license renewal proceeding; LBP-12-24, 76 NRC 525 n.117 (2012)

enhancement of a program does not constitute new information sufficient to support a new contention; LBP-11-20, 74 NRC 87 (2011)

if applicant’s enhanced monitoring program, which was the topic of a late-filed contention, was insufficient, it must have been insufficient beforehand too; CLI-12-10, 75 NRC 493 n.70 (2012)

*AmerGen Energy Co., LLC* (Oyster Creek Nuclear Generating Station), CLI-09-7, 69 NRC 235, 274 (2009), *petition for review denied sub nom. New Jersey Environmental Federation v. NRC*, 645 F.3d 220 (3d Cir. 2011)

as a matter of law and logic, if applicant’s enhanced monitoring program is inadequate, then applicant’s unenhanced monitoring program was a fortiori inadequate, and intervenor had a regulatory obligation to challenge it in its original petition to intervene; LBP-11-20, 74 NRC 87 (2011); LBP-15-1, 81 NRC 32 (2015)

contention challenging an enhanced monitoring program adopted by applicant is inadmissible because intervenor did not challenge the original unenhanced monitoring program; LBP-11-20, 74 NRC 98 (2011)

*AmerGen Energy Co., LLC* (Oyster Creek Nuclear Generating Station), CLI-09-7, 69 NRC 235, 276-77 (2009)

party may not provide support for a contention in its reply; LBP-15-5, 81 NRC 289 (2015)

support for a contention must be provided when the contention is filed, not at some later date; LBP-15-5, 81 NRC 312, 313 (2015)

*AmerGen Energy Co., LLC* (Oyster Creek Nuclear Generating Station), CLI-09-7, 69 NRC 235, 276-77 (2009)

severe accident mitigation alternatives analysis issues can present difficult judgment calls at the contention admissibility stage, and the Commission is reluctant as a general matter to second-guess board rulings on contention admissibility; CLI-12-5, 75 NRC 323 (2012)

*AmerGen Energy Co., LLC* (Oyster Creek Nuclear Generating Station), CLI-09-7, 69 NRC 235, 277 n.240 (2009)

burden of setting forth a clear and coherent argument is on petitioner, and it should not be necessary to speculate about what a pleading is supposed to mean; CLI-11-2, 73 NRC 337 n.14 (2011)

Commission will not accept the filing of a vague, unpaticularized issue; CLI-11-2, 73 NRC 337 n.14 (2011)

*AmerGen Energy Co., LLC* (Oyster Creek Nuclear Generating Station), CLI-09-7, 69 NRC 235, 286-87 (2009)

a heavier burden applies to motions to reopen than to proponents of contentions in ongoing proceedings; CLI-11-5, 74 NRC 169 (2011)

*AmerGen Energy Co., LLC* (Oyster Creek Nuclear Generating Station), CLI-09-7, 69 NRC 235, 287 (2009) at the threshold contention admission stage, the burden of providing support for a contention is on petitioner and the added burden of satisfying the reopening requirements is a deliberately a heavy one; CLI-12-15, 75 NRC 714 (2012)
bare assertions and speculation do not supply the requisite support for a motion to reopen; CLI-11-2, 73 NRC 346 (2011)
bare assertions are insufficient to show an exceptionally grave issue for reopening the record; CLI-11-2, 73 NRC 315 n.136, 321 (2011)
burden of satisfying the reopening requirements is a heavy one, and it rests with the party moving to reopen; CLI-11-2, 73 NRC 346 (2011); CLI-12-3, 75 NRC 139 n.41 (2012); CLI-12-6, 75 NRC 367 (2012); CLI-12-21, 76 NRC 501 n.68 (2012); CLI-15-19, 82 NRC 155-56 (2015); LBP-11-20, 74 NRC 81, 84 n.108 (2011)
merely showing that changes to the severe accident mitigation alternatives analysis results are possible or likely or probable is not enough to reopen a record; LBP-11-35, 74 NRC 729 (2011)
motion to reopen will not be granted unless movant satisfies all three criteria listed in 10 C.F.R. 2.326(a) and the motion is accompanied by an affidavit that satisfies section 2.326(b); CLI-15-19, 82 NRC 156 (2015); LBP-11-20, 74 NRC 81, 84 n.108 (2011)
movant has the burden to present information in a manner that complies with section 2.326(b); LBP-12-10, 75 NRC 652 n.126 (2012)
NRC imposes a deliberately heavy burden on an intervenor who seeks to supplement the evidentiary record after it has been closed, even with respect to an existing contention; CLI-11-2, 73 NRC 338 (2011)
AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), LBP-06-11, 63 NRC 391, 396 n.3 (2006)
if a contention satisfies the timeliness requirement of 10 C.F.R. 2.309(t)(2)(iii), then, by definition, it is not subject to 10 C.F.R. 2.309(c) which specifically applies to nontimely filings; LBP-12-18, 76 NRC 138-39 (2012)
AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), LBP-06-11, 63 NRC 391, 399 (2006)
the GALL Report is a nonbinding guidance document which, in the case of revisions, does not have the force of the law; LBP-13-13, 78 NRC 283-84 (2013)
AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), LBP-06-16, 63 NRC 737, 742 (2006)
a contention of omission alleges that an application suffers from an improper omission, whereas a contention of adequacy raises a specific substantive challenge to how particular information or issues have been discussed in the application; LBP-11-6, 73 NRC 200 n.53 (2010)
AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), LBP-06-16, 63 NRC 737, 742 n.7 (2006)
it is possible for a contention to contain an omission component and an inadequacy component; LBP-11-6, 73 NRC 200 n.53 (2010)
AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), LBP-06-16, 63 NRC 737, 744 (2006)
the licensing board dismissed all pending contentions on mootness grounds due to new information, which ordinarily would terminate the proceeding, but the board permitted new contentions to be filed on the new information before terminating the proceeding; LBP-11-22, 74 NRC 285 (2011)
intervenors opposed renewal of the nuclear power plant license, and proposed new contentions for increased ultrasonic testing of sand bed epoxy coating integrity; LBP-15-1, 81 NRC 32 (2015)
AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), LBP-06-22, 64 NRC 229, 244 (2006)
petitioner need not prove its contentions at the admissibility stage because boards do not adjudicate disputed facts at that juncture; LBP-11-2, 73 NRC 45 (2011); LBP-11-16, 73 NRC 655 (2011); LBP-11-21, 74 NRC 125 (2011)
AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), LBP-06-22, 64 NRC 229, 246 (2006), aff’d, CLI-09-7, 69 NRC 235 (2009)
as a matter of law and logic if applicant’s enhanced program is inadequate, then applicant’s unenhanced program is a fortiori inadequate, and intervenor has a regulatory obligation to challenge
it in its original petition to intervene; LBP-11-9, 73 NRC 417 (2011); LBP-11-20, 74 NRC 87 (2011)
as a matter of policy, applicant’s decision to improve an existing program to promote health and safety or to boost public support and confidence ought not ordinarily be viewed as conferring petitioners with an automatic opportunity to advance a new contention; LBP-15-1, 81 NRC 32 (2015)
AmerGen Energy Co., LLC (Oyster Creek Nuclear Generating Station), CLI-09-7, 69 NRC 235, 260 (2009)
boards may view petitioner’s supporting information in a light favorable to the petitioner, but the petitioner (not the board) is required to supply all of the required elements for a valid intervention petition; LBP-13-8, 78 NRC 9 (2013)
AmerGen Energy Co. LLC (Oyster Creek Nuclear Generating Station), CLI-09-7, 69 NRC 235, 290-91 (2009)
because petitioner’s claim of likelihood of success on the merits is conclusory, with no attempt to show how they would be likely to prevail, the motion to reopen falls far short of meeting the requirements of section 2.326(a)(3); LBP-12-10, 75 NRC 661 (2012)
except upon a showing of substantial prejudice to the complaining party, it is always within the discretion of a court or an administrative agency to relax or modify its procedural rules adopted for the orderly transaction of business before it when in a given case the ends of justice require it; CLI-13-8, 78 NRC 232-233 n.68 (2013)
dealing compliance with another agency’s proposed policies before they have been finalized would subject administrative agencies to needless and repetitive litigation; LBP-15-15, 81 NRC 614 (2015)
precedence requires a licensing board to let EPA’s rulemaking run its course, allowing intelligent resolution of any remaining claims instead of piecemeal and repetitive litigation; LBP-15-15, 81 NRC 610 (2015)
proposed rules are not binding upon administrative agencies and are not ripe for review by NRC boards; LBP-15-15, 81 NRC 610 n.83 (2015)
where a nonmoving party declines to oppose a motion for summary disposition, the board shall accept as admitted the moving party’s prima facie showing of material facts, but boards cannot grant summary disposition unless movant discharges its burden of demonstrating that it is entitled to a decision as a matter of law; LBP-12-4, 75 NRC 219 (2012)
courts have relied on language accompanying proposed rulemakings to determine agency intent; LBP-15-15, 81 NRC 610 (2015)
Commission gives substantial deference to licensing board findings of fact, and will not overturn a board’s factual findings unless they are not even plausible in light of the record viewed in its entirety; CLI-15-9, 81 NRC 522 (2015)
at issue is not whether evidence unmistakably favors one side or the other, but whether there is sufficient evidence favoring the summary disposition opponent for a reasonable trier of fact to find in favor of that party; LBP-11-4, 73 NRC 100 (2011)
if evidence in favor of the summary disposition opponent is merely colorable or not significantly probative, summary disposition may be granted; LBP-11-4, 73 NRC 100 (2011)
only disputes over facts that might affect the outcome of a proceeding would preclude summary disposition; LBP-11-4, 73 NRC 100 (2011)
if reasonable minds could differ as to the import of the evidence, summary disposition is not appropriate; LBP-11-20, 74 NRC 103-04 n.72 (2011)
if the question is a close one, boards must, in considering summary disposition opponent’s submission, carefully ascertain whether any factual disputes asserted are genuine and relate to issues that would affect the outcome of the proceeding under relevant substantive law; LBP-11-4, 73 NRC 100 (2011)
summary disposition, like summary judgment, is an extreme remedy that should be granted with caution especially before the parties have been afforded an opportunity to marshal their evidence; LBP-11-7, 73 NRC 263 (2011)

with regard to the first criterion for summary disposition, the correct inquiry is whether there are material factual issues that properly can be resolved only by a finder of fact because they may reasonably be resolved in favor of either party; LBP-11-31, 74 NRC 648 (2011)

if reasonable minds could differ as to the import of the evidence, summary disposition is not appropriate; LBP-12-23, 76 NRC 478 (2012)

in deciding motions for summary disposition, all facts are to be construed in the light most favorable to the nonmoving party; LBP-11-31, 74 NRC 648 (2011)

licensing boards or presiding officers should not conduct a trial on affidavits; LBP-12-23, 76 NRC 478 (2012)

Andrew Siemaszko, CLI-06-16, 63 NRC 708, 714 n.3 (2006)

demands for a hearing by the subject of an enforcement order are automatic without regard to satisfying section 2.309; LBP-14-4, 79 NRC 326, 342 (2014)

Andrew Siemaszko, CLI-06-16, 63 NRC 708, 716 (2006)

discretionary intervention is allowed only if some other person has established standing but only in very extraordinary situations; LBP-14-4, 79 NRC 373 (2014)

Andrew Siemaszko, CLI-06-16, 63 NRC 708, 720-21 (2006)

boards must not redraft an inadmissible contention to cure deficiencies and thereby render it admissible; CLI-11-11, 74 NRC 437 (2011)

Andrew Siemaszko, CLI-06-16, 63 NRC 708, 724 (2006)

both the Commission and licensing boards have continued to treat third-party requests for a hearing on an enforcement order as traditional petitions for intervention under Subpart C; LBP-14-4, 79 NRC 327 (2014)

Andrew Siemaszko, LBP-09-11, 70 NRC 151 (2009)

if an enforcement order blacklists a worker by name, under 10 C.F.R. 2.202(a)(3) he has the right to demand a hearing even though he may be motivated by purely economic concerns; LBP-14-4, 79 NRC 347 (2014)

Animal Defense Council v. Hodel, 840 F.2d 1432, 1439 (9th Cir. 1988)

an environmental impact statement that contains an incomplete or misleading comparison of alternatives is deficient; LBP-11-21, 74 NRC 137 n.126 (2011)

Animal Defense Council v. Hodel, 840 F.2d 1432, 1439 (9th Cir. 1988)

inaccurate, incomplete, or misleading information in an environmental impact statement concerning the comparison of alternatives is sufficient to render the EIS unlawful and to compel its revision; LBP-12-17, 76 NRC 120 (2012)

the Equal Access to Justice Act does not apply to a proceeding that is not governed by the provisions of Administrative Procedure Act §554 even if the procedures governing the proceeding substantially conform to the procedures required for formal adjudication under the APA; LBP-11-8, 73 NRC 360 n.48 (2011)

the most natural reading of the Equal Access to Justice Act’s applicability to adjudications under Administrative Procedure Act § 554 is that those proceedings must be subject to or governed by § 554; LBP-11-8, 73 NRC 354-55 n.14 (2011)

agency’s discretionary choice to conduct a formal on-the-record hearing is irrelevant when determining whether the Equal Access to Justice Act applies to a particular proceeding; LBP-11-8, 73 NRC 360 (2011)

Equal Access to Justice Act renders the United States liable for attorney’s fees for which it would not otherwise be liable, and thus amounts to a partial waiver of sovereign immunity, and any such waiver must be strictly construed in favor of the United States; LBP-11-8, 73 NRC 357 n.28 (2011)
only in rare cases does legislative history overcome the strong presumption that the legislative purpose is expressed by the ordinary meaning of the statutory language; LBP-11-8, 73 NRC 357 n.31 (2011)

underlying purpose of the Equal Access to Justice Act is to eliminate financial disincentives for those who would defend against unjustified governmental action and thereby to deter the unreasonable exercise of government authority; LBP-11-8, 73 NRC 363 n.60 (2011)

_AREVA Enrichment Services, LLC_ (Eagle Rock Enrichment Facility), CLI-11-4, 74 NRC 1, 8 n.35 (2011)

guidance documents, although not binding, describe an approach to compliance with NRC rules that is acceptable to the NRC, and thus can be informative for that reason; LBP-13-6, 77 NRC 291 (2013)

NRC guidance documents are not legally binding, and compliance with them is not required; LBP-15-20, 81 NRC 847 n.100 (2015)

_AREVA Enrichment Services, LLC_ (Eagle Rock Enrichment Facility), LBP-11-11, 73 NRC 455 (2011)

guidance on the role of licensing boards in mandatory proceedings is provided; LBP-12-21, 76 NRC 233 (2012)

_AREVA Enrichment Services, LLC_ (Eagle Rock Enrichment Facility), LBP-11-26, 74 NRC 499 (2011), _Commission review declined_, Memorandum from Annette L. Vietti-Cook, NRC Secretary, to Board and Parties (Nov. 17, 2011)

guidance on the role of licensing boards in mandatory proceedings is provided; LBP-12-21, 76 NRC 233 (2012)

_AREVA Enrichment Services, LLC_ (Eagle Rock Enrichment Facility), LBP-11-26, 74 NRC 499, 553-61 (2011)

fugitive dust generated onsite at a facility, particularly during construction, can be a concern in the vicinity of a facility; LBP-12-3, 75 NRC 186 n.20 (2012)

_AREVA Enrichment Services, LLC_ (Eagle Rock Enrichment Facility), LBP-11-26, 74 NRC 499, 584-85 (2011)

light pollution is a matter of concern as a proposed nuclear materials facility undergoes agency licensing review; LBP-12-3, 75 NRC 188 (2012)

_Arizona Public Service Co._ (Palo Verde Nuclear Generating Station, Units 1, 2, and 3), CLI-91-12, 34 NRC 143, 155 (1991)

board decisions that have inferred additional bases for contentions beyond those supplied by the petitioner have been overturned; CLI-14-2, 79 NRC 28 (2014)

boards may appropriately view petitioner’s supporting information in a light favorable to the petitioner; LBP-13-10, 78 NRC 147-48 (2013)

boards may appropriately view petitioner’s supporting information in a light favorable to petitioner, but failure to provide such information requires that the contention be rejected; LBP-12-3, 75 NRC 191 (2012); LBP-12-15, 76 NRC 26 (2012); LBP-12-27, 76 NRC 595 (2012); LBP-13-6, 77 NRC 285 (2013); LBP-15-1, 81 NRC 38 (2015); LBP-15-11, 81 NRC 426 n.156, 438 n.232 (2015)

boards must not redraft an inadmissible contention to cure deficiencies and thereby render it admissible; CLI-11-11, 74 NRC 437 (2011)

if petitioner neglects to provide the requisite support for its contentions, it is not within the board’s power to make assumptions or draw inferences that favor petitioner, nor may the board supply information that is lacking; LBP-12-3, 75 NRC 191 (2012); LBP-12-15, 76 NRC 26 (2012); LBP-12-18, 76 NRC 182 (2012); LBP-12-27, 76 NRC 595 (2012); LBP-13-6, 77 NRC 285 (2013); LBP-15-1, 81 NRC 39 (2015)

_Arizona Public Service Co._ (Palo Verde Nuclear Generating Station, Units 1, 2, and 3), CLI-91-12, 34 NRC 149, 155-56 (1991)

failure to comply with any of the requirements of 10 C.F.R. 2.309(f)(1) precludes admission of a contention; LBP-11-7, 73 NRC 280 (2011); LBP-11-21, 74 NRC 125 (2011)

licensing boards are discouraged from adding material to bolster a petitioner’s or party’s arguments or pleadings; CLI-11-11, 74 NRC 447 n.113, 451 (2011)
Arizona Public Service Co. (Palo Verde Nuclear Generating Station, Units 1, 2, and 3), CLI-91-12, 34 NRC 149, 156 (1991)

at the contention admissibility stage, the burden is on intervenors to demonstrate a deficiency in the application; CLI-11-9, 74 NRC 243-44 (2011)

contention asserting that additional analysis is necessary, without a basis to support the need for additional physical testing, is not admissible; CLI-15-23, 82 NRC 328-29 (2015)

intervenors must assert a sufficiently specific challenge that demonstrates that further inquiry is warranted; CLI-11-9, 74 NRC 247 (2011)

NRC adjudication is not the appropriate forum fora challenge to a decision by a state regulatory agency; LBP-12-23, 76 NRC 464 (2012)

Arizona Public Service Co. (Palo Verde Nuclear Generating Station, Units 1, 2, and 3), LBP-91-19, 33 NRC 397, 410, aff’d in part and rev’d in part on other grounds, CLI-91-12, 34 NRC 149 (1991)

contentions that advocate stricter requirements than agency rules impose or that otherwise seek to litigate a generic determination established by a Commission rulemaking are inadmissible; LBP-13-6, 77 NRC 284 (2013)

where NRC Staff provided advice regarding timing that misled a petitioner, the Staff had conceded timeliness in light of such advice; LBP-12-16, 76 NRC 50 (2012)

fundamental fairness requires that applicant and NRC Staff be estopped from asserting that petitioners’ contention is untimely; LBP-12-16, 76 NRC 50 (2012)

deliberative process privilege does not protect documents in their entirety and if the government can segregate and disclose nonprivileged factual information within a document, it must; LBP-13-5, 77 NRC 240 (2013)

deliberative process privilege has been extended to draft documents, proposals, suggestions, instructions to work deletions and alterations into drafts, instructions to conduct an investigation, documents reflecting personal and advisory opinions, and rejections of recommendations; LBP-13-5, 77 NRC 239-40 (2013)

Associations Working for Aurora’s Residential Environment v. Colorado Department of Transportation, 153 F.3d 1122, 1127 n.4 (10th Cir. 1998)

Council on Environmental Quality Guidance does not change or substitute for any law, regulation, or other legally binding requirement and is not legally enforceable, and some courts have declined to defer to it; LBP-12-23, 76 NRC 467 (2012)

Atchison, Topeka & Santa Fe Railway Co. v. Wichita Board of Trade, 412 U.S. 800, 808 (1973)

whatever the ground for the agency’s departure from prior norms, it must be clearly set forth so that the reviewing court may understand the basis of the agency’s action; LBP-14-2, 79 NRC 150 n.87 (2014)

Atlas Corp. (Moab, Utah), LBP-00-4, 51 NRC 53, 59 (2000)

analysis of standing of other petitioning organizations was unnecessary when public interest organization had clear representational standing; LBP-13-6, 77 NRC 283 n.23 (2013)

courts give controlling weight to an agency’s interpretation of its own regulation unless it is plainly erroneous or inconsistent with the regulation; LBP-12-19, 76 NRC 196 n.65 (2012)

when it enacted the Endangered Species Act, Congress delegated broad administrative and interpretive power to the Secretary of the Interior; LBP-12-10, 75 NRC 640 n.37 (2012)
Babcock & Wilcox (Apollo, Pennsylvania Fuel Fabrication Facility), LBP-92-31, 36 NRC 255, 263 (1992) in addressing the stay criteria in a Subpart L proceeding, litigant must come forth with more than general or conclusory assertions in order to demonstrate its entitlement to relief; LBP-15-2, 81 NRC 54 (2015)

Babcock & Wilcox (Apollo, Pennsylvania Fuel Fabrication Facility), LBP-93-4, 37 NRC 72, 84 (1993) even if an import or export license authorized possession and/or use of the low-level radioactive waste, the petition does not assert how the LLRW is a significant source of radioactivity or provide any scenario in which the import or export of the LLRW would result in an accident that could produce obvious offsite consequences; CLI-11-3, 73 NRC 622 n.46 (2011)

Babcock & Wilcox (Apollo, Pennsylvania Fuel Fabrication Facility), LBP-93-4, 37 NRC 72, 87-88 (1993) mere potential exposure to minute doses of radiation within regulatory limits does not constitute a distinct and palpable injury on which standing can be founded; CLI-11-3, 73 NRC 623 n.51 (2011)

Babcock & Wilcox Co. v. United Technologies Corp., 435 F. Supp. 1249, 1256 (N.D. Ohio 1977) baseload generation is different than peaking power, which provides supplemental power during hours of the day when demand is highest; LBP-11-13, 75 NRC 263 (2012)

Baker v. Carr, 369 U.S. 186, 204 (1962) intervention petitioner must allege such a personal stake in the outcome of the controversy as to demonstrate that a concrete adverseness exists that will sharpen the presentation of issues; CLI-15-25, 82 NRC 394 (2015)

Baltimore Gas & Electric Co. v. Natural Resources Defense Council, Inc., 462 U.S. 87, 97 (1983) it is not necessary that every alternative device and thought conceivable by the mind of man be considered, but a hard look must be taken at environmental consequences; LBP-12-1, 75 NRC 35 (2012)

NEPA exists in part to ensure that important environmental effects will not be overlooked; LBP-12-10, 75 NRC 679-80 (2012)

NEPA has a dual purpose of ensuring that federal officials fully take into account the environmental consequences of a federal action before reaching major decisions and informing the public, Congress, and other agencies of those consequences; LBP-11-6, 73 NRC 172 n.20 (2010); LBP-11-7, 73 NRC 264 (2011); LBP-11-35, 74 NRC 766 n.13 (2011); LBP-12-1, 75 NRC 34 (2012)

NEPA requirement to prepare an environmental impact statement places upon an agency the obligation to consider every significant aspect of the environmental impact of a proposed action; LBP-13-4, 77 NRC 119 (2013)

NEPA requires an agency to take a hard look at the environmental consequences before taking a major action and to report the result of that hard look in an environmental impact statement; LBP-11-6, 73 NRC 172 n.20 (2010); LBP-12-10, 75 NRC 679 (2012); LBP-13-13, 78 NRC 452 n.1413, 524 n.1959 (2013)

Baltimore Gas & Electric Co. v. Natural Resources Defense Council, Inc., 462 U.S. 87, 97-98 (1983) NEPA requires agencies to take a hard look at environmental consequences prior to taking major actions; LBP-11-38, 74 NRC 830 n.86 (2011); LBP-12-5, 75 NRC 236 n.49 (2012); LBP-12-17, 76 NRC 82 n.50 (2012)

Baltimore Gas & Electric Co. v. Natural Resources Defense Council, Inc., 462 U.S. 87, 98 (1983) NRC policy statement is not a sufficient vehicle to preclude consideration of severe accident mitigation design alternatives, and NRC must take the requisite hard look at them, giving them the careful consideration and disclosure required by the National Environmental Policy Act; CLI-12-19, 76 NRC 380-81 (2012)

NRC’s use of rulemaking to address generic issues has been approved by the Supreme Court; CLI-15-6, 81 NRC 379 n.204 (2015)

Baltimore Gas & Electric Co. v. Natural Resources Defense Council, Inc., 462 U.S. 87, 100-01, 103 (1983) NEPA does not mandate how an agency must fulfill its obligations under the statute; LBP-11-23, 74 NRC 331 (2011)
NRC has discretion to resolve issues generically by rulemaking; CLI-11-11, 74 NRC 451 (2011); CLI-13-7, 78 NRC 207 (2013)

consistent with NEPA’s rule of reason, applicant and NRC Staff acted on the basis of best available information and analysis in completing the SAMA evaluation; LBP-13-13, 78 NRC 473 (2013)

as a logical proposition, risk equals the likelihood of an occurrence times the severity of the consequences; LBP-11-2, 73 NRC 63 n.212 (2011)

environmental impact statements must disclose significant health, socioeconomic, and cumulative consequences of the environmental impact of a proposed action; LBP-12-9, 75 NRC 623 (2012)

Baltimore Gas & Electric Co. (Calvert Cliffs Nuclear Power Plant, Units 1 and 2), CLI-98-25, 48 NRC 325, 343 n.3 (1998)
Commission decision to decline review of a referred question does not constitute an endorsement of the board’s views on the question of an applicant’s duty to supplement its environmental report; CLI-12-13, 75 NRC 686-87 n.31 (2012)
unreviewed board decisions do not create binding legal precedent; CLI-12-13, 75 NRC 686-87 n.31 (2012); CLI-13-10, 78 NRC 569 n.42 (2013); LBP-13-7, 77 NRC 328 (2013)

with respect to contentions filed after the initial petition, failure to address the requirements of 10 C.F.R. 2.309(c) and 2.309(f)(2) is reason enough to reject the new contentions; LBP-11-7, 73 NRC 289 n.227 (2011)

intervenors seeking admission of a nontimely filed contention bear the burden of showing that, on balance, the section 2.309(c)(1) factors weigh in favor of admitting the proposed contention; LBP-11-7, 73 NRC 279 (2011)

the Commission has summarily dismissed petitioners who failed to address the factors for a late-filed petition; LBP-11-7, 73 NRC 279 n.159 (2011)

NRC Staff’s responsibilities, parallel to the adjudicatory process, include seeking additional information from applicant after docketing of a pending license application; LBP-12-9, 73 NRC 626 n.15 (2012)

the process of revising an application after its initial submission and docketing is explained; LBP-11-22, 74 NRC 271 (2011)

seriousness of the litigation supports disclosure of material for which deliberative process privilege is sought; LBP-13-5, 77 NRC 250 (2013)

Battelle Memorial Institute Columbus Operations (Columbus, Ohio), DD-94-11, 40 NRC 359 (1994)
the record before the board falls far short of rebutting the presumption that a petition for license modification, suspension, or revocation is a meaningful avenue for seeking administrative relief; LBP-12-14, 76 NRC 10 (2012)

Batterton v. Marshall, 648 F.2d 694, 700 (D.C. Cir. 1980)
Administrative Procedure Act broadly defines “rule” to include nearly every statement an agency may make; LBP-15-15, 81 NRC 612 n.100 (2015)
Batterton v. Marshall, 648 F.2d 694, 701 (D.C. Cir. 1980)
many agency statements, including statements sometimes called “rules,” do not have force and effect, and advance notice and public participation are required for rules that carry the force of law; LBP-15-15, 81 NRC 612 n.100 (2015)

agencies act arbitrarily and capriciously when they ignore their own relevant precedent; CLI-13-7, 78 NRC 205 n.19 (2013)

Bellotti v. NRC, 725 F.2d 1380 (D.C. Cir. 1983)
both standing (redressability) and contention admissibility (scope) in the context of an NRC enforcement order are addressed; LBP-14-4, 79 NRC 357 (2014)
whether licensee or other person consents to an enforcement order, other persons adversely affected by an order issued under section 2.202 will be offered an opportunity for a hearing consistent with current practice and the authority of the Commission to define the scope of the proceeding on an enforcement order; LBP-14-4, 79 NRC 326, 349 (2014)

Bellotti v. NRC, 725 F.2d 1380, 1381 (D.C. Cir. 1983), aff’g, sub nom., Boston Edison Co. (Pilgrim Nuclear Power Station), CLI-82-16, 16 NRC 44 (1982)
Commission has the authority to set the scope of its own hearings; LBP-14-4, 79 NRC 341 n.5, 373 n.64 (2014)
court will examine a specific barrier to participation, in isolation, and generally conclude that it is not illegal; LBP-14-4, 79 NRC 374 (2014)
NRC has authority to define the scope of its proceedings, which, in enforcement proceedings, is to permit challenges solely on whether an order should be sustained; LBP-12-14, 76 NRC 5 n.21 (2012)

Bellotti v. NRC, 725 F.2d 1380, 1382 (D.C. Cir. 1983), aff’g Boston Edison Co. (Pilgrim Nuclear Power Station), CLI-82-16, 16 NRC 44 (1982)
challenges to NRC enforcement orders are limited to whether the order should be sustained; LBP-14-4, 79 NRC 357 (2014)
if a hearing could be invoked each time NRC engaged in oversight over or inquiry into plant conditions, NRC’s administrative process could be brought to a virtual standoff; CLI-14-11, 80 NRC 175 (2014)
issue to be determined at hearing on a confirmatory order is whether the order should be sustained or denied, not whether the order should be enhanced; CLI-13-2, 77 NRC 44 (2013)
NRC has the authority to define the scope of its proceedings and challenges to an enforcement order may only be made by an affected person who opposes issuance of the order; LBP-14-4, 79 NRC 357 (2014)

Bellotti v. NRC, 725 F.2d 1380, 1382-83 (D.C. Cir. 1983), aff’g, sub nom., Boston Edison Co. (Pilgrim Nuclear Power Station), CLI-82-16, 16 NRC 44 (1982)
petitioners denied a hearing for raising an issue outside the scope of a proceeding could still raise the issue through a petition for enforcement under 10 C.F.R. 2.206; LBP-12-14, 76 NRC 5 n.21 (2012)

Bellotti v. NRC, 725 F.2d 1380, 1383 (D.C. Cir. 1983), aff’g, Boston Edison Co. (Pilgrim Nuclear Power Station), CLI-82-16, 16 NRC 44 (1982)
automatic participation at a hearing may be denied only when the Commission is seeking to make a facility’s operation safer; CLI-13-2, 77 NRC 45 n.24 (2013)
petition seeking additional enforcement measures beyond those prescribed by the order was properly denied; LBP-12-14, 76 NRC 5 (2012)
when NRC issues orders that require additional or better safety measures, AEA § 189a does not provide a vehicle for third parties to seek a hearing on any issue some member of the public may wish to litigate; CLI-13-2, 77 NRC 45 (2013)

Bellotti v. NRC, 725 F.2d 1380, 1386 (D.C. Cir. 1983) (Wright, dissenting)
where a licensed and operating plant has been found unsafe, where the Commission has ordered some remedial amendment, and where the licensee has accepted that amendment, there is no public interest in the proceeding; LBP-14-4, 79 NRC 360 n.40 (2014)
LEGAL CITATIONS INDEX

CASES

Bennett v. Spear, 520 U.S. 154, 162 (1997)
in determining standing, boards should determine whether plaintiff’s grievance arguably falls within the zone of interests protected or regulated by the statutory provision invoked in the suit; LBP-14-4, 79 NRC 355 (2014)

when an agency’s conclusions are different from the Fish and Wildlife Service’s regarding endangered species, the agency must clearly articulate its reasons for disagreement; LBP-13-9, 78 NRC 95 (2013)

Bennett v. Spear, 520 U.S. 154, 175 (1997)
when no proximity presumption applies, petitioner must assert some specific injury in fact that will result from action taken; CLI-11-3, 73 NRC 622 n.47 (2011)

whether plaintiff’s interest is arguably protected by the statute within the meaning of the zone-of-interests test is to be determined not by reference to the overall purpose of the act in question, but by reference to the particular provision of law upon which plaintiff relies; LBP-14-4, 79 NRC 356 (2014)

obvious purpose of the requirement that each agency use the best scientific and commercial data available is to ensure that a statute not be implemented haphazardly, on the basis of speculation or surmise; LBP-14-4, 79 NRC 356 (2014)

an agency action is final at the consummation of the agency’s decisionmaking process, and when rights or obligations have been determined; LBP-15-2, 81 NRC 57 n.66 (2015)

Bering Strait Citizens v. U.S. Army Corps of Engineers, 524 F.3d. 398, 952 (9th Cir. 2008)
NEPA does not require circulation of a draft environmental assessment in all cases; CLI-15-17, 82 NRC 41 n.53 (2015)

standing is refused only when congressional intent specifically precludes the party or issue from obtaining judicial review; LBP-14-4, 79 NRC 355 n.36 (2014)

Blue Mountains Biodiversity Project v. Blackwood, 161 F.3d 1208, 1213 (9th Cir. 1998)
 aggregator about possible environmental effects and some risk do not constitute the hard look required by NEPA absent a justification of why more definitive information could not be provided; LBP-11-26, 74 NRC 545 (2011); LBP-11-38, 74 NRC 830-31 (2011); LBP-12-5, 75 NRC 236 (2012); LBP-13-13, 78 NRC 286, 452 (2013)

Blue Ridge Environmental Defense League v. NRC, 716 F.3d 183, 188 (D.C. Cir. 2013)
environmental impact statements must address all reasonably foreseeable environmental impacts even if the probability of such an occurrence is low; LBP-14-9, 80 NRC 42 (2014)

Blue Ridge Environmental Defense League v. NRC, 716 F.3d 183, 189 (D.C. Cir. 2013)
NEPA requirements are subject to a rule of reason, and an environmental impact statement need not address remote and highly speculative consequences; LBP-14-9, 80 NRC 42 (2014)

Blue Ridge Environmental Defense League v. NRC, 716 F.3d 183, 196 (D.C. Cir. 2013)
NRC rules provide a mechanism for supplementing an original NEPA analysis, but the rules do not guarantee a hearing nor is a hearing necessary to satisfy NRC’s NEPA obligations; CLI-13-7, 78 NRC 211 (2013)

Bolvin v. Black, 225 F.3d 36, 42-43 (1st Cir. 2000)
the Commission’s action in adopting new procedural rules meets the rational basis test; LBP-11-4, 73 NRC 125 n.147 (2011)

although NRC takes the position that it lacks authority to impose environmental restrictions on transmission corridors, those impacts should have been analyzed as a direct effect of the NRC action even under NRC’s new interpretation; LBP-14-9, 80 NRC 50 (2014)
increased air pollution in California resulting from two export turbines at a Mexican plant was a direct effect of the new transmission lines, and DOE was required to evaluate the air pollution impacts under NEPA; LBP-14-9, 80 NRC 50 (2014)

**Boston Edison Co.** (Pilgrim Nuclear Power Station), ALAB-816, 22 NRC 461, 465-68 (1985) in the absence of a timely analysis of the section 2.309(c)(1) and (f)(1) new/amended contention precepts by the contention’s sponsor, a board is not obligated to determine whether those new/amended contention requirements could have been met relative to a migrated environmental contention; LBP-13-10, 78 NRC 143 n.15 (2013)

**Boston Edison Co.** (Pilgrim Nuclear Power Station), CLI-82-16, 16 NRC 44 (1982) hearing on a confirmatory order is limited solely to whether, on the basis of matters set forth in the order, the order should be sustained; LBP-14-4, 79 NRC 341 (2014)

**Boston Edison Co.** (Pilgrim Nuclear Power Station), CLI-82-16, 16 NRC 44, 45 (1982) scope of a section 2.202 proceeding is limited to the narrow issues of whether the facts stated in the order are true and whether the remedy selected is supported by those facts; CLI-13-2, 77 NRC 44-45 (2013)

**Boston Edison Co.** (Pilgrim Nuclear Power Station), CLI-82-16, 16 NRC 44, 45-46 (1982) challenges to NRC enforcement orders are limited to whether the order should be sustained; LBP-14-4, 79 NRC 357, 373 n.64 (2014)

**Boston Edison Co.** (Pilgrim Nuclear Power Station), CLI-82-16, 16 NRC 44, 46-47 (1982) measures intended to strengthen an enforcement order issued under 10 C.F.R. 2.202 are not within the limited scope of enforcement proceedings; CLI-13-2, 77 NRC 43 (2013)

**Boston Edison Co.** (Pilgrim Nuclear Power Station, Unit 2), LBP-76-7, 3 NRC 156, 157 (1976) if a party fails to file an answer or pleading within the time prescribed in 10 C.F.R. Part 2 or as specified in the notice of hearing or pleading, to appear at a hearing or prehearing conference, to comply with any prehearing order entered by the presiding officer, or to comply with any discovery order entered by the presiding officer, the Commission or the presiding officer may make any orders in regard to the failure that are just; CLI-14-2, 79 NRC 14 n.10 (2014)

**Bowles v. Seminole Rock & Sand Co.**, 325 U.S. 410, 414 (1945) courts give controlling weight to an agency’s interpretation of its own regulation unless it is plainly erroneous or inconsistent with the regulation; LBP-12-19, 76 NRC 196 n.65 (2012)

**Brand v. Nickel**, 427 F.2d 53, 57 (9th Cir. 1970) to say to appellants that the joke is on you, you shouldn’t have trusted us, is hardly worthy of our great government; LBP-13-3, 77 NRC 96 n.68 (2013)

**Brunkhohle Transport, USA** (Import of South African Uranium Ore Concentrate), CLI-87-6, 25 NRC 891, 893-94 (1987) formal adjudicatory procedures are inappropriate in export or import licensing proceedings; CLI-11-3, 73 NRC 623-24 n.53 (2011)

**Bristol-Meyers Co. v. Federal Trade Commission**, 598 F.2d 18 (D.C. Cir. 1978) to qualify for deliberative process privilege, documents must be generated as part of a definable decisionmaking process that results in a final agency decision and must reflect the flow of opinions, recommendations, or advice between policymakers in formulating some type of definitive and conclusive ruling; LBP-13-5, 77 NRC 239 (2013)

**Brodsky v. NRC**, 704 F.3d 113 (2d Cir. 2013) NEPA affords agencies considerable discretion to decide the extent to which public involvement is practicable; CLI-15-17, 82 NRC 41 n.53 (2015)

**Brodsky v. NRC**, 704 F.3d 113, 119-20 (2d Cir. 2013) categorical exclusion is a generic finding that a category of actions do not individually or cumulatively have a significant effect on the human environment; LBP-15-26, 82 NRC 181 (2015)

**Bruessel v. Wyeth LLC**, 131 S. Ct. 1068, 1076 (2011) applying the rule of statutory construction that the mention of one thing implies the exclusion of another, the fact that the regulation sets forth three specific circumstances in which a board’s jurisdiction ends implies that jurisdiction does not end in other circumstances not listed; LBP-11-22, 74 NRC 277 (2011) specific inclusion of some conditions in a statute or regulation implies the exclusion of those not mentioned; CLI-12-14, 75 NRC 697 (2012)
Bulova Watch Co. v. United States, 365 U.S. 753, 758 (1961)
specific regulations control over general regulations; CLI-15-10, 81 NRC 540 (2015)
Burke v. Kodak Retirement Income Plan, 336 F.3d 103, 107-08 (2d Cir. 2003)
a notice failing to contain a specific time limit for administrative review, as required by federal regulations, does not trigger a time bar; LBP-11-19, 74 NRC 63 n.9 (2011)
Cabinet Mountains Wilderness/Scotchman’s Peak Grizzly Bears v. Peterson, 685 F.2d 678, 682-83 (D.C. Cir. 1982)
Council on Environmental Quality does not change or substitute for any law, regulation, or other legally binding requirement and is not legally enforceable, and some courts have declined to defer to it; LBP-12-23, 76 NRC 467 (2012)
where extraneous writing is incorporated for a specific purpose, the writing will be incorporated only to the extent of the reference and for the specific purpose intended, and the reference must be clear and unequivocal; LBP-12-24, 76 NRC 515 n.57 (2012)
deliberative process privilege has been extended to draft documents, proposals, suggestions, instructions to work deletions and alterations into drafts, instructions to conduct an investigation, documents reflecting personal and advisory opinions, and rejections of recommendations; LBP-13-5, 77 NRC 239-40 (2013)
to qualify for deliberative process privilege, documents must be generated as part of a definable decisionmaking process that results in a final agency decision and must reflect the flow of opinions, recommendations, or advice between policymakers in formulating some type of definitive and conclusive ruling; LBP-13-5, 77 NRC 239 (2013)
factual material that does not reveal the deliberative process is not protected by privilege, unless it is inextricably intertwined with the deliberative portions of the document or it could reveal the deliberative process being protected if it were disclosed; LBP-13-5, 77 NRC 239 (2013)
California Wilderness Coalition v. U.S. Department of Energy, 631 F.3d 1072, 1105-06 (9th Cir. 2011)
deficiencies in NRC Staff’s analysis of a combination alternative is not harmless error; LBP-12-17, 76 NRC 119 (2012)
without substantive, comparative environmental impact information regarding other possible courses of action, the ability of an environmental impact statement to inform agency deliberation and facilitate public involvement would be greatly degraded; LBP-11-23, 74 NRC 331 (2011)
California v. Federal Energy Regulatory Commission, 329 F.3d 700, 706-07 (9th Cir. 2003)
boards may not rely on a Federal Register notice to put petitioner on constructive notice of a requirement that the board itself cannot discern in the regulations; LBP-13-3, 77 NRC 97 (2013)
Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-09-20, 70 NRC 911, 914 (2009)
Commission affirmed board ruling on standing and upheld the validity of the proximity presumption; CLI-15-13, 81 NRC 561 n.22 (2015)
Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-09-20, 70 NRC 911, 914 (2009)
board rulings on standing are accorded substantial deference on appeal; CLI-12-12, 75 NRC 608 (2012); CLI-14-2, 79 NRC 13 (2014)
Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-09-20, 70 NRC 911, 915 (2009)
contemporaneous judicial concepts of standing are applied in NRC proceedings; LBP-13-8, 78 NRC 7 (2013); CLI-15-25, 82 NRC 394 (2015); LBP-12-8, 75 NRC 546 (2012)
NRC follows contemporaneous judicial concepts of standing, which call for showing of a concrete and particularized injury that is fairly traceable to the challenged action and is likely to be redressed by a favorable decision, where the injury is to an interest arguably within the zone of interests protected by the governing statute; LBP-11-29, 74 NRC 616 (2011); LBP-14-4, 79 NRC 353 (2014)
NRC is not strictly bound by judicial standing doctrines but has long applied contemporaneous judicial concepts of standing; LBP-14-4, 79 NRC 372 n.61 (2014)
proximity presumption applies if petitioner has frequent contacts within the geographic zone of potential harm; LBP-11-13, 73 NRC 546 (2011)
to show standing, a hearing request must state petitioner’s name, address, and telephone number, nature of its right under the applicable statutes to be made a party, nature and extent of property, financial, or other interest in the proceeding, and possible effect of any decision or order that may be issued on its interest; LBP-11-29, 74 NRC 616 (2011)
under the proximity presumption, an individual who resides within a 50-mile radius of a nuclear power plant is not required to specifically plead injury, causation, and redressability to establish his or her standing to intervene; LBP-12-10, 75 NRC 638 (2012)

**Calvert Cliffs 3 Nuclear Project, LLC** (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-09-20, 70 NRC 911, 915 n.15 (2009)

although the Commission has never explicitly endorsed using the proximity presumption in a license renewal proceeding, it did cite favorably, in the context of a COL hearing, to a licensing board’s application of the presumption in a reactor life extension case; LBP-12-15, 76 NRC 24 n.1 (2012)
geographic proximity to a facility (i.e., living or working within 50 miles) is presumptively sufficient to meet these traditional standing requirements in certain types of proceedings, including operating license renewal proceedings; LBP-12-8, 75 NRC 547 (2012); LBP-13-8, 78 NRC 7-8 (2013)

**Calvert Cliffs 3 Nuclear Project, LLC** (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-09-20, 70 NRC 911, 915-16 (2009)

standing based on the proximity presumption has been found if petitioner or a representative of a petitioner organization resides within approximately 50 miles of the facility in question; LBP-11-13, 73 NRC 546, 548 (2011); LBP-11-16, 73 NRC 653 (2011); LBP-11-29, 74 NRC 616 (2011); LBP-12-24, 76 NRC 508 n.19 (2012); LBP-13-8, 78 NRC 7 (2013)
to demonstrate organizational standing, petitioner must show injury-in-fact to the interests of the organization itself; LBP-15-17, 81 NRC 771 (2015)

**Calvert Cliffs 3 Nuclear Project, LLC** (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-09-20, 70 NRC 911, 915-16 & n.15 (2009)
in reactor license renewal proceedings, petitioner is presumed to have standing to intervene without the need to specifically plead injury, causation, and redressability if petitioner lives within 50 miles of the nuclear power facility; LBP-11-21, 74 NRC 122 (2011)

**Calvert Cliffs 3 Nuclear Project, LLC** (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-09-20, 70 NRC 911, 915-16 (2009)
proximity presumption allows petitioner living within 50 miles of the reactor to establish standing without the need to make an individualized showing of injury, causation, and redressability; LBP-15-5, 81 NRC 256 (2015)

**Calvert Cliffs 3 Nuclear Project, LLC** (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-09-20, 70 NRC 911, 916-17 (2009)
for reactor operating license renewal proceedings, a proximity presumption, respecting standing for an individual who resides within a 50-mile radius of a nuclear power plant, is recognized; LBP-12-10, 75 NRC 638 (2012)
NRC could consider adopting, at least for the initial construction/operation authorization of in situ recovery facilities, a standing regime by which persons living or having substantial contacts within a 50-mile radius of the facility are afforded standing; LBP-12-3, 75 NRC 189 n.27 (2012)
organization members living within 50 miles of a reactor are presumed to have standing under the Commission’s 50-mile proximity presumption; LBP-15-5, 81 NRC 257 (2015)

**Calvert Cliffs 3 Nuclear Project, LLC** (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-09-20, 70 NRC 911, 917 (2009)
proximity presumption to establish standing is based on the finding that persons living within the roughly 50-mile radius of the facility face a realistic threat of harm if a release from the facility of radioactive material were to occur; LBP-11-2, 73 NRC 41 n.51 (2011); LBP-11-13, 73 NRC 546 (2011); LBP-14-4, 79 NRC 331-32 (2014)
LEGAL CITATIONS INDEX

CASES

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-09-20, 70 NRC 911, 917 n.27 (2009)
NRC has latitude to define who is an “affected person” within the meaning of Atomic Energy Act § 189a, 42 U.S.C. § 2239a(a); LBP-12-3, 75 NRC 189 n.27 (2012)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-09-20, 70 NRC 911, 920 (2009)
an entity is under foreign ownership, control, or domination whenever a foreign interest has the power, direct or indirect, whether or not exercised, to direct or decide matters affecting the management or operations of the applicant; LBP-11-25, 74 NRC 391 (2011)
there is no specific ownership percentage above which the Commission would conclusively find that an applicant is per se controlled by foreign interests; LBP-11-25, 74 NRC 391 (2011)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-09-20, 70 NRC 911, 920 (2009)
NRC Staff review procedures used to evaluate applications for issuance or transfer of control of a production or utilization facility license in light of the prohibitions in Atomic Energy Act § 103d and 104d and in 10 C.F.R. 50.38 against foreign ownership or control are described; LBP-12-19, 76 NRC 192 (2012)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-09-20, 70 NRC 911, 920-21 (2009)
foreign control must be interpreted in light of all the information that bears on who in the corporate structure exercises control over what issues and what rights may be associated with certain types of shares; LBP-11-25, 74 NRC 391 (2011)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-09-20, 70 NRC 911, 921 (2009)
applicant’s eligibility merely to apply for a combined license is material to a combined license proceeding; LBP-11-25, 74 NRC 395 (2011)
foreign control inquiry should be focused on safeguarding the national defense and security as well as five other factors; LBP-11-25, 74 NRC 391 (2011)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-09-20, 70 NRC 911, 922-23 (2009)
correctness of assurance that the license conditions will be replaced by sections 50.75(h) and 50.82(a)(8) is a genuine concern relative to the appropriateness of the license amendment request, and therefore the board concludes that the state has shown the materiality of its contention; LBP-15-24, 82 NRC 86 (2015)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-09-20, 70 NRC 911, 924 (2009)
contentions challenging the ability of combined license applicants to handle onsite storage of Classes B and C low-level radioactive waste, as well as the attendant potential environmental impacts of such storage in the wake of the closure of the Barnwell facility in South Carolina to states outside of the Atlantic Compact are admissible; LBP-11-6, 73 NRC 242 (2010)
merely existence of the letter of intent to ship low-level radioactive waste to a disposal facility does not answer questions as to whether such a plan will ultimately result in a transfer of LLRW title and permanent offsite disposition of the LLRW and whether nontransfer of title will result in environmental impacts; LBP-11-6, 73 NRC 242 (2010)
merits determination cannot be resolved at the contention admissibility stage of the proceeding; LBP-11-6, 73 NRC 241 (2010)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-12-16, 76 NRC 63 (2012)
final licensing decisions were suspended until the Commission addressed the court’s remand on the Waste Confidence Decision and Temporary Storage Rule and boards were instructed to hold relevant contentions in abeyance pending further order; CLI-15-11, 81 NRC 547 (2015); CLI-15-12, 81 NRC 552 (2015)
onsite waste storage contentions are to be held in abeyance pending further Commission order; CLI-13-7, 78 NRC 202 n.3 (2013); LBP-13-8, 78 NRC 15 (2013)
LEGAL CITATIONS INDEX

CASES

**Calvert Cliffs 3 Nuclear Project, LLC** (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-12-16, 76 NRC 63, 63-65 (2012)

Commission responded to a series of petitions to suspend final licensing decisions in twenty-two reactor licensing proceedings; CLI-14-3, 79 NRC 33 (2014)

**Calvert Cliffs 3 Nuclear Project, LLC** (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-12-16, 76 NRC 63, 66-67 (2011)

all final decisions for licenses that relied on the Waste Confidence Decision and Temporary Storage Rule were suspended; CLI-15-4, 81 NRC 230 (2015)

because waste confidence undergirds certain agency licensing decisions, the Commission held that NRC should not issue licenses affected by the Waste Confidence Decision until the remanded issues are resolved; CLI-14-3, 79 NRC 33 (2014)

in issuing the suspension of final licensing decisions in proceedings, NRC recognized that it could not move forward without first addressing the D.C. Circuit’s remand because the vacatur left a regulatory gap in the Part 51 regulations that undergird licensing reviews in those matters; CLI-14-7, 80 NRC 9 n.32 (2014)

NRC will not issue final licenses dependent upon the Waste Confidence Rule until the court’s remand is appropriately addressed; LBP-12-21, 76 NRC 242 (2012)

**Calvert Cliffs 3 Nuclear Project, LLC** (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-12-16, 76 NRC 63, 57 (2012)

in light of the vacatur and remand of the Waste Confidence Decision and Temporary Storage Rule and in response to suspension petitions filed on multiple dockets, issuance of final licensing decisions for affected matters were held in abeyance while the Commission addressed the court’s remand; CLI-15-13, 81 NRC 562-63 (2015)

members of the public had the opportunity to fully participate in the Continued Storage rulemaking proceeding; CLI-15-10, 81 NRC 541-42 (2015)

NRC will not issue licenses dependent upon the Waste Confidence Decision or the Temporary Storage Rule until the court’s remand is appropriately addressed; CLI-12-17, 76 NRC 212 (2012); LBP-13-13, 78 NRC 270, 276 n.105 (2013); LBP-14-3, 79 NRC 273 n.10 (2014)

to the extent NRC takes action with respect to waste confidence on a case-by-case basis, litigants can challenge such site-specific agency actions in the adjudicatory process; CLI-15-11, 81 NRC 547 n.5 (2015); CLI-15-12, 81 NRC 552 n.5 (2015)

**Calvert Cliffs 3 Nuclear Project, LLC** (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-12-16, 76 NRC 63, 67 & n.7 (2012)

decision to suspend final licensing decisions is highly dependent upon the facts and requires a judgment that the significance of the matter raised is so substantial as to warrant suspension; CLI-15-14, 81 NRC 736 (2015)

**Calvert Cliffs 3 Nuclear Project, LLC** (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-12-16, 76 NRC 63, 67-69 & n.10 (2012)

Commission retained authority to provide ultimate direction on the waste confidence contentions being held in abeyance; LBP-14-8, 79 NRC 528 (2014)

waste confidence and similar contentions are held in abeyance pending further order from the Commission; LBP-14-7, 79 NRC 454 n.1 (2014); LBP-14-8, 79 NRC 522 (2014)

**Calvert Cliffs 3 Nuclear Project, LLC** (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-12-16, 76 NRC 63, 68-69 (2012)

as an exercise of its inherent supervisory authority over adjudications, the Commission directed that waste confidence contentions and any related contentions that may be filed in the near term be held in abeyance pending further order; CLI-15-6, 81 NRC 344 n.11 (2015); LBP-12-24, 76 NRC 506, 510 (2012); LBP-13-1, 77 NRC 69 n.46 (2013); LBP-13-4, 77 NRC 114 n.1, 221 n.101 (2013); LBP-13-8, 78 NRC 16 (2013); LBP-13-13, 78 NRC 270 (2013); LBP-14-6, 79 NRC 410 (2014); LBP-14-14, 80 NRC 145 (2014); LBP-14-16, 80 NRC 189 (2014); LBP-15-1, 81 NRC 21 (2015); LBP-15-12, 81 NRC 453 n.2 (2015)

motion for leave to file a new contention concerning storage and disposal of spent nuclear fuel was held in abeyance pending further order of the Commission; LBP-15-14, 81 NRC 592 (2015)
LEGAL CITATIONS INDEX

CASES

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-12-16, 76 NRC 63, 69 n.11 (2012)
should the Commission determine at a future time that case-specific waste confidence challenges are appropriate for consideration, normal procedural rules will apply; LBP-13-1, 77 NRC 69 n.46 (2013); LBP-14-6, 79 NRC 410 (2014)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-13-4, 77 NRC 101, 104 n.9 (2013)
it is within Commission discretion to grant leave for participation as amicus curiae; CLI-15-1, 81 NRC 5 n.19 (2015)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-13-4, 77 NRC 101, 105 (2013)
Commission disfavors issuance of advisory opinions; CLI-13-10, 78 NRC 568 (2013)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-14-8, 80 NRC 71 (2014)
Continued Storage Rule makes generic safety findings concerning feasibility and capacity of spent fuel disposal; LBP-15-9, 81 NRC 397 (2015)
decision to suspend final licensing decisions is highly dependent upon the facts and requires a judgment that the significance of the matter raised is so substantial as to warrant suspension; CLI-15-14, 81 NRC 736-37 (2015)
NRC adopted a generic environmental impact statement identifying and analyzing environmental impacts of continued storage of spent nuclear fuel and associated revisions to the Temporary Storage Rule in 10 C.F.R. 51.23; LBP-14-16, 80 NRC 190 (2014); LBP-15-1, 81 NRC 21-22 (2015)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-14-8, 80 NRC 71, 74 (2014)
Commission approved issuance of a revised rule codifying NRC’s generic determinations regarding the environmental impacts of continued storage of spent nuclear fuel beyond a reactor’s licensed operating life; LBP-14-14, 80 NRC 145 (2014)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-14-8, 80 NRC 71, 74, 79 (2014)
Commission lifted suspension on final licensing decisions, declined to accept contentions concerning continued storage of spent nuclear fuel, and directed boards to reject pending contentions on this issue; LBP-14-14, 80 NRC 145 (2014)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-14-8, 80 NRC 71, 75 (2014)
Commission adopted a generic environmental impact statement to identify and analyze the environmental impacts of continued storage of spent nuclear fuel beyond the licensed life of nuclear reactors; LBP-15-5, 81 NRC 267 (2015); LBP-15-12, 81 NRC 453 (2015)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-14-8, 80 NRC 71, 77 (2014)
Commission lifted its suspension on final licensing decisions after adopting a generic environmental impact statement to identify and analyze environmental impacts of continued storage of spent nuclear fuel beyond the licensed life of nuclear reactors; LBP-15-5, 81 NRC 267 (2015)
NRC Staff must account for the environmental impacts of continued storage before finalizing individual licensing decisions, and, when appropriate circumstances exist, the question of whether to prepare a supplemental final environmental impact statement is to be part of that analysis; CLI-15-10, 81 NRC 543, 544 (2015)
results of the continued storage proceeding must be accounted for before finalizing individual license decisions; CLI-15-10, 81 NRC 542 (2015)
to address the court’s remand and provide a comprehensive analysis of the environmental impacts of continued storage, the Commission issued a final Continued Storage Rule and supporting Generic Environmental Impact Statement; CLI-15-13, 81 NRC 563 (2015)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-14-8, 80 NRC 71, 77-79 (2014)
concurrent with approval of the Continued Storage Rule and Generic Environmental Impact Statement, the Commission lifted the suspension on final licensing decisions and directed that proposed spent

228
fuel storage contentions be dismissed; CLI-15-11, 81 NRC 548 n.6 (2015); CLI-15-12, 81 NRC 552 (2015)

*Calvert Cliffs 3 Nuclear Project, LLC* (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-14-8, 80 NRC 71, 78 (2014)

assumptions used in the analysis of impacts of continued storage of spent fuel are sufficiently conservative to bound the impacts such that variances that may occur between sites are unlikely to result in environmental impact determinations greater than those presented in the continued storage generic environmental impact statement; CLI-15-11, 81 NRC 548 n.7 (2015)

impacts of continued storage will not vary significantly across sites and can be analyzed generically; CLI-15-11, 81 NRC 548 (2015)

*Calvert Cliffs 3 Nuclear Project, LLC* (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-14-8, 80 NRC 71, 78-79 (2014)

impacts of continued storage will not vary significantly across sites and can be analyzed generically; LBP-14-16, 80 NRC 190 (2014)

*Calvert Cliffs 3 Nuclear Project, LLC* (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-14-8, 80 NRC 71, 78-79 n.25 (2014)

generic approach to high-level waste disposal has been endorsed by higher courts; LBP-14-16, 80 NRC 197 (2014)

*Calvert Cliffs 3 Nuclear Project, LLC* (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-14-8, 80 NRC 71, 79 (2014)

after reviewing the background regarding the continued storage rule, the Commission directed licensing boards to reject waste confidence contentions pending before them; LBP-14-12, 80 NRC 140 (2014); LBP-14-13, 80 NRC 143 (2014); LBP-14-15, 80 NRC 155 (2014); LBP-14-16, 80 NRC 190 (2014)

assumptions used in the analysis of impacts of continued storage of spent fuel are sufficiently conservative to bound the impacts such that variances that may occur between sites are unlikely to result in environmental impact determinations greater than those presented in the continued storage generic environmental impact statement; CLI-15-12, 81 NRC 552 n.7 (2015)

because generic impact determinations on impacts of continued storage have been the subject of extensive public participation in the rulemaking process, they are excluded from litigation in individual proceedings; LBP-14-15, 80 NRC 155 (2014)

Commission directed all licensing boards to reject pending waste confidence contentions that had been held in abeyance, because the generic impact determinations have been the subject of extensive public participation in the rulemaking process and therefore are excluded from litigation in individual proceedings; LBP-15-1, 81 NRC 22 (2015); LBP-15-5, 81 NRC 267 (2015); LBP-15-8, 81 NRC 394 (2015)

contention that impermissibly challenges an agency regulation is outside the scope of an individual licensing proceeding and is therefore inadmissible; CLI-15-11, 81 NRC 549 (2015); LBP-14-15, 80 NRC 155 (2014)

generic determinations are appropriately excluded from litigation in individual proceedings; CLI-15-11, 81 NRC 548 (2015); CLI-15-12, 81 NRC 552 (2015)

*Calvert Cliffs 3 Nuclear Project, LLC* (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-14-8, 80 NRC 71, 79 n.27 (2014)

contentions that are the subject of general rulemaking by the Commission may not be litigated in individual license proceedings; LBP-14-16, 80 NRC 193 (2014); LBP-15-4, 81 NRC 167 n.64 (2015); LBP-15-17, 81 NRC 778 (2015)

*Calvert Cliffs 3 Nuclear Project, LLC* (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-14-8, 80 NRC 71, 79, 81 (2014)

Commission approval of the Continued Storage Rule and generic environmental impact statement mandates that contentions discussing the long-term storage of spent nuclear fuel are not to be heard by individual licensing boards; LBP-14-16, 80 NRC 197-98 (2014)

*Calvert Cliffs 3 Nuclear Project, LLC* (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-14-8, 80 NRC 71, 79-80 (2014)

concurrent with issuance of a Continued Storage Rule and Generic Environmental Impact Statement, the Commission lifted the licensing suspension and dismissed, or directed licensing boards to
dismiss, proposed contentions that had been filed with the multidocket suspension petitions and held in abeyance; CLI-15-13, 81 NRC 563 (2015)

following adoption of a revised Continued Storage Rule, boards were ordered to reject continued storage contentions pending before them, except contentions unresolved by the Continued Storage Rule; CLI-15-6, 81 NRC 344-45 n.11 (2015)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), CLI-14-8, 80 NRC 71, 80 (2014)

Commission directed all affected licensing boards to reject proffered contentions on environmental impacts of spent nuclear fuel storage; LBP-15-18, 81 NRC 592 (2015)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), LBP-09-4, 69 NRC 170, 183 (2009)

the proximity presumption’s rationale is that persons living within the roughly 50-mile radius of the facility face a realistic threat of harm if a release from the facility of radioactive material were to occur; LBP-11-13, 73 NRC 546 (2011)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), LBP-09-4, 69 NRC 170, 184, aff’d, CLI-09-20, 70 NRC 911 (2009)

it is for the Commission, not licensing boards, to revise its rulings; LBP-15-18, 81 NRC 797 (2015)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), LBP-09-4, 69 NRC 170, 184, aff’d, CLI-09-20, 70 NRC 911, 917-18, 924 (2009)

licensing boards are bound by Commission precedent; CLI-13-7, 78 NRC 205 n.19 (2013)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), LBP-09-4, 69 NRC 170, 190 (2009), aff’d, CLI-09-20, 70 NRC 911 (2009)

pleading requirements of 10 C.F.R. 2.309(f)(1)(v), calling for a recitation of facts or expert opinion supporting the issue raised, are inapplicable to a contention of omission beyond identifying the regulatively required missing information; LBP-15-11, 81 NRC 437-38 n.241 (2015)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), LBP-09-4, 69 NRC 170, 219-20, 224, aff’d, CLI-09-20, 70 NRC 911, 921-24 (2009)

contentions challenging the ability of combined license applicants to handle onsite storage of Classes B and C low-level radioactive waste, as well as the attendant potential environmental impacts of such storage in the wake of the closure of the Barnwell facility in South Carolina to states outside of the Atlantic Compact are admissible; LBP-11-6, 73 NRC 239 (2010)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), LBP-09-4, 69 NRC 170, 228 (2009), aff’d, CLI-09-20, 70 NRC 911 (2009)

environmental contentions are expected in response to applicant’s or NRC Staff’s environmental reviews, and contentions regarding their adequacy cannot be expected to be proffered at an earlier stage of the proceeding before the documents are available; LBP-15-11, 81 NRC 423 n.132 (2015)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), LBP-09-15, 70 NRC 198, 210 (2009)

contention dismissal based on mootness is a jurisdictional ruling, not a decision on the merits of the claim; LBP-11-22, 74 NRC 270 n.61 (2011)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), LBP-10-24, 72 NRC 720, 729-30 (2010)

contentions may challenge the adequacy of the review contained in NRC Staff’s NEPA documents; LBP-11-22, 74 NRC 273 n.72 (2011)

intervenor may propose new or amended contentions based on data or conclusions in the NRC draft or final environmental impact statement, environmental assessment, or any supplements relating thereto, that differ significantly from the data or conclusions in the applicant’s environmental documents; LBP-11-7, 73 NRC 277 (2011)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), LBP-10-24, 72 NRC 720, 750 (2010)

although boards do not decide the merits or resolve conflicting evidence at the contention admissibility stage, materials cited as the basis for a contention are subject to scrutiny by the board to determine whether they actually support the facts alleged; LBP-15-20, 81 NRC 865 (2015)

boards may examine both the statements in the document that support petitioner’s assertions and those that do not; LBP-15-20, 81 NRC 865 (2015)
LEGAL CITATIONS INDEX
CASES

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), LBP-10-24, 72 NRC 720, 750-52 (2010)
licensing board concluded that information on a website cited by the intervenors, instead of supporting intervenors’ claim, contradicted it; LBP-15-20, 81 NRC 860 n.187 (2015)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), LBP-12-19, 76 NRC 184, 187 (2012), petition for review denied, CLI-13-4, 77 NRC 101 (2013)
where a foreign entity proposed to own 100% of the entire facility, a negation action plan was of no consequence; LBP-14-3, 79 NRC 306-07 (2014)

Calvert Cliffs 3 Nuclear Project, LLC (Calvert Cliffs Nuclear Power Plant, Unit 3), LBP-12-19, 76 NRC 184, 195-201 (2012), petition for review denied, CLI-13-4, 77 NRC 101 (2013)
there is generally no specific ownership percentage above which the NRC Staff would conclusively determine that an applicant is per se controlled by foreign interests, but a 100% foreign ownership has formed the basis for the licensing board’s grant of summary disposition in favor of the intervenors; LBP-14-3, 79 NRC 280 n.56 (2014)

Calvert Cliffs’ Coordinating Committee, Inc. v. AEC, 449 F.2d 1109, 1112 (D.C. Cir. 1971)
although NEPA’s requirements are procedural, federal agencies are held to a strict standard of compliance with the act’s requirements; LBP-12-18, 76 NRC 159 (2012)
under NEPA, federal agencies must use all practicable means to avoid environmental degradation to the extent consistent with other essential considerations of national policy; LBP-14-9, 80 NRC 29 (2014)

Calvert Cliffs’ Coordinating Committee, Inc. v. AEC, 449 F.2d 1109, 1115 (D.C. Cir. 1971)
NEPA obligations supplement existing statutory authority and must be complied with to the fullest extent, unless there is a clear conflict of statutory authority; LBP-14-9, 80 NRC 50 (2014)

Calvert Cliffs’ Coordinating Committee, Inc. v. AEC, 449 F.2d 1109, 1118 (D.C. Cir. 1971)
after a licensing board in an uncontested proceeding determines that Staff’s NEPA review is adequate, it must then independently consider the final balance among conflicting factors that is struck in the Staff’s recommendation; LBP-12-21, 76 NRC 236 (2012)

National Environmental Policy Act requires that agencies consider environmental impacts of their actions to the fullest extent possible; LBP-12-21, 76 NRC 235-36 (2012)

Calvert Cliffs’ Coordinating Committee, Inc. v. AEC, 449 F.2d 1109, 1122 (D.C. Cir. 1971)
rule that excluded certain environmental impacts from NEPA consideration and deferred totally to environmental quality standards devised and administered by other agencies violated NEPA; LBP-15-23, 82 NRC 61 (2015)

Calvert Cliffs’ Coordinating Committee, Inc. v. Atomic Energy Commission, 449 F.2d 1109, 1122-23 (D.C. Cir. 1971)
agency cannot relinquish its NEPA responsibility to evaluate environmental impacts by relying on expected compliance with the environmental standards of another agency; LBP-15-23, 82 NRC 61 (2015)

Calvert Cliffs’ Coordinating Committee, Inc. v. AEC, 449 F.2d 1109, 1123 (D.C. Cir. 1971)
al though NEPA does not explicitly mention cost-benefit balancing, courts have interpreted the statute as requiring federal agencies to balance the environmental costs against the anticipated benefits of a proposed action; LBP-11-7, 73 NRC 281 (2011)
although NRC does not license construction or operation of a transmission corridor, it has the authority to deny the license for a proposed nuclear plant if, for example, total environmental costs of the new reactor and connected actions exceed benefits; LBP-12-12, 75 NRC 779-80 (2012)
certification by agencies without overall responsibility for the particular federal action in question that its own environmental standards are satisfied attend only to one aspect of the problem without considering the broad range of environmental concerns and considerations mandated by NEPA; LBP-15-23, 82 NRC 61 (2015)
impacts of the possible routes that applicant will use for its transmission lines must be analyzed for applicant to give the NRC the requisite information to make an informed decision on its license; LBP-11-6, 73 NRC 109 n.52 (2010)
merely referencing an actual or anticipated certification by another agency fails to satisfy NEPA requirements; LBP-14-9, 80 NRC 63 (2014)
NEPA mandates a case-by-case balancing judgment on the part of federal agencies, not the private parties seeking federal action; LBP-14-9, 80 NRC 51 (2014); LBP-15-23, 82 NRC 61 (2015)
NRC may not abdicate its duty under NEPA to other agencies to consider environmental impacts, even if those agencies have special expertise relating to environmental impacts; LBP-13-4, 77 NRC 213 n.91 (2013)
the National Pollutant Discharge Elimination System permitting process does not excuse NRC from addressing relevant water quality issues in its environmental impact statement; LBP-12-10, 75 NRC 678-79 (2012)

Calvert Cliffs’ Coordinating Committee, Inc. v. AEC, 449 F.2d 1109, 1123, 1124 (D.C. Cir. 1971)
rule that excluded certain environmental impacts from NEPA consideration and deferred totally to environmental quality standards devised and administered by other agencies constituted an impermissible abdication of the AEC’s NEPA responsibilities; LBP-15-23, 82 NRC 61 (2015)

Calvert Cliffs’ Coordinating Committee, Inc. v. AEC, 449 F.2d 1109, 1125 (D.C. Cir. 1971)
NEPA requires NRC to construe its existing statutory authority consistently with NEPA’s goals; LBP-14-9, 80 NRC 54 (2014)

Carahsoft Technology Corp. v. United States, 86 Fed. Cl. 325, 350 (2009)
for a contract to incorporate the terms of extrinsic material by reference, it must explicitly, or at least precisely, identify the written material being incorporated and must clearly communicate that the purpose of the reference is to incorporate the referenced material into the contract; LBP-12-24, 76 NRC 515 n.60 (2012)

role of the government in litigation favors disclosure when the government is a party to the litigation and has been accused of unlawful conduct; LBP-13-5, 77 NRC 250 (2013)
when government conduct is challenged, claims of privilege may be used to obtain a litigating advantage; LBP-13-5, 77 NRC 250 (2013)

Carolina Environmental Study Group v. United States, 510 F.2d 796, 800 (D.C. Cir. 1975)
contentions could show a genuine dispute with respect to a technology that, although not commercially viable at the time of the application, is under development for large-scale use and is likely to be available during the period of extended operation; CLI-12-5, 75 NRC 342 n.245 (2012)
NEPA was not meant to require detailed discussion of remote and speculative alternatives; CLI-12-5, 75 NRC 342 n.244 (2012)

Carolina Environmental Study Group v. United States, 510 F.2d 796, 803 (D.C. Cir. 1975)
NEPA requires that alternatives be considered as they exist and are likely to exist, not merely as they exist at the present time; CLI-12-5, 75 NRC 340 (2012); LBP-11-2, 73 NRC 51 (2011); LBP-11-13, 73 NRC 563 (2011); LBP-12-17, 76 NRC 115 (2012)

Carolina Power & Light Co. (Shearon Harris Nuclear Power Plant), ALAB-837, 23 NRC 525, 542-43 n.58 (1986)
petitioner may act to vindicate its own rights, but it has no standing to assert the rights of others; CLI-12-6, 75 NRC 363 (2012)

Carolina Power & Light Co. (Shearon Harris Nuclear Power Plant), ALAB-852, 24 NRC 532, 544-45 (1986)
although boards may give reasonable deference to NRC guidance, such agency guidance does not substitute for regulations, is not binding authority, and does not prescribe NRC requirements; LBP-11-16, 73 NRC 661, 670 (2011)

Carolina Power & Light Co. (Shearon Harris Nuclear Power Plant), CLI-00-11, 51 NRC 297, 299 (2000)
parties should not seek interlocutory review by invoking the grounds under which the Commission might exercise its supervisory authority; CLI-11-14, 74 NRC 813 (2011)

Carolina Power & Light Co. (Shearon Harris Nuclear Power Plant), CLI-01-11, 53 NRC 370, 383 (2001)
arguments not raised before the board or not clearly articulated in the petition for review are deemed waived; LBP-15-5, 81 NRC 290 n.263 (2015)

Carolina Power & Light Co. (Shearon Harris Nuclear Power Plant), CLI-01-7, 53 NRC 113, 118 (2001)
part from discretionary review by the Commission, NRC Staff’s no significant hazards consideration determination under section 50.92(c) may not be contested; LBP-15-26, 82 NRC 178 n.30 (2015)
LEGAL CITATIONS INDEX

CASES

Carolina Power & Light Co. (Shearon Harris Nuclear Power Plant), CLI-01-11, 53 NRC 370, 387-88 (2001) an accident sequence with a probability conservatively estimated at $2.0 \times 10^{-7}$ per reactor year is remote and speculative for the purposes of NEPA; LBP-11-38, 74 NRC 859 (2011)

Carolina Power & Light Co. (Shearon Harris Nuclear Power Plant), LBP-99-25, 50 NRC 25, 29 (1999) the interests a municipality seeks to represent on behalf of its residents are germane to its own purposes in the context of standing; LBP-11-6, 73 NRC 170 n.15 (2010)

Carolina Power & Light Co. (Shearon Harris Nuclear Power Plant), LBP-11-38, 74 NRC 859 (2011) when a governmental organization, including a federally recognized Native American tribe, is unable to establish standing because the facility or nuclear material in question does not fall within its jurisdictional boundaries, that entity may be accorded standing if its boundaries come within a distance from the nuclear facility or material that otherwise would establish standing for an individual or nongovernmental organization, whether via a proximity presumption or otherwise; LBP-13-6, 77 NRC 272 n.7 (2013)

Carolina Power & Light Co. (Shearon Harris Nuclear Power Plant), LBP-00-19, 52 NRC 85, 92 (2000) delay in filing contentions caused by the schedule of counsel in other matters can support a finding of good cause; LBP-12-12, 75 NRC 749 (2012)

Carolina Power & Light Co. (Shearon Harris Nuclear Power Plant), LBP-00-19, 52 NRC 85, 93-98 (2000) contention challenging the adequacy/propriety of a Staff determination to prepare an environmental assessment in lieu of a supplemental EIS would need to await the issuance of the draft EA; LBP-13-6, 77 NRC 300 n.32 (2013)

Carolina Power & Light Co. (Shearon Harris Nuclear Power Plant, Unit 1; H.B. Robinson Plant, Unit 2), DD-06-1, 63 NRC 133, 140 (2006) for contentions that fall within the facility’s current licensing basis, petitioner may seek action on its concerns by either filing a petition for rulemaking under 10 C.F.R. 2.802 or submitting an enforcement petition under 10 C.F.R. 2.206; LBP-11-21, 74 NRC 134 n.115 (2011)

Carolina Power & Light Co. (Shearon Harris Nuclear Power Plant, Units 1, 2, 3, and 4), ALAB-490, 8 NRC 234, 236, 241 (1978) where the licensing board independently analyzed the data in the record and made its own need-for-power projection based thereon, the NRC did not abdicate its NEPA responsibilities by placing heavy reliance on the judgment of local regulatory bodies; LBP-13-4, 77 NRC 214 (2013)

Carolina Power & Light Co. (Shearon Harris Nuclear Power Plant, Units 1, 2, 3, and 4), ALAB-490, 8 NRC 234, 240-41 (1978) NRC Staff’s need-for-power analysis may accord an expert, independent agency’s forecasts and studies great weight and may give heavy reliance to those forecasts and studies absent a showing that they contain a fundamental error; LBP-11-7, 73 NRC 282-83 n.178 (2011)

Carolina Power & Light Co. (Shearon Harris Nuclear Power Plant, Units 1, 2, 3, and 4), ALAB-490, 8 NRC 234, 241 (1978) a state public service commission’s determination of need for power may be relied on by the NRC in its own analysis, as long as that determination is neither shown nor appears on its face to be seriously defective; LBP-11-6, 73 NRC 218, 223 (2010) in its need-for-power analysis, NRC Staff may rely on studies and forecasts prepared by expert, independent agencies charged with the duty of ensuring that the utilities within their jurisdiction fulfill the legal obligation to meet customer demands; LBP-11-7, 73 NRC 282 (2011)

Carolina Power & Light Co. (Shearon Harris Nuclear Power Plant, Units 1, 2, 3, and 4), ALAB-526, 9 NRC 122, 123-24, 124 n.3 (1979) after a board has authorized issuance of applicant’s permits and the Commission has remanded a specific question to board, the board’s jurisdiction is limited to what was remanded to it, and the board lacks jurisdiction over a newly filed intervention petition; LBP-11-20, 74 NRC 76 n.71 (2011)

Carolina Power & Light Co. (Shearon Harris Nuclear Power Plant, Units 1, 2, 3, and 4), ALAB-577, 11 NRC 18, 23-25 (1980), modified, CLI-80-12, 11 NRC 514 (1980) although contention ultimately was resolved in NRC Staff’s favor, Commission takes review as a matter of discretion because the board’s ruling raises substantial questions of precedential importance; CLI-15-6, 81 NRC 369 (2015)
because need-for-power assessments necessarily entail forecasting power demands in light of substantial uncertainty and the duty of providing adequate and reliable service to the public, they are inherently conservative; LBP-11-7, 73 NRC 283 (2011); LBP-12-5, 75 NRC 238 (2012) long-range forecasts of demand for power are especially uncertain in that they are affected by trends in usage, increasing rates, demographic changes, industrial growth or decline, and the general state of the economy, among others; LBP-11-6, 73 NRC 223 n.84 (2010)

Carolina Power & Light Co. (Shearon Harris Nuclear Power Plant, Units 1, 2, 3, and 4), CLI-80-12, 11 NRC 514, 517 (1980) concerns about how some aspect of a settlement agreement is being implemented or enforced can be brought to the attention of the Commission, which retains supervisory authority over the parties’ agreement; LBP-15-21, 82 NRC 17 n.21 (2015)

Celotex Corp. v. Catrett, 477 U.S. 317, 323 (1986) summary disposition movant bears the initial burden of showing the absence of a genuine issue of material fact; LBP-12-4, 75 NRC 218 (2012)

Celotex Corp. v. Catrett, 477 U.S. 317, 324 (1986) opponent of a summary disposition motion cannot rest on the allegations or denials of a pleading, but instead must go beyond the pleadings and by its own affidavits, or the depositions, answers to interrogatories, and admissions on file, designate specific facts showing that there is a genuine issue for trial; LBP-12-4, 75 NRC 218 (2012)

Celotex Corp. v. Catrett, 477 U.S. 317, 325 (1986) when the issue on which summary judgment is sought is one on which the nonmoving party bears the burden of proof, the burden on the moving party may be discharged by showing that there is an absence of evidence to support the nonmoving party’s case; LBP-11-4, 73 NRC 100 n.16 (2011)

Celotex Corp. v. Catrett, 477 U.S. 317, 327 (1986) summary judgment, which is appropriate upon proper showings of the lack of a genuine, triable issue of material fact, is an integral part of the Federal Rules as a whole, which are designed to secure the just, speedy, and inexpensive determination of every action; LBP-11-4, 73 NRC 99 (2011)

Center for Auto Safety v. National Highway Traffic Safety Administration, 710 F.2d 842, 846 (D.C. Cir. 1983) nonfinal rulemaking action can be ripe for review; LBP-15-15, 81 NRC 612 (2015) where the basis behind the determination not to proceed with a rulemaking was a final agency ruling allowing for judicial review, the earlier advance notice of proposed rulemaking itself was not held to have any binding effect on the public; LBP-15-15, 81 NRC 612 (2015)

Center for Biological Diversity v. Department of Interior, 563 F.3d. 466, 475 (D.C. Cir. 2009) if an agency determines that a particular action will have no effect on an endangered or threatened species, the consultation requirements are not triggered; LBP-12-10, 75 NRC 640 n.40, 656-57, 671 (2012)

Center for Biological Diversity v. National Highway Traffic Safety Administration, 538 F.3d 1172, 1213 (9th Cir. 2008) agency’s narrowed construction of its statutory authority, as distinct from an express prohibition by Congress, may not be used to limit the agency’s obligations under NEPA; LBP-14-9, 80 NRC 49 n.141 (2014) government agencies are required to comply with NEPA to the fullest extent possible; LBP-14-9, 80 NRC 50 (2014) NEPA’s legislative history reflects Congress’s concern that agencies might attempt to avoid any compliance with NEPA by narrowly construing other statutory directives to create a conflict with NEPA; LBP-14-9, 80 NRC 49-50 (2014)
Center for Biological Diversity v. U.S. Bureau of Land Management, 698 F.3d 1101 (9th Cir. 2012)
Biological Opinion and its accompanying Incidental Take Statement issued by the U.S. Fish and Wildlife Service were arbitrary and capricious because they were based in part on a conservation plan that was not enforceable under the Endangered Species Act; LBP-12-23, 76 NRC 468-69 (2012)

Center for Science in the Public Interest v. Regan, 727 F.2d 1161, 1170 (D.C. Cir. 1984)
exception to the mootness doctrine occurs if the challenged action is too short in duration to be litigated and there is a reasonable expectation that the same party will be subjected to the same action again; CLI-13-9, 78 NRC 558 n.26 (2013)
exception to the mootness doctrine occurs when a case is capable of repetition, yet evading review; CLI-13-10, 78 NRC 568 n.35 (2013)

Center for Special Needs Trust Administration, Inc., v. Olson, 676 F.3d 688, 698 (8th Cir. 2012)
estoppel claimant must prove a false representation by the government, that the government had the intent to induce the plaintiff to act on the misrepresentation, plaintiff’s lack of knowledge or inability to obtain the true facts, and plaintiff’s reliance on the misrepresentation to his detriment; LBP-12-16, 76 NRC 51 n.33 (2012)

Charlissa C. Smith (Denial of Senior Reactor Operator License), LBP-13-3, 77 NRC 82, 90 (2013)
“demand” for a hearing is understood to confer a right to a hearing; LBP-14-4, 79 NRC 371 (2014)

Charlissa C. Smith (Denial of Senior Reactor Operator License), LBP-13-3, 77 NRC 82, 91 (2013)
one demanding a hearing on a challenge to an enforcement order need not comply with the section 2.309(b)(1) requirements; LBP-14-4, 79 NRC 342 n.7 (2014)

in proving prejudicial error by a federal agency, it is sufficient that the agency’s error may have affected the outcome; LBP-14-2, 79 NRC 166, 175 (2014)

a court cannot defer to interpretive proposals offered by counsel at oral argument and affirm on the basis of that reading when the statute does not plainly compel the reading being proposed; CLI-11-12, 74 NRC 470 (2011)
NRC has discretion in specifying the level of foreign ownership that would constitute a violation of the Atomic Energy Act; LBP-12-19, 76 NRC 196 (2012)

NRC must consider varying interpretations and the wisdom of its policy on a continuing basis; LBP-14-4, 79 NRC 375 n.73 (2014)

Churchill County v. Norton, 276 F.3d 1060, 1076 (9th Cir. 2001)
connected actions are distinguished from cumulative impacts; LBP-14-6, 79 NRC 419-20 n.76 (2014)

Ciba-Geigy Corp. v. Environmental Protection Agency, 801 F.2d 430, 436 (D.C. Cir. 1986)
reviewing proposed actions improperly intrudes into NRC’s decisionmaking process; LBP-15-15, 81 NRC 610 (2015)

Cincinnati Gas and Electric Co. (William H. Zimmer Nuclear Power Station, Unit 1), CLI-82-20, 16 NRC 109 (1982)
although Commission approval is required before a board exercises its sua sponte authority, that authority still exists; LBP-14-9, 80 NRC 66 (2014)

Cincinnati Gas and Electric Co. (William H. Zimmer Nuclear Power Station, Unit 1), CLI-82-20, 16 NRC 109, 110 (1982)
Commission ordered a licensing board not to exercise sua sponte authority because the Commission had already initiated an ongoing investigation to deal with the issues raised; LBP-14-9, 80 NRC 68 n.231 (2014)

agencies need only discuss those alternatives that are reasonable and will bring about the ends of the proposed action; CLI-12-5, 75 NRC 339, 343 (2012); LBP-11-13, 73 NRC 553 n.114 (2011)
NRC Staff’s environmental impact statement need only discuss those alternatives that will bring about the ends of the proposed action; LBP-12-15, 76 NRC 38 n.8 (2012)
under the rule of reason governing NEPA, the concept of alternatives must be bounded by some notion of feasibility; CLI-12-15, 75 NRC 724 (2012)
when the purpose is to accomplish one thing, it makes no sense to consider the alternative ways by which another thing might be achieved; CLI-12-5, 75 NRC 343 (2012)
LEGAL CITATIONS INDEX

CASES

Citizens Against Burlington, Inc. v. Busey, 938 F.2d 190, 195-96 (D.C. Cir. 1991)
reasonable alternatives under NEPA are limited to those alternatives that will bring about the ends of
the proposed action; LBP-11-21, 74 NRC 137 (2011)

Citizens Against Burlington, Inc. v. Busey, 938 F.2d 190, 197-98 (D.C. Cir.), cert. denied, 502 U.S. 994
(1991)
NRC gives substantial weight to the preferences of the applicant and/or sponsor; CLI-12-5, 75 NRC
339 (2012)

Citizens Against Burlington, Inc. v. Busey, 938 F.2d 190, 201 (D.C. Cir. 1991)
agency does not have to follow EPA’s comments, just take them seriously; LBP-14-9, 80 NRC 51
n.152 (2014)

Citizens Against Burlington, Inc. v. Busey, 938 F.2d 190, 209 (D.C. Cir. 1991) (Buckley, J., dissenting)
NEPA requires agencies to exercise a degree of skepticism in dealing with self-serving statements
from the prime beneficiary of a project and to look at the general goal of the project, rather than
only those alternatives preferred by the applicant; LBP-12-17, 76 NRC 114 (2012)

NRC Staff cannot release NEPA documents that blindly parallel the applicant’s information and
omissions and then be allowed to argue that applicant’s omissions prevent filing of new contentions
concerning the newly released NEPA document; LBP-13-9, 78 NRC 59 (2013)

Citizens Awareness Network, Inc. v. NRC, 59 F.3d 284, 291 (1st Cir. 1995)
to avoid a finding of arbitrary and capricious agency action, NRC Staff may not depart from its
established policies, procedures, and practices without a reasonable explanation for the change;
LBP-14-2, 79 NRC 150 n.87 (2014)

Citizens Awareness Network, Inc. v. NRC, 59 F.3d 284, 292 (1st Cir. 1995)
Commission examines whether agency actions constituted de facto license amendments; CLI-14-11, 80
NRC 174 n.33 (2014)

Citizens Awareness Network, Inc. v. NRC, 59 F.3d 284, 294 (1st Cir. 1995)
by its nature a license is presumptively an exclusive (not an inclusive) regulatory device; LBP-13-7,
77 NRC 332 n.39 (2013)

Citizens Awareness Network, Inc. v. NRC, 59 F.3d 284, 294-95 (1st Cir. 1995)
if AEA §189a is to serve its intended purpose, surely it contemplates that parties in interest be
afforded a meaningful opportunity to request a hearing before the Commission retroactively re invents
the terms of an extant license by voiding its implicit limitations on the licensee’s conduct;
LBP-13-7, 77 NRC 327 (2013)

Citizens Awareness Network, Inc. v. NRC, 59 F.3d 284, 295 (1st Cir. 1995)
actions by the NRC Staff constitute a de facto license amendment when they authorize a licensee to
engage in activities beyond the scope of its original license; LBP-13-7, 77 NRC 339 n.49 (2013)
factors material to determining whether NRC actions constitute a de facto license amendment are
described; LBP-13-7, 77 NRC 332 (2013)

NRC expressly altered the policy and application of 10 C.F.R. 50.59 as it related to decommissioning
activities, permitting licensee to dismantle major structural components without prior NRC approval
of a final decommissioning plan; CLI-15-14, 81 NRC 734 n.21 (2015)
regulated conduct that is neither delineated nor reasonably encompassed within delineated categories of
authorized conduct presumptively remains unlicensed; LBP-13-7, 77 NRC 332 n.39 (2013)
substance of the NRC action determines entitlement to a section 189a hearing, not the particular label
that NRC chooses to assign to its action; LBP-13-7, 77 NRC 326 (2013)

Citizens Awareness Network, Inc. v. NRC, 391 F.3d 338, 343 (1st Cir. 2004)
in 1982, NRC started to relax the procedural requirements for certain types of proceedings; LBP-11-8,
73 NRC 358 (2011)
the Atomic Energy Act requirement that NRC grant a hearing upon the request of any person whose
interest may be affected by certain agency proceedings is interpreted as requiring formal
Administrative Procedure Act § 554 on-the-record hearings; LBP-11-8, 73 NRC 358 (2011)

Citizens Awareness Network, Inc. v. NRC, 391 F.3d 338, 344 (1st Cir. 2004)
the Atomic Energy Act does not mandate on-the-record hearings for reactor licensing proceedings and
the Commission therefore has the option of replacing existing procedural requirements with more
informal ones; LBP-11-8, 73 NRC 358 (2011)
LEGAL CITATIONS INDEX
CASES

Citizens Awareness Network, Inc. v. NRC, 391 F.3d 338, 351 (1st Cir. 2004)
NRC’s new procedural rules meet the requirements for Administrative Procedure Act § 554
on-the-record formal hearings but the question of whether the Atomic Energy Act requires NRC
hearings to be on-the-record was not resolved; LBP-11-8, 73 NRC 359 (2011)

Citizens Awareness Network, Inc. v. NRC, 391 F.3d 338, 354 (1st Cir. 2004)
once a legally protectable interest is shown and intervenors are admitted as parties, the procedural
rules cannot be administered so as to deprive intervenors of their interest in such rights without due
process of law, or without arguably running afoul of the Administrative Procedure Act; LBP-11-4,
73 NRC 125 n.147 (2011)
should the agency’s administration of its new procedural rules contradict its present representations
that cross-examination will be allowed under the rules when required for a full and true disclosure
of the facts or otherwise flout this principle, the rules may be subject to future challenges;
LBP-11-4, 73 NRC 125 n.147 (2011)
there is no fundamental right to participate in administrative adjudications; LBP-11-4, 73 NRC 125
n.147 (2011)

Citizens Awareness Network, Inc. v. NRC, 391 F.3d 338, 355 (1st Cir. 2004)
the Commission’s action in adopting new procedural rules meets the rational basis test; LBP-11-4, 73
NRC 125 n.147 (2011)
the Court applied a rational basis review to intervenor’s challenge to NRC’s 2004 changes to its
procedural rules, citing cases involving challenges to laws regulating aspects of prisoners’ right to
access to the courts; LBP-11-4, 73 NRC 125 n.147 (2011)

Citizens’ Committee to Save Our Canyons v. U.S. Forest Service, 297 F.3d 1012, 1030 (10th Cir. 2002)
agencies are not permitted to define the objectives of a proposed action so narrowly as to preclude a
reasonable consideration of alternatives; LBP-12-17, 76 NRC 114 (2012)

Citizens for a Better Henderson v. Hodel, 768 F.2d 1051, 1057 (9th Cir. 1985)
NEPA-required alternatives discussion need not include every possible alternative, but rather every
reasonable alternative; LBP-15-3, 81 NRC 104 (2015)

Citizens for Safe Power, Inc. v. NRC, 524 F.2d 1291, 1294 n.5 (D.C. Cir. 1975)
appeal board’s ruling that the environmental impact statement was deemed modified by the parties’
stipulations at hearing did not violate the letter or spirit of NEPA; CLI-15-6, 81 NRC 388 n.255
(2015)
environmental impact statements are effectively amended through the adjudicatory process; LBP-12-17,
76 NRC 83 (2012); LBP-14-9, 80 NRC 67 (2014)

Citizens for Safe Power, Inc. v. NRC, 524 F.2d 1291, 1299 (D.C. Cir. 1975)
Atomic Energy Act and National Environmental Policy Act and the regulations promulgated under
each must be viewed in pari materia; LBP-14-9, 80 NRC 55 n.172 (2014)

City of Carmel-by-the-Sea v. Department of Transportation, 123 F.3d 1142, 1150-51 (9th Cir. 1997)
taking a hard look at environmental impacts fosters both informed decisionmaking and informed public
participation and ensures that the agency does not act upon incomplete information, only to regret its
decision after it is too late to correct; LBP-13-13, 78 NRC 452 (2013)

City of Carmel-by-the-Sea v. Department of Transportation, 123 F.3d 1142, 1152 (9th Cir. 1997)
Clean Water Act 404 permit review can be conducted after issuance of a final environmental impact
that the Clean Water Act section 404 permit review is conducted after issuance of the final
environmental impact statement does not impact an agency’s duty under NEPA, but rather serves to
highlight the distinction between NEPA and the CWA; LBP-15-23, 82 NRC 63 (2015)

City of Carmel-by-the-Sea v. Department of Transportation, 123 F.3d 1142, 1155 (9th Cir. 1997)
applicant’s alternatives analysis need not discuss every conceivable alternative to the proposed action,
but rather only feasible, nonspeculative, and reasonable alternatives; LBP-11-13, 73 NRC 553 (2011)

City of Davis v. Coleman, 521 F.2d 661, 667 (9th Cir. 1975)
compliance with NEPA is a primary duty of every federal agency, and fulfillment of this
responsibility should not depend on vigilance and limited resources of environmental plaintiffs;
LBP-12-18, 76 NRC 166 (2012)
City of Grapevine v. Department of Transportation, 17 F.3d 1502, 1506 (D.C. Cir. 1994)

although an agency’s alternatives analysis should reflect applicant’s goals, the underlying goal should not be purposefully narrowed to predetermine the outcome; LBP-12-17, 76 NRC 114 (2012)

NRC gives substantial weight to the preferences of the applicant and/or sponsor; CLI-12-5, 75 NRC 339 (2012)

reasonable alternatives under NEPA are limited to those alternatives that will bring about the ends of the proposed action; LBP-11-21, 74 NRC 137 (2011)

City of Las Vegas v. Federal Aviation Administration, 570 F.3d 1109, 1115 (9th Cir. 2009)

agencies are responsible for taking a hard look at the project’s effect on safety as well as the environment; LBP-12-18, 76 NRC 160-61 (2012)

impact of a proposed action on public safety is an issue that must be considered under the National Environmental Policy Act as well as the Atomic Energy Act; LBP-12-18, 76 NRC 138 (2012)

City of Los Angeles v. Adams, 556 F.2d 40, 49-50 (D.C. Cir. 1977)

if Congress does not appropriate enough money to meet the needs of a class of beneficiaries prescribed by Congress, and if Congress is silent on how to handle this predicament, the law sensibly allows the administering agency to establish reasonable priorities and classifications; CLI-13-8, 78 NRC 226 n.29 (2013)

City of New York v. U.S. Department of Transportation, 715 F.2d 732, 742 (2d Cir. 1983)

project goals determine the alternatives that are considered reasonable; LBP-12-17, 76 NRC 113 (2012)

City of Oxford v. Federal Aviation Administration, 428 F.3d 1346, 1356 n.22 (11th Cir. 2005)

in context of cumulative impact analysis, regulations ask whether future actions are foreseeable, not whether they are interdependent; LBP-14-6, 79 NRC 421 (2014)

rather than being determinative, interdependence of proposed actions with potential future actions should be considered alongside other pertinent facts and circumstances to determine whether there is a sufficient likelihood that an action will occur to render that action foreseeable; LBP-14-6, 79 NRC 421 (2014)

City of Tenakee Springs v. Clough, 915 F.2d 1308, 1310 (9th Cir. 1990)

agency violates NEPA by failing to rigorously explore and objectively evaluate all reasonable alternatives to the proposed action; LBP-15-15, 81 NRC 607 (2015)

City of West Chicago v. NRC, 701 F.2d 632, 638 (7th Cir. 1983)

NRC may hold an informal hearing in which it requests and considers written materials without providing for traditional trial-type procedures such as oral testimony and cross-examination; LBP-11-4, 73 NRC 124 n.147 (2011)

City of West Chicago v. NRC, 701 F.2d 632, 642 (7th Cir. 1983)

formal adjudicatory procedures are inappropriate in export or import licensing proceedings; CLI-11-3, 73 NRC 623-24 n.53 (2011)

City of West Chicago v. NRC, 701 F.2d 632, 644 n.11 (7th Cir. 1983)

if a formal adjudicatory hearing is mandated by the due process clause, the absence of the on-the-record requirement will not preclude application of the Administrative Procedure Act; LBP-11-8, 73 NRC 361 (2011)

City of West Chicago v. NRC, 701 F.2d 632, 645 (7th Cir. 1983)

health, safety, and environmental concerns do not constitute liberty or property subject to due process protection; LBP-11-4, 73 NRC 124-25 n.147 (2011)

intervenors in reactor licensing proceedings ordinarily cannot raise constitutional due process issues with respect to NRC hearing procedures, inasmuch as intervenors cannot claim government deprivation of life, liberty or property as a result of the NRC’s licensing action; LBP-11-4, 73 NRC 124 n.147 (2011)

City of West Chicago v. NRC, 701 F.2d 632, 647 (7th Cir. 1983)

NRC possesses the authority to change its procedures on a case-by-case basis; CLI-13-8, 78 NRC 233 n.68 (2013)

City of West Chicago v. NRC, 701 F.2d 632, 650 (7th Cir. 1983)

failure to include all connected actions within the scope of the proposed action is generally referred to as segmentation; LBP-14-6, 79 NRC 421 (2014)
segmentation is to be avoided in order to ensure that interrelated projects, the overall effect of which is environmentally significant, not be fractionalized into smaller, less significant actions; LBP-12-12, 75 NRC 778 n.204 (2012); LBP-14-9, 80 NRC 41 (2014)

segmentation or piecemealing occurs when an action is divided into component parts, each involving action with less significant environmental effects; LBP-14-6, 79 NRC 354 (2014)

to be adversely affected or aggrieved within the meaning of a statute, plaintiff must establish that the injury complained of falls within the zone of interests sought to be protected by the statutory provision whose violation forms the legal basis for the complaint; LBP-14-4, 79 NRC 353 (2014)

NRC is to look to federal law in applying the zone-of-interests test; LBP-14-4, 79 NRC 353 (2014) where plaintiff is not itself the subject of the contested regulatory action, the zone-of-interests test denies a right of review if plaintiff’s interests are so marginally related to or inconsistent with the purposes implicit in the statute that it cannot be assumed that Congress intended to permit the suit; LBP-14-4, 79 NRC 328 n.44, 354 (2014)

zone-of-interests test is not meant to be especially demanding, there being no indication of congressional purpose to benefit the would-be plaintiff; LBP-14-4, 79 NRC 355 (2014)

equal protection principles require that all persons similarly situated shall be treated alike; LBP-11-15, 73 NRC 639 n.20 (2011)

Cleveland Electric Illuminating Co. (Perry Nuclear Power Plant, Unit 1), CLI-93-21, 38 NRC 87, 89 (1993)

pressurized water reactor pressure vessel surveillance program relies on physical material samples, also known as specimens, capsules, or coupons; LBP-15-17, 81 NRC 761 (2015)

Cleveland Electric Illuminating Co. (Perry Nuclear Power Plant, Unit 1), CLI-93-21, 38 NRC 87, 89, 90 (1993)

proximity presumption applied where petitioners’ contention concerned a license amendment to move the schedule for withdrawal of reactor vessel material specimens from the technical specifications to the updated safety analysis report; LBP-15-17, 81 NRC 773 (2015)

Cleveland Electric Illuminating Co. (Perry Nuclear Power Plant, Unit 1), CLI-93-21, 38 NRC 87, 91 (1993)

if a license were amended, the publics only means to participate in future schedule changes would be through a request for action under 10 C.F.R. 2.206; LBP-15-17, 81 NRC 773 n.124 (2015)

Cleveland Electric Illuminating Co. (Perry Nuclear Power Plant, Unit 1), CLI-93-21, 38 NRC 87, 92 (1993)

contemporaneous judicial concepts of standing are applied in NRC proceedings; LBP-15-17, 81 NRC 770 (2015); LBP-15-19, 81 NRC 819 (2015)

in determining standing, NRC asks whether an interest arguably within the zone of interests protected by the governing statute has been injured; LBP-14-4, 79 NRC 372 n.62 (2014)

NRC generally applies traditional judicial standing concepts which require a showing that the individual has suffered or might suffer a concrete and particularized injury that is fairly traceable to the challenged action, likely redressible by a favorable decision, and arguably within the zone of interests protected by the governing statutes; LBP-11-2, 73 NRC 40 (2011); LBP-11-13, 73 NRC 546 (2011); LBP-11-29, 74 NRC 616 (2011)

under judicial concepts of standing, petitioner must allege a concrete and particularized injury that is fairly traceable to the challenged action and is likely to be redressed by a favorable decision; LBP-15-5, 81 NRC 255-56 (2015); LBP-15-13, 81 NRC 463 (2015); LBP-15-17, 81 NRC 770 (2015)

Cleveland Electric Illuminating Co. (Perry Nuclear Power Plant, Unit 1), CLI-93-21, 38 NRC 87, 95 (1993)

in cases involving the possible construction or operation of a nuclear power reactor, the NRC considers proximity to the proposed facility to be sufficient to establish standing; LBP-11-16, 73 NRC 653 (2011)

petitioners had proximity-based standing even though they did not provide a reactor vessel failure scenario; LBP-15-17, 81 NRC 774 (2015)

Cleveland Electric Illuminating Co. (Perry Nuclear Power Plant, Unit 1), CLI-93-21, 38 NRC 87, 95-96 (1993)

license amendments related to reactor pressure vessel embrittlement present an obvious potential for offsite public health and safety consequences; LBP-15-17, 81 NRC 773 (2015)
material condition of a plant’s reactor vessel obviously bears on the health and safety of those members of the public who reside in the plant’s vicinity; LBP-15-20, 81 NRC 837 (2015)

*Cleveland Electric Illuminating Co.* (Perry Nuclear Power Plant, Unit 1), CLI-96-13, 44 NRC 315, 317 (1996)

long-term exposure to neutron radiation and elevated temperatures in a reactor vessel decrease the vessel materials’ fracture toughness; LBP-15-20, 81 NRC 832-33 (2015)

Part 50, Appendix H directs licensees to attach a particular number of surveillance capsules to specified areas within the reactor vessel; LBP-15-20, 81 NRC 838 (2015)

*Cleveland Electric Illuminating Co.* (Perry Nuclear Power Plant, Unit 1), CLI-96-13, 44 NRC 315, 319 (1996)

because technical specifications are an integral part of an operating license, changes to technical specifications require a license amendment; LBP-13-7, 77 NRC 332 n.39 (2013)

*Cleveland Electric Illuminating Co.* (Perry Nuclear Power Plant, Unit 1), CLI-96-13, 44 NRC 315, 320 (1996)

updated final safety analysis reports can be modified without a license amendment as long as the modifications do not involve a change to the technical specifications or an unreviewed safety question; LBP-13-7, 77 NRC 332 n.39 (2013)

*Cleveland Electric Illuminating Co.* (Perry Nuclear Power Plant, Unit 1), CLI-96-13, 44 NRC 315, 321 (1996)

de facto license amendment proceeding is not initiated merely because licensee takes an action that requires some type of NRC approval; LBP-15-27, 82 NRC 191 (2015)

license amendment is not required to change the reactor vessel surveillance capsule testing schedule; LBP-15-20, 81 NRC 842 (2015)

*Cleveland Electric Illuminating Co.* (Perry Nuclear Power Plant, Unit 1), CLI-96-13, 44 NRC 315, 322 (1996)

nature of a reactor vessel surveillance capsule withdrawal schedule is such that modifications may need to be made; LBP-15-20, 81 NRC 842 (2015)

*Cleveland Electric Illuminating Co.* (Perry Nuclear Power Plant, Unit 1), CLI-96-13, 44 NRC 315, 326 (1996)

agency actions not formally labeled as license amendments nevertheless can constitute de facto license amendments and accordingly trigger hearing rights for the public under Atomic Energy Act § 189a; CLI-15-5, 81 NRC 334 (2015); CLI-15-14, 81 NRC 741 (2015)

agency approval or authorization is a necessary component of NRC action that affords a hearing opportunity under AEA § 189a, but not all agency approvals granted to licensees constitute de facto license amendments; CLI-14-11, 80 NRC 173 (2014)

Commission examines whether agency actions constituted de facto license amendments; CLI-14-11, 80 NRC 174 n.33 (2014)

key factors to consider when determining whether agency action constitutes a de facto license amendment are whether the agency action granted licensee any greater authority or otherwise altered the original terms of the license; CLI-14-11, 80 NRC 174 n.33 (2014); CLI-15-5, 81 NRC 334 (2015)

NRC oversight activities gathering information about and evaluating plant performance, regardless of the findings it makes, do not alter the conditions of a license and therefore cannot form the basis for the right to request a hearing; CLI-14-11, 80 NRC 175 (2014)

*Cleveland Electric Illuminating Co.* (Perry Nuclear Power Plant, Unit 1), CLI-96-13, 44 NRC 315, 326-27 (1996)

analytic framework for assessing whether a confirmatory action letter process constitutes a de facto license amendment proceeding is provided; LBP-13-7, 77 NRC 332 (2013)

*Cleveland Electric Illuminating Co.* (Perry Nuclear Power Plant, Unit 1), CLI-96-13, 44 NRC 315, 326-28 (1996)

scope of the referral is limited to whether NRC granted licensee greater authority than that provided by its existing licenses or otherwise altered the terms of its existing licenses, thereby entitling petitioner to an opportunity to request a hearing; CLI-15-14, 81 NRC 734 (2015)
Cleveland Electric Illuminating Co. (Perry Nuclear Power Plant, Unit 1), CLI-96-13, 44 NRC 315, 327 (1996)
actions by NRC Staff constitute a de facto license amendment when they authorize a licensee to engage in activities beyond the scope of its original license; LBP-13-7, 77 NRC 339 n.49 (2013)
any changes to the material specimen withdrawal schedule that conform to the ASTM standard referenced in Appendix H will not alter the plant’s license; LBP-15-20, 81 NRC 842 (2015)
Cleveland Electric Illuminating Co. (Perry Nuclear Power Plant, Unit 1), CLI-96-13, 44 NRC 315, 328 (1996)
ASTM Standard E 185 anticipates that during the course of a nuclear power plant’s life the surveillance capsule withdrawal schedule may need to be revised and allows and provides for such changes; LBP-15-20, 81 NRC 842 (2015)
de facto license amendment would exist, and hearing rights would be triggered, if NRC were to grant licensee greater operating authority or otherwise alter terms of the license or permit licensee to go beyond its existing license authority; LBP-15-27, 82 NRC 191 (2015)
where NRC approval does not permit licensee to operate in any greater capacity than originally authorized and all relevant safety regulations and license terms remain applicable, NRC approval does not amend the license; LBP-15-27, 82 NRC 191 (2015)
board is directed to consider whether a confirmatory action letter issued to licensee constitutes a de facto license amendment that would be subject to a hearing opportunity under AEA § 189a, and, if so, whether the petition meets standing and contention admissibility requirements; LBP-12-20, 76 NRC 441 (2012)
rules of interpretation applicable to statutes are equally germane in determining a regulation’s meaning; LBP-13-3, 77 NRC 92 n.53 (2013)
where the meaning of a regulation is clear and obvious, the regulatory language is conclusive, and the board may not disregard the letter of the regulation, but rather must enforce the regulation as written; LBP-14-7, 79 NRC 473 (2014)
Cleveland Electric Illuminating Co. (Perry Nuclear Power Plant, Units 1 and 2), ALAB-443, 6 NRC 741, 753-54 (1977)
summary disposition proponent bears the burden of establishing that no facts remain in dispute, even if the motion is unopposed; LBP-12-26, 76 NRC 564 (2012)
Cleveland Electric Illuminating Co. (Perry Nuclear Power Plant, Units 1 and 2), ALAB-443, 6 NRC 741, 754 (1977)
if summary disposition proponent meets its burden, the party opposing the motion must set forth specific facts showing that there is a genuine issue, and may not rely on mere allegations or denials, but no defense to an insufficient showing is required; LBP-11-7, 73 NRC 263 (2011); LBP-11-14, 73 NRC 595 (2011)
no defense to an insufficient showing for summary disposition is required; LBP-12-19, 76 NRC 190 (2012); LBP-12-23, 76 NRC 450 (2012)
Cleveland Electric Illuminating Co. (Perry Nuclear Power Plant, Units 1 and 2), ALAB-443, 6 NRC 741, 755 (1977)
affidavits shall set forth such facts as would be admissible in evidence and shall show affirmatively that the affiant is competent to testify to the matters stated therein; LBP-11-23, 74 NRC 332 (2011)
quality assurance programs establish measures to ensure that conditions adverse to quality are promptly identified and corrected; LBP-12-23, 76 NRC 476 (2012)

quality assurance programs must establish measures to ensure that conditions adverse to quality are promptly identified and corrected; LBP-14-7, 79 NRC 470 (2014)

Cleveland Electric Illuminating Co. (Perry Nuclear Power Plant, Units 1 and 2), ALAB-820, 22 NRC 743, 746 n.8 (1985)

upon a strong showing of irreparable injury, stay movant need not always establish a high probability of success on the merits; LBP-15-2, 81 NRC 54 (2015)

quality assurance programs must establish measures to ensure that conditions adverse to quality are promptly identified and corrected; LBP-14-7, 79 NRC 470 (2014)

Cleveland Electric Illuminating Co. (Perry Nuclear Power Plant, Units 1 and 2), ALAB-841, 24 NRC 64, 95 (1986)

Cleveland Electric Illuminating Co. (Perry Nuclear Power Plant, Units 1 and 2), LBP-82-79, 16 NRC 1116, 1118 (1982)

licensing boards may request Commission approval to consider the merits of a serious environmental issue even when it was excluded from the proceeding for procedural reasons; LBP-14-9, 80 NRC 38 (2014)

Coalition of Arizona/New Mexico Counties for Stable Economic Growth v. Department of Interior, 100 F.3d 837, 840-41 (10th Cir. 1996)

a prospective intervenor must show a direct, substantial, and legally protectable interest, the test for which is primarily a practical guide to disposing of lawsuits by involving as many apparently concerned persons as is compatible with efficiency and due process; LBP-11-4, 73 NRC 125 n.147 (2011)

cursory and conclusory assertions that merely paraphrase the standards applicable to the deliberative process privilege without explaining how they apply to any specific document in dispute will not suffice to carry the government’s burden of proof in defending FOIA cases; LBP-13-5, 77 NRC 243, 247 (2013)

in attempting to assert agency privilege, NRC Staff must remember that the burden is on it to establish its right to withhold information from the public and it must supply sufficient information to allow the decisionmaker to make a reasoned determination that it was correct; LBP-13-5, 77 NRC 242 (2013)

Cogema Mining, Inc. (Irigary and Christensen Ranch Facilities), LBP-09-13, 70 NRC 168, 191 (2009)

petitioner’s claim of organizational standing is of the sort that repeatedly have been found insufficient; CLI-12-12, 75 NRC 606 n.6 (2012)

Cohen v. de la Cruz, 523 U.S. 213, 220 (1998)

equivalent words have equivalent meaning when repeated in the same statute; LBP-13-3, 77 NRC 91-92 (2013)

Cohens v. State of Virginia, 19 U.S. 264, 399-400 (1821)

dicta ought not to control the judgment in a subsequent suit when the very point is presented for decision; LBP-14-4, 79 NRC 360 n.39 (2014)
LEGAL CITATIONS INDEX

CASES

Coliseum Square Ass’n, Inc. v. Jackson, 465 F.3d 215, 237-38 (5th Cir. 2006)
reasonable foreseeability test for cumulative impacts is applied; LBP-14-6, 79 NRC 421 (2014)

although public officials are afforded a presumption of regularity in the discharge of their duties, if facts before the board do not appear regular, then the presumption does not attach; LBP-14-2, 79 NRC 151 (2014)

Colorado Environmental Coalition v. Dombeck, 185 F.3d 1162, 1174 (10th Cir. 1999)
NEPA requires that an actual range of alternatives be considered, so that the Act will preclude agencies from defining the objectives of their actions in terms so unreasonably narrow that they can be accomplished by only applicant’s proposed project; LBP-15-15, 81 NRC 607 n.57 (2015)

NEPA’s purpose is to influence the decisionmaking process by focusing the federal agency’s attention on the environmental consequences of a proposed project, so as to ensure that important effects will not be overlooked or underestimated only to be discovered after resources have been committed or the die otherwise cast; LBP-14-9, 80 NRC 56 (2014)
when a decision to which NEPA obligations attach is made without the informed environmental consideration that NEPA requires, the harm that NEPA intends to prevent has been suffered; LBP-14-9, 80 NRC 56 (2014)

activities that have sufficient federal involvement to qualify as federal actions must be included in the scope of the proposed action evaluated in an environmental impact statement; LBP-14-9, 80 NRC 47-48 n.127 (2014)

grounds were found for litigation regarding defendants’ assertion that treatment of highway interchanges and village development as cumulative impacts in the final environmental impact statement was sufficient under NEPA even if these actions should have been treated as connected actions under the statute’s implementing regulations; LBP-14-9, 80 NRC 56-57 (2014)

heated debate would not have occurred unless the label attached to the actions made a difference to the content, scope, and/or depth of environmental analysis; LBP-14-9, 80 NRC 57 (2014)

Comcast Corp. v. Federal Communications Commission, 526 F.3d 763, 769 n.2 (D.C. Cir. 2008)
courts presume that federal agencies act in good faith; LBP-11-39, 74 NRC 868 n.21 (2011)

Commonwealth Edison Co. (Braidwood Nuclear Power Station, Units 1 and 2), ALAB-874, 26 NRC 156, 158 (1987)
stare decisis is not implicated where the board decision is unreviewed and therefore not binding on future tribunals, but as a prudential matter, the Commission vacates such decisions when appellate review is cut short by mootness; CLI-13-9, 78 NRC 558-59 (2013)

Commonwealth Edison Co. (Byron Nuclear Power Station, Units 1 and 2), ALAB-659, 14 NRC 983, 985 (1981)
it is not customary for an appeal to proceed through at least the briefing process while the trial tribunal has before it an authorized and timely filed petition for reconsideration of the decision or order in question; CLI-12-5, 75 NRC 306 n.23 (2012)

Commonwealth Edison Co. (Byron Nuclear Power Station, Units 1 and 2), ALAB-770, 19 NRC 1163, 1169 (1984)
licensing board was not justified in rendering a final judgment in the face of unfolding developments having a deciding bearing and conceivably crucial effect on the issue that shaped that judgment; LBP-12-19, 76 NRC 203 (2012)

Commonwealth Edison Co. (Dresden Nuclear Power Station, Unit 1), CLI-81-25, 14 NRC 616, 624 (1981)
scope of any hearing should include the proposed license amendments, and any health, safety, or environmental issues fairly raised by them; LBP-12-25, 76 NRC 552 (2012)

Commonwealth Edison Co. (Zion Nuclear Power Station, Units 1 and 2), 4 AEC 231, 233 (1969)
if allegations are accurate that applicant is subject to foreign direction, it would be reasonable to expect that there would be manifestations of this in the corporate organization and management and that there would be recognition of such circumstances by those corporate officers who must furnish
the Commission with the sworn information prescribed by 10 C.F.R. 50.33; LBP-14-3, 79 NRC 303 (2014)

Commonwealth Edison Co. (Zion Nuclear Power Station, Units 1 and 2), ALAB-226, 8 AEC 381, 406 (1974)
where contentions are defective for any reason, licensing boards have no duty to make them acceptable under 10 C.F.R. 2.309; LBP-12-3, 75 NRC 206 n.35 (2012); LBP-13-9, 78 NRC 101 (2013)

Commonwealth Edison Co. (Zion Nuclear Power Station, Units 1 and 2), ALAB-226, 8 AEC 381, 406 (1974)
Congress intentionally limited the opportunity for a hearing to certain designated agency actions which do not include exemptions; LBP-15-18, 81 NRC 797 n.20 (2015); LBP-15-24, 82 NRC 76 n.38 (2015)
exemption did not modify the license because the ability to request an exemption is part of the license itself; LBP-15-24, 82 NRC 103 n.227 (2015)
rule exemption requests are not entitled to a hearing under AEA § 189a; CLI-13-1, 77 NRC 10 n.36 (2013)

Commonwealth Edison Co. (Zion Nuclear Power Station, Units 1 and 2), CLI-00-5, 51 NRC 90, 94-98 (2000)
if petitioner’s factual claims in support of its standing are contested, untenable, conjectural, or conclusory, a board need not uncritically accept such assertions, but may weigh those informational claims and exercise its judgment about whether standing has been satisfied; LBP-12-3, 75 NRC 177-78 (2012); LBP-13-6, 77 NRC 270 (2013)

Commonwealth Edison Co. (Zion Nuclear Power Station, Units 1 and 2), CLI-99-4, 49 NRC 185, 191 (1999)
in license amendment proceedings, petitioners may not claim standing simply upon a residence or visits near the plant unless the proposed action quite obviously entails an increased potential for offsite consequences; LBP-11-29, 74 NRC 616 (2011)

Commonwealth Edison Co. (Zion Nuclear Power Station, Units 1 and 2), CLI-99-4, 49 NRC 185, 191 (1999)
proximity presumption applies in more limited license amendment proceedings only if the proposed amendment obviously entails an increased potential for offsite consequences; LBP-15-17, 81 NRC 770-71 (2015)

Commonwealth Edison Co. (Zion Nuclear Power Station, Units 1 and 2), CLI-99-4, 49 NRC 185, 194 (1999)
burden of setting forth a clear and coherent argument for standing is generally on petitioner, but pro se petitioner is not held to the same standards of clarity and precision to which a lawyer might reasonably be expected to adhere; CLI-15-25, 82 NRC 394 (2015)
neither the Commission nor the board should be expected to sift through a lengthy document in search of asserted factual support that petitioner has not specified; CLI-12-5, 75 NRC 332 (2012)

Commonwealth of Massachusetts v. Watt, 716 F.2d 946 at 953 (1st Cir. 1983)
when a decision is made without the information that NEPA seeks to put before the decision maker, the harm that NEPA seeks to prevent occurs; LBP-13-6, 77 NRC 296-97 (2013)

Communities, Inc. v. Busey, 956 F.2d 619, 626 (6th Cir. 1992)
agency NEPA requirements are tempered by a practical rule of reason; LBP-11-18, 74 NRC 38 (2011)

Communities, Inc. v. Busey, 956 F.2d 619, 627 (6th Cir. 1992)
"connected actions" are defined as those that lack independent utility; LBP-14-9, 80 NRC 41 (2014)
discussion of alternatives that present severe engineering requirements or are imprudent for reasons including their high cost, safety hazards, and operational difficulties are excluded under NEPA; LBP-15-3, 81 NRC 104-05 (2015)
reasonable alternatives under NEPA do not include alternatives that are impractical, that present unique problems, or that cause extraordinary costs; LBP-15-3, 81 NRC 104 (2015)
preponderance-of-the-evidence standard requires the trier of fact to believe that the existence of a fact is more probable than its nonexistence; LBP-14-3, 79 NRC 278 (2014)

Connecticut Bankers Association v. Board of Governors, 627 F.2d 245, 251 (D.C. Cir. 1980)
at the admission stage, petitioners should provide a minimal showing that material facts are in dispute, thereby demonstrating that an inquiry in depth is appropriate; LBP-11-2, 73 NRC 50 n.122 (2011); LBP-11-13, 73 NRC 564 n.196 (2011); LBP-15-20, 81 NRC 850, 860 (2015); LBP-15-24, 82 NRC 90 n.139 (2015)

preamble to notice of proposed rulemaking addresses agency’s duty to identify and make available technical studies and data that it has employed in reaching the decisions to propose particular rules; LBP-15-15, 81 NRC 612-13 (2015)

labor and expense of pursuing litigation that petitioner sought to curtail do not constitute irreparable harm; CLI-11-10, 74 NRC 256 n.24 (2011)

board’s assertedly erroneous ruling does not constitute a pervasive and unusual effect on the proceeding; CLI-15-17, 82 NRC 47 (2015)
expansion of issues for litigation that results from a board action does not have a pervasive and unusual effect on the litigation; CLI-11-10, 74 NRC 256 n.24 (2011)
expansion of issues for litigation that results from admission of a contention or denial of motion for summary disposition does not have a pervasive and unusual effect on the litigation; CLI-15-17, 82 NRC 44 n.71 (2015)
rejection of contention where petitioner has other contentions pending for hearing does not constitute serious and irreparable harm or affect the structure of the proceeding in a pervasive or unusual manner; CLI-15-17, 82 NRC 37 n.23, 44 (2015)

Connecticut Yankee Atomic Power Co. (Haddam Neck Plant), CLI-03-7, 58 NRC 1, 6 (2003)
waiver petition would permit consideration of an issue in an adjudicatory proceeding that would otherwise impermissibly challenge an NRC rule or regulation; CLI-14-7, 80 NRC 6-7 n.16 (2014)

challenges to rules are appropriately lodged through a request for rulemaking; CLI-13-1, 77 NRC 9 (2013)

Consolidated Edison Co. of New York (Indian Point, Unit 2), LBP-82-1,15 NRC 37, 40 (1982)
publication of a regulation in the Federal Register constitutes notice to all persons residing in the United States; LBP-13-3, 77 NRC 97 (2013)

Consolidated Edison Co. of New York (Indian Point, Unit 2), LBP-83-5, 17 NRC 134, 136 (1983)
in NRC proceedings, pro se litigants are generally not held to the same high standards of pleading and practice as parties with counsel; LBP-11-20, 74 NRC 96 n.26 (2011); LBP-11-23, 74 NRC 333 n.23 (2011)

Consolidated Edison Co. of New York (Indian Point, Unit 3), CLI-74-28, 8 AEC 7, 8 (1974)
it is not enough, in an agency that values the hearing process and has preserved the opportunity for boards to look at matters on their own motion, just to refer safety matters to the Staff for resolution; LBP-11-9, 73 NRC 421 (2011)

Consolidated Edison Co. of New York (Indian Point, Unit 3), CLI-74-28, 8 AEC 7, 8-9 (1974)
to tie a board’s hands when it sees an issue that needs to be explored would be utterly inconsistent with its stature and the responsibility of these expert tribunals, and simply referring such a matter to the Staff for resolution would not be an adequate solution; LBP-11-9, 73 NRC 418 n.12 (2011)

Consolidated Edison Co. of New York (Indian Point, Units 1 and 2), CLI-01-19, 54 NRC 109, 129-30 (2001)
any discretionary diversion from the usual Subpart M procedural track will be rare, requiring extraordinary and unusual circumstances, and all requests to date to provide a non-Subpart M hearing in a license transfer case have been denied; CLI-14-5, 79 NRC 260 n.31 (2014)
LEGAL CITATIONS INDEX

CASEx

Consolidated Edison Co. of New York (Indian Point, Units 1 and 2), CLI-01-19, 54 NRC 109, 134 (2001)
mere notice pleading is insufficient, but requirement for contention specificity and factual support
rather than vague or conclusory statements is not intended to prevent intervention when material and

Consolidated Edison Co. of New York (Indian Point, Units 1, 2, and 3), ALAB-319, 3 NRC 188, 190
(1976)
licensing boards may raise significant environmental and safety issues sua sponte; LBP-11-23, 74 NRC
367 (2011)

Consolidated Edison Co. of New York (Indian Point, Units 1, 2, and 3), ALAB-319, 3 NRC 188, 193
(1976)
because the licensing board’s hearing had concluded and the seismic issues raised in the proceeding
had been resolved or abandoned, the adequacy of the seismic design of the facility was a matter
within the jurisdiction of the NRC Staff; LBP-11-22, 74 NRC 284 (2011)

Consolidated Edison Co. of New York (Indian Point, Units 1, 2, and 3), CLI-75-8, 2 NRC 173, 175-76
(1975)
abuse of discretion standard of review is applicable to discretionary Staff actions not subject to a
hearing opportunity; CLI-13-1, 77 NRC 29 n.158 (2013)

each organization member seeking representation must qualify for standing in his or her own right;
LBP-11-29, 74 NRC 617, 619 (2011)
interests that an organization seeks to protect must be germane to its own purpose, and neither the
asserted claim nor the requested relief must require an individual member to participate in the
organization’s legal action; LBP-11-6, 73 NRC 169 (2010); LBP-11-29, 74 NRC 617, 619 (2011);
representational standing claims must have supporting declarations from members identifying
themselves, outlining their interests, and authorizing petitioners to represent them; LBP-12-3, 75 NRC
178 n.6 (2012)
to demonstrate representational standing, an organization must show that at least one of its members
might be affected by the proceeding, identify that member by name and address, and show that the
member has authorized the organization to represent him or her and to request a hearing on his or
her behalf; LBP-11-2, 73 NRC 40 (2011); LBP-11-6, 73 NRC 169 (2010); LBP-11-13, 73 NRC 545
(2011); LBP-11-16, 73 NRC 653 (2011); LBP-11-29, 74 NRC 617 (2011); LBP-14-4, 79 NRC
327-28 (2014)

Consumers Energy Co. (Palisades Nuclear Plant), CLI-07-18, 65 NRC 399, 410 (2007)
if petitioner’s factual claims in support of its standing are contested, untenable, conjectural, or
conclusory, a board need not uncritically accept such assertions, but may weigh those informational
claims and exercise its judgment about whether standing has been satisfied; LBP-12-3, 75 NRC
177-78 (2012); LBP-13-6, 77 NRC 270 (2013)

organization that seeks representational standing must show that at least one of its members would be
affected by the proceeding, identify that member by name and address, show that the member would
have standing to intervene in his/her own right, and that identified member has authorized the
organization to request a hearing on his/her behalf; LBP-15-5, 81 NRC 256 (2015)
to demonstrate organizational standing, petitioner must show a discrete injury to the organization itself;

Consumers Energy Co. (Palisades Nuclear Plant), CLI-07-18, 65 NRC 399, 414 n.49 (2007)
contention admissibility criteria are strict by design but should not be turned into a fortress to deny
intervention; LBP-15-20, 81 NRC 855-56 (2015)

challenges based on 10 C.F.R. 50.61a and the question of whether applicant demonstrated substantial
advantage under 10 C.F.R. Part 50, Appendix H as a reason to not test capsules are beyond the
scope of a license amendment proceeding, which concerns compliance with Appendix G of 10 C.F.R. Part 50; LBP-15-20, 81 NRC 862 (2015)

**Consumers Power Co.** (Midland Plant, Units 1 and 2), ALAB-123, 6 AEC 331, 345 (1973)

although applicant carries the burden of proof on safety issues, intervenors have the initial burden of going forward with each contention and must provide sufficient evidence to support the claims made;

LBP-14-1, 79 NRC 53 (2014)

if intervenors provide sufficient evidence to support the claims made, applicant has the burden of demonstrating by a preponderance of the evidence that it has met the relevant NRC regulations and that the board should therefore reject each contention on the merits; LBP-14-1, 79 NRC 53 (2014)

**Consumers Power Co.** (Midland Plant, Units 1 and 2), ALAB-283, 2 NRC 11, 17 (1975)

although applicant carries the burden of proof on safety issues in a licensing proceeding; LBP-13-13, 78 NRC 279 (2013); LBP-14-3, 79 NRC 278 (2014)

**Consumers Power Co.** (Midland Plant, Units 1 and 2), ALAB-691, 16 NRC 897, 910 (1982)

materiality depends on whether the information is capable of influencing the decisionmaker, not on whether the decisionmaker would, in fact, have relied on it; LBP-15-24, 82 NRC 101 n.217 (2015)

**Consumers Power Co.** (Midland Plant, Units 1 and 2), ALAB-842, 24 NRC 197, 198-99 (1986)

*stare decisis* is not implicated where the board decision is unreviewed and therefore not binding on future tribunals, but as a prudential matter, the Commission vacates such decisions when appellate review is cut short by mootness; CLI-13-9, 78 NRC 558-59 (2013)

**Consumers Power Co.** (Midland Plant, Units 1 and 2), CLI-74-3, 7 AEC 7, 12 (1974)

exemption from regulations will only be issued if the license is granted; LBP-15-24, 82 NRC 82 n.82 (2015)

**Consumers Power Co.** (Midland Plant, Units 1 and 2), CLI-82-18, 16 NRC 50, 52 (1982)

in vacating decisions of the Licensing and Appeal Boards, the Commission observed that the decisions also should not be used for guidance; CLI-13-9, 78 NRC 559 n.34 (2013)

**Consumers Power Co.** (Palisades Nuclear Plant), ALAB-670, 15 NRC 493 (1982)

third-party requests for a hearing on an enforcement order have been treated as a petition for intervention under the Commission’s generally applicable rules; LBP-14-4, 79 NRC 321-22 (2014)

third-party requests for a hearing on an enforcement order have been treated as a petition for intervention under the Commission’s generally applicable rules; LBP-14-4, 79 NRC 321-22 (2014)

**Costle v. Pacific Legal Foundation,** 445 U.S. 198, 204 (1980)

lack of clarity about which electrical cables might be subject to any saltwater environment, however high or low the concentration, and about the effects of and efforts to address this, is a level of concern sufficient to warrant further inquiry and exploration; LBP-11-20, 74 NRC 113-14 (2011)
**LEGAL CITATIONS INDEX**

**CASES**

*County of Los Angeles v. Davis*, 440 U.S. 625, 631 (1979)
cases will be moot when the issues are no longer live, or the parties lack a cognizable interest in the outcome; CLI-13-9, 78 NRC 557 (2013)
general proposition that an appeal is not moot if there is a possibility of similar acts recurring in the future applies to instances where the same litigants likely will be subject to similar future action; CLI-13-9, 78 NRC 557 (2013)

*Crow Butte Resources, Inc.* (In Situ Leach Facility, Crawford, Nebraska), CLI-09-9, 69 NRC 331, 336 (2009)
absent error of law or abuse of discretion, the Commission generally defers to board rulings on contention admissibility; CLI-11-11, 74 NRC 431 (2011); CLI-12-5, 75 NRC 307 (2012); CLI-12-8, 75 NRC 397 (2012); CLI-12-10, 75 NRC 484 (2012); CLI-12-15, 75 NRC 710 (2012); CLI-14-2, 79 NRC 13-14 (2014)

*Crow Butte Resources, Inc.* (In Situ Leach Facility, Crawford, Nebraska), CLI-09-9, 69 NRC 331, 337-39 (2009)
Native American tribe’s statutorily recognized interest in tribal cultural resources that may still be extant on its recognized aboriginal lands provides a cognizable interest for the purpose of establishing its standing; LBP-13-6, 77 NRC 272 n.7 (2013)

*Crow Butte Resources, Inc.* (In Situ Leach Facility, Crawford, Nebraska), CLI-09-9, 69 NRC 331, 339 (2009)
by reason of their own standing in a proceeding, intervenors may assert any violation of law that would lead to a redress of their injuries, including their interests in seeing that the NEPA process is properly carried out or in preventing or delaying issuance of the requested combined license; LBP-12-12, 75 NRC 753 n.40 (2012)

*Crow Butte Resources, Inc.* (In Situ Leach Facility, Crawford, Nebraska), CLI-09-9, 69 NRC 331, 339-40 (2009)
there is no contention-based requirement mandating that to have standing, besides showing that a cognizable injury is associated with a proposed licensing action and that granting the relief sought will address that injury, petitioner also must establish a link between that injury and the issues it wishes to litigate in challenging an application; LBP-12-3, 75 NRC 190 n.28 (2012)

*Crow Butte Resources, Inc.* (In Situ Leach Facility, Crawford, Nebraska), CLI-09-9, 69 NRC 331, 339-41 (2009)
to have standing, petitioner need only show that a cognizable injury is associated with a proposed licensing action and that granting the relief sought will address that injury; LBP-13-6, 77 NRC 274 n.9 (2013)

*Crow Butte Resources, Inc.* (In Situ Leach Facility, Crawford, Nebraska), CLI-09-9, 69 NRC 331, 343 (2009)
standing in each agency proceeding depends on the factual circumstances associated with that case; LBP-13-6, 77 NRC 276 (2013)

*Crow Butte Resources, Inc.* (In Situ Leach Facility, Crawford, Nebraska), CLI-09-9, 69 NRC 331, 346 (2009)
one it made a determination of plausible injury from the proposed project, the board was not required to weigh the evidence to determine whether the harm to petitioners was beyond doubt; CLI-12-12, 75 NRC 613 (2012)

*Crow Butte Resources, Inc.* (In Situ Leach Facility, Crawford, Nebraska), CLI-09-9, 69 NRC 331, 348 (2009)
licensing boards should not consider premature contentions; LBP-12-19, 76 NRC 199 (2012)

*Crow Butte Resources, Inc.* (In Situ Leach Facility, Crawford, Nebraska), CLI-09-9, 69 NRC 331, 348-51 (2009)
contention alleging that an Indian tribe had not been consulted concerning cultural resources, in violation of the National Historic Preservation Act, was premature because NRC Staff, not applicant, has the duty to consult with the tribe under the Act, and Staff had not completed its review process; LBP-12-19, 76 NRC 199 (2012); LBP-12-23, 76 NRC 484-85 (2012)
contention contesting how the consultation mandate is being carried out can be raised in the first instance only after the Staff’s draft environmental impact statement; LBP-13-6, 77 NRC 287 (2013)
LEGAL CITATIONS INDEX

CASES

Crow Butte Resources, Inc. (In Situ Leach Facility, Crawford, Nebraska), CLI-09-9, 69 NRC 331, 350-51 (2009)

challenge to NRC Staff’s environmental analysis, which may come in the form of a categorical exclusion, may be filed as a timely motion to add a new contention once that analysis is complete; LBP-15-24, 82 NRC 95 (2015)

issue of the alleged failure to consult with the tribe on historic and cultural resources is material and within the scope of a materials license proceeding; LBP-13-9, 78 NRC 51 n.54 (2013); LBP-15-16, 81 NRC 643 n.143 (2015)

whether and how NRC Staff fulfills its consultation obligations are issues that could form the basis for a new contention that might appropriately be made in a timely fashion after Staff issues its draft environmental impact statement; CLI-15-18, 82 NRC 147 n.56 (2015)

Crow Butte Resources, Inc. (In Situ Leach Facility, Crawford, Nebraska), CLI-09-9, 69 NRC 331, 351 (2009)

contention claiming that NRC Staff’s consultation was inadequate does not ripen until issuance of the Staff’s draft environmental review document; CLI-14-2, 79 NRC 20 n.49 (2014)

Crow Butte Resources, Inc. (In Situ Leach Facility, Crawford, Nebraska), CLI-09-9, 69 NRC 331, 353-54 (2009)

although boards are expected to review the relevant documents to determine whether arguments presented by litigants are properly supported, the board may not substitute its own support for a contention or make arguments for the litigants that were never made by the litigants themselves; CLI-15-18, 82 NRC 149 n.74 (2015)

Crow Butte Resources, Inc. (In Situ Leach Facility, Crawford, Nebraska), CLI-09-9, 69 NRC 331, 365 (2009)

contention admissibility decisions generally are not considered to be extraordinary for purposes of interlocutory appellate review, particularly where petitioner has been admitted as a party and has other contentions pending; CLI-13-3, 77 NRC 55 (2013)

Crow Butte Resources, Inc. (In Situ Leach Facility, Crawford, Nebraska), CLI-09-9, 69 NRC 331, 365 & n.178 (2009)

piecemeal appeals during ongoing licensing board proceedings are generally disfavored; CLI-11-6, 74 NRC 210 (2011)

Crow Butte Resources, Inc. (In Situ Leach Facility, Crawford, Nebraska), CLI-09-9, 69 NRC 331, 365 & n.180 (2009)

following issuance of the board’s final dispositive decision on contentions held in abeyance, and consistent with NRC procedural rules, applicant and intervenor will have the opportunity to appeal the board’s decisions; CLI-14-3, 79 NRC 37 (2014)

Crow Butte Resources, Inc. (In Situ Leach Facility, Crawford, Nebraska), LBP-08-24, 68 NRC 691, 704 (2008), aff’d in part, rev’d in part, and remanded, CLI-09-9, 69 NRC 331 (2009)

in situ recovery process, also referred to as the in situ leach process, is described; LBP-12-3, 75 NRC 176 n.3 (2012)

Crow Butte Resources, Inc. (In Situ Leach Facility, Crawford, Nebraska), LBP-08-24, 68 NRC 691, 708-10 (2008), aff’d in part, rev’d in part, and remanded, CLI-09-9, 69 NRC 331 (2009)

when an ore zone and petitioner’s water source exist in separate aquifers, the injury/causation question is whether there is an interconnection between those aquifers; LBP-12-3, 75 NRC 181-82 n.11 (2012)

Crow Butte Resources, Inc. (In Situ Leach Facility, Crawford, Nebraska), LBP-08-24, 68 NRC 691, 709 (2008), aff’d in part and rev’d in part, CLI-09-9, 69 NRC 331 (2009)

representational standing must be based on individual standing of at least one member; LBP-13-6, 77 NRC 280-81 n.19 (2013)

Crow Butte Resources, Inc. (In Situ Leach Facility, Crawford, Nebraska), LBP-08-24, 68 NRC 691, 709 & n.77 (2008), aff’d in part, rev’d in part, and remanded, CLI-09-9, 69 NRC 331 (2009)

for petitioners claiming to be using water from the same aquifer as for the uranium ore source, regardless of distance from the facility in question, licensing boards have found that a plausible pathway connecting the proposed mining operation to their water source has been shown so as to establish petitioners’ standing; LBP-12-3, 75 NRC 181 n.11 (2012)
LEGAL CITATIONS INDEX

CASES

Crow Butte Resources, Inc. (In Situ Leach Facility, Crawford, Nebraska), LBP-08-24, 68 NRC 691, 714 (2008), aff’d in part, rev’d in part, CLI-09-9, 69 NRC 331 (2009)

board based tribe’s standing on the presence onsite of cultural resources that could be harmed as a result of mining activities; CLI-14-2, 79 NRC 14 (2014)

federal law not only recognizes that Native American tribes have a protected interest in cultural resources found on their aboriginal land, but as well has imposed on federal agencies a consultation requirement under the National Historic Preservation Act to ensure the protection of tribal interests in cultural resources; CLI-14-2, 79 NRC 14 (2014)

Crow Butte Resources, Inc. (In Situ Leach Facility, Crawford, Nebraska), LBP-08-24, 68 NRC 691, 719-24 (2008)

contention alleging a failure to protect historic and cultural resources is admissible; LBP-13-9, 78 NRC 51 n.53 (2013)

Crow Butte Resources, Inc. (Marsland Expansion Area), CLI-14-2, 79 NRC 11, 20 n.49 (2014)

contention claiming that NRC Staff’s consultation was inadequate does not ripen until issuance of Staff’s draft environmental impact statement; LBP-15-5, 81 NRC 280 n.178 (2015)

Crow Butte Resources, Inc. (Marsland Expansion Area), LBP-13-6, 77 NRC 253, 266, 267 (2013)

licensing strategy whereby applicant seeks initial in situ recovery licensing authorization to mine a particular area on which a central processing plant is located, followed thereafter by additional license amendments to cover ISR activities on contiguous or nearby areas, has been employed previously under the agency’s ISR facility licensing regime; LBP-13-10, 78 NRC 146 (2013)

Crow Butte Resources, Inc. (Marsland Expansion Area), LBP-13-6, 77 NRC 253, 286-88 (2013)

contention alleging a failure to protect historic and cultural resources is admissible; LBP-13-9, 78 NRC 51 n.53 (2013)

Crow Butte Resources, Inc. (Marsland Expansion Area), LBP-13-6, 77 NRC 253, 292 (2013), aff’d, CLI-14-2, 79 NRC 11 (2014)

requirement that a contention refer to specific portions of the application ensures that the board will be able to determine whether the contention is within the scope of the proceeding and that applicant knows which portions of the application it must defend; LBP-15-20, 81 NRC 861-62 (2015)

Crow Butte Resources, Inc. (Marsland Expansion Area), LBP-13-6, 77 NRC 253, 293 (2013), aff’d, CLI-14-2, 79 NRC 11 (2014)

requirement that a contention refer to specific portions of the application is satisfied when a commonsense reading of the petition makes abundantly clear which sections of the application petitioners are challenging, even though petitioners do not specifically cite particular sections; LBP-15-20, 81 NRC 862 (2015)

Crow Butte Resources, Inc. (North Trend Expansion Project), CLI-09-12, 69 NRC 535, 543 (2009)

board rulings on standing are given substantial deference on appeal; CLI-14-2, 79 NRC 13-14 (2014)

Commission defers to a board’s contention admissibility rulings unless the appeal points to an error of law or abuse of discretion; CLI-14-2, 79 NRC 13-14 (2014); CLI-15-18, 82 NRC 138 (2015); CLI-15-25, 82 NRC 394, 397 (2015)
LEGAL CITATIONS INDEX

CASES

Crow Butte Resources, Inc. (North Trend Expansion Project), CLI-09-12, 69 NRC 535, 544-45 (2009)
potential harm necessary to demonstrate standing in NRC proceedings need not relate to physical or bodily injury; CLI-12-12, 75 NRC 612-13 n.49 (2012)

for any new arguments or new support for a contention, a petitioner must, among other things, explain why it could not have raised the argument or introduced the factual support earlier; CLI-15-18, 82 NRC 147 n.56 (2015)

Crow Butte Resources, Inc. (North Trend Expansion Project), CLI-09-12, 69 NRC 535, 549 n.61 (2009)
good cause for failure to file on time is the most important factor of the 10 C.F.R. 2.309(c) analysis; LBP-11-2, 73 NRC 38 (2011); LBP-11-9, 73 NRC 401 (2011); LBP-11-13, 73 NRC 543 (2011); LBP-11-32, 74 NRC 662 (2011)

Crow Butte Resources, Inc. (North Trend Expansion Project), CLI-09-12, 69 NRC 535, 549-50 (2009)
lack of prejudice, standing alone, does not excuse an untimely filing, but it is a factor the Commission has considered in determining whether good cause exists; LBP-15-4, 81 NRC 164 n.40 (2015)

Crow Butte Resources, Inc. (North Trend Expansion Project), CLI-09-12, 69 NRC 535, 550-52 (2009)
boards may reformulate contentions to eliminate extraneous issues or to consolidate issues for a more efficient proceeding; LBP-11-6, 73 NRC 249 n.115 (2010)

Crow Butte Resources, Inc. (North Trend Expansion Project), CLI-09-12, 69 NRC 535, 552 (2009)
boards have some discretion to reformulate or narrow contentions to eliminate extraneous issues or to consolidate issues for a more efficient proceeding, but this authority is not without limit; CLI-15-18, 82 NRC 141 (2015); CLI-15-25, 82 NRC 401 (2015)

Crow Butte Resources, Inc. (North Trend Expansion Project), CLI-09-12, 69 NRC 535, 552-53 (2009)
contention pleading rules are designed to ensure that only well-defined issues are admitted for hearing and a board should not add material not raised by a petitioner in order to render a contention admissible; CLI-11-11, 74 NRC 437, 457 (2011)
it is intervention petitioner’s responsibility to put others on notice as to the issues it seeks to litigate in a proceeding; CLI-11-11, 74 NRC 457 (2011)
to eliminate the inadmissible issue of tribal notification and to clarify the scope of the subsistence consumption issue, board narrows and reformulates a contention; LBP-15-5, 81 NRC 281 n.194 (2015)

boards may not supply information that is lacking in a contention that otherwise would be inadmissible; CLI-15-18, 82 NRC 141 (2015)

Crow Butte Resources, Inc. (North Trend Expansion Project), CLI-09-12, 69 NRC 535, 553 (2009)
if petitioner neglects to provide the requisite support for its contentions, it is not within the board’s power to make assumptions or draw inferences that favor petitioner, nor may the board supply information that is lacking; LBP-12-3, 75 NRC 191 (2012); LBP-12-15, 76 NRC 26 (2012); LBP-12-18, 76 NRC 182 (2012); LBP-12-27, 76 NRC 595 (2012); LBP-13-6, 77 NRC 285 (2013); LBP-15-1, 81 NRC 39 (2015)
to define the scope of an admitted contention properly, the board should have specified which bases were admitted; LBP-13-6, 77 NRC 298 (2013); LBP-13-10, 78 NRC 138 (2013)

Crow Butte Resources, Inc. (North Trend Expansion Project), CLI-09-12, 69 NRC 535, 553 & n.81 (2009)
boards are not responsible for providing support for contentions so as to make them admissible; LBP-12-3, 75 NRC 206 n.35 (2012)
LEGAL CITATIONS INDEX

CASES

Crow Butte Resources, Inc. (North Trend Expansion Project), CLI-09-12, 69 NRC 535, 553-54 (2009)
licensing boards must specify each basis relied upon for admitting a contention; CLI-12-5, 75 NRC
310 n.50 (2012)

Crow Butte Resources, Inc. (North Trend Expansion Project), CLI-09-12, 69 NRC 535, 557 (2009)
any contention that fails to directly controvert the application or that mistakenly asserts the application
does not address a relevant issue will be dismissed; LBP-12-3, 75 NRC 192 (2012); LBP-12-15, 76
NRC 27 (2012); LBP-12-27, 76 NRC 595 (2012); LBP-13-6, 77 NRC 285-86 (2013); LBP-15-1, 81
NRC 37 (2015)

Crow Butte Resources, Inc. (North Trend Expansion Project), CLI-09-12, 69 NRC 535, 573 (2009)
confinement of aquifers is material to the environmental impacts of the licensing action; CLI-14-2, 79
NRC 26 (2014)

Crow Butte Resources, Inc. (North Trend Expansion Project), CLI-09-12, 69 NRC 535, 562, 573 (2009)
bare assertions are insufficient to support a contention; CLI-11-11, 74 NRC 452 n.139 (2011)

Crow Butte Resources, Inc. (North Trend Expansion Project), CLI-09-12, 69 NRC 535, 564-66 (2009)
contention contesting how the consultation mandate is being carried out can be raised in the first
instance only after the Staff’s draft environmental impact statement; LBP-13-6, 77 NRC 287 (2013)

Crow Butte Resources, Inc. (North Trend Expansion Project), CLI-09-12, 69 NRC 535, 565-71 (2009)
board erred in reformulating contentions with arguments not originally raised by petitioners;
CLI-15-18, 82 NRC 149 n.74 (2015)

Crow Butte Resources, Inc. (North Trend Expansion Project), CLI-09-12, 69 NRC 535, 566 (2009)
burden of fulfilling the National Historic Preservation Act’s consultation requirements rests exclusively
with the NRC, not with the applicant; LBP-12-23, 76 NRC 486 (2012)

Crow Butte Resources, Inc. (North Trend Expansion Project), CLI-09-12, 69 NRC 535, 568 (2009)
petitioner may respond to the legal or logical arguments presented in the answers to its hearing
request, but may not use its reply to raise new issues for the first time; CLI-15-18, 82 NRC 146
(2015)

Crow Butte Resources, Inc. (North Trend Expansion Project), CLI-09-12, 69 NRC 535, 568-69 (2009)
new claim would not have met the timeliness standards because petitioner could have raised its
environmental justice concerns when it filed its initial petition; CLI-15-18, 82 NRC 147 n.59 (2015)
original contention did not point to any specific grievance with the environmental justice discussion
provided in applicant’s environmental report and so the board should have applied the standards in
10 C.F.R. 2.309(c) to determine whether petitioner had demonstrated good cause for its late filing;
CLI-15-18, 82 NRC 147 (2015)

Crow Butte Resources, Inc. (North Trend Expansion Project), CLI-09-12, 69 NRC 535, 569 (2009)
it is presumed that applicants intend to comply with state law; LBP-11-16, 73 NRC 678 n.185 (2011)

Crow Butte Resources, Inc. (North Trend Expansion Project), CLI-09-12, 69 NRC 535, 571 (2009)
materials license regulations contain no express prohibition on foreign ownership, but require Staff to
make a finding that license issuance will not be inimical to the common defense and security or the
health and safety of the public; LBP-11-11, 73 NRC 488 (2011)

Crow Butte Resources, Inc. (North Trend Expansion Project), LBP-08-6, 67 NRC 241, 272-73 (2008), aff’d
in part and rev’d in part, CLI-09-12, 69 NRC 535 (2009)
petitioner made no effort to establish that any proximity plus presumption should be applicable in
determining standing relative to the challenged licensing action; LBP-13-6, 77 NRC 271 n.5 (2013)

Crow Butte Resources, Inc. (North Trend Expansion Project), LBP-08-6, 67 NRC 241, 272-73 (2008), aff’d
as to ruling on standing, CLI-09-12, 69 NRC 535, 544-48 (2009)
petitioners have made no attempt to establish that any promixity-plus presumption should be applicable
to the licensing action they are challenging; LBP-12-3, 75 NRC 179 (2012)

Crow Butte Resources, Inc. (North Trend Expansion Project), LBP-08-6, 67 NRC 241, 278-80, 282-84,
288-89 (2008), aff’d as to ruling on standing, CLI-09-12, 69 NRC 535 (2009)
when an ore zone and petitioner’s water source exist in separate aquifers, the injury/causation question
is whether there is an interconnection between those aquifers; LBP-12-3, 75 NRC 181-82 n.11
(2012)
LEGAL CITATIONS INDEX

CASES

Crow Butte Resources, Inc. (North Trend Expansion Project), LBP-08-6, 67 NRC 241, 281 (2008), aff’d as to ruling on standing, CLI-09-12, 69 NRC 535 (2009).

petitioner whose property is upslope, but nonetheless located in close proximity to a proposed in situ recovery facility may be able to establish its plausible pathway with a less particularized showing; LBP-12-3, 75 NRC 182 n.13 (2012).

Crow Butte Resources, Inc. (North Trend Expansion Project), LBP-08-6, 67 NRC 241, 281-82 (2008), aff’d as to ruling on standing, CLI-09-12, 69 NRC 535 (2009).

for petitioners claiming to be using water from the same aquifer as for the uranium ore source, regardless of distance from the facility in question, licensing boards have found that a plausible pathway connecting the proposed mining operation to their water source has been shown so as to establish petitioners’ standing; LBP-12-3, 75 NRC 183 (2012).

Crow Butte Resources, Inc. (North Trend Expansion Project), LBP-08-6, 67 NRC 241, 284-87 (2008), aff’d as to ruling on standing, CLI-09-12, 69 NRC 535 (2009).

surface water contamination has played a significant role in standing determinations in in situ recovery cases; LBP-12-3, 75 NRC 183 (2012).

Crow Butte Resources, Inc. (North Trend Expansion Project), LBP-08-6, 67 NRC 241, 288-89 (2008), aff’d as to ruling on standing, CLI-09-12, 69 NRC 535 (2009).

standing was found for petitioner fishing a river 60 miles downstream from a proposed in situ recovery facility expansion alleged to allow drainage into the river from operations; LBP-12-3, 75 NRC 183 (2012).

petitioner asserts standing based on use of proposed site to gather eagle feathers for ceremonial and religious uses; LBP-13-6, 77 NRC 277 (2013).

Cuomo v. NRC, 772 F.2d 972, 974 (D.C. Cir. 1985).

upon a strong showing of irreparable injury, stay movant need not always establish a high probability of success on the merits; LBP-15-2, 81 NRC 54 (2015).

Curators of the University of Missouri (TRUMP-S Project), CLI-95-1, 41 NRC 71, 98 (1995).

although boards may give reasonable deference to NRC guidance, such agency guidance does not substitute for regulations, is not binding authority, and does not prescribe NRC requirements; LBP-11-16, 73 NRC 661, 670 (2011).

NUREGs and Regulatory Guides, by their very nature, serve merely as guidance and cannot prescribe requirements; LBP-13-13, 78 NRC 284 n.168 (2013); LBP-14-9, 80 NRC 52 n.161 (2014).

standard review plan does not in itself impose requirements on an applicant but provides guidance to NRC Staff in reviewing an application; CLI-14-7, 79 NRC 23 n.70 (2014).

Curators of the University of Missouri (TRUMP-S Project), CLI-95-1, 41 NRC 71, 121-22 (1995).

primary responsibility to address and comply with AEA safety-related requirements resides with a license applicant, and so, that application, not the Staff’s application review, is the focus of any safety-related contentions; LBP-13-10, 78 NRC 132 n.7 (2013).

Curators of the University of Missouri (TRUMP-S Project), CLI-95-1, 41 NRC 71, 150 (1995).

NRC Staff guidance documents do not have the force of law and boards are not bound to follow them; CLI-15-6, 81 NRC 358 (2015).

where NRC guidance document is not directly applicable to the issue at hand, the presiding officer is afforded greater leeway in its application; CLI-15-6, 81 NRC 358 n.86 (2015).

Curators of the University of Missouri (TRUMP-S Project), CLI-95-1, 41 NRC 71, 170 (1995).

contentions calling for requirements in excess of those imposed by regulations will be rejected as a collateral attack on regulations; CLI-12-5, 75 NRC 315 n.88 (2012).

contention that regulatory provisions are themselves insufficient to protect the public health and safety constitutes an improper collateral attack on NRC regulations; LBP-15-4, 81 NRC 167 n.64 (2015).

Curators of the University of Missouri (TRUMP-S Project), CLI-95-8, 41 NRC 386, 395 (1995).

a dynamic licensing process is followed in Commission licensing proceedings; LBP-11-22, 74 NRC 271 (2011).

permitting an application to be modified or improved throughout the NRC’s review is compatible with the dynamic licensing process followed in Commission licensing proceedings; CLI-11-2, 73 NRC 345 (2011).
Curators of the University of Missouri (TRUMP-S Project), CLI-95-8, 41 NRC 386, 395-96 (1995)

The adequacy of NRC Staff’s review is not a litigable issue in a licensing case; CLI-15-9, 81 NRC 531 (2015)

Curators of the University of Missouri (TRUMP-S Project), CLI-95-8, 41 NRC 386, 396 (1995)

Because primary responsibility to address and comply with AEA safety-related requirements resides with a license applicant, that application, not the Staff’s application review, is the focus of any safety-related contentions and thus the migration tenet does not apply; LBP-13-10, 78 NRC 132 n.7 (2013)

David B. Kuhl, II (Denial of Senior Reactor Operator License), LBP-09-14, 70 NRC 193 (2009)

Hearing demand under section 2.103(b)(2) has only to meet the prescribed filing deadline and specify the reasons why the demander deemed the denial of the sought operator’s license to have been unjustified; LBP-13-3, 77 NRC 94 (2013)

David B. Kuhl, II (Denial of Senior Reactor Operator License), LBP-09-14, 70 NRC 193, 195 (2009)

Section 2.309(f)(1) has no application to reactor operator licensee proceedings; LBP-13-3, 77 NRC 94 n.64 (2013)

David B. Kuhl, II (Denial of Senior Reactor Operator License), LBP-09-14, 70 NRC 193, 196 (2009)

Any senior reactor operator license is limited to the facility for which it is issued; LBP-13-3, 77 NRC 94 (2013)

David Geisen, CLI-09-23, 70 NRC 935, 936 (2009)

The Commission traditionally has entertained motions to stay agency action pending judicial review; CLI-12-11, 75 NRC 528 (2012)

David Geisen, CLI-09-23, 70 NRC 935, 936 & n.4 (2009)

Irreparable injury is the most important of the stay criteria; CLI-12-11, 75 NRC 529 (2012); LBP-15-2, 81 NRC 53-54 (2015)

David Geisen, CLI-09-23, 70 NRC 935, 937 (2009)

Without a showing of irreparable injury, petitioners seeking a stay of effectiveness must demonstrate that reversal of the licensing board is a virtual certainty; CLI-12-11, 75 NRC 529 (2012)

David Geisen, CLI-10-23, 72 NRC 210 (2010)

Oversight activities at times involve enforcement actions, including orders and civil penalties, to which a hearing right or opportunity attaches; CLI-15-5, 81 NRC 338 n.52 (2015)

David Geisen, CLI-10-23, 72 NRC 210, 220 (2010)

Commission gives substantial deference to licensing board findings of fact and will not overturn a board’s factual findings unless they are not even plausible in light of the record viewed in its entirety; CLI-15-9, 81 NRC 522 (2015)

Where issues in a case have been sharply contested, the Commission will explain its view of the case in some detail; CLI-13-1, 77 NRC 19 (2015)

David Geisen, CLI-10-23, 72 NRC 210, 224-25 (2010)

Commission gives substantial deference to licensing board findings of fact, and will not overturn a board’s factual findings unless they are not even plausible in light of the record viewed in its entirety; CLI-14-10, 80 NRC 162 (2014)

Commission reviews questions of law de novo, but defers to a board’s findings with respect to the underlying facts unless they are clearly erroneous; CLI-15-7, 81 NRC 493 (2015); CLI-15-9, 81 NRC 519 (2015)

To show clear error, petitioner must show that the board’s determination is not even plausible in light of the record as a whole; CLI-15-7, 81 NRC 493 (2015); CLI-15-9, 81 NRC 519 (2015)

David Geisen, CLI-10-23, 72 NRC 210, 224-25 & n.61 (2010)

deferential clear error standard is applied in analyzing a board’s findings of fact; CLI-13-1, 77 NRC 18 n.102 (2013)

Question before the Commission is whether it would have made different factual findings than those of the board, but whether the board’s findings of fact are so lacking in record support as to be clearly erroneous; CLI-13-1, 77 NRC 19 (2013)
David Geisen, CLI-10-23, 72 NRC 210, 225 (2010)
mere presence of evidence supporting both sides does not call for Commission review, where it
appears that the board considered all the evidence and arguments before it; CLI-15-7, 81 NRC 497 n.96 (2015)

David Geisen, LBP-06-25, 64 NRC 367, 380 (2006)
among the categories of privileged documents are interagency or intra-agency memorandums or letters
that would not be available by law to a party other than an agency in litigation with the
Commission; LBP-13-5, 77 NRC 238 (2013)
deliberative process privilege applied under 10 C.F.R. 2.390(a)(5) to interagency or intra-agency
memorandums or letters is similar to Exemption 5 under the Freedom of Information Act; LBP-13-5,
77 NRC 238 (2013)

David Geisen, LBP-06-25, 64 NRC 367, 383 (2006)
qualified persons, such as head of a department or division, having both expertise and an
overview-type perspective concerning the balance between the agency’s duty of disclosure versus its
need to conduct frank internal debate must sign an affidavit asserting deliberative process privilege;
LBP-13-5, 77 NRC 240 n.34 (2013)

David Geisen, LBP-09-24, 70 NRC 676 (2009)
if an enforcement order blacklists a worker by name, under 10 C.F.R. 2.202(a)(3) he has the right to
demand a hearing even though he may be motivated by purely economic concerns; LBP-14-4, 79
NRC 347 (2014)

Davis v. Mineta, 302 F.3d 1104, 1121-22 (10th Cir. 2002)
agency’s decision to issue a finding of no significant impact rather than prepare an environmental
impact statement was arbitrary because the agency had obligated itself contractually to issue a
FONSI before it conducted an environmental assessment; LBP-14-6, 79 NRC 425 n.112 (2014)
failure of decision underlying the Clean Water Act § 404 permit to analyze the cumulative impacts
reasonably foreseeable from the expected addition of a second generation unit at the plant is one of
the most egregious shortfalls of the environmental assessment; LBP-14-6, 79 NRC 422 (2014)

Davis v. Mineta, 302 F.3d 1104, 1125 (10th Cir. 2002)
agency’s reliance on mitigation in making a finding of no significant impact is justified if the
proposed mitigation is more than a possibility in that it is imposed by statute or regulation or has
been so integrated into the initial proposal that it is impossible to define the proposal without
mitigation; LBP-12-23, 76 NRC 467 (2012)

Court of Appeals disagreed with the district court’s conclusion that the increase in noise levels would
not be a significant impact because the agency’s environmental assessment made no firm
commitment to any noise mitigation measures; LBP-12-23, 76 NRC 469 n.152 (2012)
reliance on mitigation is justified if the proposed mitigation underlying the finding of no significant
impact must be more than a possibility in that it is imposed by statute or regulation or has been so
integrated into the initial proposal that it is impossible to define the proposal without mitigation;
LBP-14-7, 79 NRC 461 (2014)

Defenders of Wildlife v. Andrus, 627 F.2d 1238, 1243-44 (D.C. Cir. 1980)
NEPA applies to agencies of the federal government, not to private parties such as applicants for
NRC licenses; LBP-11-32, 74 NRC 666 (2011)

Dellums v. NRC, 863 F.2d 968, 971 (D.C. Cir. 1988)
when no proximity presumption applies, petitioner must assert some specific injury in fact that will
result from action taken; CLI-11-3, 73 NRC 622 n.47 (2011)

NEPA requires federal agencies to pause before committing resources to a project and consider the
likely environmental impacts of the preferred course of action as well as reasonable alternatives;
LBP-14-9, 80 NRC 40 (2014)

primary responsibility for compliance with NEPA lies with the Commission; LBP-14-9, 80 NRC 69
(2014)
LEGAL CITATIONS INDEX

CASES

NEPA requires a reasonably close causal relationship between the environmental effect and the alleged
cause; LBP-12-21, 76 NRC 241 (2012)

rule of reason is inherent in NEPA and its implementing regulations; LBP-13-13, 78 NRC 452 n.1417
(2013)

rule of reason is inherent in NEPA and its implementing regulations; LBP-11-38, 74 NRC 831 (2011);
LBP-12-5, 75 NRC 237 n.52 (2012)

where an agency has no ability to prevent a certain effect due to its limited statutory authority over
the relevant actions, the agency cannot be considered a legally relevant cause of the effect;
LBP-12-12, 75 NRC 779 n.212 (2012)

Detroit Edison Co. (Enrico Fermi Atomic Power Plant, Unit 2), ALAB-470, 7 NRC 473, 474 n.1 (1978)
mother was denied standing based on her son’s residence within 50 miles of a power plant, because
she herself lived more than 50 miles away; LBP-15-17, 81 NRC 775 n.135 (2015)

parent could attain proximity-based standing through reference to her child if the child was a minor or
otherwise under a legal disability and thus unable to participate; LBP-15-17, 81 NRC 775 n.139
(2015)

Detroit Edison Co. (Enrico Fermi Atomic Power Plant, Unit 2), LBP-78-37, 8 NRC 575, 583 (1978)
an organization’s standing can be demonstrated through the interests of its members, but if a member
acts or speaks on behalf of the organization, that member must also demonstrate authorization by
that organization to represent it; LBP-11-13, 73 NRC 548-49 (2011)

Detroit Edison Co. (Enrico Fermi Atomic Power Plant, Unit 2), LBP-78-37, 8 NRC 575, 584-85 (1978)
special circumstances required to obtain a rule waiver have been described as a prima facie showing
that application of a rule in a particular way would not serve the purposes for which the rule was
adopted; LBP-15-5, 81 NRC 272 (2015)

Detroit Edison Co. (Fermi Nuclear Power Plant, Unit 3), CLI-09-4, 69 NRC 80, 85 (2009)
the Commission refused to suspend the combined license proceeding pending completion of the design
certification review of the ESBWR design certification process; CLI-11-1, 73 NRC 4 n.11 (2011)

Detroit Edison Co. (Fermi Nuclear Power Plant, Unit 3), CLI-09-22, 70 NRC 932, 933 (2009)

NRC rules of practice provide for an automatic right to appeal a licensing board decision deciding
standing and contention admissibility, on the question whether a petition to intervene and request for
hearing should have been granted, or denied in its entirety; CLI-12-8, 75 NRC 396-97 (2012)

Detroit Edison Co. (Fermi Nuclear Power Plant, Unit 3), LBP-09-16, 70 NRC 227, 242-43, aff’d,
CLI-09-22, 70 NRC 932 (2009)

petitioners’ averment that proffered environmental contentions will better position NRC to fully review
the possible impacts of the proposed project and, based on petitioners’ and their experts’ information,
may address concerns and mitigate impacts to water, land, and other resources is sufficient to fulfill
the redressability element of the standing requirement; CLI-12-12, 75 NRC 613 n.51 (2012);,
LBP-12-3, 75 NRC 188 n.24 (2012)

Detroit Edison Co. (Fermi Nuclear Power Plant, Unit 3), LBP-09-16, 70 NRC 227, 255 (2009)

petitioners cannot argue for an analysis different from that required by regulation; LBP-15-20, 81 NRC
845 (2015)
when an NRC regulation permits use of a particular analysis, a contention asserting that a different
analysis or technique should be used is inadmissible because it indirectly attacks NRC’s regulations;

Detroit Edison Co. (Fermi Nuclear Power Plant, Unit 3), LBP-09-16, 70 NRC 227, 262, aff’d, CLI-09-22,
70 NRC 932 (2009)
environmental considerations that the environmental report must discuss are equivalent to, and in most
instances verbatim restatements of, environmental considerations that NEPA requires the agency to
describe in detail in the environmental impact statement; LBP-15-5, 81 NRC 265 (2015)

Detroit Edison Co. (Fermi Nuclear Power Plant, Unit 3), LBP-09-16, 70 NRC 227, 263, aff’d, CLI-09-22,
70 NRC 932 (2009)
applicant’s environmental report need only discuss those alternatives that will bring about the ends of
the proposed action; CLI-12-5, 75 NRC 339 (2012); LBP-12-15, 76 NRC 38 n.8 (2012)
Detroit Edison Co. (Fermi Nuclear Power Plant, Unit 3), LBP-09-16, 70 NRC 227, 267, aff’d, CLI-09-22, 70 NRC 932 (2009)

contention quotes text from a notice of proposed rulemaking, but it never ties the statements from the NOPR to any specific section of the environmental assessment, and thus fails to raise a genuine dispute with the EA; LBP-15-15, 81 NRC 614 n.111 (2015)

when an application is alleged to be deficient, petitioner must identify the deficiencies and provide supporting reasons for its position that such information is required; LBP-15-1, 81 NRC 37 (2015)

when an NRC regulation permits use of a particular analysis, a contention asserting that a different analysis or technique should be used is inadmissible because it indirectly attacks the Commission’s regulations; LBP-15-17, 81 NRC 782 (2015)

Detroit Edison Co. (Fermi Nuclear Power Plant, Unit 3), LBP-09-16, 70 NRC 227, 278-79 (2009)

the National Pollutant Discharge Elimination System permitting process does not excuse NRC from addressing relevant water quality issues in its environmental impact statement; LBP-12-10, 75 NRC 678-79 (2012)

Detroit Edison Co. (Fermi Nuclear Power Plant, Unit 3), LBP-09-16, 70 NRC 227, 279-80 (2009)

contention that environmental report failed to explain whether a discharge pipe with phosphoric acid as a corrosion inhibitor would increase algae production and potential for toxic algal blooms is admissible; LBP-15-5, 81 NRC 305 n.393 (2015)

Detroit Edison Co. (Fermi Nuclear Power Plant, Unit 3), LBP-10-9, 71 NRC 493, 510-11 (2010)

contention that raised two distinct issues is best divided into separate contentions; LBP-15-5, 81 NRC 268 (2015)

Detroit Edison Co. (Fermi Nuclear Power Plant, Unit 3), LBP-12-12, 75 NRC 742, 764-65 (2012)

applicant is not required to explain in its environmental report every aspect of the process it must pursue in the course of obtaining a federal permit, license, or approval; LBP-12-15, 76 NRC 35 n.6 (2012)

Detroit Edison Co. (Fermi Nuclear Power Plant, Unit 3), LBP-12-23, 76 NRC 445, 454-55 (2012)

harmful algae blooms from *Lyngbya wollei* are unlikely to form in unsheltered areas; LBP-15-5, 81 NRC 305 n.393 (2015)

Detroit Edison Co. (Fermi Nuclear Power Plant, Unit 3), LBP-12-23, 76 NRC 445, 461, 465, 466, 468 (2012)

adjudication of draft environmental impact statement that relied on applicant’s mitigation measure that a state agency might not require the applicant to implement was challenged; LBP-13-4, 77 NRC 220 n.98 (2013)

Detroit Edison Co. (Fermi Nuclear Power Plant, Unit 3), LBP-12-23, 76 NRC 445, 469 (2012)

agency preparing the NEPA document must explain the statutory or regulatory requirements it is relying on and its reasons for concluding that the application of those requirements will actually result in the mitigation and monitoring it assumes will occur; LBP-15-11, 81 NRC 432 (2015)

Detroit Edison Co. (Fermi Nuclear Power Plant, Unit 3), LBP-12-23, 76 NRC 445, 470-71 (2012)

board may construe an admitted contention contesting applicant’s environmental report as a challenge to a subsequently issued draft or final environmental impact statement without the necessity for intervenors to file a new or amended contention; LBP-13-9, 78 NRC 47 n.27 (2013); LBP-14-5, 79 NRC 383 n.29 (2014); LBP-15-11, 81 NRC 410 n.38 (2015)

contention migrates when a licensing board construes a contention challenging the environmental section of an application as a challenge to a subsequently issued Staff NEPA document without petitioner amending the contention; CLI-15-17, 82 NRC 42 n.58 (2015)

contentions of adequacy may migrate into contentions of omission; LBP-13-10, 78 NRC 133 (2013)

Detroit Edison Co. (Fermi Nuclear Power Plant, Unit 3), LBP-12-23, 76 NRC 445, 471 (2012)

migration tenet applies where information in the draft environmental impact statement is sufficiently similar to information in the environmental report; LBP-14-6, 79 NRC 416-17 n.67 (2014)

Detroit Edison Co. (Fermi Nuclear Power Plant, Unit 3), LBP-12-23, 76 NRC 445, 486 n.259 (2012)

environmental impact statement must discuss any adverse environmental effects that cannot be avoided should the proposal be implemented and must provide a reasonably complete discussion of possible mitigation measures; LBP-15-11, 81 NRC 431 n.189 (2015)
**LEGAL CITATIONS INDEX**

**CASES**

*Detroit Edison Co.* (Fermi Nuclear Power Plant, Unit 3), LBP-14-9, 80 NRC 15, 41 (2014)

action lacks independent utility when it would be irrational or unwise to pursue the action without the presence of the EIS-generating central action; LBP-15-16, 81 NRC 697 (2015)

*Detroit Edison Co.* (Fermi Power Plant Independent Spent Fuel Storage Installation), CL1-10-3, 71 NRC 49 (2010)

measures intended to strengthen an enforcement order issued under 10 C.F.R. 2.202 are not within the limited scope of the proceedings; CL1-13-2, 77 NRC 43 (2013)

*Detroit Edison Co.* (Fermi Power Plant Independent Spent Fuel Storage Installation), CL1-10-3, 71 NRC 49, 50 (2010)

petition challenging an immediately effective enforcement order asking that licensee take certain physical security measures in addition to those already required by NRC regulations, to protect the spent fuel it planned to store at its power plant site, was rejected; LBP-12-14, 76 NRC 6-7 (2012)

*Detroit Edison Co.* (Fermi Power Plant Independent Spent Fuel Storage Installation), CL1-10-3, 71 NRC 49, 51 n.4 (2010)

denial of hearing request is appealable as of right; CL1-13-2, 77 NRC 44 (2013)

NRC rejected the argument that an enforcement order regarding addition of physical security measures should be rescinded because it could have negative effects by creating a false sense of security by emphasizing the formation of human security workforce over the substance of putting into place physical barriers and important technologies to protect the plant itself; LBP-12-14, 76 NRC 7 (2012)

petitioner does not meet the redressability requirement for standing, because vacating the confirmatory orders would not ameliorate the injury of which petitioner complains; CL1-13-2, 77 NRC 49 (2013)

petitioners’ argument opposing an order that imposed additional security measures at a spent fuel storage facility, because it created a false sense of security was rejected because petitioners did not explain how they would be better off without the measures in the order; CL1-13-2, 77 NRC 48 (2013)

*Detroit Edison Co.* (Fermi Power Plant Independent Spent Fuel Storage Installation), LBP-09-20, 70 NRC 565, 568 (2009)

physical security measures developed by NRC in the wake of the September 11 terrorist attacks were deemed necessary to protect the public health and safety in the current threat environment and were intended to strengthen licensees’ capabilities and readiness to respond to a potential attack on a nuclear facility; LBP-12-14, 76 NRC 7 n.31 (2012)

*Detroit Edison Co.* (Greenwood Energy Center, Units 2 and 3), ALAB-247, 8 AEC 936 (1974)

NRC can, as a condition of licensure, insist that offsite transmission lines built solely to serve a nuclear facility be designed to minimize environmental disturbance; LBP-14-9, 80 NRC 30 (2014)

NRC’s has authority to impose environmental restrictions on new transmission lines intended to serve new nuclear power plants; LBP-14-9, 80 NRC 46 (2014)

*Detroit Edison Co.* (Greenwood Energy Center, Units 2 and 3), ALAB-247, 8 AEC 936, 937 (1974)

power plants without transmission lines are like airplanes that can’t fly; LBP-14-9, 80 NRC 46 (2014)

*Detroit Edison Co.* (Greenwood Energy Center, Units 2 and 3), ALAB-247, 8 AEC 936, 939 (1974)

transmission lines are a foreseeable consequence of licensing construction of the nuclear power units; LBP-14-9, 80 NRC 47 (2014)

*Detroit Edison Co. v. NRC*, 630 F.2d 450, 451 (6th Cir. 1980)

NRC can, as a condition of licensure, insist that offsite transmission lines built solely to serve a nuclear facility be designed to minimize environmental disturbance; LBP-14-9, 80 NRC 30 (2014)

*Detroit Edison Co. v. NRC*, 630 F.2d 450, 451 (6th Cir. 1980)

by 1974, NRC had adopted an aggressive approach to its environmental responsibilities in the context of transmission line siting; LBP-14-9, 80 NRC 30 (2014)

under NEPA, federal agencies must use all practicable means to avoid environmental degradation to the extent consistent with other essential considerations of national policy; LBP-14-9, 80 NRC 29 (2014)
**LEGAL CITATIONS INDEX**

**CASES**

*Detroit Edison Co. v. NRC*, 630 F.2d 450, 452 (6th Cir. 1980)  
in ruling that NRC had appropriately interpreted the Atomic Energy Act to include regulatory  
authority over attendant transmission lines, the court did not decide whether NEPA is an independent  
source of substantive jurisdiction; LBP-14-9, 80 NRC 54 (2014)  
regulation of offsite transmission lines is within NRC’s authority under section 101 of the Atomic  
Energy Act and nothing in the AEA precludes NRC from implementing, through issuance of  
conditional licenses, NEPA’s environmental mandate; LBP-14-9, 80 NRC 49 (2014)

*Detroit Edison Co. v. NRC*, 630 F.2d 450, 454 (6th Cir. 1980)  
under the Atomic Energy Act, NRC can issue conditional licenses for regulatory purposes, and thus  
there can be no objection to its use of the same means to achieve environmental ends as well;  
LBP-14-9, 80 NRC 53 (2014)

*Deukmejian v. NRC*, 751 F.2d 1287, 1300 (D.C. Cir. 1984)  
NEPA requirements are subject to a rule of reason, and an environmental impact statement need not  
address remote and highly speculative consequences; LBP-14-9, 80 NRC 42 (2014)

affirmative misconduct means an affirmative misrepresentation or affirmative concealment of a material  
fact by the government, although it does not require that the government intends to mislead a party;  
LBP-12-16, 76 NRC 51 n.33 (2012)

*Dominion Nuclear Connecticut, Inc.* (Millstone Nuclear Power Station, Unit 2), CLI-03-14, 58 NRC 207, 213 (2003)  
contention admissibility requirements seek to ensure that NRC hearings serve to adjudicate genuine,  
substantive safety and environmental issues placed in contention by qualified intervenors; CLI-15-8,  
81 NRC 504 (2015)  
contention admission standards are strict by design and exist to focus litigation on concrete issues and  
contentions cannot be based on speculation but must have some reasonably specific factual or legal  
basis; CLI-15-8, 81 NRC 504 (2015); CLI-15-20, 82 NRC 221 (2015)  
rules on contention admissibility are strict by design; LBP-11-16, 73 NRC 655 (2011); LBP-11-21, 74  
NRC 125 (2011); LBP-12-25, 76 NRC 545 (2012); LBP-14-4, 79 NRC 374 n.70 (2014)

*Dominion Nuclear Connecticut, Inc.* (Millstone Nuclear Power Station, Unit 2), CLI-03-14, 58 NRC 207, 219 (2003)  
NRC deliberately raised the admission standards for contentions to obviate serious hearing delays  
caused in the past by poorly defined or poorly supported contentions; LBP-15-1, 81 NRC 38 (2015)  
NRC properly reserves its hearing process for genuine, material controversies between knowledgeable  
litigants; CLI-12-5, 75 NRC 307 (2012); CLI-12-8, 75 NRC 396, 416 (2012)

*Dominion Nuclear Connecticut, Inc.* (Millstone Nuclear Power Station, Unit 2), CLI-03-18, 58 NRC 433, 434 (2003)  
reconsideration motions should not simply reargue matters already considered but rejected; CLI-12-17,  
76 NRC 210 (2012)

*Dominion Nuclear Connecticut, Inc.* (Millstone Nuclear Power Station, Unit 3), CLI-02-22, 56 NRC 213, 227-28 (2002)  
reopening a proceeding with respect to a specific issue would not have the effect of reopening the  
proceeding for adjudication on unrelated matters once a record is closed; CLI-12-17, 76 NRC 212-13  
(2012)

*Dominion Nuclear Connecticut, Inc.* (Millstone Nuclear Power Station, Unit 3), CLI-08-17, 68 NRC 231, 233 (2008)  
board declines to entertain contentions based on little more than speculation, which represent  
negligible knowledge of the issues being challenged; LBP-15-1, 81 NRC 43 (2015)  
contention admissibility requirements are strict by design in order to help assure that the NRC hearing  
process will be appropriately focused on disputes that can be resolved in the adjudication;  
LBP-11-29, 74 NRC 618 (2011)  
NRC’s “strict by design” contention admissibility standards focus the hearing process on disputes that  
can be resolved in adjudication; CLI-15-22, 82 NRC 315 (2016); CLI-15-23, 82 NRC 325 (2015)
rules on contention admissibility are strict by design; LBP-12-25, 76 NRC 545 (2012); LBP-13-8, 78 NRC 9 (2013); LBP-14-4, 79 NRC 374 n.70 (2014)

**Dominion Nuclear Connecticut, Inc.** (Millstone Nuclear Power Station, Unit 3), CLI-08-17, 68 NRC 231, 234 (2008)
regardless of whether a hearing request is granted, NRC Staff performs a full safety review of every license amendment request and no request is approved until all necessary public health and safety findings have been made; CLI-15-22, 82 NRC 317 (2016)

**Dominion Nuclear Connecticut, Inc.** (Millstone Nuclear Power Station, Unit 3), CLI-09-5, 69 NRC 115, 119 (2009)

for threshold issues such as contention admissibility, the Commission gives substantial deference to a board’s determinations; CLI-12-3, 75 NRC 138 (2012); CLI-12-6, 75 NRC 361 (2012)

**Dominion Nuclear Connecticut, Inc.** (Millstone Nuclear Power Station, Unit 3), CLI-09-5, 69 NRC 115, 120 (2009)
motion to file new or amended contentions must address the motion to reopen standards after an intervention petition has been denied; LBP-11-20, 74 NRC 92 (2011)
NRC rules do not contemplate motions filed as placeholders for a further motion to be filed later; CLI-14-6, 79 NRC 449 (2014)
donce there has been an appeal or petition to review a board order, jurisdiction generally passes to the Commission; CLI-12-14, 75 NRC 701 n.60 (2012)

**Dominion Nuclear Connecticut, Inc.** (Millstone Nuclear Power Station, Unit 3), CLI-09-5, 69 NRC 115, 120, 122-23 (2009)
NRC’s rules of procedure do not permit the filing of notice pleadings, i.e., general, vague, or unsupported claims intended to act as placeholders for later elaboration; LBP-11-21, 74 NRC 133 (2011)

**Dominion Nuclear Connecticut, Inc.** (Millstone Nuclear Power Station, Unit 3), CLI-09-5, 69 NRC 115, 120-21 (2009)
a licensing board’s use of the reopening standard to evaluate the admissibility of contentions submitted after the board denied petitioners’ hearing request was affirmed on appeal; LBP-11-22, 74 NRC 283 (2011)

**Dominion Nuclear Connecticut, Inc.** (Millstone Nuclear Power Station, Unit 3), CLI-09-5, 69 NRC 115, 121-22 (2009)

adjudicatory proceeding on license amendment is not terminated by issuance of the amendment; CLI-15-17, 82 NRC 40 n.47 (2015)

**Dominion Nuclear Connecticut, Inc.** (Millstone Nuclear Power Station, Unit 3), CLI-09-5, 69 NRC 115, 122-23 (2009)
appellants may not amend their contentions on appeal; CLI-11-8, 74 NRC 221 (2011)

**Dominion Nuclear Connecticut, Inc.** (Millstone Nuclear Power Station, Unit 3), CLI-09-5, 69 NRC 115, 123 n.39 (2009)
contention fails because it contests NRC Staff’s safety review rather than the license renewal application; LBP-15-15, 81 NRC 614 n.111 (2015)

**Dominion Nuclear Connecticut, Inc.** (Millstone Nuclear Power Station, Unit 3), CLI-09-5, 69 NRC 115, 124 (2009)
motions to reopen on issues not previously litigated must satisfy the balancing test of 10 C.F.R. 2.309(c) in addition to the reopening standards; CLI-12-3, 75 NRC 140 (2012)

petitioner who satisfies the reopening standard must also show that its proposed new contention meets the standard for new or amended contentions in section 2.309(c) and the underlying admissibility standards of section 2.309(f)(1); LBP-14-8, 79 NRC 523 (2014)
section 2.309(f)(1) establishes the basic admissibility criteria that all contentions must satisfy; LBP-11-9, 73 NRC 400 n.55 (2011)

when petitioner proposes a new contention after the record has closed, petitioner must address the reopening standards contemporaneously with a late-filed intervention petition, which must satisfy the standards for both contention admissibility and late filing; CLI-11-8, 74 NRC 226 (2011)
Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Unit 3), CLI-09-5, 69 NRC 115, 124-25 (2009)

failure to address the reopening criteria is enough to reject contentions that are filed after a record has closed; CLI-12-3, 75 NRC 143 n.72 (2012)

Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Unit 3), CLI-09-5, 69 NRC 115, 125 (2009)
speculation by an expert cannot form the basis for admission of a contention on the basis of the matter being exceptionally grave; LBP-11-20, 74 NRC 89 n.125 (2011)

Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Unit 3), CLI-09-5, 69 NRC 115, 125-26 (2009)
good cause for the failure to file on time is afforded the most weight in balancing the eight late-filing factors of 10 C.F.R. 2.309(c)(i)-(viii); LBP-12-27, 76 NRC 593-94 & n.57 (2012); LBP-15-1, 81 NRC 30 n.73 (2015)

Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Unit 3), CLI-09-5, 69 NRC 115, 126 (2009)
failures to address the requirements of 10 C.F.R. 2.309(c) and (f)(2) is reason enough to reject proposed new contentions; LBP-11-7, 73 NRC 286 n.203, 289 n.227 (2011); LBP-11-21, 74 NRC 134 n.111 (2011)

Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Unit 3), LBP-01-17, 53 NRC 398, 406-07 (2001)

the board, on reconsideration and after remand from the Commission, reopened the record with respect to a previously disposed contention, to consider the effect of licensee’s losing track of a fuel rod; CLI-12-14, 75 NRC 700 n.55 (2012)

post-9/11 motion to reopen satisfied rules for reopening the record and for late-filed contentions, but contention involving a license amendment request for reconfiguring a spent fuel pool was inadmissible; CLI-11-5, 74 NRC 170 (2011)

Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Units 2 and 3), CLI-01-24, 54 NRC 349 (2001)

contention challenging removal of details from licensee’s Technical Specifications to a licensee-controlled document was rejected; LBP-12-25, 76 NRC 548 (2012)

Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Units 2 and 3), CLI-01-24, 54 NRC 349, 351 (2001)

the Commission has authority to determine, and prescribe by rule or regulation, what additional information should be included in technical specifications to ensure public health and safety and the common defense and security; LBP-13-7, 77 NRC 329 n.35 (2013)

Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Units 2 and 3), CLI-01-24, 54 NRC 349, 351-52 (2001)

NRC’s original rule governing technical specifications, 10 C.F.R. § 50.36, was promulgated in 1968 and lacked well-defined criteria as to what requirements need to be a technical specification and what provisions need not be in the license; LBP-12-25, 76 NRC 550 (2012)

Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Units 2 and 3), CLI-01-24, 54 NRC 349, 352 (2001)

every license to operate a nuclear power reactor must contain a list of technical specifications necessary for adequate protection of public health and safety; LBP-12-25, 76 NRC 549 (2012)

NRC has authority to determine, and to prescribe by rule or regulation, what additional information should be included in technical specifications to ensure public health and safety; LBP-12-25, 76 NRC 549-50 (2012)

NRC revised 10 C.F.R. 50.36 in 1995 and established clearer criteria as to what constitutes a technical specification that must be in the license; LBP-12-25, 76 NRC 550 (2012)
technical specifications must include information on the amount, kind, and source of special nuclear material, the place of use, and the particular characteristics of the facility; LBP-12-25, 76 NRC 549 (2012)
Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Units 2 and 3), CLI-01-24, 54 NRC 349, 355 (2001)
license amendment to eliminate numerous detailed procedures for monitoring routine radioactive releases from the technical specifications and transfer them to a licensee-controlled document would allow licensee to make future changes to the radiation monitoring procedures without going through another license amendment; LBP-12-25, 76 NRC 550 (2012)

because petitioner fails to address information in the draft supplemental environmental impact statement and generic EIS that is relevant to the issue it raises, the board must reject arguments relating to liquid waste disposal; LBP-13-9, 78 NRC 94 (2013)
boards must reject intervenors’ arguments that fail to specifically address the draft environmental impact statement; LBP-13-9, 78 NRC 56 (2013)
contention admissibility rules are strict by design, and only focused, well-supported issues will be admitted for hearing; CLI-15-21, 82 NRC 302 (2015); LBP-15-26, 82 NRC 174 (2015)
contention that the draft environmental impact statement fails to include a reviewable plan for disposal of 11e(2) byproduct material is inadmissible; LBP-13-9, 78 NRC 70 (2013)
intervenor must do more than submit bald or conclusory allegations of a dispute with the applicant; LBP-13-9, 78 NRC 82 n.304 (2013)
rules on contention admissibility are strict by design; LBP-15-1, 81 NRC 43 (2015); LBP-15-23, 82 NRC 59 (2015)

Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Units 2 and 3), CLI-01-24, 54 NRC 349, 358-59 (2001)

petitioners must articulate at the outset the specific issues they wish to litigate as a prerequisite to gaining formal admission as parties; CLI-15-9, 81 NRC 529 n.110 (2015)
petitioners’ reliance on loss of future opportunities to challenge by adjudicatory intervention licensee-initiated changes in the low-level effluent monitoring details fell short of an admissible contention; LBP-12-25, 76 NRC 550 (2012)

Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Units 2 and 3), CLI-01-24, 54 NRC 349, 360 (2001)

almost every item originally contained in technical specifications has some conceivable connection to safety, but this general premise is insufficient, by itself, as a ground for intervention; LBP-12-25, 76 NRC 550-51 (2012)
because changes to technical specifications require a license amendment, technical specifications should be limited to those plant conditions most important to safety; LBP-13-7, 77 NRC 330 n.37 (2013)

262
LEGAL CITATIONS INDEX

CASES

*Dominion Nuclear Connecticut, Inc.* (Millstone Nuclear Power Station, Units 2 and 3), CLI-01-24, 54 NRC 349, 363 (2001)

conclusory statements do not amount to a challenge to a severe accident mitigation alternatives analysis; CLI-15-18, 82 NRC 142 n.39 (2015)

*Dominion Nuclear Connecticut, Inc.* (Millstone Nuclear Power Station, Units 2 and 3), CLI-01-24, 54 NRC 349, 365 (2001)

for management integrity and character to be a viable contention, there must be a direct and obvious relationship between these issues and the challenged licensing action; CLI-11-8, 74 NRC 231 n.83 (2011)

past violations of NRC regulations would indicate a deficiency in an application only if they are directly germane to the licensing action, rather than being of simply historical interest; CLI-12-2, 75 NRC 83-84 (2012)

*Dominion Nuclear Connecticut, Inc.* (Millstone Nuclear Power Station, Units 2 and 3), CLI-01-24, 54 NRC 349, 365 (2001)

*Dominion Nuclear Connecticut, Inc.* (Millstone Nuclear Power Station, Units 2 and 3), CLI-02-1, 55 NRC 1, 2 (2002)

reconsideration motions should be based on an elaboration of an argument already made, an overlooked controlling decision or principle of law, or a factual clarification; CLI-12-17, 76 NRC 209-10 (2012)

*Dominion Nuclear Connecticut, Inc.* (Millstone Nuclear Power Station, Units 2 and 3), CLI-04-36, 60 NRC 631, 636 (2004)

failure to comply with any of the contention pleading requirements of 10 C.F.R. 2.309(f)(1)(i)-(vi) is grounds for rejection of a contention; LBP-11-16, 73 NRC 655 (2011); LBP-11-21, 74 NRC 125 (2011); LBP-12-25, 76 NRC 544 (2012); LBP-13-8, 78 NRC 9 (2013)

NRC’s license renewal process concerns a particularized and limited inquiry into the potential impacts of an additional 20 years of nuclear power plant operation, not day-to-day operational issues; LBP-11-21, 74 NRC 129 (2011)

*Dominion Nuclear Connecticut, Inc.* (Millstone Nuclear Power Station, Units 2 and 3), CLI-04-36, 60 NRC 631, 639 n.25 (2004)

appellants must clearly identify the errors in the decision below and ensure that their brief contains sufficient information and cogent argument to alert the other parties and the Commission to the precise nature of and support for their claims; CLI-11-8, 74 NRC 220 (2011)

failure of petitioner to cite even a single specific deficiency in the application precludes satisfaction of the specificity requirement of 10 C.F.R. 2.309(f)(1)(vi); LBP-11-29, 74 NRC 622 (2011)

*Dominion Nuclear Connecticut, Inc.* (Millstone Nuclear Power Station, Units 2 and 3), CLI-05-24, 62 NRC 551 (2005)

four-part test for granting a waiver under 10 C.F.R. 2.335(b) is set forth; LBP-14-16, 80 NRC 194 (2014)

rule waiver may be granted only upon a showing that all four factors of 10 C.F.R. 2.335 have been satisfied; LBP-15-6, 81 NRC 325-26 (2015)

*Dominion Nuclear Connecticut, Inc.* (Millstone Nuclear Power Station, Units 2 and 3), CLI-05-24, 62 NRC 551, 559-60 (2005)

all four parts of the test for rule waiver petitions must be met; LBP-13-1, 77 NRC 63 (2013) boards are not empowered to reword the clear language of the Commission’s regulations; LBP-13-12, 78 NRC 243 (2013)

even a properly supported request for a waiver cannot be granted when it seeks to exempt circumstances that are common to a large class of facilities rather than unique; LBP-13-12, 78 NRC 243 (2013)

four-factor test for grant of a rule waiver is presented; CLI-12-6, 75 NRC 364 (2012)

four-factor test for showing of special circumstances demonstrating that application of a rule would not serve the purpose for which it was adopted is outlined; CLI-12-19, 76 NRC 387 n.55 (2012); LBP-12-24, 76 NRC 539 n.8 (2012)

four-factor test is applied to rule waiver requests; CLI-15-21, 82 NRC 302 (2015)
petition for rule waiver or exception must allege special circumstances that were not considered, either explicitly or by necessary implication, in the rulemaking proceeding leading to the rule sought to be waived and those circumstances must be unique rather than common to a large class of facilities; LBP-12-6, 75 NRC 271 (2012)

petition for waiver of a specific NRC regulation must satisfy a four-factor test; LBP-15-17, 81 NRC 778 n.156 (2015)

rule waiver case law that reflects the four-part test that NRC has long used is compiled; CLI-13-7, 78 NRC 207 (2013)

rule waiver petitions must address the criteria in 10 C.F.R. 2.335; CLI-15-22, 82 NRC 318 (2016)

rule waivers may be granted only when all four factors in 10 C.F.R. 2.335(b) are met; LBP-14-15, 80 NRC 153-54 (2014)

special circumstances required to obtain a rule waiver have been described as a prima facie showing that application of a rule in a particular way would not serve the purposes for which the rule was adopted; LBP-15-5, 81 NRC 272 (2015)

the Commission has endorsed a four-pronged test for grant of a rule waiver; LBP-11-35, 74 NRC 714 (2011)

to waive the generic assessment in NRC regulations to permit adjudication of issues involving the environmental impact of spent fuel pool accidents in a license renewal proceeding, the Commission must conclude that the rule’s strict application would not serve the purpose for which it was adopted; CLI-11-11, 74 NRC 449 (2011)

where the rules in question, as well as the contention itself, address compliance with NEPA and not safety issues under the Atomic Energy Act, the rule waiver is needed to address a significant environmental issue instead of a significant safety issue; LBP-14-16, 80 NRC 195 (2014)

Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Units 2 and 3), CLI-05-24, 62 NRC 551, 559-60 & nn.29-34 (2005)

rule waiver petitions are reviewed under section 2.335 as well as case law; CLI-13-7, 78 NRC 205 (2013)

Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Units 2 and 3), CLI-05-24, 62 NRC 551, 560 (2005)

all four factors must be met for a rule waiver request to be granted; LBP-11-35, 74 NRC 714-15 (2011); LBP-14-16, 80 NRC 195 (2014)

NRC, by necessary implication, considered Indian tribe’s trust responsibility concerns during its rulemaking; LBP-14-16, 80 NRC 199, 200 (2014)

rule waiver petitioners must demonstrate that applying the rule would not serve its intended purpose; CLI-13-7, 78 NRC 205 n.19 (2013)

rule waiver requires that special circumstances exist that were not considered, either explicitly or by necessary implication, when NRC adopted its license renewal regulations; CLI-15-21, 82 NRC 307 (2015)

use of “and” in the list of requirements for rule waiver means that all four factors must be met; CLI-11-11, 74 NRC 452 n.138 (2011)

Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Units 2 and 3), CLI-05-24, 62 NRC 551, 560-61 (2005)

challenges to emergency planning fall outside the scope of a license renewal proceeding; LBP-15-5, 81 NRC 296, 299 n.340 (2015)

emergency planning is neither germane to age-related degradation nor unique to the period covered by a license renewal application; LBP-11-35, 74 NRC 715 (2011)

it makes no sense to spend valuable resources litigating allegations of current deficiencies in a proceeding that is directed to future-oriented issues of aging; CLI-15-21, 82 NRC 304 n.47 (2015)

Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Units 2 and 3), CLI-05-24, 62 NRC 551, 561 (2005)

challenges to 10 C.F.R. 50.54(hh)(2) are neither germane to age-related degradation nor unique to the license renewal period; LBP-11-21, 74 NRC 131 (2011)

it makes no sense to spend the parties’ and NRC’s own valuable resources litigating allegations of current deficiencies in a proceeding that is directed to future-oriented issues of aging; LBP-15-6, 81 NRC 326 (2015)
license renewal regulations serve exactly their intended purpose by focusing the proceeding on future-oriented aging issues; CLI-15-21, 82 NRC 306 (2015)

NRC regulations provide two other procedural mechanisms under 10 C.F.R. 2.206 and 2.802 by which petitioners may pursue their concerns about current deficiencies; LBP-15-6, 81 NRC 326 (2015)

Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Units 2 and 3), CLI-05-24, 62 NRC 551, 562 (2005)

even proximity to a nuclear power facility or ISFSI is hardly unique in context of a rule waiver request; LBP-14-16, 80 NRC 196 (2014)

“uniqueness” factor of the rule waiver test is interpreted; LBP-11-35, 74 NRC 717 (2011)

Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Units 2 and 3), CLI-05-24, 62 NRC 551, 564 (2005)

if good cause is not shown, a board may still permit the late filing, but petitioner or intervenor must make a strong showing on the other factors of 10 C.F.R. 2.309(c); LBP-11-9, 73 NRC 401 (2011)

Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Units 2 and 3), CLI-05-24, 62 NRC 551, 564-65 (2005)

“good cause” for late filing is defined as a showing that petitioner could not have met the filing deadline and filed as soon as possible thereafter; LBP-11-7, 73 NRC 288 n.213 (2011)

Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Units 2 and 3), CLI-05-24, 62 NRC 551, 565 (2005)

good cause is the most important of the factors in the 2.309(c) balancing test, and in the absence of good cause, a party must make an especially strong showing on the other factors to justify admission of a nontimely contention; LBP-12-10, 75 NRC 665 n.180 (2012)

Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Units 2 and 3), CLI-05-24, 62 NRC 551, 565 & n.60 (2005)

even one lacking actual notice may be charged with constructive notice of regulations published in the Federal Register; LBP-13-3, 77 NRC 97 (2013)

publication in the Federal Register is legally sufficient notice to all affected people; LBP-15-5, 81 NRC 280 n.181 (2015)

Commission has imposed or upheld disciplinary measures against parties and their representatives when they failed to comply with board directives and procedural rules; CLI-14-10, 80 NRC 165 n.41 (2014)

Dominion Nuclear Connecticut, Inc. (Millstone Nuclear Power Station, Units 2 and 3), LBP-04-15, 60 NRC 81, 89 (2004)

where a contention alleges a deficiency or error in the application, the deficiency or error must have some independent health and safety significance; LBP-11-23, 74 NRC 336 (2011)

Dominion Nuclear North Anna, LLC (Early Site Permit for North Anna ESP Site), CLI-07-27, 66 NRC 215, 222 (2007)

applicant’s environmental report must evaluate alternative sites to determine whether any is obviously superior to the proposed site; CLI-12-9, 75 NRC 471 n.312 (2012)

Dominion Nuclear North Anna, LLC (Early Site Permit for North Anna ESP Site), CLI-07-27, 66 NRC 215, 222 n.21 (2007)

Council on Environmental Quality regulations provide guidance on agency compliance with NEPA and are not binding on NRC when the agency has not expressly adopted them, but are entitled to considerable deference; LBP-12-17, 76 NRC 82 n.57 (2012); LBP-15-16, 81 NRC 636 (2015)

Dominion Nuclear North Anna, LLC (Early Site Permit for North Anna ESP Site), CLI-07-27, 66 NRC 215, 230 & n.79 (2007)

in mandatory hearings, Commission discussion regarding alternative site review supplements the environmental impact statement; LBP-11-26, 74 NRC 536 n.13 (2011)

Dominion Nuclear North Anna, LLC (Early Site Permit for North Anna ESP Site), CLI-07-27, 66 NRC 215, 235-36 & n.115 (2007)

information may be unavoidably incomplete or unavailable, and under those circumstances, a final environmental impact statement can overcome this deficiency if it states that fact, explains how the
missing information is relevant, sets forth the existing information, and evaluates the environmental impacts to the best of the agency’s ability; CLI-11-11, 74 NRC 444 n.94 (2011)
NRC looks to Council on Environmental Quality regulations for guidance, but is not bound by them; CLI-11-11, 74 NRC 444 (2011)

Dominion Nuclear North Anna, LLC (Early Site Permit for North Anna ESP Site), LBP-04-18, 60 NRC 253, 265 (2004)
although boards do not decide the merits at the contention admissibility stage, materials cited as the basis for a contention are subject to scrutiny to determine whether, on their face, they actually support the facts alleged; LBP-12-12, 75 NRC 774 (2012)
providing any material or document as the basis of a contention, without setting forth an explanation of its significance, is inadequate to support admission of the contention; LBP-12-12, 75 NRC 774 (2012); LBP-15-20, 81 NRC 865 (2015)

Dominion Nuclear North Anna, LLC (Early Site Permit for North Anna ESP Site), LBP-06-24, 64 NRC 360, 365 (2006)
the licensing board chose to terminate the contested portion of the proceeding after granting summary disposition on the only pending contentions, but the board did not state that its decision was compelled by either precedent or regulation; LBP-11-22, 74 NRC 285 (2011)

Dominion Nuclear North Anna, LLC (Early Site Permit for North Anna ESP Site), LBP-07-9, 65 NRC 539, permit issuance authorized, CLI-07-27, 66 NRC 215 (2007)
guidance on the role of licensing boards in mandatory proceedings is provided; LBP-12-21, 76 NRC 233-34 (2012)
mandatory proceedings for licensing of proposed uranium enrichment facility sites were conducted; LBP-11-11, 73 NRC 475 (2011)

Dominion Nuclear North Anna, LLC (Early Site Permit for North Anna ESP Site), LBP-07-9, 65 NRC 539, 559-60, permit issuance authorized, CLI-07-27, 66 NRC 215 (2007)
relative to NEPA, in mandatory hearings, boards are to determine whether the review conducted by NRC Staff has been adequate, but they need not rethink or redo every aspect of Staff’s environmental findings or undertake their own fact-finding activities; LBP-11-11, 73 NRC 476 (2011); LBP-11-26, 74 NRC 519 (2011)

the FOIA exemption for inter- or intra-agency materials incorporates the deliberative process privilege, which protects documents that are prepared to assist an agency, board, or official to arrive at a decision; LBP-13-5, 77 NRC 239 (2013)

Dr. James E. Bauer (Order Prohibiting Involvement in NRC-Licensed Activities), LBP-95-7, 41 NRC 323, 328 (1995)
NRC cannot take advantage of applicant’s ignorance of information that the agency itself was obligated to provide; LBP-13-3, 77 NRC 97 (2013)
the time for applicant to request a hearing should be tolled until notice is issued if NRC Staff fails to provide the notice and hearing opportunity mandated by 10 C.F.R. 2.103(b); LBP-11-19, 74 NRC 63 n.9 (2011)

DTE Electric Co. (Fermi Nuclear Power Plant, Unit 2), CLI-15-4, 81 NRC 221 (2015)
motion to reopen regarding spent nuclear fuel was denied; LBP-15-14, 81 NRC 592 (2015)
DTE Electric Co. (Fermi Nuclear Power Plant, Unit 2), CLI-15-18, 82 NRC 135, 146 (2015)
reply brief cannot introduce new issues or expand the scope of arguments advanced in the original petition, but rather must focus on actual or logical arguments presented in the original petition or raised in answers to it; LBP-15-26, 82 NRC 182 (2015)

burden of setting forth a clear and coherent argument for standing is generally on petitioner, but pro se petitioner is not held to the same standards of clarity and precision to which a lawyer might reasonably be expected to adhere; CLI-15-25, 82 NRC 394 (2015)
pleadings submitted by pro se petitioners are afforded greater leniency than petitions drafted with the assistance of counsel; LBP-15-13, 81 NRC 468 n.65 (2015)
LEGAL CITATIONS INDEX

CASES

DTE Electric Co. (Fermi Nuclear Power Plant, Unit 3), CLI-14-7, 80 NRC 1, 5 & n.11, 10 (2014)
where petition fails on the merits, the Commission need not address procedural issues; CLI-15-10, 81 NRC 539 n.8 (2015)

DTE Electric Co. (Fermi Nuclear Power Plant, Unit 3), CLI-14-9, 80 NRC 147 (2014)
NRC Rules of Practice provide the board with substantial authority to regulate hearing procedures; LBP-15-15, 81 NRC 615 n.114 (2015)

where petition fails on the merits, the Commission need not address procedural issues; CLI-15-10, 81 NRC 539 n.8 (2015)

Commission denied petition to supplement and declined to admit “placeholder” contention; CLI-15-13, 81 NRC 564 (2015)

DTE Electric Co. (Fermi Nuclear Power Plant, Unit 3), CLI-15-10, 81 NRC 535, 564 n.46 (2015)
licensing board’s jurisdiction terminates when there are no longer any contested matters pending before it; LBP-15-29, 82 NRC 253 (2015)

DTE Electric Co. (Fermi Nuclear Power Plant, Unit 3), CLI-15-12, 81 NRC 551 (2015)
contention that supplementation of the environmental impact statement is necessary to allow members of the public to lodge placeholder contentions challenging Commission reliance, in individual licensing proceedings, on the Continued Storage GEIS and Continued Storage Rule is inadmissible; CLI-15-10, 81 NRC 538 n.7 (2015); CLI-15-13, 81 NRC 564 (2015); CLI-15-15, 81 NRC 805 (2015)

suspension request that would have halted final licensing decisions pending action on a petition for rulemaking regarding the Staff’s review of the potential expedited transfer of spent fuel from pools to dry casks was denied; CL1-15-13, 81 NRC 564 n.42 (2015)

DTE Electric Co. (Fermi Nuclear Power Plant, Unit 3), CLI-14-7, 80 NRC 1, 7 n.22 (2014)

DTE Electric Co. (Fermi Nuclear Power Plant, Unit 3), CLI-14-9, 80 NRC 147, 149-50 (2014)
Commission exercised its supervisory authority and dismissed proposed waste confidence safety contention and denied suspension petitions; CL1-15-13, 81 NRC 563-64 (2015); LBP-15-1, 81 NRC 22 (2015); LBP-15-8, 81 NRC 394 (2015); LBP-15-9, 81 NRC 397 (2015)

DTE Electric Co. (Fermi Nuclear Power Plant, Unit 3), CLI-14-10, 80 NRC 157, 164 n.38 (2014)
boards are given broad discretion in the conduct of NRC adjudicatory proceedings, and the Commission generally defers to board case-management decisions; LBP-15-15, 81 NRC 615 n.114 (2015)

DTE Electric Co. (Fermi Nuclear Power Plant, Unit 3), CLI-14-10, 80 NRC 157, 164 n.39 (2014)

DTE Electric Co. (Fermi Nuclear Power Plant, Unit 3), CLI-14-9, 80 NRC 147, 149-50 (2014)
where petition fails on the merits, the Commission need not address procedural issues; CLI-15-10, 81 NRC 539 n.8 (2015)

Dubinsky v. Mermart, LLC, 595 F.3d 812, 818 (8th Cir. 2010)

absence of any reference to “cumulative impacts” in a document incorporated by reference negates any intention to incorporate any discussion of cumulative impacts from these prior documents into an environmental report, consistent with the maxim of expressio unius est exclusio alterius, meaning that the expression of one thing is to the exclusion of another; LBP-12-24, 76 NRC 515-16 (2012)

Dubois v. U.S. Department of Agriculture, 102 F.3d 1273, 1291 (1st Cir. 1996)

NEPA exists in part to ensure that important environmental effects will not be overlooked; LBP-12-10, 75 NRC 679-80 (2012)

NEPA has a dual purpose of ensuring that federal officials fully take into account environmental consequences of a federal action before reaching major decisions, and informing the public, Congress, and other agencies of those consequences; LBP-11-35, 74 NRC 766 n.13 (2011); LBP-12-1, 75 NRC 34 (2012)

petitions to suspend multiple license renewal proceedings in view of an Inspector General’s report on the agency’s license renewal process were considered pursuant to the Commission’s inherent supervisory authority over agency proceedings; CLI-11-5, 74 NRC 158 (2011)

requests to suspend or hold proceedings in abeyance following the September 11 terrorist attacks, as well as more recently, were considered pursuant to the Commission’s inherent supervisory authority over agency proceedings; CLI-11-5, 74 NRC 158 (2011)

petition for suspension of proceeding following 9/11 attack was denied; CLI-11-5, 74 NRC 156 (2011)

petition for interlocutory review that questions the very structure of the two-step licensing process is suitable for Commission consideration; CLI-13-3, 77 NRC 55 n.18 (2013)

petitions to review interlocutory board orders typically are denied summarily, without engaging in extensive merits discussion; CLI-13-3, 77 NRC 55 n.18 (2013)

licensing of the MOX facility has been governed by a two-part licensing process designed specifically for it; LBP-14-1, 79 NRC 124 (2014)

at the Construction Authorization Request stage, the board dismissed a material control and accounting contention as moot, pending submittal of applicant’s Fundamental Nuclear Material Control Plan which would require inclusion of a detailed MC&A program; LBP-14-1, 79 NRC 45 (2014)

boards may continue the adjudicatory proceeding until the deadlines for filing proposed new contentions have expired and the board has resolved all admitted and proposed contentions filed within the deadlines; LBP-11-22, 74 NRC 271 (2011)

proceedings are terminated after all admitted contentions had been resolved and the time for late-filed contentions arising out of information in the Staff’s final safety evaluation report has expired without the filing of any such contentions; LBP-11-22, 74 NRC 273 n.75, 285 (2011)

Duke Energy Carolinas, LLC (William States Lee III Nuclear Station, Units 1 and 2), CLI-09-21, 70 NRC 927, 931 (2009)

for power reactors, NRC Staff review should encompass emissions from the uranium fuel cycle as well as from construction and operation of the facility to be licensed; LBP-11-26, 74 NRC 541 (2011)
if impacts are remote or speculative, the environmental impact statement need not discuss them, including greenhouse gas emissions; LBP-11-7, 73 NRC 301 (2011)
under NEPA, NRC must assess the environmental impacts of a proposed facility; LBP-11-26, 74 NRC 545 (2011)
under NEPA, NRC Staff must consider the cumulative impact of greenhouse gas emissions from a proposed facility; LBP-11-7, 73 NRC 307 (2011); LBP-11-26, 74 NRC 545 (2011)

Duke Energy Carolinas, LLC (William States Lee III Nuclear Station, Units 1 and 2), LBP-08-17, 68 NRC 431, 439 (2008)
in the standing analysis, boards construe the petition in favor of the petitioner; CLI-14-2, 79 NRC 19 n.45 (2014)

Duke Energy Carolinas, LLC (William States Lee III Nuclear Station, Units 1 and 2), LBP-08-17, 68 NRC 431, 443 (2008)
consideration of an admissible contention can be deferred, where appropriate, but an inadmissible one cannot; LBP-11-28, 74 NRC 610 (2011)

Duke Energy Corp. ( Catawba Nuclear Station, Units 1 and 2), CLI-04-6, 59 NRC 62, 67 (2004)
board determination of expert’s need to know with regard to a document withheld as safeguards information was reversed; LBP-11-9, 73 NRC 405 n.87 (2011)
licensing boards are not empowered to superintend, to any extent, the conduct of Staff technical reviews; LBP-11-30, 74 NRC 633 (2011); LBP-15-2, 81 NRC 52 (2015)
recognizing its lack of authority to supervise NRC Staff’s review, the board referred its concerns to the Commission; CLI-12-4, 75 NRC 156 (2012)

petitioner was denied access to a safeguards-protected design-related document on the basis of his lacking a need to know; LBP-11-9, 73 NRC 410 (2011)

Duke Energy Corp. ( Catawba Nuclear Station, Units 1 and 2), CLI-04-6, 59 NRC 62, 71 (2004)
review at the end of a case would be meaningless if the Commission could not later, on appeal from a final board decision, rectify an erroneous disclosure order; CLI-13-3, 77 NRC 55 n.18 (2013)

Duke Energy Corp. ( Catawba Nuclear Station, Units 1 and 2), CLI-04-6, 59 NRC 62, 74 (2004)
boards lack authority to direct NRC Staff’s regulatory reviews; LBP-12-19, 76 NRC 193 n.41 (2012); LBP-13-7, 77 NRC 326 (2013)
boards lack authority to direct the Secretary’s administrative activities regarding the handling of documents; CLI-11-13, 74 NRC 641 (2011)
boards lack authority to order NRC Staff to bring licensee employees into settlement negotiations; LBP-14-4, 79 NRC 369 (2014)

limited interlocutory appeal right attaches only when the board has fully ruled on the initial intervention petition, that is, when it has admitted or rejected all proposed contentions; CLI-14-3, 79 NRC 36 n.30 (2014)

Duke Energy Corp. ( Catawba Nuclear Station, Units 1 and 2), CLI-04-11, 59 NRC 203, 208 (2004)
for a hearing petitioner to take an appeal pursuant to section 2.311(c), petitioner must claim that, after considering all pending contentions, the board has erroneously denied a hearing; CLI-14-3, 79 NRC 36 n.31 (2014)
license applicant may take an appeal under 2.311(d)(1) if it contends that, after considering all pending contentions, the board has erroneously granted a hearing to the petitioner; CLI-14-3, 79 NRC 36 n.31 (2014)

Duke Energy Corp. ( Catawba Nuclear Station, Units 1 and 2), CLI-04-11, 59 NRC 203, 208 n.12 (2004)
NRC often refers to the Statement of Considerations as an aid in interpreting the agency’s regulations; LBP-14-9, 80 NRC 52 (2014)
when the Commission has determined that compliance with a regulation is sufficient to provide for reasonable assurance of public health and safety; a licensing board cannot impose requirements that exceed those in the regulation; LBP-15-20, 81 NRC 848 n.108 (2015)

boards have considerable discretion in their evidentiary rulings; CLI-15-6, 81 NRC 383 (2015)

based on his qualifications in education and experience, intervenors' witness was found qualified to testify but not specifically on issues related to nuclear engineering, such as events at the Fukushima Dai-ichi plant, core damage frequency calculations, and effectiveness of SAMDAs; LBP-11-38, 74 NRC 834 (2011)

intervenors have demonstrated their ability to contribute to the development of a sound record where they have put forward in support of those contentions the views of a witness whose expertise has been recognized in other NRC proceedings; LBP-11-9, 73 NRC 413 n.123 (2011)

guidance documents are, by nature, only advisory and need not apply in all situations and do not themselves impose legal requirements on licensees; LBP-13-13, 78 NRC 284 n.168 (2013)

contention presenting a genuine dispute on a material issue should either reference specific portions of the application in dispute or identify omissions in the application, as well as provide supporting reasons; LBP-15-1, 81 NRC 37 n.117 (2015)

information offered in evidence, even if not specifically stated in the original contention and bases, may be relevant if it falls within the envelope, reach, or focus of the contention when read with the original bases offered for it; LBP-12-17, 76 NRC 85 (2012)

license amendment request must provide sufficient documentation and analysis to show that licensee has complied with relevant requirements, thereby demonstrating that the amended license will continue to provide reasonable assurance of adequate protection of public health and safety; CLI-15-22, 82 NRC 316 (2016)

boards admit contentions, not their supporting bases; LBP-11-2, 73 NRC 56 (2011)

scope of the license renewal proceeding on safety-related issues is limited to plant structures and components that will require an aging management review for the period of extended operation under the renewed license and the plant’s systems, structures, and components that are subject to an evaluation of time-limited aging analyses; CLI-15-21, 82 NRC 304 (2015); LBP-15-6, 81 NRC 321 (2015)

boards may not commence a hearing on environmental issues before the final environmental impact statement is issued, and may only commence a hearing with respect to safety issues prior to issuance of the final safety evaluation report if it will expedite the proceeding without adversely impacting the Staff’s ability to complete its evaluations in a timely manner; LBP-11-22, 74 NRC 272 n.69 (2011)

requests to suspend or hold proceedings in abeyance following the September 11 terrorist attacks, as well as more recently, were considered pursuant to the Commission’s inherent supervisory authority over agency proceedings; CLI-11-5, 74 NRC 158 (2011)
**LEGAL CITATIONS INDEX**

**CASES**

*Duke Energy Corp.* (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-01-27, 54 NRC 385, 388, 390-91 (2001)

abeyance of proceeding denied where proceeding was at an early stage, there was no risk of immediate threat to public health and safety, there were non-terrorism-related contentions to be considered, and the only “harm” to petitioner would be inevitable litigation costs; CLI-11-5, 74 NRC 157, 163 (2011)

*Duke Energy Corp.* (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-01-27, 54 NRC 385, 388, 391 (2001)

any changes in NRC rules post-9/11 that might bear on license renewal reviews could be addressed via late-filed contentions; CLI-11-5, 74 NRC 157 (2011)

post-9/11 abeyance of proceeding is unnecessary because there would be time to apply any new rules that might result from the generic review of terrorism-related issues; CLI-11-5, 74 NRC 157 (2011)

*Duke Energy Corp.* (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-01-27, 54 NRC 385, 388, 392 (2001)

motion to dismiss operating license renewal application or hold the proceeding in abeyance pending the Commission’s comprehensive post-September 11 review of its rules and policies is denied; CLI-11-5, 74 NRC 157 (2011)

*Duke Energy Corp.* (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-02-14, 55 NRC 278 (2002)

request for a protective stay to hold the proceeding in abeyance indefinitely pending potential future events is inconsistent with NRC’s longstanding interest in sound case management and regulatory finality and would be unfair to the other parties; CLI-14-6, 79 NRC 448-49 (2014)

*Duke Energy Corp.* (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-02-14, 55 NRC 278 (2002)

contention alleging that license renewal application fails to consider plutonium fuel use, which would place it outside the current licensing basis, is inadmissible; LBP-13-8, 78 NRC 23 (2013)

*Duke Energy Corp.* (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-02-14, 55 NRC 278, 292 (2002)

contention questioning whether future anticipated use of MOX fuel is sufficiently definite to constitute a proposal under the law, with a connection, cumulative impact, interdependence, or similar relationship to matters at issue in a license renewal proceeding to warrant being addressed in the supplemental environmental impact statement is admissible; LBP-14-6, 79 NRC 417 (2014)

inquiry into future, inchoate plans of licensee would generally invite petitioners in license renewal cases to raise safety issues involving a myriad of possible future license amendments; LBP-13-8, 78 NRC 23 (2013)

*Duke Energy Corp.* (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-02-14, 55 NRC 278, 293 (2002)

nothing in NRC case law or regulations suggests that license renewal is an occasion for far-reaching speculation about unimplemented and uncertain plans; LBP-14-6, 79 NRC 417 (2014)

*Duke Energy Corp.* (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-02-14, 55 NRC 278, 294 (2002)

if licensee endeavors to use MOX fuel during the license renewal term, it will need to seek a license amendment; LBP-13-8, 78 NRC 23 (2013)

*Duke Energy Corp.* (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-02-14, 55 NRC 278, 294-95 (2002)

to establish that cumulative impacts must be addressed, petitioner must first show that any proposal applicant has made is so interdependent with the application at issue that it would be unwise or irrational to complete one without the other; LBP-14-6, 79 NRC 419, 422 (2014)

*Duke Energy Corp.* (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-02-14, 55 NRC 278, 294-95 (2002)

to bring NEPA into play, a possible future action must at least constitute a proposal pending before the agency (i.e., ripeness), and must be in some way interrelated with the action that the agency is actively considering (i.e., nexus); LBP-14-6, 79 NRC 440 (2014)
possible future action must at least constitute a proposal pending before the agency to be ripe for
adjudication, and to establish that cumulative impacts of the action must be addressed, petitioner
must first show that any proposal applicant has made is so interdependent with the application at
issue that it would be unwise or irrational to complete one without the other; LBP-14-6, 79 NRC 414 (2014)
to bring NEPA into play, a possible future action must at least constitute a proposal pending before
the agency (i.e., ripeness), and must be in some way interrelated with the action that the agency is
actively considering (i.e., nexus); LBP-13-10, 78 NRC 145-46 (2013)
Duke Energy Corp. (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2),
CLI-02-14, 55 NRC 278, 297 (2002)
NRC generally reviews severe accident mitigation alternatives using a cost-benefit analysis, and
SAMAs that are not cost-beneficial need not be implemented by licensee; LBP-12-18, 76 NRC 152 (2012)
Duke Energy Corp. (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2),
CLI-02-17, 56 NRC 1, 2 (2002)
cost-effective candidate severe accident mitigation alternatives are identified by comparing the
annualized cost of the mitigation measure with the benefit as determined by the averted cost of
severe accidents (consequences), as weighted by the probability of the accidents’ occurrence;
LBP-11-13, 73 NRC 565 (2011)
severe accident mitigation alternatives analysis evaluates the degree to which specific additional
mitigation measures may reduce the risk of various accident scenarios on a site-specific basis;
LBP-11-13, 78 NRC 286 (2013)
Duke Energy Corp. (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2),
CLI-02-17, 56 NRC 1, 5 (2002)
severe accident mitigation alternatives analyses identify and assess possible plant changes, such as
hardware modifications and improved training or procedures, that could cost-effectively reduce the
radiological risk from a severe accident; LBP-11-13, 73 NRC 565 (2011); LBP-11-17, 74 NRC 21 (2011);
LBP-11-18, 74 NRC 40 n.60 (2011); LBP-15-5, 81 NRC 260 (2015)
Duke Energy Corp. (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2),
CLI-02-17, 56 NRC 1, 7 (2002)
a SAMA analysis fulfills the requirement to provide a consideration of alternatives to mitigate severe
accidents and therefore is governed by NEPA’s rule of reason; LBP-11-13, 73 NRC 566 (2011)
although a contention might have been more detailed or otherwise better supported, petitioners have
done enough to raise a question about the adequacy of the probability figures used in applicant’s
SAMA analysis, namely, whether they should have incorporated or otherwise acknowledged
information from a Sandia study; LBP-12-18, 76 NRC 165 (2012)
hard look under NEPA is subject to a rule of reason, and consideration of environmental impacts need
not address all theoretical possibilities, but only those that have some reasonable possibility of
occurring; LBP-15-16, 81 NRC 638 (2015)
whether a SAMA may be worthwhile to implement is based upon a cost-benefit analysis, i.e., a weighing of the cost to implement with the reduction in risks to public health, occupational health, and offsite and onsite property; LBP-11-2, 73 NRC 63 (2011)

for an admissible contention petitioners did not have to prove outright that a SAMA analysis was deficient; CLI-11-11, 74 NRC 443 (2011)

portion of a contention asserting that applicant failed to consider the results of a particular study in its SAMA analysis is admissible; CLI-11-11, 74 NRC 443 (2011)

licensing boards must admit an adequately supported contention alleging that the agency’s NEPA analysis of severe accident mitigation alternatives is deficient; LBP-12-18, 76 NRC 164 (2012)

petitioner or intervenor need not prove that the analysis of mitigation is deficient, it being sufficient if the board finds that a sufficient genuine dispute existed concerning the alleged deficiency; LBP-12-18, 76 NRC 165 (2012)

every conceivable mitigation alternative does not require a detailed analysis in the final environmental impact statement; LBP-12-18, 76 NRC 164 (2012)

petitioner must approximate the relative cost and benefit of a challenged SAMA or provide at least some ballpark consequence and implementation costs should the SAMA be performed; CLI-11-11, 74 NRC 442 (2011)

whether a severe accident mitigation alternative is worthy of more detailed analysis in an environmental report or supplemental environmental impact statement hinges on whether it may be cost-beneficial to implement; CLI-12-3, 75 NRC 149 n.111 (2012)

license renewal safety review is limited to the matters specified in 10 C.F.R. Part 54, which focus on the management of aging for certain systems, structures, and components, and review of time-limited aging analyses; LBP-11-21, 74 NRC 126 (2011); LBP-15-5, 81 NRC 259 (2015)

license renewal applications must contain any significant new information relevant to environmental impacts of which applicant is aware, and new information generally may be challenged in individual adjudications; CLI-12-19, 76 NRC 385 n.51 (2012)
the scope of a contention is limited to the issues of law and fact pleaded with particularity in the contention and any factual and legal material in support thereof; LBP-12-5, 75 NRC 239 (2012)
the scope of an admitted contention is determined by the bases set forth in support of the contention; LBP-11-14, 73 NRC 699 (2011); LBP-12-17, 76 NRC 85 (2012); LBP-12-23, 76 NRC 463 (2012)

Duke Energy Corp. (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-02-28, 56 NRC 373, 382 (2002)
although a contention contesting applicant’s environmental report generally may be viewed as a challenge to the NRC Staff’s subsequent draft environmental impact statement, new claims must be raised in a new or amended contention; LBP-13-10, 78 NRC 134 (2013); LBP-14-5, 79 NRC 383-84 & n.32 (2014)

board’s designation of a contention as a contention of omission is a means to limit its scope; CLI-11-11, 74 NRC 443 n.92 (2011)

contentions challenging an environmental report may be viewed as a challenge to the NRC Staff’s subsequent draft or final environmental impact statement; CLI-12-1, 75 NRC 61 n.107 (2012)
new or amended contentions related to portions of the draft environmental impact statement that differ from the environmental report must be timely filed under section 2.309(c) and meet the contention admissibility standards of section 2.309(f)(1) to be admitted; LBP-13-9, 78 NRC 47 n.29 (2013)

the draft environmental impact statement might cure alleged omissions or deficiencies in the environmental report by including additional analysis that addresses such omissions or deficiencies; LBP-11-7, 73 NRC 276 n.150 (2011)
when omissions are cured by the subsequent issuance of licensing-related documents, a contention of omission must be disposed of or modified; LBP-12-5, 75 NRC 238 (2012)

Duke Energy Corp. (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-02-28, 56 NRC 373, 382, 383 n.44 (2002)
a contention contesting an applicant’s environmental report generally may be viewed as a challenge to the NRC Staff’s subsequent draft EIS, but new claims must be raised in a new or amended contention; LBP-11-1, 73 NRC 26 n.12 (2011)

Duke Energy Corp. (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-02-28, 56 NRC 373, 382-83 (2002)
a contention based solely upon omissions from the environmental report is rendered moot when the missing information is supplied; LBP-11-14, 73 NRC 598 (2011)
contentions of omission are appropriate when an issue that by law should be discussed is not, whereas contentions of adequacy are those that assert the existing discussion of an issue is incomplete; CLI-15-25, 82 NRC 403 n.95 (2015)
issues framed in contentions challenging an application generally encompass two categories alleging an informational or analytical omission from the application and/or alleging that information/analysis in the application is inadequate (as opposed to missing); LBP-13-10, 78 NRC 132 n.6 (2013)
there is a difference between contentions that merely allege an omission of information and those that challenge substantively and specifically how particular information has been discussed in a license application; LBP-13-9, 78 NRC 47-48 n.31 (2013); LBP-14-5, 79 NRC 384 n.34 (2014)
where a contention alleges omission of particular information or an issue from an application, and the information is later supplied by the applicant or considered by NRC Staff in a draft environmental impact statement, the contention is moot, and intervenors must timely file a new or amended contention to raise specific challenges regarding the new information; LBP-12-5, 75 NRC 247 (2012)

Duke Energy Corp. (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-02-28, 56 NRC 373, 382-84 (2002)
contentions of omission and contentions of inadequacy are defined; LBP-15-5, 81 NRC 284 n.213 (2015)
licensing boards have commonly afforded intervenors the opportunity to propose new contentions to challenge the new information, even though no contention is pending; LBP-11-22, 74 NRC 277 (2011)
petitioners’ challenge to the adequacy of applicant’s existing analysis of solar and wind as alternative energy sources is not a contention of omission; CLI-12-8, 75 NRC 406 n.72 (2012)
a significant change in the nature of the purported NEPA imperfection, from one focusing on comprehensive information omission to one centered on a deficient analysis of subsequently supplied information, warrants issue modification by the complaining party because otherwise, absent any new pleading, the other parties would be left to speculate whether the concerns first expressed had been satisfied by the new information; LBP-12-5, 75 NRC 247 n.124 (2012)

admitted contentions of omission may be rendered moot by subsequent license-related documents filed by the NRC Staff that address the alleged omission; LBP-13-9, 78 NRC 48 (2013)

alleged defects in applicant’s environmental report may be mooted by the content of NRC’s environmental impact statement or supplemental environmental impact statement; LBP-11-28, 74 NRC 608 (2011)

contention of omission that has been admitted may be rendered moot by subsequent license-related documents filed by NRC Staff that address the alleged omission; LBP-14-5, 79 NRC 384-85 & n.35 (2014)

facts relied on to support a contention of omission need not show that the facility cannot be safely operated, but only that the application is incomplete; LBP-15-5, 81 NRC 258 (2015)

if a contention is rendered moot by information supplied by applicant or considered by Staff in a draft EIS, the party that filed the original contention of omission must file a new or amended contention if it wishes to challenge the adequacy or sufficiency of the NRC Staff’s treatment of the relevant issue; LBP-13-9, 78 NRC 48 n.33 (2013)

if a motion for summary disposition is granted, then the party that filed the original contention of omission must file a new or amended contention if it wishes to challenge the adequacy or sufficiency of the NRC Staff’s treatment of the relevant issue; LBP-14-5, 79 NRC 385 (2014)

if applicant cures the omission cited in a contention, the contention will become moot unless revised by intervenors; LBP-15-5, 81 NRC 258 (2015)

intervenor may need to amend an admitted environmental contention based on applicant’s environmental report, or file a new contention altogether challenging Staff’s draft environmental impact statement; LBP-12-12, 75 NRC 768 (2012)

the board may consider environmental contentions made against an applicant’s ER as challenges to an agency’s subsequent DEIS only as long as the DEIS analysis or discussion at issue is essentially in para materia with the ER analysis or discussion that is the focus of the contention; LBP-11-1, 73 NRC 26 n.14 (2011)

when omissions are cured by the subsequent issuance of licensing-related documents, intervenor must timely file a new or amended contention if it intends to challenge the sufficiency of the new information; LBP-12-5, 75 NRC 238 (2012)

where a contention alleges the omission of particular information or an issue from an application, and the information is later supplied by the applicant, the contention is moot; LBP-11-16, 73 NRC 705 (2011); LBP-12-27, 76 NRC 610 (2012)

where the information in the DEIS is so different from the information in the ER that the DEIS dispenses with and moots the issues raised in the original contention, intervenor must file a new or amended contention against the DEIS; LBP-11-1, 73 NRC 26 (2011)

boards may construe an admitted contention contesting the environmental report as a challenge to a subsequently issued draft or final environmental impact statement without the need for intervenors to file a new or amended contention; LBP-12-23, 76 NRC 471 n.159 (2012)

under the migration tenet, boards may construe an admitted contention contesting the environmental report as a challenge to the subsequently issued draft or final environmental impact statement without the necessity for Intervenors to file a new or amended contention; LBP-12-12, 75 NRC 768 n.140 (2012)

a board’s conclusion that a contention is one of omission is driven by its examination of the contention, including its underlying arguments; LBP-11-6, 73 NRC 200 (2010)
based on its language, a contention can be characterized as a contention of omission, a contention of adequacy, or both; LBP-13-9, 78 NRC 47-48 n.31 (2013); LBP-14-5, 79 NRC 384 (2014)

Duke Energy Corp. (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-02-28, 56 NRC 373, 386 (2002)

hearing petitioners have an ironclad obligation to examine the publicly available documentary material pertaining to the facility in question with sufficient care to uncover any information that could serve as the foundation for a specific contention; LBP-11-9, 73 NRC 403 n.73, 405 (2011)

NRC proceedings would prove unmanageable and unfair to the other parties if an intervenor could freely change an admitted contention at will as litigation progresses; CLI-12-1, 75 NRC 56 (2012)

Duke Energy Corp. (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-02-28, 56 NRC 373, 388 n.77 (2002)

a severe accident mitigation alternative need not be implemented during a particular plant’s license renewal review if the Commission is concurrently resolving the safety improvement achieved by that SAMA through a generic process attached to the agency’s review of all plants’ current licensing bases; LBP-11-17, 74 NRC 25 (2011)

NEPA does not mandate the particular decisions that an agency must reach, only the process the agency must follow while reaching decisions; LBP-11-17, 74 NRC 27 n.77 (2011)

NRC shall require backfitting of a facility only when it determines that there will be a substantial increase in the overall protection of the public health and safety or the common defense and security and the direct and indirect costs of implementation are justified in view of this increased protection; LBP-11-17, 74 NRC 22 n.53 (2011)

Duke Energy Corp. (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-03-17, 58 NRC 419, 427 (2003)

petitioners must raise and reasonably specify at the outset their objections to a license application; CLI-12-1, 75 NRC 56 (2012)

Duke Energy Corp. (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-03-17, 58 NRC 419, 428 (2003)

contention pleading standards require petitioners to plead specific grievances, not simply to provide general notice pleadings; CLI-15-18, 82 NRC 147 n.58 (2015); LBP-11-29, 74 NRC 618 (2011)

Duke Energy Corp. (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-03-17, 58 NRC 419, 429 (2003)

intervenors are expected to file contentions on the basis of applicant’s environmental report and not delay their contentions until after NRC Staff issues its environmental analysis; CLI-12-13, 75 NRC 687 n.31 (2012)

Duke Energy Corp. (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-03-17, 58 NRC 419, 431 (2003)

a SAMA analysis need only ensure that the environmental consequences of the project have been fairly evaluated; LBP-11-2, 73 NRC 64 (2011)

adjudicatory hearings are not environmental impact statement editing sessions wherein the board sits to parse and fine-tune EISs; CLI-12-1, 75 NRC 57 (2012); CLI-12-6, 75 NRC 369 (2012); LBP-13-13, 78 NRC 286 n.183 (2013)

because severe accident mitigation alternatives analysis is site-specific, NEPA demands no fully developed plan or detailed examination of specific measures that will be used to mitigate adverse environmental effects; LBP-11-18, 74 NRC 37 (2011); LBP-11-23, 74 NRC 330 (2011)

contentions must directly controvert relevant sections of the environmental report; LBP-11-16, 73 NRC 677 (2011)

severe accident mitigation alternatives analyses, as issues of mitigation, need only be discussed in sufficient detail to ensure that environmental consequences of the proposed project have been fairly evaluated; LBP-13-13, 78 NRC 453 (2013)

sufficiency of the NRC’s hard look at the benefits of SAMAs in comparison to their costs is subject to litigation in a license renewal proceeding; LBP-11-17, 74 NRC 21 (2011)

the burden is on the proponent of a contention to show that NRC Staff’s analysis or methodology is unreasonable or insufficient; CLI-12-6, 75 NRC 369 (2012)
to be successful, intervenors must demonstrate with adequate support that NRC Staff failed to take a hard look at important environmental questions or failed to provide a reasonable analysis; LBP-13-13, 78 NRC 286 (2013)

_Duke Energy Corp._ (McGuire Nuclear Station, Units 1 and 2; Catawba Nuclear Station, Units 1 and 2), CLI-03-17, 58 NRC 419, 431-32 (2003)
in judging whether NRC Staff took the NEPA-mandated hard look, the Board reviewed the proposed mitigation programs to ensure that sufficient detail was provided on mitigation measures to show a fair agency evaluation of mitigation and environmental consequences, and that NRC Staff did not ignore or minimize pertinent environmental effects; LBP-15-16, 81 NRC 688 (2015)

_Duke Energy Corp._ (Oconee Nuclear Station, Units 1, 2, and 3), CLI-99-11, 49 NRC 328, 333-34 (1999)
dispute at issue is material if its resolution would make a difference in the outcome of the licensing proceeding; CLI-14-2, 79 NRC 30 (2014)

under 10 C.F.R. 2.309(f)(1)(iv), intervenors need only demonstrate that the issue raised in the contention is material, i.e., that it would make a difference in the licensing decision; LBP-11-7, 73 NRC 292 (2011)

where implementation of a building code could not make a difference in the outcome of the proceeding, it cannot be material; LBP-11-7, 73 NRC 292 (2011)

_Duke Energy Corp._ (Oconee Nuclear Station, Units 1, 2, and 3), CLI-99-11, 49 NRC 328, 334 (1999)

although an admissible contention requires no more than some minimal factual and legal foundation in support, the Commission expects that in almost all instances petitioner must go beyond merely quoting a request for additional information to justify admission; LBP-15-1, 81 NRC 42 (2015)

contention admissibility requirements seek to ensure that NRC hearings serve to adjudicate genuine, substantive safety and environmental issues placed in contention by qualified intervenors; CLI-15-8, 81 NRC 504 (2015); LBP-11-6, 73 NRC 171 (2010)

contention rule reflects a deliberate effort to prevent the major adjudicatory delays caused in the past by ill-defined or poorly supported contentions that were admitted for hearing although based on little more than speculation; CLI-15-8, 81 NRC 504 (2015)

contentions shall not be admitted if at the outset they are not supported by some alleged fact or facts demonstrating a genuine material dispute; LBP-12-8, 75 NRC 561 (2012)

intervention petitioner may not attack generic NRC requirements or regulations or express generalized grievances about NRC policies; CLI-15-9, 81 NRC 527-28 n.98 (2015)

it is intervention petitioner’s responsibility to put others on notice as to the issues it seeks to litigate; CLI-11-11, 74 NRC 457 (2011)

NRC deliberately raised contention admissibility standards to relieve the hearing delays that poorly defined or supported contentions had caused in the past; CLI-12-5, 75 NRC 307 (2012); CLI-12-8, 75 NRC 396 (2012)
prior to NRC’s 1989 rule revision, intervenors were able to trigger hearings after merely copying a contention from another proceeding, even though these admitted intervenors often had negligible knowledge of the issues and no direct case to present; CLI-12-5, 75 NRC 307 (2012); CLI-12-8, 75 NRC 396 (2012)

the Commission toughened its contention admissibility rule in 1989 to ensure that only intervenors with genuine and particularized concerns participate in NRC hearings; LBP-11-6, 73 NRC 171 (2010)

the contention admissibility rule serves to ensure that admitted contentions focus on real disputes that can be resolved in an adjudication, establish a sufficient factual and legal foundation to warrant further inquiry, and put other parties on notice of the disputed issues so they will know precisely those claims they must support or oppose; LBP-11-6, 73 NRC 171 n.17 (2010)

the multifactor contention admissibility test in section 2.309(f)(1) was crafted by the Commission to raise the threshold bar for an admissible contention; LBP-11-6, 73 NRC 170-71 (2010)
to meet the section 2.309(f)(1)(v) requirement for providing factual and expert support, petitioners must proffer at least some minimal factual and legal foundation in support of their contentions; LBP-15-1, 81 NRC 38 (2015)
to trigger a full adjudicatory hearing, petitioners must be able to proffer at least some minimal factual and legal foundation in support of their contentions; LBP-12-27, 76 NRC 595 (2012)
under the previous contention admissibility rule, a contention could be admitted and litigated based on little more than speculation, with parties attempting to unearth a case through cross-examination; LBP-11-6, 73 NRC 171 (2010)

Duke Energy Corp. (Oconee Nuclear Station, Units 1, 2, and 3), CLI-99-11, 49 NRC 328, 334-35 (1999) admissible contention must meet six pleading requirements; LBP-15-17, 81 NRC 777 (2015) contention admissibility criteria are strict by design; LBP-11-16, 73 NRC 655 (2011); LBP-11-21, 74 NRC 125 (2011); LBP-12-25, 76 NRC 545 (2012); LBP-15-5, 81 NRC 258 (2015); LBP-15-20, 81 NRC 867-68 (2015) NRC deliberately raised the admission standards for contentions to obviate serious hearing delays caused in the past by poorly defined or poorly supported contentions; LBP-15-1, 81 NRC 38 (2015)

Duke Energy Corp. (Oconee Nuclear Station, Units 1, 2, and 3), CLI-99-11, 49 NRC 328, 335 (1999) contention admissibility criteria are strict by design but should not be turned into a fortress to deny intervention; LBP-11-6, 73 NRC 171 (2010); LBP-15-20, 81 NRC 855-56 (2015) contentions shall not be admitted if at the outset they are not described with reasonable specificity or are not supported by some alleged fact or facts demonstrating a genuine material dispute with applicant; LBP-12-8, 75 NRC 548 (2012); LBP-15-1, 81 NRC 38 (2015) factual basis requirement for contention admission is intended to preclude contentions from being admitted where an intervenor has no facts to support its position and instead contemplates using discovery or cross-examination as a fishing expedition that might produce relevant supporting facts; LBP-14-6, 79 NRC 442 (2014) intervenors may use discovery to develop a case once contentions are admitted; CLI-12-5, 75 NRC 307 (2012); CLI-12-8, 75 NRC 396 (2012)

Duke Energy Corp. (Oconee Nuclear Station, Units 1, 2, and 3), CLI-99-11, 49 NRC 328, 336 (1999) asking questions and seeking additional information is an essential part of the NRC’s licensing process, and such questioning does not automatically give rise to an admissible contention; LBP-12-27, 76 NRC 605 n.130 (2012) issuance of a request for additional information does not alone establish deficiencies in an application or that NRC Staff will go on to find any of applicant’s clarifications, justifications, or other responses to be unsatisfactory; CLI-15-8, 81 NRC 506 n.47 (2015) petitioners must do more than rest on the mere existence of requests for additional information as a basis for their contention; CLI-15-8, 81 NRC 506 n.47 (2015) requests for additional information are a routine means for NRC Staff to ask for clarification or additional corroborating information from an applicant; CLI-15-8, 81 NRC 506 (2015)

Duke Energy Corp. (Oconee Nuclear Station, Units 1, 2, and 3), CLI-99-11, 49 NRC 328, 336-38 (1999) mere general references to NRC Staff’s requests for additional information do not provide the requisite reasonable specificity to support admission of a contention; LBP-12-5, 75 NRC 310 n.52 (2012) petitioners must do more than rest on the mere existence of requests for additional information as a basis for their contention; CLI-15-8, 81 NRC 506 n.47 (2015) requests for additional information are a routine means for NRC Staff to ask for clarification or additional corroborating information from an applicant; CLI-15-8, 81 NRC 506 (2015)

Duke Energy Corp. (Oconee Nuclear Station, Units 1, 2, and 3), CLI-99-11, 49 NRC 328, 337 (1999) contention rules are intended to prevent admission of ill-defined contentions where petitioners at the outset have not set forth particularized concerns; CLI-12-5, 75 NRC 334 n.197 (2012)

Duke Energy Corp. (Oconee Nuclear Station, Units 1, 2, and 3), CLI-99-11, 49 NRC 328, 338-39 (1999) although boards may appropriately view petitioner’s support for its contention in a light favorable to petitioner, they cannot do so by ignoring the contention admissibility requirements; CLI-15-18, 82 NRC 145-46 & n.53 (2015)

Duke Energy Corp. (Oconee Nuclear Station, Units 1, 2, and 3), CLI-99-11, 49 NRC 328, 341 (1999) intervenor must do more than point to issues with the shield building, but must also indicate what is wrong with applicant’s response and its amended inspection program and why intervenor believes the
particular inspection program makes the license renewal application unacceptable; LBP-15-1, 81 NRC 40 (2015)
intervenors must develop a fact-based argument that actually and specifically challenges the application; LBP-15-1, 81 NRC 42 (2015)
intervenors’ requests for more testing, more methods of testing, and more information, without an explanation of why the current program is inadequate, are not sufficient to create a genuine dispute with a license renewal application; LBP-15-1, 81 NRC 41 n.150 (2015)

Duke Energy Corp. (Oconee Nuclear Station, Units 1, 2, and 3), CLI-99-11, 49 NRC 328, 345 (1999)
admission of contentions that NRC may ultimately deal with generically through notice-and-comment rulemaking is precluded; LBP-11-32, 74 NRC 663 (2011)
boards should not accept in individual license proceedings contentions that are, or are about to become, the subject of rulemaking by the Commission; LBP-12-24, 76 NRC 510 (2012)
challenges to NRC rules and regulations are generally prohibited, with limited exceptions, in view of expanding opportunities for participation in Commission rulemaking proceedings and increased emphasis on rulemaking proceedings as the appropriate forum for settling basic policy issues; CLI-13-7, 78 NRC 207 n.32 (2013)
collateral attacks on NRC regulations, unsupported by any showing of special circumstances warranting a waiver, are rejected; LBP-14-16, 80 NRC 202 (2014)
Commission sensibly has chosen to address high-level waste disposal generically rather than unnecessarily to revisit the same waste disposal questions, license by license, when reviewing individual applications; LBP-14-16, 80 NRC 197 n.88 (2014)
contention that impermissibly challenges an agency regulation is outside the scope of an individual licensing proceeding and is therefore inadmissible; CLI-15-11, 81 NRC 549 (2015)
contentions that are the subject of general rulemaking by the Commission may not be litigated in individual licensing proceedings; CLI-14-8, 80 NRC 79 n.27 (2014); LBP-14-16, 80 NRC 193 (2014); LBP-15-17, 81 NRC 778 (2015)
erring on the side of caution and at least looking at the information would be in order, except to the extent that the matters are about to become the subject of rulemaking; LBP-11-23, 74 NRC 327 (2011)
Fukushima-related matters relevant to license renewal could be addressed in a rulemaking that could specifically inform a decision on the renewal application and preclude the filing of additional contentions; LBP-12-1, 75 NRC 35-36 (2012)
petitioners may not raise in adjudicatory proceedings contentions attacking the agency’s rules and regulations or contentions that are the subject of ongoing rulemakings; LBP-11-29, 74 NRC 618 (2011)

Duke Energy Corp. (Oconee Nuclear Station, Units 1, 2, and 3), LBP-98-33, 48 NRC 381, 385 n.1 (1998)
proximity-based standing is allowed because license renewal allows operation of a reactor over an additional period of time during which the reactor could be subject to the same equipment failures and personnel errors as during operations over the original period of the license; LBP-12-8, 75 NRC 547 (2012)

Duke Power Co. (Catawba Nuclear Station, Units 1 and 2), ALAB-355, 4 NRC 397, 410 (1976)
because need-for-power assessments necessarily entail forecasting power demands in light of substantial uncertainty and the duty of providing adequate and reliable service to the public, they are inherently conservative; LBP-11-7, 73 NRC 283 n.183 (2011)
if demand for power turns out to be less than predicted, it cannot be argued that the cost of the unneeded generating capacity may turn up in customers’ electric bills because the surplus can be profitably marketed to other systems or the new capacity can replace older, less efficient units; LBP-12-5, 75 NRC 238 n.60 (2012)

Duke Power Co. (Catawba Nuclear Station, Units 1 and 2), ALAB-355, 4 NRC 397, 412 (1976)
even if a witness’s testimony was entirely hearsay, evidence of that character is generally admissible in administrative proceedings; LBP-11-14, 73 NRC 600 n.59 (2011)

Duke Power Co. (Catawba Nuclear Station, Units 1 and 2), ALAB-687, 16 NRC 460, 469 (1982)
good cause is the most important of the late-filing factors and is entitled to the most weight; LBP-12-9, 75 NRC 621-22 (2012)
LEGAL CITATIONS INDEX

CASES

Duke Power Co. (Catawba Nuclear Station, Units 1 and 2), ALAB-813, 22 NRC 59, 86 (1985) contensions that are the subject of general rulemaking by the Commission may not be litigated in individual licensing proceedings; LBP-14-16, 80 NRC 193 (2014)

Duke Power Co. (Catawba Nuclear Station, Units 1 and 2), ALAB-825, 22 NRC 785, 790 (1985) hearing notices are the means by which the Commission identifies the subject matter of the hearings and delegates to boards the authority to conduct proceedings; LBP-11-22, 74 NRC 274 (2011) licensing boards may exercise only the jurisdiction conferred upon them by the Commission; LBP-11-22, 74 NRC 274 (2011)

Duke Power Co. (Catawba Nuclear Station, Units 1 and 2), ALAB-825, 22 NRC 785, 790-91 (1985) contentions must be within the scope of the proceeding as defined by the Commission in its initial Notice and Order referring the proceeding to the licensing board; LBP-12-3, 75 NRC 191 (2012); LBP-12-15, 76 NRC 25 (2012); LBP-12-18, 76 NRC 157 (2012); LBP-12-27, 76 NRC 594 (2012); LBP-13-6, 77 NRC 285 (2013); LBP-15-20, 81 NRC 849 (2015)

Duke Power Co. (Catawba Nuclear Station, Units 1 and 2), CLI-83-19, 17 NRC 1041, 1048 (1983) applicant has the burden of proof on safety issues in a licensing proceeding; LBP-13-13, 78 NRC 279 (2013); LBP-14-1, 79 NRC 52-53 n.62 (2014) by participating in NRC proceedings, intervenors accept the obligation of uncovering relevant, publicly available information; CLI-12-13, 75 NRC 686 n.30 (2012); CLI-12-21, 76 NRC 499 (2012) intervenors retain the responsibility to raise new or amended contentions as new information becomes available if they wish to litigate those issues; CLI-12-13, 75 NRC 689-90 (2012)

Duke Power Co. (Catawba Nuclear Station, Units 1 and 2), CLI-83-19, 17 NRC 1041, 1048-49 (1983) NRC Staff’s safety analysis and environmental analysis occur separately, and intervenors are expected to raise safety challenges in response to the safety reports and environmental challenges in response to the environmental statements; LBP-15-11, 81 NRC 423 n.132 (2015)

Duke Power Co. (Catawba Nuclear Station, Units 1 and 2), CLI-83-19, 17 NRC 1041, 1048-50 (1983) should NRC Staff provide a different analysis in its draft environmental impact statement, there will be ample opportunity to either amend or dispose of a contention challenging the environmental report; CLI-12-13, 75 NRC 687 n.31 (2012)

Duke Power Co. (Catawba Nuclear Station, Units 1 and 2), CLI-83-19, 17 NRC 1041, 1049 (1983) although all environmental contentions may, in a general sense, ultimately challenge NRC’s compliance with NEPA, NRC regulations expressly permit the lodging of contentions against applicant’s environmental report well before release of NRC’s NEPA documents; LBP-11-38, 74 NRC 830 (2011) although applicant carries the burden of proof on safety issues, NRC Staff has the overall burden of complying with NEPA; LBP-13-13, 78 NRC 279 (2013); LBP-15-2, 81 NRC 57 n.63 (2015); LBP-15-3, 81 NRC 84 (2015); LBP-15-16, 81 NRC 641 (2015) environmental contentions are expected in response to applicant’s or NRC Staff’s environmental reviews, and contentions regarding their adequacy cannot be expected to be proffered at an earlier stage of the proceeding before the documents are available; LBP-15-11, 81 NRC 423 n.132 (2015) environmental contentions ultimately challenge NRC’s compliance with the National Environmental Policy Act; LBP-12-5, 75 NRC 236 (2012) intervenors are not permitted to wait until information reappears in the draft environmental impact statement to file their contentions; LBP-13-9, 78 NRC 60 (2013) NEPA imposes a nondiscretionary duty on NRC to amend an environmental impact statement if new and significant information comes to light; LBP-12-18, 76 NRC 157 (2012) NRC Staff, not the applicant, bears the ultimate burden of establishing compliance with NEPA; LBP-15-13, 78 NRC 829-30 (2011); LBP-12-5, 75 NRC 235-36 (2012); LBP-12-17, 76 NRC 80 (2012); LBP-14-7, 79 NRC 458-59 (2014) on safety issues, applicant has the burden of establishing that it is entitled to the applied-for license by a preponderance of the evidence; LBP-14-3, 79 NRC 278 (2014)

Duke Power Co. (Catawba Nuclear Station, Units 1 and 2), CLI-83-19, 17 NRC 1041, 1050 (1983) putative intervenors must raise issues as early as possible; LBP-11-9, 73 NRC 417 (2011) when omissions are cured by the subsequent issuance of licensing-related documents, a contention of omission must be disposed of or modified; LBP-12-5, 75 NRC 238 (2012)
Commission must find that activities authorized by a license amendment can be conducted without
endangering the health and safety of the public and will be in compliance with Commission
regulations; LBP-15-20, 81 NRC 841 (2015)
contention about a matter not covered by a specific rule need only allege that it poses a significant
safety problem; CLI-15-23, 82 NRC 325 n.21 (2015); LBP-15-20, 81 NRC 847-48, 854 n.151
(2015); LBP-15-17, 81 NRC 787 (2015)
contention that challenges sufficiency of the equivalent margins analysis to provide reasonable
assurance of reactor safety is within the scope of the proceeding; LBP-15-20, 81 NRC 849 (2015)
petitioners may raise issues not addressed by a specific regulation when unique features in the facility
or ongoing development of a generic solution mean that there are some gaps in the regulatory
scheme that must be addressed on a case-by-case basis; LBP-15-20, 81 NRC 840 (2015)

NRC cannot delegate its NEPA responsibilities to a private party; LBP-11-32, 74 NRC 666 n.29
(2011)

Duke Power Co. (Perkins Nuclear Station, Units 1, 2, and 3), ALAB-431, 6 NRC 460, 462 (1977)
where good cause is not shown for the late filing of a contention, the requestor’s demonstration on
the other factors must be particularly strong; LBP-11-15, 73 NRC 634-35 (2011)

intervention petitioner must allege such a personal stake in the outcome of the controversy as to
demonstrate that a concrete adverseness exists that will sharpen the presentation of issues;

Duquesne Light Co. (Beaver Valley Power Station, Unit 1), ALAB-109, 6 AEC 243, 246 (1973)
a carry-over contention must be subjected to especially careful scrutiny by the board at the prehearing
stage; LBP-11-34, 74 NRC 696 (2011)
contentions cannot be automatically discarded by a hearing board simply because they repeat
contentions advanced in a different proceeding; LBP-11-34, 74 NRC 696 (2011)

Duquesne Light Co. (Beaver Valley Power Station, Unit 1), ALAB-408, 5 NRC 1383, 1385 (1977)
boards’ authority to seek to trigger review in extraordinary circumstances remains and has been put to
good use; LBP-11-9, 73 NRC 418 n.13 (2011)

Earth Island Institute v. U.S. Forest Service, 351 F.3d 1291, 1306-07 (9th Cir. 2006)
agencies may not undertake a piecemeal review of environmental impacts; LBP-13-9, 78 NRC 83
(2013)

board authority under section 2.338(i) is to approve or reject a settlement agreement, and so it cannot
amend the agreement without consent of the parties; LBP-15-21, 82 NRC 18 n.23 (2015)
concerns about how some aspect of a settlement agreement is being implemented or enforced can be
brought to the attention of the Commission, which retains supervisory authority over the parties’
agreement; LBP-15-21, 82 NRC 17 n.21 (2015)

Ecology Action v. AEC, 492 F.2d 998, 1001-02 (2d Cir. 1974)
deficiency in a final environmental impact statement is not automatic ground for reversal of an order
granting a permit although the issue has been opened for full consideration in an agency hearing;
CLI-15-6, 81 NRC 388 n.255 (2015)
environmental impact statements are effectively amended through the adjudicatory process; LBP-12-17,
76 NRC 83 (2012)
federal courts of appeal have approved of the process by which an environmental impact statement is
effectively amended through the adjudicatory process; LBP-14-9, 80 NRC 67 (2014)

Ed A. Wilson, Inc. v. General Services Administration, 126 F.3d 1406, 1408 (Fed. Cir. 1997)
neither the Equal Access to Justice Act nor the legislative history provides a definition of the word
“incur”; LBP-11-8, 73 NRC 364 (2011)

Ed A. Wilson, Inc. v. General Services Administration, 126 F.3d 1406, 1409 (Fed. Cir. 1997)
the presence of an attorney-client relationship suffices to entitle prevailing litigants to receive fee
awards; LBP-11-8, 73 NRC 366 (2011)
Ed A. Wilson, Inc. v. General Services Administration, 126 F.3d 1406, 1410 (Fed. Cir. 1997)

both the union employee and the insured can be viewed as having incurred legal fees insofar as they have paid for legal services in advance as a component of the union dues or insurance premiums; LBP-11-8, 73 NRC 365 n.74 (2011)

denying Equal Access to Justice Act awards in insurance contexts would undermine the dual purposes of EAJA by both maintaining financial deterrents for those who would want to challenge unjust government action and not deterring unreasonable government actions; LBP-11-8, 73 NRC 366 (2011)

Edlow International Co. (Agent for the Government of India on Application to Export Special Nuclear Material), CLI-76-6, 3 NRC 563, 572 (1976)

mere interest in a problem is not sufficient by itself to render the organization adversely affected or aggrieved within the meaning of the Administrative Procedure Act; CLI-11-3, 73 NRC 622 n.41 (2011)

dismissal of license amendment request is conditioned on requirement that licensee provide notice to petitioner of submission of a similar LAR so that petitioner has a fair opportunity to re-litigate issues previously found admissible; LBP-15-28, 82 NRC 243 (2015)

EnergySolutions, LLC (Radioactive Waste Import/Export Licenses), CLI-11-3, 73 NRC 613, 621 (2011)

boards look to judicial concepts of standing and determine whether petitioner is threatened with a concrete injury and the injury is fairly traceable to the licensing action and capable of being redressed by a favorable decision; LBP-12-24, 76 NRC 507-08 (2012)

EnergySolutions, LLC (Radioactive Waste Import/Export Licenses), CLI-11-3, 73 NRC 613, 621-22 (2011)

claims of interest-based organizational standing were denied; LBP-13-6, 77 NRC 282-83 n.23 (2013)

the 1959 amendments to the Atomic Energy Act were intended generally to increase the states’ role in regulation of nuclear materials; CLI-11-12, 74 NRC 473-74 (2011)

license applicant may take an appeal under 2.311(d)(1) if it contends that, after considering all pending contentions, the board has erroneously granted a hearing to petitioner; CLI-14-3, 79 NRC 36 n.31 (2014)

expansion of issues for litigation that results from admission of a contention or denial of motion for summary disposition does not have a pervasive and unusual effect on the litigation; CLI-15-17, 82 NRC 37 n.25 (2015)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-08-2, 67 NRC 31, 34 (2008)

a partial initial decision is one rendered following an evidentiary hearing on one or more contentions, but that does not dispose of the entire matter; CLI-11-6, 74 NRC 209 (2011); CLI-11-10, 74 NRC 255 (2011)

grant of summary disposition where other contentions are pending is not a final decision and is appealable only upon a showing that the standards for interlocutory review have been met; CLI-11-6, 74 NRC 209 n.38 (2011); CLI-11-14, 74 NRC 810 (2011)

parties may file a petition for review of licensing board full or partial initial decisions, both of which are considered to be final; CLI-11-14, 74 NRC 810 (2011)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-08-2, 67 NRC 31, 34 n.14 (2008)

the basis for allowing immediate appellate review of partial initial decisions rests on prior appeal board decisions permitting review of a licensing board ruling that disposes of a major segment of the case or terminates a party’s right to participate; CLI-11-14, 74 NRC 810-11 (2011)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-08-2, 67 NRC 31, 35 (2008)

a board’s disputed legal ruling does not necessarily warrant immediate interlocutory review; CLI-11-6, 74 NRC 208 n.31 (2011)

board’s contention admissibility rulings do not affect the basic structure of the proceeding in a pervasive and unusual manner such that immediate review is appropriate; CLI-15-17, 82 NRC 44, 47 (2015)

282
broadening of issues for hearing caused by the board’s admission of a contention that applicant opposes does not constitute a ‘pervasive and unusual effect on the litigation meriting interlocutory review; CLI-15-17, 82 NRC 37 n.23 (2015)

NRC disfavor of piecemeal appeals leads it to grant interlocutory review only upon a showing of extraordinary circumstances; CLI-11-14, 74 NRC 811 (2011)

routine contention admissibility decisions do not affect the basic structure of a proceeding in a pervasive or unusual manner; CLI-12-13, 75 NRC 688 (2012)

_Entergy Nuclear Generation Co._ (Pilgrim Nuclear Power Station), CLI-08-2, 67 NRC 31, 35-36 (2008)

petitioner will have an opportunity to challenge the board’s contention admissibility decision at the end of the case; CLI-12-13, 75 NRC 688-89 (2012)

_Entergy Nuclear Generation Co._ (Pilgrim Nuclear Power Station), CLI-09-10, 69 NRC 521, 527-28 (2009)

Commission is not inclined to issue a protective stay based on petitioner’s bare assertion that it intends to file a petition for rulemaking at some unknown time in the future; CLI-14-6, 79 NRC 449 n.28 (2014)

results of judicial review of rulemaking petition denial would be implemented in a meaningful way where petitioner had timely taken every conceivable procedural step to ensure that the ultimate outcome of its rulemaking petition would inform the NEPA analysis of the licensing proceedings; CLI-14-6, 79 NRC 449 (2014)

_Entergy Nuclear Generation Co._ (Pilgrim Nuclear Power Station), CLI-09-11, 69 NRC 529, 533 (2009)

NRC adjudicatory hearings are not environmental impact statement editing sessions; LBP-11-2, 73 NRC 62 (2011)

petitioners have not established that use of another source term would identify additional cost-beneficial severe accident mitigation alternatives; LBP-11-13, 73 NRC 579 n.323 (2011)

ultimate issue on severe accident mitigation alternatives analysis is whether any additional SAMA should have been identified as potentially cost-beneficial, not whether further analysis may refine the details in the SAMA NEPA analysis; CLI-11-11, 74 NRC 441 (2011); LBP-11-2, 73 NRC 62 (2011); LBP-11-13, 73 NRC 566 (2011); LBP-15-29, 82 NRC 250-51 (2015)

_Entergy Nuclear Generation Co._ (Pilgrim Nuclear Power Station), CLI-09-11, 69 NRC 529, 534 (2009)

references to affidavits and other exhibits supporting petitioner’s claims should include page citations; CLI-12-8, 75 NRC 404 n.67 (2012)

the Commission should not be expected to sift unaided through documents filed before the board to piece together and discern a party’s argument and the grounds for its claims; LBP-12-3, 75 NRC 206, 207 (2012); CLI-12-8, 75 NRC 404 n.67 (2012)

_Entergy Nuclear Generation Co._ (Pilgrim Nuclear Power Station), CLI-10-11, 71 NRC 287, 287 (2010)

at issue is not whether evidence unmistakably favors one side or the other, but whether there is sufficient evidence favoring the summary disposition opponent for a reasonable trier of fact to find in favor of that party; LBP-11-4, 73 NRC 100 (2011)

if evidence in favor of the summary disposition opponent is merely colorable or not significantly probative, summary disposition may be granted; LBP-11-4, 73 NRC 100 (2011)

only disputes over facts that might affect the outcome of a proceeding would preclude summary disposition; LBP-11-4, 73 NRC 100 (2011)

summary disposition opponent may not rest upon mere allegations or denials, but must state specific facts showing that there is a genuine issue of fact for hearing; LBP-11-4, 73 NRC 100 (2011)

_Entergy Nuclear Generation Co._ (Pilgrim Nuclear Power Station), CLI-10-11, 71 NRC 287, 290-91 (2010), reconsideration denied, CLI-10-15, 71 NRC 479 (2010)

purpose of SAMA analyses is to identify safety enhancements that would be cost-beneficial to adopt; LBP-15-29, 82 NRC 250 (2015)

severe accident mitigation alternatives are safety enhancements such as a new hardware item or procedure intended to reduce the risk of severe accidents; LBP-11-33, 74 NRC 680 n.7 (2011)

_Entergy Nuclear Generation Co._ (Pilgrim Nuclear Power Station), CLI-10-11, 71 NRC 287, 290-91, 316-17 (2010)

nature and purposes of the severe accident mitigation alternatives analysis are described; CLI-12-8, 75 NRC 406 (2012)
if the cost of implementing a particular severe accident mitigation alternative is greater than its estimated benefit, the SAMA is not considered cost-beneficial to implement; LBP-11-33, 74 NRC 680 n.7 (2011)
severe accident mitigation design alternatives analysis examines whether implementing a SAMDA would decrease the probability-weighted consequences of severe accidents; LBP-11-2, 73 NRC 63 (2011); LBP-11-38, 74 NRC 826 (2011)
a license renewal applicant is compelled to implement safety-related severe accident mitigation alternatives that deal with aging management; LBP-11-17, 74 NRC 22 (2011)
severe accident mitigation alternatives unrelated to aging management need not be implemented pursuant to the NRC's license renewal safety review under Part 54; LBP-11-17, 74 NRC 25 (2011)
correct inquiry regarding the first criterion for summary disposition is whether there are material factual issues that properly can be resolved only by a finder of fact because they may reasonably be resolved in favor of either party; LBP-11-31, 74 NRC 648 (2011)
in applying the summary disposition standard, it is appropriate for the board to look not only to NRC regulatory and case law, but also to federal court case law on summary judgment under Rule 56 of the Federal Rules of Civil Procedure; LBP-11-4, 73 NRC 99 (2011)
licensing boards or presiding officers should not conduct a trial on affidavits; LBP-12-23, 76 NRC 478 (2012)
NRC applies the same standards to motions for summary disposition that federal courts apply to motions for summary judgment under Rule 56 of the Federal Rules of Civil Procedure; LBP-12-2, 75 NRC 162 n.17 (2011)
when considering a motion for summary disposition, the function of the board is not to weigh the evidence and determine the truth of the matter but to determine whether there is a genuine issue for hearing; LBP-11-14, 73 NRC 595 (2011)
caution should be exercised in granting summary disposition, which may be denied if there is reason to believe that the better course would be to proceed to a full hearing; LBP-11-7, 73 NRC 264 (2011)
if reasonable minds could differ as to the import of the evidence, summary disposition is not appropriate; LBP-11-14, 73 NRC 595 (2011); LBP-12-23, 76 NRC 478 (2012)
licensing board failed to provide sufficient justification for rejecting a challenge to applicant’s meteorological model where the petitioners pointed to site-specific meteorological patterns to argue that the model and inputs were inaccurate and insufficiently conservative; LBP-15-20, 81 NRC 852 n.139 (2015)
the Gaussian plume model’s incorporation in the MACCS2 code and the wide, customary use of the code are not sufficient grounds to exclude the code’s integral dispersion model from all challenge if adequate support is provided for a contention; LBP-11-2, 73 NRC 71 n.301 (2011)
it is rarely appropriate to resolve complex, fact-intensive issues on the initial pleadings; LBP-11-13, 73 NRC 564 n.195 (2011)
a SAMA contention is admissible only if it looks genuinely plausible that inclusion of an additional factor or use of other assumptions or models may change the cost/benefit conclusions for the SAMA candidates evaluated; LBP-11-13, 73 NRC 566 (2011)
Unlike plume modeling for an actual severe accident, the SAMA analysis is not focused on predicting the precise trajectory of a real-time plume but rather is a probabilistic analysis involving statistical averaging over many hundreds of randomly selected hourly weather sequences obtained from a year of hourly weather data; CLI-12-8, 75 NRC 415 (2012)

Complex, fact-intensive issues are rarely appropriate for summary disposition, much less for resolution on the initial pleadings; LBP-11-2, 73 NRC 50 (2011)

Severe accident mitigation alternatives do not encompass spent fuel pool accidents; LBP-11-2, 73 NRC 65 (2011)

The Commission reversed the board’s grant of summary disposition of a severe accident mitigation alternatives contention; LBP-11-2, 73 NRC 62 (2011)

In interpreting the scope of an admitted contention, boards look back to the bases set forth in support of the contention; CLI-15-9, 81 NRC 529 (2015)

Failure to offer factual support for the proposition that an applicant’s inputs for evacuation times are flawed or unreasonable or that its sensitivity analysis of these inputs was incorrect renders a contention inadmissible; LBP-15-5, 81 NRC 299 n.339 (2015)

Claim that SAMA analysis is deficient for failing to address potential spent fuel pool accidents falls beyond the scope of NRC SAMA analysis and impermissibly challenges NRC regulations; LBP-11-3, 73 NRC 570 n.245 (2011)

Failure to offer factual support for the proposition that an applicant’s inputs for evacuation times are flawed or unreasonable or that its sensitivity analysis of these inputs was incorrect renders a contention inadmissible; LBP-15-5, 81 NRC 299 n.338 (2015)

A licensing board’s inquiry should not be whether there are plainly better methodologies or whether the severe accident mitigation alternatives analysis can be refined further, but rather whether the SAMA analysis resulted in erroneous conclusions on which SAMAs and SAMDAs are found cost-beneficial to implement; LBP-11-7, 73 NRC 265 (2011); LBP-15-16, 81 NRC 638 n.100 (2015)

Environmental impact statements are not intended to be research documents, reflecting the frontiers of scientific methodology, studies, and data; CLI-12-5, 75 NRC 341 (2012); LBP-13-4, 77 NRC 211 (2013)

NEPA allows agencies to select their own methodology as long as that methodology is reasonable; LBP-13-4, 77 NRC 211 (2013)
NEPA does not require NRC to use the best scientific methodology available; LBP-13-4, 77 NRC 211 (2013)
NEPA does not require the adoption of best practices, particularly in the face of a potentially significant resource commitment; LBP-15-3, 81 NRC 93 (2015)
NEPA should be construed in the light of reason if it is not to demand virtually infinite study and resources; LBP-13-4, 77 NRC 211 (2013)
there is no NEPA requirement to use the best scientific methodology, and NEPA should be construed in the light of reason if it is not to demand virtually infinite study and resources; LBP-15-3, 81 NRC 82 (2015)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-11, 71 NRC 287, 315-16 (2010) although there will always be more data that could be gathered, agencies must have some discretion to draw the line and move forward with decisionmaking; LBP-11-38, 74 NRC 831-32 (2011); LBP-12-5, 75 NRC 237 (2012); LBP-13-13, 78 NRC 452 (2013)
appropriate inquiry under NEPA is not whether there are alternative models that NRC could have used, or whether the analysis could have been refined or improved by gathering additional data, but whether the NRC’s chosen methodology is reasonable; LBP-13-4, 77 NRC 212 (2013)
environmental impact statements are not intended to be research documents, reflecting the frontiers of scientific methodology, studies, and data; LBP-11-38, 74 NRC 831 (2011); LBP-12-5, 75 NRC 237 (2012); LBP-13-13, 78 NRC 452, 505 (2013)
in judging adequacy of a severe accident mitigation design alternatives analysis, the pertinent legal question becomes not whether plainly better SAMDA analysis assumptions or methodologies could have been employed, or whether a particular SAMDA analysis could have been refined further; LBP-11-38, 74 NRC 832 (2011)
NEPA allows agencies to select their own methodology as long as that methodology is reasonable; LBP-11-38, 74 NRC 832 (2011); LBP-12-5, 75 NRC 237 (2012); LBP-13-13, 78 NRC 452 (2013)
NEPA should be construed in the light of reason if it is not to demand virtually infinite study and resources; LBP-11-38, 74 NRC 831 (2011); LBP-13-13, 78 NRC 452 (2013)
there is no NEPA requirement to use the best scientific methodology, and NEPA should be construed in the light of reason if it is not to demand virtually infinite study and resources; LBP-11-38, 74 NRC 831 (2011); LBP-12-5, 75 NRC 237 (2012)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-11, 71 NRC 287, 316 (2010) a severe accident mitigation alternatives analysis is neither a worst-case nor a best-case impacts analysis; LBP-11-7, 73 NRC 265 (2011) because the generic EIS provides a severe accident impacts analysis that envelopes potential impacts at all existing plants, the environmental impacts of severe accidents during the license renewal term already have been addressed generically in bounding fashion; LBP-12-18, 76 NRC 142 n.68 (2012) common practice in an environmental impact statement is to use bounding evaluations when more exact calculations cannot be performed or are not necessary; LBP-12-18, 76 NRC 142 n.68 (2012) generic environmental impact statement findings with respect to severe accident consequences are not subject to challenge in individual license renewal proceedings; CLI-15-6, 81 NRC 380 n.214 (2015)
NEPA permits agencies to select their own methodology for mitigation analysis as long as that methodology is reasonable; LBP-11-2, 73 NRC 71 (2011); LBP-11-7, 73 NRC 265 (2011); LBP-13-13, 78 NRC 540 (2013)
NRC is required to consider severe accident mitigation alternatives in issuing a new operating license; LBP-11-7, 73 NRC 264-65 (2011)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-11, 71 NRC 287, 316-17 (2010) license renewal applicants are not required to base their SAMA analysis on consequence values at the 95th percentile consequence level; LBP-11-2, 73 NRC 77 (2011)
NRC inquiry is to ascertain whether it looks genuinely plausible that inclusion of an additional factor or use of other assumptions or models may change the cost-benefit conclusions for the severe accident mitigation design alternatives analysis; LBP-11-38, 74 NRC 832 (2011)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-11, 71 NRC 287, 317 (2010) severe accident mitigation alternatives contentions are admissible only if it looks genuinely plausible that inclusion of an additional factor or use of other assumptions or models may change the cost-benefit conclusions for the SAMA candidates evaluated; CLI-12-5, 75 NRC 323 (2012);
LEGAL CITATIONS INDEX
CASES

LBP-11-2, 73 NRC 46, 62 (2011); LBP-11-7, 73 NRC 265, 273 n.128, 315 (2011); LBP-11-13, 73 NRC 579 (2011)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-14, 71 NRC 449, 453-54 (2010)
“current licensing basis” is the set of NRC requirements (including regulations, orders, technical specifications, and license conditions) applicable to a specific plant, and includes the licensee’s written, docketed commitments for ensuring compliance with applicable NRC requirements and the plant-specific design basis; CLI-12-5, 75 NRC 304 n.12 (2012); LBP-11-17, 74 NRC 21-22 n.48 (2011)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-14, 71 NRC 449, 453-56 (2010)
license renewal review is a limited one, focused on aging management issues; CLI-11-5, 74 NRC 164 (2011)
safety issue that does not involve aging management issues is outside the scope of a license renewal proceeding; LBP-15-5, 81 NRC 264 (2015)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-14, 71 NRC 449, 453-56, 460-63 (2010)
scope of license renewal safety review is explained; CLI-11-11, 74 NRC 435 (2011)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-14, 71 NRC 449, 454 (2010)
active components are not subject to an aging management review because existing regulatory programs, including required maintenance programs, can be expected to directly detect the effects of aging on active functions; LBP-11-2, 73 NRC 57 (2011)
existing regulatory programs can be expected to directly detect the effects of aging on active functions; CLI-12-5, 75 NRC 304 n.10 (2012)
license renewal applicants must conduct aging management reviews of any structure, system, or component that performs one of these intended functions if the SSC is passive (performs its intended function(s) without moving parts or without a change in configuration or properties); CLI-12-5, 75 NRC 303-04 (2012)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-14, 71 NRC 449, 459-60 (2010)
because petitioner has not shown how a proposed plan would fail to ensure that buried pipes continue to fulfill their intended safety purposes, the contention is inadmissible; LBP-15-5, 81 NRC 295 (2015)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-14, 71 NRC 449, 461 (2010)
key functions of buried structures, systems, and components that are the focus of the license renewal safety review under Part 54 do not include the prevention of inadvertent radioactive leaks from buried structures; LBP-11-2, 73 NRC 60 (2011)
through the regulatory process, which includes plant inspections, notice and guidance to licensees, and enforcement actions, NRC takes a host of measures to improve the ability to timely detect and correct inadvertent leaks to assure compliance with public dose limits; LBP-11-2, 73 NRC 60 n.194 (2011)

current operating issues are, by their very nature, beyond the scope of a license renewal proceeding; CLI-11-2, 73 NRC 348 n.77 (2011)
license renewal is limited to aging-related issues, not issues already monitored and reviewed in the ongoing regulatory oversight processes; CLI-11-2, 73 NRC 348 n.77 (2011)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-14, 71 NRC 449, 462 (2010)
applicant must demonstrate that the effects of aging will be managed so that the intended function(s) will be maintained consistent with the current licensing basis and that the intended functions are described in section 54.4(a)(1)-(3); LBP-11-2, 73 NRC 60 (2011)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-14, 71 NRC 449, 463 (2010)
regulated process continuously reassesses whether there is a need for additional oversight or regulations to protect public health and safety; LBP-15-4, 81 NRC 175 n.105 (2015)

with respect to the definition of “reasonable assurance,” applicant is required to show that safety features will fulfill their intended function, not that every structure will maintain its current licensing basis throughout the renewal period; LBP-15-5, 81 NRC 295 (2015)
Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-14, 71 NRC 449, 469 (2010)

all parties are obliged to follow the procedures in 10 C.F.R. Part 2 and board scheduling orders;

CLI-14-10, 80 NRC 164 (2014)
even if intervenors are appearing pro se, adherence to board directives is expected; CLI-14-10, 80 NRC 164 (2014)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-14, 71 NRC 449, 471 (2010)

license renewal applicants need not provide site-specific analyses of environmental impacts of subjects identified as Category 1 issues; LBP-15-5, 81 NRC 266 n.92 (2015)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-14, 71 NRC 449, 471, 477 (2010)
generic analysis remains appropriate for spent fuel pool accidents in license renewal proceedings;

LBP-11-35, 74 NRC 716 (2011)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-14, 71 NRC 449, 473-76 (2010)
generic environmental impact statement for spent fuel pools is not limited to discussing only normal operations, but also discusses potential accidents and other nonroutine events, and thus need not be included in the severe accident mitigation alternatives analysis for license renewal; LBP-15-5, 81 NRC 307 (2015)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-14, 71 NRC 449, 474 (2010)

chapter 6 of the generic environmental impact statement clearly is not limited to discussing only normal operations, but also discusses potential accidents and other nonroutine events, and the Category 1 finding for onsite spent fuel storage is not limited to routine or normal operations; LBP-11-2, 73 NRC 66 (2011); LBP-11-13, 73 NRC 570 n.248 (2011)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-14, 71 NRC 449, 476 (2010)

NEPA imposes no legal duty on NRC to consider intentional malevolent acts in conjunction with commercial power reactor license renewal applications; LBP-11-2, 73 NRC 64 (2011); LBP-11-13, 73 NRC 571 (2011)

NRC has analyzed terrorist acts in connection with license renewal and concluded that the core damage and radiological release from such acts would be no worse than the damage and release expected from internally initiated events; LBP-11-2, 73 NRC 64 (2011)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-15, 71 NRC 479, 482 (2010)

only those NRC-regulated facilities located within the Ninth Circuit’s jurisdictional boundaries are required to conduct environmental analyses of possible terrorist acts; LBP-14-6, 79 NRC 428 (2014)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-15, 71 NRC 479, 482 (2010)

to be admissible, contentions must include specific grievances beyond mere notice pleading;

LBP-11-29, 74 NRC 618 (2011)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-22, 72 NRC 202, 207 n.34 (2010)

petitioner may question the practice for severe accident mitigation alternatives analysis to utilize mean consequence values, which results in an averaging of potential consequences; LBP-11-13, 73 NRC 576 n.296 (2011)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-22, 72 NRC 202, 207-08 (2010)

nature and purposes of the severe accident mitigation alternatives analysis are described; CLI-12-8, 75 NRC 406 (2012)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-22, 72 NRC 202, 208 (2010)

duty to prepare an environmental impact statement and to identify and consider every significant environmental impact is tempered by the rule of reason; LBP-13-4, 77 NRC 120 (2013)

environmental impact statement is not intended to be a research document; LBP-15-3, 81 NRC 82 (2015); LBP-15-16, 81 NRC 638 (2015)

it is not possible simply to plug in and run a different atmospheric dispersion model in the MACCS2 code; LBP-11-2, 73 NRC 72 (2011)

legal adequacy of a final environmental impact statement is assessed under the rule of reason;

LBP-13-4, 77 NRC 210 (2013)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-10-22, 72 NRC 202, 208-09 (2010)

NEPA requires NRC to provide a reasonable mitigation alternatives analysis, containing reasonable estimates, including, where appropriate, full disclosures of any known shortcomings in available methodology, incomplete or unavailable information and significant uncertainties, and a reasoned evaluation of whether and to what extent these or other considerations credibly could or would alter
the analysis on which SAMDAs are considered; LBP-11-38, 74 NRC 832 (2011); LBP-13-13, 78 NRC 453 (2013)

*Entergy Nuclear Generation Co.* (Pilgrim Nuclear Power Station), CLI-10-28, 72 NRC 553, 554 (2010)

the Commission generally defers to licensing boards on case management issues; CLI-11-13, 74 NRC 640 (2011)

*Entergy Nuclear Generation Co.* (Pilgrim Nuclear Power Station), CLI-12-1, 75 NRC 39 (2012)

environmental analysis of severe accidents is designated as a Category 2 site-specific issue for license renewal, and therefore the SAMA analysis normally is subject to challenge in a license renewal adjudicatory proceeding; CLI-13-7, 78 NRC 211 (2013)

severe accident mitigation alternatives analyses in NRC license renewal proceedings are discussed; CLI-15-18, 82 NRC 139 n.16 (2015)

*Entergy Nuclear Generation Co.* (Pilgrim Nuclear Power Station), CLI-12-1, 75 NRC 39, 41-43 (2012)

Category 2 issues focus on severe accident mitigation, to further reduce severe accident risk (probability or consequences); CLI-12-19, 76 NRC 381 n.20 (2012)

*Entergy Nuclear Generation Co.* (Pilgrim Nuclear Power Station), CLI-12-1, 75 NRC 39, 46 (2012)

although the Commission has authority to undertake a de novo factual review, where a board’s decision rests on a weighing of extensive fact-specific evidence presented by technical experts, the Commission generally defers to the board’s factual findings, unless there appears to be a clearly erroneous factual finding or related oversight; CLI-13-1, 77 NRC 19 n.110 (2013)

question before the Commission is not whether it would have made different factual findings than those of the board but whether the board’s findings of fact are so lacking in record support as to be clearly erroneous; CLI-13-1, 77 NRC 19 (2013)

*Entergy Nuclear Generation Co.* (Pilgrim Nuclear Power Station), CLI-12-1, 75 NRC 39, 57 (2012)

document’s unavailability does not render NRC Staff’s or applicant’s reliance on the NUREG-1150 decontamination cost values altogether unreasonable under NEPA; LBP-13-13, 78 NRC 472 (2013)

to litigate SAMA-related issues requires demonstration of potentially significant deficiency in the SAMA analysis that credibly could render the SAMA analysis unreasonable under NEPA standards; CLI-13-7, 78 NRC 215-16 (2013)

*Entergy Nuclear Generation Co.* (Pilgrim Nuclear Power Station), CLI-12-1, 75 NRC 39, 57-58 (2012)

unless a contention, submitted with adequate factual, documentary, or expert support, raises a potentially significant deficiency in the severe accident mitigation alternatives analysis, a SAMA-related dispute will not be material to the licensing decision and is not appropriate for litigation in NRC proceedings; LBP-12-26, 76 NRC 565 (2012)

*Entergy Nuclear Generation Co.* (Pilgrim Nuclear Power Station), CLI-12-1, 75 NRC 39, 61 (2012)

despite the ability of both NRC Staff and applicant to present evidence and witnesses on environmental issues, the ultimate issue in determining NEPA compliance is the adequacy of the Staff’s environmental review, not the applicant’s environmental report; LBP-13-13, 78 NRC 279 (2013)

section 51.102(c) has been consistently interpreted to provide that environmental impact statements are modified by any subsequent board or Commission decision; CLI-15-6, 81 NRC 388 (2015)

*Entergy Nuclear Generation Co.* (Pilgrim Nuclear Power Station), CLI-12-3, 75 NRC 132, 138 (2012)

level of support required for a motion to reopen is greater than that required for a contention under the general admissibility requirements; CLI-12-7, 75 NRC 391 n.47 (2012)

*Entergy Nuclear Generation Co.* (Pilgrim Nuclear Power Station), CLI-12-3, 75 NRC 132, 139 n.41 (2012)

Commission discourages incorporating pleadings or arguments by reference; LBP-15-5, 81 NRC 290 n.263 (2015)

*Entergy Nuclear Generation Co.* (Pilgrim Nuclear Power Station), CLI-12-3, 75 NRC 132, 140-41 (2012)

heavy barrier to reopening applies whenever an adjudication has been closed and not merely after a case has been terminated following a full evidentiary hearing on the merits; LBP-15-14, 81 NRC 595 (2015)

once all contentions have been decided, the contested proceeding is terminated; CLI-12-14, 75 NRC 699 (2012)

*Entergy Nuclear Generation Co.* (Pilgrim Nuclear Power Station), CLI-12-3, 75 NRC 132, 141 (2012)

NRC rules contain ample provisions through which litigants may seek admission of new or amended contentions; CLI-12-13, 75 NRC 689 (2012)
LEGAL CITATIONS INDEX

CASES

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-12-3, 75 NRC 132, 145 n.86 (2012)
litigants seeking to reopen a record must comply fully with section 2.326(b); LBP-12-10, 75 NRC 639 (2012)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-12-6, 75 NRC 352, 357 & nn.10-11 (2012)
adjudications are not the proper arena for challenges to NRC regulations; CLI-13-1, 77 NRC 35 (2013)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-12-6, 75 NRC 352, 360 n.36 (2012)
section 2.311 does not provide for the filing of replies; CLI-14-3, 79 NRC 34 (2014)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-12-6, 75 NRC 352, 364-65 (2012)
any interested person may petition the Commission to issue, amend, or rescind any regulation;
CLI-13-7, 78 NRC 208 n.42 (2013)
to challenge generic application of a rule, petitioner seeking waiver must show that there is something
extraordinary about the subject matter of the proceeding such that the rule should not apply;
CLI-13-7, 78 NRC 207 (2013)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-12-6, 75 NRC 352, 365 (2012)
waver of a rule pertaining to the agency’s environmental responsibilities is possible; CLI-13-7, 78
NRC 209 (2013)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-12-6, 75 NRC 352, 371 (2012)
any contention that fails to directly controvert the application or that mistakenly asserts the application
do not address a relevant issue will be dismissed; LBP-12-15, 76 NRC 27 (2012)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-12-6, 75 NRC 352, 372-75 (2012),
petitions for review denied, Massachusetts v. NRC, 708 F.3d 63 (1st Cir. 2013)
waiver petition would permit consideration of an issue in an adjudicatory proceeding that would
otherwise impermissibly challenge an NRC rule or regulation; CLI-14-7, 80 NRC 6-7 n.16 (2014)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-12-6, 75 NRC 352, 372-76 (2012)
admission of a “placeholder” contention is not necessary to ensure that petitioner’s challenges to the
Continued Storage Rule and GEIS receive a full and fair airing; CLI-15-11, 81 NRC 550 (2015)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-12-6, 75 NRC 352, 373 (2012),
petitions for review denied, Massachusetts v. NRC, 708 F.3d 63 (1st Cir. 2013)
to determine whether suspension of an adjudication or licensing decision is warranted, the Commission
considers whether moving forward will jeopardize the public health and safety, prove an obstacle to
fair and efficient decisionmaking, or prevent appropriate implementation of any pertinent rule or
policy changes; CLI-14-7, 80 NRC 7 (2014)
when considering stays or other forms of temporary injunctive relief, the Commission has applied the
stay factors outlined in 10 C.F.R. 2.342(e), which restate commonplace principles of equity;
CLI-14-6, 79 NRC 449 (2014)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-12-6, 75 NRC 352, 374 n.138 (2012)
because applicant has not shown that it could not have addressed issues in its appeal, nor has
presented genuinely new information in its reply, neither necessity nor fairness dictates that its reply
should be permitted; CLI-14-3, 79 NRC 35 (2014)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-12-6, 75 NRC 352, 374-75 & n.140 (2012),
petitions for review denied, Massachusetts v. NRC, 708 F.3d 63 (1st Cir. 2013)
suspending a final decision indefinitely in an adjudicatory proceeding upon receipt of a claim of new
and significant information runs counter to the goal of promoting fair and efficient resolution of
disputes; CLI-14-7, 80 NRC 8 (2014)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-12-6, 75 NRC 352, 376 (2012),
petitions for review denied, Massachusetts v. NRC, 708 F.3d 63 (1st Cir. 2013)
requirement that NRC suspend its licensing decisions upon receipt of a claim of new and significant
information would render its decisionmaking intractable; CLI-14-7, 80 NRC 8 (2014)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-12-10, 75 NRC 479 (2012)
purpose of the reopening rule is to make sure that petitioners have an opportunity to raise serious
issues after the close of the record; CLI-12-14, 75 NRC 700 (2012)
LEGAL CITATIONS INDEX

CASES

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-12-10, 75 NRC 479, 487 (2012)
NEPA severe accident mitigation alternatives analysis need not reflect the most conservative, or
worst-case, analysis; LBP-12-26, 76 NRC 573 n.73 (2012)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-12-10, 75 NRC 479, 488-89 (2012)
material difference must exist between information on which a contention is based and information
that was previously available, e.g., a difference between the environmental report and the draft EIS
or the draft EIS and the final EIS; CLI-15-1, 81 NRC 7 (2015)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-12-10, 75 NRC 479, 492 n.69 (2012)
good cause is the most important of the late-filing factors under section 2.309(c)(1), and absent good
cause, a compelling showing must be made on the other seven factors; LBP-12-12, 75 NRC 749
(2012)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-12-10, 75 NRC 479, 495 (2012)
the reopening standard imposes a deliberately heavy burden on parties seeking to supplement the
evidentiary record at the 11th hour, after the record has closed; LBP-12-10, 75 NRC 639 (2012)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-12-15, 75 NRC 704, 706-07 (2012)
contentions challenging a severe accident mitigation alternatives analysis must identify a deficiency
that plausibly could alter the overall result of the analysis in a material way; LBP-13-13, 78 NRC 287 (2013)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-12-15, 75 NRC 704, 707 (2012)
although a SAMA analysis considers safety issues, it is actually an environmental review that must be
judged under NEPA’s rule of reason and not under the safety requirements of the Atomic Energy
Act; LBP-15-29, 82 NRC 250 n.22 (2015)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-12-15, 75 NRC 704, 708 (2012)
severe accident mitigation alternatives analysis is a quantitative cost-benefit analysis, assessing whether
the cost of implementing a specific enhancement outweighs its benefit; CLI-15-18, 82 NRC 142-43
& n.40 (2015); LBP-13-13, 78 NRC 453 (2013)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-12-15, 75 NRC 704, 709 (2012)
severe accident mitigation alternatives analysis is a quantitative cost-benefit analysis, comparing the
costs of a mitigation measure against its benefits; LBP-13-13, 78 NRC 286 (2013)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-12-15, 75 NRC 704, 714 (2012)
contentions challenging a severe accident mitigation alternatives analysis must identify a deficiency
that plausibly could alter the overall result of the analysis in a material way; LBP-13-13, 78 NRC
287 (2013)
it will always be possible to envision and propose some alternative approach to severe accident
mitigation alternatives analysis, some additional detail to include, or some refinement; LBP-15-29, 82
NRC 250 (2015)
LEGAL CITATIONS INDEX

CASES

NRC regulations place an intentionally heavy burden on parties seeking to reopen the record; CLI-15-19, 82 NRC 155 (2015)

petitioner, rather than the licensing board, bears the burden of establishing the admissibility of proffered contentions; CLI-14-2, 79 NRC 28 (2014)

when a board is called upon to assess a severe accident mitigation alternatives analysis, the question is not whether more or different analysis can be done; LBP-13-13, 78 NRC 287, 453, 474 (2013)

petitioners must offer more than speculation at the contention admission stage; LBP-15-5, 81 NRC 305 n.391 (2015)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-12-15, 75 NRC 704, 724 (2012)

severe accident mitigation alternatives analysis evaluation is governed by the rule of reason and alternatives must be bounded by some notion of feasibility; LBP-13-13, 78 NRC 287, 454 (2013)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), CLI-12-15, 75 NRC 704, 725 (2012)

NEPA is not intended to encompass every possible impact, and does not encompass potential losses due to individuals’ perception of a risk; LBP-12-24, 76 NRC 523 n.100 (2012)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), LBP-06-23, 64 NRC 257 (2006)

severe accident mitigation alternatives analysis is a Category 2 issue and SAMAs must be considered for all plants that have not considered such alternatives; LBP-12-8, 75 NRC 551 (2012)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), LBP-06-23, 64 NRC 257, 280 (2006)

contentions concerning release of radiological, chemical, and herbicidal materials and storage of spent fuel are Category 1 issues and thus inadmissible; LBP-12-8, 75 NRC 551 (2012)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), LBP-06-23, 64 NRC 257, 280-300 (2006)

contention that environmental report is inadequate insofar as it does not consider the risk of spent fuel pool fires is inadmissible; LBP-15-5, 81 NRC 306-07 (2015)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), LBP-06-23, 64 NRC 257, 288 (2006)

Commission precedent interprets the term, “severe accidents,” to encompass only reactor accidents and not spent fuel pool accidents; LBP-11-2, 73 NRC 66 n.237 (2011)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), LBP-06-23, 64 NRC 257, 340 (2006)

to evaluate the impact of a fault on current operations, a probabilistic risk assessment rather than a deterministic analysis is the accepted and standard practice in SAMAs analyses; CLI-11-11, 74 NRC 439 (2011)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), LBP-06-23, 64 NRC 257, 341 (2006)

a severe accident mitigation alternatives contention was admitted; LBP-11-2, 73 NRC 62 (2011)

admissibility requirement generally is fulfilled when the sponsor of an otherwise acceptable contention provides a brief recitation of the factors underlying the contention or references to documents and texts that provide such reasons; LBP-15-1, 81 NRC 36-37 (2015)

intervenors do not point to any recitation of the factors underlying the contention or references to documents and texts that give the board reason to believe applicant’s inspection program may lead to a material negative impact on public safety, or that an improved program will lead to any positive impact; LBP-15-1, 81 NRC 40 (2015)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), LBP-07-13, 66 NRC 131, 137 (2007)

a severe accident mitigation alternatives contention was summarily dismissed; LBP-11-2, 73 NRC 62 (2011)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), LBP-07-13, 66 NRC 131, 149 (2007)

petitioner’s failure to address applicant’s supplemental economic analyses, demonstrate specific knowledge of the analysis, and not indicate, even broadly, that the SAMA economic cost-benefit conclusions are not sufficiently conservative renders a contention inadmissible; LBP-15-5, 81 NRC 299 n.339 (2015)

Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), LBP-08-22, 68 NRC 590, 601 (2008)

challenge to the adequacy of the acceptance criteria or any other component of the current licensing basis is not within the scope of the license renewal proceeding; LBP-12-24, 76 NRC 525 n.117 (2012)
LEGAL CITATIONS INDEX

CASES

*Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), LBP-11-23, 74 NRC 287, 324 (2011)*

(Young, J., concurring in part and dissenting in part)

the board has ruled on these Fukushima-related hearing requests and rejected them pursuant to 10 C.F.R. 2.326, 2.309(c), and 2.309(e)(1); CLI-11-5, 74 NRC 164-64 n.91 (2011)

*Entergy Nuclear Generation Co. (Pilgrim Nuclear Power Station), LBP-12-16, 76 NRC 44, 59-60 (2012)*

licensing board lacks authority to hold a hearing on the adequacy of a different agency’s regulations; LBP-15-5, 81 NRC 306 (2015)

*Entergy Nuclear Generation Co. v. Department of Environmental Protection, 459 Mass. 319, 330; 944 N.E.2d 1027 (Mass. 2011)*

another permitting regime for discharges does not foreclose the department from developing compatible methods of regulating water intakes at cooling water intake structures; LBP-12-16, 76 NRC 54 (2012)

in areas with a designated use as aquatic habitat, cooling water intake structures hinder the attainment of water quality standards; LBP-12-16, 76 NRC 54 n.49 (2012)

*Entergy Nuclear Generation Co. v. Department of Environmental Protection, 949 N.E.2d 1027, 1037 (Mass. 2011)*

cooling water intake structures have harmed aquatic species and their habitats; LBP-12-10, 75 NRC 677 (2012)

*Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-08-7, 67 NRC 187, 192 (2008)*

Commission has declined to take interlocutory review with respect to case management decisions; CLI-15-24, 82 NRC 335 n.19 (2015)

the Commission generally defers to licensing boards on case management issues; CLI-11-13, 74 NRC 640 (2011)

*Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-07-28, 66 NRC 275, 275 (2007)*

Commission has imposed or upheld disciplinary measures against parties and their representatives when they failed to comply with board directives and procedural rules; CLI-14-10, 80 NRC 165 n.41 (2014)

presiding officers have the duty to conduct a fair and impartial hearings according to law, to take appropriate actions to control the prehearing and hearing process, and to avoid delay and to maintain order and have all the powers necessary to those ends; CLI-14-10, 80 NRC 164 n.38 (2014)

*Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-08-27, 68 NRC 655 (2008)*

the Commission has considered whether to exercise pendent jurisdiction of otherwise unappealable issues, such as where those issues are inextricably intertwined with a related legal question properly before it, or where consideration of the issues together has the potential to resolve the entire litigation; CLI-12-12, 75 NRC 607 n.13 (2012)

*Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-09-6, 69 NRC 128, 133 (2009)*

interlocutory review is generally disfavored and requests for such review are granted only under extraordinary circumstances; CLI-12-13, 75 NRC 687 (2012); CLI-15-24, 82 NRC 335 (2015)

*Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-09-6, 69 NRC 128, 133-36 (2009)*

expense is not irreparable harm; CLI-15-24, 82 NRC 337 n.35 (2015)

*Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-09-6, 69 NRC 128, 133-37 (2009)*

appellate review of interlocutory licensing board orders is disfavored, and will be undertaken as a discretionary matter only in extraordinary circumstances; CLI-11-10, 74 NRC 256 (2011)

*Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-09-6, 69 NRC 128, 135 & n.25 (2009)*

the ordinary burden on parties in pursuing litigation pending rulemaking does not justify disrupting ongoing license review; CLI-11-1, 73 NRC 6 (2011)

*Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-09-6, 69 NRC 128, 136-38 (2009)*

increased litigation burden did not have a pervasive effect on the basic structure of the proceeding; CLI-15-24, 82 NRC 337 n.35 (2015)

*Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-09-6, 69 NRC 128, 137 (2009)*

piecemeal appeals during ongoing licensing board proceedings are generally disfavored; CLI-11-6, 74 NRC 210 (2011)

routine contention admissibility determinations generally are not appropriate for interlocutory review; CLI-12-12, 75 NRC 608 (2012)
LEGAL CITATIONS INDEX

CASES

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-09-6, 69 NRC 128, 138 (2009)
broadening of issues for hearing caused by the board’s admission of a contention that applicant 
oppooses does not constitute a pervasive and unusual effect on the litigation meriting interlocutory 
review; CLI-15-17, 82 NRC 37 n.23 (2015)
the Commission disfavors requests to invoke its inherent supervisory authority over adjudications;
CLI-11-13, 74 NRC 637 n.11 (2011)

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-10-30, 72 NRC 564, 568 (2010)
amission of a contention that might require further explanation of severe accident mitigation 
alternatives cost-benefit analysis did not have a pervasive and unusual effect on the litigation;
CLI-11-6, 74 NRC 209 n.38 (2011)
a board’s disputed legal ruling does not necessarily warrant immediate interlocutory review; CLI-11-6, 
74 NRC 208 n.31 (2011)
Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-10-30, 72 NRC 564, 568-69 (2010)
the Commission will address licensing board rulings after a licensing board has issued a final decision 
in a case, barring extraordinary circumstances; CLI-13-3, 77 NRC 54-55 (2013)

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-11-14, 74 NRC 801, 807 (2011)
filings not otherwise authorized by NRC rules are permitted only where necessity or fairness dictates;
CLI-14-3, 79 NRC 35 (2014)

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-11-14, 74 NRC 801, 807-08 (2011)
motion to reply is denied because petitioner should have anticipated the arguments in the Staff’s and 
applicant’s answers, which were logical responses to petitioner’s suspension motion; CLI-12-6, 75 
NRC 374 n.138 (2012)

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-11-14, 74 NRC 801, 809 (2011)
reply briefs may not contain new information that was not raised in either the petition or answers, but 
arguments that respond to the petition or answers, whether they are offered in rebuttal or in support, 
are not precluded; LBP-12-8, 75 NRC 570 (2012)

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-11-14, 74 NRC 801, 809-10 (2011)
issues raised in an intervention petition or answer are within the appropriate scope of a reply brief;

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-11-14, 74 NRC 801, 811-12 (2011)
Commission generally disfavors interlocutory review; CLI-15-17, 82 NRC 36 (2015)

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-11-14, 74 NRC 801, 813 (2011)
NEPA requires a hard look at severe accident mitigation measures; LBP-12-26, 76 NRC 573 n.72 
(2012)

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-12-18, 76 NRC 371, 374 (2012)
Commission has declined to take interlocutory review with respect to case management decisions;

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-15-6, 81 NRC 340, 354-56 (2015)
petitioners may challenge a Staff guidance document such as a Regulatory Guide; LBP-15-20, 81 
NRC 846-47 & n.100 (2015)

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-15-6, 81 NRC 340, 356, 358 n.85, 359 
(2015)
NRC Staff guidance is entitled to special weight in a decision on the merits; LBP-15-20, 81 NRC 847 
(2015)

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-15-6, 81 NRC 340, 359 (2015)
boards should accord special weight to NRC Staff guidance; LBP-15-16, 81 NRC 659 n.242 (2015)

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), CLI-15-6, 81 NRC 340, 369, 371 (2015)
original contention did not point to any specific grievance with the environmental justice discussion 
provided in applicant’s environmental report and so the board should have applied the standards in 
10 C.F.R. 2.309(c) to determine whether petition had demonstrated good cause for its late filing;
CLI-15-18, 82 NRC 147 n.58 (2015)

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), LBP-08-13, 68 NRC 43, 112 (2008)
contention that population used for analysis might underestimate the exposed population in a severe 
accident and, in turn, underestimate the benefit achieved in implementing a severe accident 
mitigation alternatives analysis is admissible; LBP-15-5, 81 NRC 298 (2015)

294
LEGAL CITATIONS INDEX

CASES

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), LBP-08-13, 68 NRC 43, 187 (2008) contention calling for alternative analysis, with no showing that the original analysis failed to meet applicable requirements, is inadmissible; CLI-12-8, 75 NRC 408 (2012)

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), LBP-08-13, 68 NRC 43, 60 (2008) with standing of various organizations unchallenged by applicant or NRC Staff, each organization has demonstrated institutional injury to the organization itself and representational standing; LBP-13-6, 77 NRC 283 n.23 (2013)

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), LBP-08-13, 68 NRC 43, 64 (2008) contentions that amount to an attack on applicable statutory requirements or represent a challenge to the basic structure of the Commission’s regulatory process must be rejected; LBP-11-29, 74 NRC 618 (2011)

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), LBP-08-13, 68 NRC 43, 86, aff'd, CLI-08-28, 68 NRC 655 (2008) commitment to develop a program by the time the 20-year extension begins does not demonstrate that the effects of aging will be adequately managed; LBP-15-1, 81 NRC 36 (2015)

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), LBP-08-13, 68 NRC 43, 89 (2008) whether petitioners have adequately raised an issue as to whether transformers constitute active or passive components survived a motion for summary disposition; LBP-11-2, 73 NRC 57 (2011) whether transformers are active or passive components remains an unresolved issue and thus requires fact-based determinations best left to further adjudicatory proceedings; LBP-11-2, 73 NRC 58 (2011)

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), LBP-08-13, 68 NRC 43, 95 (2008) applicant’s alternatives analysis need not discuss every conceivable alternative to the proposed action, but rather only feasible, non speculative, and reasonable alternatives; LBP-11-13, 73 NRC 553 (2011)

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), LBP-08-13, 68 NRC 43, 95-96 (2008) allegation that multiple, unrelated sources of electricity ought to be evaluated collectively is inadmissible; LBP-11-2, 73 NRC 52 (2011)

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), LBP-08-13, 68 NRC 43, 196 (2008) to challenge a Category 1 issue such as public health, petitioner must request a waiver and show that unique circumstances warrant a site-specific determination; LBP-15-5, 81 NRC 302 n.365 (2015)

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), LBP-10-13, 71 NRC 673, 678 & n.12 (2010) the current licensing basis is the set of NRC requirements (including regulations, orders, technical specifications, and license conditions) applicable to a specific plant, and includes the licensee’s written, docketed commitments for ensuring compliance with applicable NRC requirements and the plant-specific design basis; LBP-11-17, 74 NRC 21 (2011)

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), LBP-10-13, 71 NRC 673, 679 n.17 (2010) sufficiency of the NRC’s hard look at the benefits of SAMAs in comparison to their costs is subject to litigation in a license renewal proceeding; LBP-11-17, 74 NRC 21 (2011)

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), LBP-10-13, 71 NRC 673, 679 & n.18 (2010) a license renewal applicant is compelled to implement safety-related severe accident mitigation alternatives that deal with aging management; LBP-11-17, 74 NRC 22 (2011)

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), LBP-10-13, 71 NRC 673, 679 & n.19 (2010) NRC Staff has authority to require implementation of non-aging-management severe accident mitigation alternatives through its current licensing basis backfit review under Part 50 or through setting conditions of the license renewal; LBP-11-17, 74 NRC 22 (2011)

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), LBP-10-13, 71 NRC 673, 680-81 (2010) including probability-weighted consequences into SAMA analyses does not reduce the consequences so low as to reject all possible mitigation as too costly; LBP-11-2, 73 NRC 63 (2011)

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), LBP-10-13, 71 NRC 673, 686-87 (2010) contention that applicant’s severe accident mitigation alternatives analysis is significantly flawed because of the use of inaccurate factual assumptions about population is admissible; LBP-13-5, 81 NRC 297 (2015)
LEGAL CITATIONS INDEX

CASES

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), LBP-11-17, 74 NRC 11, 20-22, interlocutory review denied, CLI-11-14, 74 NRC 801, 803 (2011)
NEPA review in license renewal proceedings is not limited to aging management-related issues; LBP-15-5, 81 NRC 260 (2015) to evaluate a power reactor license renewal application, NRC reviews management of aging effects and time-limited aging analysis of particular safety-related functions of the plant’s systems, structures, and components and environmental impacts and alternatives to the proposed action; LBP-15-5, 81 NRC 259 (2015)

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), LBP-11-17, 74 NRC 11, 21 (2011) severe accident mitigation alternatives analysis must be considered as part of the environmental report and, ultimately, as part of NRC Staff’s supplemental environmental impact statement for a power reactor license renewal; LBP-15-5, 81 NRC 260 (2015) severe accident mitigation alternatives fall within Category 2 and must therefore be addressed on a site-specific basis; LBP-15-5, 81 NRC 260 (2015) severe accident mitigation alternatives review identifies and assesses possible changes, such as improvements in hardware, training, or procedures, that could cost-effectively mitigate the environmental impacts that would otherwise flow from a potential severe accident; LBP-15-5, 81 NRC 260 (2015)

Entergy Nuclear Operations, Inc. (Indian Point, Units 2 and 3), LBP-13-13, 78 NRC 246, 475-76 (2013) petitioner asserted that applicant underestimated the population projections used in the SAMA analysis in part through failure to consider certain U.S. Census estimates and nonresident populations (tourists and commuters); CLI-15-18, 82 NRC 148 n.68 (2015)

Entergy Nuclear Operations, Inc. (Palisades Nuclear Plant), CLI-08-19, 68 NRC 251, 254 (2008) radius for the proximity presumption has to be at least as large as the range where obvious offsite consequences can occur; LBP-15-17, 81 NRC 773 (2015)

Entergy Nuclear Operations, Inc. (Palisades Nuclear Plant), CLI-08-19, 68 NRC 251, 260 (2008) absent an obvious potential for harm, to obtain standing, it is petitioner’s burden to show how harm will or may occur; LBP-14-4, 79 NRC 332 (2014)

Entergy Nuclear Operations, Inc. (Palisades Nuclear Plant), CLI-08-19, 68 NRC 251, 262 (2008) contention filing deadlines support the Commission’s interest in promoting efficient adjudication; LBP-15-11, 81 NRC 409 n.32 (2015)

Entergy Nuclear Operations, Inc. (Palisades Nuclear Plant), CLI-08-19, 68 NRC 251, 266 (2008) union’s organizational standing argument was rejected in an indirect license transfer proceeding initiated before the Commission because it was merely the Local’s representational standing argument dressed up in different clothes; LBP-14-4, 79 NRC 332 n.69 (2014)

Entergy Nuclear Operations, Inc. (Palisades Nuclear Plant), CLI-08-19, 68 NRC 251, 266, 269-70 (2008) claims of interest-based organizational standing were denied; LBP-13-6, 77 NRC 283 n.23 (2013) in a license transfer proceeding, 3-mile distance between facility and organization’s offices does not qualify for organizational standing; LBP-13-6, 77 NRC 283 n.23 (2013) organizational standing in an agency adjudicatory proceeding could arise based on an asserted injury to a tangible asset, such as a building or land owned or regularly utilized by an organization, that is located near a proposed licensing activity; LBP-13-6, 77 NRC 283 n.23 (2013)

Entergy Nuclear Operations, Inc. (Palisades Nuclear Plant), LBP-15-17, 81 NRC 753, 789 & n.237 (2015) when the Commission has determined that compliance with a regulation is sufficient to provide for reasonable assurance of public health and safety, a licensing board cannot impose requirements that exceed those in the regulation; LBP-15-20, 81 NRC 848 (2015)

Entergy Nuclear Vermont Yankee LLC (Vermont Yankee Nuclear Power Station), CLI-07-3, 65 NRC 13, 17-18 (2007) adjudications are not the proper arena for challenges to NRC regulations; CLI-13-1, 77 NRC 35 (2013)
adequacy of the privilege log with respect to the sufficiency of the information contained therein is particularly important with respect to Subpart L proceedings because without sufficient information as to what allegedly makes the document deliberative, the challenger is forced to shoot in the dark and face a substantive answer by the document withheld, without the right to reply; LBP-13-5, 77 NRC 246-47 (2013)

Entergy Nuclear Vermont Yankee LLC (Vermont Yankee Nuclear Power Station), LBP-05-33, 62 NRC 828, 849-50 (2005)
deliberative process privilege must be asserted by an individual who holds a sufficiently senior position such that he or she has control over the requested information and possesses a balanced perspective that enables him or her to discern the nature of the material at issue; LBP-13-5, 77 NRC 240 (2013)
factual material that does not reveal the deliberative process is not protected by privilege, unless it is inextricably intertwined with the deliberative portions of the document or it could reveal the deliberative process being protected if it were disclosed; LBP-13-5, 77 NRC 239 (2013)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-06-8, 63 NRC 235, 237 n.4 (2007)
severe accident mitigation alternatives analysis is a Category 2 issue and SAMAs must be considered for all plants that have not considered such alternatives; LBP-12-8, 75 NRC 551 (2012)
Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-07-3, 65 NRC 13, 17, 20 (2007)
challenges to Category 1 findings based on new and significant information require a waiver of 10 C.F.R. Part 51, Subpart A, Appendix B, in order to be litigated in a license renewal adjudication;
CLI-13-7, 78 NRC 203 (2013)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-07-3, 65 NRC 13, 17-18 (2007)
generic environmental analysis is incorporated into NRC regulations, and thus Category 1 generic findings may not be challenged in individual licensing proceedings unless accompanied by a petition for rule waiver; CLI-15-6, 81 NRC 350-51 (2015)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-07-3, 65 NRC 13, 20 (2007)
adjudicating Category 1 issues site by site based merely on a claim of new and significant information would defeat the purpose of resolving generic issues in a generic environmental impact statement; LBP-12-8, 75 NRC 551 (2012)

any contention on a Category 1 issue amounts to a challenge to the regulation barring challenges to generic environmental findings; CLI-12-19, 76 NRC 384 n.39 (2012)
generically applicable concerns are not appropriate for resolution in an adjudicatory proceeding, a rulemaking petition being the appropriate mechanism for raising those concerns; CLI-12-6, 75 NRC 357 (2012)
in theory, Commission approval of a rule waiver could allow a contention on a Category 1 issue to proceed where special circumstances exist; CLI-15-6, 81 NRC 379 n.204 (2015)
it makes more sense for NRC to study whether, as a technical matter, the agency should modify its requirements relating to spent fuel storage for all plants than to litigate the issue in particular adjudications; CLI-12-6, 75 NRC 365 (2012)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-07-3, 65 NRC 13, 20-21 (2007)

any interested person may petition the Commission to issue, amend, or rescind any regulation; CLI-13-7, 78 NRC 208 n.42 (2013)

concerns that apply generically to all spent fuel pools at all reactors are more appropriately addressed via rulemaking or other appropriate generic activity; CLI-12-6, 75 NRC 365 (2012)

petitioners, not just parties, may request a rule waiver in NRC adjudicatory proceedings; CLI-12-19, 76 NRC 387 n.55 (2012)

rule waiver would be necessary to litigate the issue of potentially new and significant information pertaining to bird collisions in an adjudicatory proceeding; CLI-13-7, 78 NRC 213 n.73 (2013)

the board properly rejected state’s contention that raised concerns similar to those in its rulemaking petition as an impermissible challenge to NRC regulations; CLI-12-6, 75 NRC 357 (2012)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-07-3, 65 NRC 13, 21 (2007)
adjudicating Category 1 issues site by site based merely on a claim of new and significant information, would defeat the purpose of resolving generic issues in a generic EIS; CLI-12-19, 76 NRC 384 (2012); CLI-13-7, 78 NRC 216 n.94 (2013)
because the probability of a spent fuel pool accident causing significant harm is remote, there is no need for applicants to assess spent fuel pool accident mitigation alternatives as part of license renewal; LBP-15-5, 81 NRC 266, 307 (2015)

“new and significant information” requirement does not override, for purposes of litigating the issues in an adjudicatory proceeding, the exclusion of Category 1 issues in section 51.53(c)(3)(i) from site-specific review; CLI-12-19, 76 NRC 384 (2012)

no discussion of mitigation alternatives for Category 1 issues is necessary because NRC has already generically concluded that additional site-specific mitigation alternatives are unlikely to be beneficial; LBP-15-5, 81 NRC 266 (2015)
LEGAL CITATIONS INDEX

CASES

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-07-3, 65 NRC 13, 22 (2007), aff'd, Massachusetts v. United States, 522 F.3d 115 (1st Cir. 2008)

- NRC rules provide a mechanism for supplementing an original NEPA analysis, but the rules do not guarantee a hearing nor is a hearing necessary to satisfy NRC’s NEPA obligations; CLI-13-7, 78 NRC 211 n.62 (2013)

- NRC Staff could seek Commission permission to suspend one or more of the generic determinations in the license renewal environmental rules, and include a new analysis in pending, plant-specific environmental impact statements; CLI-11-5, 74 NRC 175 (2011)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-07-3, 65 NRC 13, 22 n.37 (2007), aff'd, Massachusetts v. United States, 522 F.3d 115 (1st Cir. 2008)

- request to suspend license renewal proceedings pending disposition of a rulemaking petition is premature; CLI-11-5, 74 NRC 174 (2011)

- rulemaking petitioner who is not a party to a licensing proceeding has no right under NRC rules to request a stay of that proceeding; CLI-12-6, 75 NRC 357 (2012)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-07-13, 65 NRC 211, 214-15 (2007)

- rulemaking petitioner may request that NRC suspend all or any part of any licensing proceeding to which petitioner is a party pending disposition of the petition for rulemaking; CLI-12-6, 75 NRC 357 (2012)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-07-16, 65 NRC 371, 377 (2007)

- licensing boards do not have jurisdiction to determine whether other government entities have properly followed their regulations or procedures; LBP-12-16, 76 NRC 59 n.74 (2012)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-07-16, 65 NRC 371, 385-86 (2007)

- Congress has severely limited the scope of NRC’s inquiry into Clean Water Act § 316(a) determinations; LBP-12-16, 76 NRC 53 n.43 (2012)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-10-17, 72 NRC 1, 10 & n.36 (2010)

- the Commission generally has declined to hold proceedings in abeyance pending the outcome of other Commission actions or adjudications; CLI-11-1, 73 NRC 4 (2011)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-10-17, 72 NRC 1, 10 n.37 (2010)

- a proceeding will remain open during the pendency of a remand; LBP-11-23, 74 NRC 294 (2011)
- a remand held the proceeding open, but only for the limited purpose of litigating the remanded contention; CLI-12-3, 75 NRC 140 (2012)
- arguments from an earlier petition were incorporated by reference; CLI-12-3, 75 NRC 139 n.41 (2012)
- during pendency of remand, intervenors are free to submit a motion to reopen the record pursuant to 10 C.F.R. 2.326, should they seek to address any genuinely new issues related to the license renewal application that previously could not have been raised; LBP-11-20, 74 NRC 76 n.70 (2011)
- once a proceeding has closed, the mechanism to raise a new issue no longer would be a contention accompanied by a motion to reopen, but rather a request for action under 10 C.F.R. 2.206 or a petition for rulemaking under 10 C.F.R. 2.802; CLI-12-3, 75 NRC 140 (2012)
- petitioner who files a new contention after the board has already closed the evidentiary record is obliged to address the reopening standards; CLI-12-6, 75 NRC 366 (2012)
- the standard for admitting a new contention after the record is closed is higher than for an ordinary late-filed contention; LBP-11-20, 74 NRC 77 n.75 (2011)
- where the proceeding remained open during the pendency of a remand, but the record remained closed, any contentions raising genuinely new issues would have to be accompanied by a motion to reopen; CLI-12-3, 75 NRC 140 (2012); LBP-11-20, 74 NRC 92 (2011)

299
LEGAL CITATIONS INDEX

CASES

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-10-17, 72 NRC 1, 11, 35 (2010)
Commission reviews board’s legal rulings de novo and will reverse them if they are contrary to established law; CLI-15-6, 81 NRC 351 (2015)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-10-17, 72 NRC 1, 36 (2010)
commitment to implement an aging management plan consistent with the GALL Report is an acceptable method for compliance with 10 C.F.R. 54.21(c)(1)(iii); LBP-13-13, 78 NRC 283, 290, 386 (2013)
commitment to implement an aging management plan that NRC finds is consistent with the GALL Report constitutes one acceptable method for demonstrating that the effects of aging will be adequately managed; LBP-11-2, 73 NRC 55 (2011)
if NRC concludes that an aging management program is consistent with the GALL Report, then it accepts applicant’s commitment to implement that AMP, finding the commitment itself to be an adequate demonstration of reasonable assurance under section 54.29(a); CLI-12-5, 75 NRC 304, 315 (2012)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-10-17, 72 NRC 1, 36, 38 (2010)
a commitment to implement an aging management plan that NRC finds is consistent with the GALL Report constitutes one acceptable method for compliance, but this does not insulate such an approach from challenge by an intervenor, and is not binding on a licensing board in an adjudication; LBP-11-20, 74 NRC 104 n.73 (2011)
assertion by applicant that its aging management plan is consistent with the GALL Report does not immunize it against a challenge to the AMP; CLI-12-5, 75 NRC 309 (2012)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-10-17, 72 NRC 1, 37 (2010)
although commitment to implement an aging management plan consistent with the GALL Report is an acceptable method for compliance with 10 C.F.R. 54.21(c)(1)(iii), such a commitment does not absolve the applicant from demonstrating, prior to issuance of a renewed license, that its aging management plan is indeed consistent with the GALL Report; LBP-13-13, 78 NRC 283, 290, 334, 380 (2013)
incorporation by reference of the applicable section of the GALL Report is permissible, but applicant must also provide sufficient plant-specific information to demonstrate that its aging management plan will be designed and implemented consistent with the GALL Report; LBP-13-13, 78 NRC 381 (2013)
license renewal applicant must demonstrate, not just promise, consistency with the GALL Report; LBP-13-13, 78 NRC 324 (2013)
license renewal applicant must present an aging management plan with sufficient information that NRC will be able to draw its own independent conclusion as to whether the applicant’s programs are in fact consistent with the GALL Report; LBP-13-13, 78 NRC 283, 290, 324, 380 (2013)
license renewal applicants’ use of an aging management program identified in the GALL Report constitutes reasonable assurance that it will manage the targeted aging effect during the renewal period; CLI-12-10, 75 NRC 497 n.93 (2012)
sufficiency of an aging management program that meets the GALL Report’s recommendations can be challenged if the contention admissibility requirements are otherwise met; CLI-12-10, 75 NRC 497 n.93 (2012)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-10-17, 72 NRC 1, 38 (2010)
NRC Staff’s independent finding of license renewal applicant’s consistency with GALL does not prevent the board from reviewing the substance of the applicant’s commitments, and exploring deficiencies alleged by intervenors in its proceedings; LBP-13-13, 78 NRC 283 (2013)
referencing an aging management program described in the GALL Report does not insulate a program from an adequately supported challenge at a hearing; LBP-11-2, 73 NRC 55 (2011)
burden of setting forth a clear and coherent argument for standing is generally on petitioner, but pro se petitioner is not held to the same standards of clarity and precision to which a lawyer might reasonably be expected to adhere; CLI-15-25, 82 NRC 394-95 (2015)
in NRC proceedings, pro se litigants are generally not held to the same high standards of pleading and practice as parties with counsel; LBP-11-9, 73 NRC 408 (2011); LBP-11-20, 74 NRC 96 n.26 (2011); LBP-11-23, 74 NRC 333 n.23 (2011); LBP-15-5, 81 NRC 286 n.234 (2015)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-10-17, 72 NRC 1, 53 n.304 (2010)
good cause for late filing is given the greatest weight in a section 2.309(c) analysis; LBP-11-23, 74 NRC 328 (2011)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-11-2, 73 NRC 333, 337 (2011)
rationale for NRC’s policy of generally disfavoring the filing of new contentions at the eleventh hour of an adjudication is based on the doctrine of finality, which states that at some point, an adjudicatory proceeding must come to an end; LBP-11-20, 74 NRC 77 (2011)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-11-2, 73 NRC 333, 337-38 (2011)
reopening the record for any reason is considered to be an extraordinary action; CLI-15-19, 82 NRC 156 (2015)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-11-2, 73 NRC 333, 338 (2011)
a request for hearing regarding a newly proffered contention cannot be admitted unless it satisfies the stringent standards for reopening the record; LBP-11-20, 74 NRC 77 n.75 (2011)
given the need for finality in adjudications, reopening the record is an extraordinary action imposing a deliberately heavy burden on intervenor; CLI-12-10, 75 NRC 495 (2012); LBP-15-14, 81 NRC 594 (2015)
the standard for admitting a new contention after the record is closed is higher than for an ordinary late-filed contention; CLI-11-8, 74 NRC 222 n.39 (2011)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-11-2, 73 NRC 333, 338-39 (2011)
there simply would be no end to NRC licensing proceedings if petitioners could ignore timeliness requirements and add new contentions at their convenience based on information that could have formed the basis for a timely contention at the outset of the proceeding; LBP-11-20, 74 NRC 85 n.109 (2011)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-11-2, 73 NRC 333, 339 (2011)
new contentions must be timely and based on new information relevant to the plant and the application that is materially different from information previously available; LBP-12-1, 75 NRC 12 (2012)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-11-2, 73 NRC 333, 341-42 (2011)
if applicant’s enhanced monitoring program, which was the topic of a late-filed contention, was insufficient, it must have been insufficient beforehand too; CLI-12-10, 75 NRC 493 n.70 (2012)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-11-2, 73 NRC 333, 342 n.43 (2011)
NRC generally considers approximately 30-60 days as the limit for timely filings based on new information; CLI-12-21, 76 NRC 499 n.50 (2012)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-11-2, 73 NRC 333, 344 (2011)
an information notice merely summarizes information that has long been publicly available and does not provide new information that would constitute good cause for the late filing; CLI-12-10, 75 NRC 490 (2012); LBP-11-20, 74 NRC 82-83 (2011)
intervenors cannot simply point to documents merely summarizing earlier documents or compiling preexisting, publicly available information into a single source as doing so does not render “new” the summarized or compiled information; LBP-12-27, 76 NRC 602 (2012)

 tardy filing of a contention may be excusable only where the facts upon which the amended or new contention is based were previously unavailable; CLI-12-10, 75 NRC 493 n.70 (2012)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-11-2, 73 NRC 333, 345 (2011)

there was no prejudice to intervenor where the board considered licensee’s supplement to the application, which contained the updated aging management plan, because intervenor could have sought to amend its contention to respond to the supplement; CLI-12-10, 75 NRC 493 n.70 (2012)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-11-2, 73 NRC 333, 346 (2011)

“materially different result” requirement of section 2.326(a)(3) is analyzed using the Commission’s test of whether it has been shown that a motion for summary disposition could be defeated; LBP-12-1, 75 NRC 27 (2012)

standard for a motion to reopen is measured using the Commission’s test of whether it has been shown that a motion for summary disposition could be defeated; LBP-11-20, 74 NRC 81 n.94, 94 (2011); LBP-11-23, 74 NRC 321 n.169, 332 (2011)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-11-2, 73 NRC 333, 346-47 (2011)

the quality of evidence presented for reopening must be at least of a level sufficient to withstand a motion for summary disposition; CLI-12-10, 75 NRC 498 (2012)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), CLI-11-2, 73 NRC 333, 348 (2011)

intervenor did not come close to demonstrating a likelihood that it would have prevailed on the merits of a new contention and that its success would have materially altered the outcome of the proceeding; LBP-11-20, 74 NRC 83, 84 n.108 (2011)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), DD-06-2, 63 NRC 425 (2006)

concerns about a facility’s emergency plans may be raised at any time pursuant to 10 C.F.R. 2.206; CLI-15-6, 81 NRC 386 n.248 (2015)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), LBP-04-28, 60 NRC 548, 553 (2004)

extended power uprate proceedings trigger application of the 50-mile proximity presumption, given that such license applications entail an obvious increase in the potential for offsite consequences; LBP-11-29, 74 NRC 619 (2011)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), LBP-04-28, 60 NRC 548, 560-61 (2004)

no significant hazards consideration determination is a procedural decision barred from litigation; LBP-15-17, 81 NRC 790 (2015)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), LBP-04-33, 60 NRC 749, 753 (2004)

a dynamic licensing process is followed in Commission licensing proceedings; LBP-11-22, 74 NRC 271 (2011)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), LBP-05-32, 62 NRC 813, 821 n.21 (2005)

if a contention satisfies the timeliness requirement of 10 C.F.R. 2.309(f)(2)(iii), then, by definition, it is not subject to 10 C.F.R. 2.309(c) which specifically applies to nontimely filings; LBP-12-18, 76 NRC 138-39 (2012)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), LBP-06-5, 63 NRC 116, 122 (2006)

regardless of the level of the dispute, at the summary disposition stage, it is not proper for a board to choose which expert has the better of the argument; LBP-12-23, 76 NRC 478 (2012)

when presented with conflicting expert opinions, licensing boards should be mindful that summary disposition is rarely proper; LBP-12-23, 76 NRC 478 (2012)
LEGAL CITATIONS INDEX

CASES

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), LBP-06-14, 63 NRC 568, 571-76 (2006)
  new contentions filed after the record has closed must satisfy the timeliness requirement of either 10 C.F.R. 2.309(f)(2) or 2.309(c), and the admissibility requirements of section 2.309(f)(1); LBP-11-22, 74 NRC 269 (2011)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), LBP-06-14, 63 NRC 568, 573-74 & n.14 (2006)
  if a contention satisfies the timeliness requirement of 10 C.F.R. 2.309(f)(2)(iii), then, by definition, it is not subject to 10 C.F.R. 2.309(c) which specifically applies to nontimely filings; LBP-12-18, 76 NRC 138-39 (2012)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), LBP-06-20, 64 NRC 131 (2006)
  severe accident mitigation alternatives analysis is a Category 2 issue and SAMAs must be considered for all plants that have not considered such alternatives; LBP-12-8, 75 NRC 551 (2012)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), LBP-06-20, 64 NRC 131, 152 (2006)
  contentions concerning release of radiological, chemical, and herbicidal materials and storage of spent fuel are Category 1 issues and thus inadmissible; LBP-12-8, 75 NRC 551 (2012)

  contention regarding severe spent fuel pool accidents is not admissible in license renewal proceeding because it is a Category 1 issue; LBP-11-2, 73 NRC 66 n.236 (2011)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), LBP-06-20, 64 NRC 131, 201 (2006)
  Subpart G procedures are mandated for certain proceedings and parties are permitted to propound interrogatories, take depositions, and cross-examine witnesses without leave of the board; LBP-11-13, 73 NRC 587 (2011)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), LBP-07-15, 66 NRC 261, 266 n.11 (2007)
  motions seeking admission of new or amended contentions must be filed within 30 days of the date the information that forms the basis for the contention becomes available; CLI-11-8, 74 NRC 218 n.8 (2011)
  unless a deadline has been specified in the scheduling order for the proceeding, the determination of timeliness is subject to a reasonableness standard that depends on the facts and circumstances in the case; LBP-12-27, 76 NRC 597 n.80 (2012)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), LBP-07-15, 66 NRC 261, 272 (2007)
  selection of hearing procedures for contentions at the outset of a proceeding is not immutable because availability of Subpart G procedures under 10 C.F.R. 2.310(d) depends critically on whether the credibility of eyewitnesses is important in resolving a contention, and witnesses relevant to each contention are not identified, under 10 C.F.R. 2.336(a)(1), until after contentions are admitted; LBP-11-13, 73 NRC 588 n.389 (2011)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), LBP-08-25, 68 NRC 763, 785-89 (2008)
  issues and concerns involved in an extended 20 years of operation are not identical to the issues reviewed when a reactor facility is first built and licensed; LBP-13-13, 78 NRC 280 (2013)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), LBP-10-19, 72 NRC 529, 531, 552 (Attach. A) (2010), aff’d, CLI-11-2, 73 NRC 333 (2011)
  the standard for admitting a new contention after the record is closed is higher than for an ordinary late-filed contention; LBP-11-22, 74 NRC 269 (2011)

Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), LBP-10-19, 72 NRC 529, 543, 548 (2010)
  amendment to aging management plan extended the AMP for medium-voltage cables to also cover low-voltage cables; LBP-11-20, 74 NRC 99 n.42 (2011)
Entergy Nuclear Vermont Yankee, LLC (Vermont Yankee Nuclear Power Station), LBP-15-18, 81 NRC 793, 799 (2015)

exemption requests ordinarily do not trigger hearing rights when an already-licensed facility is asking for relief from performing a duty imposed by NRC regulations; LBP-15-24, 82 NRC 94 n.163 (2015)

state challenged the adequacy of licensee’s decommissioning fund exemption request and associated analyses; LBP-15-24, 82 NRC 81 n.74 (2015)

economic injuries suffered by ratepayers are not particularized or distinct to the extent required to support standing, but are instead generalized and shared by a large class; LBP-14-4, 79 NRC 352 (2014)

Envirocare of Utah, Inc. v. NRC, 194 F.3d 72, 74 (D.C. Cir. 1999)

NRC sometimes imposes standing requirements more stringent than those imposed in federal court; LBP-14-4, 79 NRC 375 n.75 (2014)

Environmental Defense Fund v. Tennessee Valley Authority, 468 F.2d 1164 (6th Cir. 1972)

continued construction was barred pending the filing of an adequate environmental impact statement, notwithstanding the fact that the project was initially approved and construction commenced prior to the effective date of NEPA; LBP-12-1, 75 NRC 37 n.48 (2012)

Environmental Law & Policy Center v. NRC, 470 F.3d 676, 679 (7th Cir. 2006)

“baseload power” is defined as power generating energy intended to continuously produce electricity at or near full capacity, with high availability; LBP-12-15, 76 NRC 37 (2012)

Environmental Law & Policy Center v. NRC, 470 F.3d 676, 679 (7th Cir. 2006)

“baseload power” generates energy intended to continuously produce electricity at or near full capacity, with high availability; CLI-12-5, 75 NRC 339 n.223 (2012)

because a single wind turbine cannot provide continuous production of electricity at or near full capacity, it does not constitute a source of baseload power; CLI-12-5, 75 NRC 346 (2012)

Environmental Law & Policy Center v. NRC, 470 F.3d 676, 683-84 (7th Cir. 2006)

neither NRC nor applicant need consider any alternative that does not bring about the ends of the proposed action; CLI-12-5, 75 NRC 343 (2012)

Environmental Law & Policy Center v. NRC, 470 F.3d 676, 684 (7th Cir. 2006)

generation of baseload power is an acceptable purpose for a licensing action and has been determined to be broad enough to permit consideration of a host of energy-generating alternatives; LBP-11-13, 73 NRC 553 (2011)

Essex County Preservation Association v. Campbell, 536 F.2d 956, 960-61 (1st Cir. 1976)

mitigation must be discussed in sufficient detail in an environmental impact statement to ensure that environmental consequences have been fairly evaluated; LBP-12-18, 76 NRC 159 (2012)

in proving prejudicial error by a federal agency, it is sufficient that the agency’s error may have affected the outcome; LBP-14-2, 79 NRC 166 (2014)

Exelon Generation Co., LLC (Byron Nuclear Power Station, Units 1 and 2; Braidwood Nuclear Power Station, Units 1 and 2), CLI-14-6, 79 NRC 445, 449 (2014)

once all contentions have been decided, the contested proceeding is terminated; LBP-15-9, 81 NRC 397 n.10 (2015); LBP-15-30, 82 NRC 345 n.30 (2015)

when there are no proffered or admitted contentions remaining in the adjudicatory proceeding, the board’s jurisdiction terminates; LBP-15-12, 81 NRC 454 (2015)

Exelon Generation Co., LLC (Early Site Permit for Clinton ESP Site), CLI-04-31, 60 NRC 461 (2004)

because the board granted a hearing request, its decision to reject some contentions may not be appealed until the end of the case; CLI-14-2, 79 NRC 13 n.3 (2014)

piecemeal review of licensing board rulings during ongoing proceedings is disfavored; CLI-13-3, 77 NRC 54 (2013)
intervenor normally is not allowed to challenge a board’s rejection of contentions where the board has granted a hearing on any contention; CLI-12-12, 75 NRC 607 n.12 (2012)

contention admissibility decisions generally are not considered to be extraordinary for purposes of interlocutory appellate review, particularly where petitioner has been admitted as a party and has other contentions pending; CLI-13-3, 77 NRC 55 (2013)

license applicant may take an appeal under 2.311(d)(1) if it contends that, after considering all pending contentions, the board has erroneously granted a hearing to the petitioner; CLI-14-3, 79 NRC 36 n.31 (2014)

function of uncontested hearings is only to review the adequacy of NRC Staff’s work, not to make a de novo inquiry into NEPA issues; LBP-14-9, 80 NRC 68 (2014)

because the scope of intervenors’ participation in adjudications is limited to their admitted contentions, they are barred from participation in the uncontested portion of the hearing; LBP-14-9, 80 NRC 68 (2014)

for mandatory proceedings, licensing boards are to conduct a simple sufficiency review rather than a de novo review on both AEA and NEPA issues; LBP-11-11, 73 NRC 475, 526 (2011)

for the mandatory uncontested proceeding on uranium enrichment facility license, a licensing board is to conduct a simple sufficiency review rather than a de novo review on both safety and environmental issues; LBP-11-26, 74 NRC 519 (2011)

the Commission does not review the combined license application de novo, but rather, considers the sufficiency of the Staff’s review of that application; CLI-12-2, 75 NRC 74 (2012); CLI-12-9, 75 NRC 428 (2012)

NRC Staff’s underlying technical and factual findings are not open to board reconsideration unless, after a review of the record, the board finds the NRC Staff review inadequate or its findings insufficient; LBP-11-26, 74 NRC 519 (2011)

the board’s role in mandatory hearings is to carefully probe NRC Staff findings by asking appropriate questions and by requiring supplemental information when necessary, but Staff’s underlying technical and factual findings are not open to board reconsideration unless, after a review of the record, the board finds the Staff review inadequate or its findings insufficient; LBP-11-11, 73 NRC 476 (2011)

the scope of intervenors’ participation in combined license adjudications is limited to their admitted contentions, and they are barred from participating in the uncontested portion of the hearing; CLI-12-11, 75 NRC 527 n.17 (2012)

aff’d, Environmental Law and Policy Center v. NRC, 470 F.3d 676 (7th Cir. 2006)

alternatives might not be feasible for a variety of reasons, including a failure of an alternative to meet the project’s purpose and need; LBP-13-9, 78 NRC 88 n.354 (2013)

aff’d, Environmental Law and Policy Center v. NRC, 470 F.3d 676 (7th Cir. 2006)

an alternative that fails to meet the purpose of the project does not need to be further examined in the environmental report; LBP-11-6, 73 NRC 225 (2010)
energy efficiency alternative is excluded because it would not advance applicant’s goal to provide additional baseload electrical generation capacity for use in the owner’s current markets and/or for potential sale on the wholesale markets; LBP-11-7, 73 NRC 304 n.333 (2011)
Exelon Generation Co., LLC (Early Site Permit for Clinton ESP Site), CLI-05-29, 62 NRC 801, 807 (2005)
hard look under NEPA is subject to a rule of reason, and consideration of environmental impacts need not address all theoretical possibilities, but only those that have some reasonable possibility of occurring; LBP-15-16, 81 NRC 638 (2015)
Exelon Generation Co., LLC (Early Site Permit for Clinton ESP Site), CLI-05-29, 62 NRC 801, 808 (2005)
contention admissibility rules require that a proposed contention be supported by alleged fact or expert opinion; CLI-12-7, 75 NRC 390 (2012)
Exelon Generation Co., LLC (Early Site Permit for Clinton ESP Site), CLI-05-29, 62 NRC 801, 810 (2005) 
aff’d, Environmental Law and Policy Center v. NRC, 470 F.3d 676 (7th Cir. 2006)
because a solely wind- or solar-powered facility could not satisfy the project’s purpose, there was no need to compare the impact of such facilities to the impact of the proposed nuclear plant; LBP-11-7, 73 NRC 308 n.371 (2011)
highly site-specific seismic hazard analysis reflects consideration not only of the location and magnitude of historic earthquakes, but also the nature of the bedrock and the style of faulting in the surrounding region; LBP-11-11, 73 NRC 519 (2011)
in a mandatory hearing, licensing boards must narrow their inquiry to topics or sections in Staff documents that they deem most important and should concentrate on portions of the documents that do not on their face adequately explain the logic, underlying facts, and applicable regulations and guidance; LBP-11-11, 73 NRC 476 (2011); LBP-11-26, 74 NRC 519-20 (2011); LBP-12-21, 76 NRC 244 (2012)
no purpose is served for NRC Staff to produce copies of every document used in its review when the board cannot possibly read through every one, let alone scrutinize them; LBP-12-21, 76 NRC 244 (2012)
no purpose is served for NRC Staff to produce volumes of documents and information supporting facts and conclusions that are of small importance and are beyond dispute; LBP-12-21, 76 NRC 244 (2012)
the Commission does not review the combined license application de novo, but rather, considers the sufficiency of NRC Staff’s review of that application; CLI-12-2, 75 NRC 74 (2012); CLI-12-9, 75 NRC 428 (2012)
Exelon Generation Co., LLC (Early Site Permit for Clinton ESP Site), CLI-07-12, 65 NRC 203, 207-08 (2007)
regulatory approach, of relying on licensees to submit complete and accurate information, and auditing that information as appropriate, is considered to be entirely consistent with sound regulatory practice; LBP-15-24, 82 NRC 79 n.66 (2015)
Exelon Generation Co., LLC (Early Site Permit for Clinton ESP Site), LBP-05-19, 62 NRC 134, 182 (2005)
when omissions are cured by the subsequent issuance of licensing-related documents, a contention of omission must be disposed of or modified; LBP-12-5, 75 NRC 238 (2012)
Exelon Generation Co., LLC (Early Site Permit for Clinton ESP Site), LBP-05-19, 62 NRC 134, 183 (2005)
one all contentions have been decided, the contested proceeding is terminated; CLI-12-14, 75 NRC 700 n.51 (2012)
Exelon Generation Co., LLC (Early Site Permit for Clinton ESP Site), LBP-06-28, 64 NRC 460 (2006), permit issuance authorized, CLI-07-12, 65 NRC 203 (2007)
guidance on the role of licensing boards in mandatory proceedings is provided; LBP-12-21, 76 NRC 233-34 (2012)
mandatory proceedings for licensing of proposed uranium enrichment facility sites were conducted; LBP-11-11, 73 NRC 475 (2011)
LEGAL CITATIONS INDEX

CASES

Exelon Generation Co., LLC (Limerick Generating Station, Units 1 and 2), CLI-12-19, 76 NRC 377, 379-80 (2012)

on appeal, Commission defers to board’s rulings on contention admissibility absent an error of law or abuse of discretion; CLI-15-23, 82 NRC 324-25 (2015)

Exelon Generation Co., LLC (Limerick Generating Station, Units 1 and 2), CLI-12-19, 76 NRC 377, 385-86 (2012)

interpretation of statutes at issue and the regulations governing their implementation falls within the Commission’s province; LBP-15-5, 81 NRC 302 n.363 (2015)

pointing to alleged new and significant information is not enough to allow boards to adjudicate an issue resolved generically by regulation; LBP-15-5, 81 NRC 302 (2015)

Exelon Generation Co., LLC (Limerick Generating Station, Units 1 and 2), CLI-12-19, 76 NRC 377, 385-88 (2012)

it is a well-established principle that a petitioner in an adjudicatory proceeding cannot use one regulation to challenge another without first obtaining a waiver by showing special circumstances; LBP-15-4, 81 NRC 173 (2015)

Exelon Generation Co., LLC (Limerick Generating Station, Units 1 and 2), CLI-12-19, 76 NRC 377, 385-88 (2012)

no rule or regulation of the Commission, or any provision thereof, is subject to attack in any adjudicatory proceeding subject to 10 C.F.R. Part 2 except as provided by the waiver provision of 10 C.F.R. 2.335(b); LBP-15-24, 82 NRC 76 n.37 (2015)

Exelon Generation Co., LLC (Limerick Generating Station, Units 1 and 2), CLI-12-19, 76 NRC 377, 386 (2012)

exception in section 51.53(c)(3)(ii)(L) operates as the functional equivalent of a Category 1 designation for Limerick and similarly situated plants for which SAMAs were already considered in an environmental impact statement or environmental assessment; CLI-13-7, 78 NRC 212 (2013)

Exelon Generation Co., LLC (Limerick Generating Station, Units 1 and 2), CLI-12-19, 76 NRC 377, 387 (2012)

to challenge a Category 1 issue such as public health, petitioner must request a waiver and show that unique circumstances warrant a site-specific determination; LBP-15-5, 81 NRC 302 n.365 (2015)

Exelon Generation Co., LLC (Limerick Generating Station, Units 1 and 2), CLI-12-19, 76 NRC 377, 388 (2012)

waiver of a rule pertaining to the agency’s environmental responsibilities is possible; CLI-13-7, 78 NRC 209 (2013)

Exelon Generation Co., LLC (Limerick Generating Station, Units 1 and 2), CLI-13-7, 78 NRC 199, 205 (2013), petition for review docketed, No. 14-1225 (D.C. Cir. filed Nov. 4, 2014)

rule waiver petitioners must satisfy four factors; LBP-14-16, 80 NRC 195 n.71 (2014)

Exelon Generation Co., LLC (Limerick Generating Station, Units 1 and 2), CLI-13-7, 78 NRC 199, 205 n.19 (2013)

all four of the Millstone rule waiver requirements derive from the language and purpose of 10 C.F.R. 2.335(b), and all must be met in order for a waiver to be granted; LBP-14-16, 80 NRC 195 n.72 (2014)

Exelon Generation Co., LLC (Limerick Generating Station, Units 1 and 2), CLI-13-7, 78 NRC 199, 206-07 (2013)

rule waiver requests must demonstrate that special circumstances with respect to the subject matter of the particular proceeding are such that application of the rule or regulation (or a provision of it) would not serve the purposes for which it was adopted; CLI-15-21, 82 NRC 302 (2015)

to obtain waiver of a rule, the allegation of special circumstances must be set forth with particularity and supported by an affidavit or other proof; LBP-15-5, 81 NRC 272 n.129 (2015)

waivers of NRC regulations may be granted in extraordinary situations where special circumstances can be demonstrated; LBP-13-12, 78 NRC 243 (2013)

Exelon Generation Co., LLC (Limerick Generating Station, Units 1 and 2), CLI-13-7, 78 NRC 199, 207-09 (2013)

four-factor test is applied to rule waiver requests; CLI-15-21, 82 NRC 302 (2015)
special circumstances required to obtain a rule waiver have been described as a prima facie showing that application of a rule in a particular way would not serve the purposes for which the rule was adopted; LBP-15-5, 81 NRC 272 (2015)

Exelon Generation Co., LLC (Limerick Generating Station, Units 1 and 2), CLI-13-7, 78 NRC 199, 209 (2013), petition for review docketed, No. 14-1225 (D.C. Cir. filed Nov. 4, 2014)
rule waiver test applies equally to safety and significant environmental concerns; LBP-14-16, 80 NRC 195 n.70 (2014)

Exelon Generation Co., LLC (Limerick Generating Station, Units 1 and 2), LBP-12-8, 75 NRC 539 (2012) to the extent that applicant proposes modifications to the facility in response to a request for information, NEPA also requires consideration of effectiveness and relative costs of a range of alternatives for satisfying the NRC’s concerns; LBP-12-15, 76 NRC 32 (2012)

Exelon Generation Co., LLC (Limerick Generating Station, Units 1 and 2), LBP-13-1, 77 NRC 57, 64, aff’d on other grounds, CLI-13-7, 78 NRC 199 (2013)

Milstone test for rule waiver establishes an appreciably higher burden for would-be waiver seekers than does 10 C.F.R. 2.335(b); LBP-14-16, 80 NRC 195 n.72 (2014)

Exelon Generation Co., LLC (Peach Bottom Atomic Power Station, Units 2 and 3), CLI-05-26, 62 NRC 577, 581 (2005)
if proximity-based standing cannot be not demonstrated, then standing must be established according to traditional principles of redressability, injury, and causation; LBP-12-3, 75 NRC 179 (2012); LBP-13-6, 77 NRC 271 n.5 (2013)

Exelon Nuclear Texas Holdings, LLC (Victoria County Station Site), LBP-11-16, 73 NRC 645, 667 (2011) to be admissible, a contention must provide more than a bare assertion, but must explain the supporting reasons for the dispute raised in that contention; LBP-15-1, 81 NRC 42 (2015)

Exelon Nuclear Texas Holdings, LLC (Victoria County Station Site), LBP-11-16, 73 NRC 645, 690-91 (2011)
under the NEPA rule of reason, NRC’s environmental analysis need only consider environmental impacts that are reasonably foreseeable, and need not consider remote and speculative scenarios; LBP-13-13, 78 NRC 286 (2013)

Exelon Nuclear Texas Holdings, LLC (Victoria County Station Site), LBP-12-20, 76 NRC 215 (2012) motion to withdraw application without prejudice is granted and proceeding is terminated; CLI-14-8, 80 NRC 77 n.20 (2014)

licensing boards should not interpret regulatory text in a way that would essentially negate the stated purpose of the regulation or impute to the Commission an intent to create a schizophrenic rule; LBP-14-7, 79 NRC 475-76 (2014)

Fansteel, Inc. (Muskogee, Oklahoma Site), CLI-03-13, 58 NRC 195, 203 (2003) boards may appropriately view petitioner’s supporting information in a light favorable to the petitioner, but neither mere speculation nor bare or conclusory assertions, even by an expert, will suffice to allow admission of a proffered contention; LBP-13-10, 78 NRC 148 (2013)
bards must not adjudicate the merits of allegations at the contention admissibility stage, but, to be admissible, a contention must provide more than a bare assertion, and must explain the supporting reasons for the dispute raised in that contention; LBP-11-16, 73 NRC 667, 677 (2011)
claim that application fails to adequately present the true extent of historical exploration drilling, borehole abandonment details, R&D testing, changes to groundwater water quality, and interconnections of geologic strata contains no alleged facts to support this opinion and thus does not raise a genuine dispute; LBP-12-3, 75 NRC 203 (2012)
contentions will be ruled inadmissible if petitioner has offered no tangible information, no experts, no substantive affidavits, but instead only bare assertions and speculation; LBP-11-6, 73 NRC 250 (2010); LBP-13-8, 78 NRC 19 (2013); LBP-14-6, 79 NRC 442 (2014)
mere notice pleading is insufficient for contention admission; LBP-11-2, 73 NRC 45 (2011); LBP-11-13, 73 NRC 551 (2011); LBP-11-16, 73 NRC 655 (2011); LBP-11-21, 74 NRC 125 (2011); LBP-12-8, 75 NRC 548 (2012)
neither mere speculation nor bare or conclusory assertions, even by an expert, alleging that a matter should be considered will suffice to allow the admission of a proffered contention; LBP-12-3, 75

308
LEGAL CITATIONS INDEX

CASES

petitioner cannot rest its contentions on bare assertions and speculation; LBP-11-21, 74 NRC 128, 133 (2011)

statement of supporting facts or expert opinion to establish how the project would impair the visual resources, rather than mere speculation, is required for an admissible contention; LBP-12-3, 75 NRC 207 (2012)

Fansteel, Inc. (Muskogee, Oklahoma Site), CLI-03-13, 58 NRC 195, 204-05 (2003)

attaching material or documents as a basis for a contention, without setting forth an explanation of that information’s significance, is inadequate to support the admission of the contention; LBP-13-6, 77 NRC 285 (2013); LBP-12-3, 75 NRC 191 (2012); LBP-12-15, 76 NRC 26-27 (2012); LBP-12-27, 76 NRC 595 (2012); LBP-15-1, 81 NRC 39 (2015)

boards will not hunt for information that the agency’s procedural rules require be explicitly identified and fully explained; CLI-11-8, 74 NRC 222 (2011)

petitioners fail to link any of their past criticisms to specific provisions of the environmental report, and the board declines to pore through the attachments to their intervention submission to assemble the basis for such a contention; LBP-12-3, 75 NRC 207 (2012)

the Commission should not be expected to sift unaided through documents filed before the board to piece together and discern a party’s argument and the grounds for its claims; LBP-12-3, 75 NRC 206 (2012)

Fansteel, Inc. (Muskogee, Oklahoma Site), CLI-03-13, 58 NRC 195, 205 (2003)

providing any material or document as the basis of a contention without setting forth an explanation of its significance is inadequate to support admission of the contention; LBP-12-12, 75 NRC 774 (2012); LBP-15-20, 81 NRC 865 (2015)

Federal Election Commission v. Rose, 806 F.2d 1081, 1087 (D.C. Cir. 1986)

reasonableness, the legal standard governing the determination of substantial justification, is separate and distinct from the legal standard used in assessing the merits phase of a proceeding; LBP-11-18, 73 NRC 369 (2011)

deliberative process privilege has been extended to draft documents, proposals, suggestions, instructions to work deletions and alterations into drafts, instructions to conduct an investigation, documents reflecting personal and advisory opinions, and rejections of recommendations; LBP-13-5, 77 NRC 239-40 (2013)

Fewell Geotechnical Engineering, Ltd. (Thomas E. Murray, Radiographer), CLI-92-5, 35 NRC 83, 84 (1992)

stare decisis is not implicated where the board decision is unreviewed and therefore not binding on future tribunals, but as a prudential matter, the Commission vacates such decisions when appellate review is cut short by mootness; CLI-13-9, 78 NRC 558-59 (2013)

FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), CLI-04-23, 60 NRC 154, 157 (2004)

before any hearing is granted on a confirmatory order, a threshold question, intertwined with both standing and contention admissibility issues, is whether the hearing requests are within the scope of the proceeding outlined in the order itself, that is, whether the order should be sustained; CLI-13-2, 77 NRC 44 (2013)

FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), CLI-04-23, 60 NRC 154, 157-58 (2004)

sections 2.309(d) and (f) are the relevant legal standards when evaluating a third-party petition for hearing on a confirmatory order; LBP-14-4, 79 NRC 327 n.40 (2014)

FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), CLI-04-23, 60 NRC 154, 158 (2004)

enforcement proceeding’s limited scope undermines petitioner’s claim of standing as well as the materiality of its proposed contentions; CLI-13-2, 77 NRC 49 (2013)
LEGAL CITATIONS INDEX

CASES

FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), CLI-12-8, 75 NRC 393, 395-96 (2012)

FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), CLI-12-8, 75 NRC 393, 396 (2012)

Commission generally defers to board decisions on contention admissibility unless it finds an error of law or abuse of discretion; CLI-15-20, 82 NRC 222 (2015)

contentions shall not be admitted if at the outset they are not described with reasonable specificity or are not supported by some alleged fact or facts demonstrating a genuine material dispute with the applicant; LBP-12-8, 75 NRC 548 (2012); LBP-15-1, 81 NRC 38 (2015)

NRC Staff is required to issue a final environmental impact statement that thoroughly and objectively evaluates reasonable alternatives to the proposed action; LBP-12-17, 76 NRC 113 (2012)

FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), CLI-12-8, 75 NRC 393, 400-02 (2012)

it is not enough to demonstrate a theoretical possibility that wind farms spread across a wide area could provide consistent power, but rather petitioners must show concretely that wind could be a reliable, commercially viable source of baseload power during the license renewal period; LBP-15-5, 81 NRC 279 (2015)

FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), CLI-12-8, 75 NRC 393, 401-02 (2012)

contention seeking full impacts generation alternative analysis of wind, either alone or in combination with solar and storage, is inadmissible because it fails to adequately demonstrate the capacity to produce baseload power; LBP-12-15, 76 NRC 38 (2012)

FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), CLI-12-8, 75 NRC 393, 402 (2012)

discussion necessary to support a NEPA alternatives contention in a reactor license renewal proceeding is compared with that for a Part 52 combined license proceeding; LBP-12-15, 76 NRC 38 (2012)

FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), CLI-12-8, 75 NRC 393, 402, 405 (2012)

failure to reference specific sources showing that wind or other renewables are viable sources of baseload power within the service area renders a contention inadmissible; LBP-15-5, 81 NRC 279 (2015)

FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), CLI-12-8, 75 NRC 393, 404-05 (2012)

petitioner that fails to provide sufficient factual or expert support for the claims in its contention in contravention of section 2.309(f)(1)(v), also may have failed to show a genuine dispute with the applicant as required under section 2.309(f)(3)(v); LBP-12-15, 76 NRC 27 (2012); LBP-15-1, 81 NRC 38 n.124 (2015)

FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), CLI-12-8, 75 NRC 393, 405 (2012)

failure to provide a direct critique of the analysis in the environmental report discussing the potential for offshore power and interconnected wind farms is a failure to identify a genuine dispute with the applicant; LBP-15-5, 81 NRC 279 (2015)

FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), CLI-12-8, 75 NRC 393, 406 (2012)

because the severe accident mitigation alternatives analysis is largely quantitative, resting on inputs used in computer modeling, it will always be possible to propose that the analysis use one or more other inputs; LBP-13-13, 78 NRC 453 (2013)

proper question is not whether there are plausible alternative choices for use in the SAMA analysis, but whether the analysis that was done is reasonable under NEPA; LBP-15-29, 82 NRC 250 (2015)

310
LEGAL CITATIONS INDEX

CASES

FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), CLI-12-8, 75 NRC 393, 406-18 (2012) petitioner may raise a SAMA-related contention in a license renewal adjudication if it satisfies the general contention admissibility criteria in section 2.309(f)(1); CLI-13-7, 78 NRC 211 (2013)

FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), CLI-12-8, 75 NRC 393, 407 (2012) unless a petitioner sets forth a supported contention pointing to an apparent error or deficiency that may have significantly skewed the environmental conclusions, there is no genuine material dispute for hearing; LBP-15-5, 81 NRC 293 (2015); LBP-15-29, 82 NRC 250 (2015)

FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), CLI-12-8, 75 NRC 393, 409 (2012) board is the appropriate arbiter of fact-specific questions of contention admissibility, and the Commission defers to the board’s decision; CLI-15-25, 82 NRC 405 (2015)

FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), CLI-12-8, 75 NRC 393, 410-11 (2012) petitioners must provide site-specific support to show that the severe accident mitigation alternatives analysis is unreasonable; LBP-15-5, 81 NRC 294 (2015)

FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), CLI-12-8, 75 NRC 393, 415 (2012) although petitioners are not required to run their own computer models at the contention admissibility stage, a contention challenging a SAMA analysis nonetheless must be tethered to the computer modeling and mathematical aspects of the analysis; CLI-12-15, 75 NRC 728 (2012); LBP-12-27, 76 NRC 592 (2012) to the extent petitioner is challenging the adequacy of computer modeling of plume variability, petitioner bears the burden of providing evidence specific to the license renewal applicant; LBP-15-5, 81 NRC 296-97, 299 (2015)

FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), LBP-11-34, 74 NRC 685 (2011) Fukushima-related contentions were dismissed as premature; LBP-11-39, 74 NRC 870 (2011)

FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), LBP-11-34, 74 NRC 685, 689 (2011) admissibility of Fukushima-related contentions is determined; LBP-11-37, 74 NRC 779 n.3 (2011)

FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), LBP-11-34, 74 NRC 685, 696-97 (2011) Fukushima-related contention is denied for failure of its proponent to contact the other parties to resolve the issue presented by the contention prior to its submission, for failure to show that the contention is within the scope of the proceeding or is material to the findings NRC must make, and for failure to reference any specific portion of the application at issue; LBP-11-37, 74 NRC 783 n.6 (2011)

FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), LBP-11-34, 74 NRC 685, 697-98 (2011) absent voluntary action by applicant to amend its environmental report, intervenor wishing to raise new or revised post-ER environmental concerns must await issuance of Staff’s draft environmental impact statement; LBP-11-37, 74 NRC 784 (2011)

FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), LBP-11-34, 74 NRC 685, 698-99 (2011) Fukushima-related contention based on a Staff Requirements Memorandum are inadmissible because the SRM does not define or impose any new requirements arising from the Fukushima accident and thus fails to establish a genuine dispute on a material issue of law or fact; LBP-11-37, 74 NRC 784 n.7 (2011)
LEGAL CITATIONS INDEX

CASES

FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), LBP-12-27, 76 NRC 583, 592-94 (2012)
SAMA analysis is an analysis of a class of SAMA candidates using probabilistic risk assessment techniques to determine whether any of the SAMA candidates would be cost-beneficial; LBP-13-1, 77 NRC 65 (2013)

FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), LBP-15-1, 81 NRC 15, 30 n.72 (2015)
contentions proposed after the filing deadline, which would have been allowable under the previous 10 C.F.R. 2.309(c)(2) requirements, will also be allowable under the current section 2.309(c)(1) requirements; LBP-15-11, 81 NRC 408 n.30 (2015)

FirstEnergy Nuclear Operating Co. (Davis-Besse Nuclear Power Station, Unit 1), LBP-15-1, 81 NRC 15, 41 (2015)
contentions that request more testing, more methods of testing, and more information, without explaining why the current program is inadequate, are inadmissible; LBP-15-20, 81 NRC 853 (2015)

Five Points Road Joint Venture v. Johanns, 542 F.3d 1121, 1124 n.3 (7th Cir. 2008)

once Congress has waived sovereign immunity over certain subject matter, a court should be careful not to assume the authority to narrow the waiver that Congress intended; LBP-11-8, 73 NRC 360 (2011)

F.J. Vollmer Co., Inc. v. Magaw, 102 F.3d 591, 595 (D.C. Cir. 1996)

although a court’s merits reasoning may be quite relevant to the resolution of the substantial justification question, the inquiry into the reasonableness of the government’s position may not be collapsed into an antecedent evaluation of the merits; LBP-11-8, 73 NRC 368-69 (2011)

Flaherty v. Coughlin, 713 F.2d 10, 13 (2d. Cir. 1983)

summary disposition, like summary judgment, is an extreme remedy that should be granted with caution; LBP-11-7, 73 NRC 263 (2011)

Flast v. Cohen, 392 U.S. 83, 95 (1968)
pursuant to the case or controversy doctrine, a justiciable controversy must involve parties who raise questions presented in an adversary context and in a form historically viewed as capable of resolution through the judicial process; LBP-13-7, 77 NRC 345 n.59 (2013)

no agency shall utilize an excessively narrow construction of its existing statutory authorizations to avoid compliance with NEPA; LBP-14-9, 80 NRC 50 (2014)

Florida Power & Light Co. (Calvert Cliffs Nuclear Power Plant, Units 1 and 2), CLI-06-21, 64 NRC 30, 33 (2006)
failure of counsel to review the scheduling order does not constitute good cause for failure to meet a filing deadline; LBP-12-12, 75 NRC 750 (2012)
failure to read NRC regulations carefully does not constitute good cause for accepting late-filed petitions; LBP-11-7, 73 NRC 263 (2011)

failure to comply with pleading requirements for late filings constitutes sufficient grounds for rejecting intervention and hearing requests; LBP-11-7, 73 NRC 279 n.159 (2011)

a late-filed contention is inadmissible both for lack of a good cause showing and for failure to address the other factors of 10 C.F.R. 2.309(c)(1); LBP-11-6, 73 NRC 247 (2010)

Florida Power & Light Co. (St. Lucie Nuclear Power Plant, Unit 2), ALAB-335, 3 NRC 830, 842 n.26 (1976)
board considered evidence submitted with petitioner’s reply to which opposing parties didn’t object; LBP-15-5, 81 NRC 289 n.252 (2015)

Florida Power & Light Co. (St. Lucie Nuclear Power Plant, Unit 2), CLI-14-11, 80 NRC 167, 173 (2014)
agency approval or authorization is a necessary component of Commission action that affords a hearing opportunity under AEA §189a, but not all agency approvals granted to licensees constitute de facto licensee amendments; CLI-15-14, 81 NRC 734-35 (2015)
licensee action without NRC approval of an increase in authority or alteration of the terms of the license does not constitute a de facto amendment; CLI-15-14, 81 NRC 735 n.23 (2015)

licensee cannot amend the terms of its license unilaterally, but rather must request and obtain agency approval; CLI-15-5, 81 NRC 334 (2015); CLI-15-14, 81 NRC 734 n.21, 741 (2015); LBP-15-27, 82 NRC 197 (2015)

petitioners’ premise that a series of NRC Staff communications relating to plant oversight should be considered as an element of a single, overarching de facto license amendment is rejected; CLI-15-14, 81 NRC 735 n.24 (2015)

Florida Power & Light Co. (St. Lucie Nuclear Power Plant, Unit 2), CLI-14-11, 80 NRC 167, 173 & n.31 (2014)

licensee action, as opposed to agency action, is insufficient to trigger a de facto license amendment proceeding; CLI-15-14, 81 NRC (2015)

Florida Power & Light Co. (St. Lucie Nuclear Power Plant, Unit 2), CLI-14-11, 80 NRC 167, 174 (2014)

NRC’s inspection process is separate from its licensing process; LBP-15-27, 82 NRC 196-97 (2015)

Florida Power & Light Co. (St. Lucie Nuclear Power Plant, Unit 2), CLI-14-11, 80 NRC 167, 174 n.33 (2014)

licensee actions made in response to NRC Staff oversight activities do not constitute de facto license amendments; CLI-15-5, 81 NRC 335 (2015)

Florida Power & Light Co. (St. Lucie Nuclear Power Plant, Unit 2), CLI-14-11, 80 NRC 167, 175 (2014)

if a hearing could be invoked each time NRC engaged in oversight over or inquiry into plant conditions, NRC’s administrative process could be brought to a virtual standstill; CLI-15-14, 81 NRC 745-46 (2015); LBP-15-27, 82 NRC 194 (2015)

Florida Power & Light Co. (St. Lucie Nuclear Power Plant, Unit 2), CLI-14-11, 80 NRC 167, 178 & n.53 (2014)

licensing boards may not assume that a licensee intends to contravene NRC regulations; LBP-15-24, 82 NRC 83 n.91 (2015)

Florida Power & Light Co. (St. Lucie Nuclear Power Plant, Unit 2), CLI-14-11, 80 NRC 167, 179 (2014)

assertion that the section 2.206 process does not provide a viable forum for relief is rejected; CLI-15-14, 81 NRC 736 n.32 (2015)

challenges to licensee actions taken under 10 C.F.R. 50.59 may only be taken by means of a petition for enforcement action under 10 C.F.R. 2.206; CLI-15-5, 81 NRC 337 (2015)

section 2.206 provides a process for stakeholders to advance concerns and obtain full or partial relief, or written reasons why the requested relief is not warranted; CLI-15-20, 82 NRC 230 (2015); LBP-15-4, 81 NRC 175 (2015)

Florida Power & Light Co. (St. Lucie Nuclear Power Plant, Unit 2), CLI-14-11, 80 NRC 167, 179 n.60 (2014)

intervention as a matter of discretion is permitted only where at least one petitioner has established standing and at least one contention has been admitted, and petitioner is required to address six factors in its initial petition; CLI-15-14, 81 NRC 738 n.41 (2015)

Florida Power & Light Co. (St. Lucie Nuclear Power Plant, Unit 2), CLI-80-41, 12 NRC 650, 652 (1980)

Commission authority to reconsider or clarify a decision, if needed, is inherent in its authority to render the decision in the first instance; CLI-14-1, 79 NRC 2 (2014)

Florida Power & Light Co. (St. Lucie Nuclear Power Plant, Unit 2), CLI-81-12, 13 NRC 838, 844 (1981)

containments must be designed to remain essentially leaktight during postulated accidents; LBP-13-8, 78 NRC 30-31 (2013)

Florida Power & Light Co. (St. Lucie Nuclear Power Plant, Units 1 and 2), CLI-89-21, 30 NRC 325 (1989)

proximity presumption was applied in a license amendment proceeding where management’s lack of character and competence was alleged; LBP-15-17, 81 NRC 773 n.121 (2015)

Florida Power & Light Co. (St. Lucie Nuclear Power Plant, Units 1 and 2), CLI-89-21, 30 NRC 325, 329 (1989)

although it might be fatal for standing purposes if an Indian tribe were seeking to have intervenors represent their interests in the proceeding, intervenors’ lack of authority to represent them is not a bar to intervenors raising the tribe’s contention; LBP-12-12, 75 NRC 753 n.40 (2012)
although NRC applies traditional standing concepts, it presumes that an individual has standing to intervene without the need to address them upon a showing that he or she lives within, or otherwise has frequent contacts with, a geographic zone of potential harm; LBP-11-2, 73 NRC 41 (2011), LBP-11-16, 73 NRC 653 (2011).

in reactor license renewal proceedings, petitioner is presumed to have standing to intervene without the need to specifically plead injury, causation, and redressability if petitioner lives within 50 miles of the nuclear power facility; LBP-11-21, 74 NRC 122 (2011)

individual member who qualifies an organization for standing must have suffered or might suffer a concrete and particularized injury that is fairly traceable to the challenged action, likely redressable by a favorable decision, and arguably within the zone of interests protected by the governing statute; LBP-14-4, 79 NRC 328 (2014)

living within 50 miles of a nuclear power reactor is enough to confer standing on an individual or group in proceedings for construction permits, operating licenses, or significant amendments thereto; LBP-15-17, 81 NRC 770 n.96 (2015); LBP-15-20, 81 NRC 836-37 & n.30 (2015)

petitioner who lives, has frequent contacts, or has significant property interest within 50 miles of a nuclear power reactor has standing without the need to make an individualized showing of injury, causation, and redressability; LBP-15-17, 81 NRC 770 (2015)

petitioners cannot gain standing from the interests of third parties except in very limited circumstances; LBP-15-17, 81 NRC 775 n.139 (2015)

proximity presumption applies when there are clear implications for the offsite environment or major alterations to the facility with a clear potential for offsite consequences; LBP-15-17, 81 NRC 770 (2015)

traditional judicial standing concepts require a showing that the individual has suffered or might suffer a concrete and particularized injury that is fairly traceable to the challenged action, likely to be redressed by a favorable decision, and arguably within the zone of interests protected by the governing statutes; LBP-11-2, 73 NRC 40 (2011)

Florida Power & Light Co. (St. Lucie Nuclear Power Plant, Units 1 and 2), CLI-89-21, 30 NRC 325, 329-30 (1989)

in license amendment proceedings, petitioners may not claim standing simply upon a residence or visits near the plant, unless the proposed action quite obviously entails an increased potential for offsite consequences; LBP-11-29, 74 NRC 616 (2011)

in situations involving obvious potential for offsite consequences, Commission has routinely granted standing to petitioners who live within a certain distance of the facility at issue under the proximity presumption, effectively dispensing with the need to make an affirmative showing of injury, causation, and redressability; LBP-15-13, 81 NRC 463 (2015)

proximity presumption applies in more limited license amendment proceedings only if the proposed amendment obviously entails an increased potential for offsite consequences; LBP-15-17, 81 NRC 770-71 (2015)

Florida Power & Light Co. (St. Lucie Nuclear Power Plant, Units 1 and 2), LBP-08-14, 68 NRC 279, 283-84 (2008)

license amendment request must be complete and accurate in all material respects; LBP-15-24, 82 NRC 98 (2015)

Florida Power & Light Co. (St. Lucie Nuclear Power Plant, Units 1 and 2), LBP-08-14, 68 NRC 279, 290-92 (2008)

third-party request for a hearing on a confirmatory order was denied, in part, because petitioner failed to establish standing or raise an admissible contention under section 2.309(f); LBP-14-4, 79 NRC 327 n.40 (2014)

Florida Power & Light Co. (St. Lucie Nuclear Power Plant, Units 1 and 2), LBP-08-14, 68 NRC 279, 291 (2008)

state’s claim that license amendment request contains incomplete and incorrect statements concerning its use of the trust fund is within the scope of the license amendment proceeding as defined in the notice of opportunity to request a hearing; LBP-15-24, 82 NRC 79 (2015)
**LEGAL CITATIONS INDEX**

**CASES**

*Florida Power & Light Co.* (St. Lucie Nuclear Power Plant, Units 1 and 2; Turkey Point Nuclear Generating Plant, Units 3 and 4), DD-97-20, 46 NRC 96 (1997)

the record before the board falls far short of rebutting the presumption that a petition for license modification, suspension, or revocation is a meaningful avenue for seeking administrative relief; LBP-12-14, 76 NRC 11 (2012)

*Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), ALAB-950, 33 NRC 492, 500-01 (1991)

a licensing board was not in error in finding a person not competent to address technical issues in responding to a motion for summary disposition; LBP-11-23, 74 NRC 332 (2011)

*Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-00-23, 52 NRC 327, 329 (2000)

contentions must be within the scope of the proceeding as defined by the Commission in its initial hearing notice and order referring the proceeding to a licensing board; LBP-12-3, 73 NRC 191 (2012); LBP-12-15, 76 NRC 25 (2012); LBP-12-27, 76 NRC 594 (2012); LBP-13-6, 77 NRC 285 (2013)

*Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 5-6 (2001)

contentions concerning release of radiological, chemical, and herbicidal materials and storage of spent fuel are Category 1 issues and thus inadmissible; LBP-12-8, 75 NRC 552 (2012)

*Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 6-13 (2001)

safety issue that does not involve aging management issues is outside the scope of a license renewal proceeding; LBP-15-5, 81 NRC 264 (2015)

*Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 7 (2001)

relevant issues for an additional 20 years of reactor plant operation differ from those when a reactor plant is first built and licensed; LBP-11-21, 74 NRC 129 (2011); LBP-13-13, 78 NRC 280 (2013)

*Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 7-8 (2001)

license renewal safety review is limited to licensee’s management of aging for certain systems, structures, and components, and review of time-limited aging analyses; LBP-11-21, 74 NRC 126 (2011); LBP-15-5, 81 NRC 259 (2015)

*Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 8 (2001)

applicants must demonstrate how their programs will be effective in managing the effects of aging during the proposed period of extended operation, at a detailed component and structure level, rather than at a more generalized system level; LBP-11-21, 74 NRC 126-27 (2011)

for license renewal, it is unnecessary to review all those issues already monitored, reviewed, and commonly resolved as needed by ongoing regulatory oversight; LBP-11-2, 73 NRC 45-46 n.92 (2011)

integrated plant assessments require that applicants demonstrate that systems, structures, and components will continue to perform their intended functions during the period of extended operation; LBP-13-13, 78 NRC 280 (2013)

it is unnecessary to include in license renewal review all those issues already monitored, reviewed, and commonly resolved as needed by ongoing regulatory oversight; LBP-13-8, 78 NRC 12 (2013)

license renewal applicants are required to reassess any time-limited aging analyses that were based upon a particular time period, such as an assumed service life of a specific number of years or some period of operation defined by the original 40-year license term; LBP-13-13, 78 NRC 280 (2013)

license renewal applicants must demonstrate how their programs will be effective in managing the effects of aging during the proposed period of extended operation, at a detailed component and structure level, rather than at a more generalized system level; LBP-15-5, 81 NRC 259 (2015)

license renewal safety reviews are generally limited to aging-related issues because NRC recognizes that it has the ongoing responsibility to oversee the safety and security of operating nuclear reactors,

315
and maintains an aggressive and ongoing program to oversee plant operation; LBP-13-13, 78 NRC 281 (2013)

NRC has the ongoing responsibility to oversee the safety and security of operating nuclear reactors and maintains an aggressive and ongoing program to oversee plant operation and to maintain compliance with the current licensing basis; LBP-13-8, 78 NRC 12 (2013)

reassessment of time-limited aging analyses must show that the earlier analysis will remain valid for the extended operation period or modify and extend the analysis to apply to a longer term, such as 60 years, or otherwise demonstrate that the effects of aging will be adequately managed in the renewal term; LBP-13-13, 78 NRC 280-81 (2013)

Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 8-10 (2001)

compliance with orders issued as part of NRC’s ongoing oversight program are enforcement issues that are not within the scope of a license renewal proceeding; LBP-13-5, 81 NRC 291, 292 (2015)
current safety issues are beyond the scope of a license renewal proceeding; LBP-12-27, 76 NRC 609 (2012)

license renewal review is not intended to duplicate NRC’s ongoing oversight of operating reactors; CLI-15-6, 81 NRC 347 (2015)

Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 9 (2001)

“current licensing basis” is a term of art comprehending the various NRC requirements applicable to a specific plant that are in effect at the time of a license renewal application; LBP-13-13, 78 NRC 281 n.149 (2013); LBP-15-20, 81 NRC 844 (2015)

entertaining contentions in a license renewal proceeding that challenge the current licensing basis would be both unnecessary and wasteful given ongoing agency oversight, review, and enforcement; LBP-11-21, 74 NRC 127 (2011)

for active structures, systems, and components, NRC chose to exempt from license renewal, challenges to a plant’s operational activities covered by its current licensing basis; LBP-13-13, 78 NRC 281 (2013)

in establishing its license renewal process, NRC did not believe it necessary or appropriate to throw open the full gamut of provisions in a plant’s current licensing basis to reanalysis because those are effectively addressed and maintained by ongoing agency oversight, review, and enforcement; LBP-13-8, 78 NRC 13 (2013); LBP-13-13, 78 NRC 281 (2013)

it is not necessary or appropriate to throw open the full gamut of provisions in a facility’s current licensing basis to reanalysis during the license renewal review, because the current licensing basis is effectively addressed and maintained by ongoing agency oversight, review, and enforcement; LBP-12-24, 76 NRC 525 (2012)

many safety questions that relate to plant aging become important during the extended renewal term since the design of some components may have been based upon a service lifetime of only 40 years; LBP-11-21, 74 NRC 129 (2011)

the current licensing basis includes licensee’s commitments remaining in effect that were made in docketed licensing correspondence such as licensee responses to NRC bulletins, generic letters, and enforcement actions, as well as licensee commitments documented in NRC safety evaluations or licensee event reports; LBP-11-21, 74 NRC 130 n.86 (2011)

Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 9-10 (2001)

while the license renewal process seeks to mitigate the detrimental effects of aging from operation beyond the initial license term, everyday public health and safety are ensured by the comprehensive and continuous process of operational oversight; LBP-11-21, 74 NRC 130 (2011)

Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 10 (2001)

adjudicatory hearings in individual license renewal proceedings will share the same scope of issues as NRC Staff review, for NRC’s hearing process, like NRC Staff’s review, necessarily examines only the questions NRC safety rules make pertinent; LBP-15-5, 81 NRC 259 n.43 (2015)
Commission distinguishes between aging management issues, reviewed at the time of license renewal, and operational issues, reviewed at all times as part of the current licensing basis; LBP-15-5, 81 NRC 259 (2015)
safety culture, operational history, quality assurance, quality control, management competence, human factors, and emergency planning issues are beyond the scope of a license renewal proceeding; LBP-11-21, 74 NRC 129-30 (2011)

**Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 11 (2001)**

Category I issues are not subject to challenge in a relicensing proceeding because they involve environmental effects that are essentially similar for all plants and need not be assessed repeatedly on a site-specific basis; LBP-11-13, 73 NRC 551 (2011)

Category I issues are not subject to challenge in a relicensing proceeding, absent a waiver under 10 C.F.R. 2.335, because they involve environmental effects that are essentially similar for all plants and need not be assessed repeatedly on a site-specific basis; LBP-11-21, 74 NRC 132 (2011); LBP-15-5, 81 NRC 260 (2015)

license renewal applicants need not submit in their site-specific environmental reports an analysis of Category I issues; LBP-11-2, 73 NRC 76 n.306 (2011)

site-specific environmental issues are Category 2 issues; LBP-12-8, 75 NRC 553 (2012)

to meet its environmental review burden in license renewal cases, NRC Staff developed the generic environmental impact statement, which contains findings that apply to all nuclear power plants and are codified in Appendix B of Subpart A of 10 C.F.R. Part 51; LBP-13-13, 78 NRC 285 (2013)

**Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 11-13 (2001)**

Part 51 process for environmental review associated with license renewal, focusing upon the potential impacts of an additional 20 years of plant operation, is described; CLI-12-5, 75 NRC 341 n.241 (2012)

**Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 13 (2001)**

in the context of license renewal, NRC’s Atomic Energy Act review under Part 54 does not compromise or limit the National Environmental Policy Act; LBP-13-8, 78 NRC 13 n.18 (2013); LBP-13-13, 78 NRC 271 n.67, 284 (2013)

NRC’s AEA safety review under Part 54 does not compromise or limit NEPA; LBP-15-5, 81 NRC 260 (2015)

the aging-based safety review set out in Part 54 is analytically separate from Part 51’s environmental inquiry and does not in any sense restrict NEPA; LBP-11-17, 74 NRC 21 (2011)

**Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 14 (2001)**

in 1989, NRC revised its rules to prevent the admission of poorly defined or supported contentions or those based on little more than speculation; CLI-12-8, 75 NRC 396 (2012)

**Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 15 (2001)**

pleadings submitted by pro se petitioners are afforded greater leniency than petitions drafted with the assistance of counsel; LBP-15-5, 81 NRC 286 n.234 (2015)

**Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 16 (2001)**

challenges to the generic environmental impact statement’s generic determinations amount to attacks on NRC regulations and are not within the scope of license renewal proceedings; LBP-13-8, 78 NRC 34 (2013)

**Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 19 (2001)**

prior to NRC’s 1989 rule revision, intervenors were able to trigger hearings after merely copying contentions from another proceeding involving another reactor, even though many of these intervenors often had negligible knowledge of the issues and, in fact, no direct case to present; CLI-12-8, 75 NRC 396 (2012)
Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 20 (2001)
rule waiver is required to litigate any new and significant information relating to a Category 1 issue;
CLI-12-19, 76 NRC 384 (2012)
Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 21 (2001)
Part 51’s reference to severe accident mitigation alternatives deals only with nuclear reactor accidents,
not spent fuel storage accidents; LBP-11-2, 73 NRC 66 (2011)
Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 21-22 (2001)
no discussion of mitigation alternatives for Category 1 issues is necessary because NRC has already
generically concluded that additional site-specific mitigation alternatives are unlikely to be beneficial;
LBP-15-5, 81 NRC 266 (2015)
Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3,
21-23 (2001)
generic environmental analysis is incorporated into NRC regulations, and thus Category 1 generic
findings may not be challenged in individual licensing proceedings unless accompanied by a petition
for rule waiver; CLI-15-6, 81 NRC 351 (2015)
petitioners, not just parties, may request a rule waiver in NRC adjudicatory proceedings; CLI-12-19,
76 NRC 387 n.55 (2012)
Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3,
22 (2001)
Part 51 treats all spent fuel pool accidents, whatever their cause, as generic, Category 1 events not
suitable for case-by-case adjudication; LBP-11-2, 73 NRC 66 (2011)
Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3,
22-23 (2001)
Category 1 issues in section 51.53(c)(3)(i) are excluded from site-specific review absent a waiver of
the rule; CLI-12-19, 76 NRC 384 n.41 (2012)
Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3,
23 (2001)
license renewal boards cannot admit environmental challenges regarding spent fuel pool issues;
LBP-11-2, 73 NRC 65 (2011)
Part 51’s license renewal provisions cover environmental issues relating to onsite spent fuel storage
generically and all such issues, including accident risk, fall outside the scope of license renewal
proceedings; LBP-11-13, 73 NRC 570 n.244 (2011); LBP-15-5, 81 NRC 266 n.92 (2015)
Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-91-13, 34 NRC
185, 188 (1991)
licensing boards can refer potentially significant safety issues that cannot be addressed through the
adjudicatory process to NRC Staff for review; LBP-15-1, 81 NRC 45 n.81 (2015)
licensing boards may not raise issues sua sponte when the sole intervenor has withdrawn from the
proceeding; LBP-11-22, 74 NRC 282 (2011)
Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-91-13, 34 NRC
185, 188 n.1 (1991)
proceedings terminate if intervenor either settles or abandons all of its contentions;
LBP-11-22, 74 NRC 271 n.64 (2011)
Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), DD-82-2, 15 NRC
1345, 1345 (1982)
section 2.802(d) suspension request is inapplicable where no petition for rulemaking has been filed
before the Commission; CLI-14-6, 79 NRC 449 (2014)
Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-81-16, 13 NRC
1115, 1120 (1981)
licensing boards must find reasonable assurance that activities authorized by the
amendment can be conducted without endangering the health and safety of the public, and in
petitioner must provide factual evidence or supporting documents that produce some doubt about the adequacy of a specified portion of applicant’s documents or that provide supporting reasons that tend to show that there is some specified omission from applicant’s documents; LBP-15-20, 81 NRC 850 (2015)

Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-01-6, 53 NRC 138, 146-50 (2001)

for reactor operating license renewal proceedings, a proximity presumption, respecting standing for an individual who resides within a 50-mile radius of a nuclear power plant, is recognized; LBP-12-10, 75 NRC 638 (2012)

Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-01-6, 53 NRC 138, 148 (2001)

proximity presumption applies across the board to all proceedings regardless of type because the rationale underlying it is not based on the type of proceeding per se but on whether the proposed action involves a significant source of radioactivity producing an obvious potential for offsite consequences; LBP-15-17, 81 NRC 770-71 n.102 (2015)

Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-01-6, 53 NRC 138, 150 (2001), aff’d on other grounds, CLI-01-17, 54 NRC 3 (2001)

proximity presumption applies in reactor operating license renewal proceedings; LBP-12-8, 75 NRC 547 (2012)

proximity presumption applies in reactor operating license renewal proceedings; LBP-13-8, 78 NRC 7 (2013)

Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-01-6, 53 NRC 138, 150, aff’d on other grounds, CLI-01-17, 54 NRC 3, 26 n.20 (2001)

in power reactor license renewal proceedings, standing associated with causation is deemed fulfilled if a member of the organization that is seeking representational standing resides or has significant contacts in an area within a 50-mile radius of the facility; LBP-12-15, 76 NRC 24 n.1 (2012)

Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-01-6, 53 NRC 138, 159 (2001)

contentions that advocate stricter requirements than agency rules impose or that otherwise seek to litigate a generic determination established by a Commission rulemaking are inadmissible; LBP-13-6, 77 NRC 284 (2013)

Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-08-18, 68 NRC 533, 539 (2008)

proximity presumption applies in more limited license amendment proceedings only if the proposed amendment obviously entails an increased potential for offsite consequences; LBP-15-17, 81 NRC 770-71 (2015)

Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 6 and 7), LBP-11-6, 73 NRC 149, 169 n.13 (2011)

organizations may claim standing on their own behalf; LBP-11-29, 74 NRC 617 n.15 (2011)

Florida Power & Light Co. (Turkey Point Nuclear Generating Plant, Units 6 and 7), LBP-11-6, 73 NRC 149, 169-70 (2011)

when a governmental organization, including a federally recognized Native American tribe, is unable to establish standing because the facility or nuclear material in question does not fall within its jurisdictional boundaries, that entity nonetheless may be accorded standing if its boundaries come within a distance from the nuclear facility or material that otherwise would establish standing for an
individual or nongovernmental organization, whether via a proximity presumption or otherwise;

**Florida Power & Light Co.** (Turkey Point Nuclear Generating Plant, Units 6 and 7), LBP-11-6, 73 NRC 149, 199-200 (2011)

based on its language, a contention can be characterized as a contention of omission, a contention of adequacy, or both; LBP-13-9, 78 NRC 47-48 (2013); LBP-14-5, 79 NRC 384 (2014)

**Florida Power & Light Co.** (Turkey Point Nuclear Generating Plant, Units 6 and 7), LBP-11-6, 73 NRC 149, 200 (2011)

two primary types of contentions are contentions of omission and contentions of adequacy; LBP-13-9, 78 NRC 47 n.30 (2013); LBP-14-5, 79 NRC 384 (2014)

**Florida Power & Light Co.** (Turkey Point Nuclear Generating Plant, Units 6 and 7), LBP-11-6, 73 NRC 149, 200 n.3 (2011)

contention of omission alleges an application suffers from an improper omission, whereas a contention of adequacy raises a specific substantive challenge to how particular information or issues have been discussed in the application; LBP-13-9, 78 NRC 47 n.30 (2013); LBP-14-5, 79 NRC 384 (2014)

**Florida Power & Light Co.** (Turkey Point Nuclear Generating Plant, Units 6 and 7), LBP-11-6, 73 NRC 149, 236 n.102 (2011)

it is not the province of NRC and thus the board to enforce another agency’s regulations; LBP-12-12, 75 NRC 769 n.148 (2012)

**Florida Power & Light Co.** (Turkey Point Nuclear Generating Plant, Units 6 and 7), LBP-11-6, 73 NRC 149, 244 n.11 (2011)

board members are not required to comb through the record seeking support for contentions;

LBP-11-13, 73 NRC 575 n.287 (2011)

judges are not like pigs, hunting for truffles buried in briefs; LBP-11-14, 73 NRC 608 n.106 (2011)

**Florida Power & Light Co.** (Turkey Point Nuclear Generating Plant, Units 6 and 7), LBP-11-6, 73 NRC 149, 247 (2002)

good cause doesn’t exist where petitioner’s late-filed contention is due to careless inadvertence and not, as petitioner claimed, attributable to technical difficulties with the E-Filing system; LBP-15-4, 81 NRC 163 n.39 (2015)

**Florida Power & Light Co.** (Turkey Point Nuclear Generating Plant, Units 6 and 7), LBP-11-6, 73 NRC 149, 253 (2011)

to be admissible, a contention must provide more than a bare assertion, and must explain the supporting reasons for the dispute raised in that contention; LBP-15-1, 81 NRC 42 n.154 (2015)

**Florida Power & Light Co.** (Turkey Point Nuclear Generating Plant, Units 6 and 7), LBP-11-33, 74 NRC 675 (2011)

Fukushima-related contentions were dismissed as premature; LBP-11-39, 74 NRC 870 (2011)

**Florida Power & Light Co.** (Turkey Point Nuclear Generating Plant, Units 6 and 7), LBP-11-33, 74 NRC 675, 678-78 (2011)

admissibility of Fukushima-related contentions is determined; LBP-11-37, 74 NRC 779 n.3 (2011)

**Florida Power & Light Co.** (Turkey Point Nuclear Generating Plant, Units 6 and 7), LBP-11-33, 74 NRC 675, 681 n.9 (2011)

applicant may update an environmental report if relevant new and significant information becomes available, but is under no regulatory or statutory obligation to effect such an update; LBP-11-34, 74 NRC 697 n.78 (2011)

**Florida Power & Light Co.** (Turkey Point Nuclear Generating Plant, Units 6 and 7), LBP-11-33, 74 NRC 675, 681-82 (2011)

absent voluntary action by applicant to amend its environmental report, intervenor wishing to raise new or revised post-ER environmental concerns must await issuance of Staff’s draft environmental impact statement; LBP-11-37, 74 NRC 784 (2011)

**Florida Power & Light Co.** (Turkey Point Nuclear Generating Plant, Units 6 and 7), LBP-11-33, 74 NRC 675, 682 n.12 (2011)

petitioners may amend their contentions or file new contentions if the draft supplemental environmental impact statement differs significantly from the data or conclusions in applicant’s documents; LBP-11-34, 74 NRC 698 (2011)
**LEGAL CITATIONS INDEX**

**CASES**

**Florida Power & Light Co.** (Turkey Point Nuclear Generating Plant, Units 6 and 7), LBP-11-33, 74 NRC 675, 683 (2011)

- Fukushima-related contention based on a Staff Requirements Memorandum are inadmissible because the SRM does not define or impose any new requirements arising from the Fukushima accident and thus fails to establish a genuine dispute on a material issue of law or fact; LBP-11-37, 74 NRC 784 n.7 (2011)

- Issuance of a Staff Requirements Memorandum directing Staff to implement “without delay” the recommendations of the Fukushima Task Force does not render contentions admissible; LBP-11-36, 74 NRC 772 (2011)

**Florida Power & Light Co. v. Lorion,** 470 U.S. 729, 731 (1985)

- For contentions that fall within the facility’s current licensing basis, petitioner may seek action on its concerns by either filing a petition for rulemaking under 10 C.F.R. 2.802 or submitting an enforcement petition under 10 C.F.R. 2.206; LBP-11-21, 74 NRC 134 n.115 (2011)

- Fact-finding administrative body, such as a licensing board, with authority to develop an evidentiary record, is distinguished from reviewing adjudicatory and judicial bodies, generally with a more limited record-creating authority; LBP-15-3, 81 NRC 122 n.49 (2015)

**Forelaws on Board v. Johnson,** 743 F.2d 677, 683 (9th Cir. 1985)

- Government agencies are required to comply with NEPA to the fullest extent possible; LBP-14-9, 80 NRC 50 (2014)

**Forest Guardians v. U.S. Forest Service,** 495 F.3d 1162, 1172 (10th Cir. 2007)

- Federal agencies must consider the likely environmental impacts of the preferred course of action as well as reasonable alternatives; LBP-12-17, 76 NRC 81 (2012)

- NEPA requires federal agencies to pause before committing resources to a project and consider the likely environmental impacts of the preferred course of action as well as reasonable alternatives; LBP-12-18, 76 NRC 159 (2012); LBP-14-9, 80 NRC 40 (2014)

**Fort Stewart Schools v. Federal Labor Relations Authority,** 495 U.S. 641, 654 (1990)

- Agencies must abide by their own regulations; LBP-14-4, 79 NRC 371 n.56 (2014)

**Foundation for North American Wild Sheep v. U.S. Department of Agriculture,** 681 F.2d 1172, 1179 (9th Cir. 1982)

- Purpose of NEPA’s requirement that an EIS be prepared is to obviate the need for speculation by ensuring that available data are gathered and analyzed prior to the implementation of the proposed action; LBP-15-23, 82 NRC 63 (2015)

**Frank J. Calabrese Jr. (Denial of Senior Reactor Operator License),** LBP-97-16, 46 NRC 66, 68-69 (1997)

- Licensing boards have limited their review of NRC Staff reactor operator licensing decisions to those issues that were resolved against the license applicant in NRC Staff’s informal review; LBP-14-2, 79 NRC 148 (2014)

**Frank J. Calabrese Jr. (Denial of Senior Reactor Operator License),** LBP-97-16, 46 NRC 66, 86 (1997)

- In assessing whether applicant satisfies the burden of establishing that NRC Staff’s determination of applicant’s performance was inappropriate, unjustified, arbitrary, or an abuse of discretion, the board should consult NUREG-1021; LBP-14-2, 79 NRC 150 (2014)

- NRC Staff improperly discharges its duties with respect to the grading of an operating test if the grading is inappropriate or unjustified or if the grading strays too far afield of the twin goals of equitable and consistent examination administration, thus becoming arbitrary or an abuse of discretion; LBP-14-2, 79 NRC 150 (2014)

**Frank J. Calabrese Jr. (Denial of Senior Reactor Operator License),** LBP-97-16, 46 NRC 66, 89 (1997)

- Applicants may prevail against NRC Staff if they prove that a particular contested assessment of a deficiency was arbitrary or an abuse of discretion; LBP-14-2, 79 NRC 150 (2014)

**Friends of Clearwater v. Dombeck,** 222 F.3d 552, 555, 559 (9th Cir. 2000)

- The Forest Service prepared a supplemental information report, which is a formal instrument for documenting whether new information is sufficiently significant to trigger the need for a SEIS and several other analyses that specifically addressed the significance of the new information; LBP-12-18, 76 NRC 173 (2012)
Friends of Clearwater v. Dombeck, 222 F.3d 552, 557-58 (9th Cir. 2000)
agency that has prepared an EIS cannot simply rest on the original document but must be alert to new information that may alter the results of its original environmental analysis, and continue to take a hard look at the environmental effects of its planned action, even after a proposal has received initial approval; LBP-12-18, 76 NRC 166 (2012)

Friends of Clearwater v. Dombeck, 222 F.3d 552, 559 (9th Cir. 2000)
compliance with NEPA is a primary duty of every federal agency, and fulfillment of this responsibility should not depend on vigilance and limited resources of environmental plaintiffs; LBP-12-18, 76 NRC 166 (2012)
Forest Service’s failure to timely evaluate need to supplement the original EIS in light of new information violated NEPA; LBP-12-18, 76 NRC 179-80 (2012)

Friends of Clearwater v. Dombeck, 222 F.3d 552, 561 (9th Cir. 2000)
the Forest Service’s requisite hard look at newly designated sensitive species and its determination that an SEIS was not required was not arbitrary and capricious; LBP-12-18, 76 NRC 173 (2012)
Friends of Sierra Railroad, Inc. v. Interstate Commerce Commission, 881 F.2d 663, 667-68 (9th Cir. 1989)
publication in the Federal Register is legally sufficient notice to all interested or affected persons regardless of actual knowledge or hardship resulting from ignorance; LBP-15-5, 81 NRC 280 n.181 (2015)

an association has standing to bring suit on behalf of its members when its members would otherwise have standing to sue in their own right, the interests at stake are germane to the organization’s purpose, and neither the claim asserted nor the relief requested requires the participation of individual members in the lawsuit; LBP-11-2, 73 NRC 40 (2011); LBP-11-13, 73 NRC 545 n.52 (2011); LBP-11-16, 73 NRC 653 (2011)

injury-in-fact can result when the risk of encountering environmental harms prevents a plaintiff from taking an action; LBP-14-4, 79 NRC 351 n.28 (2014)

a more subjective appraisal of declining property values might be permissible in the context of a licensing action associated with an applicant or facility shown to have engaged in a continuous and pervasive course of illegal conduct; LBP-12-3, 75 NRC 184 n.16 (2012)

Friends of the Earth, Inc. v. O’Reilly, 966 F.2d 690, 695 (D.C. Cir. 1992)
a proceeding is an adversary adjudication under the Equal Access to Justice Act only if Congress intended that the proceeding be subject to Administrative Procedure Act § 554; LBP-11-8, 73 NRC 356 n.26 (2011)
an agency’s decision to add protections matching those of Administrative Procedure Act § 554 is irrelevant absent Congress’s having compelled the augmentation; LBP-11-8, 73 NRC 356 n.26 (2011)
an agency’s discretionary choice to conduct a formal on-the-record hearing is irrelevant when determining whether the Equal Access to Justice Act applies to a particular proceeding; LBP-11-8, 73 NRC 360 (2011)

Fritzelle v. Slater, 111 F.3d 172, 177 (D.C. Cir. 1997)
agencies must adhere to their own regulations; LBP-15-17, 81 NRC 789 n.237 (2015)

agency need not analyze environmental consequences of alternatives it has in good faith rejected as too remote, speculative, or impractical or ineffective; LBP-13-9, 78 NRC 88 n.353 (2013)
under NEPA, an agency need not compare the environmental impacts of the proposed action with the environmental impacts of alternatives that are not reasonable or feasible; LBP-11-7, 73 NRC 308 n.371 (2011)

Fund for Animals v. Rice, 85 F.3d 535, 548 (11th Cir. 1996)
NEPA does not require circulation of a draft environmental assessment in all cases; CLI-15-17, 82 NRC 41 n.53 (2015)
LEGAL CITATIONS INDEX

CASES

courts exclude witnesses prior to their testimony to discourage or expose outright fabrication and restrain the natural tendency of witnesses to tailor their testimony to that of earlier witnesses; LBP-12-21, 76 NRC 218, 240 (2012)

GE-Hitachi Global Laser Enrichment LLC (GLE Commercial Facility), LBP-12-21, 76 NRC 218, 240 (2012)
in a limited number of appropriate circumstances, NRC Staff may exempt an applicant from regulatory requirements; LBP-15-24, 82 NRC 74 n.22 (2015)

in context with the other provisions of the Atomic Energy Act § 104d, the foreign control limitation should be given an orientation toward safeguarding the national defense and security; CLI-15-7, 81 NRC 489 (2015); LBP-14-3, 79 NRC 280, 307 (2014)
intent of Congress in the Atomic Energy Act is to prohibit relationships where an alien has the power to direct the actions of the licensee; LBP-14-3, 79 NRC 280 (2014)
“owned, controlled, or dominated” in the Atomic Energy Act refers to relationships in which the will of one party is subjugated to the will of another; CLI-15-7, 81 NRC 489-90, 498 (2015); LBP-14-3, 79 NRC 280 (2014)
to be inimical to the common defense and security or to the health and safety of the public, control or domination must be of such a degree that the will of the licensee is subjugated to the will of the foreign entity, and the foreign entity must have the power to direct the actions of the licensee; LBP-14-3, 79 NRC 307 n.250 (2014)
whether a foreign entity has the ability to restrict or inhibit compliance with security or other regulations of the Commission is of greatest significance to a foreign ownership, control, or domination review; CLI-15-7, 81 NRC 494 (2015)

in determining foreign ownership issues, boards may consider aspects of control that do not affect nuclear safety or security; CLI-15-7, 81 NRC 407-98 (2015)

General Motors Corp. v. Federal Energy Regulatory Commission, 656 F.2d 791, 795 & n.7 (D.C. Cir. 1981)
any AEA § 189a hearing rights to which petitioners might be entitled had they shown standing have been satisfied; CLI-11-3, 73 NRC 623-24 n.53 (2011)

General Public Utilities Nuclear Corp. (Oyster Creek Nuclear Generating Station), LBP-97-1, 45 NRC 7, 12-13 (1997)
summary disposition is an appropriate vehicle to resolve purely legal disputes; LBP-12-26, 76 NRC 574 (2012)

General Public Utilities Nuclear Corp. (Three Mile Island Nuclear Station, Unit 2), LBP-89-7, 29 NRC 138, 190-91 (1989)
Commission must find that activities authorized by a license amendment can be conducted without endangering the health and safety of the public and will be in compliance with NRC regulations; LBP-15-20, 81 NRC 841 (2015)

Georgia Institute of Technology (Georgia Tech Research Reactor, Atlanta, Georgia), CLI-95-12, 42 NRC 111, 115 (1995)
although petitioner bears the burden of establishing standing, licensing boards should construe the petition in favor of petitioner; CLI-14-2, 79 NRC 19 n.45 (2014); CLI-15-25, 82 NRC 394 (2015); LBP-11-2, 73 NRC 41 (2011); LBP-11-13, 73 NRC 548 (2011); LBP-11-16, 73 NRC 653 (2011); LBP-12-3, 75 NRC 188, 189 (2012); LBP-13-6, 77 NRC 270 (2013); LBP-14-4, 79 NRC 361 (2014); LBP-15-13, 81 NRC 463 (2015)
boards must afford latitude to pro se petitioners in considering their pleadings; LBP-12-3, 75 NRC 177 (2012)
contemporaneous judicial concepts of standing are applied in NRC proceedings; LBP-15-19, 81 NRC 819 (2015)
essential to establishing standing are findings of injury, causation, and redressability; CLI-11-3, 73 NRC 621 (2011)
individual member who qualifies an organization for standing must have suffered or might suffer a concrete and particularized injury that is fairly traceable to the challenged action and the injury is likely redressable by a favorable decision; LBP-14-4, 79 NRC 328 (2014)
licensing board, construing the petition in favor of petitioners, based its standing finding on potential harm from traffic-generated dust and light pollution; CLI-12-12, 75 NRC 606 (2012)
NRC generally applies traditional judicial standing concepts which require a showing that the individual has suffered or might suffer a concrete and particularized injury that is fairly traceable to the challenged action and likely redressible by a favorable decision; LBP-11-2, 73 NRC 40 (2011); LBP-11-13, 73 NRC 545-46 (2011); LBP-15-13, 81 NRC 463 (2015); LBP-15-17, 81 NRC 770 (2015)
organizational standing requirements are outlined; CLI-11-3, 73 NRC 621 n.38 (2011)
organizations may base standing on either immediate or threatened injury to its organizational interests, or to the interests of identified members; LBP-12-8, 75 NRC 547 (2012); LBP-13-8, 78 NRC 7 (2013)
to derive standing from a member, an organization must demonstrate that the individual member has standing to participate and has authorized the organization to represent his or her interests; LBP-12-8, 75 NRC 547 (2012); LBP-13-8, 78 NRC 7 (2013)
to establish representational standing, organizations must show that at least one of its members may be harmed by the licensing action and would have standing to sue in his or her own right, identify that member by name and address, show that the organization is authorized to request a hearing on behalf of that member, and show that the interests that the representative organization seeks to protect are germane to its own interests; LBP-12-10, 75 NRC 638 (2012)
proximity presumption applies across the board to all proceedings regardless of type because the rationale underlying it is not based on the type of proceeding per se but on whether the proposed action involves a significant source of radioactivity producing an obvious potential for offsite consequences; LBP-15-17, 81 NRC 770-71 n.102 (2015)
no proximity presumption applies in an import/export licensing case because petitioners have not shown that the import or export involves a significant source of radioactivity producing an obvious potential for offsite consequences; CLI-11-3, 73 NRC 622 (2011)
contention admissibility rules impose on petitioner the burden of going forward with a sufficient factual basis, but they do not shift the ultimate burden of proof from applicant to petitioner, nor do the rules require petitioner to prove its case at the contention stage; LBP-12-18, 76 NRC 163-64 (2012)
for factual disputes, petitioner need not proffer facts in formal affidavit or evidentiary form, sufficient to withstand a summary disposition motion; LBP-12-18, 76 NRC 163-64 (2012)
petitioner must present sufficient information to show a genuine dispute and reasonably indicating that a further inquiry is appropriate; LBP-12-18, 76 NRC 163-64 (2012)
admission of a management integrity contention relied on references to a serious incident involving shutdown of the reactor, management responsible for the incident remained in place, and a purported climate of reprisals for bringing forward safety issues, and reference to at least one expert witness in support of the contention; CLI-11-11, 74 NRC 436 n.47 (2011)
past violations of NRC regulations would indicate a deficiency in an application only if they are directly germane to the licensing action, rather than being of simply historical interest; CLI-12-2, 75
in ruling on whether a contention is moot, boards look to whether a justiciable controversy still exists and whether an issue is still live, such that a party still has a legal interest in the issue; LBP-11-4, 73 NRC 127 (2011)

Georgia Power Co. (Alvin W. Vogtle Nuclear Plant, Units 1 and 2, ALAB-291, 2 NRC 404, 408 (1975) parties’ duty to report material significant developments in a matter under adjudication arises immediately upon discovery of that information; CLI-15-16, 81 NRC 813 n.11 (2015)

Georgia Power Co. (Vogtle Electric Generating Plant, Units 1 and 2), CLI-93-16, 38 NRC 25, 31-32 (1993) challenges to an applicant’s or licensee’s character require sufficient support; CLI-11-9, 74 NRC 249 n.92 (2011)

Georgia Power Co. (Vogtle Electric Generating Plant, Units 1 and 2), CLI-94-5, 39 NRC 190, 193 (1994) where the adverse impact of disclosure would occur immediately, the alleged harm is immediate for purpose of interlocutory review; CLI-13-3, 77 NRC 55 n.18 (2013)

Georgia Power Co. (Vogtle Electric Generating Plant, Units 1 and 2), CLI-94-5, 39 NRC 190, 197 (1994) among the categories of privileged documents are interagency or intra-agency memorandums or letters that would not be available by law to a party other than an agency in litigation with the Commission; LBP-13-5, 77 NRC 238 (2013)

cursory and conclusory assertions that merely paraphrase the standards applicable to the deliberative process privilege without explaining how they apply to any specific document in dispute will not suffice to carry the government’s burden of proof in defending FOIA cases; LBP-13-5, 77 NRC 243 (2013)

deliberative process privilege applied under 10 C.F.R. 2.390(a)(5) to interagency or intra-agency memorandums or letters is similar to Exemption 5 under the Freedom of Information Act; LBP-13-5, 77 NRC 238 (2013)

deliberative process privilege serves to protect creative debate and candid consideration of alternatives within an agency, to guard against public confusion that could result from the release of policy-oriented discussions that occur prior to policy being made, and to protect the integrity of the decisionmaking process; LBP-13-5, 77 NRC 239 (2013)

Georgia Power Co. (Vogtle Electric Generating Plant, Units 1 and 2), CLI-94-5, 39 NRC 190, 197-98 (1994)

to qualify for deliberative process privilege, a document must be both predecisional or antecedent to the adoption of agency policy and deliberative, meaning it must actually be related to the process by which policies are formulated; LBP-13-5, 77 NRC 239 (2013)

Georgia Power Co. (Vogtle Electric Generating Plant, Units 1 and 2), CLI-94-5, 39 NRC 190, 198 (1994) although deliberative process privilege is a qualified privilege and the agency claiming the privilege bears the initial burden of demonstrating that it is applicable, once this demonstration is made, the moving party can only defeat the privilege by a demonstration of an overriding need for the material; LBP-13-5, 77 NRC 241-42 (2013)

in applying deliberative process privilege, courts have allowed the government to withhold memoranda containing advice, opinions, recommendations, and subjective analysis; LBP-13-5, 77 NRC 239 (2013)

party invoking deliberative process privilege bears the burden of explaining with particularity how and why disclosure of the documents’ substance would harm an identified deliberative function; LBP-13-5, 77 NRC 242 (2013)

Gersman v. Group Health Association, Inc., 975 F. 2d 886, 890 (D.C. Cir. 1992) it would be impermissible to construe the prohibition of foreign ownership so as to make it redundant or otherwise deprive it of operative effect; LBP-12-19, 76 NRC 196 n.69 (2012)

Gilmore v. Lajan, 947 F.2d 1409, 1412 (9th Cir. 1991) those dealing with their government must turn square corners; LBP-15-24, 82 NRC 101 (2015)

best evidence rule rests on the fact that the document is a more reliable, complete, and accurate 
source of information as to its contents and meaning than anyone’s description; CLI-13-5, 77 NRC 
231 n.36 (2013)

GPU Nuclear, Inc. (Oyster Creek Nuclear Generating Station), CLI-00-6, 51 NRC 193, 202 (2000) 
to demonstrate representational standing, an organization must show that at least one of its members 
might be affected by the proceeding, identify that member by name and address, and show that the 
member has authorized the organization to represent him or her and to request a hearing on his or 
her behalf; LBP-11-6, 73 NRC 169 (2010)

GPU Nuclear, Inc. (Oyster Creek Nuclear Generating Station), CLI-00-6, 51 NRC 193, 206 (2000) 
contentions calling for requirements in excess of those imposed by regulations will be rejected as a 
collateral attack on regulations; CLI-12-5, 75 NRC 315 n.88 (2012); LBP-15-4, 81 NRC 167 n.64, 
172-73 n.94 (2015)

GPU Nuclear, Inc. (Oyster Creek Nuclear Generating Station), CLI-00-6, 51 NRC 193, 207 (2000) 
absent documentary support, NRC has declined to assume that licensees will contravene its 
regulations; CLI-11-9, 74 NRC 249 n.92 (2011); LBP-15-24, 82 NRC 82-83 & n.86, 87, 91 (2015) 
boards cannot assume that applicants will not comply with its regulatory responsibilities, including its 
license conditions; LBP-12-3, 75 NRC 196 (2012); LBP-15-3, 81 NRC 132, 140-41 (2015) 
inspection reports could be seen as objective evidence that applicant may not adequately manage aging 
in the future; CLI-11-11, 74 NRC 433 n.28 (2011) 
there is nothing in the record to suggest that applicant or NRC Staff will not act in good faith to 
sure that applicant’s regulatory responsibilities, including its license conditions, are honored, and 
the Board cannot assume noncompliance; LBP-15-11, 81 NRC 439 n.252 (2015)

GPU Nuclear, Inc. (Oyster Creek Nuclear Generating Station), CLI-00-6, 51 NRC 193, 208 (2000) 
bare assertions and speculation do not meet the Commission’s standard of a concise statement of the 
alleged facts or expert opinions together with references to the specific sources and documents upon 
which the petitioner relies; LBP-11-21, 74 NRC 133 (2011) 
contentions will be ruled inadmissible if petitioner has offered no tangible information, no experts, no 
substantive affidavits, but instead only bare assertions and speculation; LBP-11-6, 73 NRC 250 
(2010); LBP-14-6, 79 NRC 442 (2014)

elements of a showing of estoppel against the government are described; LBP-12-16, 76 NRC 51 
(2012)

Grand Canyon Trust v. Federal Aviation Administration, 290 F.3d 339, 341, 346 (D.C. Cir. 2002) 
a draft environmental impact statement does not and cannot treat identified environmental concerns in 
a vacuum; LBP-11-7, 73 NRC 302 (2011)

Grannis v. Ordean, 234 U.S. 385, 394 (1914) 
so far as fairness is concerned, each side must be heard; LBP-15-5, 81 NRC 289 (2015)

Graystar, Inc. (Suite 103, 200 Valley Road, Mt. Arlington, NJ 07856), LBP-01-7, 53 NRC 168, 187 (2001) 
interpretation may not conflict with the plain meaning of the wording used in a regulation, which in 
the end of course must prevail; LBP-14-7, 79 NRC 474 (2014)

Greater Yellowstone Coalition v. Flowers, 359 F.3d 1257, 1269 (10th Cir. 2004) 
Clean Water Act section 404 permit process is discussed; LBP-15-23, 82 NRC 61 (2015)

Greater Yellowstone Coalition v. Flowers, 359 F.3d 1257, 1273-74 (10th Cir. 2004) 
while the Clean Water Act imposes substantive restrictions on agency action, NEPA imposes 
procedural requirements aimed at integrating environmental concerns into the very process of agency 

Greenpeace Action v. Franklin, 14 F.3d 1324, 1332 (9th Cir. 1992) 
there must be some assurance that mitigation measures constitute an adequate buffer against the 
negative impacts that result from the authorized activity to render such impacts so minor as to not 
warrant an environmental impact statement; LBP-12-26, 76 NRC 467 (2012); LBP-14-7, 79 NRC 
461 (2014)
Greenpeace v. National Marine Fisheries Service, 198 F.R.D. 540, 545 (W.D. Wash. 2000) without indicating any specific, policy-oriented communication or proffering any cogent reason for protecting it, the bare assertion that internal agency discussions will be “chilled” is nothing but a legal platitude asserted in the abstract; LBP-13-5, 77 NRC 243-44, 247 (2013)

GUARD v. NRC, 753 F.2d 1144, 1146 (D.C. Cir. 1985)

NRC is bound by the unambiguous language of its own regulations; LBP-11-22, 74 NRC 276 (2011)

Guerrini Stone Co. v. P. J. Carlin Construction Co., 240 U.S. 264, 277 (1916) reference by the contracting parties to an extraneous writing for a particular purpose makes it a part of their agreement only for the purpose specified; LBP-12-24, 76 NRC 515 n.60 (2012)

Gulf States Utilities Co. (River Bend Station, Unit 1), CLI-94-10, 40 NRC 43, 47-48 (1994) standard of review of a board’s determination on standing is deferential and the Commission will uphold the decision absent a clear misapplication of facts or law; CLI-15-25, 82 NRC 394 n.32 (2015)

Gulf States Utilities Co. (River Bend Station, Unit 1), CLI-94-10, 40 NRC 43, 48 (1994) Atomic Energy Act authorizes NRC to accord protection from radiological injury to both health and property interests, and thus a genuine property interest is sufficient to accord petitioner proximity-based standing; LBP-15-17, 81 NRC 776 (2015)

Gulf States Utilities Co. (River Bend Station, Unit 1), CLI-94-10, 40 NRC 43, 51 (1994) contention admissibility rules impose on petitioner the burden of going forward with a sufficient factual basis, but they do not shift the ultimate burden of proof from applicant to petitioner, nor do the rules require petitioner to prove its case at the contention stage; LBP-12-18, 76 NRC 163-64 (2012)

factual support required for a contention at the admission stage is a minimal showing that material facts are in dispute; LBP-11-2, 73 NRC 45 (2011); LBP-11-13, 73 NRC 551 (2011); LBP-11-14, 73 NRC 609 (2011); LBP-11-16, 73 NRC 655 (2011); LBP-12-8, 75 NRC 548 (2012) for factual disputes, petitioner need not proffer facts in formal affidavit or evidentiary form, sufficient to withstand a summary disposition motion; LBP-12-18, 76 NRC 163-64 (2012)

lack of clarity about which electrical cables might be subject to any saltwater environment, however high or low the concentration, and about the effects of and efforts to address this, is a level of concern sufficient to warrant further inquiry and exploration; LBP-11-20, 74 NRC 113-14 (2011) petitioner must present sufficient information to show a genuine dispute and reasonably indicating that a further inquiry is appropriate; LBP-12-18, 76 NRC 163-64 (2012); LBP-15-20, 81 NRC 850, 860 (2015) petitioners are not required at the contention admission stage to prove their case on the merits or even to provide expert or factual support as strong as that necessary to withstand a summary disposition motion; LBP-15-20, 81 NRC 851, 855 (2015)

Gulf States Utilities Co. (River Bend Station, Unit 1), LBP-95-10, 41 NRC 460, 471 (1995) intervenors may question whether the draft environmental impact statement includes a sufficient justification for its reliance upon future actions of a state agency; LBP-12-23, 76 NRC 464-65 (2012)

Half Moon Bay Fisherman’s Marketing Association v. Carlucci, 857 F.2d 505, 510 (9th Cir. 1988) establishment of baseline conditions of the affected environment is a fundamental requirement of the National Environmental Policy Act process; LBP-13-9, 78 NRC 52 (2013)

Hall v. Bellmon, 935 F.2d 1106, 1110 (10th Cir. 1991) pro se litigant’s pleadings are to be construed liberally and held to a less stringent standard than formal pleadings drafted by lawyers, but it is not the proper function of the court to assume the role of advocate for the litigant; CLI-15-18, 82 NRC 146 n.53 (2015)

Halverson v. Slater, 206 F.3d 1205, 1208 (D.C. Cir. 2000) although a court’s merits reasoning may be quite relevant to the resolution of the substantial justification question, the inquiry into the reasonableness of the government’s position may not be collapsed into an antecedent evaluation of the merits; LBP-11-8, 73 NRC 368-69 (2011)

Hammond v. Norton, 370 F. Supp. 2d 226, 245, 251 (D.D.C. 2005) although NEPA does not require an agency preparing an environmental impact statement to respond to EPA concerns, an agency’s failure even to address them in the EIS at the very least brings into question the sufficiency of the agency’s analysis; LBP-14-9, 80 NRC 51 n.152 (2014)
projects undertaken by separate entities may still be considered connected actions even in the absence of formal agreement between the parties; LBP-14-9, 80 NRC 51 n.150 (2014)

multiple projects are often deemed connected actions despite being undertaken by separate entities;
LBP-14-9, 80 NRC 50-51 & n.149 (2014)

for constitutional standing, plaintiff must allege personal injury fairly traceable to the defendant’s allegedly unlawful conduct and likely to be redressed by the requested relief; LBP-14-4, 79 NRC 350 n.27 (2014)
for prudential standing, plaintiff usually must show, in addition to constitutional standing requirements, that the interest sought to be protected by complainant is arguably within the zone of interests to be protected or regulated by the statute; LBP-14-4, 79 NRC 350 n.27 (2014)

Heartland Regional Medical Center v. Leavitt, 415 F.3d 24, 29-30 (D.C. Cir. 2005)
an agency that cures a problem identified by a court is free to reinstate the original result on remand; CLI-11-12, 74 NRC 469 n.20 (2011)

estoppel claims must rely on its adversary’s conduct in such a manner as to change his position for the worse, and that reliance must have been reasonable in that the party claiming the estoppel did not know nor should it have known that its adversary’s conduct was misleading; LBP-12-16, 76 NRC 51 (2012)
estoppel is an equitable doctrine invoked to avoid injustice in particular cases; LBP-12-16, 76 NRC 51 (2012)

elements of a showing of estoppel against the government are described; LBP-12-16, 76 NRC 51 (2012)
the government may not be estopped on the same terms as any other litigant; LBP-12-16, 76 NRC 51 (2012)

to say to appellants that the joke is on you, you shouldn’t have trusted us, is hardly worthy of our great government; LBP-13-3, 77 NRC 96 (2013)

taxpayer interest is too generalized and attenuated to support Article III standing; LBP-14-4, 79 NRC 353 n.55 (2014)

Hells Canyon Alliance v. U.S. Forest Service, 227 F.3d 1170, 1185 (9th Cir. 2000)
for a mitigation analysis, NEPA demands no fully developed plan or detailed examination of specific measures that will be employed to mitigate adverse environmental effects; LBP-11-23, 74 NRC 330 (2011)
NEPA does not require NRC to use the absolutely best scientific methodology available; LBP-13-4, 77 NRC 211 (2013)

Honeywell International, Inc. (Metropolis Works Uranium Conversion Facility), CLI-13-1, 77 NRC 1, 6 (2013)
claimed deficiencies in a decommissioning plan must have health and safety significance in order to be admissible; LBP-15-24, 82 NRC 87 (2015)

Honeywell International, Inc. (Metropolis Works Uranium Conversion Facility), CLI-13-1, 77 NRC 1, 10 (2013)
 exemption request is subject to a hearing where the plant already has a license and is seeking an exemption from the decommissioning financial assurance requirements based on an earlier exemption that it had received during its license renewal; LBP-15-24, 82 NRC 76 n.39 (2015)
when licensee requests an exemption in a related license amendment application, NRC considers the hearing rights on the amendment application to encompass the exemption request as well; LBP-15-18, 81 NRC 797 n.22 (2015); LBP-15-24, 82 NRC 84 n.96 (2015)
LEGAL CITATIONS INDEX

CASES

**Honeywell International, Inc.** (Metropolis Works Uranium Conversion Facility), CLI-13-1, 77 NRC 1, 18-19 (2013)
Commission reviews questions of law de novo, but defers to a board’s findings with respect to the underlying facts unless they are clearly erroneous; CLI-15-7, 81 NRC 493 (2015); CLI-15-9, 81 NRC 519 (2015)
to show clear error, petitioner must show that the board’s determination is not even plausible in light of the record as a whole; CLI-15-7, 81 NRC 493 (2015); CLI-15-9, 81 NRC 519 (2015)

**Honeywell International, Inc.** (Metropolis Works Uranium Conversion Facility), CLI-13-1, 77 NRC 1, 19 (2013)
presence of evidence in petitioner’s favor does not, without more, warrant reversal of a board’s decision; CLI-15-7, 81 NRC 497 n.96 (2015)

**Honeywell International, Inc.** (Metropolis Works Uranium Conversion Facility), CLI-13-1, 77 NRC 1, 29 n.158, 31-32 (2013)
de novo standard is applicable to review of an NRC Staff decision on a license transfer application; CLI-15-26, 82 NRC 411 n.27 (2015)

**Honeywell International, Inc.** (Metropolis Works Uranium Conversion Facility), LBP-12-6, 75 NRC 256, 270 (2012)
it is not the role of licensing boards to review and reconsider the wisdom of the Commission’s regulations; LBP-13-12, 78 NRC 242 (2013)

**Honeywell v. NRC,** 628 F.3d 568, 575-76 (D.C. Cir. 2010)
when licensee requests a rule exemption in a related license amendment application, hearing rights on the amendment application are considered to encompass the exemption request as well; CLI-13-1, 77 NRC 10 (2013)

**Houston Lighting and Power Co.** (Allens Creek Nuclear Generating Station), ALAB-535, 9 NRC 377, 389-400 (1979)
organization seeking representational standing on behalf of its members may meet the injury-in-fact requirement by demonstrating that at least one of its members, who has authorized the organization to represent his/her interest, will be injured by the possible outcome of the proceeding; LBP-15-5, 81 NRC 497 n.18, 257 (2015); LBP-15-17, 81 NRC 771 n.104 (2015)

**Houston Lighting and Power Co.** (Allens Creek Nuclear Generating Station, Unit 1), ALAB-535, 9 NRC 377, 395-96 (1979)
although an allegation that a purported representative is acting without his or her organization’s authorization, i.e., is acting ultra vires, is distinct from a challenge to the organization’s standing, petitioner may cure such a defect in representation as well; LBP-11-13, 73 NRC 549 (2011)
authority of an officer or attorney to sign a petition is distinguished from an authorization addressed to the organization’s standing to intervene; LBP-11-13, 73 NRC 549 (2011)

**Houston Lighting and Power Co.** (Allens Creek Nuclear Generating Station, Unit 1), ALAB-565, 10 NRC 521, 524 (1979)
so far as fairness is concerned, each side must be heard; LBP-15-5, 81 NRC 289 (2015)

**Houston Lighting and Power Co.** (Allens Creek Nuclear Generating Station, Unit 1), ALAB-582, 11 NRC 239, 242 (1980)
standing claims based on economic impacts are only cognizable in NRC proceedings with regard to NEPA-based concerns; LBP-12-3, 75 NRC 184 n.15 (2012)

**Houston Lighting and Power Co.** (Allens Creek Nuclear Generating Station, Unit 1), ALAB-629, 13 NRC 75, 78 (1981)
if summary disposition movant meets its burden, opponent must set forth specific facts showing that there is a genuine issue and may not rely on mere allegations or denials; LBP-12-19, 76 NRC 190-91 (2012)

**Houston Lighting and Power Co.** (Allens Creek Nuclear Generating Station, Unit 1), ALAB-630, 13 NRC 84, 86 (1981)
procedural rulings involving discovery rarely meet the standard for interlocutory review; CLI-15-24, 82 NRC 335 n.19 (2015)

329
Houston Lighting and Power Co. (Allens Creek Nuclear Generating Station, Unit 1), ALAB-631, 13 NRC 87, 89 (1981)

litigants are not entitled to challenge a board ruling unless and until that ruling has worked a concrete injury to their personal interests; CLI-12-6, 75 NRC 363 n.49 (2012)

Houston Lighting and Power Co. (South Texas Project, Units 1 and 2), ALAB-549, 9 NRC 644 (1979)

board may appropriately view petitioner’s support for its contention in a light favorable to petitioner but may not do so by ignoring other admissibility requirements; LBP-15-17, 81 NRC 789 n.234 (2015)

government may withhold from disclosure the identity of persons who furnish information on violations of law to officers charged with enforcement of the law; CLI-13-5, 77 NRC 229 (2013)

disclosure to intervenors of the names of power plant employees who provided NRC with information during the course of its investigation would be inappropriate, even with a protective order in place; CLI-13-5, 77 NRC 229 (2013)

zone-of-interests requirement poses a low bar; LBP-14-4, 79 NRC 355 (2014)

Hugh v. Immigration and Naturalization Service, 47 F.3d 615, 617-18 (3d Cir. 1995)

notice of appeal of immigration judge’s deportation order was timely filed because regulations governing timing of appeals were ambiguous; LBP-11-19, 74 NRC 63 n.12 (2011)

Hughes River Watershed Conservancy v. Glickman, 81 F.3d 437, 443 (4th Cir. 1996)

NEPA’s has twin goals of forcing agencies to take a hard look at the environmental consequences of a proposed project, and, making relevant analyses openly available, to permit the public a role in the agency’s decisionmaking process; LBP-11-14, 73 NRC 598 (2011); LBP-12-18, 76 NRC 179 (2012); LBP-14-9, 80 NRC 57 (2014)

NEPA’s primary goals include fostering informed public participation in the decisionmaking process; LBP-12-17, 76 NRC 120-21 (2012)

Hughes River Watershed Conservancy v. Johnson, 165 F.3d 283, 288 (4th Cir. 1999)

NEPA hard look must emerge from an engagement in informed and reasoned decisionmaking, as the agency obtains opinions from its own experts and experts outside the agency and gives careful scientific scrutiny and responds to all legitimate concerns that are raised; LBP-15-16, 81 NRC 637 n.98 (2015)

an association has standing to bring suit on behalf of its members when its members would otherwise have standing to sue in their own right, the interests at stake are germane to the organization’s purpose, and neither the claim asserted nor the relief requested requires the participation of individual members in the lawsuit; LBP-11-2, 73 NRC 40 (2011); LBP-11-13, 73 NRC 545 n.52 (2011)

Hydro Resources, Inc. (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-98-8, 47 NRC 314, 320-21 (1998)

petition is considered under interlocutory review standard because neither NRC Staff’s issuance of the license nor the board’s denial of a stay of the effectiveness of that license constitutes final agency action; CLI-15-17, 82 NRC 39 n.40 (2015)
Hydro Resources, Inc. (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-98-8, 47 NRC 314, 322 (1998)
claim of violation of the National Historic Preservation Act did not in itself establish irreparable harm
warranting interlocutory review; CLI-15-17, 82 NRC 40 n.45 (2015)
to show imminent, irreparable harm to cultural resources, petitioner would need to describe with
specificity the resources and the manner in which they are threatened; CLI-15-17, 82 NRC 42 (2015)

Hydro Resources, Inc. (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-98-8, 47 NRC 314, 324 (1998)
procedural rulings involving discovery rarely meet the standard for interlocutory review; CLI-15-24, 82
NRC 335 n.19 (2015)

Hydro Resources, Inc. (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-98-16, 48 NRC 119, 120 (1998)
licensing boards should not admit contentions alleging that the applicant must obtain permits from
other agencies; LBP-12-12, 75 NRC 767 (2012)
whether non-NRC permits are required is the responsibility of bodies that issue such permits;
LBP-12-16, 76 NRC 59 (2012)

Hydro Resources, Inc. (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-98-16, 48 NRC 119, 120-22 & n.3 (1998)
petitioner’s demand for compliance with U.S. Army Corps of Engineers requirements is not within the
scope of a combined license proceeding, because it is not the province of NRC to enforce another
agency’s regulations; LBP-11-6, 73 NRC 236 n.102 (2010)

Hydro Resources, Inc. (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-99-22, 50 NRC 3, 14 (1999)
Commission approved NRC Staff completion of some National Historic Preservation Act documents
after the environmental impact statement process was complete, but before the license was issued;
new contention must present a seriously different picture of the environmental impact of the proposed
project; LBP-14-5, 79 NRC 399 (2014)
new information requiring NRC Staff to prepare supplemental environmental review documents must
present a seriously different picture of the environmental impact of the proposed project from what
was previously envisioned; CLI-11-5, 74 NRC 168 (2011); LBP-11-27, 74 NRC 601 (2011)
overall record for the licensing action includes a complete analysis of cultural resources; LBP-15-16,
81 NRC 694 n.489 (2015)
recirculation of the draft environmental impact statement is required only when the information
presents a seriously different picture of the environmental impacts; LBP-13-9, 78 NRC 56 (2013)
supplementation of the final environmental impact statements is not necessary every time new
information comes to light after the environmental impact statement is finalized; CLI-15-10, 81 NRC
543 (2015)
supplementing an environmental impact statement is not necessary unless new information presents a
seriously different picture of the environmental impact of the proposed project from what was
previously envisioned; LBP-12-18, 76 NRC 141-42, 162, 167 (2012)
the measure of “significance” is whether the new information presents a seriously different picture of
the environmental impact of the proposed project from what was previously envisioned; LBP-11-35,
74 NRC 751 n.218 (2011)

Hydro Resources, Inc. (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-99-22, 50 NRC 3, 17 (1999)
future actions on which the draft environmental impact statement purports to rely in its analysis of
impacts constitute a license condition, the use of which is permitted in NEPA documents; LBP-13-9,
78 NRC 56 (2013)

Hydro Resources, Inc. (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-99-22, 50 NRC 3, 4 (1999)
supplementation of the final environmental impact statement is required when new information
presents a seriously different picture of the environmental impact of the proposed project from what
was previously envisioned; CLI-15-10, 81 NRC 543 (2015)
Hydro Resources, Inc. (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-99-22, 50 NRC 3, 8 (1999)

although 10 C.F.R. Part 40 applies to ISL mining, some of the specific requirements in Part 40, such as many of those found in Appendix A, address hazards posed only by conventional uranium milling operations, and do not carry over to ISL mining; LBP-15-16, 81 NRC 659 n.239 (2015)

Hydro Resources, Inc. (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-99-22, 50 NRC 3, 8-9 (1999)

although the Part 40, Appendix A criteria were developed for conventional uranium milling facilities, they have since been applied in limited fashion to ISR facilities; LBP-15-3, 81 NRC 89-90 n.15 (2015)

Hydro Resources, Inc. (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-99-22, 50 NRC 3, 9 (1999)

requirements in Part 40, such as many of the provisions in Appendix A, that, by their own terms, apply only to conventional uranium milling activities, cannot sensibly govern in situ leach mining; LBP-15-16, 81 NRC 637 (2015)

Hydro Resources, Inc. (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-99-22, 50 NRC 3, 14 (1999)

to constitute a basis for supplementing an EIS, the new information must present a seriously different picture of the environmental impact of the proposed project from what was previously envisioned; CLI-12-7, 75 NRC 388-89, 390-91 (2012)

Hydro Resources, Inc. (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-99-22, 50 NRC 3, 18-19 (1999)

waiting until after licensing (although before mining operations begin) to establish definitively the groundwater quality baselines and upper control limits is consistent with industry practice and NRC methodology, given the sequential development of in situ leach well fields; LBP-15-3, 81 NRC 91 (2015)

Hydro Resources, Inc. (Crownpoint Uranium Project), CLI-04-33, 60 NRC 581, 659 (2004)

with respect to the need to supplement an issued final EIS, the party offering the new contention has the burden of presenting information sufficient to show that there is a genuine issue regarding whether the NRC Staff should supplement its document; LBP-15-16, 81 NRC 704 (2015)

Hydro Resources, Inc. (P.O. Box 15910, Rio Rancho, NM 87174), CLI-00-12, 52 NRC 1, 5 (2000)

alleged deficiency of applicant’s severe accident mitigation alternatives analysis does not present an exceptionally grave issue that must call into question the licensed activity; LBP-12-1, 75 NRC 15 (2012)

an “exceptionally grave issue” is one that raises a sufficiently grave threat to public safety; LBP-12-11, 75 NRC 739 n.47 (2012)

boards will reopen the record only when new evidence raises an exceptionally grave issue calling into question the safety of the licensed activity; CLI-12-21, 76 NRC 500 (2012); LBP-12-16, 76 NRC 58 n.72 (2012)

Hydro Resources, Inc. (P.O. Box 15910, Rio Rancho, NM 87174), CLI-01-4, 53 NRC 31, 38 (2001)

board’s findings and the adjudicatory record are, in effect, part of the final supplemental environmental impact statement; LBP-15-16, 81 NRC 694 n.490, 707 (2015)

objectives of the NRC adjudicatory procedures and policies include producing an informed adjudicatory record that supports agency decisionmaking on public health and safety; the common defense and security, and the environment; LBP-15-20, 81 NRC 848 n.105 (2015)

Hydro Resources, Inc. (P.O. Box 15910, Rio Rancho, NM 87174), CLI-01-4, 53 NRC 31, 52 (2001)

to reopen a record, petitioners must reveal a seriously different picture of the environmental impact of a proposed project; LBP-12-16, 76 NRC 57 (2012)

Hydro Resources, Inc. (P.O. Box 15910, Rio Rancho, NM 87174), CLI-01-4, 53 NRC 31, 53 (2001)

board’s ultimate NEPA judgments can be made on the basis of the entire adjudicatory record in addition to NRC Staff’s final environmental impact statement; LBP-15-3, 81 NRC 82 (2015)

decision of the board or Commission becomes the record of decision, which may also incorporate the final environmental impact statement; CLI-15-6, 81 NRC 376, 388 n.255 (2015)
to the extent that any environmental findings by the presiding officer or the Commission differ from those in the final environmental impact statement, the FEIS is deemed modified by the decision; LBP-13-13, 78 NRC 524-25 (2013)

Hydro Resources, Inc. (P.O. Box 15910, Rio Rancho, NM 87174), CLI-01-4, 53 NRC 31, 54 (2001) for the no-action alternative, there need not be much discussion in the environmental documents because it is most simply viewed as maintaining the status quo; LBP-12-8, 75 NRC 569 (2012)

Hydro Resources, Inc. (P.O. Box 15910, Rio Rancho, NM 87174), CLI-01-4, 53 NRC 31, 55 (2001) an environmental report need only consider the range of alternatives that are capable of achieving the goals of the proposed action; LBP-11-13, 73 NRC 553 n.114 (2011)

neither NRC nor applicant need consider any alternative that does not bring about the ends of the proposed action; CLI-12-5, 75 NRC 339, 343 (2012)

NRC Staff may accord substantial weight to the stated purpose of the project, i.e., to provide additional baseload electrical generation capacity for use in the owner’s current markets and/or for potential sale on the wholesale market; LBP-11-7, 73 NRC 304 (2011)

NRC Staff’s environmental impact statement need only discuss those alternatives that will bring about the ends of the proposed action; LBP-12-15, 76 NRC 38 n.8 (2012)

reasonable alternatives under NEPA are limited to those alternatives that will bring about the ends of the proposed action; LBP-11-21, 74 NRC 137 (2011)

when reviewing a discrete license application filed by a private applicant, a federal agency may appropriately accord substantial weight to the preferences of the applicant in siting and design of the project, taking into account the economic goals of the project’s sponsor; CLI-12-5, 75 NRC 339 n.222 (2012)

Hydro Resources, Inc. (P.O. Box 15910, Rio Rancho, NM 87174), CLI-01-4, 53 NRC 31, 71 (2001)

boards do not sit to “flyspeck” environmental documents or to add details or nuances, but the environmental report or environmental impact statement must come to grips with all important considerations; LBP-15-5, 81 NRC 283 (2015)

flyspecking of environmental documents is inappropriate for environmental contentions; CLI-14-2, 79 NRC 30 (2014)

Hydro Resources, Inc. (P.O. Box 15910, Rio Rancho, NM 87174), CLI-04-39, 60 NRC 657, 659 (2004) agency decisions regarding the need to supplement an environmental impact statement based on new and significant information are subject to the rule of reason; LBP-11-26, 74 NRC 536 n.13 (2011)

NRC Staff need not recirculate a supplemental NEPA document every time new information becomes available; LBP-13-9, 78 NRC 63, 64 (2013)

supplementation of the final environmental impact statement is not necessary every time new information comes to light after the EIS is finalized; CLI-15-10, 81 NRC 543 (2015)

supplementation of the final environmental impact statement is required when new information presents a seriously different picture of the environmental impact of the proposed project from what was previously envisioned; CLI-15-10, 81 NRC 543 (2015)

Hydro Resources, Inc. (P.O. Box 777, Crownpoint, New Mexico 87313), CLI-06-1, 63 NRC 1, 2 (2006) where a board’s decision rests on a weighing of extensive fact-specific evidence presented by technical experts, the Commission generally will defer to the board’s factual findings, unless there appears to be a clearly erroneous factual finding or related oversight; CLI-12-1, 75 NRC 46 (2012)

Hydro Resources, Inc. (P.O. Box 777, Crownpoint, New Mexico 87313), CLI-06-1, 63 NRC 1, 4 (2006) post-hearing resolution of licensing issues must not be employed to obviate the basic findings prerequisite to a license; LBP-15-3, 81 NRC 141 n.66 (2015)

Hydro Resources, Inc. (P.O. Box 777, Crownpoint, New Mexico 87313), CLI-06-1, 63 NRC 1, 5 (2006) intervenors litigated whether the performance-based licensing complies with the Atomic Energy Act and National Environmental Policy Act, and whether undue discretion was accorded to licensee; LBP-15-16, 81 NRC 665 (2015)

Hydro Resources, Inc. (P.O. Box 777, Crownpoint, New Mexico 87313), CLI-06-1, 63 NRC 1, 5-6 (2006) in NEPA context, path that licensee and NRC Staff must follow relative to a license condition is sufficiently clear that continuing to hold the hearing open while it is completed would be an unnecessary extension of the adjudicatory process; LBP-15-3, 81 NRC 141 n.66 (2015)
LEGAL CITATIONS INDEX

CASES

Hydro Resources, Inc. (P.O. Box 777, Crownpoint, New Mexico 87313), CLI-06-1, 63 NRC 1, 6 (2006) site-specific data to confirm proper baseline quality values, and confirm whether existing rock units provide adequate confinement cannot be collected until an in situ leach wellfield has been installed; LBP-15-3, 81 NRC 91 (2015) waiting until after licensing, although before mining operations begin, to establish definitively the groundwater quality baselines and upper control limits is consistent with industry practice and NRC methodology, given the sequential development of in situ leach wellfields; LBP-15-16, 81 NRC 665 (2015)

Hydro Resources, Inc. (P.O. Box 777, Crownpoint, New Mexico 87313), CLI-06-9, 64 NRC 417, 419 (2006) the Fukushima accident does not provide a seriously different picture of the environmental impact of the proposed uranium enrichment facility from what was previously envisioned; LBP-11-26, 74 NRC 536 n.13 (2011)

Hydro Resources, Inc. (P.O. Box 777, Crownpoint, New Mexico 87313), CLI-06-29, 64 NRC 417, 422 & n.23 (2006) cumulative impact analysis is required for reasonably foreseeable future actions and test for connected actions in CEQ regulation 40 C.F.R. 1508.25 need not be satisfied; LBP-14-6, 79 NRC 423 (2014)

Hydro Resources, Inc. (P.O. Box 777, Crownpoint, New Mexico 87313), CLI-06-29, 64 NRC 417, 427 (2006) draft environmental impact statements need not contain more information on mitigation measures than a description of the mitigation measures on which the NRC relies and an explanation of the limiting effect of the mitigation measures on environmental impacts; LBP-13-9, 78 NRC 66 (2013) mitigation plan in final supplemental environmental impact statement need not be in final form to comply with NEPA’s procedural requirements; LBP-15-16, 81 NRC 694 (2015) NEPA does not demand the presence of a fully developed plan that will mitigate environmental harm before an agency can act; LBP-15-16, 81 NRC 688 (2015)

Hydro Resources, Inc. (P.O. Box 777, Crownpoint, New Mexico 87313), CLI-06-29, 64 NRC 417, 429 (2006) though mitigation measures must be discussed in an environmental impact statement, NEPA does not guarantee that federally approved projects will have no adverse impacts; LBP-15-16, 81 NRC 687-88 (2015)

Hydro Resources, Inc. (P.O. Box 777, Crownpoint, New Mexico 87313), LBP-04-23, 60 NRC 441, 448 (2004) new information on the need to supplement an issued final EIS must point to impacts that affect the quality of the human environment in a significant manner or to a significant extent not already considered; LBP-15-16, 81 NRC 704 (2015)

Hydro Resources, Inc. (P.O. Box 777, Crownpoint, New Mexico 87313), LBP-05-17, 62 NRC 77, 91 (2005) absent compelling reasons, the Commission adheres to the case or controversy doctrine in its adjudicatory proceedings; LBP-13-7, 77 NRC 345 n.59 (2013)

Hydro Resources, Inc. (P.O. Box 777, Crownpoint, New Mexico 87313), LBP-05-26, 62 NRC 442, 472 (2005) although an agency may coordinate and, where practicable, integrate its National Environmental Policy Act and National Historic Preservation Act review efforts, the two statutes impose separate and distinct obligations; LBP-15-16, 81 NRC 654 n.214 (2015)

Hydro Resources, Inc. (P.O. Box 777, Crownpoint, New Mexico 87313), LBP-06-1, 63 NRC 41, 68-69 (2006) licensing boards should not interpret regulatory text in a way that would essentially negate the stated purpose of the regulation or impede the Commission an intent to create a schizophrenic rule; LBP-14-7, 79 NRC 475-76 (2014)

Hydro Resources, Inc. (P.O. Box 777, Crownpoint, New Mexico 87313), LBP-06-19, 64 NRC 53 (2006) hard look at the environmental justice aspects of relicensing having been taken, the Commission, without additional Staff action, can now with respect to the EJ issue, make an informed decision whether to grant the requested license; LBP-13-13, 78 NRC 544 n.2107 (2013)

334
LEGAL CITATIONS INDEX

CASES

*Hydro Resources, Inc.* (P.O. Box 777, Crownpoint, New Mexico 87313), LBP-06-19, 64 NRC 53, 62 (2006)

the twin aims of NEPA require the agency to consider all environmental impacts of a proposed action and to inform the public that it has conducted that review; LBP-11-17, 74 NRC 26 nn.70 (2011)

*Hydro Resources, Inc.* (P.O. Box 777, Crownpoint, New Mexico 87313), LBP-06-19, 64 NRC 53, 69 n.11 (2006)

adjudicatory record, board decision, and any Commission appellate decisions become, in effect, part of the final environmental impact statement; LBP-13-13, 78 NRC 543 (2013)

NRC Staff typically prepares the record of decision but when a hearing is held, the board’s initial decision constitutes the record of decision as to those issues that were litigated during the hearing; LBP-13-13, 78 NRC 525 (2013)

although NEPA does not explicitly mention cost-benefit balancing, courts have interpreted the statute as requiring federal agencies to balance the environmental costs against the anticipated benefits of a proposed action; LBP-11-7, 73 NRC 281 (2011)

*Idaho Sporting Congress Inc. v. Alexander*, 222 F.3d 562, 566 n.2 (9th Cir. 2000)

NEPA imposes a continuing obligation on federal agencies to supplement an existing environmental impact statement, if the proposed action has not been taken, in response to significant new circumstances or information relevant to environmental concerns and hearing on the proposed action or its impacts; CLI-12-7, 75 NRC 388 (2012)

regulation’s title can aid in construing regulatory text; LBP-15-4, 81 NRC 170 n.82 (2015)

*In re Aiken County*, 725 F.3d 255, 267 (D.C. Cir. 2013), reh’g en banc denied (Oct. 28, 2013)

court grants writ of mandamus directing NRC to promptly resume the licensing process for the high-level radioactive waste repository construction authorization application unless and until Congress authoritatively says otherwise or there are no appropriated funds remaining; CLI-13-8, 78 NRC 222 (2013)

even where the government identifies significant reasons for nondisclosure, the interest in accurate judicial factfinding is predominant, especially where no satisfactory alternative source of information exists; LBP-13-5, 77 NRC 249-50 (2013)

strong competing interests must be weighed against the government’s interest in nondisclosure and foremost is the interest of the litigants, and ultimately of society, in accurate judicial fact finding: LBP-13-5, 77 NRC 248 (2013)

*In re Subpoena Served upon Comptroller of Currency*, 967 F.2d 630, 634 (D.C. Cir. 1992)

factors that boards should consider in balancing applicants need for disclosure against the agency’s interest in confidentiality are described; LBP-13-5, 77 NRC 248 (2013)

*In re Three Mile Island Alert, Inc.*, 771 F.2d 720 (3d Cir. 1985)

NRC’s lifting of license suspension and authorizing restart under stipulated restrictions was not a license amendment because nothing in the record indicates that license amendments are necessary to permit the licensee to operate in accordance with the restrictions that have been imposed; LBP-13-7, 77 NRC 333 n.39 (2013)

decision lifting license suspension and authorizing restart under stipulated conditions is not a license amendment; LBP-15-27, 82 NRC 191 n.41 (2015)

intervenors must make a showing for admission of a NEPA contention sufficient to require reasonable minds to inquire further; LBP-12-18, 76 NRC 165-66 (2012)
LEGAL CITATIONS INDEX

CASES

*International Harvester Co. v. Ruckelshaus*, 478 F.2d 615, 632 n.51 (D.C. Cir. 1973)

contrary rule on notice of proposed rulemaking would lead to the absurdity that the agency can learn from the comments on its proposed rules only at the peril of starting a new procedural round of commentary; LBP-15-15, 81 NRC 611 n.95 (2015)

agency is generally not required to issue a new notice of proposed rulemaking if it changes its position, as long as the final rule is a logical outgrowth of the proposed rule; LBP-15-15, 81 NRC 611 n.95 (2015)

elements of a showing of estoppel against the government are described; LBP-12-16, 76 NRC 51 (2012)

*International Uranium (USA) Corp.* (Receipt of Material from Tonawanda, New York), LBP-98-21, 48 NRC 137, 142 n.7 (1998)

simple reference to a large number of documents is not enough to put the parties on notice as to the basis for intervention, but rather, petitioner must clearly identify and summarize the facts being relied on in the specific portions of the documents cited; LBP-13-6, 77 NRC 292 n.29 (2013)

*International Uranium (USA) Corp.* (Request for Materials License Amendment), CLI-00-1, 51 NRC 9, 19 (2000)

guidance documents describe particular means of satisfying regulatory requirements in ways acceptable to NRC Staff, but do not bind applicants, who remain free to choose different means; LBP-14-1, 79 NRC 53 (2014)

guidance documents do not bind the board, and so applicant’s compliance with guidance does not ensure grant of a license; LBP-14-1, 79 NRC 53 n.67 (2014)

license applications that comply with existing guidance may be challenged, provided that contention admissibility requirements are met; CLI-12-5, 75 NRC 339 (2012)

NRC is not bound by guidance documents, which do not carry the force of regulations and do not impose legal requirements on licensees; CLI-12-5, 75 NRC 339 n.219 (2012); CLI-15-6, 81 NRC 358 (2015)

the Commission will defer to board rulings on standing absent an error of law or abuse of discretion; CLI-12-12, 75 NRC 608 (2012)

*International Uranium (USA) Corp.* (White Mesa Uranium Mill), CLI-01-21, 54 NRC 247, 251 (2001)

as a matter of law and logic, if applicant’s enhanced program is inadequate, then applicant’s unenhanced program is a fortiori inadequate, and intervenor has a regulatory obligation to challenge it in its original petition to intervene; LBP-11-9, 73 NRC 417 (2011)

*International Uranium (USA) Corp.* (White Mesa Uranium Mill), CLI-01-21, 54 NRC 247, 252 (2001)

organization seeking standing as a party must show either a discrete injury to its own institutional interests or authorization to represent an individual who would have standing in his or her own right; LBP-12-24, 76 NRC 508 (2012)

organizations may claim standing on their own behalf; LBP-11-6, 73 NRC 169 (2010); LBP-11-29, 74 NRC 617 n.15 (2011)

petitioner asserting organizational standing must establish a discrete institutional injury to the organization’s interests, which must be based on something more than a general environmental or policy interest in the subject matter of the proceeding; LBP-12-3, 75 NRC 177, 178 (2012); LBP-13-6, 77 NRC 269 (2013)

petitioner’s claim of organizational standing is of the sort that repeatedly has been found insufficient; CLI-12-12, 75 NRC 606 n.6 (2012)

the Commission will defer to board rulings on standing absent an error of law or abuse of discretion; CLI-12-12, 75 NRC 608 (2012)

*International Uranium (USA) Corp.* (White Mesa Uranium Mill), CLI-01-21, 54 NRC 247, 253 (2001)

health-impact potential of facility traffic-associated dust, if properly pleaded, could provide a basis for standing; LBP-12-3, 75 NRC 187 (2012)

nonspeculative showing that increased traffic accidents could be another impact of increased road usage might establish standing; LBP-12-3, 75 NRC 186 n.20 (2012)

336
speculation about accidents along feed material’s transport routes does not establish standing; CLI-11-3, 73 NRC 623 n.50 (2011)

rehearings are not matters of right, but are pleas to discretion; LBP-11-20, 74 NRC 77 n.77 (2011)

applicant is excused from filing in the wrong court because the rules are unclear; LBP-11-19, 74 NRC 63 n.12 (2011)

Iowa Utilities Board v. Federal Communications Commission, 109 F.3d 418, 425 (8th Cir. 1996)

for injunctive relief, party must show that the harm is certain and great and of such imminence that there is a clear and present need for equitable relief; LBP-15-2, 81 NRC 56 (2015)

Irwin v. Department of Veterans Affairs, 498 U.S. 89, 95 (1990)

waivers of the government’s sovereign immunity, to be effective, must be unequivocally expressed; LBP-11-8, 73 NRC 360 n.46 (2011)

NEPA does not require agencies to resolve all uncertainties, including uncertainties associated with the NUREG-1150 values used in the severe accident mitigation alternatives analysis; LBP-13-13, 78 NRC 473 (2013)

Jackson v. Chater, 94 F.3d 274, 278 (7th Cir. 1996)

in determining whether the government’s position was substantially justified, the board does not make separate determinations regarding each stage but arrives at one conclusion that simultaneously encompasses and accommodates the entire civil action; LBP-11-8, 73 NRC 368 (2011)

Jacobson v. Massachusetts, 197 U.S. 11, 30 (1905)

to determine whether the record facts before it established the position being advocated, the court looked beyond the record by indicating that what everybody knows, the court must know; LBP-14-1, 79 NRC 125 (2014)

James v. Monaker Drilling, Inc., 254 F.2d 702, 706 (10th Cir. 1958)

summary disposition, like summary judgment, is an extreme remedy that should be granted with caution; LBP-11-7, 73 NRC 263 (2011)

Jaroma v. Massey, 873 F.2d 17, 20 (1st Cir. 1989)

where a nonmoving party declines to oppose a motion for summary disposition, the board shall accept as admitted the moving party’s prima facie showing of material facts, but boards cannot grant summary disposition unless movant discharges its burden of demonstrating that it is entitled to a decision as a matter of law; LBP-12-4, 75 NRC 219 (2012)

burden of proving prejudicial error by a federal agency rests with the party challenging the agency’s action, but this is not a particularly onerous requirement; LBP-14-2, 79 NRC 166 (2014)

if the agency error did not affect the outcome, it did not prejudice the petitioner; LBP-14-2, 79 NRC 166 (2014)

requirements and exemptions under FOIA reflect a balancing of public disclosure with confidentiality, but this balancing does not affect the NRC’s authority to obtain requested information; CLI-13-5, 77 NRC 228-29 (2013)

Jordan v. U.S. Department of Justice, 591 F.2d 753, 772-73 (D.C. Cir. 1978) (en banc)
cursory and conclusory assertions that merely paraphrase the standards applicable to the deliberative process privilege without explaining how they apply to any specific document in dispute will not suffice to carry the government’s burden of proof in defending FOIA cases; LBP-13-5, 77 NRC 243 (2013)

deliberative process privilege serves to protect creative debate and candid consideration of alternatives within an agency, to guard against public confusion that could result from the release of policy-oriented discussions that occur prior to policy being made, and to protect the integrity of the decisionmaking process; LBP-13-5, 77 NRC 239 (2013)
to qualify for deliberative process privilege, a document must be both predecisional or antecedent to the adoption of agency policy and deliberative, meaning it must actually be related to the process by which policies are formulated; LBP-13-5, 77 NRC 239 (2013)

because draft documents are not presumptively privileged, the Staff must provide specific information to justify withholding them from disclosure; LBP-13-5, 77 NRC 244 (2013)

in applying deliberative process privilege, courts have allowed the government to withhold memoranda containing advice, opinions, recommendations, and subjective analysis; LBP-13-5, 77 NRC 239 (2013)

when a filing deadline is approaching, notwithstanding that an attorney is engaged in good-faith settlement discussions, prudence should compel the attorney to take all actions that are necessary to ensure the deadline will be met in the event that settlement discussions are unsuccessful; LBP-15-4, 81 NRC 164 (2015)

contentions must be pled with sufficient specificity to put opposing parties on notice of which claims they will actually have to defend; CLI-15-18, 82 NRC 146 n.53 (2015)

pro se petitioners are not required to provide the same level of specificity as those with counsel; LBP-15-5, 81 NRC 294-95 (2015)

proponents of motions to reopen the record bear a heavy burden; LBP-11-22, 74 NRC 270 (2011)

if a hearing could be invoked each time NRC engaged in oversight over or inquiry into plant conditions, NRC’s administrative process could be brought to a virtual standstill; CLI-14-11, 80 NRC 175 (2014)

neither licensee activities nor NRC inspection of or inquiry about those activities provides the opportunity for a hearing under the AEA because those activities only concern compliance with the terms of an existing license; CLI-14-11, 80 NRC 174 (2014)

NRC Staff inspections and confirmatory action letters are oversight activities normally conducted to ensure that licensees comply with existing NRC requirements and license conditions and therefore do not typically trigger the opportunity for a hearing; CLI-15-5, 81 NRC 334 (2015)
LEGAL CITATIONS INDEX

CASES

Kelley v. Selin, 42 F.3d 1501, 1521 (6th Cir. 1995) consideration of alternatives under NEPA that are technologically unproven is unnecessary; LBP-15-3, 81 NRC 104 (2015)

Kern v. U.S. Bureau of Land Management, 284 F.3d 1062, 1078 (9th Cir. 2002) given that so many more environmental assessments are prepared than environmental impact statements, adequate consideration of cumulative effects requires that EAs address them fully; LBP-14-6, 79 NRC 425 (2014)

restricted environmental analysis that fails to consider cumulative impacts would impermissibly subject the decisionmaking process contemplated by NEPA to the tyranny of small decisions; LBP-14-6, 79 NRC 425 (2014)

Kern v. U.S. Bureau of Land Management, 284 F.3d 1062, 1079 (9th Cir. 2002) if actions are reasonably foreseeable future actions within the meaning of 40 C.F.R. 1508.7, CEQ regulations require that they be included in a cumulative impact analysis; LBP-14-6, 79 NRC 421, 422 (2014)

Kerr-McGee Chemical Corp. (West Chicago Rare Earths Facility), ALAB-928, 31 NRC 263, 269 (1990) without a showing of irreparable injury, petitioners seeking a stay of effectiveness must demonstrate that reversal of the licensing board is a virtual certainty; CLI-12-11, 75 NRC 529 n.31 (2012)

Kerr-McGee Chemical Corp. (West Chicago Rare Earths Facility), CLI-96-2, 43 NRC 13 (1996) controversy often ends during the pendency of appeals before the Commission or the Appeal Board; CLI-13-9, 78 NRC 558 (2013)

Kerr-McGee Chemical Corp. (West Chicago Rare Earths Facility), CLI-96-2, 43 NRC 13, 15 (1996) although transfer of pending license applications to an agreement state is not precluded on the ground that NRC and licensee had already devoted resources to the application when it was before the NRC, litigation at NRC had actually reached the point of NRC approval of an onsite plan at the time of the transfer of authority; CLI-11-12, 74 NRC 486 n.104 (2011)

Commission decision to vacate an unreviewed board decision does not intimate any opinion on the soundness of the board’s decision; CLI-13-9, 78 NRC 559 n.31 (2013)

Kerr-McGee Corp. (West Chicago Rare Earths Facility), CLI-82-2, 15 NRC 232, 235 (1982) NRC started to relax the procedural requirements for certain types of proceedings; LBP-11-8, 73 NRC 358 (2011)

Klamath-Siskiyou Wildlands Center v. Bureau of Land Management, 387 F.3d 989, 1001 (9th Cir. 2004) permissive “may” language of 40 C.F.R. 1508.25(a)(3) affords an agency more discretion in making a choice about whether a single EIS is the best way to assess similar actions; LBP-13-10, 78 NRC 149 n.17 (2013)

Kleppe v. Sierra Club, 427 U.S. 390 (1976) agencies must make sure that the proposal that is the subject of an environmental impact statement is properly defined; LBP-13-10, 78 NRC 144 (2013)

Kleppe v. Sierra Club, 427 U.S. 390, 405-06 (1976) applicant’s obligation is to consider alternatives as they exist and are likely to exist; LBP-11-2, 73 NRC 51 n.132 (2011)

under NEPA §102(2)(C), which requires that an agency create an EIS, the moment at which an agency must have a final statement ready is the time at which it makes a recommendation or report on a proposal for federal action; LBP-13-10, 78 NRC 145 (2013)

Kleppe v. Sierra Club, 427 U.S. 390, 410 (1976) when several proposals for actions that will have cumulative or synergistic environmental impact upon a region are pending concurrently before an agency, their environmental consequences must be considered together; LBP-13-10, 78 NRC 145 (2013)

Kleppe v. Sierra Club, 427 U.S. 390, 410 & n.20 (1976) environmental impact statements should be issued to include other related actions only when those related actions have been formally proposed and are pending before the relevant agency; LBP-13-10, 78 NRC 145 (2013)

for construction of a transmission corridor to constitute a connected action under 40 C.F.R. 1508.25, the corridor must be a proposed action rather than one that is merely conceivable; LBP-14-9, 80 NRC 45 (2014)
LEGAL CITATIONS INDEX

CASES

NEPA does not require an agency to consider the possible environmental impacts of less imminent actions when preparing the impact statement on proposed actions; LBP-13-10, 78 NRC 145 (2013) to require detailed analysis in the final environmental impact statement, a transmission corridor must be a proposed action rather than one that is merely contemplated; LBP-12-12, 75 NRC 779 n.211 (2012)

if the adverse environmental impacts of the proposed action are adequately identified and evaluated, the agency is not constrained by NEPA from deciding that other values outweigh the environmental costs; LBP-11-14, 73 NRC 605 (2011) it is not necessary that every alternative device and thought conceivable by the mind of man be considered, but a hard look must be taken at the environmental consequences; LBP-12-1, 75 NRC 35 (2012)

NEPA requires that a hard look must be taken at environmental consequences; LBP-11-17, 74 NRC 22 n.52 (2011); LBP-12-10, 75 NRC 679 (2012)

no provision of a statute should be construed to be entirely redundant; LBP-12-19, 76 NRC 196 (2012)

*La Cuna de Aztlan Sacred Sites Protection Circle Advisory Committee v. U.S. Department of the Interior,* No. EDCV 11-1478-GW(SSX), 2012 WL 6839790, at *4 (C.D. Cal. 2012) argument that, in addition to the tribe, individual tribal representative has standing to sue under NHPA section 106 consultation provisions is rejected; LBP-13-6, 77 NRC 277 n.12 (2013)

National Labor Relations Board is the agency equipped to handle alleged violations of the National Labor Relations Act, including collective bargaining disputes; LBP-14-4, 79 NRC 331 n.65 (2014)

*LafFlamme v. Federal Energy Regulatory Commission,* 852 F.2d 389, 399-403 (9th Cir. 1988)

NRC must adequately consider impacts to visual and aesthetic resources in its NEPA review; LBP-12-3, 75 NRC 206-07 (2012)

*Laguna Greenbelt, Inc. v. U.S. Department of Transportation,* 42 F.3d 517, 528 (9th Cir. 1994)

NEPA does not require a fully developed plan that will mitigate all environmental harm before an agency can act, but only requires that mitigation be discussed in sufficient detail to ensure that environmental consequences have been fully evaluated; LBP-11-14, 73 NRC 607 (2011); LBP-12-23, 76 NRC 458 (2012); LBP-14-7, 79 NRC 460 (2014)

*Lands Council v. Powell,* 395 F.3d 1019, 1026, 1034 (9th Cir. 2005)

agency’s failure to adequately validate a quantitative model on which it relies may lead the reviewing court to conclude that the agency’s decision is arbitrary, capricious, or contrary to law; LBP-15-20, 81 NRC 854 n.151 (2015)

NEPA imposes on NRC a disclosure obligation that NRC publicly discuss its evaluation of the reasonably foreseeable effects of a proposed action; CL1-15-25, 82 NRC 396 n.46 (2015)

*Legal Environmental Assistance Foundation, Inc. v. Environmental Protection Agency,* 400 F.3d 1278, 1279 (11th Cir. 2005)

a source permit is an operating permit that the Clean Air Act requires major stationary sources of air pollution to obtain; LBP-11-13, 73 NRC 583 n.356 (2011)

NEPA regulations require consideration of severe mitigation alternatives in its EISs and supplements thereto at the operating license stage; LBP-12-15, 76 NRC 29 n.3 (2012)

NRC must consider certain severe accident mitigation alternatives in environmental reviews performed under NEPA § 102(2) in conjunction with operating license applications; CL1-11-5, 74 NRC 167 n.100 (2011)

grant of full-power license was challenged in part on the ground that NRC did not consider severe accident mitigation alternatives; LBP-13-1, 77 NRC 61 (2013)

NRC was ordered to analyze features or actions, currently called severe accident mitigation alternatives, that could prevent a serious accident or mitigate its consequences; LBP-14-15, 80 NRC 152 (2014)
Limerick Ecology Action, Inc. v. NRC, 869 F.2d 719, 725, 743 (3d Cir. 1989)
Advisory Council on Historic Preservation regulations provide guidance on agency compliance with
NEPA and are not binding on NRC when the agency has not expressly adopted them, but are
entitled to considerable deference.
NRC has not expressly adopted Council on Environmental Quality regulations, but they are entitled to

individual licensing proceedings are not the appropriate forum for evaluating SAMAs; LBP-13-1, 77
NRC 61 (2013)

SAMDAs should not be considered in the agency’s NEPA reviews for individual facilities, but must
be given careful consideration in the Limerick EIS; LBP-12-18, 76 NRC 173 n.221 (2012)

Limerick Ecology Action, Inc. v. NRC, 869 F.2d 719, 728 (3d Cir. 1989)
following the Three Mile Island accident NRC set safety goals with respect to severe accidents;
LBP-12-18, 76 NRC 174 (2012)

legislative history and case law require compliance with NEPA unless compliance is impossible, or
another statute specifically prohibits compliance with NEPA; LBP-12-18, 76 NRC 175 n.238 (2012)

Limerick Ecology Action, Inc. v. NRC, 869 F.2d 719, 730 (3d Cir. 1989)
NRC must consider the alternatives available for reducing or avoiding adverse environmental and other
effects; LBP-12-18, 76 NRC 175-76 (2012)

language of NEPA indicates that Congress did not intend that it be precluded by the Atomic Energy
Act; LBP-12-18, 76 NRC 175 n.238 (2012)
NRC cannot look to the sufficiency of safety standards enacted under the Atomic Energy Act to avoid
its NEPA obligations; LBP-12-18, 76 NRC 175 n.238 (2012)

Limerick Ecology Action, Inc. v. NRC, 869 F.2d 719, 736-37, 739, 741 (3d Cir. 1989)
NRC policy statement is not a sufficient vehicle to preclude consideration of severe accident
mitigation design alternatives, and NRC must take the requisite hard look at them, giving them the
careful consideration and disclosure required by the National Environmental Policy Act; CLI-12-19,
76 NRC 380-81 (2012)

Limerick Ecology Action, Inc. v. NRC, 869 F.2d 719, 737 (3d Cir. 1989)
environmental impact statements must be sufficient to enable those who did not have a part in their
compilation to understand and consider meaningfully the factors involved; LBP-12-18, 76 NRC 179
(2012)
it cannot be said that consideration of Fukushima-related issues could not affect the ultimate decision
on a license renewal application; LBP-11-35, 74 NRC 766 (2011)
NEPA requires that NRC take a hard look at alternatives, including severe accident mitigation
alternatives, and to provide a rational basis for rejecting alternatives that are cost-effective;
LBP-12-8, 75 NRC 549 (2012)

impacts that are remote and speculative may be excluded from consideration; LBP-12-1, 75 NRC 35
(2012)

Limerick Ecology Action, Inc. v. NRC, 869 F.2d 719, 738 (3d Cir. 1989)
as a logical proposition, risk equals the likelihood of an occurrence times the severity of the
consequences; LBP-11-2, 73 NRC 63 n.212 (2011)

Limerick Ecology Action, Inc. v. NRC, 869 F.2d 719, 739 (3d Cir. 1989)
absent a valid regulation limiting NRC’s NEPA obligations, the consideration of alternative severe
accident mitigation measures may not be excluded from the agency’s NEPA reviews; LBP-12-18, 76
NRC 173-74 (2012)
consideration of remote and speculative impacts is not required by NEPA; LBP-11-38, 74 NRC 859
(2011); LBP-12-5, 75 NRC 243 n.104 (2012)
National Environmental Policy Act requires NRC to consider severe accident mitigation alternatives;
LBP-13-1, 77 NRC 61 (2013)
NRC’s obligation to evaluate mitigation in an EIS for a new nuclear reactor license includes evaluating measures to mitigate the impact of severe accidents on public health and safety; LBP-12-18, 76 NRC 161 (2012)

only if the harm in question is so remote and speculative as to reduce the effective probability of its occurrence to zero may the agency dispense with the consequences portion of its environmental analysis; LBP-13-13, 78 NRC 542 (2013)

severe accident mitigation alternatives analysis must necessarily be site specific because the potential consequences of a severe accident will largely be the product of the location of the plant; LBP-13-13, 78 NRC 453, 465-66 (2013)

alternatives to mitigate the impacts of severe accidents must be given careful consideration in EISs supporting NRC licensing decisions; LBP-12-18, 76 NRC 172 (2012)

careful consideration of severe accident mitigation design alternatives is required under NEPA, and NRC’s failure to consider them is a violation of NEPA; LBP-12-8, 75 NRC 565 (2012)

to the extent that petitioner’s counsel is blameworthy, petitioner may be held accountable; LBP-13-2, 77 NRC 77 n.14 (2003)

parties who choose to resolve litigation through settlement may not dispose of the claims of a third party and may not impose duties or obligations on a third party without that party’s agreement; LBP-14-4, 79 NRC 368 (2014)

_Long Island Lighting Co. (Jamesport Nuclear Power Station, Units 1 and 2), ALAB-292, 2 NRC 631 (1975)_

even if petitioner fails to establish good cause for an untimely petition, the other late-filing factors must be examined; LBP-12-12, 75 NRC 750 n.21 (2012)

_Long Island Lighting Co. (Shoreham Nuclear Power Station), ALAB-99, 6 AEC 53, 55-56 (1973)_
generic issues generally should not be considered in individual licensing proceedings, where the issues appropriately could be considered via rulemaking; CLI-13-4, 77 NRC 104 n.12 (2013)

_Long Island Lighting Co. (Shoreham Nuclear Power Station), CLI-85-1, 21 NRC 275, 280 (1985)_
rule waiver petitioners face a substantial burden; CLI-13-7, 78 NRC 208 (2013)

_Long Island Lighting Co. (Shoreham Nuclear Power Station, Unit 1), ALAB-156, 6 AEC 831, 836 (1973)_

according to the rule of reason, an agency need only address reasonably foreseeable impacts, not those that are remote and speculative or inconsequentially small; LBP-11-38, 74 NRC 831 (2011); LBP-12-5, 75 NRC 236-37 (2012); LBP-12-17, 76 NRC 82 (2012); LBP-13-13, 78 NRC 452 (2013); LBP-14-4, 79 NRC 460 (2014)

_hard look under NEPA is subject to a rule of reason, and consideration of environmental impacts need not address all theoretical possibilities, but only those that have some reasonable possibility of occurring; LBP-15-3, 81 NRC 81-82 (2015); LBP-15-16, 81 NRC 638 (2015)_

NEPA’s “hard look” is tempered by a rule of reason; LBP-11-38, 74 NRC 831 (2011); LBP-12-5, 75 NRC 236-37 n.52 (2012); LBP-12-17, 76 NRC 82 (2012); LBP-13-13, 78 NRC 452 (2013)

_Long Island Lighting Co. (Shoreham Nuclear Power Station, Unit 1), ALAB-773, 19 NRC 1333, 1341 n.30 (1984)_

deliberative process privilege applied under 10 C.F.R. 2.390(a)(5) to interagency or intra-agency memorandums or letters is similar to Exemption 5 under the Freedom of Information Act; LBP-13-5, 77 NRC 238 (2013)

_Long Island Lighting Co. (Shoreham Nuclear Power Station, Unit 1), ALAB-773, 19 NRC 1333, 1343 (1984)_

overriding need or special circumstances test to overcome deliberative process privilege only applies after a showing that the requested materials are covered by the deliberative process privilege; LBP-13-5, 77 NRC 247 (2013)

_overriding need or special circumstances would support granting a motion to compel; LBP-13-5, 77 NRC 251 (2013)_

_Long Island Lighting Co. (Shoreham Nuclear Power Station, Unit 1), ALAB-900, 28 NRC 275, 288 (1988)_

NRC is bound by the unambiguous language of its own regulations; LBP-11-22, 74 NRC 276 (2011)
LEGAL CITATIONS INDEX

CASES

Long Island Lighting Co. (Shoreham Nuclear Power Station, Unit 1), ALAB-900, 28 NRC 275, 288, 290, review declined, CLI-88-11, 28 NRC 603 (1988)
guidance documents set neither minimum nor maximum regulatory requirements, although they are entitled to special weight; CLI-15-6, 81 NRC 356, 358 n.85 (2015)
interpretation may not conflict with the plain meaning of the wording used in a regulation; LBP-14-7, 79 NRC 474 (2014)

Long Island Lighting Co. (Shoreham Nuclear Power Station, Unit 1), CLI-84-8, 19 NRC 1154, 1156 n.3 (1984)
examples of the kinds of facts that must be weighed when determining whether to grant an exemption are given; CLI-13-1, 77 NRC 18 n.103 (2013)
rule exemption decisions should take into account the equities of each situation; CLI-13-1, 77 NRC 18 n.103 (2013)

Long Island Lighting Co. (Shoreham Nuclear Power Station, Unit 1), CLI-91-2, 33 NRC 61, 66, 74-75 (1991)
discussion of the no-action alternation need only include feasible, nonspeculative alternatives;
LBP-12-8, 75 NRC 569 (2012)
NEPA-required alternatives discussion need not include every possible alternative, but rather every reasonable alternative; LBP-11-13, 73 NRC 553 (2011); LBP-15-3, 81 NRC 104 (2015)

Long Island Lighting Co. (Shoreham Nuclear Power Station, Unit 1), CLI-91-2, 33 NRC 61, 72 n.3 (1991)
although boards may give reasonable deference to NRC guidance, such agency guidance does not substitute for regulations, is not binding authority, and does not prescribe NRC requirements;
LBP-11-16, 73 NRC 670 (2011)

Long Island Lighting Co. (Shoreham Nuclear Power Station, Unit 1), CLI-91-2, 33 NRC 61, 74-75 (1991)
because NRC’s decision to grant the exemptions is a matter of public record, the board takes notice that the exemptions have now been approved; LBP-15-24, 82 NRC 81 n.78 (2015)

Long Island Lighting Co. (Shoreham Nuclear Power Station, Unit 1), CLI-91-8, 33 NRC 461, 468 (1991)
requests to stay effectiveness of future licensing action pending judicial appeal are more appropriately styled motions to reconsider and motions to hold in abeyance; CLI-12-11, 75 NRC 528 n.23 (2012)

Long Island Lighting Co. (Shoreham Nuclear Power Station, Unit 1), CLI-91-8, 33 NRC 461, 568 n.2 (1991)
because 10 C.F.R. 2.342 does not apply to petitioners’ motion for a stay, the Commission does not address applicant’s request to strike the motion because it exceeds that rule’s 10-page limit;
CLI-12-11, 75 NRC 528 n.26 (2012)

Long Island Lighting Co. (Shoreham Nuclear Power Station, Unit 1), CLI-92-4, 35 NRC 69, 80-82 (1992)
the Commission traditionally has entertained motions to stay agency action pending judicial review;
CLI-12-11, 75 NRC 528 (2012)

Long Island Lighting Co. (Shoreham Nuclear Power Station, Unit 1), LBP-82-82, 16 NRC 1144, 1163-64 (1982)
board may employ case law interpreting FOIA Exemption 5 when determining whether the deliberative process privilege applies in an NRC proceeding; LBP-13-5, 77 NRC 238 (2013)

Long Island Lighting Co. (Shoreham Nuclear Power Station, Unit 1), LBP-83-30, 17 NRC 1132, 1135, 1138 (1983)
standards for reopening the record clearly do apply to a proposed new contention after all issues, except matters unrelated to the proposed new contention, have been litigated and the record has been closed; LBP-11-20, 74 NRC 77 n.78 (2011)

Long Island Lighting Co. (Shoreham Nuclear Power Station, Unit 1), LBP-91-7, 33 NRC 179, 183 (1991)
final no significant hazards consideration determination does not either prevent the adjudication from proceeding or restrict the licensing board’s substantive determination on public health and safety issues; LBP-15-17, 81 NRC 790 n.238 (2015)
LEGAL CITATIONS INDEX

CASES

Long Island Lighting Co. (Shoreham Nuclear Power Station, Unit 1), LBP-91-7, 33 NRC 179, 195 (1991)
NRC is lenient in permitting pro se petitioners the opportunity to cure procedural defects in petitions to intervene regarding standing; LBP-11-13, 73 NRC 549 (2011)

Louisiana Energy Services, L.P. (Claiborne Enrichment Center), CLI-92-7, 35 NRC 93 (1992)
this decision may be relied upon as precedent for licensing of a uranium enrichment facility;
LBP-12-21, 76 NRC 233 (2012)

Louisiana Energy Services, L.P. (Claiborne Enrichment Center), CLI-97-2, 45 NRC 3, 4 (1997)
cursory assertions are insufficient to raise an issue for appeal; CLI-13-1, 77 NRC 22 n.129 (2013)

this decision may be relied upon as precedent for licensing of a uranium enrichment facility;
LBP-12-21, 76 NRC 233 (2012)

enrichment facilities are to be licensed pursuant to Atomic Energy Act §§ 53 and 63, 42 U.S.C.
§§ 2073, 2093; LBP-12-21, 76 NRC 232-33 & n.73 (2012)

interpretation of regulations, like interpretation of a statute, begins with the language and structure of the provisions, and the entirety of each provision must be given effect; LBP-14-7, 79 NRC 473 (2014)

Louisiana Energy Services, L.P. (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77 (1998)
hard look at the environmental justice aspects of relicensing having been taken, the Commission, without additional Staff action, can now with respect to the EJ issue, make an informed decision whether to grant the requested license; LBP-13-13, 78 NRC 544 n.2107 (2013)
this decision may be relied upon as precedent for licensing of a uranium enrichment facility;
LBP-12-21, 76 NRC 233 (2012)

Louisiana Energy Services, L.P. (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 84 (1998)
admitted contentions challenging applicant’s environmental report may function as challenges to similar portions of NRC Staff’s NEPA document; LBP-11-1, 73 NRC 26 n.13 (2011); LBP-13-9, 78 NRC 46 (2013); LBP-14-5, 79 NRC 383 (2014); LBP-15-11, 81 NRC 409-10 (2015)
if all matters at issue in a contention of omission are addressed by NRC Staff in its DEIS through the actual provision of information on all such matters, then no legal interest in that contention remains, and the contention is moot; LBP-11-4, 73 NRC 127-28 n.155 (2011)
“migration” tenet does not change the basic form of the contention, i.e., whether it challenges the soundness of the information provided or claims that necessary information has been omitted (or some combination of the two); LBP-11-1, 73 NRC 26 n.13 (2011)
NRC Staff’s issuance of an environmental assessment under NEPA does not necessarily moot contentions challenging an applicant’s environmental report; LBP-14-6, 79 NRC 416 n.67 (2014)
safety matters generally need to be raised, relative to an admitted safety contention, in the context of the merits disposition of the already admitted safety contention or, in the case of a new issue, as a wholly new safety contention; LBP-13-10, 78 NRC 132-33 (2013)
under the migration tenet, boards may construe an admitted contention contesting the environmental report as a challenge to the subsequently issued draft or final environmental impact statement without the need for intervenors to file a new or amended contention; LBP-12-12, 75 NRC 767-68 n.140 (2012); LBP-12-23, 76 NRC 470-71 (2012)

Louisiana Energy Services, L.P. (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 87 (1998)
environmental impact statement or environmental assessment must describe the potential environmental impact of a proposed action and discuss any reasonable alternatives; LBP-15-11, 81 NRC 437 n.238 (2015)
NEPA has twin goals of forcing agencies to take a hard look at the environmental consequences of a proposed project, and, making relevant analyses openly available, to permit the public a role in the agency’s decisionmaking process; LBP-11-14, 73 NRC 598 (2011); LBP-12-18, 76 NRC 179 (2012); LBP-14-9, 80 NRC 57 (2014); LBP-15-16, 81 NRC 697 n.511 (2015)
NEPA’s primary goals include fostering informed public participation in the decisionmaking process;
LBP-12-17, 76 NRC 120-21 (2012)
NEPA imposes procedural restraints on agencies, which require them to take a hard look at the environmental impacts of a proposed action and the reasonable alternatives to that action; LBP-12-17, 76 NRC 81-82 (2012); LBP-14-7, 79 NRC 460 (2014); LBP-15-3, 81 NRC 81 (2015); LBP-15-16, 81 NRC 637 (2015)

NEPA’s procedural obligation is carried out through an agency’s issuance of an environmental impact statement documenting the agency’s hard look at potential environmental impacts of the proposed action and reasonable alternatives thereto; LBP-11-39, 74 NRC 868 (2011)

although NEPA does not explicitly mention cost-benefit balancing, courts have interpreted the statute as requiring federal agencies to balance the environmental costs against the anticipated benefits of a proposed action; LBP-11-7, 73 NRC 281 (2011)

although NRC does not license construction or operation of a transmission corridor, it has the authority to deny the license for a proposed nuclear plant if, for example, the total environmental costs of the new reactor and connected actions exceed the benefits; LBP-12-12, 75 NRC 779-80 (2012)

as part of NRC’s NEPA analysis for licensing a nuclear power plant, the agency must balance the costs and benefits resulting from issuance of a license, but the EIS need not always contain a formal or mathematical cost-benefit analysis; LBP-11-7, 73 NRC 281-82 n.173 (2011)

court may not substitute its own judgment for that of an agency, and agencies are not constrained by NEPA to select only the most environmentally benign option; LBP-15-16, 81 NRC 688 (2015)

hard look under NEPA is intended to foster both informed agency decisionmaking and informed public participation so as to ensure that the agency does not act upon incomplete information, only to regret its decision after it is too late to correct; LBP-15-3, 81 NRC 81 (2015)

NEPA itself does not mandate a cost-benefit analysis, but the statute is generally regarded as calling for some sort of a weighing of the environmental costs against the economic, technical, or other public benefits of a proposal; LBP-11-6, 73 NRC 218 (2010)

taking a hard look at environmental impacts fosters both informed decisionmaking and informed public participation, and thus ensures that NRC does not act on incomplete information, only to regret its decision after it is too late to correct it; LBP-11-26, 74 NRC 545 (2011); LBP-11-38, 74 NRC 830 (2011); LBP-12-5, 75 NRC 236 (2012); LBP-13-13, 78 NRC 452 (2013)

when the adequacy of an EIS mitigation strategy is challenged, the determining issue is whether the agency took a sufficiently hard look at environmental consequences and ensured that its decision was supported by a completely informed record; LBP-15-16, 81 NRC 688 (2015)

Louisiana Energy Services, L.P. (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 87-88 (1998)

need-for-power forecasts need not precisely identify future market conditions and energy demand, or develop detailed analyses of system generating assets, costs of production, capital replacement ratios, and the like in order to establish with certainty that the construction and operation of a nuclear power plant is the most economical alternative for generation of power; LBP-11-7, 73 NRC 283 (2011); LBP-12-5, 75 NRC 237 (2012)

Louisiana Energy Services, L.P. (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 89 (1998)

adjudicatory record and board decision and any Commission appellate decisions become, in effect, part of the final environmental impact statement; CLI-11-6, 74 NRC 209 (2011); CLI-15-6, 81 NRC 376 (2015); LBP-11-38, 74 NRC 832 (2011); LBP-12-5, 75 NRC 239 (2012); LBP-12-17, 76 NRC 83 (2012); LBP-13-13, 78 NRC 524, 543 (2013); LBP-14-9, 80 NRC 67 (2014); LBP-15-16, 81 NRC 638, 694 n.490, 707 (2015)
LEGAL CITATIONS INDEX

CASES

Louisiana Energy Services, L.P. (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 97 (1998)
the extent of the no-action discussion is governed by a rule of reason, and discussion in the environmental documents need not be exhaustive or inordinately detailed; LBP-12-8, 75 NRC 569 (2012)

Louisiana Energy Services, L.P. (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 100 (1998)
NRC’s environmental justice goal is to identify and adequately weigh, or mitigate, effects on low-income and minority communities that become apparent only by considering factors peculiar to those communities; LBP-13-13, 78 NRC 541 (2013)

Louisiana Energy Services, L.P. (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 102-03 (1998)
NEPA does not require NRC Staff to examine every conceivable aspect of federally licensed projects in preparing its environmental impact statement; LBP-15-3, 81 NRC 82 (2015)

environmental impact statements are to include a detailed statement by the responsible official on alternatives to the proposed action; LBP-12-17, 76 NRC 82 (2012); LBP-14-9, 80 NRC 43 (2014)

Louisiana Energy Services, L.P. (Claiborne Enrichment Center), CLI-98-5, 47 NRC 113 (1998)
controversy often ends during the pendency of appeals before the Commission or the Appeal Board; CLI-13-9, 78 NRC 558 (2013)

Louisiana Energy Services, L.P. (Claiborne Enrichment Center), CLI-98-5, 47 NRC 113, 114 (1998)
Commission decision to vacate an unreviewed board decision does not intimate any opinion on the soundness of the board’s decision; CLI-13-9, 78 NRC 559 n.31 (2013)
stare decisis is not implicated where the board decision is unreviewed and therefore not binding on future tribunals, but as a prudential matter, the Commission vacates such decisions when appellate review is cut short by mootness; CLI-13-9, 78 NRC 558 (2013)
unreviewed board decisions are not binding on future boards; CLI-13-10, 78 NRC 569 n.42 (2013)

with license’s withdrawal of license amendment request, the proceeding is moot; CLI-13-10, 78 NRC 568 (2013)

Louisiana Energy Services, L.P. (Claiborne Enrichment Center), LBP-91-41, 34 NRC 332, 339 (1991)
although boards may give reasonable deference to NRC guidance, such agency guidance does not substitute for regulations, is not binding authority, and does not prescribe NRC requirements; LBP-11-16, 73 NRC 670, 674 (2011)

although environmental contentions ultimately challenge NRC’s compliance with the National Environmental Policy Act, applicant may advocate for a particular challenged position set forth in the environmental impact statement; LBP-12-5, 75 NRC 236 (2012); LBP-12-17, 76 NRC 81 (2012)
applicant may bear the burden of proof on contentions asserting deficiencies in its environmental report and where the applicant becomes a proponent of a particular challenged position set forth in the environmental impact statement; LBP-11-38, 74 NRC 830 (2011)

Louisiana Energy Services, L.P. (Claiborne Enrichment Center), LBP-96-25, 44 NRC 331, 339 (1996)
although environmental contentions ultimately challenge the NRC’s compliance with NEPA, applicant is free to support positions set forth in the environmental impact statement that are under challenge; LBP-14-7, 79 NRC 459 (2014)
because NRC Staff relies heavily on the applicant’s environmental report in preparing the environmental impact statement, should the applicant become a proponent of a particular challenged position set forth in the EIS, the applicant, as such a proponent, also has the burden on that matter; LBP-15-3, 81 NRC 85 (2015); LBP-15-16, 81 NRC 642 (2015)

Louisiana Energy Services, L.P. (Claiborne Enrichment Center), LBP-96-25, 44 NRC 331, 341 (1996)
environmental impact statements serve as an environmental full disclosure law providing agency decisionmakers, as well as the President, the Congress, the Council on Environmental Quality, and the public with the environmental cost-benefit information that Congress thought they should have about each qualifying federal action; LBP-13-13, 78 NRC 285 n.175 (2013)
LEGAL CITATIONS INDEX

CASES

Louisiana Energy Services, L.P. (National Enrichment Facility), CLI-04-25, 60 NRC 223, 224 (2004) reply briefs cannot be used to present entirely new facts or arguments in an attempt to reinvigorate thinly supported contentions; LBP-11-34, 74 NRC 694 (2011); LBP-15-5, 81 NRC 284, 285, 304 (2015)
right to reply is intended to provide an opportunity to legitimately amplify arguments made in the intervention petition in response to applicant and NRC Staff answers; LBP-15-5, 81 NRC 284, 285, 304 (2015); LBP-15-13, 81 NRC 461 (2015)
Louisiana Energy Services, L.P. (National Enrichment Facility), CLI-04-25, 60 NRC 223, 224-25 (2004) petitioner may respond to the legal or logical arguments presented in the answers to its hearing request, but may not use its reply to raise new issues for the first time; CLI-15-18, 82 NRC 146 (2015); CLI-15-20, 82 NRC 230 n.124 (2015)
replies may not contain new information that was not raised in either the petition or answers, but arguments that respond to the petition or answers are not precluded, whether they are offered in rebuttal or in support; CLI-11-14, 74 NRC 809 n.45 (2011)
deprecated uranium and the other waste generated by uranium enrichment facilities are not spent fuel, transuranic waste, or 11e(2) byproduct material or specific kinds of wastes such as irradiated fuel and the liquid and solid wastes resulting from the processing of irradiated fuel, and thus are classified as low-level waste; LBP-12-21, 76 NRC 233 (2012)
this decision may be relied upon as precedent for licensing of a uranium enrichment facility; LBP-12-21, 76 NRC 233 (2012)
giving appropriate deference to NRC Staff technical expertise, boards are to probe the logic and evidence supporting NRC Staff findings and decide whether those findings are sufficient to support license issuance; LBP-12-21, 76 NRC 235 (2012)
licensing boards conducting mandatory hearings on uncontested issues are expected to take an independent hard look at NRC Staff safety and environmental findings but are not to replicate NRC Staff work; LBP-12-21, 76 NRC 224 (2012)
Louisiana Energy Services, L.P. (National Enrichment Facility), CLI-05-17, 62 NRC 5, 34 (2005) licensing boards conducting mandatory hearings on uncontested issues should conduct a simple sufficiency review of uncontested issues, not a de novo review; LBP-12-21, 76 NRC 224, 235 (2012)
LEGAL CITATIONS INDEX

CASES

Louisiana Energy Services, L.P. (National Enrichment Facility), CLI-05-17, 62 NRC 5, 39-40 (2005) licensing board role in a mandatory hearing on uranium enrichment licensing is to examine the sufficiency of NRC Staff’s findings and to confirm that those findings have reasonable support in logic and fact; LBP-12-21, 76 NRC 236 (2012)

Louisiana Energy Services, L.P. (National Enrichment Facility), CLI-05-17, 62 NRC 5, 41 (2005) licensing boards have an important but limited role in mandatory proceedings; LBP-12-21, 76 NRC 224 (2012)

Louisiana Energy Services, L.P. (National Enrichment Facility), CLI-05-17, 62 NRC 5, 42-43 (2005) Atomic Energy Act does not prescribe a specific structure for the mandatory hearing requirement, and the Commission has granted licensing boards considerable flexibility to select the most appropriate approach in the circumstances of each individual case; LBP-12-21, 76 NRC 243 (2012)

Louisiana Energy Services, L.P. (National Enrichment Facility), CLI-05-17, 62 NRC 5, 44 (2005) licensing boards have an important but limited role in mandatory proceedings; LBP-12-21, 76 NRC 224 (2012)

Louisiana Energy Services, L.P. (National Enrichment Facility), CLI-05-17, 62 NRC 5, 45 (2005) in reaching independent judgment on NEPA baseline issues, licensing board role is not to second-guess underlying technical or factual findings by the NRC Staff unless the board finds Staff review to be incomplete or Staff findings to be insufficiently explained in the record; LBP-12-21, 76 NRC 236 n.88 (2012)

licensing board’s NEPA review must not be so intrusive or detailed as to involve the board in independent basic research or a duplication of the analysis previously performed by the Staff; LBP-12-21, 76 NRC 236 (2012)

Louisiana Energy Services, L.P. (National Enrichment Facility), CLI-05-20, 62 NRC 523, 536 (2005) routine contention admissibility determinations generally are not appropriate for interlocutory review; CLI-12-12, 75 NRC 608 (2012) timeliness of late-filed contentions turns on fact-specific considerations, such as when new documents or information first became available and how promptly intervenors reacted; LBP-15-24, 82 NRC 98 n.194 (2015)

Louisiana Energy Services, L.P. (National Enrichment Facility), CLI-05-20, 62 NRC 523, 536 (2005) NEPA also does not call for certainty or precision, but an estimate of anticipated (not unduly speculative) impacts; LBP-12-5, 75 NRC 243 n.104 (2012); LBP-12-9, 75 NRC 623 (2012); LBP-12-18, 76 NRC 142 n.68 (2012); LBP-13-13, 78 NRC 505 (2013); LBP-15-3, 81 NRC 82 (2015); LBP-15-16, 81 NRC 637 n.99 (2015)

Louisiana Energy Services, L.P. (National Enrichment Facility), CLI-05-20, 62 NRC 523, 536 (2005) NEPA does not require agencies to analyze impacts of alternatives that are speculative, remote, impractical, or unviable; CLI-12-5, 75 NRC 342 n.243 (2012)

Louisiana Energy Services, L.P. (National Enrichment Facility), CLI-05-28, 62 NRC 721, 724 (2005) nuclear nonproliferation issues span a host of factors far removed from and far afield from the NRC’s decision whether to license a uranium enrichment facility; LBP-12-21, 76 NRC 241 (2012)

Louisiana Energy Services, L.P. (National Enrichment Facility), CLI-05-28, 62 NRC 721, 724-25 (2005) the Commission has determined that there is no relationship between NRC licensing actions and terrorism; LBP-12-21, 76 NRC 241 (2012)

Louisiana Energy Services, L.P. (National Enrichment Facility), CLI-05-28, 62 NRC 721, 727-28 (2005) NRC proceedings would be incapable of attaining finality if contentions that could have been raised at the outset could be added later at will, regardless of the stage of the proceeding; CLI-12-10, 75 NRC 483 (2012)

Louisiana Energy Services, L.P. (National Enrichment Facility), CLI-05-28, 62 NRC 721, 729 (2005) NEPA does not require agencies to analyze impacts of alternatives that are speculative, remote, impractical, or unviable; CLI-12-5, 75 NRC 342 n.243 (2012)

Louisiana Energy Services, L.P. (National Enrichment Facility), CLI-05-28, 62 NRC 721, 731 (2005) adjudicatory records, board decisions, and any Commission decisions become effectively part of the environmental review document; CLI-12-5, 75 NRC 61 (2012) board may incorporate material from another agency’s environmental impact statement, which was submitted in the hearing record, as part of the record of decision; CLI-15-6, 81 NRC 388 n.255 (2015)

Louisiana Energy Services, L.P. (National Enrichment Facility), CLI-06-15, 63 NRC 687, 697 (2006) Commission defers to board’s factual findings unless they are clearly erroneous and generally steps in only to correct factual findings not even plausible in light of the record reviewed in its entirety, e.g.,
LEGAL CITATIONS INDEX

CASES

where it appears that the board has overlooked or misunderstood important evidence; CLI-15-6, 81 NRC 351 (2015)

Louisiana Energy Services, L.P. (National Enrichment Facility), CLI-06-22, 64 NRC 37, 46 (2006) new material is outside the proper scope of a reply; CLJ-11-14, 74 NRC 809 n.45 (2011)

Louisiana Energy Services, L.P. (National Enrichment Facility), CLI-06-22, 64 NRC 37, 49 n.48 (2006) governmental officials, acting in their official capacities, are presumed to have properly discharged their duties and, to rebut this presumption, petitioner’s burden of proof involves presentation of clear evidence to the contrary; LBP-14-2, 79 NRC 150 (2014)

Louisiana Energy Services, L.P. (National Enrichment Facility), LBP-05-13, 61 NRC 385, 410-11, 424-26, aff’d, CLJ-05-28, 62 NRC 721, 723 (2005) resolution of a mooted contention requires no more than a finding by the presiding officer that the matter has become moot; LBP-12-5, 75 NRC 238-39 n.64 (2012)

Louisiana Energy Services, L.P. (National Enrichment Facility), LBP-06-8, 63 NRC 241, 258-59 (2006) NEPA’s “hard look” requirement is tempered by a rule of reason; LBP-11-38, 74 NRC 831 (2011); LBP-12-5, 75 NRC 236 (2012); LBP-12-17, 76 NRC 82 (2012); LBP-13-13, 78 NRC 452 (2013)

Louisiana Energy Services, L.P. (National Enrichment Facility), LBP-06-8, 63 NRC 241, 259 (2006) NRC Staff’s reference to, and reliance in its DEIS on, state issuance of a site certification order and associated certificate of compliance on groundwater use does not dispense with NRC’s duty under NEPA to conduct an independent hard look at environmental impacts related to active dewatering during operations at a nuclear plant; LBP-11-1, 73 NRC 25 (2011)

Louisiana Energy Services, L.P. (National Enrichment Facility), LBP-06-8, 63 NRC 241, 260 (2006) adjudicatory record, board decision, and any Commission appellate decisions become, in effect, part of the final environmental impact statement; LBP-13-13, 78 NRC 543 (2013) hard look at the environmental justice aspects of relicensing having been taken, the Commission, without additional Staff action, can now with respect to the EJ issue, make an informed decision whether to grant the requested license; LBP-13-13, 78 NRC 544 n.2107 (2013)

Louisiana Energy Services, L.P. (National Enrichment Facility), LBP-11-11, 73 NRC 475 (2011) NRC Staff typically prepares the record of decision but when a hearing is held, the board’s initial decision constitutes the record of decision as to those issues that were litigated during the hearing; LBP-13-13, 78 NRC 525 (2013)

Louisiana Energy Services, L.P. (National Enrichment Facility), LBP-06-17, 63 NRC 747 (2006) mandatory proceedings for licensing of proposed uranium enrichment facility sites were conducted; LBP-11-11, 73 NRC 475 (2011)

Louisiana Power and Light Co. (Waterford Steam Electric Station, Unit 3), ALAB-732, 17 NRC 1076, 1091 n.18 (1983) NRC Staff is obliged to lay all relevant materials before the board to enable it to adequately dispose of the issues before it; LBP-14-2, 79 NRC 243 (2014)
LEGAL CITATIONS INDEX

CASES

Louisiana Power and Light Co. (Waterford Steam Electric Station, Unit 3), ALAB-732, 17 NRC 1076, 1093 (1983)
moving party properly bears the burden of meeting the reopening standards and applicant retains the burden of proof on the question whether the license should be issued; CLI-15-19, 82 NRC 157 n.29 (2015)

Louisiana Power and Light Co. (Waterford Steam Electric Station, Unit 3), ALAB-732, 17 NRC 1076, 1111-12 (1983)
licensing boards must judiciously exercise sua sponte authority when faced with a serious, and unraised, issue; LBP-14-9, 80 NRC 66 n.223 (2014)

Louisiana Power and Light Co. (Waterford Steam Electric Station, Unit 3), CLI-86-1, 23 NRC 1, 4-5 (1986)
burden of satisfying the reopening requirements is a heavy one, and it rests with the party moving to reopen; CLI-11-2, 73 NRC 346 (2011); CLI-15-19, 82 NRC 155-56 (2015); LBP-11-20, 74 NRC 81 (2011)

deliberative process privilege does not protect documents in their entirety and if the government can segregate and disclose nonprivileged factual information within a document, it must; LBP-13-5, 77 NRC 240 (2013)

contemporaneous judicial concepts of standing require a petitioner to allege an injury in fact that is fairly traceable to the challenged action and likely to be redressed by a favorable decision; CLI-15-25, 82 NRC 394 (2015); LBP-11-2, 73 NRC 40 (2011); LBP-11-6, 73 NRC 168-69 (2010); LBP-11-13, 73 NRC 545-46 (2011); LBP-11-16, 73 NRC 652 (2011); LBP-14-4, 79 NRC 350-51 (2014)

contemporaneous judicial concepts of standing are applied in NRC proceedings; LBP-15-13, 81 NRC 463 (2015); LBP-15-19, 81 NRC 819 (2015)
intervention petitioner’s burden is met if petitioner provides plausible factual allegations that satisfy each element of standing; LBP-12-3, 75 NRC 177 (2012); LBP-13-6, 77 NRC 270 (2013)
under judicial concepts of standing, petitioner must allege a concrete and particularized injury that is fairly traceable to the challenged action and is likely to be redressed by a favorable decision; LBP-15-5, 81 NRC 256 (2015); LBP-15-13, 81 NRC 463 (2015); LBP-15-17, 81 NRC 770 (2015)

to be adversely affected or aggrieved within the meaning of a statute, plaintiff must establish that the injury complained of falls within the zone of interests sought to be protected by the statutory provision whose violation forms the legal basis for the complaint; LBP-14-4, 79 NRC 354 (2014)

Luminant Generation Co., LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), CLI-11-9, 74 NRC 233, 236 (2011)
heavy barrier to reopening applies whenever an adjudication has been closed and not merely after a case has been terminated following a full evidentiary hearing on the merits; LBP-15-14, 81 NRC 595 (2015)
once all contentions have been decided, the contested proceeding is terminated; CLI-12-14, 75 NRC 699 (2012)

Luminant Generation Co., LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), CLI-11-9, 74 NRC 233, 237 (2011)
standard for review of contention admissibility determinations is the same, whether an appeal lies under section 2.311 or 2.341, and the Commission will disturb a licensing board’s contention admissibility ruling only if there has been an error of law or abuse of discretion; CLI-12-7, 75 NRC 386 (2012)
LEGAL CITATIONS INDEX

CASES

Luminant Generation Co., LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), CLI-11-9, 74 NRC 233, 244 (2011)
petitioner must provide a sound basis for its contention in its petition or in an expert affidavit or other supporting information that specifically corroborates the contested issues framed by the contention; LBP-13-6, 77 NRC 296 (2013)

Luminant Generation Co., LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), CLI-12-7, 75 NRC 379, 385 (2012)

waste confidence contention’s pendency creates some uncertainty as to whether petitioner may appeal the board’s ruling on a proposed contention, or whether it must await resolution of the waste confidence issue; LBP-14-8, 79 NRC 528 (2014)

Luminant Generation Co., LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), CLI-12-7, 75 NRC 379, 388 (2012)

Luminant Generation Co., LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), CLI-12-7, 75 NRC 379, 388, 389, 390 (2012)

reference to Fukushima Task Force Report recommendations alone, without facts or expert opinion that explain their significance for the unique characteristics of the sites or reactors that are the subject of the petitions, does not provide sufficient support for the common contention; LBP-12-18, 76 NRC 139 (2012)

Luminant Generation Co., LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), CLI-12-7, 75 NRC 379, 388-89 (2012)

any contention that falls outside the specified scope of the proceeding must be rejected; LBP-12-15, 76 NRC 26 (2012)
to warrant supplementation of the final environmental impact statement, new information must paint a seriously different picture of the environmental landscape; CLI-15-10, 81 NRC 543 n.32 (2015)

Luminant Generation Co., LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), CLI-12-7, 75 NRC 379, 388-91 (2012)

board determined that petitioners had failed to articulate factual basis for Fukushima-based NEPA dispute with specific application; CLI-12-15, 75 NRC 727 n.122 (2012)

Luminant Generation Co., LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), CLI-12-7, 75 NRC 379, 389 (2012)

as tangible Fukushima lessons emerge, Fukushima-related contentions in individual adjudications may become more plausible, except insofar as the NRC is taking generic steps to address them; LBP-12-18, 76 NRC 139, 145 (2012)

Luminant Generation Co., LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), CLI-12-7, 75 NRC 379, 390 & n.43 (2012)

petitioner who fails to provide sufficient factual or expert support for the claims in its contention in contravention of section 2.309(h)(1)(v) also may have failed to show a genuine dispute with the application as required under section 2.309(h)(1)(vi); LBP-12-15, 76 NRC 27 (2012)

Luminant Generation Co., LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), CLI-12-7, 75 NRC 379, 391 (2012)
general and unperticularized references to health and safety significance and material deficiencies in the environmental report would not satisfy the rule that contentions be pled with specificity; CLI-15-18, 82 NRC 146 n.53 (2015)

Luminant Generation Co., LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), CLI-12-7, 75 NRC 379, 391 & n.47 (2012)

petitioners’ proposed Fukushima contention was too vague for hearing under contention-admissibility rules and, as pleaded, lacked the kind of significance and potential for a different result that under the reopening rule would justify restarting already-closed hearings; CLI-12-11, 75 NRC 533 (2012)

Luminant Generation Co., LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), CLI-12-7, 75 NRC 379, 391-92 (2012)
an application-specific NEPA review represents a snapshot in time, and while NEPA requires that NRC conduct its environmental review with the best information available at the time, it does not
require that NRC wait until inchoate information matures into something that later might affect its review; CLI-12-11, 75 NRC 533 (2012)

final supplemental environmental impact statement is a snapshot in time of expected environmental consequences; CLI-15-6, 81 NRC 378 (2015)

NEPA requires that NRC Staff conduct its environmental review with the best information available when the review is undertaken; LBP-12-8, 75 NRC 554 (2012)

Luminant Generation Co., LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), CLI-12-7, 75 NRC 379, 392 (2012)

contention in a license renewal proceeding based on applicant’s failure to consider alleged new and significant information arising from NRC’s Fukushima Task Force Report was rejected; LBP-12-8, 75 NRC 558 (2012)

Luminant Generation Co., LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), LBP-11-4, 73 NRC 91, 128 (2011)

the licensing board chose to terminate the adjudications when faced with no pending contentions, but did not state that it was compelled to do so by Commission precedent or agency regulation; LBP-11-22, 74 NRC 285 (2011)

Luminant Generation Co., LLC (Comanche Peak Nuclear Power Plant, Units 3 and 4), LBP-11-36, 74 NRC 768, 771-72 (2011)

Fukushima-related contention based on a Staff Requirements Memorandum are inadmissible because the SRM does not define or impose any new requirements arising from the Fukushima accident and thus fails to establish a genuine dispute on a material issue of law or fact; LBP-11-37, 74 NRC 784 n.7 (2011)

court is hesitant to adopt an interpretation of a congressional enactment that renders superfluous another portion of that same law; LBP-12-19, 76 NRC 196 n.68 (2012)

Maine Yankee Atomic Power Co. (Maine Yankee Atomic Power Station), ALAB-161, 6 AEC 1003, 1007 (1973)

unless the safety findings prescribed by the Atomic Energy Act and the regulations can be made, the reactor does not obtain a license, no matter how badly it is needed; CLI-15-4, 81 NRC 232 (2015)

measures intended to strengthen an enforcement order issued under 10 C.F.R. 2.202 are not within the limited scope of the proceedings; CLI-13-2, 77 NRC 43 (2013)

if petitioner could avoid the Commission’s limitation on the scope of an enforcement order simply by characterizing its petition as opposing the order unless additional measures are granted, the Commission would never be able to limit its proceedings; LBP-12-14, 76 NRC 6 (2012)

petitioners who are proceeding pro se should be shown greater leeway on the question of whether they have demonstrated good cause for lateness than petitioners represented by counsel; LBP-11-33, 73 NRC 543 (2011)

petitioner argued against an enforcement order unless it were modified to clarify various points, including the costs of state and local law enforcement resources that would be needed to implement the order, but the board based its analysis on whether petitioner had shown that the requirements, as stated in the order, would make the facility less safe; CLI-13-2, 77 NRC 48 (2013)
LEGAL CITATIONS INDEX

CASES

whether and to what extent measures a state sought were needed to make the facility safer was essentially irrelevant because those additional measures were outside the scope of the enforcement order; CLI-13-2, 77 NRC 48 (2013)

NRC Staff must supply the board with precise and certain reasons for maintaining the confidentiality of requested documents; LBP-13-5, 77 NRC 242 (2013)

although petitioner’s participation may broaden or delay the proceeding, this factor may not be relied on to exclude a contention, because NRC has a duty to consider new and significant information that arises before it makes its licensing decisions; LBP-11-35, 74 NRC 738 (2011)

subject of postdecision supplemental environmental impact statements is not expressly addressed in NEPA; LBP-12-18, 76 NRC 161 (2012)

to reopen a record, petitioners must reveal a seriously different picture of the environmental impact of a proposed project; LBP-12-16, 76 NRC 57 (2012)

federal agencies must consider the likely environmental impacts of the preferred course of action as well as reasonable alternatives; LBP-12-17, 76 NRC 81 (2012)

hard look under NEPA is intended to foster both informed agency decisionmaking and informed public participation so as to ensure that the agency does not act upon incomplete information, only to regret its decision after it is too late to correct; LBP-11-26, 74 NRC 545 (2011); LBP-11-38, 74 NRC 831 (2011); LBP-12-5, 75 NRC 236 (2012); LBP-12-17, 76 NRC 82 (2012); LBP-13-13, 78 NRC 452 (2013); LBP-15-3, 81 NRC 81 (2015)

it would be incongruous with NEPA’s action-forcing purpose to allow an agency to put on blinders to adverse environmental effects, just because the EIS has been completed; LBP-12-1, 75 NRC 36 n.48 (2012); LBP-12-10, 75 NRC 680 n.69 (2012); LBP-15-13, 81 NRC 471 (2015)

NEPA requires federal agencies to pause before committing resources to a project and consider the likely environmental impacts of the preferred course of action as well as reasonable alternatives; LBP-12-18, 76 NRC 159 (2012); LBP-14-9, 80 NRC 40 (2014)

environmental implications of new and significant information must be considered under NEPA before NRC may grant renewed operating licenses; LBP-11-32, 74 NRC 663 (2011)

NEPA cases have generally required agencies to file environmental impact statements when the remaining governmental action would be environmentally significant; LBP-12-1, 75 NRC 37 n.48 (2012)

continued construction was barred pending the filing of an adequate environmental impact statement, notwithstanding the fact that the project was initially approved and construction commenced prior to the effective date of NEPA; LBP-12-1, 75 NRC 37 n.48 (2012)

even if severe accidents are not yet all conclusively understood, the environmental impacts of relicensing may affect the quality of the human environment in a significant manner or to a significant extent not already considered; LBP-11-23, 74 NRC 351 (2011)

agencies need not supplement an EIS every time new information comes to light after the EIS is finalized because it would render agency decisionmaking intractable; CL1-12-6, 75 NRC 376 n.146 (2012); LBP-11-28, 74 NRC 610 (2011); LBP-12-18, 76 NRC 162 (2012)

if, as part of its consideration of a rulemaking petition, NRC determines that there is new and significant information associated with the expedited-transfer issue that requires supplementation under NEPA, it can address any affected environmental analyses as needed and appropriately move forward with these proceedings in the meantime; CLI-14-7, 80 NRC 8 (2014)
requirement that NRC suspend its licensing decisions upon receipt of a claim of new and significant information would render its decisionmaking intractable; CLI-14-7, 80 NRC 8 (2014)
supplementing an environmental impact statement is not necessary unless new information presents a seriously different picture of the environmental impact of the proposed project from what was previously envisioned; CLI-11-5, 74 NRC 168 (2011); CLI-12-7, 75 NRC 388-89, 390-91 (2012); LBP-12-18, 76 NRC 141-42 (2012)

agency decisions regarding the need to supplement an environmental impact statement based on new and significant information are subject to the rule of reason; LBP-11-26, 74 NRC 536 n.13 (2011)

agency that has prepared an EIS cannot simply rest on the original document but must be alert to new information that may alter the results of its original environmental analysis, and continue to take a hard look at the environmental effects of its planned action, even after a proposal has received initial approval; LBP-12-18, 76 NRC 166 (2012)

NEPA does not require that NRC suspend its licensing decisions upon receipt of a claim of new and significant information; CLI-14-7, 80 NRC 8 (2014)

NEPA does not require that NRC wait until inchoate information matures into something that might affect its review; CLI-12-6, 75 NRC 376 (2012); CLI-12-15, 75 NRC 727 (2012)

NRC is required under NEPA to consider new and significant information in its environmental analyses; CLI-13-7, 78 NRC 210 (2013)

NRC rules enable it to supplement an EIS if, before a proposed action is taken, new and significant information comes to light that bears on the proposed action or its impacts; CLI-12-6, 75 NRC 376 n.147 (2012); CLI-12-7, 75 NRC 392 n.49 (2012)

the Fukushima accident does not significantly alter the overall environmental picture for severe reactor accidents at the site; CLI-12-15, 75 NRC 727 (2012)

agencies have discretion on the manner in which they determine whether information is new or significant to warrant supplementation of an environmental impact statement, including the application of its procedural rules; CLI-12-3, 75 NRC 140 n.42 (2012)

federal courts leave to an agency’s discretion the manner in which the agency determines whether information is new or significant to warrant supplementation of an environmental impact statement, including the application of its procedural rules; CLI-12-6, 75 NRC 364 n.57 (2012)

boards must consider environmental impacts that may affect the quality of the human environment in a significant manner or to a significant extent not already considered; LBP-12-1, 75 NRC 7 n.22 (2012)

if after preparation of the EIS, the agency is presented with new information or changed circumstances and there remains major federal action to occur, and if the new information is sufficient to show that the remaining action will affect the quality of the human environment in a significant manner or to a significant extent not already considered, a supplemental EIS must be prepared; CLI-13-7, 78 NRC 211 n.59 (2013); LBP-12-18, 76 NRC 161-62 (2012); LBP-15-16, 81 NRC 704 (2015)

NEPA does not require that the agency wait until inchoate information matures into something that later might affect its review; CLI-12-7, 75 NRC 392 (2012)

NEPA requires NRC to reevaluate any prior analysis if it is presented with any new and significant information that would cast doubt on a previous environmental analysis; LBP-12-8, 75 NRC 549-50 (2012)

NEPA requires that agencies take a hard look at the environmental effects of actions even after a proposal has received initial approval; LBP-15-16, 81 NRC 657 (2015)

NEPA requires that the agency take a hard look at environmental consequences of each agency action; LBP-13-4, 77 NRC 120 (2013)

NRC has a continuing duty to take a hard look at new and significant information for each major federal action to be taken; CLI-13-7, 78 NRC 216 (2013)

NRC Staff will incorporate any new SAMA-related information that it finds to be significant in the final supplemental EIS; CLI-13-7, 78 NRC 217 (2013)
agencies need not supplement an EIS every time new information comes to light after the EIS is finalized; CLI-12-7, 75 NRC 392 n.48 (2012)
NEPA requires that NRC conduct its review with the best information available at the time of the review; CLI-12-15, 75 NRC 727 (2012)

NEPA hard look must emerge from an engagement in informed and reasoned decisionmaking, as the agency obtains opinions from its own experts and experts outside the agency and gives careful scientific scrutiny and responds to all legitimate concerns that are raised; LBP-15-16, 81 NRC 637 n.98 (2015)

the fundamental purpose of the National Environmental Policy Act is to help public officials make decisions that are based on understanding of environmental consequences, and make decisions that protect, restore, and enhance the environment; LBP-11-23, 74 NRC 329 (2011)

risk of future harm as an injury must be both actual and imminent; LBP-14-4, 79 NRC 351 n.28 (2014)

Massachusetts v. NRC, 522 F.3d 115, 130 (1st Cir. 2008)
NEPA does not mandate how an agency must fulfill its obligations under the statute; LBP-11-23, 74 NRC 331 (2011)

Massachusetts v. NRC, 708 F.3d 63, 74 (1st Cir. 2013)
NRC will consider all comments on the draft supplemental EIS regardless of whether the comment is directed to impacts in Category 1 or 2; CLI-13-7, 78 NRC 216 n.96 (2013)

Massachusetts v. NRC, 708 F.3d 63, 75 n.18 (1st Cir. 2013)
agencies are permitted to impose requirements or thresholds for parties seeking to reopen a closed record; CLI-15-19, 82 NRC 156 (2015)

Massachusetts v. NRC, 708 F.3d 63, 78 (1st Cir. 2013)
NRC rules provide a mechanism for supplementing an original NEPA analysis, but the rules do not guarantee a hearing nor is a hearing necessary to satisfy NRC’s NEPA obligations; CLI-13-7, 78 NRC 211 n.62 (2013)

Massachusetts v. NRC, 708 F.3d 63, 81-82 (1st Cir. 2013)
requirement that NRC suspend its licensing decisions upon receipt of a claim of new and significant information would render its decisionmaking intractable; CLI-14-7, 80 NRC 8 (2014)

Massachusetts v. NRC, 878 F.2d 1516 (1st Cir. 1989)
Congress intentionally limited the opportunity for a hearing to certain designated agency actions which do not include exemptions; LBP-15-18, 81 NRC 797 n.20 (2015)

NRC approvals of plant restart and lifting suspensions did not trigger AEA § 189a hearing rights; CLI-15-14, 80 NRC 734 n.21 (2015)
exemptions do not actually modify the regulations because the ability to request an exemption is part of the regulations themselves; LBP-15-24, 82 NRC 103 n.227 (2015)

Massachusetts v. NRC, 878 F.2d 1516, 1520 (1st Cir. 1989)
NRC’s actions constitute de facto license amendment when they authorize licensee to engage in activities beyond the ambit of its original license; LBP-13-7, 77 NRC 332-33 n.39 (2013)

Massachusetts v. NRC, 878 F.2d 1516, 1521 (1st Cir. 1989)
NRC authorization to restart a plant following NRC Staff’s review of forty-seven ordered modifications is not a license amendment; LBP-15-27, 82 NRC 191 n.41 (2015)

Massachusetts v. NRC, 878 F.2d 1516, 1521-22 (1st Cir. 1989)
where NRC has temporarily exempted the licensee, on the basis of an existing rule, from one of many rules made generally applicable by the license does not amount to a license amendment; CLI-14-11, 80 NRC 174 n.35 (2014)
Massachusetts v. NRC, 924 F.2d 311, 333-36 (D.C. Cir. 1991)
parties were not permitted to raise issues or there was no opportunity for hearing on a particular
issue; LBP-11-20, 74 NRC 91 n.3 (2011)
Massachusetts v. NRC, 924 F.2d 311, 334 (D.C. Cir. 1990)
unfettered ability to file a late contention may significantly undermine the efficiency of a proceeding
even if the contention is based on newly discovered information; CLI-12-14, 75 NRC 700 (2012)
Massachusetts v. United States, 522 F.3d 115 (1st Cir. 2008)
severe accident mitigation alternatives analysis is a Category 2 issue and SAMAs must be considered
for all plants that have not considered such alternatives; LBP-12-8, 75 NRC 551 (2012)
Massachusetts v. United States, 522 F.3d 115, 129 (1st Cir. 2008)
there are places in NRC rules where “party” is used not as a term of art, but rather as a substitute for
“participant”; CLI-12-19, 76 NRC 387 n.55 (2012)
Massachusetts v. United States, 522 F.3d 115, 129-30 (1st Cir. 2008)
it makes more sense for NRC to study whether, as a technical matter, the agency should modify its
requirements relating to spent fuel storage for all plants than to litigate the issue in particular
adjudications; CLI-12-6, 75 NRC 357 (2012)
Massachusetts v. United States, 522 F.3d 115, 130 (1st Cir. 2008)
a brief stay of the close of a licensing proceeding was ordered to allow a state the opportunity to
request status as an interested governmental entity; CLI-12-6, 75 NRC 357 (2012)
federal courts leave to an agency’s discretion the manner in which the agency determines whether
information is new or significant to warrant supplementation of an environmental impact statement,
including the application of its procedural rules; CLI-12-6, 75 NRC 357 (2012)
remedy that makes even a small contribution to resolving a larger, more complex injury can still
support a standing claim; LBP-15-13, 81 NRC 466 (2015)
McClelland v. Andrus, 606 F.2d 1278 (D.C. Cir. 1979)
deliberative process privilege has been extended to draft documents, proposals, suggestions, instructions
to work deletions and alterations into drafts, instructions to conduct an investigation, documents
reflecting personal and advisory opinions, and rejections of recommendations; LBP-13-5, 77 NRC
239-40 (2013)
public officials are afforded a presumption of regularity in the discharge of their duties; LBP-14-2, 79
NRC 151 (2014)
McKinney v. Dole, 765 F.2d 1129, 1135 (D.C. Cir. 1985)
although it is risky for a nonmoving party to fail to proffer evidence in response to the summary
judgment movant’s showing, such a failure does not automatically mandate granting of the motion;
LBP-11-4, 73 NRC 100 n.16 (2011)
if summary judgment movant does not meet its burden, the nonmoving party is, without making any
showing, entitled to a denial of the motion; LBP-11-4, 73 NRC 100 n.16 (2011)
in assessing whether a summary judgment movant has met his or her burden, a court must view all
inferences to be drawn from underlying facts in the light most favorable to the party opposing the
motion; LBP-11-4, 73 NRC 99-100 n.16 (2011)
only when the summary judgment movant meets its burden is the nonmoving party required to proffer
evidence that contradicts the moving party’s showing and that proves the existence of a genuine
issue of material fact; LBP-11-4, 73 NRC 100 n.16 (2011)
summary judgment should be awarded only when the truth is quite clear; LBP-11-4, 73 NRC 100
n.16 (2011)
the record must show movant’s right to summary judgment with such clarity as to leave no room for
controversy, and must demonstrate that his opponent would not be entitled to prevail under any
discernible circumstances; LBP-11-4, 73 NRC 100 n.16 (2011)
McSpadden v. Mullins, 456 F.2d 428, 430 (8th Cir. 1972)
summary disposition, like summary judgment, is an extreme remedy that should be granted with
cautions; LBP-11-7, 73 NRC 263 (2011)
LEGAL CITATIONS INDEX

CASES

Menges v. Dentler, 33 Pa. 495, 500 (1859)
men naturally trust in their government, and ought to do so, and they ought not to suffer for it;
LBP-13-3, 77 NRC 96 n.68 (2013)

Meredith v. Fair, 305 F.2d 343, 344-45 (5th Cir. 1962)
to determine whether the record facts before it established the position being advocated, the court
looked beyond the record by indicating that what everybody knows, the court must know; LBP-14-1,
79 NRC 125 (2014)

Metropolitan Edison Co. (Three Mile Island Nuclear Station, Unit 1), ALAB-697, 16 NRC 1265, 1271
(1982)
applicant has the burden of providing reasonable assurance that the current licensing basis will be
maintained throughout the renewal period; LBP-15-5, 81 NRC 294 (2015)
licensee generally bears the ultimate burden of proof, but intervenors must give some basis for further
inquiry; LBP-15-5, 81 NRC 295 n.308 (2015)
regardless of the issuance of the license, the burden at hearing remains on applicant and, with respect
to NEPA compliance, on NRC Staff; CLI-15-17, 82 NRC 41 (2015)

Metropolitan Edison Co. (Three Mile Island Nuclear Station, Unit 1), ALAB-738, 18 NRC 177, 197 n.39
all parties, including NRC Staff, are obligated to bring any significant new information to the board’s
attention; LBP-14-2, 79 NRC 243 (2014)

Metropolitan Edison Co. (Three Mile Island Nuclear Station, Unit 1), CLI-80-16, 11 NRC 674, 675 (1980)
NRC case law has given meaning to the “special circumstances” requirement for rule waiver;
CLI-13-7, 78 NRC 207 (2013)

Metropolitan Edison Co. (Three Mile Island Nuclear Station, Unit 1), CLI-83-25, 18 NRC 327, 332 (1983)
traditional judicial standing concepts require a showing that the individual has suffered or might suffer
a concrete and particularized injury that is fairly traceable to the challenged action, likely redressible
by a favorable decision, and arguably within the zone of interests protected by the governing
statutes; LBP-11-2, 73 NRC 40 (2011)

Metropolitan Edison Co. (Three Mile Island Nuclear Station, Unit 1), CLI-85-9, 21 NRC 1118, 1122 (1985)
even if a site would not be totally evacuated, a fission product release from one unit would likely
contaminate the entire site, with the result that both units could be out of operation for years;

Metropolitan Edison Co. (Three Mile Island Nuclear Station, Unit 1), LBP-83-76, 18 NRC 1266, 1273
(1983), aff’d on other grounds, CLI-09-22, 70 NRC 932, 933 (2009)
when an NRC regulation permits use of a particular analysis, a contention asserting that a different
analysis or technique should be used is inadmissible because it indirectly attacks NRC’s regulations;

psychological fears or stigma effects are not cognizable NEPA claims; CLI-12-5, 75 NRC 336 n.207
(2012)

Metropolitan Edison Co. v. People Against Nuclear Energy, 460 U.S. 766, 772, 775 (1983)
agencies are responsible for taking a hard look at the project’s effect on safety as well as the
environment; LBP-12-18, 76 NRC 160-61 (2012)
impact of a proposed action on public safety is an issue that must be considered under National
Environmental Policy Act as well as the Atomic Energy Act; LBP-12-18, 76 NRC 138 (2012)

Metropolitan Edison Co. v. People Against Nuclear Energy, 460 U.S. 766, 774 (1983)
relationship between the uranium enrichment facility’s product and production of high-level waste is
too attenuated to show the requirement of a reasonably close causal relationship required by NEPA;
LBP-12-21, 76 NRC 243 (2012)

NEPA is not intended to encompass every possible impact, and does not encompass potential losses
due to individuals’ perception of a risk; CLI-12-15, 75 NRC 725 (2012)
petitioner’s assertion that continued operation of an independent spent fuel storage installation causes
fear and anxiety among its members is not a valid claim under NEPA; LBP-12-24, 76 NRC 523
(2012)
Michel A. Philippon (Denial of Senior Operator License Application), CLI-00-3, 51 NRC 82, 85 (2000)
NRC Staff cannot defend its decision on a basis inconsistent with its own informal review; LBP-14-2, 79 NRC 148 (2014)

Michel A. Philippon (Denial of Senior Operator License Application), LBP-99-44, 50 NRC 347, 358 (1999), rev’d on other grounds, CLI-00-3, 51 NRC 82 (2000)
applicants may prevail against NRC Staff if they prove that a particular contested assessment of a deficiency was inappropriate or unjustified; LBP-14-2, 79 NRC 150 (2014)

Michel A. Philippon (Denial of Senior Operator License Application), LBP-99-44, 50 NRC 347, 377 (1999), rev’d on other grounds, CLI-00-3, 51 NRC 82 (2000)
NRC Staff’s decision at the conclusion of its administrative reviews is the final Staff position and hence the only Staff position open to applicant to challenge before the presiding officer; LBP-14-2, 79 NRC 148 (2014)
silence is not a confession of error, nor can there be an implied confession of error; LBP-14-2, 79 NRC 149 n.75 (2014)

Michel A. Philippon (Denial of Senior Operator License Application), LBP-99-44, 50 NRC 347, 378 (1999), rev’d on other grounds, CLI-00-3, 51 NRC 82 (2000)
although NRC Staff is free to carry on internecine warfare, it is not free to wage it in an adjudicatory proceeding where all elements of the NRC Staff appear as a single party; LBP-14-2, 79 NRC 149 n.77 (2014)
NRC Staff may not take a position or assert facts before the presiding officer contrary to a matter decided by the appeal board (i.e., the Staff itself) on applicant’s informal appeal absent an explicit confession of error; LBP-14-2, 79 NRC 148 (2014)

Federal Energy Regulatory Commission approved the first privately owned, federally regulated regional transmission organization in the nation; LBP-12-15, 76 NRC 39 n.10 (2012)

the regional transmission organization provides transmission service under the terms and conditions of a single open access transmission tariff; LBP-12-15, 76 NRC 39 n.10 (2012)

regional transmission organization status was granted to provide open access to an electricity transmission system to all member utilities in 15 Midwestern states and one Canadian province; LBP-12-15, 76 NRC 39 n.10 (2012)

Midwest ISO Transmission Owners v. FERC, 373 F.3d 1361, 1365 (D.C. Cir. 2004)
member transmission providers are owners of transmission facilities, with the regional transmission organization exercising functional control over those facilities, calculating available transmission capability, and receiving, approving, and scheduling transmission service; LBP-12-15, 76 NRC 39 n.10 (2012)

Minnesota v. NRC, 602 F.2d 412, 417 (D.C. Cir. 1979)
petitioners challenged NRC’s approval of operating license amendments to allow for the use of higher-density spent fuel storage racks in the reactors’ spent fuel pools; CLI-15-4, 81 NRC 228 (2015)

Minnesota v. NRC, 602 F.2d 414, 412 (D.C. Cir. 1979)
court expressly declined to set aside or stay challenged license amendments, thus confirming that the court did not view the amendments to be contingent upon any additional safety determination under the Atomic Energy Act; CLI-15-4, 81 NRC 236-37 (2015)

Minnesota v. NRC, 602 F.2d 416-17 (D.C. Cir. 1979)
generic analyses of the environmental impacts of continued storage and disposal in the context of NRC reactor licensing proceedings are acceptable; CLI-15-4, 81 NRC 238 (2015)

Congress did not intend in enacting the Atomic Energy Act to require a demonstration that nuclear wastes could be safely disposed of before licensing of nuclear plants was permitted; CLI-15-4, 81 NRC 228-29 (2015)

Minnesota v. NRC, 602 F.2d 412, 412 (D.C. Cir. 1979)
court directed NRC to determine whether there is reasonable assurance that an offsite storage solution will be available by the end of a reactor’s license term, and if not, whether there is reasonable
assurance that the fuel can be stored safely at the sites beyond those dates; CLI-15-4, 81 NRC 229, 236 (2015)
court recognized the long-term nature of the concerns associated with spent fuel storage and disposal when it declined to vacate the license amendments that were the subject of the case, noting that doing so would effectively shut down the plants; CLI-15-4, 81 NRC 229 n.34 (2015)

**Mississippi Power & Light Co. (Grand Gulf Nuclear Station, Units 1 and 2), ALAB-130, 6 AEC 423, 426 (1973)**

boards do not adjudicate disputed facts at the contention admission stage; LBP-11-2, 73 NRC 45 (2011); LBP-11-13, 73 NRC 551 (2011); LBP-11-21, 74 NRC 125 (2011); LBP-12-8, 75 NRC 548 (2012)

petitioner is not required to set forth all its evidence or to prove its contentions at the admissibility stage; LBP-11-14, 73 NRC 609 (2011); LBP-12-17, 76 NRC 85 (2012)

**Mississippi River Basin Alliance v. Westphal, 230 F.3d 170, 176-77 (5th Cir. 2000)**

mitigation must be discussed in sufficient detail in an environmental impact statement to ensure that environmental consequences have been fairly evaluated; LBP-12-18, 76 NRC 159 (2012); LBP-14-9, 80 NRC 64-65 (2014)

**Mississippi River Basin Alliance v. Westphal, 230 F.3d 170, 177 (5th Cir. 2000)**

environmental impact statements must include a reasonably complete discussion of possible mitigation measures; LBP-12-18, 76 NRC 159 n.153 (2012)

**Mississippi River Basin Alliance v. Westphal, 230 F.3d 170, 178 (5th Cir. 2000)**

environmental impact statements must include a serious and thorough evaluation of environmental mitigation options; LBP-14-9, 80 NRC 64 (2014)

**Missouri Coalition for the Environment v. Federal Energy Regulatory Commission, 544 F.3d 955, 958 (8th Cir. 2008)**

reasonable foreseeability test for cumulative impacts is applied; LBP-14-6, 79 NRC 421 (2014)

Montalvo-Huertas v. Rivera-Cruz, 885 F.3d 971, 978-79 (1st Cir. 1989)

the Commission’s action in adopting new procedural rules meets the rational basis test; LBP-11-4, 73 NRC 125 n.147 (2011)

tribal member who regularly visits tribal migratory route on national monument land to pursue cultural undertakings has standing under NHPA to raise concerns; LBP-13-6, 77 NRC 277 n.12 (2013)

**Montana Wilderness Ass’n v. U.S. Department of Interior, 725 F.3d 988, 1005-06 (2013)**

Class III archeological survey involves a professionally conducted, pedestrian survey of an entire target area to identify properties that may be eligible for inclusion on the National Register of Historic Places; LBP-15-16, 81 NRC 653 (2015)

**Montclair Township v. Ramsdell, 107 U.S. 147, 152 (1883)**

courts must give effect, if possible, to every clause and word of a statute to avoid any construction that implies that the legislature was ignorant of the meaning of the language it employed; LBP-12-19, 76 NRC 277 n.12 (2013)

NEPA requires each agency to undertake research needed to adequately expose environmental harms; LBP-14-9, 80 NRC 62 n.207 (2014)

when petitioner obtains the relief it is seeking before the admissibility of its contention is resolved, the admissibility vel non of the contention is no longer justiciable, because it no longer presents a live controversy involving a true clash of interests that is susceptible to meaningful adjudicative relief; LBP-13-7, 77 NRC 345 n.59 (2013)

Moore v. Jackson, 123 F.3d 1082, 1086 (8th Cir. 1997)

summary disposition, like summary judgment, is an extreme remedy; LBP-11-7, 73 NRC 263 (2011)

Moreland v. United States, 270 F.2d 887, 890 (10th Cir. 1959)

in absence of objection, hearsay evidence is treated as being properly admitted and may be given such probative effect and value to which it is entitled; LBP-15-20, 81 NRC 859 n.184 (2015)

Morongo Band of Mission Indians v. Federal Aviation Administration, 161 F.3d 569, 574 (9th Cir. 1998)

for federal agencies that do not manage, control, or supervise Indian affairs, unless there is a specific duty that has been placed on the agency with respect to Indians, this responsibility is discharged by
the agency’s compliance with general regulations and statutes not specifically aimed at protecting Indian tribes; LBP-14-6, 79 NRC 429 (2014)

NRC’s trust responsibility does not impose a duty on the NRC to take action beyond complying with generally applicable statutes and regulations; LBP-14-6, 79 NRC 429 (2014)

Morris Communications, Inc. v. Federal Communications Commission, 566 F.3d 184, 191 (D.C. Cir. 2009) elements of a showing of estoppel against the government are described; LBP-12-16, 76 NRC 51 (2012)

Morrison v. Commissioner of Internal Revenue, 565 F.3d 658, 666 (9th Cir., 2009) when a third party who has no direct interest in the litigation pays fees on behalf of a taxpayer, the taxpayer incurs the fees so long as he assumes an absolute obligation to repay the fees or a contingent obligation to pay the fees in the event that he is able to recover them; LBP-11-8, 73 NRC 365 n.74 (2011)

Mt. Lookout-Mt. Nebo Property Protection Ass’n v. Federal Energy Regulatory Commission, 143 F.3d 165, 172-73 (4th Cir. 1998) agency’s consideration of three alternative routes is sufficient to meet its NEPA obligations to consider reasonable transmission line route alternatives; LBP-11-6, 73 NRC 208 (2010)

Muckleshoot Indian Tribe v. U.S. Forest Service, 177 F.3d 800, 805 (9th Cir. 1999) federal agency must confer with a State Historic Preservation Officer and seek the approval of the ACHP; LBP-15-16, 81 NRC 639 n.110 (2015)

Mullins v. TextAmerica, Inc., 564 F.3d 386, 410 n.10 (5th Cir. 2009) “credit facility” carries various definitions; CLI-13-1, 77 NRC 20 n.114 (2013) “revolving credit” arrangement is one type of credit facility, and may be used repeatedly up to the limit specified after partial or total repayments have been made; CLI-13-1, 77 NRC 20 n.114 (2013)

Murphy v. Hunt, 455 U.S. 478, 481 (1982) cases will be moot when the issues are no longer live, or the parties lack a cognizable interest in the outcome; CLI-13-9, 78 NRC 557 (2013)

National Audubon Society v. Hoffman, 132 F.3d 7, 17 (2d Cir. 1997) there is no assurance of a mitigation measure efficacy where the government conducted no study of its likely effects, proposed no monitoring to determine how effective the proposed mitigation would be, and did not consider alternatives in the event the measure fails; LBP-12-23, 76 NRC 469 n.152 (2012)

National Committee for the New River, Inc. v. Federal Energy Regulatory Commission, 373 F.3d 1323, 1330 (D.C. Cir. 2004) Fukushima accident does not significantly alter the overall environmental picture for severe reactor accidents at the site; CLI-12-15, 75 NRC 727 (2012) to warrant supplementation of the final environmental impact statement, new information must paint a seriously different picture of the environmental landscape; CLI-15-10, 81 NRC 543 (2015)

National Credit Union Administration v. First National Bank & Trust Co., 522 U.S. 479, 489 (1998) courts should not inquire whether there has been a congressional intent to benefit the would-be plaintiff; LBP-14-4, 79 NRC 355 (2014)

National Football League v. McBea & Bruno’s, Inc., 792 F.2d 726, 733 (8th Cir. 1986) injury that has never been the focus of a lawsuit cannot constitute irreparable harm; CLI-12-11, 75 NRC 531 n.39 (2012); LBP-15-2, 81 NRC 55 n.53 (2015)

National Labor Relations Board v. Bell Aerospace Co., Division of Textron, Inc., 416 U.S. 267, 293 (1974) administrative agencies are allowed to address issues of general applicability through rulemaking instead of individual adjudications, and the choice made between proceeding by general rule or by individual, ad hoc, litigation is one that lies primarily within the informed discretion of the administrative agency; LBP-14-16, 80 NRC 193 (2014)
LEGAL CITATIONS INDEX

CASES

agency has discretion to choose between rulemaking and adjudication; CLI-15-11, 81 NRC 549 n.19
(2015)

National Mining Association v. Mine Safety and Health Administration, 512 F.3d 696, 699 (D.C. Cir. 2008)
age agency is generally not required to issue a new notice of proposed rulemaking if it changes its
position, as long as the final rule is a logical outgrowth of the proposed rule; LBP-15-15, 81 NRC 611
(2015)

in determining whether an issue is ripe for judicial decision, a court must evaluate fitness of the
issues for judicial decision and hardship to the parties of withholding court consideration;
LBP-12-19, 76 NRC 199 (2012)

National Treasury Employees Union v. Federal Labor Relations Authority, 30 F.3d 1510, 1514 (D.C. Cir.
1994)
agencies can reach exactly the same result on a remanded issue as long as they rely on the correct
view of a law that they previously misinterpreted, or as long as they explain themselves better or
develop better evidence for their position; CLI-11-12, 74 NRC 469 n.20 (2011)

National Whistleblower Center v. NRC, 208 F.3d 256, 262 (D.C. Cir. 2002)
NRC possesses the authority to change its procedures on a case-by-case basis; CLI-13-8, 78 NRC 233
n.68 (2013)

cause of injury to intervention petitioner need not flow directly from the challenged action, but the
chain of causation must be plausible; CLI-15-25, 82 NRC 394 (2015)

National Wildlife Federation v. U.S. Forest Service, 861 F.2d 1114, 1117 (9th Cir. 1988)
in applying deliberative process privilege, courts have allowed the government to withhold memoranda
containing advice, opinions, recommendations, and subjective analysis; LBP-13-5, 77 NRC 239
(2013)
to qualify for deliberative process privilege, a document must be both predecisional or antecedent to
the adoption of agency policy and deliberative, meaning it must actually be related to the process by
which policies are formulated; LBP-13-5, 77 NRC 239 (2013)

Natural Resources Defense Council, Inc. v. Callaway, 524 F.2d 79, 88 (2d Cir. 1975)
environmental impact statements are required to furnish only such information as appears reasonably
necessary under the circumstances for evaluation of the project, rather than to be so
all-encompassing in scope that the task of preparing it would become either fruitless or well nigh
impossible; LBP-13-4, 77 NRC 211 (2013)

Natural Resources Defense Council, Inc. v. Callaway, 524 F.2d 79, 92-93 (2d Cir. 1975)
development and discussion of a wide range of alternatives to any proposed federal action is so
important that it is mandated by NEPA when any proposal involves unresolved conflicts concerning
alternative uses of available resources, and the requirement is independent of and of wider scope
than the duty to file an EIS; LBP-13-13, 78 NRC 285 (2013)

Natural Resources Defense Council, Inc. v. Callaway, 524 F.2d 79, 93-94 (2d Cir. 1975)
role of the final environmental impact statement is to expose the reasoning and data of the agency
proposing the action to scrutiny by the public and by other branches of the government; LBP-12-18,
76 NRC 179 (2012)

Natural Resources Defense Council, Inc. v. Environmental Protection Agency, 464 F.3d 1, 6 (D.C. Cir.
2006)
increases in risk can at times be injuries in fact sufficient to confer standing; LBP-14-4, 79 NRC 351
n.28 (2014)

2011)
guidance documents are, by nature, only advisory and need not apply in all situations and do not
themselves impose legal requirements on licensees; LBP-13-13, 78 NRC 283-84 (2013)
guidance documents do not have the force of law, but the Standard Review Plan for the Review of a
License Application for a Fuel Cycle Facility has benefitted from extensive consideration within the
agency, with which the Commission has never expressed disagreement; LBP-12-21, 76 NRC 237
(2012)

multiple projects are often deemed connected actions despite being undertaken by separate entities; LBP-14-9, 80 NRC 51 n.149 (2014)

for a mitigation analysis, NEPA demands no fully developed plan or detailed examination of specific measures that will be employed to mitigate adverse environmental effects; LBP-11-23, 74 NRC 330 (2011)

NEPA requires that an environmental review provide a sufficient discussion of alternatives to enable the decisionmaker to take a hard look at environmental factors, and to make a reasoned decision; LBP-11-13, 73 NRC 552 (2011)

NEPA should be construed in the light of reason if it is not to demand virtually infinite study and resources; LBP-13-4, 77 NRC 211 (2013)

there is no NEPA requirement to use the best scientific methodology, and NEPA should be construed in the light of reason if it is not to demand virtually infinite study and resources; LBP-15-3, 81 NRC 82 (2015)

final environmental impact statement does not comply with NEPA if it fails to meaningfully address EPA concerns in its decision; LBP-14-9, 80 NRC 51 n.152 (2014)

NEPA requires consideration of reasonable alternatives; CLI-12-8, 75 NRC 397 (2012)

NRC Staff is required to issue a final environmental impact statement that thoroughly and objectively evaluates reasonable alternatives to the proposed action; LBP-12-17, 76 NRC 113 (2012)

NEPA requires consideration of reasonable alternatives, not all conceivable ones; CLI-12-5, 75 NRC 338 (2012)

NEPA requires that agencies take a hard look at the environmental consequences of an action before proceeding; LBP-12-10, 75 NRC 643-44 (2012)

remote and speculative alternatives need not be addressed in a final environmental impact statement, but NEPA requires NRC Staff to consider reasonable alternatives that are likely to be available within the time frame of the proposed action; LBP-12-17, 76 NRC 115 (2012)

alternative energy sources that will be dependent on future environmental safeguards and technological developments may be excluded from the NEPA alternatives discussion; LBP-15-3, 81 NRC 104 (2015)

there is no NEPA requirement to use the best scientific methodology, and NEPA should be construed in the light of reason if it is not to demand virtually infinite study and resources; LBP-15-3, 81 NRC 82 (2015)

NEPA documents need consider only those environmental impacts that are reasonably foreseeable, not those that are remote and speculative possibilities; LBP-12-9, 75 NRC 623 (2012)

remote and speculative alternatives need not be addressed in an applicant’s environmental report; CLI-12-5, 75 NRC 340 (2012); LBP-11-2, 73 NRC 51 (2011)

Natural Resources Defense Council, Inc. v. NRC, 582 F.2d 166 (2d Cir. 1978)

Atomic Energy Act does not require NRC, as a precondition to issuing or renewing operating licenses for nuclear power plants, to make definitive findings concerning the technical feasibility of a repository for the disposal of spent nuclear fuel; CLI-15-4, 81 NRC 224 (2015)

Natural Resources Defense Council, Inc. v. NRC, 582 F.2d 166, 170 (2d Cir. 1978)

NRC’s long-continued regulatory practice of issuing operating licenses, with an implied finding of reasonable assurance that safe permanent disposal of spent nuclear fuel can be available when needed, is in accord with the intent of Congress underlying the Atomic Energy Act and Energy Reorganization Act; CLI-15-4, 81 NRC 236 (2015)
Natural Resources Defense Council, Inc. v. NRC, 582 F.2d 166, 170-71 (2d Cir. 1978)
Atomic Energy Act § 103 does not contemplate consideration of spent fuel disposal in NRC’s licensing decisions, and the Commission declines to infer from Congress’s silence an affirmative obligation to the contrary; CLI-15-4, 81 NRC 233 (2015)

Natural Resources Defense Council, Inc. v. NRC, 582 F.2d 166, 171 (2d Cir. 1978)
Atomic Energy Act does not, as a prerequisite to licensing, require a finding of reasonable assurance that highly hazardous and long-lived radioactive materials can be disposed of safely; CLI-15-4, 81 NRC 227 (2015)

Natural Resources Defense Council, Inc. v. NRC, 582 F.2d 166, 172 (2d Cir. 1978)
Atomic Energy Act does not, as a prerequisite to licensing, require a finding of reasonable assurance that highly hazardous and long-lived radioactive materials can be disposed of safely; CLI-15-4, 81 NRC 227 (2015)

it is fair to read the AEC and NRC history as a de facto acquiescence in and ratification of the Commission’s licensing procedure by Congress; CLI-15-4, 81 NRC 227 (2015)

Natural Resources Defense Council, Inc. v. NRC, 582 F.2d 166, 172 (2d Cir. 1978)
Congress expressly recognized and impliedly approved NRC’s regulatory scheme and practice under which the safety of interim storage of high-level wastes at commercial nuclear power reactor sites has been determined separately from the safety of government-owned permanent storage facilities that have not yet been established; CLI-15-4, 81 NRC 236 (2015)
if there were any doubt over the intent of Congress not to require a safety finding on spent fuel disposal, it was laid to rest by enactment of the Energy Reorganization Act of 1974; CLI-15-4, 81 NRC 228 (2015)

Natural Resources Defense Council, Inc. v. NRC, 582 F.2d 166, 175 (2d Cir. 1978)
NRC is not required to conduct a rulemaking proceeding or to withhold action on pending or future applications for nuclear power reactor operating licenses until it makes a determination that high-level radioactive wastes can be permanently disposed of safely; CLI-15-4, 81 NRC 233 (2015)

Natural Resources Defense Council, Inc. v. Thomas, 838 F.2d 1224, 1242 (D.C. Cir. 1988)
contrary rule on notice of proposed rulemaking would lead to the absurdity that the agency can learn from the comments on its proposed rules only at the peril of starting a new procedural round of commentary; LBP-15-15, 81 NRC 611 n.95 (2015)

Natural Resources Defense Council, Inc. v. U.S. Forest Service, 421 F.3d 797, 810-12 (9th Cir. 2005)
NEPA’s hard-look requirement does not allow sweeping generalities about possible effects and risk without a justification as to why more definitive information was not provided; LBP-13-13, 78 NRC 286 (2013)

Neighbors of Cuddy Mountain v. U.S. Forest Service, 137 F.3d 1372, 1380 (9th Cir. 1998)
NEPA need not undertake incorporation by reference of a generic environmental impact statement where the Commission has already taken public comment and performed a comprehensive analysis of the environmental consequences of continued spent fuel storage; CLI-15-10, 81 NRC 542 (2015)

New Jersey Coalition on Nuclear Pollution v. NRC, 582 F.2d 87, 93-94 (1st Cir. 1978)
environmental impact statements are effectively amended through the adjudicatory process; LBP-12-17, 76 NRC 83 (2012)
federal courts of appeal have approved of the process by which an environmental impact statement is effectively amended through the adjudicatory process; LBP-14-9, 80 NRC 67 (2014)
licensing board decision modifying a final environmental statement satisfies the spirit of the National Environmental Policy Act; CLI-15-6, 81 NRC 388 n.255 (2015)

New Jersey Department of Environmental Protection v. NRC, 561 F.3d 132, 136 (3d Cir. 2009)
prior environmental analyses need not be revisited in the environmental assessment; CLI-15-25, 82 NRC 404 (2015)

New Jersey Department of Environmental Protection v. NRC, 561 F.3d 132, 138-39 (3d Cir. 2009)
NEPA is not intended to encompass every possible impact, and does not encompass potential losses due to individuals’ perception of a risk; CLI-12-15, 75 NRC 725 (2012)
New Jersey Department of Environmental Protection v. NRC, 561 F.3d 132, 142-43 (3d Cir. 2009)
only those NRC-regulated facilities located within the Ninth Circuit’s jurisdictional boundaries are
required to conduct environmental analyses of possible terrorist acts; LBP-14-6, 79 NRC 428 (2014)

New Jersey Environmental Federation v. NRC, 645 F.3d 220, 224 (3d Cir. 2011)
license renewal safety review and any associated license renewal adjudicatory proceeding focus on the
detrimental effects of aging posed by long-term reactor operation; CLI-12-5, 75 NRC 303 (2012)

New Jersey Environmental Federation v. NRC, 645 F.3d 220, 232-33 (3d Cir. 2011)
courts of appeals have repeatedly approved NRC practice of closing the hearing record after resolution
of the last live contention, and of holding new contentions to the higher reopening standard;
CLI-11-14, 75 NRC 700, 701 (2012)
to accept the argument that a motion-to-reopen standard may never be applied in situations where a
petitioner seeks to add previously unlitigated material would effectively render the regulation
meaningless; CLI-12-3, 75 NRC 140 n.44 (2012)

New Jersey Environmental Federation v. NRC, 645 F.3d 220, 233 (3d Cir. 2011)
an exception for situations where parties seek to add previously unlitigated material would effectively
render the reopening regulation meaningless; CLI-12-10, 75 NRC 496 (2012)
NRC’s standard for motion to reopen has been upheld and court defers to NRC’s application of its
rules as long as it is reasonable; CLI-15-19, 82 NRC 156 n.21 (2015)

criteria for reopening a closed record may be exacting; CLI-15-19, 82 NRC 156 (2015)
evidence supporting a motion to reopen must be sufficiently compelling to suggest a likelihood of
materially affecting the ultimate results in the proceeding; CLI-12-10, 75 NRC 499 (2012)

New Jersey Environmental Federation v. NRC, No. 09-2567, 2011 WL 1878642, at *7 (3rd Cir. May 18,
2011)
licensing board’s ruling denying admission of a contention challenging an enhanced monitoring
program adopted by applicant because intervenor had not challenged the original unenhanced
monitoring program was reasonable and not an abuse of discretion; LBP-11-20, 74 NRC 98 (2011)

New Jersey Environmental Federation v. NRC, No. 09-2567, 2011 WL 1878642, at *9-10 (3rd Cir. May 18,
2011)
if a proceeding remains open only on a limited issue, intervenors must submit a motion to reopen to
address any genuinely new issues related to the license renewal application that previously could not
have been raised; LBP-11-20, 74 NRC 92 (2011)

New Jersey v. NRC, 526 F.3d 98, 102 (3d Cir. 2008)
although boards may give reasonable deference to NRC guidance, such agency guidance does not
substitute for regulations, is not binding authority, and does not prescribe NRC requirements;
LBP-11-16, 73 NRC 670, 674 (2011)
regulatory guidance is not binding on applicants; LBP-11-16, 73 NRC 661 (2011)

New Mexico ex rel. Richardson v. Bureau of Land Management, 565 F.3d 683, 703 (10th Cir. 2009)
NEPA requires federal agencies to pause before committing resources to a project and consider the
likely environmental impacts of the preferred course of action as well as reasonable alternatives;
LBP-12-17, 76 NRC 81 (2012); LBP-12-18, 76 NRC 159 (2012); LBP-14-9, 80 NRC 40 (2014)

New Mexico ex rel. Richardson v. Bureau of Land Management, 565 F.3d 683, 708 (10th Cir. 2009)
public comment periods are beneficial only to the extent the public has meaningful information on
which to comment; LBP-12-17, 76 NRC 122 (2012)
without substantive, comparative environmental impact information regarding other possible courses of
action, the ability of an environmental impact statement to inform agency deliberation and facilitate
public involvement would be greatly degraded; LBP-11-23, 74 NRC 331 (2011); LBP-12-17, 76
NRC 122 (2012)

New York State Department of Social Services v. Dublino, 413 U.S. 405, 419-20 (1973)
licensing boards should not interpret regulatory text in a way that would essentially negate the stated
purpose of the regulation or impute to the Commission an intent to create a schizophrenic rule;
LBP-14-7, 79 NRC 475-76 (2014)

New York v. NRC, 589 F.3d 551, 553 (2d Cir. 2009)
reissuance of a reactor license is a major federal action requiring an environmental review; LBP-12-8,
75 NRC 549 (2012); LBP-13-13, 78 NRC 272, 285 (2013)
LEGAL CITATIONS INDEX

CASES

New York v. NRC, 681 F.3d 471 (D.C. Cir. 2012)
Commission directed that licensing boards hold waste disposal contentions in abeyance pending further Commission order, which would be issued in conjunction with a then-to-be-determined agency response to the District of Columbia Circuit’s ruling; LBP-14-12, 80 NRC 139 (2014)
contention concerning need under NEPA to include a discussion of the environmental impacts of spent fuel pool leakage, SFP fires, and the lack of a spent fuel repository is held in abeyance; LBP-12-26, 76 NRC 581 n.124 (2012)
contentions based on the Waste Confidence Decision and Temporary Storage Rule are being held in abeyance; LBP-12-24, 76 NRC 506 (2012); LBP-14-8, 79 NRC 522 (2014)
NRC failed to comply with the National Environmental Policy Act in issuing its 2010 update to the Waste Confidence Decision and accompanying Temporary Storage Rule; CLI-12-16, 76 NRC 66 (2012); CLI-14-8, 80 NRC 74 (2014)
portions of NRC’s NEPA regulations under 10 C.F.R. Part 51 were invalidated; LBP-13-8, 78 NRC 15 (2013)
Waste Confidence Decision and Temporary Storage Rule were vacated and remanded; CLI-14-7, 80 NRC 9 (2014); CLI-15-11, 81 NRC 547 (2015); CLI-15-12, 81 NRC 551 (2015); CLI-15-13, 81 NRC 562 (2015)
New York v. NRC, 681 F.3d 471, 473 (D.C. Cir. 2012)
regarding waste confidence, NRC failed to comply with the National Environmental Policy Act in issuing its 2010 update to the Waste Confidence Decision and accompanying Temporary Storage Rule; CLI-14-3, 79 NRC 33 (2014)
New York v. NRC, 681 F.3d 471, 481-82 (D.C. Cir. 2012)
in its Waste Confidence Decision, NRC failed to consider environmental impacts of a repository never becoming available, its analysis of spent fuel pool leaks was not forward-looking, and it had not sufficiently considered the consequences of spent fuel pool fires; CLI-15-4, 81 NRC 229-30 (2015)
New York v. NRC, 681 F.3d 471, 473-74 (D.C. Cir. 2012)
NRC’s Waste Confidence Decision Update and Temporary Storage Rule were invalidated because there was not even a prospective site for a repository, let alone progress toward the actual construction of one; LBP-14-16, 80 NRC 189 (2014)
New York v. NRC, 681 F.3d 471, 476 (D.C. Cir. 2012)
alternatively to preparing an environmental impact statement, NRC can conduct an environmental assessment and make a finding of no significant impact; LBP-13-13, 78 NRC 272 n.79 (2013)
NEPA requires federal agencies such as NRC to examine and report on the environmental consequences of their actions; LBP-13-13, 78 NRC 272 (2013)
New York v. NRC, 681 F.3d 471, 478 (D.C. Cir. 2012)
in light of the dim prospects for moving forward with a geologic repository in the contemporary political environment, NRC must consider the environmental effects of storing waste in spent fuel pools or casks for extended periods; LBP-12-24, 76 NRC 509 n.22 (2012)
New York v. NRC, 681 F.3d 471, 478, 481-82 (D.C. Cir. 2012)
NRC must include an evaluation of failure to secure permanent disposal, as well as an improved analysis of spent fuel pool leaks and spent fuel pool fires; CLI-14-8, 80 NRC 76 n.14 (2014)
New York v. NRC, 681 F.3d 471, 478, 483 (D.C. Cir. 2012)
NRC’s Waste Confidence Rule concerning storage and disposal of high-level waste is vacated and the issue remanded to the Commission to generate either a generic analysis that is forward looking and has enough breadth to the support the Commission’s conclusions or a site-specific environmental impact statement in all relevant proceedings; LBP-13-13, 78 NRC 270 (2013)
New York v. NRC, 681 F.3d 471, 480 (D.C. Cir. 2012)
comprehensive generic analysis may be used to evaluate onsite risks that are essentially common to all plants, as long as NRC provides the opportunity for concerned parties to raise site-specific differences at the time of a specific site’s licensing; LBP-12-18, 76 NRC 177 (2012)
generic analyses of the environmental impacts of continued storage and disposal in the context of NRC reactor licensing proceedings are acceptable; CLI-15-4, 81 NRC 238 (2015); LBP-14-16, 80 NRC 197 n.90 (2014)
NRC’s longstanding practice of considering environmental issues through general rulemaking in appropriate circumstances has been endorsed by higher courts; LBP-12-18, 76 NRC 177 (2012)
LEGAL CITATIONS INDEX

CASES

New York v. NRC, 681 F.3d 471, 480-81 (D.C. Cir. 2012) whether the NEPA analysis is generic or site-by-site, it must be thorough and comprehensive; LBP-12-18, 76 NRC 178 (2012)

New York v. NRC, 681 F.3d 471, 481 (D.C. Cir. 2012) merely pointing to a government compliance program is insufficient to demonstrate compliance with NEPA’s requirement that agencies take a hard look at the environmental consequences of their proposed actions; LBP-12-23, 76 NRC 468 (2012)

merely pointing to the compliance program is in no way sufficient to support a scientific finding that spent fuel pools will not cause a significant environmental impact during the extended storage period; LBP-13-4, 77 NRC 217 n.94, 221 n.101 (2013); LBP-14-9, 80 NRC 64 (2014)

NRC Staff’s reliance in an environmental impact statement on predicted future monitoring and regulatory compliance program to prevent environmental impacts is not permitted; LBP-14-9, 80 NRC 69 (2014)

New York v. NRC, 681 F.3d 471, 482 (D.C. Cir. 2012) agency conducting a NEPA analysis must examine both the probability of a given harm occurring and the consequences of that harm if it does occur; CLI-15-6, 81 NRC 379 (2015)

only if the harm in question is so remote and speculative as to reduce the effective probability of its occurrence to zero may the agency dispense with the consequences portion of its environmental analysis; CLI-15-6, 81 NRC 379 (2015); LBP-13-13, 78 NRC 541-42 (2013)

primary responsibility for compliance with NEPA lies with NRC; LBP-12-12, 75 NRC 780 (2012); LBP-14-9, 80 NRC 69 (2014)

New York v. NRC, 681 F.3d 471, 483 (D.C. Cir. 2012) NRC’s current rule concerning the storage and disposal of high-level waste was remanded to the Commission to generate either a generic analysis that is forward looking and has enough breadth to support the Commission’s conclusions or site-specific environmental impact statements in all relevant proceedings; LBP-12-21, 76 NRC 242 (2012)

remand was based solely on the court’s finding that NRC did not satisfy its obligations under NEPA; CLI-15-4, 81 NRC 236 (2015)

Temporary Storage Rule governing the storage and disposal of spent nuclear fuel was vacated; LBP-14-15, 80 NRC 154 (2014); LBP-15-1, 81 NRC 21 (2015)

Newton County Wildlife Association v. Rogers, 141 F.3d 803, 810-11 (8th Cir. 1998) if an agency determines that a particular action will have no effect on an endangered or threatened species, the consultation requirements are not triggered; LBP-12-10, 75 NRC 671 (2012)

NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-12-5, 75 NRC 301, 307 (2012), petition for review denied sub nom. Beyond Nuclear v. NRC, 704 F.3d 12 (1st Cir. 2013) absence of a prohibition is not sufficient justification to admit a contention; CLI-15-23, 82 NRC 326 (2015)

Commission generally defers to board contention admissibility rulings in the absence of an error of law or abuse of discretion; CLI-12-19, 76 NRC 379-80 (2012)

contentions shall not be admitted if at the outset they are not supported by some alleged fact or facts demonstrating a genuine material dispute; LBP-12-8, 75 NRC 561 (2012)

in 1989, NRC revised its rules to prevent the admission of poorly defined or supported contentions; CLI-12-8, 75 NRC 396 (2012)

NRC deliberately raised the admission standards for contentions to obviate serious hearing delays caused in the past by poorly defined or poorly supported contentions; LBP-15-1, 81 NRC 38 (2015)

NRC’s hearing process is reserved for genuine, material controversies between knowledgeable litigants; CLI-12-8, 75 NRC 416 (2012)

NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-12-5, 75 NRC 301, 309-11 (2012) later revisions to license renewal application that bring the plant into compliance with GALL-2 have generally been deemed acceptable; LBP-13-13, 78 NRC 284 (2013)

NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-12-5, 75 NRC 301, 310-11 (2012), petition for review denied sub nom. Beyond Nuclear v. NRC, 704 F.3d 12 (1st Cir. 2013) intervenors’ requests for more testing, more methods of testing, and more information, without an explanation of why the current program is inadequate, are not sufficient to create a genuine dispute with a license renewal application; LBP-15-1, 81 NRC 41 n.150 (2015)
contentions calling for requirements in excess of those imposed by NRC regulations will be rejected as a collateral attack on the regulations; LBP-15-4, 81 NRC 167 n.64 (2015)  
NRC Staff guidance is entitled to special weight in a decision on the merits; LBP-15-20, 81 NRC 847 (2015)  
reference to an aging management plan in the GALL Report does not insulate that program from challenge in litigation; LBP-13-13, 78 NRC 283 n.165 (2013)  
NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-12-5, 75 NRC 301, 315 (2012)  
contention that seeks to impose a requirement beyond those imposed by a Commission regulation is inadmissible; LBP-15-26, 82 NRC 175 n.22 (2015)  
NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-12-5, 75 NRC 301, 318-19 & n.108 (2012)  
contention is inadmissible where arguments and expert testimony are copied, largely without change, from another proceeding and fail to offer information specific to the challenged license renewal application; CLI-15-6, 81 NRC 355-56 (2015)  
NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-12-5, 75 NRC 301, 320 (2012)  
applicability of a guidance document may be challenged in an individual proceeding; LBP-15-20, 81 NRC 847 n.100 (2015)  
NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-12-5, 75 NRC 301, 322 (2012)  
severe accident mitigation alternatives analyses are conducted for the purposes of the NRC’s environmental review under NEPA and are not safety analyses; CLI-15-18, 82 NRC 139 n.16 (2015)  
NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-12-5, 75 NRC 301, 322-24 (2012)  
it must be genuinely plausible that revising the severe accident mitigation alternatives analysis would change the outcome so that one or more of the SAMA candidates that applicant evaluated and rejected would become cost-beneficial; LBP-15-5, 81 NRC 270, 276 (2015)  
NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-12-5, 75 NRC 301, 322-37 (2012)  
petitioner may raise a SAMA-related contention in a license renewal adjudication if it satisfies the general contention admissibility criteria in section 2.309(f)(1); CLI-13-7, 78 NRC 211 (2013)  
NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-12-5, 75 NRC 301, 323 (2012)  
contentions admitted for litigation must point to a deficiency in the application, and not merely suggest other ways an analysis could have been done or other details that could have been included; CLI-13-7, 78 NRC 216 n.93 (2013); CLI-15-18, 82 NRC 143 n.42 (2015)  
given the quantitative nature of the severe accident mitigation alternatives analysis, where the analysis rests largely on selected inputs, it may always be possible to conceive of alternative and more conservative inputs whose use in the analysis could result in greater estimated accident consequences; LBP-13-13, 78 NRC 453-54 (2013)  
proper question is not whether there are plausible alternative choices for use in a severe accident mitigation alternatives analysis, but whether the analysis that was done is reasonable under NEPA; CLI-12-8, 75 NRC 406 (2012); CLI-13-7, 78 NRC 216 n.93 (2013); LBP-13-13, 78 NRC 287, 454, 474, 486 (2013); LBP-15-29, 82 NRC 250 (2015)  
severe accident mitigation alternatives analysis issues can present difficult judgment calls at the contention admissibility stage; LBP-15-5, 81 NRC 261 (2015)  
simply because alternative inputs could be used does not demonstrate that the original inputs to the severe accident mitigation alternatives analysis were unreasonable; LBP-13-13, 78 NRC 454 (2013) to be successful, intervenor must point to a deficiency that renders the severe accident mitigation alternatives analysis unreasonable under NEPA; LBP-13-13, 78 NRC 454 (2013) unless it looks genuinely plausible that inclusion of an additional factor or use of other assumptions and models may change the cost-benefit conclusions for the severe accident mitigation alternatives candidates evaluated, no purpose would be served to further refine the SAMA analysis; LBP-15-5, 81 NRC 261 (2015)  

NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-12-5, 75 NRC 301, 323-24 (2012)  
contention proposing alternative inputs or methodologies for severe accident mitigation alternatives analysis must present some factual or expert basis for why the proposed changes in the analysis are warranted; CLI-12-8, 75 NRC 407 (2012); LBP-12-26, 76 NRC 565 (2012)
generalized reference to the potential human and economic costs from an accident falls short of the support necessary for a severe accident mitigation alternatives contention; CLI-15-18, 82 NRC 143 (2015)

petitioners must provide a nexus between its concerns and any deficiencies in applicant’s SAMA analysis, which would be necessary to establish a genuine dispute for an admissible contention; CLI-15-18, 82 NRC 141 (2015)

NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-12-5, 75 NRC 301, 323-24, 329 (2012)
petitioner need not rerun applicant’s own cost-benefit calculations, but must do more than merely suggest that additional factors be evaluated or that different analytical techniques be used; LBP-15-5, 81 NRC 261 (2015)

petitioner that fails to provide sufficient factual or expert support for the claims in its contention in contravention of section 2.309(f)(i)(v), also may have failed to show a genuine dispute with the application as required under section 2.309(f)(i)(v); LBP-15-1, 81 NRC 38 n.124 (2015)

although a standard review plan lacks the legal force of regulations, it is to be given special weight as a guidance document that has been approved by the Commission but is nonbinding guidance; LBP-14-3, 79 NRC 279, 307 (2014)

NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-12-5, 75 NRC 301, 338-43 (2012), petition for review filed sub nom. Beyond Nuclear v. NRC, No. 12-1561 (1st Cir. May 7, 2012)

for an electrical generation alternative to qualify for in-depth review, the alternative must be able to provide 1190 MWe of baseload power during the license renewal term; LBP-12-15, 76 NRC 38 (2012)
LEGAL CITATIONS INDEX

CASES

NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-12-5, 75 NRC 301, 339 (2012)
final environmental impact statements need not discuss remote and speculative alternatives, but must consider only alternatives that bring about the ends of the proposed project; LBP-12-17, 76 NRC 113 (2012)

NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-12-5, 75 NRC 301, 339 n.223 (2012),
petition for review filed sub nom. Beyond Nuclear v. NRC, No. 12-1561 (1st Cir. May 7, 2012)
“baseload power” is defined as power generating energy intended to continuously produce electricity at or near full capacity, with high availability; LBP-12-15, 76 NRC 37 (2012)

NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-12-5, 75 NRC 301, 340-42 (2012)
scope of the energy alternatives analysis is discussed; CLI-12-8, 75 NRC 397 (2012)

NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-12-5, 75 NRC 301, 341 (2012),
petition for review filed sub nom. Beyond Nuclear v. NRC, No. 12-1561 (1st Cir. May 7, 2012)
admissible contention challenging consideration of alternatives must show that a particular alternative was not discussed in the draft environmental impact statement and provide some support that the alternative is reasonable; LBP-13-9, 78 NRC 89 (2013)
environmental reports for license renewal must address environmental impacts of the proposed action and compare those impacts to the impacts of alternative actions, but need only consider those alternatives that are reasonable; LBP-12-15, 76 NRC 36-37 (2012)
NEPA requires a hard look at the environmental effects of the planned action, not a circular restatement of NRC Staff’s own conclusions; LBP-15-11, 81 NRC 422-23 (2015)
to be successful, intervenors must demonstrate with adequate support that NRC Staff failed to take a hard look at important environmental questions or failed to provide a reasonable analysis; LBP-13-13, 78 NRC 286 (2013)

NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-12-5, 75 NRC 301, 342 (2012),
petition for review filed sub nom. Beyond Nuclear v. NRC, No. 12-1561 (1st Cir. May 7, 2012)
a reasonable energy alternative is one that is currently commercially viable, or will become so in the near term; CLI-12-8, 75 NRC 397 (2012)
discussion necessary to support a NEPA alternatives contention in a reactor license renewal proceeding is compared with that for a Part 52 combined license proceeding; LBP-12-15, 76 NRC 39 n.10 (2012)
NEPA requires that the agency take a hard look at environmental consequences of each agency action; LBP-13-4, 77 NRC 120 (2013)
to challenge an energy alternatives analysis, petitioner ordinarily must provide alleged facts or expert opinion sufficient to raise a genuine dispute as to whether the best information available today suggests that a commercially viable alternative technology (or combination of technologies) is available now, or will become so in the near future, to supply baseload power; CLI-12-8, 75 NRC 397 (2012)

NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-12-5, 75 NRC 301, 342 & n.245 (2012),
petition for review filed sub nom. Beyond Nuclear v. NRC, No. 12-1561 (1st Cir. May 7, 2012)
demonstration that an alternative energy technology, although not commercially viable at the time of the application, is under development for large-scale use and is likely to be available during the period of extended operation has not been made; LBP-12-15, 76 NRC 39 n.10 (2012)
possibility of an energy alternatives contention with respect to a technology that is likely to be available during the period of extended operation is not excluded; CLI-12-8, 75 NRC 398 n.27 (2012)

NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-12-5, 75 NRC 301, 342-43 (2012),
petition for review denied sub nom. Beyond Nuclear v. NRC, 704 F.3d 12 (1st Cir. 2013)
intervenors fail to specify what other alternatives to the license renewal application should be discussed in the draft supplemental environmental impact statement, much less show that any proposed alternative would satisfy the purpose of the applicant’s proposed action; LBP-15-1, 81 NRC 42 (2015)

NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-12-5, 75 NRC 301, 342-44 (2012),
petition for review filed sub nom. Beyond Nuclear v. NRC, No. 12-1561 (1st Cir. May 7, 2012)
any contention that fails to directly controvert the application or that mistakenly asserts the application does not address a relevant issue will be dismissed; LBP-12-15, 76 NRC 27 (2012)
NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-12-5, 75 NRC 301, 348 (2012)
board may not supply its own bases for a contention; CLI-15-17, 82 NRC 46-47 (2015)
NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), CLI-13-3, 77 NRC 51, 54-55 (2013)
rejection of contention, where petitioner has other contentions pending for hearing does not constitute
serious and irreparable harm or affect the structure of the proceeding in a pervasive or unusual
manner; CLI-15-17, 82 NRC 37 n.24, 44 (2015)
NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), LBP-11-2, 73 NRC 28, 41 n.54 (2011)
boards have an independent obligation to determine whether petitioners meet the threshold criterion for
intervention even if their standing is uncontested; LBP-12-24, 76 NRC 507 (2012)
NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), LBP-11-2, 73 NRC 28, 47, 53 (2011)
at the contention admission stage, it is sufficient for petitioners to proffer some minimal factual
support for their contention; LBP-11-13, 73 NRC 564 (2011)
NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), LBP-11-2, 73 NRC 28, 47, 62 (2011)
the materiality standard requires only that petitioners provide sufficient information to show that, if
their proposed refinements were incorporated, it is genuinely plausible that cost-benefit conclusions
might change; LBP-11-13, 73 NRC 580 (2011)
NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), LBP-11-2, 73 NRC 28, 51 (2011)
NEPA requires that alternatives be considered as they exist and are likely to exist, not merely as they
exist at the present time; LBP-12-17, 76 NRC 115 (2012)
NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), LBP-11-2, 73 NRC 28, 53-56 (2011)
affidavit supporting motion to reopen renders contention admissible; LBP-11-20, 74 NRC 102 n.59
(2011)
NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), LBP-11-28, 74 NRC 604 (2011)
Fukushima-related contentions were dismissed as premature; LBP-11-39, 74 NRC 870 (2011)
NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), LBP-11-28, 74 NRC 604, 606-07 (2011)
admissibility of Fukushima-related contentions is determined; LBP-11-37, 74 NRC 779 n.3 (2011)
NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), LBP-11-28, 74 NRC 604, 609 (2011)
petitioner has not provided a potentially plausible case that the Task Force findings and
recommendations on the Fukushima accident will paint a seriously different picture of the
environmental impacts; LBP-11-32, 74 NRC 671 (2011)
NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), LBP-11-28, 74 NRC 604, 609-10 (2011)
intervenor’s challenge to NRC’s compliance with NEPA in light of the NRC’s Fukushima Task Force
Report is premature; LBP-11-33, 74 NRC 681-82 (2011)
NextEra Energy Seabrook, LLC (Seabrook Station, Unit 1), LBP-11-28, 74 NRC 610 & n.35 (2011)
in the future the Commission might provide relevant guidance regarding the proper time frame for
adjudicating Fukushima-related contentions; LBP-11-39, 74 NRC 871 n.42 (2011)
equal protection principles require that all persons similarly situated shall be treated alike; LBP-11-15,
73 NRC 639 n.20 (2011)
Niagara Mohawk Power Corp. (Nine Mile Point Nuclear Station, Unit 2), ALAB-264, 1 NRC 347, 365
(1975)
inherent in any forecast of future electric power demands is a substantial margin of uncertainty;
LBP-11-6, 73 NRC 219-20 (2010)
Niagara Mohawk Power Corp. (Nine Mile Point Nuclear Station, Unit 2), ALAB-264, 1 NRC 347, 365-66
(1975)
forecasting of need for power is inherently uncertain; LBP-11-6, 73 NRC 222 (2010)
Niagara Mohawk Power Corp. (Nine Mile Point Nuclear Station, Unit 2), ALAB-264, 1 NRC 347, 365-68
(1975)
because a need-for-power assessment necessarily entails forecasting power demands in light of
substantial uncertainty and the duty of providing adequate and reliable service to the public,
need-for-power assessments are properly conservative; LBP-11-7, 73 NRC 283 (2011); LBP-12-5, 75
NRC 238 (2012)
Niagara Mohawk Power Corp. (Nine Mile Point Nuclear Station, Unit 2), ALAB-264, 1 NRC 347, 366-67
(1975)
need-for-power forecasts are required only to be reasonable; LBP-12-5, 75 NRC 237 (2012)
LEGAL CITATIONS INDEX

CASES

regardless of whether NRC itself conducts the need-for-power assessment or relies on another agency’s forecasts and studies, that assessment need only be reasonable; LBP-11-7, 73 NRC 283 (2011)

Niagara Mohawk Power Corp. (Nine Mile Point Nuclear Station, Units 1 and 2), CLI-99-30, 50 NRC 333, 345 (1999)

any discretionary diversion from the usual Subpart M procedural track will be rare, requiring extraordinary and unusual circumstances, and all requests to date to provide a non-Subpart M hearing in a license transfer case have been denied; CLI-14-5, 79 NRC 260 n.31 (2014)

when promulgating Subpart M, the Commission was well aware that most license transfer issues would be financial in nature; CLI-14-5, 79 NRC 260 n.32 (2014)

plain language of enacted text is the best indicator of intent; LBP-14-4, 79 NRC 348 (2014)

Norfolk Southern Corp. v. Oberly, 632 F. Supp. 1225, 1243 (D. Del. 1986), aff’d on other grounds, 822 F.2d 3888 (3d Cir. 1987)

summary disposition is particularly inappropriate when a licensing board is presented with conflicting expert testimony, for at that stage of a proceeding it is not the role of licensing boards to untangle the expert affidavits and decide which experts are more correct; LBP-11-7, 73 NRC 263 (2011); LBP-11-14, 73 NRC 595 (2011)

North Alabama Express, Inc. v. United States, 585 F.2d 783, 786 (5th Cir. 1978)

boards may not rely on a Federal Register notice to put petitioner on constructive notice of a requirement that the board itself cannot discern in the regulations; LBP-13-3, 77 NRC 97 (2013)

North Atlantic Energy Service Corp. (Seabrook Station, Unit 1), CLI-98-24, 48 NRC 267, 268-69 (1998)

with license’s withdrawal of license amendment request, the proceeding is moot; CLI-13-10, 78 NRC 568 (2013)

North Atlantic Energy Service Corp. (Seabrook Station, Unit 1), CLI-98-24, 48 NRC 267, 269 (1998)

stare decisis is not implicated where the board decision is unreviewed and therefore not binding on future tribunals, but as a prudential matter, the Commission vacates such decisions when appellate review is cut short by mootness; CLI-13-9, 78 NRC 558-59 (2013)

North Atlantic Energy Service Corp. (Seabrook Station, Unit 1), CLI-99-6, 49 NRC 201, 217 n.8 (1999)

intervention petitioner may not attack generic NRC requirements or regulations or express generalized grievances about NRC policies; CLI-15-9, 81 NRC 527-28 n.98 (2015)

North Atlantic Energy Service Corp. (Seabrook Station, Unit 1), CLI-99-6, 49 NRC 201, 219 (1999)

at the contention pleading stage, parties must come forward with sufficiently detailed grievances to allow a board to conclude that genuine disputes exist justifying a commitment of adjudicatory resources; LBP-11-21, 74 NRC 133 (2011)

North Atlantic Energy Service Corp. (Seabrook Station, Unit 1), CLI-99-6, 49 NRC 201, 223 (1999)

petitioner lacked good cause for a hearing request filed 7 days after the filing deadline when the argument relied on a misimpression of due dates; LBP-11-9, 73 NRC 622 n.46 (2011)

projects that are not connected actions, but are physically related to the system, are cumulative actions and are subject to an examination of cumulative impacts; LBP-14-6, 79 NRC 422 (2014)

Northeast Nuclear Energy Co. (Millstone Nuclear Power Station, Unit 2), LBP-92-28, 36 NRC 202, 213 (1992)

even if an import or export license authorized possession and/or use of the low-level radioactive waste, the petition does not assert how the LLRW is a significant source of radiactivity or provide any scenario in which the import or export of the LLRW would result in an accident that could produce obvious offsite consequences; CLI-11-3, 73 NRC 622 n.46 (2011)

Northeast Nuclear Energy Co. (Millstone Nuclear Power Station, Unit 3), CLI-00-25, 52 NRC 355, 357 (2000)

boards are in a better position than the Commission to consider any expert affidavit or affidavits that petitioner submits to support its motion to reopen; CLI-12-14, 75 NRC 702 n.64 (2012)
Northeast Nuclear Energy Co. (Millstone Nuclear Power Station, Unit 3), CLI-00-25, 52 NRC 355, 357 n.3 (2000)

after a petition to review a final order has been filed with the Commission, the board no longer has
jurisdiction to consider a motion to reopen and the motion is properly filed with the Commission;
CLI-12-14, 79 NRC 701 n.60 (2012)

Northeast Nuclear Energy Co. (Millstone Nuclear Power Station, Unit 3), CLI-01-10, 53 NRC 355, 361 (2001)

interpretation of regulations, like interpretation of a statute, begins with the language and structure of
the provisions, and the entirety of each provision must be given effect; LBP-14-7, 79 NRC 473 (2014)

Northeast Nuclear Energy Co. (Millstone Nuclear Power Station, Unit 3), CLI-12-14, 75 NRC 701 n.60 (2012)

interpretation of regulations, like interpretation of a statute, begins with the language and structure of
the provisions, and the entirety of each provision must be given effect; LBP-14-7, 79 NRC 473 (2014)

Northern Alaska Environmental Center v. Kempthorne, 457 F.3d 969, 978 (9th Cir. 2006)

under NEPA, an agency need not discuss alternatives that are infeasible, ineffective, or inconsistent
with the basic policy objectives for the management of the area; LBP-13-9, 78 NRC 88 (2013)

Cir. 1994)

to avoid a finding of arbitrary and capricious agency action, NRC Staff may not depart from its
established policies, procedures, and practices without a reasonable explanation for the change;
LBP-14-2, 79 NRC 150 n.87 (2014)

Northern Indiana Public Service Co. (Bailly Generating Station, Nuclear-1), ALAB-224, 8 AEC 244, 250
(1974)

if a party fails to file an answer or pleading within the time prescribed in 10 C.F.R. Part 2 or as
specified in the notice of hearing or pleading, to appear at a hearing or prehearing conference, to
comply with any prehearing order entered by the presiding officer, or to comply with any discovery
order entered by the presiding officer, the Commission or the presiding officer may make any orders
in regard to the failure that are just; CLI-14-2, 79 NRC 14 n.10 (2014)

Northern Indiana Public Service Co. (Bailly Generating Station, Nuclear-1), CLI-78-7, 7 NRC 429, 433
(1978), aff’d, Porter County Chapter of Izaak Walton League v. NRC, 606 F.2d 1363 (D.C. Cir. 1979)

abuse of discretion standard of review is applicable to discretionary Staff actions not subject to a
hearing opportunity; CLI-13-1, 77 NRC 29 n.158 (2013)

Northern States Power Co. (Prairie Island Nuclear Generating Plant Independent Spent Fuel Storage
Instmation), LBP-12-24, 76 NRC 503, 507-08 (2012)

proximity presumption is limited to reactor licensing proceedings and to other cases where there is an
obvious potential for offsite radiological consequences; LBP-14-4, 79 NRC 332 (2014)

Northern States Power Co. (Prairie Island Nuclear Generating Plant, Units 1 and 2), ALAB-252, 8 AEC
1175, 1177-78 (1975)

party may seek reconsideration of an earlier ruling whereby the party was not actually prejudiced,
where the ruling could well have an impact upon the course of many licensing hearings; CLI-15-6,
81 NRC 369 n.151 (2015)

Northern States Power Co. (Prairie Island Nuclear Generating Plant, Units 1 and 2), ALAB-455, 7 NRC 41,
44 (1978)

in determining whether a license amendment, construction permit, or early site permit will be issued
to applicant, common standards of 10 C.F.R. 50.40 are applied; LBP-15-20, 81 NRC 841 n.65
(2015)

section 50.40 requires that NRC be persuaded that applicant will comply with all applicable
regulations, that health and safety of the public will not be endangered, and that issuance of the
amendment will not be inimical to the health and safety of the public; LBP-15-17, 81 NRC 778
LEGAL CITATIONS INDEX

CASES

Northern States Power Co. (Prairie Island Nuclear Generating Plant, Units 1 and 2), ALAB-455, 7 NRC 41, 54 (1978)
issuance of advisory opinions is generally disfavored; CLI-13-4, 77 NRC 105 (2013)

Northern States Power Co. (Prairie Island Nuclear Generating Plant, Units 1 and 2), CLI-10-27, 72 NRC
481, 484 (2010)
board admission of a contention charging that a licensee’s poor safety culture could undermine its
ability to manage aging during the period of extended operations was reversed as not within the
scope of license renewal; LBP-13-8, 78 NRC 13 (2013)

board erred in admitting a contention pertaining to a plant’s safety culture; CLI-11-11, 74 NRC 435
(2011)
claims of past and current mismanagement are outside the scope of the license renewal proceedings;
LBP-15-5, 81 NRC 300 (2015)

contentions alleging that applicants’ handling of past safety issues at the plants demonstrated that
applicants could not provide reasonable assurance that they would manage the effects of aging
during the license renewal term are inadmissible; LBP-13-8, 78 NRC 21 (2013)
safety culture issues are outside the scope of license renewal proceedings; LBP-15-5, 81 NRC 300
(2015)

Northern States Power Co. (Prairie Island Nuclear Generating Plant, Units 1 and 2), CLI-10-27, 72 NRC
481, 484-85, 494 (2010)
contention challenging applicant’s safety culture and claiming to rely on NRC Staff’s Safety
Evaluation Report is inadmissible because the SER did not discuss safety culture as a general matter
and could not serve as a reasonably apparent foundation for a safety culture contention; LBP-15-11,
81 NRC 409 (2015)

Northern States Power Co. (Prairie Island Nuclear Generating Plant, Units 1 and 2), CLI-10-27, 72 NRC
481, 490 (2010)
license renewal should not include a new, broad-scoped inquiry into compliance that is separate from
and parallel to ongoing compliance oversight activity; CLI-11-11, 74 NRC 435 (2011)

Northern States Power Co. (Prairie Island Nuclear Generating Plant, Units 1 and 2), CLI-10-27, 72 NRC
481, 490-92 (2010)
safety culture arguments are outside the scope of license renewal because they raise issues that are
relevant to current plant operation; LBP-12-27, 76 NRC 603 (2012)

Northern States Power Co. (Prairie Island Nuclear Generating Plant, Units 1 and 2), CLI-10-27, 72 NRC
481, 491 (2010)
broad-based issues akin to safety culture, such as operational history, quality assurance, quality control,
management competence, and human factors, are beyond the bounds of a license renewal
proceedings; CLI-11-11, 74 NRC 435 (2011); LBP-11-21, 74 NRC 129-30 (2011); LBP-12-27, 76
NRC 608, 611 n.171 n.154 (2012); LBP-15-5, 81 NRC 300, 301 (2015)
contention that licensee’s history of managing whistleblower complaints regarding safety issues
demonstrates that the plant will not be operated safely during the license renewal term is
inadmissible; LBP-13-8, 78 NRC 32 (2013)
operating license renewal applicants must make a detailed assessment, conducted on passive,
safety-related physical systems, structures, and components of the plant; LBP-11-21, 74 NRC 129
(2011)
safety-related review in license renewal review focuses on maintaining particular functions of certain
physical systems, structures, and components; CLI-11-11, 74 NRC 435 (2011)

Northern States Power Co. (Prairie Island Nuclear Generating Plant, Units 1 and 2), CLI-10-27, 72 NRC
481, 492 (2010)
contentions that relate to current operations at a plant, as opposed to how it might operate during the
period of extended operation, are inadmissible; LBP-13-8, 78 NRC 33 (2013)
if a stakeholder is of the view that immediate action is needed to remedy an ailing safety culture at
any facility, then that matter should be brought immediately to the attention of the agency via
section 2.206; LBP-13-8, 78 NRC 33 (2013)
NRC’s license renewal process concerns a particularized and limited inquiry into the potential impacts
of an additional 20 years of nuclear power plant operation, not day-to-day operational issues;
LBP-11-21, 74 NRC 129 (2011)
to the extent petitioner believes there are existing management competence questions that merit
immediate action, then its remedy is to direct Staff’s attention to those matters by filing a request
for action under 10 C.F.R. 2.206; CLI-11-11, 74 NRC 437 (2011)
Northern States Power Co. (Prairie Island Nuclear Generating Plant, Units 1 and 2), CLI-10-27, 72 NRC
481, 493 n.56 (2010)
although sufficiency of the application and NRC Staff’s environmental review of that application are
proper targets of contentions, sufficiency of Staff’s safety review of the application is not;
LBP-11-29, 74 NRC 620 n.37 (2011)
intervention petitioners may not challenge the adequacy of the safety evaluation report, but may file
contentions challenging the combined license application based on new information in the SER;
LBP-11-22, 74 NRC 273 n.72 (2011)
Northern States Power Co. (Prairie Island Nuclear Generating Plant, Units 1 and 2), CLI-10-27, 72 NRC
481, 493-94 (2010)
a safety evaluation report did not add a last piece of information, but merely compiled and organized
preexisting information; CLI-11-8, 74 NRC 225 (2011)
Northern States Power Co. (Prairie Island Nuclear Generating Plant, Units 1 and 2), CLI-10-27, 72 NRC
481, 494 (2010)
NRC generally considers approximately 30-60 days as the limit for timely filings based on new
information; CLI-11-2, 73 NRC 342 n.43 (2011)
Northern States Power Co. (Prairie Island Nuclear Generating Plant, Units 1 and 2), CLI-10-27, 72 NRC
481, 494-95 (2010)
intervenor’s reliance on long-available documents regarding leakages and notices of violation made a
contention untimely as filed; LBP-15-11, 81 NRC 409 (2015)
Northern States Power Co. (Prairie Island Nuclear Generating Plant, Units 1 and 2), CLI-10-27, 72 NRC
481, 496 (2010)
adoption of building code rules by a state presents new and materially different information not
previously available, upon which intervenors may rest their proposed contention; LBP-11-7, 73 NRC
290 n.233 (2011)
intervenor has an iron-clad obligation to examine the publicly available documentary material with
sufficient care to enable it to uncover any information that could serve as a foundation for a specific
contention; CLI-11-2, 73 NRC 339 n.22 (2011); LBP-12-13, 75 NRC 789-90 n.17 (2012)
petitioners are not allowed to postpone filing a contention challenging publicly available information or
analysis until NRC Staff issues some document that collects, summarizes, and places into context the
facts supporting that contention; CLI-15-17, 82 NRC 44-45 (2015); LBP-12-1, 75 NRC 13 n.50
(2012); LBP-15-11, 81 NRC 409 (2015)
Northern States Power Co. (Prairie Island Nuclear Generating Plant, Units 1 and 2), LBP-08-26, 68 NRC
905, 912-14 (2008)
when a governmental organization, including a federally recognized Native American tribe, is unable to
establish standing because the facility or nuclear material in question does not fall within its
jurisdictional boundaries, that entity nonetheless may be accorded standing if its boundaries come
within a distance from the nuclear facility or material that otherwise would establish standing for an
individual or nongovernmental organization, whether via a proximity presumption or otherwise;
LBP-13-6, 77 NRC 272 n.7 (2013)
Northern States Power Co. (Prairie Island Nuclear Generating Plant, Units 1 and 2), LBP-08-26, 68 NRC
905, 931 (2008)
petitioner must challenge the environmental report, which acts as a surrogate for the environmental
impact statement during the early stages of a relicensing proceeding; LBP-12-8, 75 NRC 553 (2012)
Northern States Power Co. (Prairie Island Nuclear Generating Plant, Units 1 and 2), LBP-08-26, 68 NRC
905, 938-42 (2008)
contention that applicant had inadequately described aging management plan by relying on a promise
of compliance with NRC orders instead of describing the plan was admissible; LBP-15-24, 82 NRC
83 n.92 (2015)
Northrop Grumman Information Technology, Inc. v. United States, 535 F.3d 1339, 1345 (Fed. Cir. 2008)
language used to incorporate extrinsic material by reference must explicitly, or at least precisely,
identify the written material being incorporated; LBP-12-24, 76 NRC 515 n.60 (2012)
Northside Sanitary Landfill, Inc. v. Thomas, 849 F.2d 1516, 1520 (D.C. Cir. 1988)

dialogue between administrative agencies and the public is a two-way street; CLI-11-12, 74 NRC 488 (2011)

a new transmission corridor is a connected action and must be fully evaluated in the final environmental impact statement; LBP-12-12, 75 NRC 779 (2012)

action lacks independent utility when it would be irrational or unwise to pursue the action without the presence of the EIS-generating central action; LBP-15-16, 81 NRC 697 (2015)

“connected actions” are those that lack independent utility; LBP-12-12, 75 NRC 779 (2012); LBP-14-6, 79 NRC 421 (2014); LBP-14-9, 80 NRC 41 (2014)

Nuclear Fuel Services, Inc. (Erwin, Tennessee), CLI-04-13, 59 NRC 244, 248 (2004)

the Commission will defer to board rulings on standing absent an error of law or abuse of discretion; CLI-12-12, 75 NRC 608 (2012)

petitioner could not rely on caretakers maintaining and farming the property in petitioner’s absence as grounds for proximity-based standing; LBP-15-17, 81 NRC 775 n.139 (2015)

mere potential exposure to minute doses of radiation within regulatory limits does not constitute a distinct and palpable injury on which standing can be founded; CLI-11-3, 73 NRC 623 n.51 (2011)

petitioners have offered conclusory statements of harm, but no plausible explanation for why emissions from incinerating imported low-level radioactive waste would reach any of its members or prove harmful 10, 17, or 25 miles away from the site; CLI-11-3, 73 NRC 622-23 n.48 (2011)

Nuclear Fuel Services, Inc. (Erwin, Tennessee), LBP-05-8, 61 NRC 202, 207 (2005)

NEPA imposes a procedural requirement on an agency’s decisionmaking process by mandating that an agency consider the environmental impacts of a proposed action and inform the public that it has taken those impacts into account in making its decision; LBP-11-17, 74 NRC 22 n.52 (2011)

Nuclear Fuel Services, Inc. (Special Nuclear Facility), LBP-07-16, 66 NRC 277, 284-85 (2007)

section 2.309 standing and contention admissibility criteria are the relevant legal standards for evaluating third-party requests for hearing on a confirmatory order; LBP-14-4, 79 NRC 327 n.40 (2014)

Nuclear Information and Resource Service v. NRC, 918 F.2d 189, 195 (1990), aff’d and rev’d on rehe’g on other grounds, 969 F.2d 1169 (D.C. Cir. 1992)

although the Commission retains broad authority to define standards and thresholds for determining when new information raises a material issue of a plant’s conformity with the Atomic Energy Act, if such information is presented, it must provide a hearing upon request; LBP-11-22, 74 NRC 282 (2011)

arbitrary and unreasonable restrictions on the right to a hearing would violate AEA § 189a; LBP-11-22, 74 NRC 282 (2011)

Nuclear Innovation North America LLC (South Texas Project, Units 3 and 4) CLI-11-6, 74 NRC 203, 208-09 (2011)

adjudicatory record and board decision and any Commission appellate decisions become, in effect, part of the final environmental impact statement; CLI-15-6, 81 NRC 376, 388 n.255 (2015); LBP-11-38, 74 NRC 832 (2011); LBP-12-5, 75 NRC 239 (2012); LBP-12-17, 76 NRC 83 (2012); LBP-14-9, 80 NRC 67 (2014)

Nuclear Innovation North America LLC (South Texas Project, Units 3 and 4), CLI-11-6, 74 NRC 203, 209 (2011)

both the content of the draft environmental impact statement and the additional material submitted by the parties form part of the adjudicatory record; LBP-12-23, 76 NRC 453 (2012)
Nuclear Innovation North America LLC (South Texas Project, Units 3 and 4), CLI-11-6, 74 NRC 203, 209-10 (2011) incorrect legal ruling typically does not warrant interlocutory review because such rulings can be reviewed on appeal from partial initial decisions or a final decision; CLI-15-17, 82 NRC 37 (2015); CLI-15-24, 82 NRC 335 (2015)

Nuclear Innovation North America LLC (South Texas Project, Units 3 and 4), CLI-11-6, 74 NRC 203, 210-11 (2011) Fukushima-related petitions for suspension of proceeding and rescission of regulations that make generic conclusions about environmental impacts of severe reactor and spent fuel pool accidents and that preclude consideration of those issues in individual licensing proceedings are denied; LBP-11-39, 74 NRC 865 n.5 (2011)

Nuclear Innovation North America LLC (South Texas Project, Units 3 and 4), LBP-11-7, 73 NRC 254, 263 (2011) when presented with conflicting expert opinions, licensing boards should be mindful that summary disposition is rarely proper; LBP-12-23, 76 NRC 478 (2012)

Nuclear Innovation North America LLC (South Texas Project, Units 3 and 4), LBP-11-7, 73 NRC 254, 277-80 (2011) new contentions may be admitted as long as they meet the timeliness criteria in 10 C.F.R. 2.309(f)(2) or the non timeliness contention criteria in section 2.309(c)(1) and fulfill the contention admissibility requirements of 10 C.F.R. 2.309(f)(1); LBP-11-39, 74 NRC 866 (2011)

Nuclear Innovation North America LLC (South Texas Project, Units 3 and 4), LBP-11-7, 73 NRC 254, 290 n.233, petition for review denied as premature, CLI-11-6, 74 NRC 203 (2011) intervenors were correct to file contentions on a newly adopted rule because, unlike a proposed rule, it now has indisputable legal effect; LBP-15-15, 81 NRC 611-12 n.96 (2015) proposed rule or proposed law may not support an admissible contention because its ultimate effect is at best speculative; LBP-15-15, 81 NRC 610 (2015)

Nuclear Innovation North America LLC (South Texas Project, Units 3 and 4), LBP-11-7, 73 NRC 254, 292-93 (2011) at the contention admissibility stage, petitioners need not marshal their evidence as though preparing for an evidentiary hearing; LBP-11-21, 74 NRC 125 n.46 (2011)

Nuclear Innovation North America LLC (South Texas Project, Units 3 and 4), LBP-11-25, 74 NRC 380, 397 (2011) at the contention admissibility stage of a proceeding, intervenors need not marshal their evidence as though preparing for an evidentiary hearing; LBP-15-20, 81 NRC 858 n.155 (2015)

Nuclear Innovation North America LLC (South Texas Project, Units 3 and 4), LBP-12-5, 75 NRC 227, 248 (2012) contentions migrate because the underlying issue and concern raised in response to the draft supplemental environmental impact statement remains, and because a motion for summary disposition has not been filed; LBP-14-5, 79 NRC 395 n.100 (2014)

Nuclear Management Co., LLC (Monticello Nuclear Generating Plant), CLI-06-6, 63 NRC 161, 163 (2006) claims of interest-based organizational standing were denied; LBP-13-6, 77 NRC 282-83 n.23 (2013) in determining whether an individual member of an organization qualifies for standing in his or her own right, NRC generally applies traditional judicial standing concepts; LBP-11-13, 73 NRC 545 (2011) judicial concepts of standing are generally followed in NRC proceedings; LBP-11-21, 74 NRC 121 (2011)

Nuclear Management Co., LLC (Monticello Nuclear Generating Plant), CLI-06-6, 63 NRC 161, 164 (2006) mere existence of comments and questions generated by NRC Staff do not, in and of themselves, demonstrate a material deficiency in applicant’s combined license application; LBP-11-6, 73 NRC 178 n.26 (2010)

Nuclear Management Co., LLC (Monticello Nuclear Generating Plant), LBP-05-31, 62 NRC 735, 753 (2005) applicant’s alternatives analysis need not discuss every conceivable alternative to the proposed action, but rather only feasible, nonspeculative, and reasonable alternatives; LBP-11-13, 73 NRC 553 (2011)
LEGAL CITATIONS INDEX

CASES

Nuclear Management Co., LLC (Palisades Nuclear Plant), CLI-06-17, 63 NRC 727, 728 (2006)
the board is the agency’s expert body on matters of contention admissibility, and the Commission
generally defers to its judgment on such matters; CLI-12-14, 75 NRC 702 (2012)
allowing new claims in a reply not only would defeat the contention-filing deadline, but would
unfairly deprive other participants of an opportunity to rebut the new claims; LBP-15-26, 82 NRC
182 n.36 (2015)
argument is untimely when it is raised for the first time at oral argument; LBP-15-23, 82 NRC 63
n.21 (2015)
if a contention as originally pleaded did not satisfy 10 C.F.R. 2.309(f)(1), a reply cannot remediate the
deficiency by introducing, for the first time, references to a genuine dispute with the license
application at issue; LBP-11-34, 74 NRC 694 n.62 (2011)
petitioner may respond to the legal or logical arguments presented in the answers to its hearing
request, but may not use its reply to raise new issues for the first time; CLI-15-18, 82 NRC 146
(2015)
reply briefs must focus narrowly on the legal or factual arguments first presented in the original
motion or petition or raised in the answers to it; LBP-11-34, 74 NRC 694 (2011) LBP-14-4, 79
NRC 330 (2014)
reply cannot expand the scope of the arguments set forth in the original hearing request; LBP-14-4, 79
NRC 330 (2014)
parties may not raise new arguments that are outside the scope of their contentions, but may
legitimately amplify arguments presented in support of the contention in order to fairly respond to
arguments raised by the opposing party; LBP-12-23, 76 NRC 463 (2012)
Nuclear Management Co., LLC (Palisades Nuclear Plant), LBP-06-10, 63 NRC 314, 352 (2006)
petitioner’s assertion that recriticality is demonstrated by the relative quantities of radionuclides
released is not self-evident and is clearly of the class of statements that must be supported by expert
opinion; LBP-11-23, 74 NRC 306 (2011)
Nuclear Management Co. (Palisades Nuclear Plant), CLI-06-17, 63 NRC 727, 732 (2006)
petitioner may not remediate deficient contentions by introducing, in the reply, documents that were
available to it during the time frame for initially filing contentions; LBP-12-7, 75 NRC 517 n.16
(2012)
Nulankayamnen Nkhtaqimikon v. Impson, 503 F.3d 18, 27 (1st Cir., 2007)
individual tribal member’s assertion of an interest based on cultural resource concerns must show that
there is a concrete or particularized injury to herself as an individual; LBP-13-6, 77 NRC 277 n.12
(2013)
Office of Disciplinary Counsel v. Barscy, 919 N.E.2d 198, 204-06 (Ohio 2009)
an attorney whose violations of the Rules of Professional Conduct included negotiating a settlement
for a client that had never given him settlement authority, forging client’s name on settlement check,
and depositing it into attorney’s bank account was disbarred permanently; LBP-11-13, 73 NRC 549
(2011)
Ohio Edison Co. (Perry Nuclear Power Plant, Unit 1), LBP-91-38, 34 NRC 229, 240 n.61 (1991)
economic interest generally is not sufficient to afford standing in NRC licensing proceedings regarding
health and safety; LBP-14-4, 79 NRC 352 (2014)
agency’s reliance on mitigation in making a finding of no significant impact is justified if the
proposed mitigation constitutes an adequate buffer against the negative impacts that result from the
authorized activity to render such impacts so minor as to not warrant an environmental impact
statement; LBP-12-23, 76 NRC 467 (2012)
agency’s reliance on mitigation in making a finding of no significant impact must be justified;
LBP-12-23, 76 NRC 467 (2012); LBP-14-7, 79 NRC 457, 461 (2014)
proposed mitigation measures are sufficient if they are supported by sufficient evidence, such as
studies conducted by the agency, or are adequately policed; LBP-12-23, 76 NRC 467-48 (2012);
LBP-14-7, 79 NRC 461-62 (2014)
reliance on mitigation is justified if the proposed mitigation underlying the finding of no significant impact must be more than a possibility in that it is imposed by statute or regulation or has been so integrated into the initial proposal that it is impossible to define the proposal without mitigation; LBP-14-7, 79 NRC 461 (2014) 
there must be some assurance that mitigation measures constitute an adequate buffer against the negative impacts that result from the authorized activity to render such impacts so minor as to not warrant an environmental impact statement; LBP-14-7, 79 NRC 461 (2014) 
when conducting a NEPA-required environmental review, an agency may consider the ameliorative effects of mitigation in determining the environmental impacts of an activity; LBP-12-23, 76 NRC 467 (2012); LBP-14-7, 79 NRC 461 (2014) 
agency’s reliance on mitigation in making a finding of no significant impact is justified if it is impossible to define the proposal without mitigation; LBP-12-23, 76 NRC 469 (2012) 
Okanogan Highlands Alliance v. Williams, 236 F.3d 468, 473 (9th Cir. 2000) 
maintenance of the mitigation plan in final supplemental environmental impact statement need not be in final form to comply with NEPA’s procedural requirements; LBP-15-16, 81 NRC 694 (2015) 
Okanogan Highlands Alliance v. Williams, 236 F.3d 468, 476 (9th Cir. 2000) 
courts decide whether a mitigation plan was adequately or inadequately discussed, but the line between these two options is not well defined; LBP-15-16, 81 NRC 685 (2015) 
merely listing possible mitigation options does not satisfy NEPA; LBP-15-16, 81 NRC 687 (2015) 
Okanogan Highlands Alliance v. Williams, 236 F.3d 468, 479-80 (9th Cir. 2000) 
NEPA requires acknowledgment of tribal hunting and fishing rights, as well as an analysis of how the project will affect those rights; LBP-15-5, 81 NRC 282, 286 (2015) 
Omaha Public Power District (Fort Calhoun Station, Unit 1), CLI-15-5, 81 NRC 329 (2015) 
direction is given on what licensee actions do and do not constitute a de facto license amendment triggering hearing rights; CLI-15-14, 81 NRC 734 n.21 (2015) 
Omaha Public Power District (Fort Calhoun Station, Unit 1), CLI-15-5, 81 NRC 329, 333 (2015) 
board need not address the issue of standing where petitioner has failed to demonstrate the existence of a licensing action subject to AEA hearing rights; LBP-15-27, 82 NRC 189 (2015) 
Omaha Public Power District (Fort Calhoun Station, Unit 1), CLI-15-5, 81 NRC 329, 333 n.19 (2015) 
Commission exercises its discretionary authority to consider amicus brief; CLI-15-10, 81 NRC 537-38 n.5 (2015); CLI-15-23, 82 NRC 324 n.16 (2015) 
Omaha Public Power District (Fort Calhoun Station, Unit 1), CLI-15-5, 81 NRC 329, 334 (2015) 
NRC Staff’s ongoing enforcement of regulations and license conditions does not trigger hearing rights; LBP-15-24, 82 NRC 82 (2015) 
Omaha Public Power District (Fort Calhoun Station, Unit 1), CLI-15-5, 81 NRC 329, 336-37 (2015) 
NRC inspection reports, even those documenting violations, are not de facto license amendments; LBP-15-27, 82 NRC 197 (2015) 
Omaha Public Power District (Fort Calhoun Station, Unit 1), CLI-15-5, 81 NRC 329, 337 (2015) 
actions taken by licensee under 10 C.F.R. 50.59 do not give rise to hearing rights under the AEA; LBP-15-27, 82 NRC 195-96 (2015) 
hearing rights do not attach to licensee changes made under section 50.59 because those changes do not require NRC approval but are instead subject to normal NRC oversight through the inspection process; CLI-15-14, 81 NRC 747 n.41 (2015) 
mere possibility of a future license amendment does not trigger a hearing opportunity today; LBP-15-27, 82 NRC 198 (2015) 
Omaha Public Power District (Fort Calhoun Station, Unit 1), CLI-15-5, 81 NRC 329, 338 (2015) 
Commission declined to interpret the AEA to require hearings based on the possibility that a licensee may request an amendment to make unspecified modifications at some uncertain time in the future; CLI-15-14, 81 NRC 741-42, 743 (2015) 
Oncology Services Corp., CLI-93-17, 38 NRC 44, 49 (1993) 
stare decisis is not implicated where the board decision is unreviewed and therefore not binding on future tribunals, but as a prudential matter, the Commission vacates such decisions when appellate review is cut short by mootness; CLI-13-9, 78 NRC 558-59 (2013)
LEGAL CITATIONS INDEX

CASES

One Beacon Insurance Co. v. Crowley Marine Services, Inc., 648 F.3d 258, 268 (5th Cir. 2011)
notice of incorporated terms is reasonable where, under the particular facts of the case, a reasonably prudent person should have seen them; LBP-12-24, 76 NRC 515 n.57 (2012)

O’Reilly v. U.S. Army Corps of Engineers, 477 F.3d 225, 231 (5th Cir. 2007)
when conducting a NEPA-required environmental review, an agency may consider the ameliorative effects of mitigation in determining the environmental impacts of an activity; LBP-12-23, 76 NRC 467 (2012); LBP-14-7, 79 NRC 461 (2014)

O’Reilly v. U.S. Army Corps of Engineers, 477 F.3d 225, 236 n.10 (5th Cir. 2007)
cumulative effects and improper segmentation issues raise separate-but-similar questions; LBP-14-6, 79 NRC 419-20 n.76 (2014)
federal agencies may plan a number of related actions but may decide to prepare impact statements on each action individually rather than prepare an impact statement on the entire group, creating a segmentation or piecemealing problem; LBP-14-6, 79 NRC 419-20 n.76 (2014)

Owens v. Brock, 860 F.2d 1363, 1366 (6th Cir. 1988)
an agency’s discretionary choice to conduct a formal on-the-record hearing is irrelevant when determining whether the Equal Access to Justice Act applies to a particular proceeding; LBP-11-8, 73 NRC 360 (2011)

Oystershell Alliance v. NRC, 800 F.2d 1201, 1207 (D.C. Cir. 1986)
in examining petitioners’ plea to reopen the record, court relied on the same court-sanctioned test applied by NRC; CLI-15-19, 82 NRC 156 n.21 (2015)

Oystershell Alliance v. NRC, 800 F.2d 1201, 1207-08 (D.C. Cir. 1986)
courts of appeals have repeatedly approved NRC practice of closing the hearing record after resolution of the last live contention, and of holding new contentions to the higher reopening standard; CLI-12-14, 75 NRC 700 (2012)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), ALAB-410, 5 NRC 1398, 1405 (1977)
expert witnesses must have the requisite education, training, skill, or experience in operation of a nuclear power plant or in probabilistic risk assessment to support a contention; LBP-11-35, 74 NRC 737 (2011)

seismology is an evolving science; LBP-15-27, 82 NRC 186 (2015)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), ALAB-653, 16 NRC 55, 72 (1981)
prima facie evidence must be legally sufficient to establish a fact or case unless disproved; LBP-14-16, 80 NRC 194 n.64 (2014)

license applications, not Staff’s review, are to be the focus of a licensing adjudication; LBP-13-6, 77 NRC 298 n.31 (2013)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), ALAB-756, 18 NRC 1340, 1344 (1983)
proponents of motions to reopen the record bear a heavy burden; LBP-11-22, 74 NRC 270 (2011)
reopening motions must show that a different result would have been reached initially if the material had been considered; LBP-11-20, 74 NRC 84 n.108 (2011)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), ALAB-756, 18 NRC 1340, 1345 (1983)
perfection in plant construction and the facility construction quality assurance program is not a precondition for a license under either the Atomic Energy Act or the Commission’s regulations; LBP-14-7, 79 NRC 471 (2014)

effect of a pattern of quality assurance violations is not necessarily to show that particular safety-related information is false, but to erode confidence that NRC can reasonably have in, and
create substantial uncertainty about the quality of, work that is tainted by the alleged QA violations;
LBP-12-23, 76 NRC 479 (2012)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), ALAB-763, 19 NRC
relative to factual matters, to carry burden of proof, NRC Staff and/or applicant must establish that its
position is supported by a preponderance of the evidence; LBP-15-3, 81 NRC 85 (2015); LBP-15-16,
81 NRC 642 (2015)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), ALAB-775, 19 NRC
1361, 1365-66 (1984)
reopening motions must show that a different result would have been reached initially if the material
had been considered; LBP-11-20, 74 NRC 84 n.108 (2011)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), ALAB-775, 19 NRC
1361, 1366 (1984)
for a reopening motion to be timely presented, movant must show that the issue sought to be raised
could not have been raised earlier; LBP-11-20, 74 NRC 85 n.110 (2011)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), ALAB-880, 26 NRC
449, 460-61 (1987)
information may be unavoidably incomplete or unavailable, and under those circumstances, a final
environmental impact statement can overcome this deficiency if it states that fact, explains how the
missing information is relevant, sets forth the existing information, and evaluates the environmental
impacts to the best of the agency’s ability; CLI-11-11, 74 NRC 444 n.94 (2011)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-81-5, 13 NRC 361,
364-65 (1981)
in the post-TMI time frame, the Commission, although providing for some modified procedures,
continued to apply existing rules for filing new contentions and motions to reopen the record;
CLI-11-5, 74 NRC 170 (2011)
where initial decisions have been issued, the record should not be reopened to take evidence on some
accident-related issue unless the party seeking reopening shows that there is significant new
evidence, not included in the record, that materially affects the decision; CLI-11-5, 74 NRC 154
n.43 (2011)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-82-39, 16 NRC
1712, 1715 (1982)
the standard for admitting a new contention after the record is closed is higher than for an ordinary
late-filed contention; CLI-11-2, 73 NRC 338 n.20 (2011)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-86-12, 24 NRC 1,
6 n.3 (1986)
no significant hazards consideration determination is a procedural device to determine when, not
whether, petitioners’ right to a hearing under the Atomic Energy Act will occur; LBP-15-26, 82
NRC 172 n.14 (2015)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-02-16, 55 NRC
any discretionary diversion from the usual Subpart M procedural track will be rare, requiring
extraordinary and unusual circumstances, and all requests to date to provide a non-Subpart M
hearing in a license transfer case have been denied; CLI-14-5, 79 NRC 260 n.31 (2014)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-02-16, 55 NRC
317, 344 (2002)
if petitioner can provide a sound basis to dispute compliance-related statements in a license
amendment request, then the contention is within the scope of the proceeding; LBP-15-24, 82 NRC
83 n.87, 87 (2015)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-02-16, 55 NRC
317, 345 (2002)
one type of litigant found repeatedly to present economic interests not cognizable in an NRC license
transfer proceeding is a utility ratepayer; LBP-14-4, 79 NRC 352 (2014)
organizational standing in an agency adjudicatory proceeding could be based on an organizational interest that has well-recognized institutional underpinnings; LBP-13-6, 77 NRC 283 n.23 (2013)

absent information to the contrary, NRC may properly assume that an applicant or licensee will comply with concrete and enforceable conditions and requirements imposed by statutes, regulations, licenses, or permits issued by competent federal, state, or local governmental entities; LBP-13-4, 77 NRC 218 n.95 (2013); LBP-15-16, 81 NRC 695 n.494 (2015)

Commission has long declined to assume that licensees will refuse to meet their obligations under their licenses or NRC regulations; CLI-14-11, 80 NRC 178 n.53 (2014); LBP-15-4, 81 NRC 175 (2015)

absent information to the contrary, NRC may properly assume that an applicant or licensee will comply with concrete and enforceable conditions and requirements imposed by statutes, regulations, licenses, or permits issued by competent federal, state, or local governmental entities; LBP-13-4, 77 NRC 218 n.95 (2013); LBP-15-16, 81 NRC 695 n.494 (2015)

Commission has long declined to assume that licensees will refuse to meet their obligations under their licenses or NRC regulations; CLI-14-11, 80 NRC 178 n.53 (2014); LBP-15-4, 81 NRC 175 (2015)

within the geographic boundary of the Ninth Circuit, NRC may not categorically exclude NEPA terrorism contentions; CLI-11-11, 74 NRC 456 (2011)

Commission’s standard of review is highly deferential, and it will not overturn a board’s ruling on threshold issues such as intervention absent error of law or abuse of discretion; CLI-15-21, 82 NRC 301 (2015)

board admission of a contention alleging that licensee had a repeated pattern of violations that could undermine licensee’s ability to manage aging during the period of extended operations was reversed as not within the scope of license renewal; LBP-13-8, 78 NRC 13 (2013)

contentions alleging that applicants’ handling of past safety issues at the plants demonstrated that the applicants could not provide reasonable assurance that they would manage the effects of aging during the license renewal term are inadmissible; LBP-13-8, 78 NRC 21 (2013)

contention that offers no explanation how its assertions are directly relevant to applicant’s ability to manage the effects of aging during the renewal term is inadmissible; LBP-13-8, 78 NRC 32 (2013)

any contention that falls outside the specified scope of the proceeding must be rejected; LBP-13-6, 77 NRC 285 (2013)

contention that licensee’s history of managing whistleblower complaints regarding safety issues demonstrates that the plant will not be operated safely during the license renewal term is inadmissible; LBP-13-8, 78 NRC 32 (2013)

license renewal should not include a new, broad-scoped inquiry into compliance that is separate from and parallel to ongoing compliance oversight activity; LBP-13-8, 78 NRC 13 (2013)

any contention that falls outside the specified scope of the proceeding must be rejected; LBP-12-3, 75 NRC 191 (2012); LBP-12-15, 76 NRC 25-26 (2012); LBP-12-27, 76 NRC 594 (2012)

claims of past and current mismanagement are outside the scope of license renewal proceedings; LBP-15-5, 81 NRC 300, 301 (2015)

ongoing compliance oversight activities are not within the scope of license renewal proceedings; LBP-15-5, 81 NRC 300 (2015)

safety culture arguments are outside the scope of license renewal because they raise issues that are relevant to current plant operation; LBP-12-27, 76 NRC 603 (2012)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-11-11, 74 NRC 427, 436 (2011)

contention that offers no explanation how its assertions are directly relevant to applicant’s ability to manage the effects of aging during the renewal term is inadmissible; LBP-13-8, 78 NRC 32 (2013)
genuine dispute prong of 10 C.F.R. 2.309(f)(1)(vi) requires a nexus between alleged deficiencies and a material consequence; LBP-15-1, 81 NRC 37 n.121 (2015)

*Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-11-11, 74 NRC 427, 436 n.47 (2011)
management integrity contentions are admissible in license renewal proceedings only if they rely on specific supporting information, including references to a serious incident involving shutdown where management responsible for the incident remained in place, a purported climate of reprisals for bringing forward safety issues, and reference to at least one expert in support of the contention; LBP-13-8, 78 NRC 35 (2013)

*Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-11-11, 74 NRC 427, 436-37 (2011)

contention that does not dispute any specific portion of Entergy’s fuel handling accident analysis is inadmissible for lack of a genuine dispute; LBP-15-18, 81 NRC 801 (2015)

*Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-11-11, 74 NRC 427, 437 (2011)

petitioners can raise compliance issues only under 10 C.F.R. 2.206, which would allow them to petition NRC to take enforcement action; LBP-15-5, 81 NRC 264 (2015)

*Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-11-11, 74 NRC 427, 437 & n.49 (2011)

boards should not supply new information not otherwise present in the adjudicatory record in order to cure deficiencies in a petition; CLI-12-12, 75 NRC 611 n.39 (2012)

*Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-11-11, 74 NRC 427, 440-43 (2011)

inadequacy in the severe accident mitigation alternatives analysis is material if license renewal applicant failed to consider complete information without justifying why particular information was omitted; LBP-15-5, 81 NRC 298 (2015)

*Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-11-11, 74 NRC 427, 441-42 (2011)

the required level of demonstration by petitioners of cost-effectiveness of other severe accident mitigation alternatives is case and issue specific; LBP-11-35, 74 NRC 752 n.223 (2011)

*Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-11-11, 74 NRC 427, 442 (2011)

at the contention filing stage, factual support necessary to show that a genuine dispute exists need not be in affidavit or formal evidentiary form and need not be of the quality necessary to withstand a summary disposition motion; LBP-15-11, 81 NRC 39 (2015); LBP-15-1, 81 NRC 39 (2015)

whether a contention should properly be characterized as a contention of omission or a contention of inadequacy and the ramifications of such a designation regarding contention admissibility are discussed; LBP-13-9, 78 NRC 47 n.30 (2013); LBP-14-5, 79 NRC 384 n.33 (2014)

*Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-11-11, 74 NRC 427, 442 n.81 (2011)

at the contention filing stage the factual support necessary to show that a genuine dispute exists need not be in affidavit or formal evidentiary form and need not be of the quality necessary to withstand a summary disposition motion; LBP-15-1, 81 NRC 39 (2015); LBP-15-11, 81 NRC 426 n.157 (2015)

*Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-11-11, 74 NRC 427, 442-43 (2011)

board admitted a contention without deciding if it was a contention of omission or a contention of inadequacy; LBP-15-5, 81 NRC 284 n.220 (2015)

contention that applicant had failed to discuss a report on a recently identified seismic fault near the plant is admissible; LBP-15-20, 81 NRC 858-59 & n.181 (2015)

*Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-11-11, 74 NRC 427, 443 (2011)

board merit determination is inappropriate at the contention admissibility stage; LBP-13-6, 77 NRC 288, 290 (2013)

382
merits determinations cannot be made at the contention admissibility stage; LBP-14-6, 79 NRC 432 (2014)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-11-11, 74 NRC 427, 444 (2011)

NRC, as an independent regulatory agency, is not bound by those portions of Council on Environmental Quality NEPA regulations that have a substantive impact on the way in which the Commission performs its regulatory functions; LBP-11-35, 74 NRC 750 n.214 (2011)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-11-11, 74 NRC 427, 444-45 (2011)

petitioners, not just parties, may request a rule waiver in NRC adjudicatory proceedings; CLI-12-19, 76 NRC 387 n.55 (2012)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-11-11, 74 NRC 427, 449 (2011)

petitioners, not just parties, may request a rule waiver in NRC adjudicatory proceedings; CLI-12-19, 76 NRC 387 n.55 (2012)

petitioners, not just parties, may request a rule waiver in NRC adjudicatory proceedings; CLI-12-19, 76 NRC 387 n.55 (2012)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-11-11, 74 NRC 427, 452 (2011)

contentions that challenge an agency rule or regulation without a waiver, in addition to being expressly prohibited, are outside the scope of the proceeding; CLI-15-21, 82 NRC 302 (2015)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-11-11, 74 NRC 427, 452 n.139 (2011)

bare assertions are insufficient to support admission of a contention; LBP-12-27, 76 NRC 603, 608 (2012)

neither speculation nor conclusory assertions, even by an expert, alleging that a matter fails to satisfy the AEA or NEPA will suffice to allow admission of a proffered contention; LBP-12-15, 76 NRC 26 (2012)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-11-11, 74 NRC 427, 453 (2011)

any evaluation of the Fukushima events will include consideration of lessons learned that may apply to spent fuel pools; LBP-12-1, 75 NRC 22 n.82 (2012)

NRC will evaluate all technical and policy issues related to the Fukushima event to identify potential research, generic issues, changes to the reactor oversight process, rulemakings, and adjustments to the regulatory framework that should be conducted by NRC; LBP-11-35, 74 NRC 761 n.241 (2011)

NRC’s comprehensive evaluation of the Fukushima event includes consideration of those facilities that may be subject to seismic activity or tsunamis and of lessons learned that may apply to spent fuel pools that are part of the U.S. nuclear fleet; LBP-11-35, 74 NRC 761 n.241 (2011)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-11-11, 74 NRC 427, 457 (2011)

boards should not have to guess what aspects of the severe accident mitigation alternatives analysis the petitioner is challenging; LBP-12-1, 75 NRC 20 n.77 (2012)

even assuming that petitioner intended to challenge the discussion of mitigation measures in applicant’s environmental report, petitioner’s unsupported statement falls short of the information required to show the existence of a genuine dispute; LBP-11-35, 74 NRC 758-59 n.237 (2011)

it is petitioner’s responsibility to put others on notice as to the issues it seeks to litigate in the proceeding; LBP-11-35, 74 NRC 758-59 n.237 (2011)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-11-11, 74 NRC 427, 457-58 (2011)

NRC can and will make appropriate adjustments to regulatory requirements if necessary; LBP-11-35, 74 NRC 750 n.212 (2011)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-12-13, 75 NRC 681, 685 (2012)

suo sponte review authority is to be used only in extraordinary circumstances; CLI-15-1, 81 NRC 9 n.39 (2015)
LEGAL CITATIONS INDEX

CASES

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-12-13, 75 NRC 681, 686 (2012)

prior to its revision, 10 C.F.R. 2.341(f)(1) required that a referred ruling raise a significant and novel legal or policy issue and necessitate resolution to materially advance the orderly disposition of the proceeding; CLI-13-7, 78 NRC 206 n.25 (2013)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-12-13, 75 NRC 681, 686 n.30 (2012)

by participating in NRC proceedings, intervenors accept the obligation of uncovering relevant, publicly available information; CLI-12-21, 76 NRC 499 (2012)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-12-13, 75 NRC 681, 687 n.32 (2012)

agency directs NRC Staff to review issues outside the adjudicatory context and recommend whether the Commission should consider modifications to agency guidance or practice; CLI-13-4, 77 NRC 105 n.13 (2013)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-12-13, 75 NRC 681, 687 n.32 (2012)

NRC Staff was asked to review generically an applicant’s duty to supplement or correct its environmental report; CLI-12-19, 76 NRC 386 n.54 (2012)

NRC is required to provide an opportunity to request a hearing under the Atomic Energy Act on a license amendment; CLI-15-21, 82 NRC 299 n.12 (2015)

NRC Staff’s ongoing enforcement of regulations and license conditions does not trigger hearing rights; LBP-15-24, 82 NRC 82 (2015)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), LBP-93-1, 37 NRC 5, 29-30 (1993)

contentions that advocate stricter requirements than agency rules impose or that otherwise seek to litigate a generic determination established by a Commission rulemaking are inadmissible; LBP-13-6, 77 NRC 284 (2013)

Milestone test for rule waiver establishes an appreciably higher burden for would-be waiver seekers than does 10 C.F.R. 2.335(b); LBP-14-16, 80 NRC 195 n.72 (2014)

prima facie showing on a rule waiver request is not a final determination on the merits, but merely requires presentation of enough information to allow the board to infer (absent disproof) that special circumstances exist; LBP-14-16, 80 NRC 193-94 (2014)

the NEPA review in license renewal proceedings is not limited to aging management-related issues; LBP-11-17, 74 NRC 21 (2011)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), LBP-10-15, 72 NRC 257, 305 n.56 (2010), aff’d in part and rev’d in part, CLI-11-11, 74 NRC 427 (2011)

rule waiver test applies equally to safety and significant environmental concerns; LBP-14-16, 80 NRC 195 n.70 (2014)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), LBP-11-5, 73 NRC 131 (2011)

example of a protective order is provided; LBP-14-11, 80 NRC 133 (2014)
LEGAL CITATIONS INDEX

CASES

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), LBP-11-32, 74 NRC 654 (2011)
Fukushima-related contentions were dismissed as premature; LBP-11-39, 74 NRC 870 (2011)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), LBP-11-32, 74 NRC 654, 658-60 (2011)
admissibility of Fukushima-related contentions is determined; LBP-11-37, 74 NRC 779 n.3 (2011)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), LBP-11-32, 74 NRC 654, 665 (2011)
intervenor’s challenge to NRC’s compliance with NEPA in light of the NRC’s Fukushima Task Force Report is premature; LBP-11-33, 74 NRC 681-82 (2011)
nothing in NEPA, which applies to agencies of the federal government, can be read to require an applicant to update its environmental report; LBP-11-34, 74 NRC 697 (2011)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), LBP-11-32, 74 NRC 654, 665-68 (2011)
petitioner’s assertion that applicant’s environmental report must be supplemented to take account of allegedly new and significant information is, as a procedural matter, unfounded and must be rejected; LBP-11-33, 74 NRC 681 (2011)

absent voluntary action by applicant to amend its environmental report, intervenor wishing to raise new or revised post-ER environmental concerns must await issuance of Staff’s draft environmental impact statement; LBP-11-37, 74 NRC 784 (2011)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), LBP-11-32, 74 NRC 654, 668 n.31 (2011)
incorrect information in a license amendment application is prohibited by NRC regulations; LBP-15-24, 82 NRC 99 (2015)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), LBP-11-32, 74 NRC 654, 671 (2011)
contention is inadmissible for failure to show that a genuine dispute exists with applicant on a material issue of law or fact; LBP-11-33, 74 NRC 683 (2011)
Fukushima-related contention based on a Staff Requirements Memorandum is inadmissible because the SRM does not define or impose any new requirements arising from the Fukushima accident and thus fails to establish a genuine dispute on a material issue of law or fact; LBP-11-37, 74 NRC 784 n.7 (2011)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), LBP-11-32, 74 NRC 654, 672-73 (2011)
issuance of a Staff Requirements Memorandum directing Staff to implement “without delay” the recommendations of the Fukushima Task Force does not render contentions admissible; LBP-11-36, 74 NRC 772 (2011)

Pacific Gas and Electric Co. (Diablo Canyon Nuclear Power Plant, Units 1 and 2), LBP-12-13, 75 NRC 784, 786-87 (2012)
aplicant had no legal duty to update its environmental report to encompass matters that occurred after that report was filed with the agency; LBP-12-15, 76 NRC 43 (2012)

petitioner failed to demonstrate the existence of a licensing action subject to hearing rights under section 189a of the Atomic Energy Act; CLI-15-21, 82 NRC 299 n.12 (2015)

-bearing in mind the history of Commission actions following the TMI accident, the Commission looks to the more recent post-9/11 suspension-of-proceedings cases for the framework under which it considers Fukushima-related petitions; CLI-11-5, 74 NRC 157 (2011)
petitions to suspend multiple license renewal proceedings in view of an Inspector General’s report on the agency’s license renewal process were considered pursuant to the Commission’s inherent supervisory authority over agency proceedings; CLI-11-5, 74 NRC 158 (2011)

385
requests to suspend or hold proceedings in abeyance following the September 11 terrorist attacks, as well as more recently, were considered pursuant to the Commission’s inherent supervisory authority over agency proceedings; CLI-11-5, 74 NRC 158 (2011)

although NRC rules require that motions be addressed to the presiding officer when a proceeding is pending, suspension motions are best addressed to the Commission; CLI-11-5, 74 NRC 158 (2011) Commission has inherent authority to supervise both NRC Staff’s work and adjudicatory proceedings relating to license applications; CLI-14-1, 79 NRC 2 (2014)

when a matter is not strictly adjudicatory in nature or otherwise does not fit cleanly within the procedures described in NRC rules of practice, the Commission undertakes a decision as an exercise of its inherent supervisory authority over agency proceedings; CLI-13-8, 78 NRC 224 (2013)

post-9/11 request for suspension of proceeding was denied because no danger to public health and safety would result from mere continuation of the adjudicatory proceeding; CLI-11-5, 74 NRC 161 (2011)

the Commission declined to stay dry cask storage proceedings pending requested rule changes; CLI-11-1, 73 NRC 5 (2011)

Pacific Gas and Electric Co. (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), CLI-08-1, 67 NRC 1, 5-8 (2008)

if good cause for late filing is not shown, boards may still permit the filing, but petitioner or intervenor must make a strong showing on the other factors of 10 C.F.R. 2.309(c); LBP-11-9, 73 NRC 401 (2011); LBP-11-32, 74 NRC 662 (2011)

Pacific Gas and Electric Co. (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), CLI-08-1, 67 NRC 1, 6 (2008)

release of NRC Staff’s environmental review document may be the first opportunity for a petitioner to question the accuracy of the Staff’s environmental analysis; CLI-15-17, 82 NRC 45 (2015); LBP-15-11, 81 NRC 408, 426 (2015)

policies set forth by NEPA prevent NRC Staff from segmenting the disposal issues from the inquiry into whether applicant will be allowed to create 11e(2) byproduct material in the first instance; LBP-13-9, 78 NRC 70 (2013)

where intervenors had submitted an earlier version of a contention several years ago in their petition to intervene, it is difficult to see how they can now make the required showing of good cause for their failure to file in a timely manner; LBP-12-12, 75 NRC 756 (2012)

on safety issues, license applicants have the burden of establishing entitlement to the applied-for license by a preponderance of the evidence; LBP-11-38, 74 NRC 829 n.77 (2011); LBP-12-5, 75 NRC 235 n.42 (2012)

Pacific Gas and Electric Co. (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), CLI-08-26, 68 NRC 509, 526 (2008), petition for review denied on other grounds, San Luis Obispo Mothers for Peace v. NRC, 635 F.3d 1109 (9th Cir. 2011)

NRC Staff’s final environmental impact statement and the adjudicatory record become part of the environmental record of the decision; CLI-11-6, 74 NRC 209 (2011); CLI-15-6, 81 NRC 376 (2015); LBP-11-38, 74 NRC 832 (2011); LBP-12-5, 75 NRC 239 (2012); LBP-12-17, 76 NRC 83 (2012); LBP-14-9, 80 NRC 67 (2014)

Pacific Gas and Electric Co. (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), LBP-02-23, 56 NRC 413, 432 (2002), aff’d, CLI-03-1, 57 NRC 1 (2003) generic, unsubstantiated claims regarding health, safety, and property devaluation impacts are insufficient to establish standing; LBP-12-3, 75 NRC 184 (2012)

Pacific Gas and Electric Co. (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), LBP-02-23, 56 NRC 413, 439-41 (2002), petition for review denied, CLI-03-12, 58 NRC 185, 191 (2003) materiality requirement for contention admission often dictates that any contention alleging deficiencies or errors in an application also indicate some significant link between the claimed deficiency and either the health and safety of the public or the environment; LBP-12-15, 76 NRC 26 (2012); LBP-12-27, 76 NRC 594 (2012)

Pacific Gas and Electric Co. (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), LBP-08-7, 67 NRC 361, 372 (2008) where a nonmoving party declines to oppose a motion for summary disposition, the board shall accept as admitted the moving party’s prima facie showing of material facts, but boards cannot grant summary disposition unless movant discharges its burden of demonstrating that it is entitled to a decision as a matter of law; LBP-12-4, 75 NRC 219 (2012)

Pacific Gas and Electric Co. (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), LBP-08-7, 67 NRC 361, 372 n.7 (2008) presiding officers may make a determination about the validity of a deliberative process privilege claim without reviewing a document in camera if the affidavit outlining the reasons for nondisclosure is sufficiently detailed; LBP-13-5, 77 NRC 245 n.64 (2013)

Pacific Gas and Electric Co. v. State Energy Resource Conservation & Development Commission, 461 U.S. 190, 209 (1983) the 1959 amendments to the Atomic Energy Act were intended generally to increase the states’ role in regulation of nuclear materials; CLI-11-12, 74 NRC 473-74 (2011)

Pacific Gas and Electric Co. v. United States, 70 Fed. Cl. 128, 140 (2006) vague, general, and conclusory statements, all purporting to apply to many documents but not connected to any particular document, fail to meet the requirement that defendant supply the court with precise and certain reasons for maintaining the confidentiality of requested documents; LBP-13-5, 77 NRC 243 (2013)

Pacific Gas and Electric Co. v. United States, 70 Fed. Cl. 128, 140-41 (2006) without indicating any specific, policy-oriented communication or proffering any cogent reason for protecting it, the bare assertion that internal agency discussions will be “chilled” is nothing but a legal platitude asserted in the abstract; LBP-13-5, 77 NRC 243-44 (2013)

Pacific Gas and Electric Co. v. United States, 71 Fed. Cl. 205, 209 (2006) explanation of reasons for asserting deliberative process privilege need not reveal the contents of the documents, but it must identify, with respect to a specific document or type of document, why that document should be protected from discovery and what specific harm would result from its disclosure; LBP-13-5, 77 NRC 242 (2013)

Pacific Rivers Council v. Thomas, 30 F.3d 1050, 1054 n.8 (9th Cir. 1994) if an agency determines that a particular action will have no effect on an endangered or threatened species, the consultation requirements are not triggered, and the finding of no effect obviates the need for formal consultation under the Endangered Species Act; LBP-12-10, 75 NRC 657 n.153, 671-72 (2012)

Pu’ina Hawai‘i, LLC, CLI-06-13, 63 NRC 508, 509 (2006) applicant may file an interlocutory appeal of board orders admitting contentions, but only if the appeal challenges the admissibility of all admitted contentions; CLI-12-12, 75 NRC 607 (2012)
Pa'ina Hawaii, LLC, CLI-08-3, 67 NRC 151, 163 n.46 (2008)  
NRC often refers to the Statement of Considerations as an aid in interpreting the agency’s regulations; LBP-14-9, 80 NRC 52 (2014)

Pa’ina Hawaii, LLC, CLI-08-3, 67 NRC 151, 168 n.73 (2008)  
adequacy of NRC Staff’s review is not a litigable issue in a licensing case; CLI-15-9, 81 NRC 531 (2015)

collection fails because it contests NRC Staff’s safety review rather than the license renewal application; LBP-15-15, 81 NRC 614 n.111 (2015)

Pa’ina Hawaii, LLC, CLI-10-18, 72 NRC 56, 74 (2010)  
because NEPA is premised on a rule of reason, NRC need only consider reasonable alternatives to a proposed action; LBP-11-26, 74 NRC 545 (2011)

general statements by an agency about possible effects and some risk do not constitute the hard look required by NEPA absent a justification of why more definitive information could not be provided; LBP-12-5, 75 NRC 236 (2012)

in assessing greenhouse gas impacts, NRC must devote its resources to taking a hard look at the issue; LBP-11-26, 74 NRC 545 (2011)

NEPA’s hard-look requirement does not allow sweeping generalities about possible effects and risk without a justification as to why more definitive information was not provided; LBP-13-13, 78 NRC 286, 452 (2013)

NRC must rigorously explore and objectively analyze environmental impacts, so that merely offering general statements about possible effects and some risk does not constitute a hard look absent a justification regarding why more definitive information could not be provided; LBP-11-26, 74 NRC 545 (2011); LBP-11-38, 74 NRC 830-31 (2011)

Pa’ina Hawaii, LLC, CLI-10-18, 72 NRC 56, 81 (2010)  
considering the reasonable alternatives analysis, it is only in the depth of the consideration and in the level of detail provided in the corresponding environmental documents that an environmental assessment and an environmental impact statement will differ; LBP-15-11, 81 NRC 439 n.249 (2015)

Pa’ina Hawaii, LLC, CLI-10-18, 72 NRC 56, 87 (2010)  
within 30 days after new information becomes available is a reasonable amount of time for filing a new contention; LBP-15-24, 82 NRC 98 n.195 (2015)

Pa’ina Hawaii, LLC, CLI-10-18, 72 NRC 56, 87-88 (2010)  
contention that relies on testimony marking the first time NRC Staff has addressed an impact at the site is timely; LBP-15-24, 82 NRC 97 n.192 (2015)

material difference must exist between information on which a contention is based and information that was previously available, e.g., a difference between the environmental report and the draft EIS or the draft EIS and the final EIS; CLI-15-1, 81 NRC 7 (2015)

Pa’ina Hawaii, LLC, CLI-10-18, 72 NRC 56, 89 (2010)  
NEPA only requires that the environmental impact statement address those environmental impacts that are reasonably foreseeable; LBP-13-4, 77 NRC 120 (2013)

Pa’ina Hawaii, LLC, CLI-10-18, 72 NRC 56, 93 (2010)  
public comment will be afforded in advance on any generic waste confidence document that NRC issues on remand, be it a fresh rule, a policy statement, an environmental assessment, or an environmental impact statement; CLI-12-16, 76 NRC 67 (2012)

licensing board admitted contentions when petitioner raised a timely argument affirmatively asserting that special circumstances existed under section 51.22(b) that precluded application of the categorical exclusion; LBP-15-26, 82 NRC 182 n.37 (2015)
LEGAL CITATIONS INDEX

CASES

any interested person may challenge the use of a categorical exclusion by presenting special circumstances; LBP-15-26, 82 NRC 181-82 (2015)

Pa‘ina Hawaii, LLC, LBP-06-12, 63 NRC 403, 414 (2006)
contention that challenges the legal sufficiency of the final environmental impact statement is within the scope of the proceeding; LBP-12-18, 76 NRC 157 (2012)
if a contention makes a prima facie allegation that the application omits information required by law, it necessarily presents a genuine dispute with applicant on a material issue and raises an issue plainly material to an essential finding of regulatory compliance needed for license issuance; LBP-15-5, 81 NRC 259 (2015)
petitioners’ contention challenges the sufficiency of the equivalent margins analysis to provide reasonable assurance of reactor safety and is therefore within the scope of the proceeding; LBP-15-20, 81 NRC 849 (2015)
pleading requirements calling for a recitation of facts or expert opinion supporting the issue raised are inapplicable to a contention of omission beyond identifying the regulatively required missing information; LBP-15-5, 81 NRC 258 (2015)

PaineWebber, Inc. v. Bybyk, 81 F.3d 1193, 1201 (2d Cir.1996)
paper to be incorporated into a written instrument by reference must be so referred to and described in the instrument that the paper may be identified beyond all reasonable doubt; LBP-12-24, 76 NRC 515 n.60 (2012)

Parravano v. Babbitt, 70 F.3d 539, 546 (9th Cir. 1995)
the federal trust responsibility to Indian tribes extends not just to the Interior Department, but attaches to the federal government as a whole; LBP-12-24, 76 NRC 520 n.79 (2012)
the federal trust responsibility to Indian tribes rests solely with the federal government and cannot be discharged by applicants; LBP-12-24, 76 NRC 519-20 (2012)

Pennsylvania Power & Light Co. (Susquehanna Steam Electric Station, Units 1 and 2), ALAB-693, 16 NRC 952, 955-56 (1982)
conclusory language is not sufficient to support an appeal; CLI-11-8, 74 NRC 225 (2011)

Pennsylvania Power & Light Co. (Susquehanna Steam Electric Station, Units 1 and 2), LBP-79-6, 9 NRC 291, 295-96 (1979)
although a licensing board is not required to recast contentions to make them acceptable, it is also not precluded from doing so; LBP-11-13, 73 NRC 565 n.199 (2011)
boards may reformulate contentions to eliminate extraneous issues or to consolidate issues for a more efficient proceeding; LBP-12-18, 76 NRC 145 n.76 (2012); LBP-15-5, 81 NRC 262, 270 n.116, 273 (2015)

requirement for a notice of proposed rulemaking is to sufficiently and fairly apprise interested parties of the issues involved, rather than to specify every precise proposal that the agency may ultimately adopt; LBP-15-15, 81 NRC 611 n.94 (2015)

Perfect 10, Inc. v. Google, Inc., 653 F.3d 976, 982 (9th Cir. 2011)
where claimant has not shown a sufficient causal connection between the alleged irreparable harm and the underlying claim, relief will be denied; CLI-12-11, 75 NRC 531 n.39 (2012)

Petition for Rulemaking to Amend 10 C.F.R. § 54.17(c), CLI-11-1, 73 NRC 1, 3 n.5 (2011)
the Commission may consider the rulemaking request of a nonparty as an exercise of its inherent supervisory powers over proceedings; CLI-11-5, 74 NRC 174 n.132 (2011)

Petition for Rulemaking to Amend 10 C.F.R. § 54.17(c), CLI-11-1, 73 NRC 1, 4 (2011)
Commission rarely grants an indefinite or very lengthy stay on the mere possibility of change; CLI-14-6, 79 NRC 449 (2014)

Petition for Rulemaking to Amend 10 C.F.R. § 54.17(c), CLI-11-1, 73 NRC 1, 5-6 (2011)
the ordinary burden to parties pursuing litigation pending the rulemaking do not justify disrupting ongoing reviews; CLI-11-5, 74 NRC 175 (2011)
when a motion to withdraw an application is unopposed and the withdrawal causes no apparent harm to the public or any party, it is appropriate to grant the motion without prejudice or imposition of additional terms; LBP-12-20, 76 NRC 216 (2012)

when a motion to withdraw an application is unopposed and the withdrawal causes no apparent harm to the public or any party, it is appropriate to grant the motion without prejudice or imposition of additional terms; LBP-12-20, 76 NRC 216 (2012)

conditions set by boards on voluntary withdrawals are set on a case-by-case basis, with any conditions tailored to address the particular circumstances of that proceeding; LBP-15-28, 82 NRC 241 (2015)

standard for dismissal with prejudice is not met because the prospect of future litigation is not unusual, being inherent in any dismissal without prejudice; LBP-15-28, 82 NRC 241 (2015)

conditions set by boards on voluntary withdrawals are set on a case-by-case basis, with any conditions tailored to address the particular circumstances of that proceeding; LBP-15-28, 82 NRC 241 (2015)

standard for dismissal with prejudice is not met because the prospect of future litigation is not unusual, being inherent in any dismissal without prejudice; LBP-15-28, 82 NRC 241 (2015)

quick resubmission of specific license amendment request without any change in circumstances would create the appearance of forum shopping; LBP-15-28, 82 NRC 241 n.59 (2015)

NRC Staff need not perform a wholly independent analysis from scratch, but may rely on the scientific data and inferences drawn by another federal agency; LBP-13-4, 77 NRC 213 n.91 (2013)

NRC Staff may rely on the scientific data and inferences drawn by another government agency but need not slavishly defer to that agency’s findings or its conclusions about water quality; LBP-13-4, 77 NRC 213-14 (2013)

party seeking a stay must specifically and reasonably demonstrate an injury, not merely allege generalized harm; LBP-15-2, 81 NRC 57 (2015)

hard look at the environmental justice aspects of relicensing having been taken, the Commission, without additional Staff action, can now with respect to the EJ issue, make an informed decision whether to grant the requested license; LBP-13-13, 78 NRC 544 n.2107 (2013)

hearing can provide the public venting that the circulation of an amended environmental impact statement would otherwise provide; LBP-13-13, 78 NRC 525 (2013)

adjudicatory record and board decision and any Commission appellate decisions become, in effect, part of the final environmental impact statement; CLI-11-6, 74 NRC 209 (2011); LBP-11-38, 74 NRC 832 (2011); LBP-12-5, 75 NRC 239 (2012); LBP-12-17, 76 NRC 83 (2012); LBP-14-9, 80 NRC 67 (2014)

section 51.102(c) merges the final supplemental environmental impact statement with any relevant licensing board decision; CLI-15-6, 81 NRC 387 (2015)

section 51.102(c) replaces a previous version that expressly permitted licensing boards to modify the content of an environmental impact statement; CLI-15-6, 81 NRC 388 (2015)
LEGAL CITATIONS INDEX

CASES

Philadelphia Electric Co. (Limerick Generating Station, Units 1 and 2), ALAB-819, 22 NRC 681, 707 (1985)
  environmental impact statement may be deemed modified by the hearing record because hearing procedures allow for additional and a more rigorous public scrutiny of the FSEIS than does the usual circulation for comment; CLI-15-6, 81 NRC 388 (2015)
  licensing board’s hearing arguably allows for additional and more rigorous public scrutiny of the final environmental impact statement than does the usual circulation for comment; LBP-14-3, 86 NRC 66-656 (2014)

Philadelphia Electric Co. (Peach Bottom Atomic Power Station, Units 2 and 3), ALAB-216, 8 AEC 13, 20, aff’d in part on other grounds, CLI-74-32, 8 AEC 217 (1974)
  adjudication is not the proper forum for challenging applicable statutory requirements or the basic structure of the agency’s regulatory process; LBP-13-6, 77 NRC 284 (2013)

  contention is inadmissible if it fails to raise a material issue in dispute or raises an issue that is not susceptible to resolution; LBP-11-23, 74 NRC 345 (2011)
  a contention must be rejected if it attacks applicable statutory requirements or regulations, challenges the basic structure of the regulatory process, merely expresses petitioner’s view of policy, seeks to raise an issue improper for adjudication in the proceeding or not applicable to the facility in question, or raises an issue that is not concrete or is otherwise not litigable; LBP-11-6, 73 NRC 170 n.16 (2010)
  challenges to the basic regulatory structure of NRC’s design basis and generic environmental impacts already assessed through rulemaking are inadmissible; LBP-11-32, 74 NRC 663 (2011)
  contention admissibility criteria are strict by design but should not be turned into a fortress to deny intervention; LBP-15-20, 81 NRC 855-56 (2015)
  intervention petitioner may not attack generic NRC requirements or regulations or express generalized grievances about NRC policies; CLI-15-9, 81 NRC 527-28 n.98 (2015)

Philadelphia Electric Co. (Peach Bottom Atomic Power Station, Units 2 and 3), ALAB-216, 8 AEC 13, 20-21 & n.33, aff’d in part on other grounds, CLI-74-32, 8 AEC 217 (1974)
  contention that simply states the petitioner’s views about what regulatory policy should be does not present a litigable issue; LBP-13-6, 77 NRC 284 (2013)

Philadelphia Electric Co. (Peach Bottom Atomic Power Station, Units 2 and 3), ALAB-216, 8 AEC 13, 21 (1974)
  that the contention admissibility rule is designedly strict is not to say that it should serve as a fortress to deny intervention; LBP-11-6, 73 NRC 171 (2010)

Phillips v. Cohen, 400 F.3d 388, 399 (6th Cir. 2005)
  when presented with conflicting expert opinions, licensing boards should be mindful that summary disposition is rarely proper; LBP-11-7, 73 NRC 263 (2011); LBP-12-23, 76 NRC 478 (2012)

Piedmont Heights Social Club, Inc. v. Moreland, 637 F.2d 430, 436 (5th Cir. 1981)
  discussion of the no-action alternation need only include feasible, nonspeculative alternatives; LBP-12-8, 75 NRC 569 (2012)

  justification “in substance or in the main” is equated with the “reasonable basis both in law and fact” standard that has been applied by a majority of federal appellate courts; LBP-11-8, 73 NRC 368 n.95 (2011)

  for the purposes of the Equal Access to Justice Act, the government’s position should be considered substantially justified if a reasonable person could think it correct, that is, if it has a reasonable basis in law and fact; LBP-11-8, 73 NRC 368 (2011)

  the fact that one other court agreed or disagreed with the government does not establish whether its position was substantially justified; LBP-11-8, 73 NRC 368 n.100 (2011)

Pilgrim v. Littlefield, 92 F.3d 413, 416 (6th Cir. 1996)
  lenient treatment generally accorded to pro se litigants has limits; CLI-15-18, 82 NRC 146 n.53 (2015)
LEGAL CITATIONS INDEX

CASES

summary judgment should be granted only where the truth is clear; LBP-11-14, 73 NRC 595 (2011);
LBP-12-23, 76 NRC 450, 466 (2012)

boards must view the record in the light most favorable to the summary disposition opponent;
LBP-12-19, 76 NRC 190 (2012)

Portland General Electric Co. (Pebble Springs Nuclear Plant, Units 1 and 2), CLI-76-27, 4 NRC 610,
613-14 (1976)
in determining whether intervention petitioner has alleged an interest that may be affected by the
proceeding within the meaning of section 189a of the Atomic Energy Act, contemporaneous judicial
concepts of standing should be used; LBP-14-4, 79 NRC 350 (2014)

Portland General Electric Co. (Pebble Springs Nuclear Plant, Units 1 and 2), CLI-76-27, 4 NRC 610, 617
(1976)
six criteria for discretionary intervention were first articulated in this case; LBP-14-4, 79 NRC 333
n.70 (2014)

Portland General Electric Co. (Trojan Nuclear Plant), ALAB-534, 9 NRC 287, 289-90 n.6 (1979)
contentions that fall outside the specified scope of the proceeding are inadmissible; LBP-12-18, 76

Portland General Electric Co. (Trojan Nuclear Plant), ALAB-796, 21 NRC 4, 5 (1985)
adjudicatory proceedings terminate if intervenor either settles or abandons all of its contentions;
LBP-11-22, 74 NRC 271 n.64 (2011)
if parties settle their dispute after a hearing, the board should dismiss the adjudication; LBP-11-22, 74
NRC 283 (2011)

Potential Implications of Chernobyl Accident for All NRC-Licensed Facilities, DD-87-21, 26 NRC 520
(1987)
post-accident request for suspension of proceeding was denied because no danger to public health and
safety would result from mere continuation of the adjudicatory proceeding; CLI-11-5, 74 NRC 161
(2011)

Potomac Alliance v. NRC, 682 F.2d 1030, 1035 (D.C. Cir. 1982)
duty to prepare an environmental impact statement and to identify and consider every significant
environmental impact is tempered by the rule of reason; LBP-13-4, 77 NRC 120 (2013)
legal adequacy of a final environmental impact statement is assessed under the rule of reason;
LBP-13-4, 77 NRC 210 (2013)
NEPA only requires that the environmental impact statement address those impacts that are reasonably
foreseeable; LBP-13-4, 77 NRC 120 (2013)

Potomac Electric Power Co. (Douglas Point Nuclear Generating Station, Units 1 and 2), ALAB-218, 8 AEC
79, 84 (1974)
administrative agencies are allowed to address issues of general applicability through rulemaking
instead of individual adjudications, and the choice made between proceeding by general rule or by
individual, ad hoc, litigation is one that lies primarily within the informed discretion of the
administrative agency; LBP-14-16, 80 NRC 193 (2014)

Potomac Electric Power Co. (Douglas Point Nuclear Generating Station, Units 1 and 2), ALAB-218, 8 AEC
79, 85 (1974)
challenges to NRC rules and regulations are generally prohibited with limited exceptions in view of
expanding opportunities for participation in Commission rulemaking proceedings and increased
emphasis on rulemaking proceedings as the appropriate forum for settling basic policy issues;
CLI-13-7, 78 NRC 207 n.32 (2013)
consideration in adjudicatory proceedings of issues presently to be taken up by the Commission in
rulemaking would be a wasteful duplication of effort; LBP-14-1, 79 NRC 95 n.293 (2014)
licensing boards should not accept in individual license proceedings contentions that are or are about
to become the subject of general rulemaking by the Commission; CLI-12-16, 76 NRC 67 n.9 (2012);
CLI-14-8, 80 NRC 79 n.27 (2014); CLI-15-9, 81 NRC 534 n.3 (2015); CLI-15-11, 81 NRC 547 n.5
(2015); CLI-15-12, 81 NRC 552 n.5 (2015); LBP-14-16, 80 NRC 193 (2014)
licensing proceedings are not the appropriate venue for generic rulemaking issues; CLI-15-9, 81 NRC
530 (2015)
to the extent that NRC takes action with respect to waste confidence on a case-by-case basis, litigants
can challenge such site-specific agency actions in the adjudicatory process; CLI-12-16, 76 NRC 67
(2012)

Potomac Electric Power Co. (Douglas Point Nuclear Generating Station, Units 1 and 2), ALAB-218, 8 AEC
79, 85, 89 (1974)
contention that attacks a Commission rule, or which seeks to litigate a matter that is, or clearly is
about to become, the subject of a rulemaking, is inadmissible; LBP-13-6, 77 NRC 284 (2013)
no rule or regulation of the Commission, or any provision thereof, concerning the licensing of
production and utilization facilities, source material, special nuclear material, or byproduct material is
subject to attack by way of discovery, proof, argument, or other means in any adjudicatory
proceeding; CLI-11-8, 74 NRC 229 (2011)

Potomac Electric Power Co. (Douglas Point Nuclear Generating Station, Units 1 and 2), ALAB-218, 8 AEC
79, 89 (1974)
borders should not accept in individual license proceedings contentions that are, or are about to
become, the subject of rulemaking by the Commission; LBP-12-24, 76 NRC 510 (2012)

Power Authority of the State of New York (James A. FitzPatrick Nuclear Power Plant; Indian Point, Unit 3),
CLI-00-22, 52 NRC 266, 290-91 (2000)
any discretionary diversion from the usual Subpart M procedural track will be rare, requiring
extraordinary and unusual circumstances, and all requests to date to provide a non-Subpart M
hearing in a license transfer case have been denied; CLI-14-5, 79 NRC 260 n.31 (2014)

Power Authority of the State of New York (James A. FitzPatrick Nuclear Power Plant; Indian Point, Unit 3),
CLI-00-22, 52 NRC 266, 290-91 & nn.10-11 (2000)
Subpart M logically applies to all license transfer hearing requests, regardless of who files them,
because the types of issues litigated (e.g., financial assurance, technical qualifications, foreign
ownership, and staffing levels) are likely to be similar regardless of whether they are initiated by
intervention petitions or by challenges to a Staff action; CLI-14-5, 79 NRC 260 (2014)
when promulgating Subpart M, the Commission was well aware that most license transfer issues
would be financial in nature; CLI-14-5, 79 NRC 260 n.32 (2014)

Power Authority of the State of New York (James A. FitzPatrick Nuclear Power Plant; Indian Point, Unit 3),
CLI-00-22, 52 NRC 266, 291 (2000)
separate hearings have been shown to be appropriate for cases governed by different procedural rules;
CLI-14-5, 79 NRC 261 n.38 (2014)

Power Authority of the State of New York (James A. FitzPatrick Nuclear Power Plant; Indian Point, Unit 3),
CLI-00-22, 52 NRC 266, 293 (2000)
an organization that seeks to intervene in a representative capacity must show that the interests it
seeks to protect are germane to its own purpose, and identify, by name and address at least one
member who qualifies for standing in his or her own right; LBP-11-13, 73 NRC 545 (2011)

Power Authority of the State of New York (James A. Fitzpatrick Nuclear Power Plant; Indian Point, Unit 3),
CLI-00-22, 52 NRC 266, 295 (2000)
Commission grants standing to a governmental body within close proximity to a proposed nuclear
reactor under the proximity presumption, effectively dispensing with the need to make an affirmative
showing of injury, causation, and redressability; LBP-15-19, 81 NRC 819 n.17 (2015)
mere notice pleading is insufficient, but requirement for contention specificity and factual support
rather than vague or conclusory statements is not intended to prevent intervention when material and
concrete issues exist; LBP-15-20, 81 NRC 853 n.140 (2015)
where a municipality seeks to participate in a reactor licensing proceeding that does not involve a
facility within the municipality’s boundaries, it can, for purposes of establishing standing, rely on the
50-mile proximity presumption to the same extent as an individual or an organization; LBP-11-6, 73
NRC 170 n.14 (2010)

Power Authority of the State of New York (James A. FitzPatrick Nuclear Power Plant; Indian Point, Unit 3),
CLI-00-22, 52 NRC 266, 308 n.52 (2000)
decommissioning trusts are reserved for decommissioning as defined in 10 C.F.R. 50.2; LBP-15-24, 82
NRC 80 n.69 (2015)

**CASES**

*Power Authority of the State of New York (James A. FitzPatrick Nuclear Power Plant; Indian Point, Unit 3), CLI-01-14, 53 NRC 488, 514 (2001)*

- motion to strike may be granted where a pleading or other submission contains information that is irrelevant; LBP-14-6, 79 NRC 432-33 (2014)

*Power Authority of the State of New York (James A. FitzPatrick Nuclear Power Plant; Indian Point, Unit 3), LBP-01-4, 53 NRC 121, 127 (2001)*

- intervenors are not permitted to wait until information reappears in the draft environmental impact statement to file their contentions; LBP-13-9, 78 NRC 60 (2013)

- it is fair to read the AEC and NRC history as a de facto acquiescence in and ratification of the Commission’s licensing procedure by Congress; CLI-15-4, 81 NRC 227 (2015)

*Powertech (USA), Inc. (Dewey-Burdock In Situ Uranium Recovery Facility), LBP-10-16, 72 NRC 361, 378-80 (2010)*

- the in situ recovery process, which is also referred to as the in situ leach process, is described; LBP-12-3, 75 NRC 176 n.3 (2012)

*Powertech (USA), Inc. (Dewey-Burdock In Situ Uranium Recovery Facility), LBP-10-16, 72 NRC 361, 384-85 (2010)*

- as distance increases from the in situ recovery facility, petitioner with an upgradient water source must expect to provide the board with some analysis as to how any contamination will affect any wells alleged to be impacted by the facility; LBP-12-3, 75 NRC 182 n.13 (2012)

*Powertech (USA), Inc. (Dewey-Burdock In Situ Uranium Recovery Facility), LBP-10-16, 72 NRC 361, 386 (2010)*

- for petitioners claiming to be using water from the same aquifer as for the uranium ore source, regardless of distance from the facility in question, licensing boards have found that a plausible pathway connecting the proposed mining operation to their water source has been shown so as to establish petitioners’ standing; LBP-12-3, 75 NRC 181 n.11 (2012)

*Powertech (USA), Inc. (Dewey-Burdock In Situ Uranium Recovery Facility), LBP-10-16, 72 NRC 361, 386-88 (2010)*

- where an ore zone and petitioner’s water source existed in separate aquifers, the circumstances involved did not support a determination that the petitioners had established their right to intervene; LBP-12-3, 75 NRC 181-82 n.11 (2012)

*Powertech (USA), Inc. (Dewey-Burdock In Situ Uranium Recovery Facility), LBP-10-16, 72 NRC 361, 388 (2010)*

- when petitioners considerably upgradient of the mining area fail to explain how contaminated material from the in situ recovery site might plausibly enter their drinking water, they fail to demonstrate they fulfill the causation element necessary to establish their standing; LBP-12-3, 75 NRC 182 (2012)

*Powertech (USA), Inc. (Dewey-Burdock In Situ Uranium Recovery Facility), LBP-10-16, 72 NRC 361, 389 (2010)*

- organizational interest in protecting natural resources with a focus on groundwater contamination from uranium mining is insufficient to establish organizational standing; LBP-13-6, 77 NRC 280 (2013)

- organizational standing is footed in the capacity of an organization to show a discrete injury to its organizational interests; LBP-13-6, 77 NRC 279-80 (2013)

*Powertech (USA), Inc. (Dewey-Burdock In Situ Uranium Recovery Facility), LBP-10-16, 72 NRC 361, 390 (2010)*

- an individual may not intervene in his or her own right while simultaneously being represented by another petitioner in the same proceeding; LBP-11-13, 73 NRC 550 n.90 (2011)

- representational standing granted in a different proceeding on the basis of the showing of an individual member’s standing cannot be the supporting basis for the organization’s representational standing in another proceeding where that member does not provide the basis for standing; LBP-13-6, 77 NRC 279 n.16 (2013)

394
boards will not hunt for information that the agency’s procedural rules require be explicitly identified and fully explained; CLI-11-8, 74 NRC 222 (2011)

tribal consultation contentions have been dismissed as prematurely filed, albeit without prejudice to their renewal following issuance of the Staff’s draft environmental impact statement; LBP-13-6, 77 NRC 287 (2013)

contention asserting that NEPA requires a groundwater baseline characterization for an in situ recovery site is admissible; LBP-12-3, 75 NRC 193 (2012)

environmental contention regarding cumulative impact on groundwater quantity of the in situ recovery project and the planned expansion satisfies admissibility requirements; LBP-12-3, 75 NRC 200 (2012)

contentions that raise matters that impermissibly challenge a Commission rule are outside the scope of the proceeding; LBP-13-6, 77 NRC 297-98 (2013)

any NEPA-based challenge to the efficacy of, or the Staff’s reliance on, the state permitting process relative to the Staff’s environmental review must await the Staff’s initial environmental review document; LBP-13-6, 77 NRC 299-300 (2013)

admitted contentions challenging applicant’s environmental report may function as challenges to similar portions of NRC Staff’s NEPA document; LBP-15-11, 81 NRC 409-10 (2015)

contentions of adequacy may migrate into contentions of omission; LBP-13-10, 78 NRC 133 (2013)

general discussion about contentions of omission and contentions of adequacy is provided; LBP-13-9, 78 NRC 37, 47-48 (2013)

it is the duty of NRC Staff, not applicant, to consult with interested tribes concerning the proposed site in the context of a National Historic Preservation Act contention; LBP-15-5, 81 NRC 280 n.178 (2015)

admitted contentions challenging applicant’s environmental report may function as challenges to similar portions of NRC Staff’s NEPA document; LBP-15-11, 81 NRC 409-10 (2015)

contentions of adequacy may migrate into contentions of omission; LBP-13-10, 78 NRC 133 (2013)

general discussion about contentions of omission and contentions of adequacy is provided; LBP-13-10, 78 NRC 132 n.6 (2013)

it is the duty of NRC Staff, not applicant, to consult with interested tribes concerning the proposed site in the context of a National Historic Preservation Act contention; LBP-15-5, 81 NRC 280 n.178 (2015)

it is not clear NRC Staff relied upon the generic environmental impact statement when preparing the draft supplemental EIS because it was not incorporated by reference or mentioned in any other manner; LBP-15-11, 81 NRC 440 n.258 (2015)

principle of expressio unis est exclusio alterius is discussed; LBP-15-11, 81 NRC 440 n.258 (2015)
LEGAL CITATIONS INDEX

CASES

Powertech USA, Inc. (Dewey-Burdock In Situ Uranium Recovery Facility), LBP-13-9, 78 NRC 37, 86-88 (2013)

purpose of the timeliness rules is not to trap petitioners into a no-win situation where a contention is
called premature if filed in the original petition and untimely if petitioners wait for a potential event

PPL Bell Bend, LLC (Bell Bend Nuclear Power Plant), CLI-10-7, 71 NRC 133, 138 (2010)
the proximity presumption applies when an individual or organization, or an individual authorizing an
organization to represent his or her interests seeks to establish its representational standing, resides
within 50 miles of the proposed facility, or has frequent contacts with the area affected by the
proposed facility; LBP-11-6, 73 NRC 169 (2010); LBP-11-16, 73 NRC 653 (2011)

PPL Bell Bend, LLC (Bell Bend Nuclear Power Plant), CLI-10-7, 71 NRC 133, 138 & n.27 (2010)
standing in each agency proceeding depends on the factual circumstances associated with that case;
LBP-13-6, 77 NRC 276 (2013)

PPL Bell Bend, LLC (Bell Bend Nuclear Power Plant), CLI-10-7, 71 NRC 133, 139 (2010)
if petitioner’s factual claims in support of its standing are contested, untenable, conjectural, or
conclusory, a board need not uncritically accept such assertions, but may weigh those informational
claims and exercise its judgment about whether standing has been satisfied; LBP-12-3, 75 NRC 177
(2012); LBP-13-6, 77 NRC 270 (2013)
intervention petitioner bears the burden of providing facts sufficient to establish its standing;
LBP-11-21, 74 NRC 122 (2011); LBP-12-3, 75 NRC 177 (2012); LBP-13-6, 77 NRC 270 (2013)
proximity-based standing based on frequent contacts is a determination to be made by a licensing
board after weighing all the information provided; LBP-15-17, 81 NRC 775 n.140 (2015)

PPL Bell Bend, LLC (Bell Bend Nuclear Power Plant), CLI-10-7, 71 NRC 133, 139-40 (2010)
intervenor is entitled to cure deficiencies with regard to standing when it files its reply; LBP-14-4, 79
petitioner may correct or supplement its showing on standing; LBP-11-21, 74 NRC 123 (2011)

PPL Bell Bend, LLC (Bell Bend Nuclear Power Plant), CLI-10-7, 71 NRC 133, 140 (2010)
petitioning member’s affidavit must be sufficiently specific to show frequent contact within 50 miles
of the plant; LBP-15-17, 81 NRC 775 (2015)
statement that petitioner lives, recreates, and conducts business within the vicinity of the plant is too
vague to demonstrate a substantial or regular presence within 50 miles of the plant; LBP-15-17, 81
NRC 775-76 (2015)
to demonstrate frequent contacts within the 50-mile site radius under the proximity presumption,
petitioner must show that his/her contacts are substantial and regular, and must describe them with
specificity; LBP-15-17, 81 NRC 775 (2015)

PPL Bell Bend, LLC (Bell Bend Nuclear Power Plant), LBP-09-18, 70 NRC 385, 396 (2009)
NRC is lenient in permitting pro se petitioners the opportunity to cure procedural defects in petitions
to intervene regarding standing; LBP-11-13, 73 NRC 549 (2011)

PPL Bell Bend, LLC (Bell Bend Nuclear Power Plant), LBP-09-18, 70 NRC 385, 396-97 (2009), aff’d on
other grounds, CLI-10-7, 71 NRC 133, 141 (2010)
in assessing whether petitioner has demonstrated its standing, licensing boards are to construe petitions
in favor of petitioners; LBP-12-3, 75 NRC 177 (2012)

PPL Bell Bend, LLC (Bell Bend Nuclear Power Plant), LBP-11-27, 74 NRC 591 (2011)
Fukushima-related contentions were dismissed as premature; CLI-12-2, 75 NRC 70 (2012); LBP-11-39,
74 NRC 870 (2011)

PPL Bell Bend, LLC (Bell Bend Nuclear Power Plant), LBP-11-27, 74 NRC 591, 594 (2011), motion to
reinstate contention denied, Luminant Generation Co., LLC (Comanche Peak Nuclear Power Plant, Units
3 and 4), LBP-11-36, 74 NRC 768 (2011)
admissibility of Fukushima-related contentions is determined; LBP-11-37, 74 NRC 779 n.3 (2011)
PPL Bell Bend, LLC (Bell Bend Nuclear Power Plant), LBP-11-27, 74 NRC 591, 599-602 (2011)
claims for relief from Fukushima-related events are premature; LBP-11-37, 74 NRC 783-84 (2011)
PPL Bell Bend, LLC (Bell Bend Nuclear Power Plant), LBP-11-27, 74 NRC 591, 601-02 (2011)
Fukushima-related contention was found inadmissible because it was premature; LBP-11-34, 74 NRC
699 (2011)

396
LEGAL CITATIONS INDEX

CASES

PPL Bell Bend, LLC (Bell Bend Nuclear Power Plant), LBP-11-27, 74 NRC 591, 602 n.54 (2011)
petitioner’s attempt to tie NEPA environmental justice claim to Fukushima Task Force report is an improper effort to interpose concerns that could have been raised at the outset of the proceeding; LBP-11-37, 74 NRC 785 (2011)

PPL Susquehanna LLC (Susquehanna Steam Electric Station, Units 1 and 2), CLI-07-25, 66 NRC 101, 104-07 (2007)
alleged violations of state law are outside the scope of, and not material to, an adjudicatory proceeding; LBP-15-24, 82 NRC 84 n.93 (2015)
matters within the purview of the state public service board are outside the jurisdiction of the licensing board, which is limited to considering only the license amendment request and NRC regulations; LBP-15-24, 82 NRC 84 (2015)

PPL Susquehanna LLC (Susquehanna Steam Electric Station, Units 1 and 2), CLI-07-25, 66 NRC 101, 105 (2007)
NRC’s adjudicatory process is not the proper forum for investigating alleged violations that are primarily the responsibility of other federal, state, or local agencies; LBP-11-6, 73 NRC 249 n.115 (2010)

PPL Susquehanna LLC (Susquehanna Steam Electric Station, Units 1 and 2), LBP-07-4, 65 NRC 281, 299-302 (2007)
reply brief may not be used to present entirely new arguments in support of an existing contention or to propose a new contention, but board may consider information in a reply that legitimately amplifies an issue presented in the original petition; LBP-15-5, 81 NRC 285 n.223 (2015)

PPL Susquehanna LLC (Susquehanna Steam Electric Station, Units 1 and 2), LBP-07-4, 65 NRC 281, 303-04 (2007)
bare assertions in a contention run afoul of NRC’s intention to focus the hearing process and provide notice to the other parties; LBP-11-21, 74 NRC 128 (2011)
contention rule is strict by design and does not permit the filing of a vague, unparticularized contention, unsupported by affidavit, expert, or documentary support; LBP-13-9, 78 NRC 48 n.35 (2013)
generalized grievances with sufficiency of NRC Staff’s analysis or the adequacy of included documentation are not enough to raise a proposed contention to the level of admissibility; LBP-14-5, 79 NRC 385 n.38 (2014)

PPL Susquehanna LLC (Susquehanna Steam Electric Station, Units 1 and 2), LBP-07-10, 66 NRC 1, 11 (2007)
even if undisputed, the jurisdictional nature of standing in NRC proceedings requires independent examination by presiding officer; LBP-11-16, 73 NRC 653-54 (2011)

PPL Susquehanna LLC (Susquehanna Steam Electric Station, Units 1 and 2), LBP-07-10, 66 NRC 1, 18, aff’d on other grounds, 66 NRC 101 (2007)
extended power uprate proceedings trigger application of the 50-mile proximity presumption, given that such license applications entail an obvious increase in the potential for offsite consequences; LBP-11-29, 74 NRC 619 (2011)

PPL Susquehanna LLC (Susquehanna Steam Electric Station, Units 1 and 2), LBP-07-10, 66 NRC 1, 23 (2007)
generalized grievances with sufficiency of NRC Staff’s analysis or the adequacy of included documentation are not enough to raise a proposed contention to the level of admissibility; LBP-13-9, 78 NRC 48 n.35 (2013); LBP-14-5, 79 NRC 385 (2014)

Preservation Coalition, Inc. v. Pierce, 667 F.2d 851, 859 (9th Cir. 1982)
compliance with the National Historic Preservation Act does not relieve a federal agency of the duty of complying with the environmental impact statement requirement to the fullest extent possible; LBP-15-16, 81 NRC 654-55 (2015)

organizational standing requirements are outlined; CLI-11-3, 73 NRC 621 n.39 (2011)

397
organization seeking standing as a party must show either a discrete injury to its own institutional interests or authorization to represent an individual who would have standing in his or her own right; LBP-12-24, 76 NRC 508 (2012)

the interests a municipality seeks to represent on behalf of its residents are germane to its own purposes in the context or standing; LBP-11-6, 73 NRC 170 n.15 (2010)

as a sovereign body, Native American tribes maintain a strong interest in its members’ welfare such that its organizational purpose is germane to the interests it seeks to represent in proceeding; LBP-13-6, 77 NRC 272 n.15 (2013)

potential harm necessary to demonstrate standing in NRC proceedings need not relate to physical or bodily injury; CLI-12-13, 75 NRC 688 (2012)

interests that an organization seeks to protect must be germane to its own purpose, and neither the asserted claim nor the requested relief must require an individual member to participate in the organization’s legal action; LBP-11-6, 73 NRC 169 (2010)

when an organization seeks to intervene on behalf of its members, it may establish standing by showing that one or more of its members would individually meet the standing requirements, the member has authorized the organization to represent its interest, and the interest represented is germane to the organization’s purpose; LBP-15-13, 81 NRC 463 (2015)

the Commission will defer to board rulings on standing absent an error of law or abuse of discretion; CLI-12-12, 75 NRC 608 (2012)

routine contention admissibility decisions do not affect the basic structure of a proceeding in a pervasive or unusual manner; CLI-12-13, 75 NRC 688 (2012)

contention admissibility decisions generally are not considered to be extraordinary for purposes of interlocutory appellate review, particularly where petitioner has been admitted as a party and has other contentions pending; CLI-13-3, 77 NRC 55 (2013)
LEGAL CITATIONS INDEX

CASES

license conditions can be an acceptable method for providing reasonable assurance of financial qualifications; LBP-14-3, 79 NRC 311 (2014)

licensing board imposes a license condition directing implementation of a surveillance program for explosively actuated valves prior to fuel load; CLI-12-2, 75 NRC 93 (2012)
the Commission may formulate and impose a license condition in an adjudicatory order; CLI-12-9, 75 NRC 461 (2012)

to be an acceptable method for providing reasonable assurance of financial qualifications, a proposed license condition must be ministerial and by its very nature require and be readily susceptible to post-licensing verification such that the NRC Staff is not deferring its safety finding through the use of the license condition; LBP-14-3, 79 NRC 311 (2014)

NRC Staff verification of Fukushima-related license conditions should be a straightforward matter of applying a defined set of requirements; CLI-12-2, 75 NRC 129 (2012)

when contentions in contested hearings are purportedly resolved by license conditions, the Commission has stated that such conditions must be drawn very precisely; LBP-12-21, 76 NRC 240 n.122 (2012)

to the extent that the board’s admissibility decisions regarding contentions are appealable at the end of the case, it makes sense for the board to consider all related arguments at the same time; CLI-11-6, 74 NRC 210 (2011)

when a petition for review is filed with the Commission at the same time as a motion for reconsideration is filed with the board, the Commission will delay considering the petition for review until after the board has ruled; CLI-12-5, 75 NRC 306 n.23 (2012)

correct legal ruling typically does not warrant interlocutory review because such rulings can be reviewed on appeal from partial initial decisions or a final decision; CLI-11-6, 74 NRC 208 n.31 (2011); CLI-15-17, 82 NRC 37, 44 (2015); CLI-15-24, 82 NRC 335 (2015)
interlocutory review of a board decision that denied reconsideration of a contention admissibility determination was declined; CLI-15-24, 82 NRC 335 (2015)

in the absence of some showing of substantial prior misdeeds, an applicant/licensee will be presumed to follow the agency’s regulatory requirements, including the directives in its license; LBP-15-3, 81 NRC 140-41 (2015)
it is presumed that applicants intend to comply with state law; LBP-11-16, 73 NRC 678 n.185 (2011) petitioner impermissibly assumes that applicant will violate applicable state law regarding its treatment of wells at the site; LBP-11-16, 73 NRC 676 (2011)

not all license commitments must be converted into license conditions in order to be enforceable; LBP-14-3, 79 NRC 308 n.258 (2014)
Legal Citations Index

Cases

review of a board’s certified question that raises a significant and novel issue whose early resolution will materially advance the orderly disposition of the proceeding is granted; CLI-11-4, 74 NRC 2 (2011)

exemption requests ordinarily do not trigger hearing rights when an already-licensed facility is asking for relief from performing a duty imposed by NRC regulations; LBP-15-24, 82 NRC 93-94 & n.163 (2015)

because resolution of a rule exemption request directly affects licensability of the proposed facility, the exemption raises material questions directly connected to an agency licensing action and thus comes within the hearing rights of interested parties; CLI-13-1, 77 NRC 10 n.37 (2013)

exemptions are the sort of directly related and dependent exemption-related issues that are within the scope of a license amendment proceeding; LBP-15-24, 82 NRC 82 (2015)

exemption cannot remove a matter germane to a licensing proceeding from consideration in a hearing, assuming an interested party raises an admissible contention thereon; LBP-15-24, 82 NRC 76 (2015)
exemptions ordinarily do not trigger hearing rights when an already-licensed facility is asking for relief from performing a duty imposed by NRC regulations; LBP-15-18, 81 NRC 797 (2015)
hearing on exemption-related matters is necessary insofar as resolution of the exemption request directly affects the licensability of a proposed fuel storage site and the exemption raises material questions directly connected to an agency licensing action; LBP-15-18, 81 NRC 797 (2015)

Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), CLI-01-12, 53 NRC 459, 467 n.3 (2001)
exemption request is subject to a hearing where the plant already has a license and is seeking an exemption from the decommissioning financial assurance requirements based on an earlier exemption that it had received during its license renewal; LBP-15-24, 82 NRC 76 (2015)

the choice between rulemaking and adjudication (i.e., issuing orders or other license revisions) is within the agency’s discretion; LBP-11-11, 73 NRC 505-06 (2011)

NUREGs are merely guidance documents and thus not legally binding; LBP-13-6, 77 NRC 291 (2013)

where no Staff guidance was available for the particular type of facility undergoing license review, the board reasonably selected a standard for a facility most like the facility under review; CLI-15-6, 81 NRC 358 n.86 (2015)
**LEGAL CITATIONS INDEX**

**CASES**

petitions to suspend multiple license renewal proceedings in view of an Inspector General’s report on the agency’s license renewal process were considered pursuant to the Commission’s inherent supervisory authority over agency proceedings; CLI-11-5, 74 NRC 158 (2011) 
requests to suspend or hold proceedings in abeyance following the September 11 terrorist attacks, as well as more recently, were considered pursuant to the Commission’s inherent supervisory authority over agency proceedings; CLI-11-5, 74 NRC 158 (2011)

post-9/11 suspension was neither necessary nor appropriate where shipments of spent fuel to the facility were at least 2 years down the road; CLI-11-5, 74 NRC 161 (2011)

for suspension of licensing proceedings, petitioners must show that continuation of proceedings, pending consideration of a rulemaking petition, would jeopardize the public health and safety, prove an obstacle to fair and efficient decisionmaking, or prevent appropriate implementation of any pertinent rule or policy changes that might emerge from NRC’s continued evaluation of the impacts of the Fukushima accident; CLI-11-1, 73 NRC 5 (2011); CLI-11-5, 74 NRC 158, 174 (2011); LBP-11-33, 74 NRC 679 n.5 (2011); LBP-11-34, 74 NRC 691 (2011) 
petitioners asserted that NRC actions following the events of September 11, 2001, and the accident at Fukushima Dai-ichi were insufficient to satisfy NRC’s general obligation under the Atomic Energy Act to protect public health and safety; CLI-15-4, 81 NRC 231 (2015) 
three criteria are applied to determine whether to suspend an adjudication; CLI-12-6, 75 NRC 373 (2012); CLI-14-7, 80 NRC 7 (2014)

petition for suspension of proceeding following 9/11 attack was denied because even if the licensing, construction, and shipping processes went forward as planned, no radiological materials would be present onsite for at least 2 years, so there was no immediate threat to public safety; CLI-11-5, 74 NRC 156 (2011) 
the Commission declined to stay dry cask storage proceedings pending requested rule changes; CLI-11-1, 73 NRC 5 (2011)

longstanding NRC practice has been to limit orders delaying proceedings to the duration and scope necessary to promote the Commission’s dual goals of public safety and timely adjudication; CLI-11-1, 73 NRC 3-4 (2011)

NRC has a responsibility to go forward with other regulatory and enforcement activities even while the agency conducts its review of the Fukushima accident; CLI-11-5, 74 NRC 163-64 (2011)

petition for suspension of proceeding following 9/11 attack was denied because the interest in efficient adjudication would best be served if the proceeding went forward to resolve the numerous safety and environmental issues, many with no link to terrorism at issue; CLI-11-5, 74 NRC 157 (2011)

because the Commission will have an opportunity to take a fresh look at concerns petitioners have expressed once the particulars of their rulemaking petition have been scrutinized by public comment and agency review, holding up proceedings is not necessary to ensure that the public will realize the full benefit of ongoing regulatory review; CLI-11-1, 73 NRC 5 (2011)

for licenses that NRC issues before completing its Fukushima review, any new Fukushima-driven requirements can be imposed later, if necessary to protect the public health and safety; CLI-11-5, 74 NRC 166 (2011); CLI-15-19, 82 NRC 158 n.39 (2015)

401
petition for suspension of proceeding following 9/11 attack was denied because continuing the proceeding would not thwart regulatory review and suspending the proceeding was not necessary to guarantee that the full benefit of the agency’s post-September 11 review would be realized at the proposed facility; CLI-11-5, 74 NRC 157 (2011)

_Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), CLI-02-20, 56 NRC 147, 154 (2002)_

significant, high, and adverse disparate impacts are necessary to form a valid environmental justice contention; LBP-12-24, 76 NRC 522 (2012)

_Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), CLI-02-20, 56 NRC 147, 156 (2002)_

environmental justice, as applied to the NRC, means that the agency will make an effort under NEPA to become aware of the demographic and economic circumstances of local communities; LBP-13-13, 78 NRC 523 (2013)

purpose of the final supplemental environmental impact statement is to inform the decisionmaking agency and the public of a broad range of environmental impacts that will result, with a fair degree of likelihood, from a proposed project, rather than to speculate about worst-case scenarios and how to prevent them; CLI-15-6, 81 NRC 386 (2015)

consideration of impacts with either a low probability of occurrence, or where the link between the agency action and the claimed impact is too attenuated to find the proposed federal action to be the proximate cause of that impact are excluded under NEPA; LBP-13-4, 77 NRC 211 (2013)

NEPA demands a discussion of the environmental impact of any proposed major federal action significantly affecting the quality of the human environment; LBP-11-6, 73 NRC 198 (2010)

NEPA does not call for examination of every conceivable aspect of federally licensed projects, but requires only a discussion of reasonably foreseeable impacts; LBP-13-4, 77 NRC 211 (2013)

NEPA exists in part to ensure that important environmental effects will not be overlooked; LBP-12-10, 75 NRC 679-80 (2012)

NEPA has a dual purpose of ensuring that federal officials fully take into account the environmental consequences of a federal action before reaching major decisions, and informing the public, Congress, and other agencies of those consequences; LBP-11-35, 74 NRC 766 n.13 (2011); LBP-12-1, 75 NRC 34 (2012)

NEPA’s rule of reason excludes consideration of remote and speculative impacts or worst-case scenarios; LBP-13-4, 77 NRC 211 (2013)

NRC must fully take into account the environmental consequences of renewing an operating license; LBP-12-1, 75 NRC 38 (2012)

although boards may give reasonable deference to NRC guidance, such agency guidance does not substitute for regulations, is not binding authority, and does not prescribe NRC requirements; LBP-11-16, 73 NRC 670, 674 (2011)

an environmental report need only consider environmental impacts that are reasonably foreseeable; LBP-11-6, 73 NRC 239 (2010)

environmental reports must discuss reasonably foreseeable environmental impacts of the proposed action in proportion to their significance, as well as adverse environmental effects that cannot be avoided if the proposed plan is implemented; LBP-12-9, 75 NRC 630 (2012)

NEPA documents need consider only those environmental impacts that are reasonably foreseeable, not those that are remote and speculative possibilities; LBP-12-7, 75 NRC 516, 517 (2012); LBP-12-9, 75 NRC 623 (2012)
Legal Citations Index

Cases

NEPA does not require NRC Staff to examine every conceivable aspect of federally licensed projects in preparing its environmental impact statement; LBP-15-3, 81 NRC 82 (2015); LBP-15-16, 81 NRC 638 n.101 (2015)

NEPA’s mandate to federal agencies is to consider a broad range of environmental effects that are reasonably likely to ensue as a result of a major federal action; CLI-15-6, 81 NRC 386 n.247 (2015) to require worst-case analyses can easily lead to limitless NEPA analyses because it is always possible to introduce yet another additional variable to a hypothetical scenario to conjure up a worse worst case; CLI-12-1, 75 NRC 57 (2012)

Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), CLI-03-8, 58 NRC 11, 21 (2003) applicant’s negation action plan is part of its final safety analysis report and therefore is part of the licensing basis of the facility; LBP-14-3, 79 NRC 308 (2014)
if applicant subsequently wished to change its commitments to any significant extent, it would need to file a license amendment request, which could then be challenged by seeking a hearing; LBP-14-3, 79 NRC 308 (2014)

grant of discretionary review requires a showing that the board’s findings are not even plausible in light of the record viewed in its entirety; CLI-13-1, 77 NRC 18 n.102 (2013)

Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), CLI-03-8, 58 NRC 11, 26 (2003) Commission gives substantial deference to licensing board findings of fact, and it will not overturn a board’s factual findings unless they are not even plausible in light of the record viewed in its entirety; CLI-14-10, 80 NRC 162 (2014); CLI-15-9, 81 NRC 522 (2015) deference to a board’s factual determinations is particularly high when they are based in significant part on its assessment of expert testimony and credibility of the witnesses offering that testimony; CLI-13-1, 77 NRC 18 n.104 (2013) question before the Commission is not whether it would have made different factual findings than those of the board but whether the board’s findings of fact are so lacking in record support as to be clearly erroneous; CLI-13-1, 77 NRC 19 (2013)

Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), CLI-04-4, 59 NRC 31, 39 (2004), pet. for review held in abeyance, Obongo Gaudadeh Devia v. NRC, 492 F.3d 421 (D.C. Cir. 2007) contentions calling for requirements in excess of those imposed by regulations will be rejected as a collateral attack on regulations; CLI-12-5, 75 NRC 315 n.88 (2012)

Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), CLI-04-4, 59 NRC 31, 45 (2004) intervenors are expected to file contentions on the basis of applicant’s environmental report and not delay their contentions until after NRC Staff issues its environmental analysis; CLI-12-13, 75 NRC 687 n.31 (2012) regardless of whether there is an affirmative duty to supplement an environmental report, applicants still face a continuing possibility of contentions in adjudicatory proceedings based upon omissions or deficiencies in their environmental report because NRC rules require the filing of contentions as early as possible; CLI-12-13, 75 NRC 687 n.31 (2012)

if the environmental impact statement addresses the concerns alleged in the contention, the original contention becomes moot and the intervenor must raise a new contention if it claims the EIS discussion is still inaccurate or incomplete; LBP-14-6, 79 NRC 438 (2014) the draft environmental impact statement might cure alleged omissions or deficiencies in the environmental report by including additional analysis that addresses such omissions or deficiencies; LBP-11-7, 73 NRC 276 n.150 (2011)
LEGAL CITATIONS INDEX

CASES

although intervenors disagree with applicant’s opportunistic inspection strategy for managing rebar corrosion, they merely assert, and do not plausibly explain, how applicant’s approach will lead to a material safety impact; LBP-15-1, 81 NRC 42 n.156 (2015)

intervenors’ allegations do not plausibly indicate that the shield building would lose its functionality under the proposed aging management plan; LBP-15-1, 81 NRC 40-41 & n.146 (2015)

facts put forward by intervenor should plausibly indicate why a program is inadequate; LBP-15-20, 81 NRC 853 n.144 (2015)

in explaining why there is a genuine material dispute, contention must give the board a reason to believe that the alleged deficiency will lead to a material safety or environmental outcome, based on factual or expert support; LBP-15-1, 81 NRC 37-38 n.122 (2015)

intervenors do not point to any recitation of the factors underlying the contention or references to documents and texts that give the board reason to believe applicant’s inspection program may lead to a material negative impact on public safety, or that an improved program will lead to any positive impact; LBP-15-1, 81 NRC 40 (2015)

mere notice pleading is insufficient for contention admission, but petitioner does not have to prove its contentions at the admissibility stage; LBP-11-21, 74 NRC 125 (2011); LBP-12-8, 75 NRC 548 (2012)

petitioner does not have to prove its contentions at the admissibility stage; LBP-11-2, 73 NRC 45 (2011); LBP-11-13, 73 NRC 551 (2011); LBP-11-16, 73 NRC 655 (2011); LBP-13-8, 78 NRC 14 (2013)

quibbling over details of an economic analysis would effectively stand NEPA on its head by asking that the license be rejected not due to environmental costs, but because the economic benefits are not as great as estimated; LBP-11-7, 73 NRC 283 (2011); LBP-12-5, 75 NRC 238 (2012)

considering alternatives under NEPA, agencies should take into account the needs and goals of the parties involved in the application; LBP-12-17, 76 NRC 113-14 (2012)

if the Commission determines on appeal that information withheld under a protective order should have been publicly disclosed, it will direct that such information and the transcript of the related in camera session be made publicly available; CLI-15-24, 82 NRC 338 n.40 (2015)

parties seeking to reopen a closed record to introduce a new issue must back their claim with enough evidence to withstand summary disposition when measured against their opponent’s contravening evidence; LBP-11-35, 74 NRC 732 (2011)

a party seeking to reopen a closed record to raise a new matter faces an elevated burden to lay a proper foundation for its claim; LBP-11-20, 74 NRC 84 n.108 (2011)

no reopening of the evidentiary hearing will be required if the documents submitted in response to the motion demonstrate that there is no genuine unresolved issue of fact; LBP-11-35, 74 NRC 732 (2011)

the standard for admitting a new contention after the record is closed is higher than for an ordinary late-filed contention; CLI-11-2, 73 NRC 338 n.20 (2011); CLI-11-8, 74 NRC 222 (2011); LBP-11-20, 74 NRC 77 n.75 (2011); LBP-11-22, 74 NRC 269 (2011)

404
to justify granting a motion to reopen, the moving papers must be strong enough, in the light of any opposing filings, to avoid summary disposition; CLI-11-2, 73 NRC 346 (2011); CLI-11-8, 74 NRC 222-23 (2011)

NRC generally disfavors the filing of new contentions at the eleventh hour of an adjudication, a policy that is grounded in the doctrine of finality, which states that at some point, an adjudicatory proceeding must come to an end; CLI-11-2, 73 NRC 337-38 n.15 (2011); LBP-11-20, 74 NRC 77 (2011)

section 2.326 reflects the importance of finality in adjudicatory proceedings; CLI-15-19, 82 NRC 155 (2015)

there would be little hope of completing administrative proceedings if each newly arising allegation required an agency to reopen its hearings; LBP-15-14, 81 NRC 595 (2015)

petitioner’s appellate argument must pass regulatory muster under the rigorous standards of 10 C.F.R. 2.326(a)(3); CLI-11-2, 73 NRC 347 (2011)

requirements for reopening a closed record were applied to a proposed new contention submitted after the licensing board had conducted a lengthy evidentiary hearing and both the board and the Commission had issued their decisions on the merits; LBP-11-19, 74 NRC 270 (2011)

lateness is a sufficient ground on which to deny a motion for reconsideration; CLI-12-17, 76 NRC 209 n.7 (2012)

reconsideration motions should be based on an elaboration of an argument already made, an overlooked controlling decision or principle of law, or a factual clarification; CLI-12-17, 76 NRC 209-10 (2012)

Commission defers to board’s factual findings unless they are clearly erroneous and generally steps in only to correct factual findings not even plausible in light of the record reviewed in its entirety, e.g., where it appears that the board has overlooked or misunderstood important evidence; CLI-15-6, 81 NRC 351 (2015)

Commission expects its licensing boards to review testimony, exhibits, and other evidence carefully and to resolve factual disputes; CLI-13-9, 78 NRC 560 n.36 (2013)

stare decisis is not implicated where the board decision is unreviewed and therefore not binding on future tribunals, but as a prudential matter, the Commission vacates such decisions when appellate review is cut short by mootness; CLI-13-9, 78 NRC 558 (2013)

unreviewed board decisions do not create binding legal precedent; CLI-13-9, 78 NRC 558 (2013); CLI-13-10, 78 NRC 569 n.42 (2013)

parties may move to reopen the case to allow litigation of a new version of a previously rejected contention, even if the licensing board has closed the evidentiary record and the Commission had issued its final decision authorizing Staff to issue the license for the proposed facility; LBP-11-22, 74 NRC 268 n.43 (2011)
LEGAL CITATIONS INDEX

CASES

requirements for reopening a closed record were applied to a proposed new contention submitted after the licensing board had conducted a lengthy evidentiary hearing and both the board and the Commission had issued their decisions on the merits; LBP-11-22, 74 NRC 270 (2011)

Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), CLI-06-3, 63 NRC 19, 24 (2006) parties that have successfully intervened in a licensing proceeding may propose new contentions for litigation until the license is issued; LBP-11-22, 74 NRC 267-68 (2011)

Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), CLI-06-3, 63 NRC 19, 28 (2006) for new information to be sufficiently significant to merit the preparation of a supplemental final environmental impact statement, the information must paint a seriously different picture of the environmental landscape; CLI-12-7, 75 NRC 388-89 (2012); CLI-12-11, 75 NRC 533 n.53 (2012); LBP-11-23, 74 NRC 301 (2011); LBP-11-35, 74 NRC 729 (2011); LBP-12-1, 75 NRC 14 (2012); LBP-15-16, 81 NRC 704 (2015)
however “significance” is defined, the Fukushima accident and its aftermath have (as any such severe accident would do) clearly painted a seriously different picture of the environmental landscape; LBP-11-23, 74 NRC 329 (2011)

Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), CLI-06-3, 63 NRC 19, 29 (2006) claimed additional environmental impacts were not so significant or central to the FEIS’s discussion of environmental impacts that a supplement (and consequent reopening of the adjudicatory record) was reasonable or necessary; LBP-12-1, 75 NRC 14-15 n.57 (2012)
environmental impact statements must be supplemented when there is new and significant information that will paint a seriously different picture of the environmental landscape; LBP-11-35, 74 NRC 751 n.217 (2011)
new contentions must paint a seriously different picture of the environmental landscape that would require supplementation of an environmental impact statement; LBP-12-10, 75 NRC 656 (2012)

Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), LBP-98-7, 47 NRC 142, 170-71, aff’d, 48 NRC 26, 31-32 (1998) individual tribal member who does not reside on a tribal reservation where a facility is proposed to be located must show injury in fact relative to that member’s activities on the reservation even when the reservation is asserted to be on aboriginal tribal lands; LBP-13-6, 77 NRC 277 n.12 (2013)

Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), LBP-98-7, 47 NRC 142, 179, aff’d, CLI-98-13, 48 NRC 26 (1998) contentions that are the subject of general rulemaking by the Commission may not be litigated in individual licensing proceedings; LBP-14-16, 80 NRC 193 (2014)
“materiality” requires petitioner to show why the alleged error or omission is of possible significance to the result of the proceeding; LBP-15-20, 81 NRC 850 (2015); LBP-15-24, 82 NRC 85 (2015)

Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), LBP-98-7, 47 NRC 142, 179-80 (1998), aff’d as to other matters, CLI-98-13, 48 NRC 26 (1998) subject matter of contentions must impact the grant or denial of a pending license application; LBP-12-18, 76 NRC 158 (2012); LBP-15-20, 81 NRC 850 (2015) under 10 C.F.R. 2.209(f)(1), petitioner need only properly allege a defect in meeting the materiality requirement; LBP-11-7, 73 NRC 292 n.250 (2011) where a contention alleges a deficiency or error in the application, the deficiency or error must have some independent health and safety significance; LBP-11-23, 74 NRC 336 (2011)

Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), LBP-98-7, 47 NRC 142, 180, aff’d as to other matters, CLI-98-13, 48 NRC 26 (1998) there must be some significant link between a claimed deficiency and NRC’s ultimate determination whether the license applicant will adequately protect the health and safety of the public and the environment; LBP-15-20, 81 NRC 850 (2015); LBP-15-24, 82 NRC 85 (2015)

Private Fuel Storage, L.L.C. (Independent Spent Fuel Storage Installation), LBP-98-7, 47 NRC 142, 181, reconsideration granted in part and denied in part on other grounds, LBP-98-10, 47 NRC 288, aff’d on other grounds, CLI-98-13, 48 NRC 26 (1998) expert opinion that merely states a conclusion, e.g., the application is “deficient,” “inadequate,” or “wrong,” without providing a reasoned basis or explanation for that conclusion is inadequate because
it deprives the board of the ability to make the necessary, reflective assessment of the opinion; CLI-12-5, 75 NRC 320 n.117 (2012)

when omissions are cured by the subsequent issuance of licensing-related documents, intervenor must timely file a new or amended contention if it intends to challenge the sufficiency of the new information; LBP-12-5, 75 NRC 238 (2012)

summary disposition movant bears the initial burden of demonstrating that no genuine issue as to any material fact exists and that it is entitled to judgment as a matter of law; LBP-12-23, 76 NRC 450, 466 (2012)
summary judgment should be granted only where the truth is clear; LBP-11-14, 73 NRC 595 (2011)

contentions that address an important security issue regarding Part 74’s strict requirements for the proposed facility, which applicant previously admitted it failed to satisfy, are admissible; LBP-11-9, 73 NRC 412 n.119 (2011)

even if contentions are based on NRC Staff’s FSEIS, intervenor still bears the responsibility of demonstrating that a new contention merits admission and meets all six requirements of 10 C.F.R. 2.309; LBP-15-16, 81 NRC 703 (2015)

where the information in the DEIS is so different from the information in the environmental report that the DEIS dispenses with and moots the issues raised in the original contention, intervenor must file a new or amended contention against the DEIS; LBP-11-1, 73 NRC 26 (2011)

a contention contesting applicant’s environmental report may be viewed as a challenge to the Staff’s subsequently issued DEIS/EIS, but this “migration” tenet does not change the basic form of the contention, i.e., whether it challenges the soundness of the information provided or claims that necessary information has been omitted (or some combination of the two); LBP-11-1, 73 NRC 26 n.13 (2011)
admitted contentions challenging an applicant’s environmental report may, in appropriate circumstances, function as challenges to similar portions of the Staff’s environmental impact statement; LBP-13-9, 78 NRC 46 (2013); LBP-14-5, 79 NRC 383 (2014); LBP-15-11, 81 NRC 409-10 (2015)
safety matters generally need to be raised, relative to an admitted safety contention, in the context of the merits disposition of the already-admitted safety contention or, in the case of a new issue, as a wholly new safety contention; LBP-13-10, 78 NRC 132 (2013)
under the migration tenet, boards may construe an admitted contention contesting the environmental report as a challenge to the subsequently issued draft or final environmental impact statement without the necessity for intervenors to file a new or amended contention; LBP-12-12, 75 NRC 768 n.140 (2012); LBP-12-23, 76 NRC 471 n.159 (2012)

if summary disposition movant meets its burden, the nonmoving party must counter each adequately supported material fact with its own statement of material facts in dispute and supporting documentation and cannot rely on mere allegations or denials, or the facts in controversy will be deemed admitted; LBP-11-14, 73 NRC 595 (2011)
if summary disposition proponent meets its burden, opponent must counter each adequately supported material fact with its own statement of material facts in dispute and supporting documentation and cannot rely on mere allegations or denials, or the facts in controversy will be deemed admitted; LBP-12-23, 76 NRC 450 (2012)
LEGAL CITATIONS INDEX

CASES

the board applied the late-filing standards to a post-9/11 contention related to the risk of a terrorist attack on the ISFSI and found the contention timely but denied admission of both its safety and environmental aspects; CLI-11-5, 74 NRC 170 (2011)

during summary disposition, it is not appropriate for boards to untangle the expert affidavits and decide which experts are more correct; LBP-11-7, 73 NRC 263 (2011)

summary disposition is not a tool for trying to convince a licensing board to decide, on written submissions, genuine issues of material fact that warrant resolution at a hearing; LBP-11-14, 73 NRC 595 (2011); LBP-12-23, 76 NRC 480 (2012)

regardless of the level of the dispute, at the summary disposition stage, it is not proper for a board to choose which expert has the better of the argument; LBP-12-23, 76 NRC 478 (2012)

summary disposition is particularly inappropriate when a licensing board is presented with conflicting expert testimony, for at that stage of a proceeding it is not the role of licensing boards to untangle the expert affidavits and decide which experts are more correct; LBP-11-14, 73 NRC 595 (2011)

a significant change in the nature of the purported NEPA imperfection, from one focusing on comprehensive information omission to one centered on a deficient analysis of subsequently supplied information, warrants issue modification by the complaining party because otherwise, absent any new pleading, the other parties would be left to speculate whether the concerns first expressed had been satisfied by the new information; LBP-12-5, 75 NRC 247 n.124 (2012)

regulatory guidance is not binding on applicants; LBP-11-16, 73 NRC 661 (2011)

although boards may give reasonable deference to NRC guidance, such agency guidance does not substitute for regulations, is not binding authority, and does not prescribe NRC requirements; LBP-11-16, 73 NRC 670, 674 (2011)

abuse of discretion standard of review is applicable to discretionary Staff actions not subject to a hearing opportunity; CLI-13-1, 77 NRC 29 n.158 (2013)

although there are many possible combinations of wind and solar power, storage, and natural gas, it is not necessary to examine every possible combination; LBP-11-4, 73 NRC 104 (2011)

reasonable alternatives under NEPA do not include alternatives that are impractical, present unique problems, or cause extraordinary costs; LBP-15-3, 81 NRC 104 (2015)

although an applicant has the ultimate burden of proof on any issues on which a hearing is held, hearings are held on only those issues that an intervenor brings to the fore; LBP-11-4, 73 NRC 100 n.16 (2011)

directing NRC Staff to investigate a safety issue that the board could not reach through the adjudicatory process may put the Commission in a position, after receiving views of applicant if it desired, to assure itself about the significance, or lack thereof, of the shield building cracking issues
LEGAL CITATIONS INDEX

CASES

raised by intervenors, and to direct such follow-up proceedings, if any, as it might deem appropriate; LBP-15-1, 81 NRC 45 n.181 (2015)

motion to strike may be granted where a pleading or other submission contains information that is irrelevant; LBP-14-6, 79 NRC 432-33 (2014)

if NRC Staff detects deficiencies in an application before or after a notice of hearing opportunity is issued, the applicant will freely be given (outside the adjudicatory process) ample opportunity to amend it; LBP-11-9, 73 NRC 412 n.118 (2011)

_the public interest can well be served by revisions to an application that end up “getting it right” and by the Staff’s expected thorough analysis of such revisions; LBP-11-9, 73 NRC 412 (2011)_

_Progress Energy Carolinas, Inc. (Shearon Harris Nuclear Power Plant, Units 2 and 3), CLI-08-15, 68 NRC 1 (2008)_

the Commission refused to suspend the combined license proceeding pending completion of the design certification review of the AP1000 reactor; CLI-11-1, 73 NRC 4 (2011)

_Progress Energy Carolinas, Inc. (Shearon Harris Nuclear Power Plant, Units 2 and 3), CLI-08-15, 68 NRC 1, 3-4 (2008)_

combined license applicant may reference an as-yet-uncertified design at its own risk; CLI-12-9, 75 NRC 429-30 (2012)

_Progress Energy Carolinas, Inc. (Shearon Harris Nuclear Power Plant, Units 2 and 3), CLI-08-15, 68 NRC 1, 4 (2008)_

challenging features of the AP1000 standard design is a matter for a design certification rulemaking, not a combined license proceeding; CLI-11-8, 74 NRC 230 (2011)

_lack of finality in the design certification process is anticipated in the rulemaking, and hearing procedures can be adjusted to account for any new or amended contentions based on information relating to design certification; CLI-11-1, 73 NRC 4 (2011) there is no basis to hold a notice of hearing in abeyance pending completion of the design certification rulemaking; CLI-11-1, 73 NRC 4-5 (2011)_

_Progress Energy Carolinas, Inc. (Shearon Harris Nuclear Power Plant, Units 2 and 3), CLI-09-8, 69 NRC 317, 323-27 (2009)_

board decisions that have revised inadmissible contentions to render them admissible have been overturned; CLI-14-2, 79 NRC 28 (2014)

_Progress Energy Carolinas, Inc. (Shearon Harris Nuclear Power Plant, Units 2 and 3), CLI-10-9, 71 NRC 245, 251 (2010)_

appealants seeking oral argument must show how oral argument will assist the Commission in reaching a decision; CLI-11-8, 74 NRC 220 (2011)

_the Commission generally declines to hold oral argument on appeals, absent a specific showing that oral argument will assist it in reaching a decision; CLI-12-12, 75 NRC 614 (2012)_

_Progress Energy Carolinas, Inc. (Shearon Harris Nuclear Power Plant, Units 2 and 3), CLI-10-9, 71 NRC 245, 252 (2010)_

motion for reconsideration is procedurally defective, out of time, and fails to assert compelling circumstances justifying reconsideration; CLI-13-7, 78 NRC 204 n.14 (2013)

_petitions for reconsideration may not be filed except upon leave of the adjudicatory body that rendered the decision and that procedural deficiency is reason enough to deny the request; CLI-12-17, 76 NRC 209 n.7 (2012) when intervenors renewed a request to hold a proceeding in abeyance pending completion of the design certification rulemaking, the Commission found no new justification for reconsideration or any changed circumstances that could not previously have been brought; CLI-11-1, 73 NRC 5 n.12 (2011)
intervenors must point to the specific ways in which the shield building monitoring aging management plan is wrong or inadequate to raise a genuine dispute with applicant’s license renewal application; LBP-12-27, 76 NRC 608 (2012)

intervenors’ challenge to the aging management plan must consist of more than allegations that the AMP is deficient, but rather must point to specific ways the AMP is inadequate or wrong; LBP-12-27, 76 NRC 602 (2012)

although the entire record is considered on appeal, including pleadings that appellants ask to be adopted by reference, the Commission’s decision responds to the arguments made explicitly in the appellate brief; CLI-11-8, 74 NRC 219 (2011)

briefs on appeal are to be comprehensive, concise, and self-contained and incorporation of pleadings or arguments by reference is discouraged; CLI-12-3, 75 NRC 139 n.41 (2012)

in the standing analysis, boards construe the petition in favor of the petitioner; CLI-14-2, 79 NRC 19 n.45 (2014)

licensing boards are obliged to independently assess petitioners’ standing; LBP-15-5, 81 NRC 256 (2015)

standard for review of contention admissibility determinations is the same, whether an appeal lies under section 2.311 or 2.341, and the Commission will disturb a licensing board’s contention admissibility ruling only if there has been an error of law or abuse of discretion; CLI-12-7, 75 NRC 386 (2012)

absent error of law or abuse of discretion, the Commission defers to licensing board rulings on contention admissibility; CLI-11-9, 74 NRC 237 (2011)

an environmental report’s adequacy is examined under NEPA as well as under Part 51 because the ER is the basis upon which the NRC’s environmental impact statement will be prepared; LBP-11-13, 73 NRC 552 n.110 (2011); LBP-11-14, 73 NRC 598 (2011)

Part 51, not NEPA, is the source of the legal requirements applicable to the applicant’s environmental report; LBP-11-32, 74 NRC 666 (2011)

when NEPA contentions are involved, the burden of proof shifts to NRC Staff; LBP-15-3, 81 NRC 84-85 (2015); LBP-15-16, 81 NRC 641 (2015)

expert witness must have enough knowledge in the subject area to allow him to proffer an expert opinion for the purposes of determining contention admissibility; LBP-15-20, 81 NRC 851 n.129 (2015); LBP-15-24, 82 NRC 89 n.129 (2015)

evidentiary objections made for the first time after briefing has been completed unfairly deprive the petitioners of the opportunity to file the response expressly provided in the NRC’s procedural rules; LBP-15-20, 81 NRC 859 (2015)

absent a licensed low-level radioactive waste disposal facility that will accept waste from a combined license applicant’s facility, it is reasonably foreseeable that LLRW generated by normal operations
will be stored at the site for a longer term than is currently envisioned in that COL application; LBP-11-6, 73 NRC 239 (2010); LBP-11-12, 75 NRC 208 (2012) 

an environmental report need only discuss reasonably foreseeable environmental impacts of a proposed action; LBP-11-6, 73 NRC 217 n.78 (2010) 

level of low-level radioactive waste storage information required by 10 C.F.R. 52.79(a)(3) is tied to the combined license applicant’s particular plans for compliance through design, operational organization, and procedures; LBP-12-4, 75 NRC 218 (2012) 

NEPA and 10 C.F.R. Part 52 requirements do not apply in the license transfer context; CLI-15-8, 81 NRC 511 n.81 (2015) 

NEPA only mandates examination of reasonably foreseeable environmental impacts of a proposed project; LBP-11-33, 74 NRC 683 (2011) 

the environmental impact statement’s hard look must examine reasonably foreseeable environmental impacts emanating from the proposed action; LBP-11-39, 74 NRC 868 (2011) 

contentions challenging the ability of combined license applicants to handle onsite storage of Classes B and C low-level radioactive waste, as well as the attendant potential environmental impacts of such storage in the wake of the closure of the Barnwell facility in South Carolina to states outside of the Atlantic Compact are admissible; LBP-11-6, 73 NRC 239 (2010) 

Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), CLI-11-10, 74 NRC 251, 254-56 (2011) 

resolution of one contention where there are other contentions pending does not constitute disposition of a major segment of the case, because the outcome of a decision on the license renewal application is undetermined; CLI-11-14, 74 NRC 811 (2011) 

Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), CLI-11-10, 74 NRC 251, 255 (2011) 

parties may file a petition for review of licensing board full or partial initial decisions, both of which are considered to be final; CLI-11-14, 74 NRC 810 (2011) 

Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), CLI-11-10, 74 NRC 251, 256 (2011) 

expansion of issues for litigation from the board’s denial of a motion for summary disposition had neither a pervasive and unusual effect on the litigation nor a serious and irreparable impact on movant; CLI-15-24, 82 NRC 337 n.35, 44 (2015) 

Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), CLI-11-10, 74 NRC 251, 256 n.24 (2011) 

board’s assertedly erroneous ruling does not constitute a pervasive and unusual effect on the proceeding; CLI-15-17, 82 NRC 47 (2015) 

expansion of issues for litigation that results from admission of a contention or denial of motion for summary disposition does not have a pervasive and unusual effect on the litigation; CLI-15-17, 82 NRC 37 n.25, 44 (2015) 

Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), LBP-09-10, 70 NRC 51, 86 (2009), rev’d in part on other grounds, CLI-10-2, 71 NRC 27, 29 (2010) 

when a contention alleges the need for further study of an alternative, from an environmental perspective, such reasonableness determinations are the merits, and should only be decided after the contention is admitted; LBP-11-2, 73 NRC 50 (2011); LBP-11-13, 73 NRC 564 (2011)
LEGAL CITATIONS INDEX

CASES

Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), LBP-09-10, 70 NRC 51, 86-87 (2009)
at the contention admissibility stage, boards merely decide whether a contention satisfies the six pleading criteria of 10 C.F.R. 2.309(f)(1)(i)-(vi); LBP-11-16, 73 NRC 690 (2011)

Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), LBP-09-10, 70 NRC 51, 88 (2009), aff’d in part and rev’d in part on other grounds, CLI-10-2, 71 NRC 27 (2010)
challenging the environmental report preserves petitioner’s right to challenge the environmental impact statement at a later stage of the proceedings; LBP-12-8, 75 NRC 553 (2012)

Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), LBP-09-10, 70 NRC 51, 99-100 (2009)
brief explanation of the rationale underlying the contention is sufficient to satisfy 10 C.F.R. 2.309(f)(1)(ii); LBP-15-20, 81 NRC 849 (2015); LBP-15-24, 82 NRC 79 (2015)

Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), LBP-09-10, 70 NRC 51, 101 (2009)
one challenged, there is no presumption that an environmental report is correct or accurate, with applicant, as the proponent of the license, bearing the burden of proof; LBP-15-2, 81 NRC 57 n.63 (2015)

Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), LBP-09-10, 70 NRC 51, 102 (2009), aff’d in part and rev’d in part on other grounds, CLI-10-2, 71 NRC 27 (2010)
contention that raises a genuine dispute with the sufficiency of the cumulative impacts analysis, or the lack thereof, in the environmental report is admissible; LBP-12-3, 75 NRC 202 (2012)

Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), LBP-09-10, 70 NRC 51, 147 n.89 (2009)
NRC Staff and licensee may file interlocutory appeals on the admission of a contention, but intervenors are prohibited from filing such appeals on the denial of a contention unless all contentions have been denied; LBP-14-4, 79 NRC 374 n.69 (2014)

Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), LBP-10-20, 72 NRC 571 (2010)
if a board grants summary disposition of a foreign ownership contention, it could terminate the proceeding or move ahead with a pending environmental contention; LBP-12-19, 76 NRC 194 (2012)

Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), LBP-10-20, 72 NRC 571, 590 (2010)
applicant has described the kinds and quantities of radioactive materials expected to be produced in the operation to the extent its combined license application references a standardized design; LBP-11-6, 73 NRC 245 n.112 (2010)

Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), LBP-10-20, 72 NRC 571, 603 (2010)
consistency of this decision with the Vogtle decision on construction of section 52.79(a)(3) is discussed; LBP-12-4, 75 NRC 223-24 n.15 (2012)

Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), LBP-10-23, 72 NRC 692, 703-04 (2010)
“document” means any medium (electronic, paper, or of any other kind) that contains or stores any information, including text, data, audio, video, computer software, or computer modeling information; LBP-11-5, 73 NRC 137 (2011)

Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), LBP-11-1, 73 NRC 19, 25-26 (2011)
under the migration tenet, boards may construe an admitted contention contesting the environmental report as a challenge to the subsequently issued draft or final environmental impact statement without the need for intervenors to file a new or amended contention; LBP-12-12, 75 NRC 768 (2012)

Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), LBP-11-1, 73 NRC 19, 26 (2011)
contentions of adequacy may migrate into contentions of omission; LBP-13-10, 78 NRC 133 (2013)

412
in certain instances, contentions challenging an environmental report are deemed to migrate from challenging applicant’s environmental report to challenging NRC Staff’s environmental assessment; LBP-14-6, 79 NRC 416 n.67 (2014)
migration tenet applies when information in the draft environmental impact statement is sufficiently similar to information in applicant’s environmental report, and allows previously admitted contentions challenging the environmental report to apply to relevant portions of the DSEIS; LBP-15-16, 81 NRC 631 n.39 (2015)
migration tenet applies when the information in the final supplemental environmental impact statement is sufficiently similar to the information in the draft SEIS; LBP-13-9, 78 NRC 46-47 (2013); LBP-14-5, 79 NRC 383 (2014)
migration tenet helps to expedite hearings by obviating the need to file and litigate the same contention up to three times and applies when the information contained in a subsequently released document is sufficiently similar to the information contained in the original document upon which the original contention was filed; LBP-12-12, 75 NRC 768 (2012); LBP-12-23, 76 NRC 471 (2012)
under the migration tenet, boards may construe an admitted contention contesting the environmental report as a challenge to a subsequently issued draft or final environmental impact statement without the need for intervenors to file a new or amended contention; LBP-12-23, 76 NRC 471 (2012)

Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), LBP-11-1, 73 NRC 19, 26 n.13 (2011)
challenges to only the draft environmental impact statement apply equally to the final environmental impact statement under the migration tenet; LBP-12-5, 75 NRC 232 n.17, 238 n.63 (2012)

Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), LBP-11-31, 74 NRC 643, 648 (2011)
any NEPA-based challenge to the efficacy of, or the Staff’s reliance on, the state permitting process relative to the Staff’s environmental review must await the Staff’s initial environmental review document; LBP-13-6, 77 NRC 299-300 (2013)

Progress Energy Florida, Inc. (Levy County Nuclear Power Plant, Units 1 and 2), LBP-13-4, 77 NRC 107, 175 n.77 (2013)
environmental protection is part of NRC’s core mission statement; LBP-14-9, 80 NRC 49 (2014)
NRC is authorized to impose environmental conditions on a license to prevent or mitigate adverse environmental impacts that might otherwise be caused by the construction or operation of a nuclear power plant; LBP-14-9, 80 NRC 49 (2014)

Public Citizen Health Research Group v. Commissioner, Food and Drug Administration, 740 F.2d 21, 31 (D.C. Cir. 1984)
courts decline to review tentative agency positions because doing so severely compromises the interests that the ripeness doctrine protects; LBP-15-15, 81 NRC 610 n.83 (2015)

Public Citizen Health Research Group v. Commissioner, Food and Drug Administration, 740 F.2d 21, 32 (D.C. Cir. 1984)
tentative conclusion articulated in a nonfinal, proposed rule does not command deference from the court nor is it binding on the agency; LBP-15-15, 81 NRC 610 n.83 (2015)

mere potential exposure to minute doses of radiation within regulatory limits does not constitute a distinct and palpable injury on which standing can be founded; CLI-11-3, 73 NRC 623 n.51 (2011)

Public Citizen, Inc. v. NRC, 573 F.3d 916, 926 (9th Cir. 2009)
protecting against the threat of air attacks is not within licensees’ responsibilities because a private security force cannot reasonably be expected to defend against such attacks and adequate protection is ensured through the actions of other federal agencies with defense capabilities and air-safety expertise; CLI-11-4, 74 NRC 6 n.26 (2011)

tentative conclusion articulated in a nonfinal, proposed rule does not command deference from the court nor is it binding on the agency; LBP-15-15, 81 NRC 610 n.83 (2015)
LEGAL CITATIONS INDEX

CASES

Public Service Co. of Indiana (Marble Hill Nuclear Generating Station, Units 1 and 2), ALAB-393, 5 NRC 767, 768 (1977)
whether the board erred in its treatment of evidence is a matter that can be addressed following an initial decision; CLI-15-24, 82 NRC 336 (2015)

Public Service Co. of Indiana (Marble Hill Nuclear Generating Station, Units 1 and 2), ALAB-493, 8 NRC 253, 270 (1978)
stay movant has the burden of persuasion on the four factors of 10 C.F.R. 2.1213(d); LBP-15-2, 81 NRC 53 (2015)

Public Service Co. of Indiana (Marble Hill Nuclear Generating Station, Units 1 and 2), CLI-80-10, 11 NRC 438 (1980)
third-party requests for a hearing on an enforcement order have been treated as a petition for intervention under the Commission’s generally applicable rules; LBP-14-4, 79 NRC 327 n.37 (2014)

Public Service Co. of Indiana (Marble Hill Nuclear Generating Station, Units 1 and 2), CLI-80-10, 11 NRC 438, 441 (1980)
NRC has long preferred concentrating its resources on actual field inspections and related scientific and engineering work, as opposed to the conduct of legal proceedings; LBP-14-4, 79 NRC 333 (2014)

Public Service Co. of New Hampshire (Seabrook Station, Unit 2), CLI-84-6, 19 NRC 975, 978 (1984)
economic interest generally is not sufficient to afford standing in NRC licensing proceedings regarding health and safety; LBP-14-4, 79 NRC 352 (2014)

Public Service Co. of New Hampshire (Seabrook Station, Units 1 and 2), ALAB-422, 6 NRC 33, 68 (1977)
Commission may incorporate in any license at the time of issuance, or thereafter, by appropriate rule, regulation, or order, such additional requirements and conditions with respect to licensee’s receipt, possession, use, and transfer of source or byproduct material as it deems appropriate or necessary in order to protect health or to minimize danger to life or property; LBP-11-6, 73 NRC 207 n.63 (2010)

Public Service Co. of New Hampshire (Seabrook Station, Units 1 and 2), ALAB-422, 6 NRC 33, 82-90 (1977), aff’d, New England Coalition on Nuclear Pollution v. NRC, 582 F.2d 87 (1st Cir. 1978)
although NRC Staff’s argument against contention admission appears to have some weight, the board need not resolve it, because the contention is inadmissible for failing to raise a genuine dispute of material fact or law with the environmental report; LBP-11-6, 73 NRC 207 n.63 (2010)

Public Service Co. of New Hampshire (Seabrook Station, Units 1 and 2), ALAB-422, 6 NRC 33, 83 (1977), aff’d, New England Coalition on Nuclear Pollution v. NRC, 582 F.2d 87 (1st Cir. 1978)
NRC authority to review offsite impacts of transmission lines goes beyond merely factoring them into a final cost-benefit balance and includes as well the authority where necessary to impose license conditions to minimize those impacts; LBP-11-6, 73 NRC 250 n.116 (2010)

Public Service Co. of New Hampshire (Seabrook Station, Units 1 and 2), ALAB-422, 6 NRC 33, 90 (1977), aff’d, New England Coalition on Nuclear Pollution v. NRC, 582 F.2d 87 (1st Cir. 1978)
nedd for power is a shorthand expression for the benefit side of the cost-benefit balance that NEPA mandates for a proceeding considering the licensing of a nuclear power plant; LBP-11-6, 73 NRC 218 (2010)

Public Service Co. of New Hampshire (Seabrook Station, Units 1 and 2), ALAB-422, 6 NRC 33, 111 (1977)
boards’ authority to seek to trigger review in extraordinary circumstances remains and has been put to good use; LBP-11-9, 73 NRC 418-19 n.13 (2011)
LEGAL CITATIONS INDEX

CASES

Public Service Co. of New Hampshire (Seabrook Station, Units 1 and 2), ALAB-471, 7 NRC 477, 489 n.8 (1978), rev’d on other grounds, CLI-97-15, 46 NRC 294 (1997)

although environmental contentions ultimately challenge NRC’s compliance with the National Environmental Policy Act, applicant may advocate for a particular challenged position set forth in the environmental impact statement; LBP-12-5, 75 NRC 236 (2012); LBP-12-17, 76 NRC 81 (2012); LBP-14-7, 79 NRC 459 (2014)

applicant may bear the burden of proof on contentions asserting deficiencies in its environmental report and where the applicant becomes a proponent of a particular challenged position set forth in the environmental impact statement; LBP-11-38, 74 NRC 830 (2011)

because NRC Staff relies heavily on applicant’s environmental report in preparing the environmental impact statement, should applicant become a proponent of a particular challenged position set forth in the EIS, applicant, as such a proponent, also has the burden on that matter; LBP-15-3, 81 NRC 85 (2015); LBP-15-16, 81 NRC 642 (2015)

Public Service Co. of New Hampshire (Seabrook Station, Units 1 and 2), ALAB-471, 7 NRC 477, 504-08 (1978)

aesthetic impacts of energy sources may vary according to individual location; LBP-11-4, 73 NRC 112 (2011)

Public Service Co. of New Hampshire (Seabrook Station, Units 1 and 2), ALAB-731, 17 NRC 1073, 1074-75 (1983)

a board order is appealable when it disposes of a major segment of the case or terminates a party’s right to participate; CLI-11-10, 74 NRC 255 (2011)

the basis for allowing immediate appellate review of partial initial decisions rests on prior appeal board decisions permitting review of a licensing board ruling that disposes of a major segment of the case or terminates a party’s right to participate; CLI-11-14, 74 NRC 810-11 (2011)

Public Service Co. of New Hampshire (Seabrook Station, Units 1 and 2), ALAB-886, 27 NRC 74, 78 (1988)

when a motion to reopen is untimely, the section 2.326(a)(1) “exceptionally grave” test supplants the section 2.326(a)(2) “significant safety or environmental issue” test; CLI-11-8, 74 NRC 225 (2011)

Public Service Co. of New Hampshire (Seabrook Station, Units 1 and 2), ALAB-895, 28 NRC 7, 22 (1988) prima facie showing within the meaning of 10 C.F.R. 2.758(d) is one that is legally sufficient to establish a fact or case unless disproved; LBP-14-16, 80 NRC 194 n.64 (2014)

Public Service Co. of New Hampshire (Seabrook Station, Units 1 and 2), ALAB-899, 28 NRC 93, 97 (1988), aff’d sub nom. Massachusetts v. NRC, 924 F.2d 311 (D.C. Cir. 1991)

reach of a contention necessarily hinges upon its terms coupled with its stated bases; LBP-13-6, 77 NRC 298-99 (2013); LBP-13-10, 78 NRC 138 (2013)

Public Service Co. of New Hampshire (Seabrook Station, Units 1 and 2), ALAB-899, 28 NRC 93, 97 & n.11 (1988), aff’d in part and remanded in part on other matters, Massachusetts v. NRC, 924 F.2d 311 (D.C. Cir.) (1991), cert. denied, 502 U.S. 899 (1991)

intervenor is not free to change the focus of its admitted contention, at will, as the litigation progresses; LBP-11-38, 74 NRC 833 (2011); LBP-12-5, 75 NRC 239 n.68 (2012)

Public Service Co. of New Hampshire (Seabrook Station, Units 1 and 2), ALAB-915, 29 NRC 427, 432 (1989)

licensing boards are discouraged from adding material to bolster a petitioner’s or party’s arguments or pleadings; CLI-11-11, 74 NRC 447 n.113 (2011)

Public Service Co. of New Hampshire (Seabrook Station, Units 1 and 2), ALAB-940, 32 NRC 225, 234-38 (1990)

NRC Staff oversight activities normally conducted for the purpose of ensuring that licensees comply with existing NRC requirements and license conditions do not typically trigger the opportunity for a hearing under the AEA; CLI-15-5, 81 NRC 334 (2015)

where NRC has temporarily exempted the licensee, on the basis of an existing rule, from one of many rules made generally applicable by the license does not amount to a license amendment, and thus provide no hearing rights; CLI-14-11, 80 NRC 174 n.35 (2014)

415
to demonstrate a significant safety issue, petitioners must establish either that uncorrected errors endanger safe plant operation or that there has been a breakdown of the quality assurance program sufficient to raise legitimate doubt as to the plant’s capability of being operated safely; LBP-11-35, 74 NRC 730, 750-51 (2011)

failure to offer factual support for the proposition that applicant’s inputs for evacuation times are flawed or unreasonable or that its sensitivity analysis of these inputs was incorrect renders a contention inadmissible; LBP-15-5, 81 NRC 299 n.338 (2015)

lack of clarity about which electrical cables might be subject to any saltwater environment, however high or low the concentration, and about the effects of and efforts to address this, is a level of concern sufficient to warrant further inquiry and exploration; LBP-11-20, 74 NRC 113-14 (2011)

deferece can be given to a state permit’s findings as to the acceptability of environmental impacts; LBP-15-11, 81 NRC 439 n.253 (2015)

it is appropriate for NRC Staff to give substantial weight to state agency’s decision that issuing the NPDES permit would be environmentally acceptable; LBP-15-11, 81 NRC 436 (2015)

in granting a proposed license, board may condition it upon some precautionary measures required at the chosen site; LBP-15-16, 81 NRC 638 n.104 (2015)

stay of an NRC license is an extraordinary remedy, and a rare occurrence in NRC practice; LBP-15-2, 81 NRC 53 (2015)

to challenge generic application of a rule, petitioner seeking waiver must show that there is something extraordinary about the subject matter of the proceeding such that the rule should not apply; CLI-13-7, 78 NRC 207 (2013)

when engaging in rulemaking, the Commission is carving out issues from adjudication for generic resolution; CLI-13-7, 78 NRC 207 (2013)

NRC case law has given meaning to the “special circumstances” requirement for rule waiver; CLI-13-7, 78 NRC 207 (2013)

rule waivers are not granted where the circumstances on which the waiver’s proponent relies are common to a large class of applicants or facilities; LBP-11-16, 73 NRC 702 n.351 (2011)

it would not be consistent with NRC’s statutorily mandated responsibilities to spend time and resources on matters that are of no substantive regulatory significance; CLI-13-7, 78 NRC 208-09 (2013); LBP-14-16, 80 NRC 194 (2014)

rule waiver should not be granted unless the petition relates to a significant safety problem; LBP-14-16, 80 NRC 194 (2014)

special circumstances for rule waiver are present only if the petition properly pleads one or more facts, not common to a large class of applicants or facilities, that were not considered either explicitly or by necessary implication in the proceeding leading to the rule sought to be waived; LBP-14-16, 80 NRC 194 (2014)

where the rules in question, as well as the contention itself, address compliance with NEPA and not safety issues under the Atomic Energy Act, the rule waiver is needed to address a significant environmental issue instead of a significant safety issue; LBP-14-16, 80 NRC 195 (2014)
**LEGAL CITATIONS INDEX**

**CASES**

*Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-88-10, 28 NRC 573, 597-98 (1988)
- showing of uniqueness is necessary to justify setting aside a regulation for the purposes of a specific proceeding; CLI-13-7, 78 NRC 208 (2013)

*Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-88-10, 28 NRC 573, 599-600 (1988)
- rather than assuming that a rule’s purpose is simply to achieve its stated effect, one must look further by examining the underlying purpose of the requirement; CLI-13-7, 78 NRC 209 n.49 (2013)

*Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-89-20, 30 NRC 231, 235 (1989)
- NRC case law has given meaning to the “special circumstances” requirement for rule waiver; CLI-13-7, 78 NRC 207 (2013)

*Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-89-3, 29 NRC 234, 241 (1989)
- parties are expected to bear their burden and to clearly identify the matters on which they intend to rely with reference to a specific point; LBP-11-6, 73 NRC 220 n.80 (2010)
- wholesale incorporation by reference does not serve the purposes of a pleading; LBP-15-5, 81 NRC 290 n.263 (2015)

*Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-89-8, 29 NRC 399, 412 (1989)
- without a showing of irreparable injury, petitioners seeking a stay of effectiveness must make an overwhelming showing of likely success on the merits; CLI-12-11, 75 NRC 529 (2012)

*Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-90-3, 31 NRC 219, 232 (1990)
- arrangements for requesting and effectively using assistance resources should be identified and supported by appropriate letters of agreement; LBP-15-18, 81 NRC 800 n.40 (2015)
- lack of detail for emergency sheltering option is not significant because size of sheltering population is very small; LBP-15-18, 81 NRC 800 n.42 (2015)

*Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-90-10, 32 NRC 218, 221 (1990)
- burden of satisfying the reopening requirements is a heavy one, and it rests with the party moving to reopen; CLI-15-19, 82 NRC 155-56 (2015)
- proponents of reopening must meet all requirements; LBP-11-20, 74 NRC 81 (2011)

*Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-92-8, 35 NRC 145, 154 (1992)
- to avoid summary disposition, intervenors must present contrary evidence so significantly probative that it creates a material factual issue; LBP-12-19, 76 NRC 191 n.29 (2012)

*Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), LBP-89-4, 29 NRC 62, 73 (1989), aff’d, ALAB-940, 32 NRC 225 (1990)
- board is directed to consider whether a confirmatory action letter issued to licensee constitutes a de facto license amendment that would be subject to a hearing opportunity under AEA § 189a, and, if so, whether the petition meets the standing and contention admissibility requirements; CLI-12-20, 76 NRC 441 (2012)

*Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), LBP-89-28, 30 NRC 271 (1989), aff’d, ALAB-940, 32 NRC 225 (1990)
- board is directed to consider whether a confirmatory action letter issued to licensee constitutes a de facto license amendment that would be subject to a hearing opportunity under AEA § 189a, and, if so, whether the petition meets the standing and contention admissibility requirements; CLI-12-20, 76 NRC 441 (2012)

*Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), LBP-89-28, 30 NRC 271 (1989), aff’d in part on other grounds and remanded, ALAB-937, 32 NRC 135 (1990), aff’d in
part and rev’d in part on other grounds, ALAB-941, 32 NRC 337 (1990), and aff’d on other grounds, ALAB-947, 33 NRC 299 (1991)

board considered evidence submitted with petitioner’s reply to which opposing parties didn’t object; LBP-15-5, 81 NRC 289 n.252 (2015)

**Public Service Co. of New Hampshire v. NRC, 582 F.2d 77, 80 (1st Cir. 1978)**

approval of permits to a nuclear power plant was conditioned on the rerouting of two offsite transmission lines to avoid environmental impacts on marshlands, tree species, and migratory waterfowl; LBP-14-9, 80 NRC 48-49 (2014)

**Public Service Co. of New Hampshire v. NRC, 582 F.2d 77, 81 (1st Cir. 1978)**

NEPA requires NRC to construe its existing statutory authority consistently with NEPA’s goals; LBP-14-9, 80 NRC 54 (2014)

**Public Service Co. of New Hampshire v. NRC, 582 F.2d 77, 82 (1st Cir. 1978)**

agency’s interpretation of what is properly within its jurisdictional scope is entitled to great deference, and will not be overturned if reasonably related to the language and purposes of the statute; LBP-14-9, 80 NRC 55 (2014)

court found no inevitable clash between NRC’s broad regulatory authority under the Atomic Energy Act and the action-forcing provisions of the National Environmental Policy Act; LBP-14-9, 80 NRC 54-55 (2014)

NRC has long interpreted its statutory authority under the Atomic Energy Act to include conditioning approval of nuclear power plant licenses on environmentally acceptable routing of transmission lines; LBP-14-9, 80 NRC 48 (2014)

**Public Service Co. of New Hampshire v. NRC, 582 F.2d 77, 82-83 (1st Cir. 1978)**

NRC’s decision to include transmission lines that serve a nuclear power plant within the definition of “utilization facility” in 42 U.S.C. § 2014(cc) was upheld; LBP-14-9, 80 NRC 55 (2014)

**Public Service Co. of New Hampshire v. NRC, 582 F.2d 77, 86 (1st Cir. 1978)**

NRC can, consistent with its authority under the Atomic Energy Act, impose permit conditions on the routing of the transmission lines in order to further NEPA’s mandate; LBP-14-9, 80 NRC 55 (2014)

**Public Service Co. of Oklahoma (Black Fox Station, Units 1 and 2), ALAB-573, 10 NRC 775, 804 (1979)**

demand for electricity is of course the justification for building any power plant, and satisfaction of that demand is the principal beneficial factor weighed against the environmental costs in striking the balance that NEPA requires; LBP-11-7, 73 NRC 282 n.174, 291 n.242 (2011)

inasmuch as NRC Staff relies on the benefits of proposed units to satisfy an otherwise unmet need for power, the adequacy of the need-for-power assessment is material to granting the proposed combined license; LBP-11-7, 73 NRC 291 (2011)

**Public Service Co. of Oklahoma (Black Fox Station, Units 1 and 2), LBP-78-28, 8 NRC 281, 282 (1978)**

NRC Staff need not replicate the work completed by another entity, but rather must independently review and find relevant and scientifically reasonable any outside reports or analyses on which it intends to rely in its environmental impact statement; LBP-11-1, 73 NRC 25 n.9 (2011)

**Public Service Electric and Gas Co. (Salem Nuclear Generating Station, Units 1 and 2), ALAB-136, 6 AEC 487, 489 (1973)**

burden of setting forth a clear and coherent argument for standing is generally on petitioner, but pro se petitioner is not held to the same standards of clarity and precision to which a lawyer might reasonably be expected to adhere; CLI-15-25, 82 NRC 394 (2015); LBP-15-13, 81 NRC 468 n.65 (2015)

**Puerto Rico Electric Power Authority (North Coast Nuclear Plant, Unit 1), ALAB-662, 14 NRC 1125, 1133 (1981)**

when a motion to withdraw an application is unopposed and the withdrawal causes no apparent harm to the public or any party, it is appropriate to grant the motion without prejudice or imposition of additional terms; LBP-12-20, 76 NRC 216 (2012)

**Puerto Rico Electric Power Authority (North Coast Nuclear Plant, Unit 1), ALAB-662, 14 NRC 1125, 1133-34 (1981)**

dismissal with prejudice is a harsh sanction reserved for unusual situations because it is the equivalent of a decision on the merits of the license amendment request; LBP-15-28, 82 NRC 241 (2015)
Puerto Rico Electric Power Authority (North Coast Nuclear Plant, Unit 1), ALAB-662, 14 NRC 1125, 1135 & n.11 (1981)
opposing party’s litigation expenses do not provide a basis for departing from the usual rule that a
dismissal should be without prejudice; CLI-13-10, 78 NRC 567 n.27 (2013)

Puerto Rico Electric Power Authority (North Coast Nuclear Plant, Unit 1), ALAB-662, 14 NRC 1125, 1145 (1981)
standard for dismissal with prejudice is not met because the prospect of future litigation is not
unusual, being inherent in any dismissal without prejudice; LBP-15-28, 82 NRC 241 (2015)

Pudget Sound Power and Light Co. (Skagit Nuclear Power Project, Units 1 and 2), CLI-80-34, 12 NRC 407, 408 (1980)
stare decisis is not implicated where the board decision is unreviewed and therefore not binding on
future tribunals, but as a prudential matter, the Commission vacates such decisions when appellate
review is cut short by mootness; CLI-13-9, 78 NRC 558-59 (2013)

preliminary injunction halting a solar energy project was granted based on a tribal claim that the
project would not avoid most of the 459 cultural sites identified, and that the NEPA and NHPA
process had been insufficient; LBP-15-2, 81 NRC 55-56 (2015)

irreparable harm element of the test for issuance of injunctive relief was met where the tribe’s
evidence showed that a phase of the project would involve damage to at least one known site, and
virtually ensure some loss or damage; LBP-15-2, 81 NRC 56 (2015)

Quijirro Mining Co. (Ambrosia Lake Facility, Grants, New Mexico), CLI-98-11, 48 NRC 1, 12 (1998)
NRC is to look to federal law in applying the zone-of-interests test; LBP-14-4, 79 NRC 353 (2014)
where plaintiff is not itself the subject of the contested regulatory action, the zone-of-interests test
denies a right of review if plaintiff’s interests are so marginally related to or inconsistent with the
purposes implicit in the statute that it cannot be assumed that Congress intended to permit the suit;
LBP-14-4, 79 NRC 328 n.44, 354 (2014)

RadLAX Gateway Hotel, LLC v. Amalgamated Bank, 132 S. Ct. 2065, 2071 (2012)
specific regulations control over general regulations; CLI-15-10, 81 NRC 540 (2015)

Ralph L. Tetrick (Denial of Application for Reactor Operator License), CLI-97-10, 46 NRC 26, 31-32 (1997)
because agency practice is one indicator of how the agency interprets regulations, a consistently held
NRC Staff view on an operator testing policy matter will not be disturbed; LBP-14-2, 79 NRC
150-51 n.88 (2014)

Ramadan v. Chase Manhattan Corp., 229 F.3d 194, 201 (3d Cir. 2000)
regulations cannot trump statutory mandates; LBP-12-8, 75 NRC 553 (2012)

Randall L. Herring (Senior Reactor Operator License for Catawba Nuclear Station), LBP-98-30, 48 NRC
355, 357 (1998)
NRC issued NUREG-1021 to set forth consistent standards for operator and senior reactor operator
examinations at various facilities; LBP-14-2, 79 NRC 150 (2014)

Randall L. Herring (Senior Reactor Operator License for Catawba Nuclear Station), LBP-98-30, 48 NRC
355, 358 (1998)
licensing boards have limited their review of NRC Staff reactor operator licensing decisions to those
issues that were resolved against the license applicant in the Staff’s informal review; LBP-14-2, 79
NRC 148 (2014)

equivalent words have equivalent meaning when repeated in the same statute; LBP-13-3, 77 NRC
91-92 (2013)

Reino de Espana v. American Bureau of Shipping, No. 03CIV3573LTRSRL, 2005 WL 1813017, at *13
(S.D.N.Y. 2005)
although the privilege log identifies and describes the documents sought to be protected, it fails to
give precise and certain reasons for asserting confidentiality over the documents; LBP-13-5, 77 NRC
247 n.76 (2013)
LEGAL CITATIONS INDEX

CASES

the FOIA exemption for inter- or intra-agency materials incorporates the deliberative process privilege, which protects documents that are prepared to assist an agency, board, or official to arrive at a decision; LBP-13-5, 77 NRC 239 (2013)

ripeness doctrine is drawn both from Article III limitations on judicial power and from prudential reasons for refusing to exercise jurisdiction; LBP-12-19, 76 NRC 198 (2012)

although the privilege log identifies and describes the documents sought to be protected, it fails to give precise and certain reasons for asserting confidentiality over the documents; LBP-13-5, 77 NRC 247 (2013)

Reyes-Gaona v. North Carolina Growers Association, 250 F.3d 851, 865 (4th Cir. 2001)
doctrine of expressio unis est exclusio alterius instructs that where a law expressly describes a particular situation to which it shall apply, what was omitted or excluded was intended to be omitted or excluded; LBP-13-9, 78 NRC 67-68 (2013)

NRC has authority to conduct any investigations it deems necessary and proper to the administration or enforcement of its authority, which includes any regulations or orders issued pursuant to the AEA; CLI-13-5, 77 NRC 227 (2013)

Richard E. Dow, CLI-91-9, 33 NRC 473, 479 (1991)
agencies are required to use alternative means for obtaining information to avoid unnecessary infringement of First Amendment associational rights; CLI-13-5, 77 NRC 230 (2013)
NRC subpoenas have been quashed or limited when the subpoena was not closely drawn or NRC did not consider alternative means for obtaining the requested information to avoid unnecessary infringement of First Amendment associational rights; CLI-13-5, 77 NRC 227 (2013)
under appropriate circumstances First Amendment rights give way to the compelling government interest in nuclear safety; CLI-13-5, 77 NRC 227 (2013)

Riverkeeper, Inc. v. Collins, 359 F.3d 156, 158 (2d Cir. 2004)
for contentions that fall within the facility’s current licensing basis, petitioner may seek action on its concerns by either filing a petition for rulemaking under 10 C.F.R. 2.802 or submitting an enforcement petition under 10 C.F.R. 2.206; LBP-11-21, 74 NRC 134 n.115 (2011)

Rouneke River Basin Association v. Hudson, 991 F.2d 132, 139 (4th Cir. 1993)
in determining whether the government’s position was substantially justified, courts must look to the totality of the circumstances; LBP-11-8, 73 NRC 368 (2011)

NEPA’s requirements, like publication of the environmental impact statement, implement NEPA’s sweeping policy goals by ensuring that agencies will take a hard look at environmental consequences; LBP-13-13, 78 NRC 286 (2013)

although boards may give reasonable deference to NRC guidance, such agency guidance does not substitute for regulations, is not binding authority, and does not prescribe NRC requirements; LBP-11-16, 73 NRC 670, 674 (2011)

environmental impact statement issued by a federal agency may rely on mitigation measures that are yet to be developed; LBP-13-4, 77 NRC 219 (2013)

National Environmental Policy Act declares a broad national commitment to protecting and promoting environmental quality; LBP-11-7, 73 NRC 264 (2011); LBP-13-13, 78 NRC 284 (2013)
to ensure that NEPA’s broad national commitment to protecting and promoting environmental quality is infused in the actions of the federal government, NEPA establishes certain action-forcing procedures on each federal agency; LBP-13-4, 77 NRC 119 (2013)

environmental impact statement ensures that decisionmakers will have available and will carefully consider detailed information concerning significant environmental impacts; CLI-15-10, 81 NRC 540 (2015)
environmental impact statement guarantees that the relevant information will be made available to the larger audience, such as petitioners and state and local governments, that may also play a role in the decisionmaking process; CLI-15-10, 81 NRC 540-41 (2015)

environmental impact statements cannot fulfill their role of providing a springboard for public comment if they fail to evaluate significant issues such as measures that the agency’s experts recommend to mitigate the consequences of a severe accident; LBP-12-18, 76 NRC 179 (2012); LBP-14-9, 80 NRC 58 (2014)

final environmental impact statements must be supplemented to provide complete, accurate, and up-to-date sources of information for members of the public and state and local governments; CLI-15-10, 81 NRC 538 n.7 (2015)

focusing government and public attention on the environmental effects of proposed agency action ensures that the agency will not act on incomplete information, only to regret its decision after it is too late to correct; LBP-12-1, 75 NRC 36-37 n.48 (2012)

goals of NEPA are to ensure that agency decisionmakers will have detailed information concerning significant environmental impacts of proposed projects when they make their decisions and to guarantee that such information will be available to the larger audience that may also play a role in the decisionmaking process; LBP-12-17, 76 NRC 81 (2012); LBP-13-4, 77 NRC 119-20, 209-10 (2013); LBP-13-13, 78 NRC 451, 508, 534 (2013)

NEPA exists in part to ensure that important effects will not be overlooked or underestimated only to be discovered after resources have been committed or the die otherwise cast; LBP-11-23, 74 NRC 351 (2011); LBP-12-1, 75 NRC 36 (2012); LBP-12-10, 75 NRC 679-80 (2012); LBP-13-4, 77 NRC 120, 210 (2013); LBP-14-9, 80 NRC 56 (2014)

NEPA has a dual purpose of ensuring that federal officials fully take into account the environmental consequences of a federal action before reaching major decisions, and informing the public, Congress, and other agencies of those consequences; LBP-11-35, 74 NRC 766 n.13 (2011); LBP-12-1, 75 NRC 34 (2012)

statutory requirement to prepare an environmental impact statement serves two purposes; CLI-15-10, 81 NRC 540 (2015)

although NEPA does not mandate particular results, its purposes include ensuring that NRC, in reaching its decision, will have available, and will carefully consider, detailed information concerning significant environmental impacts and will make available the relevant information to the larger audience that may also play a role in the decision; LBP-11-23, 74 NRC 330 (2011)

NEPA has twin goals of forcing agencies to take a hard look at the environmental consequences of a proposed project, and, making relevant analyses openly available, to permit the public a role in the agency’s decisionmaking process; LBP-11-14, 73 NRC 598 (2011); LBP-12-18, 76 NRC 179 (2012); LBP-14-9, 80 NRC 57 (2014); LBP-15-16, 81 NRC 697 n.511 (2015)

NEPA is intended to require federal agencies to consider the environmental consequences of their actions and to foster informed public participation in the decisionmaking process; LBP-12-12, 75 NRC 750 (2012); LBP-12-17, 76 NRC 120-21 (2012)

without substantive, comparative environmental impact information regarding other possible courses of action, the ability of an environmental impact statement to inform agency deliberation and facilitate public involvement would be greatly degraded; LBP-11-23, 74 NRC 331 (2011)

NEPA’s intent is that the FEIS should provide the public with detailed information concerning significant environmental impacts of the proposed federal action and alternatives available to mitigate those impacts; LBP-12-18, 76 NRC 179 (2012)

although NEPA does not direct any particular substantive result, all environmental consequences of the proposed action, including connected actions, must be fully evaluated in the FEIS; LBP-12-12, 75 NRC 780 (2012)

although NEPA mandates that an agency prepare an environmental impact statement and take a hard look at the environmental impacts of a proposed agency action, NEPA itself does not mandate
NEPA does not mandate particular decisions that an agency must reach, only the process the agency must follow while reaching decisions; LBP-11-17, 74 NRC 27 n.77 (2011); LBP-12-17, 76 NRC 81 n.49 (2012); LBP-12-18, 76 NRC 158 (2012); LBP-15-19, 81 NRC 824 (2015)

NEPA imposes procedural obligations on federal agencies proposing to take actions significantly affecting the quality of the human environment; LBP-11-39, 74 NRC 867-68 (2011)

NEPA requires each environmental impact statement to include a detailed discussion of measures that might mitigate the adverse environmental consequences of the proposed action; LBP-11-7, 73 NRC 264 (2011); LBP-12-18, 76 NRC 158 (2012); LBP-13-4, 77 NRC 216 (2013); LBP-15-23, 82 NRC 62 (2015)

NEPA imposes on NRC a disclosure obligation that NRC publicly discuss its evaluation of the reasonably foreseeable effects of a proposed action; CLI-15-25, 82 NRC 396 n.46 (2015)

although NEPA establishes a national policy in favor of protecting the human environment, NEPA does not require the agency to select the most environmentally benign alternative, but rather merely prohibits uninformed rather than unwise agency action; LBP-13-4, 77 NRC 120-21 (2013)

discussion of steps that can be taken to mitigate adverse environmental consequences plays an important role in the environmental analysis under NEPA; LBP-12-18, 76 NRC 134 (2012)

NEPA prohibits uninformed agency action; LBP-11-17, 74 NRC 27 (2011)

NEPA requires each environmental impact statement to include a detailed discussion of measures that might mitigate the adverse environmental consequences of the proposed action; LBP-11-7, 73 NRC 264 (2011); LBP-13-4, 77 NRC 216 (2013); LBP-15-23, 82 NRC 63, 64 (2015)

requirement that an environmental impact statement contain a detailed discussion of possible mitigation measures flows both from the language of NEPA and, more expressly, from the Council on Environmental Quality’s implementing regulations; LBP-13-4, 77 NRC 216 (2013)

NEPA does not impose a substantive obligation for a reviewing agency to require or enforce mitigation measures discussed in an environmental assessment; LBP-14-6, 79 NRC 415 (2014)

environmental impact statements must discuss any adverse environmental effects that cannot be avoided should the proposal be implemented and must provide a reasonably complete discussion of possible mitigation measures; LBP-12-23, 76 NRC 486 n.259 (2012)

agency’s procedural obligation to discuss mitigation in sufficient detail to ensure that environmental consequences have been fairly evaluated is distinguished from any substantive requirement to actually develop and adopt a detailed mitigation plan; LBP-14-7, 79 NRC 460 (2014)
by identifying new accident mitigation measures that are not evaluated in the FEIS, recommending that those measures be considered in pending COL reviews, and explaining why those measures are necessary for protection of public health and safety, the Fukushima Task Force Report provides sufficient support for intervenors’ argument that the FEIS fails to include a sufficient discussion of steps that can be taken to mitigate adverse environmental consequences; LBP-12-18, 76 NRC 164 (2012)

CEQ regulations require that agencies discuss possible mitigation measures in defining the scope of the EIS, in discussing alternatives to the proposed action and consequences of that action, and in explaining its ultimate decision; LBP-12-18, 76 NRC 160 (2012)
discussion of mitigation measures in an environmental impact statement is an important part of an agency’s hard look at the environmental consequences of proposed federal action; LBP-13-4, 77 NRC 216 (2013); LBP-14-7, 79 NRC 460 (2014)
environmental impact statements must include a reasonably complete discussion of possible mitigation measures; LBP-12-18, 76 NRC 159 (2012)
final supplemental environmental impact statement need not contain a complete mitigation plan; LBP-15-16, 81 NRC 694 (2015)
imPLICIT in NEPA’s demand that an agency prepare a detailed environmental impact statement is an understanding that the EIS will discuss the extent to which adverse effects can be avoided; LBP-12-18, 76 NRC 160 (2012)
mitigation must be discussed in sufficient detail in an environmental impact statement to ensure that environmental consequences have been fairly evaluated; LBP-11-2, 73 NRC 64 (2011); LBP-11-7, 73 NRC 265 (2011); LBP-11-13, 73 NRC 566 (2011); LBP-12-18, 76 NRC 134, 159 (2012); LBP-13-4, 77 NRC 216 (2013); LBP-14-9, 80 NRC 64-65 (2014); LBP-15-11, 81 NRC 430 (2015)
NEPA does not require that a complete mitigation plan be formulated and adopted before the agency makes its decision; LBP-13-4, 77 NRC 216 (2013)
numerous Council on Environmental Quality regulations require an agency to discuss possible mitigation measures, including 40 C.F.R. §§ 1508.25(b), 1502.14(f), 1502.16(h), and 1508.20; LBP-13-4, 77 NRC 216 (2013)
sufficiency of NRC’s hard look at the benefits of severe accident mitigation alternatives in comparison to their costs is subject to litigation in a license renewal proceeding; LBP-11-17, 74 NRC 21 (2011)
there is a fundamental distinction between a requirement that mitigation be discussed in sufficient detail to ensure that environmental consequences have been fairly evaluated, on the one hand, and a substantive requirement that a complete mitigation plan actually be formulated and adopted, on the other; LBP-11-14, 73 NRC 607 n.104 (2011)
where the agency has found mitigation strategies necessary to alleviate a potential impact, the associated discussion should be reasonably complete to properly evaluate the severity of the adverse effects; LBP-13-4, 77 NRC 216 (2013); LBP-15-11, 81 NRC 431, 437 (2015); LBP-15-16, 81 NRC 687 n.436 (2015)

NEPA does not demand the presence of a fully developed plan or a detailed explanation of specific measures that will be employed to mitigate the adverse impacts of a proposed action; LBP-11-7, 73 NRC 265 (2011)
to the extent a board would have NRC Staff elaborate on its analysis, the board’s decision does not appear patently unreasonable; CLI-11-14, 74 NRC 813 (2011)

because NEPA imposes no substantive requirement that mitigation measures actually be taken, it should not be read to require agencies to obtain an assurance that third parties will implement particular measures; CLI-11-14, 74 NRC 813 n.68 (2011); LBP-11-23, 74 NRC 330 (2011); LBP-14-7, 79 NRC 460-61 (2014)
it would be inconsistent with NEPA’s reliance on procedural mechanisms, as opposed to substantive, result-based standards, to demand the presence in an environmental impact statement of a fully developed plan that will mitigate environmental harm before an agency can act; LBP-13-4, 77 NRC 216 (2013); LBP-15-16, 81 NRC 688 (2015)
NEPA does not require the draft environmental impact statement to include a fully formulated or adopted mitigation plan, but its discussion must provide sufficient detail to ensure that environmental

LEGAL CITATIONS INDEX

CASES
consequences have been fairly evaluated; LBP-13-13, 78 NRC 453 (2013); LBP-15-23, 82 NRC 63 (2015)
NEPA generally does not mandate that identified mitigation measures be implemented; CLI-12-10, 75 NRC 488 (2012); LBP-11-14, 73 NRC 607 (2011); LBP-13-4, 77 NRC 216 (2013)

as a mitigation analysis, a severe accident mitigation alternatives analysis is neither a worst-case nor a best-case impacts analysis; LBP-11-7, 73 NRC 265 (2011)

NEPA does not require a worst-case analysis; LBP-11-38, 74 NRC 831 (2011); LBP-12-5, 75 NRC 237 (2012); LBP-13-13, 78 NRC 286, 452 n.1419 (2013)

a NEPA mitigation alternatives analysis need not reflect the most conservative, or worst-case, analysis; CLI-12-1, 75 NRC 57 (2012); CLI-12-10, 75 NRC 487 (2012)
the severe accident mitigation alternatives analysis is neither a worst-case nor a best-case impacts analysis; LB-11-18, 74 NRC 37-38 (2011)

Council on Environmental Quality regulations receive substantial deference from federal courts; LBP-12-17, 76 NRC 82 n.57 (2012)

environmental impact statements must cover all cumulative environmental impacts even if they occur offsite (e.g., beyond the licensee’s property line); LBP-13-4, 77 NRC 120 (2013)
Council on Environmental Quality regulation requiring an environmental impact statement to consider reasonably foreseeable impacts rather than a worst-case analysis is entitled to substantial deference and NEPA does not require a worst-case analysis in an EIS; LBP-13-4, 77 NRC 120 n.25, 210 (2013)

courts give controlling weight to an agency’s interpretation of its own regulation unless it is plainly erroneous or inconsistent with the regulation; LBP-12-19, 76 NRC 196 n.65 (2012)

NEPA does not require that a complete mitigation plan be actually formulated and adopted before the federal agency can issue an environmental impact statement and render its decision; LBP-13-4, 77 NRC 219 (2013)

where state and local governmental bodies that have jurisdiction over the area in which adverse effects need to be addressed and since they have the authority to mitigate them, it would be incongruous to conclude that a federal agency has no power to act until the local agencies have reached a final conclusion on what mitigation measures they consider necessary; LBP-13-4, 77 NRC 219 (2013)

Rochester Gas and Electric Corp. (Sterling Power Project, Nuclear Unit No. 1), ALAB-596, 11 NRC 867, 869 (1980)
stare decisis is not implicated where the board decision is unreviewed and therefore not binding on future tribunals, but as a prudential matter, the Commission vacates such decisions when appellate review is cut short by mootness; CLI-13-9, 78 NRC 558-59 (2013)

Rock Island, Arkansas, & Louisiana Railway Co. v. United States, 254 U.S. 141, 143 (1920)
those dealing with their government must turn square corners; LBP-15-24, 82 NRC 101 (2015)

Rockwell International Corp. (Rocketdyne Division), CLI-90-5, 31 NRC 337, 340 (1990)
Commission, like other adjudicatory bodies, looks with favor upon settlements; LBP-14-4, 79 NRC 333 (2014)

Rodriguez v. Taylor, 569 F.2d 1231, 1245 (3d Cir. 1977)
the presence of an attorney-client relationship suffices to entitle prevailing litigants to receive fee awards; LBP-11-8, 73 NRC 366 (2011)

Role Models America, Inc. v. Brownlee, 353 F.3d 962, 967 (D.C. Cir. 2004)
the government must demonstrate the reasonableness not only of its litigation position, but also of the agency’s actions; LBP-11-8, 73 NRC 368 n.97 (2011)
LEGAL CITATIONS INDEX

CASES

Roosevelt Campobello International Park Commission v. Environmental Protection Agency, 684 F.2d 1041, 1047 (1st Cir. 1982)

for siting alternatives, an agency’s duty under NEPA is to study all alternatives that appear reasonable and appropriate for study at the time of drafting the environmental impact statement; CLI-12-5, 75 NRC 342 n.244 (2012)

government may withhold from disclosure the identity of persons who furnish information of violations of law to officers charged with enforcement of the law; CLI-13-5, 77 NRC 229 (2013)

person does not need to wait until being charged with a crime and in the dock before he can challenge an order that imposes new burdens and liabilities on him; LBP-14-4, 79 NRC 370 n.52 (2014)

when the police power of the federal government is deployed to order a person to perform certain actions, under pain of losing his or her livelihood, liberty, and/or property, then that person has a right to challenge the order, and have a hearing to determine what the order means and whether it comports with the law; LBP-14-4, 79 NRC 370-71 (2014)

Sacramento Municipal Utility District (Rancho Seco Nuclear Generating Station), ALAB-655, 14 NRC 799, 816 (1981)

licensing proceedings are not the appropriate venue for generic rulemaking issues; CLI-15-9, 81 NRC 530 (2015)

matters that are or are about to become the subject of a general rulemaking are not appropriate subjects for contentions before individual licensing boards; LBP-14-1, 79 NRC 95 n.293 (2014)

Sacramento Municipal Utility District (Rancho Seco Nuclear Generating Station), CLI-92-2, 35 NRC 47, 56 (1992)

in determining whether an individual member of an organization qualifies for standing in his or her own right, NRC generally applies traditional judicial standing concepts; LBP-11-13, 73 NRC 545 (2011)

Sacramento Municipal Utility District (Rancho Seco Nuclear Generating Station), CLI-93-3, 37 NRC 135, 144-45 (1993)

NRC Staff’s environmental impact statement need only discuss those alternatives that will bring about the ends of the proposed action; CLI-12-5, 75 NRC 339 (2012)

Sacramento Municipal Utility District (Rancho Seco Nuclear Generating Station), CLI-93-3, 37 NRC 135, 147 (1993)

intervenor has an iron-clad obligation to examine the publicly available documentary material with sufficient care to enable it to uncover any information that could serve as a foundation for a specific contention; CLI-11-2, 73 NRC 339 n.22 (2011); LBP-12-13, 75 NRC 789-90 n.17 (2012)

Sacramento Municipal Utility District (Rancho Seco Nuclear Generating Station), CLI-93-3, 37 NRC 135, 152-53 n.46 (1993)

all parties, including NRC Staff, are obligated to bring any significant new information to the board’s attention; LBP-14-2, 79 NRC 243 (2014)

Sacramento Municipal Utility District (Rancho Seco Nuclear Generating Station), CLI-94-2, 39 NRC 91, 94 (1994)

Commission generally disfavors interlocutory review; CLI-15-17, 82 NRC 36 (2015)

possibility of board error in admitting a contention does not warrant interlocutory review; CLI-15-17, 82 NRC 44, 47 (2015)

rejection of contention, where petitioner has other contentions pending for hearing does not constitute serious and irreparable harm or affect the structure of the proceeding in a pervasive or unusual manner; CLI-15-17, 82 NRC 37 n.23, 44 (2015)

Sacramento Municipal Utility District (Rancho Seco Nuclear Generating Station), CLI-94-2, 39 NRC 91, 94 (1994)

routine contention admissibility decisions do not affect the basic structure of a proceeding in a pervasive or unusual manner; CLI-12-13, 75 NRC 688 (2012)
LEGAL CITATIONS INDEX

CASES

Sacramento Municipal Utility District (Rancho Seco Nuclear Generating Station), LBP-93-23, 38 NRC 200, 247-48 (1993), review declined, CLI-94-2, 39 NRC 91 (1994) petition that lack alleged facts or expert opinions to support the contention are inadmissible; LBP-11-20, 74 NRC 623 (2011)

Safety Light Corp. (Bloomsburg Site Decontamination and License Renewal Denials), CLI-92-13, 36 NRC 79, 89 (1992) related proceedings may be consolidated based on similarity of issues in the proceedings, commonality of litigants, and convenience and saving of time or expense; CLI-14-5, 79 NRC 261 (2014)

San Diego Building Trades Council v. Garmon, 359 U.S. 236, 245 (1959) labor-related disputes are within the exclusive competence of the National Labor Relations Board; LBP-14-4, 79 NRC 331 (2014)

San Luis Obispo Mothers for Peace v. NRC, 449 F.3d 1016 (9th Cir. 2006) impacts of attacks on reactors are cognizable under NEPA, an evaluation of mitigation measures is required by NEPA and NRC regulations, and an evaluation of measures to mitigate attacks on nuclear reactors cannot be found in the license renewal generic environmental impact statement; CLI-11-11, 74 NRC 454 (2011) NRC is required to analyze potential terrorist attacks as part of its NEPA review with regard to facilities located in the Ninth Circuit; LBP-12-21, 76 NRC 241 n.128 (2012)

San Luis Obispo Mothers for Peace v. NRC, 449 F.3d 1016, 1031 (9th Cir. 2006) only those NRC-regulated facilities located within the Ninth Circuit’s jurisdictional boundaries are required to conduct environmental analyses of possible terrorist acts; LBP-14-6, 79 NRC 428 (2014)

San Luis Obispo Mothers for Peace v. NRC, 751 F.2d 1287 (D.C. Cir. 1984) factors material to determining whether NRC actions constitute a de facto license amendment are described; LBP-13-7, 77 NRC 332 (2013)

San Luis Obispo Mothers for Peace v. NRC, 751 F.2d 1287, 1314 (D.C. Cir. 1984), reh’g en banc on other grounds, 789 F.2d 26 (D.C. Cir. 1985), cert. denied, 479 U.S. 923 (1986) lifting a license suspension is not a license amendment; LBP-15-27, 82 NRC 191 n.41 (2015)

San Luis Obispo Mothers for Peace v. NRC, 751 F.2d 1287, 1316-17 (D.C. Cir. 1984), vacated in part, 760 F.2d 1320 (D.C. Cir. 1985) (en banc), and aff’d, 789 F.2d 26 (D.C. Cir. 1985) (en banc), cert. denied, 479 U.S. 923 (1986) parties were not permitted to raise issues or there was no opportunity for hearing on a particular issue; LBP-11-20, 74 NRC 91 n.3 (2011)

San Luis Obispo Mothers for Peace v. NRC, 799 F.2d 1268, 1270 (9th Cir. 1986) NRC regulations appropriately require a hearing before the proposed license amendment becomes effective whenever the amendment creates the possibility of a new or different kind of accident; LBP-15-20, 81 NRC 859 n.181 (2015)

Sanders v. United States, 373 U.S. 1, 17 (1963) denial of vacatur is merely one application of the principle that a suitor’s conduct in relation to the matter at hand may disentitle him to the relief he seeks; CLI-13-9, 78 NRC 562 n.4 (2013)

Save Our Ecosystems v. Clark, 747 F.2d 1240, 1249 (9th Cir. 1984) agency is required to acquire the information that is lacking in an environmental impact statement if it is essential to a reasoned choice and costs of obtaining it are not exorbitant; LBP-14-9, 80 NRC 62 n.207 (2014) almost every EIS contains some original research, and almost every time an environmental impact statement is ruled inadequate by a court, it is because more data or research is needed; LBP-14-9, 80 NRC 62 n.207 (2014)

Save Our Sonoran v. Flowers, 408 F.3d at 1113, 1121-23 (9th Cir. 2005) Corps of Engineers improperly constrained NEPA analysis; LBP-14-6, 79 NRC 422 (2014) NEPA applies to agencies of the federal government, not to private parties such as applicants for NRC licenses; LBP-11-32, 74 NRC 666 (2011)

Scarborough v. Principi, 541 U.S. 401, 414 (2004) under the Equal Access to Justice Act, the government bears the burden of establishing that its position was substantially justified; LBP-11-8, 73 NRC 368 (2011)
LEGAL CITATIONS INDEX

CASES

Congress did not want the “substantially justified” standard to be read to raise a presumption that the
government position was not substantially justified simply because it lost the case; LBP-11-8, 73
NRC 368 n.100 (2011)

Schweiker v. Wilson, 450 U.S. 221, 226 & n.6 (1981)
the equal protection component of the Fifth Amendment’s Due Process Clause applies to federal
action, and the Equal Protection Clause of the Fourteenth Amendment applies to state action;
LBP-11-15, 73 NRC 639 n.20 (2011)

Scientists’ Institute for Public Information, Inc. v. AEC, 481 F.2d 1079, 1092 (D.C. Cir. 1973)
NEPA only requires reasonable forecasting of need for power; LBP-11-38, 74 NRC 831 (2011);
LBP-12-5, 75 NRC 237 (2012)
NEPA’s rule of reason is a judicial device to ensure that common sense and reason are not lost in the
rubric of regulation and thus requires only reasonable forecasting; LBP-13-13, 78 NRC 452 (2013)

Seacoast Anti-Pollution League v. NRC, 598 F.2d 1221, 1230 (1st Cir. 1979)
for siting alternatives, an agency must consider alternatives that appear reasonable at the time of the
NEPA review; CLI-12-5, 75 NRC 342 n.244 (2012)

Securities and Exchange Commission v. Chenery Corp., 318 U.S. 80 (1943)
a court cannot defer to interpretive proposals offered by counsel at oral argument and affirm on the
basis of that reading when the statute does not plainly compel the reading being proposed;
CLI-11-12, 74 NRC 470 (2011)

choice made between proceeding by general rule or by individual, ad hoc litigation is one that lies
primarily in the informed discretion of the administrative agency; CLI-15-11, 81 NRC 549 n.19
(2015); LBP-14-16, 80 NRC 193 (2014)

Securities and Exchange Commission v. Comserv Corp., 908 F.2d 1407, 1409-10, 1413 (8th Cir. 1990)
neither the Equal Access to Justice Act nor the legislative history provides a definition of the word
“incur”; LBP-11-8, 73 NRC 363-64 (2011)

Securities and Exchange Commission v. Comserv Corp., 908 F.2d 1407, 1409-10, 1415 (8th Cir. 1990)
where a pro bono attorney forgives a fee to a client unable to afford legal expenses, that client is
eligible for an Equal Access to Justice Act award on the basis of that arrangement with the attorney;
LBP-11-8, 73 NRC 365 n.74 (2011)

Securities and Exchange Commission v. Comserv Corp., 908 F.2d 1407, 1409-10, 1416 (8th Cir. 1990)
the fee-deterrent-removal purpose of the Equal Access to Justice Act would not be served by an
award of fees to an individual whose fees are fully paid by an ineligible organization; LBP-11-8, 73
NRC 363 (2011)

exception to the mootness doctrine occurs if the challenged action is too short in duration to be
litigated and there is a reasonable expectation that the same party will be subjected to the same
action again; CLI-13-9, 78 NRC 558 n.26 (2013)

exception to the mootness doctrine occurs when a case is capable of repetition, yet evading review;
CLI-13-10, 78 NRC 568 n.35 (2013)

Seminole Nation v. United States, 316 U.S. 286, 296-97 (1942)
applicant owes no duty to address the federal government’s trust responsibility in its environmental
report; LBP-14-6, 79 NRC 428 (2014)
the federal government bears a trust responsibility to Native American tribes, and the NRC, as a
federal agency, owes a fiduciary duty to tribes and their members; LBP-11-30, 74 NRC 632 (2011);
LBP-12-24, 76 NRC 519 (2012)

Seminole Nation v. United States, 316 U.S. 286, 297 (1942)
government’s trust responsibility is at its apex when it comes to managing tribal resources and
preventing confiscation or environmental degradation of those resources; LBP-14-16, 80 NRC 191
(2014)

replies may not contain new information that was not raised in either the petition or answers, but
arguments that respond to the petition or answers are not precluded, whether they are offered in
rebuttal or in support; CLI-11-14, 74 NRC 809 (2011)

purpose of the rule to dismiss proceedings on conditions is primarily to prevent voluntary dismissals that unfairly affect the other side, and to permit the imposition of curative conditions; LBP-15-28, 82 NRC 242 n.67 (2015)

conditions set by boards on voluntary withdrawals are set on a case-by-case basis, with any conditions tailored to address the particular circumstances of that proceeding; LBP-15-28, 82 NRC 241 (2015)

Sequoyah Fuels Corp. (Gore, Oklahoma Site Decommissioning), CLI-01-2, 53 NRC 9, 13 (2001)

standing requires petitioner to show a concrete and particularized harm, stemming from the challenged action, and redressable by a favorable decision; CLI-13-2, 77 NRC 49 (2013)

Sequoyah Fuels Corp. (Gore, Oklahoma Site Decommissioning), CLI-01-2, 53 NRC 9, 14 (2001)

standard of review of a board’s determination on standing is deferential and the Commission will uphold the decision absent a clear misapplication of facts or law; CLI-15-25, 82 NRC 394 (2015)
the Commission will defer to board rulings on standing absent an error of law or abuse of discretion; CLI-12-12, 75 NRC 608 (2012)

Sequoyah Fuels Corp. (Gore, Oklahoma Site Decommissioning), CLI-01-2, 53 NRC 9, 19 (2001)

the Commission declined to take review of board rulings that were not inextricably linked to appealable issues, and the resolution of which did not have the potential to dispose of the entire litigation; CLI-12-12, 75 NRC 607 n.13 (2012)

Sequoyah Fuels Corp. (Gore, Oklahoma Site Decommissioning), CLI-01-2, 53 NRC 9, 20 (2001)

the Commission declines to take pendent jurisdiction of contention admissibility determinations, to avoid encouraging interlocutory appeals riding on the coattails of appealable issues; CLI-12-12, 75 NRC 607 (2012)

Sequoyah Fuels Corp. (Gore, Oklahoma Site), CLI-03-15, 58 NRC 349 (2003)

section 11e(2) byproduct material is tailings or wastes produced by the extraction or concentration of uranium or thorium from any ore processed primarily for its source material content; LBP-12-3, 75 NRC 174 n.1 (2012)

Sequoyah Fuels Corp. (Gore, Oklahoma Site), CLI-03-15, 58 NRC 349, 353-54 (2003)

the byproduct material category was created in 1978 by the Uranium Mill Tailings and Reclamation Act to afford NRC regulatory jurisdiction over mill tailings at active and inactive uranium milling sites; LBP-12-3, 75 NRC 174 n.1 (2012)

Sequoyah Fuels Corp. (Gore, Oklahoma Site Decommissioning), LBP-99-46, 50 NRC 386 (1999)

“synergistic” refers to the joint action of different parts or sites which, acting together, enhance the effects of one or more individual sites; LBP-15-5, 81 NRC 274 n.135 (2015)

Sequoyah Fuels Corp. (Gore, Oklahoma Site), LBP-03-24, 58 NRC 383 (2003), aff’d, CLI-04-2, 59 NRC 5 (2004)

hearing requests were dismissed as untimely and referred to the Executive Director for Operations for consideration under section 2.206; CLI-12-20, 76 NRC 440 n.13 (2012)

Sequoyah Fuels Corp. and General Atomics (Gore, Oklahoma Site), CLI-94-9, 40 NRC 1, 7 (1994)

without a showing of irreparable injury, petitioners seeking a stay of effectiveness must make an overwhelming showing of likely success on the merits; CLI-12-11, 75 NRC 529 (2012)

Sequoyah Fuels Corp. and General Atomics (Gore, Oklahoma Site), CLI-94-11, 40 NRC 55, 59 n.2 (1994)

although the Appeal Panel was abolished in 1991, the Commission explicitly directed that the decisions of its boards were still to carry precedential weight; LBP-11-8, 73 NRC 358 (2011) although the Atomic Safety and Licensing Appeal Panel is no longer in existence, the decisions of its appeals boards continue to be binding to the degree they concern a regulation or regulatory matter that has not been revised or otherwise materially altered; LBP-11-34, 74 NRC 696 n.70 (2011)

Sequoyah Fuels Corp. and General Atomics (Gore, Oklahoma Site), CLI-94-11, 40 NRC 55, 61 (1994)

possibility that a board may have made an incorrect legal ruling can be reviewed, if necessary, on appeal from a partial initial decision or other final appealable order; CLI-15-17, 82 NRC 37, 44 (2015); CLI-15-24, 82 NRC 335 (2015)

Sequoyah Fuels Corp. and General Atomics (Gore, Oklahoma Site), CLI-94-11, 40 NRC 55, 61-62 (1994)

labor and expense of pursuing litigation that petitioner sought to curtail do not constitute irreparable harm; CLI-11-10, 74 NRC 256 n.24 (2011)
Sequoyah Fuels Corp. and General Atomics (Gore, Oklahoma Site), CLI-94-11, 40 NRC 55, 62-63 (1994)
board’s assertedly erroneous ruling does not constitute a pervasive and unusual effect on the proceeding; CLI-15-17, 82 NRC 47 (2015)
exansion of issues for litigation that results from a board action does not have a pervasive and unusual effect on the litigation; CLI-11-10, 74 NRC 256 n.24 (2011); CLI-15-17, 82 NRC 37 n.25, 44 n.71 (2015)

Sequoyah Fuels Corp. and General Atomics (Gore Oklahoma Site), CLI-94-12, 40 NRC 64 (1994)
intervention has been granted to a third party seeking a hearing on an enforcement order on the basis of generally applicable standing and contention admissibility requirements; LBP-14-4, 79 NRC 327 n.38 (2014)
oversight activities at times involve enforcement actions, including orders and civil penalties, to which a hearing right or opportunity attaches; CLI-15-5, 81 NRC 338 n.52 (2015)

Sequoyah Fuels Corp. and General Atomics (Gore, Oklahoma Site), CLI-94-12, 40 NRC 64, 71 (1994)
contemporaneous judicial concepts of standing are applied in NRC proceedings; CLI-15-25, 82 NRC 394 (2015)
intervention petitioner must allege such a personal stake in the outcome of the controversy as to demonstrate that a concrete adverseness exists that will sharpen the presentation of issues; CLI-15-25, 82 NRC 394 (2015)

presiding officer’s approval of settlement is a matter that must give due consideration to the public interest; LBP-15-21, 82 NRC 8 (2015)

Sequoyah Fuels Corp. and General Atomics (Gore, Oklahoma Site), CLI-94-12, 40 NRC 64, 71-72 (1994)
intervention petitioner must allege an injury in fact that is fairly traceable to the challenged action and is likely to be redressed by a favorable decision; CLI-15-25, 82 NRC 394 (2015); LBP-11-6, 73 NRC 168-69 (2010); LBP-11-16, 73 NRC 652 (2011)

Sequoyah Fuels Corp. and General Atomics (Gore, Oklahoma Site), CLI-94-12, 40 NRC 64, 72 (1994)
organization seeking representational standing on behalf of its members may meet the injury-in-fact requirement by demonstrating that at least one of its members, who has authorized the organization to represent his or her interest, will be injured by the possible outcome of the proceeding; LBP-15-5, 81 NRC 256, 257 (2015); LBP-15-17, 81 NRC 771 n.104, 776 (2015)

Sequoyah Fuels Corp. and General Atomics (Gore, Oklahoma Site), CLI-94-12, 40 NRC 64, 74 (1994)
petitioners are not required to demonstrate their asserted injury with certainty at the contention admissibility stage of the proceeding; CLI-12-12, 75 NRC 613 (2012); CLI-15-25, 82 NRC 397 & n.49 (2015)

Sequoyah Fuels Corp. and General Atomics (Gore, Oklahoma Site), CLI-94-12, 40 NRC 64, 75 (1994)
cause of injury to intervention petitioner need not flow directly from the challenged action, but the chain of causation must be plausible; CLI-15-25, 82 NRC 394 (2015)
living within a specific distance from the plant is enough to confer standing on an individual or group in proceedings for construction permits, operating licenses, or significant amendments thereto; LBP-15-20, 81 NRC 837 n.30 (2015)
proximity presumption applies to persons who have frequent contacts in the area near a nuclear power plant; LBP-15-17, 81 NRC 77 n.97 (2015)
to show standing, petitioner must demonstrate that the asserted injury is plausibly linked to the challenged action; CLI-15-25, 82 NRC 395 (2015)

Sequoyah Fuels Corp. and General Atomics (Gore, Oklahoma Site), CLI-94-12, 40 NRC 64, 75 n.22 (1994)
in lieu of the injury and causation showings for standing, petitioner has been able to establish proximity-plus by showing that the proposed licensing action involves a significant source of radiation that has an obvious potential for offsite consequences; LBP-12-3, 75 NRC 179 (2012); LBP-13-6, 77 NRC 271 n.5 (2013)

Sequoyah Fuels Corp. and General Atomics (Gore, Oklahoma Site), CLI-97-13, 46 NRC 195, 205 (1997)
Commission, like other adjudicatory bodies, looks with favor upon settlements; LBP-14-4, 79 NRC 333 (2014)

Sequoyah Fuels Corp. and General Atomics (Gore, Oklahoma Site), CLI-97-13, 46 NRC 195, 207 (1997)
NRC Staff’s position in an enforcement proceeding is not itself dispositive of whether an enforcement agreement should be approved, but regulatory instruction to accord that position due weight is dispositive proof of the importance of Staff’s views; LBP-15-21, 82 NRC 8 (2015)
presiding officer’s approval of settlement is a matter that must give due consideration to the public interest; LBP-15-21, 82 NRC 8 (2015)

Sequoyah Fuels Corp. and General Atomics (Gore, Oklahoma Site), CLI-97-13, 46 NRC 195, 209 (1997)

presiding officer’s public interest inquiry for approval of settlement agreement is described; LBP-15-21, 82 NRC 8, 15 (2015)

Sequoyah Fuels Corp. and General Atomics (Gore, Oklahoma Site), CLI-97-13, 46 NRC 195, 222-23 (1997)

public interest standard for settlement agreement review concerns whether the approval process deprives interested parties of meaningful participation; LBP-15-21, 82 NRC 17 (2015)

Sequoyah Fuels Corp. and General Atomics (Gore, Oklahoma Site Decontamination and Decommissioning Funding), LBP-94-5, 39 NRC 54, 64 (1994)

petitioner has standing when seeking to intervene to ensure that an enforcement order will be upheld; CLI-13-2, 77 NRC 46 n.27 (2013)

Sequoyah Fuels Corp. and General Atomics (Gore, Oklahoma Site Decontamination and Decommissioning Funding), LBP-94-5, 39 NRC 54, 72 (1994)

interested stakeholders who stand to benefit from a confirmatory order’s safety measures may intervene in a contested enforcement proceeding to protect its interest in ensuring that the order is upheld as issued; CLI-13-2, 77 NRC 46 (2013)

Sequoyah Fuels Corp. and General Atomics (Gore, Oklahoma Site Decontamination and Decommissioning Funding), LBP-94-5, 39 NRC 54, 65-66 (1994)

usual rule of regulatory interpretation is that different language is intended to mean different things, and thus a demand for a hearing is not to be treated as a mere request for a hearing; LBP-13-3, 77 NRC 90 (2013)

Sequoyah Fuels Corp. and General Atomics (Gore, Oklahoma Site Decontamination and Decommissioning Funding), LBP-94-5, 39 NRC 54, 73 n.19 (1994)

application of the precept that different language is intended to mean different things may be suspended if the purpose or regulatory history behind the language shows that no difference was intended; LBP-13-3, 77 NRC 90 (2013)

Shaw AREVA MOX Services, LLC (Mixed Oxide Fuel Fabrication Facility), CLI-09-2, 69 NRC 55, 63 (2009)

licensing boards lack authority to direct the Staff’s nonadjudicatory actions; CLI-11-14, 74 NRC 813 n.70 (2011)

Shaw AREVA MOX Services, LLC (Mixed Oxide Fuel Fabrication Facility), CLI-09-2, 69 NRC 55, 63 n.33 (2009)

although the Appeal Panel was abolished in 1991, the Commission explicitly directed that the decisions of its boards were still to carry precedential weight; LBP-11-8, 73 NRC 358 (2011)

Shaw AREVA MOX Services, LLC (Mixed Oxide Fuel Fabrication Facility), CLI-09-2, 69 NRC 55, 65 (2009)

if intervenors file a new or amended contention, with supporting materials, within 60 days after pertinent information first becomes available, then the contention will be deemed timely filed and intervenors will not have to satisfy the late-filing requirements of 10 C.F.R. 2.309(c) or the requirements for reopening the record; LBP-11-22, 74 NRC 281 (2011)

in unusual circumstances, where fairness dictates, the Commission has been willing to soften or waive its reopening requirements; CLI-12-14, 75 NRC 700 n.56 (2012)

Shaw AREVA MOX Services, LLC (Mixed Oxide Fuel Fabrication Facility), CLI-09-2, 69 NRC 55, 65 n.47 (2009)

hearing petitioners have an ironclad obligation to examine the publicly available documentary material pertaining to the facility in question with sufficient care to uncover any information that could serve as the foundation for a specific contention; LBP-11-9, 73 NRC 403 n.73 (2011)

intervention petitioners have an ironclad obligation to review the application thoroughly and to base their challenges on its contents; CLI-12-5, 75 NRC 312 n.67 (2012)

Shaw AREVA MOX Services, LLC (Mixed Oxide Fuel Fabrication Facility), CLI-09-2, 69 NRC 55, 65-66 n.48 (2009)

reopening the record is an extraordinary action and proponents bear a heavy burden; LBP-11-22, 74 NRC 269-70 (2011)
LEGAL CITATIONS INDEX

CASES

Shaw AREVA MOX Services, LLC (Mixed Oxide Fuel Fabrication Facility), CLI-09-2, 69 NRC 55, 66 (2009)
  adjudications must have a defined endpoint; LBP-11-22, 74 NRC 273 (2011)
Shaw AREVA MOX Services, LLC (Mixed Oxide Fuel Fabrication Facility), LBP-07-14, 66 NRC 169, 183 (2007)
  to demonstrate organizational standing, petitioner must show injury-in-fact to the interests of the organization itself; LBP-15-17, 81 NRC 771 (2015)
Shaw AREVA MOX Services, LLC (Mixed Oxide Fuel Fabrication Facility), LBP-07-14, 66 NRC 169, 210 n.95 (2007)
  if a contention satisfies the timeliness requirement of 10 C.F.R. 2.309(f)(2)(iii), then, by definition, it is not subject to 10 C.F.R. 2.309(c) which specifically applies to nontimely filings; LBP-12-18, 76 NRC 138 (2012)
Shaw AREVA MOX Services, LLC (Mixed Oxide Fuel Fabrication Facility), LBP-08-11, 67 NRC 460, 482 (2008)
  boards may reformulate contentions to eliminate extraneous issues or to consolidate issues for a more efficient proceeding; CLI-15-25, 82 NRC 401 (2015); LBP-11-13, 73 NRC 556 n.133, 568 n.222 (2011); LBP-12-18, 76 NRC 145 n.76 (2012); LBP-15-5, 81 NRC 262, 270 n.116, 273 (2015); LBP-15-13, 81 NRC 468 n.66 (2015); LBP-15-17, 81 NRC 780 n.165 (2015)
Shaw AREVA MOX Services, LLC (Mixed Oxide Fuel Fabrication Facility), LBP-08-11, 67 NRC 460, 503-05 (2008)
  contention prematurity/belatedness dilemma is discussed; LBP-15-24, 82 NRC 97-98 n.193 (2015)
Shaw AREVA MOX Services, LLC (Mixed Oxide Fuel Fabrication Facility), LBP-11-9, 73 NRC 391, 396 (2011)
  at the Construction Authorization Request stage, the board dismissed a material control and accounting contention as moot, pending submittal of applicant’s Fundamental Nuclear Material Control Plan which would require inclusion of a detailed MC&A program; LBP-14-1, 79 NRC 45 (2014)
Shaw AREVA MOX Services, LLC (Mixed Oxide Fuel Fabrication Facility), LBP-11-9, 73 NRC 391, 422 (2011)
  no board has attempted to invoke sua sponte review in the past 20 years; LBP-14-9, 80 NRC 39 n.70 (2014)
Shaw AREVA MOX Services, LLC (Mixed Oxide Fuel Fabrication Facility), LBP-12-2, 75 NRC 159 (2012)
  boards have closed their hearings even when they were concerned with less sensitive (i.e., nonpublic but unclassified) types of information; LBP-12-21, 76 NRC 249 (2012)
  the principle that justice cannot survive behind walls of silence has long been reflected in the Anglo-American distrust for secret trials; LBP-11-5, 73 NRC 134 n.6 (2011)
  contention rule is strict by design and does not permit the filing of a vague, unpaticularized contention, unsupported by affidavit, expert, or documentary support; LBP-13-9, 78 NRC 48 n.35 (2013)
  contention rule is strict by design and does not permit the filing of a vague, unpaticularized contention, unsupported by affidavit, expert, or documentary support; LBP-14-5, 79 NRC 385 n.38 (2014)
Shieldalloy Metallurgical Corp. (Decommissioning of the Newfield, New Jersey Facility), CLI-09-1, 69 NRC 1, 5 (2009)
  absent compelling circumstances, NRC Staff is expected to accord sufficient priority and devote sufficient resources to meeting its current estimated safety and environmental review schedule; CLI-12-4, 75 NRC 158 n.22 (2012); LBP-15-2, 81 NRC 59 (2015)
Commission directs NRC Staff to devote sufficient resources to complete its review in a timely manner; CLI-15-17, 82 NRC 35 (2015)
  unrestricted release is the preferable method for terminating radioactive materials licenses; CLI-11-12, 74 NRC 491 (2011)
Shieldalloy Metallurgical Corp. (Decommissioning of the Newfield, New Jersey Site), CLI-10-8, 71 NRC 142, 147 & n.25 (2010)
NRC traditionally has entertained motions to stay agency action pending judicial review; CLI-12-11, 75 NRC 528 (2012)

Shieldalloy Metallurgical Corp. (Decommissioning of the Newfield, New Jersey Site), CLI-10-8, 71 NRC 142, 150-51 (2010)
in deciding motions seeking a stay of agency action pending judicial review, the Commission looks to
the same four-part test that governs stays of licensing board decisions pending Commission review;
CLI-12-11, 75 NRC 529 (2012)

Shieldalloy Metallurgical Corp. (Decommissioning of the Newfield, New Jersey Site), CLI-10-8, 71 NRC 142, 151 (2010)
irreparable injury is the most important of the factors for grant or denial of a stay; CLI-12-11, 75

Shieldalloy Metallurgical Corp. (Decommissioning of the Newfield, New Jersey Site), CLI-10-8, 71 NRC 142, 154 (2010)
even if a party moving for a stay fails to show irreparable injury, a board may still grant a stay if
movant has made an overwhelming showing or a demonstration of virtual certainty that it will
prevail on the merits; CLI-12-11, 75 NRC 529 (2012); LBP-15-2, 81 NRC 54, 58 (2015)

Shieldalloy Metallurgical Corp. (Decommissioning of the Newfield, New Jersey Site), CLI-10-8, 71 NRC 142, 163 (2010)
if motions for stay of effectiveness demonstrate neither irreparable injury nor that reversal of the
licensing board is a virtual certainty, then the remaining factors need not be considered; CLI-12-11,
75 NRC 529 n.32 (2012)

Shieldalloy Metallurgical Corp. (Decommissioning of the Newfield, New Jersey Site), CLI-13-6, 78 NRC 155 (2013)
Commission has inherent authority to supervise both NRC Staff’s work and adjudicatory proceedings
relating to license applications; CLI-14-1, 79 NRC 2 (2014)
when a matter is not strictly adjudicatory in nature or otherwise does not fit cleanly within the
procedures described in NRC rules of practice, the Commission undertakes a decision as an exercise
of its inherent supervisory authority over agency proceedings; CLI-13-8, 78 NRC 224 (2013)

Shieldalloy Metallurgical Corp. v. NRC, 624 F.3d 489, 492-93 (D.C. Cir. 2010)
federal agencies would be acting arbitrarily and capriciously if they did not look at relevant data and
sufficiently explain a rational nexus between the facts found in their review and the choice they
make as a result of that review; LBP-11-17, 74 NRC 22-23 (2011)

Shieldalloy Metallurgical Corp. v. NRC, 624 F.3d 489, 494 (D.C. Cir. 2010)
state requests for limited agreements will be considered by NRC only if the state can identify discrete
categories of material or classes of licensed activity that can be reserved to NRC authority without
undue confusion to the regulated community or burden to NRC resources and can be applied
logically and consistently to existing and future licensees over time; CLI-11-12, 74 NRC 469-70
(2011)

Shieldalloy Metallurgical Corp. v. NRC, 624 F.3d 489, 495 (D.C. Cir. 2010)
NRC has discretion to negotiate the terms of an agreement with a state requesting authority over
nuclear materials; CLI-11-12, 74 NRC 474 (2011)
burden of proving prejudicial error by a federal agency rests with the party challenging the agency’s
action, but this is not a particularly onerous requirement; LBP-14-2, 79 NRC 166 (2014)

Shoshone-Bannock Tribes v. Reno, 56 F.3d 1476, 1482 (D.C. Cir. 1995)
NRC’s trust responsibility does not impose a duty on the NRC to take action beyond complying with
generally applicable statutes and regulations; LBP-14-6, 79 NRC 429 (2014)

Siegel v. AEC, 400 F.2d 778, 783 (D.C. Cir. 1968)
agency’s interpretation of what is properly within its jurisdictional scope is entitled to great deference,
and will not be overturned if reasonably related to the language and purposes of the statute;
LBP-14-9, 80 NRC 55 (2014)
court found no inevitable clash between NRC’s broad regulatory authority under the Atomic Energy Act and the action-forcing provisions of the National Environmental Policy Act; LBP-14-9, 80 NRC 54-55 (2014)

Siegel v. AEC, 400 F.2d 778, 785-86 (D.C. Cir. 1968)

formal adjudicatory procedures are inappropriate in export or import licensing proceedings; CLI-11-3, 73 NRC 623-24 n.53 (2011)

Sierra Club v. Department of Transportation, 753 F.2d 120, 127 (D.C. Cir. 1985)

allegedly to preparing an environmental impact statement, NRC can conduct an environmental assessment and make a finding of no significant impact; LBP-13-13, 78 NRC 272 n.79 (2013)

Sierra Club v. Environmental Protection Agency, 995 F.2d 1478, 1485 (9th Cir. 1993)

NEPA applies to agencies of the federal government, not to private parties such as applicants for NRC licenses; LBP-11-32, 74 NRC 666 (2011)

Sierra Club v. Fossielite, 816 F.2d 205, 210 (5th Cir. 1987)

agency decisions regarding the need to supplement an environmental impact statement based on new and significant information are subject to the rule of reason; LBP-11-26, 74 NRC 536 n.13 (2011)

supplementing an environmental impact statement is not necessary unless new information presents a seriously different picture of the environmental impact of the proposed project from what was previously envisioned; CLI-11-5, 74 NRC 168 (2011); CLI-12-7, 75 NRC 388-89, 390-91 (2012); LBP-12-18, 76 NRC 141-42 (2012); LBP-13-9, 78 NRC 64 (2013)

Sierra Club v. Georgia Power Co., 443 F.3d 1346, 1348 (11th Cir. 2006)

a source permit is an operating permit that the Clean Air Act requires major stationary sources of air pollution to obtain; LBP-11-13, 73 NRC 583 n.356 (2011)

Sierra Club v. Lynn, 502 F.2d 43, 61 (5th Cir. 1974), cert. denied, 422 U.S. 1049 (1975)

NEPA does not demand that every federal decision be verified by reduction to mathematical absolutes for insertion into a precise formula; LBP-11-7, 73 NRC 282 n.173 (2011)

agency NEPA responsibilities in situations where an agency has no ability because of lack of statutory authority to address the impact is distinguished from situations where an agency is only constrained by its own regulation from considering impacts; LBP-14-9, 80 NRC 49 n.141 (2014)

Sierra Club v. Marsh, 769 F.2d 868, 878 (1st Cir. 1985)

NEPA requires that NRC consider the reasonably foreseeable environmental impacts of the proposed licensing action, but the agency need not consider remote and speculative impacts, particularly if the impact cannot easily be estimated at the current time, and an appropriate future opportunity will exist for the agency to analyze the impact; LBP-12-3, 75 NRC 197 (2012)

Sierra Club v. Marsh, 872 F.2d 497, 500 (1st Cir. 1989) (Breyer, J.)

when a decision is made without the information that NEPA seeks to put before the decision maker, the harm that NEPA seeks to prevent occurs; LBP-13-6, 77 NRC 296-97 (2013); LBP-14-9, 80 NRC 56 (2014)

Sierra Club v. Marsh, 976 F.2d 763 (1st Cir. 1992)

the environmental impact statement’s hard look must examine reasonably foreseeable environmental impacts emanating from the proposed action; LBP-11-39, 74 NRC 868 (2011)

Sierra Club v. Morton, 405 U.S. 727 (1972)

organizational standing is rooted in the capacity of an organization to show a discrete injury to its organizational interests; LBP-13-6, 77 NRC 279-80 (2013)

petitioners cannot assert organizational standing both in their own capacity and as members of an organization; CLI-11-3, 73 NRC 621 n.38 (2011)

Sierra Club v. Morton, 405 U.S. 727, 734-35 (1972)

aesthetic harms may amount to an injury in fact sufficient for standing; CLI-12-12, 75 NRC 613 n.49 (2012)

Sierra Club v. Morton, 405 U.S. 727, 739 (1972)

mere interest in a problem is not sufficient by itself to render the organization adversely affected or aggrieved within the meaning of the Administrative Procedure Act; CLI-11-3, 73 NRC 622 n.41 (2011)
organizational interest that is cognizable for the purpose of establishing organizational standing is one that is more than a mere interest in a problem, no matter how longstanding the interest and no matter how qualified the organization is in evaluating the problem; LBP-13-6, 77 NRC 281 (2013)

determination of minimal environmental impact would make little sense when an agency lacks essential information and has not sought to compile it through independent research; LBP-14-9, 80 NRC 62 (2014)

Sierra Club v. Sigler, 695 F.2d 957, 979 (5th Cir. 1983)
there can be no “hard look” at the costs and benefits of a proposed action unless all costs are disclosed; LBP-12-18, 76 NRC 136 n.47 (2012)

Sierra Club v. U.S. Army Corps of Engineers, 464 F. Supp. 2d 1171, 1224 (M.D. Fla. 2006), aff’d, 508 F.3d 1332 (11th Cir. 2007)
agency’s reliance on mitigation in making a finding of no significant impact must be justified;
LBP-12-23, 76 NRC 467 (2012); LBP-14-7, 79 NRC 461 (2014)
when conducting a NEPA-required environmental review, an agency may consider the ameliorative effects of mitigation in determining the environmental impacts of an activity; LBP-12-23, 76 NRC 467 (2012); LBP-14-7, 79 NRC 461 (2014)

Sierra Club v. U.S. Army Corps of Engineers, 464 F. Supp. 2d 1171, 1225 (M.D. Fla. 2006), aff’d, 508 F.3d 1332 (11th Cir. 2007)
agency’s reliance on mitigation in making a finding of no significant impact is justified if the proposed mitigation is more than a possibility in that it is imposed by statute or regulation or has been so integrated into the initial proposal that it is impossible to define the proposal without mitigation; LBP-12-23, 76 NRC 467 (2012); LBP-14-7, 79 NRC 461 (2014)

Sierra Club v. U.S. Army Corps of Engineers, 464 F. Supp. 2d 1171, 1227 (M.D. Fla. 2006), aff’d, 508 F.3d 1332 (11th Cir. 2007)
level of analysis required by NEPA in an environmental impact statement is more rigorous than is required when the agency has determined on the basis of its environmental assessment that the project as proposed will not result in significant environmental impact; LBP-14-7, 79 NRC 461 (2014)

Sierra Club v. U.S. Army Corps of Engineers, 645 F.3d 978, 987-88 (8th Cir. 2011)
standing can be based on diminishment of recreational enjoyment of wildlife area due to, among other factors, an increase in dust due to traffic on adjacent highway; CLI-12-12, 75 NRC 613 n.49 (2012)

Sierra Club v. U.S. Army Corps of Engineers, 645 F.3d 978, 991 (8th Cir. 2011)
because the future expansion of a power plant was reasonably foreseeable, it should have been included in the cumulative impacts analysis for the plant; LBP-14-6, 79 NRC 422 (2014)
district court did not abuse its discretion in balancing the harms in favor of an injunction related to an electric utility’s Clean Water Act permit for the construction of a new power plant; LBP-14-6, 79 NRC 425 n.112 (2014)
failure to have made any effort to evaluate the cumulative impact of the ISFSI expansion on archaeological sites has been held to be one of the most egregious shortfalls of the environmental assessment; LBP-14-6, 79 NRC 425 n.112 (2014)

Sierra Club v. Van Antwerp, 661 F.3d 1147, 1155 (D.C. Cir. 2011)
federal agency is required to consult if an action may affect listed species or designated critical habitat, even if the effects are expected to be beneficial; LBP-15-11, 81 NRC 445 n.297 (2015)
Sikorsky Aircraft Corp. v. United States, 106 Fed. Cl. 571, 577 (2012)
claims of deliberative process privilege, even when properly established, are not absolute; LBP-13-5, 77 NRC 248 (2013)
deliberative process privilege is qualified, requiring the court to balance the interests of the parties for and against disclosures; LBP-13-5, 77 NRC 248 (2013)
deliberative process privilege may be defeated by a showing of evidentiary need by a plaintiff that outweighs the harm that disclosure of such information may cause to the defendant; LBP-13-5, 77 NRC 248 (2013)

Sikorsky Aircraft Corp. v. United States, 106 Fed. Cl. 571, 580 (2012)
courts disfavor government efforts to place a portion of privileged material at issue while self-servingly retaining the rest; LBP-13-5, 77 NRC 250 (2013)
when an agency waives the deliberative process privilege for a document when it discloses the same document or one containing equivalent text, the question necessarily arises whether the agency has waived any deliberative process privilege that might otherwise apply; LBP-13-5, 77 NRC 244 (2013)
the Atomic Energy Act is designed to regulate the radiological safety aspects involved in the construction and operation of a nuclear plant; LBP-11-6, 73 NRC 233 (2010)
the Atomic Energy Act is designed to regulate the radiological safety aspects involved in the construction and operation of a nuclear plant; LBP-11-6, 73 NRC 233 (2010)
when an agency waives the deliberative process privilege for a document when it discloses the same document or one containing equivalent text, the question necessarily arises whether the agency has waived any deliberative process privilege that might otherwise apply; LBP-13-5, 77 NRC 244 (2013)

when an agency waives the deliberative process privilege for a document when it discloses the same document or one containing equivalent text, the question necessarily arises whether the agency has waived any deliberative process privilege that might otherwise apply; LBP-13-5, 77 NRC 244 (2013)

role of the final environmental impact statement is to expose the reasoning and data of the agency proposing the action to scrutiny by the public and by other branches of the government; LBP-12-18, 76 NRC 179 (2012)
Simmons v. U.S. Army Corps of Engineers, 120 F.3d 664, 669 (7th Cir. 1997)
blindly adopting applicant’s statement of the purpose of the action is a losing position because it does not allow for the full consideration of alternatives required by NEPA; LBP-12-17, 76 NRC 114 (2012)
NEPA requires agencies to exercise a degree of skepticism in dealing with self-serving statements from the prime beneficiary of a project and to look at the general goal of the project, rather than only those alternatives preferred by the applicant; LBP-12-17, 76 NRC 114 (2012)
Skokomish v. Federal Energy Regulatory Commission, 121 F.3d 1303 (9th Cir. 1997)
NRC exercises its fiduciary duty in the context of its authorizing statutes, including the Atomic Energy Act, and implements any fiduciary responsibility by ensuring that tribal members receive the same protections under implementing regulations that are available to other persons; LBP-14-16, 80 NRC 200 n.104 (2014)
national Historic Preservation Act and its implementing regulations do not require that the agency implement any mitigation measures, let alone that those measures meet a certain standard of protection for historic properties; LBP-12-23, 76 NRC 489 n.289 (2012)
where the reviewing court vacates a rule without reinstating the old rule, failure to reinstate the old rule creates a temporary regulatory vacuum; CLI-14-8, 80 NRC 76 n.14 (2014)
Smeldberg Machine & Tool, Inc. v. Donovan, 730 F.2d 1089, 1092-93 (7th Cir. 1984)
an agency’s discretionary choice to conduct a formal on-the-record hearing is irrelevant when determining whether the Equal Access to Justice Act applies to a particular proceeding; LBP-11-8, 73 NRC 360 (2011)
SmithKline Beecham Corp. v. Apotex Corp., 439 F.3d 1312, 1320 (Fed. Cir. 2006)
it is not the function of a licensing board to comb through the record searching for arguments in support of a proffered contention; LBP-11-6, 73 NRC 244 n.111 (2010); LBP-11-13, 73 NRC 575 n.287 (2011)
motivation must be discussed in sufficient detail in an environmental impact statement to ensure that environmental consequences have been fairly evaluated; LBP-12-18, 76 NRC 159 (2012)
Society Hill Towers Owners’ Ass’n v. Rendell, 210 F.3d 168, 181 (3d Cir. 2000)
a new transmission corridor is a connected action and must be fully evaluated in the final environmental impact statement; LBP-12-12, 75 NRC 779 (2012)
action lacks independent utility when it would be irrational or unwise to pursue the action without the presence of the EIS-generating central action; LBP-15-16, 81 NRC 697 (2015)
“connected actions” are defined as those that lack independent utility; LBP-12-12, 75 NRC 779 (2012); LBP-14-6, 79 NRC 421 (2014); LBP-14-9, 80 NRC 41 (2014)
Solite Corp. v. Environmental Protection Agency, 952 F.2d 473, 484-85 (D.C. Cir. 1991)
preamble to notice of proposed rulemaking addresses agency’s duty to identify and make available
technical studies and data that it has employed in reaching the decisions to propose particular rules;

South Carolina Electric & Gas Co. (Virgil C. Summer Nuclear Station, Unit 1), ALAB-642, 13 NRC 881
(1981)
preamble to notice of proposed rulemaking addresses agency’s duty to identify and make available
technical studies and data that it has employed in reaching the decisions to propose particular rules;

South Carolina Electric & Gas Co. (Virgil C. Summer Nuclear Station, Unit 1), ALAB-642, 13 NRC 881, 887 n.5 (1981)
contentions that address an important security issue regarding Part 74’s strict requirements for the
proposed facility, which applicant previously admitted it failed to satisfy, are admissible; LBP-11-9,
73 NRC 412 n.119 (2011)

South Carolina Electric & Gas Co. (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-10-1, 71 NRC
1, 5 n.20 (2010)
arguments made for the first time on appeal will not be considered; CLI-12-3, 75 NRC 146 n.87
(2012)

South Carolina Electric & Gas Co. (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-10-1, 71 NRC
1, 6 (2010)
although boards may appropriately view petitioner’s support for its contention in a light favorable to
petitioner, they cannot do so by ignoring the contention admissibility requirements; CLI-15-18, 82
although pro se litigants are expected to comply with procedural rules, they are generally extended
some latitude; LBP-11-2, 73 NRC 38 (2011); LBP-11-13, 73 NRC 543 (2011)

South Carolina Electric & Gas Co. (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-10-1, 71 NRC
1, 6-7 (2010)
petitioner was allowed to clarify standing declarations by submitting revised declarations with reply;
LBP-11-13, 73 NRC 549 (2011)

South Carolina Electric & Gas Co. (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-10-1, 71 NRC
1, 7 (2010)
petitioner has some latitude to supplement or cure a standing showing in its reply pleading, but any
additional arguments should be supported by either the declaration that accompanied the original
hearing request or a supplemental affidavit; LBP-12-3, 75 NRC 186 (2012)

protesters may use reply briefs to cure the affidavits used to establish standing; LBP-11-21, 74 NRC
123 (2011); LBP-13-8, 78 NRC 8 n.10 (2013); LBP-14-4, 79 NRC 361 (2014); LBP-15-5, 81 NRC

South Carolina Electric & Gas Co. (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-10-1, 71 NRC
1, 7 & n.33 (2010)
protesters may use reply briefs to cure the affidavits used to establish standing; LBP-11-21, 74 NRC
123 (2011); LBP-13-8, 78 NRC 8 n.10 (2013); LBP-14-4, 79 NRC 361 (2014); LBP-15-5, 81 NRC

South Carolina Electric & Gas Co. (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-10-1, 71 NRC
1, 17 (2010)
discussion of need for power is required in an environmental report, but applicant need not precisely
identify future market conditions and energy demand or develop other detailed analyses in order to
establish with certainty that construction and operation of a nuclear power plant is the most
economical alternative; LBP-11-6, 73 NRC 218 (2010)

need-for-power assessments must be only at a level of detail sufficient to reasonably characterize the
costs and benefits associated with proposed licensing actions; LBP-11-7, 73 NRC 283 n.181 (2011); LBP-12-5, 75 NRC 373-38 (2012)

South Carolina Electric & Gas Co. (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-10-1, 71 NRC
1, 18-19 & n.84 (2010)
proposed need-for-power contention based on merely conclusory statements, without supporting facts or
detail, is inadmissible; LBP-11-7, 73 NRC 298 n.206 (2011)
LEGAL CITATIONS INDEX

CASES

South Carolina Electric & Gas Co. (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-10-1, 71 NRC 1, 20-21 (2010)
applicant who is a state-regulated utility is in a position to implement and promote programs such as energy conservation, efficiency, and load management such that the need for additional generation capacity may be reduced; LBP-11-6, 73 NRC 224 (2010)

South Carolina Electric & Gas Co. (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-10-1, 71 NRC 1, 21 (2010)
NEPA’s rule of reason would not exclude consideration of demand-side management as part of an alternatives analysis when applicant is a state-regulated utility; LBP-11-6, 73 NRC 224 (2010)

South Carolina Electric & Gas Co. (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-10-1, 71 NRC 1, 21 (2010)
the extent to which operation and maintenance costs of a solar facility may present a comparative benefit is immaterial since the four-part combination of alternative energy sources is not environmentally preferable to two new nuclear units; LBP-11-4, 73 NRC 111 (2011)

South Carolina Electric & Gas Co. (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-12-9, 75 NRC 421, 200 (2010)
absent error of law or abuse of discretion, the Commission generally defers to board rulings on contention admissibility; CLI-12-5, 75 NRC 307 (2012); CLI-12-10, 75 NRC 484 (2012); CLI-12-8, 75 NRC 397 (2012); CLI-12-15, 75 NRC 710 (2012)
NRC’s position is that it need not compare the costs of alternatives to a proposed action if its FEIS does not identify an environmentally preferable alternative; LBP-12-18, 76 NRC 182 (2012)

plants for which a SAMA analysis was conducted for the first time under section 51.53(c)(3)(ii)(L)
may face general criticism that the passage of time between original licensing and renewal has rendered their SAMA analysis out of date upon application for a subsequent renewal term; CLI-13-7, 78 NRC 214-15 n.83 (2013)

South Carolina Electric & Gas Co. (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-12-9, 75 NRC 421, 428 (2012)
Commission does not review combined license application de novo, but rather considers the sufficiency of NRC Staff’s review of the application; CLI-15-13, 81 NRC 560-61 (2015)

South Carolina Electric & Gas Co. (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-12-9, 75 NRC 421, 460-64 (2012)
iservice testing and inspection program for squib valves in combined license applications is discussed;

South Carolina Electric & Gas Co. (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-12-9, 75 NRC 421, 461 (2012)
in the event of a severe accident in an AP1000, squib valves, which are explosively activated, reduce pressure and inject water as needed into the reactor vessel; CLI-15-13, 81 NRC 578 (2015)
the purpose of the testing program for squib valves is to ensure that the valves operate as intended under design conditions; CLI-15-13, 81 NRC 578 (2015)

South Carolina Electric & Gas Co. (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-12-9, 75 NRC 421, 461-63 (2012)
although the Commission found NRC Staff’s review of combined license applications rigorous, it imposed a condition requiring implementation of a squib-valve surveillance program prior to fuel load; CLI-15-13, 81 NRC 578 (2015)

South Carolina Electric & Gas Co. (Virgil C. Summer Nuclear Station, Units 2 and 3), LBP-09-2, 69 NRC 87, 100 (2009), aff’d in part and rev’d and remanded on other grounds, CLI-10-1, 71 NRC 1 (2010)
a combined license applicant will have to demonstrate that the site-specific parameters are bounded by the parameters developed for the certified design; LBP-11-10, 73 NRC 450 (2011)
each combined license applicant will have to determine whether it will adopt in toto the certified design, or whether it will take exemptions thereto and/or departures therefrom; LBP-11-10, 73 NRC 450 (2011)
South Carolina Electric & Gas Co. (Virgil C. Summer Nuclear Station, Units 2 and 3), LBP-09-2, 69 NRC 87, 110 (2009)
NRC generally defers to an applicant’s stated purpose as long as that purpose is not so narrow as to eliminate alternatives; LBP-11-13, 73 NRC 553 (2011)

South Carolina Electric & Gas Co. (Virgil C. Summer Nuclear Station, Units 2 and 3), LBP-10-6, 71 NRC 350, 357-58, 385-86 (2010), aff’d. CLI-10-21, 72 NRC 197 (2010)
the licensing board terminated the proceeding on remand from the Commission when it found that petitioners had proffered no admissible contentions; LBP-11-22, 74 NRC 283 (2011)

South Carolina v. O’Leary, 64 F.3d 892, 899 (4th Cir. 1995)
for an environmental impact statement, separate actions may be considered connected if, among other things, they are interdependent parts of a larger action and depend on the larger action for their justification; LBP-11-10, 73 NRC 441 (2011)

South Fork Band Council v. U.S. Department of Interior, 588 F.3d 718, 726 (9th Cir. 2009)
final supplemental environmental impact statement cannot rely on non-NEPA documents; LBP-15-16, 81 NRC 682 n.390, 699 (2015)
non-NEPA document, let alone one prepared and adopted by a state government, cannot satisfy a federal agency’s obligations under NEPA; LBP-15-11, 81 NRC 430 n.187, 439 (2015)

South Texas Project Nuclear Operating Co. (South Texas Project, Units 3 and 4), CLI-09-18, 70 NRC 859, 860 (2009)
limited interlocutory appeal right attaches only when the board has fully ruled on the initial intervention petition, that is, when it has admitted or rejected all proposed contentions; CLI-14-3, 79 NRC 36 n.30 (2014)

South Texas Project Nuclear Operating Co. (South Texas Project, Units 3 and 4), CLI-09-18, 70 NRC 859, 862 (2009)
boards must rule on all pending contentions before an appeal may be lodged pursuant to section 2.311(c) or (d)(1); CLI-14-3, 79 NRC 36 n.31 (2014)
challenges to board rulings on late-filed contentions normally fall under NRC rules for interlocutory review; CLI-12-7, 75 NRC 385 n.17 (2012)
contentions filed after the initial petition generally are not subject to appeal pursuant to 10 C.F.R. 2.311; CLI-12-3, 75 NRC 138 n.26 (2012); CLI-12-6, 75 NRC 361 n.38 (2012); CLI-12-7, 75 NRC 385 n.15 (2012)

South Texas Project Nuclear Operating Co. (South Texas Project, Units 3 and 4), CLI-10-16, 71 NRC 486, 489 (2010)
appeals of contention admissibility rulings are available only upon denial of a petition to intervene and/or request for hearing on the question of whether it should have been granted or upon the grant of a petition to intervene and/or request for hearing on the question of whether it should have been wholly denied; CLI-13-3, 77 NRC 54 (2013)

South Texas Project Nuclear Operating Co. (South Texas Project, Units 3 and 4), CLI-10-16, 71 NRC 486, 499-90 (2010)
piecemeal appeals during ongoing licensing board proceedings are generally disfavored; CLI-11-6, 74 NRC 210 (2011)
the Commission will address licensing board rulings after a licensing board has issued a final decision in a case, barring extraordinary circumstances; CLI-13-3, 77 NRC 55 (2013)

South Texas Project Nuclear Operating Co. (South Texas Project, Units 3 and 4), CLI-10-16, 71 NRC 486, 490 (2010)
where an admitted contention is pending before the board, appeals do not lie under section 2.311, but rather under section 2.341(f)(2), which governs petitions for interlocutory review, including board rulings on new contentions; CLI-13-3, 77 NRC 54 (2013)

South Texas Project Nuclear Operating Co. (South Texas Project, Units 3 and 4), CLI-10-16, 71 NRC 486, 491 (2010)
following issuance of the board’s final dispositive decision on contentions held in abeyance, and consistent with NRC procedural rules, applicant and intervenor will have the opportunity to appeal the board’s decisions; CLI-14-3, 79 NRC 37 (2014)
intervenor normally is not allowed to challenge a board’s rejection of contentions where the board has granted a hearing on any contention; CLI-12-12, 75 NRC 607 n.12 (2012)
routine contention admissibility determinations generally are not appropriate for interlocutory review; CLI-12-12, 75 NRC 608 (2012)

South Texas Project Nuclear Operating Co. (South Texas Project, Units 3 and 4), CLI-10-24, 72 NRC 451, 453-55 (2010)
lack of clarity in the terms and application of the agency’s newly established SUNSI policy contributed to Intervenors’ misapprehension that they were required to demonstrate a need for the information in order to request SUNSI documents; LBP-11-9, 73 NRC 410 (2011)

South Texas Project Nuclear Operating Co. (South Texas Project, Units 3 and 4), CLI-10-24, 72 NRC 451, 454 (2010)

the SUNSI policy does not change any of the statutory, regulatory, or other obligations of the agency with respect to the handling of information; LBP-11-5, 73 NRC 140 (2011)

South Texas Project Nuclear Operating Co. (South Texas Project, Units 3 and 4), CLI-10-24, 72 NRC 451, 454-55 (2010)
rules governing access to SUNSI apply only to potential parties, whereas party access to SUNSI is governed by protective orders and nondisclosure agreements; LBP-11-9, 73 NRC 410 (2011)

South Texas Project Nuclear Operating Co. (South Texas Project, Units 3 and 4), CLI-10-24, 72 NRC 451, 465-68 (2010)

NRC Staff was admonished for having imposed a stricter-than-necessary standard of “need” for access to SUNSI; LBP-11-9, 73 NRC 410 (2011)

South Texas Project Nuclear Operating Co. (South Texas Project, Units 3 and 4), CLI-10-24, 72 NRC 451, 467 (2010)
guidance documents do not create binding legal requirements; LBP-15-20, 81 NRC 847 n.100 (2015)

South Texas Project Nuclear Operating Co. (South Texas Project, Units 3 and 4), CLI-10-24, 72 NRC 451, 468 n.99 (2010)

agency directs NRC Staff to review issues outside the adjudicatory context and recommend whether the Commission should consider modifications to agency guidance or practice; CLI-13-4, 77 NRC 105 n.13 (2013)

any reasonably segregable portion of the record shall be provided to any person requesting such record after deletion of the portions that are exempt; LBP-11-5, 73 NRC 139 n.14 (2011)

board requests that applicant and NRC Staff review the nonpublic appendix within 7 days of the date of issuance of the decision and provide the board with a joint report indicating whether all, or any portion, of the appendix can be publicly released, and in the event portions of the appendix can be made publicly available, indicate what redactions are appropriate; LBP-11-11, 73 NRC 525 n.36 (2011)

South Texas Project Nuclear Operating Co. (South Texas Project, Units 3 and 4), LBP-09-21, 70 NRC 581, 617, 618, 619 (2009), review denied, Nuclear Innovation North America LLC (South Texas Project, Units 3 and 4), CLI-11-6, 74 NRC 203, 210 (2011)

petitioners’ assertion that applicant must address the potential impacts of a radiological incident on the operations of the other units establishes an admissible contention of omission; LBP-15-5, 81 NRC 275 (2015)

South Texas Project Nuclear Operating Co. (South Texas Project, Units 3 and 4), LBP-09-25, 70 NRC 867, 889 & n.138 (2009)

scope of an adjudicatory hearing is limited to the notice of hearing, which in licensing matters normally extends only to the application at issue; CLI-14-11, 80 NRC 178 n.55 (2014)

South Texas Project Nuclear Operating Co. (South Texas Project, Units 3 and 4), LBP-10-2, 71 NRC 190, 205-09 (2010), rev’d on other grounds, CLI-10-24, 72 NRC 451, 461-64 (2010)

the principle that justice cannot survive behind walls of silence has long been reflected in the Anglo-American distrust for secret trials; LBP-11-5, 73 NRC 134 n.6 (2011)

South Texas Project Nuclear Operating Co. (South Texas Project, Units 3 and 4), LBP-10-2, 71 NRC 190, 209-10 (2010)

standards for admission of new contentions are reviewed; LBP-11-25, 74 NRC 389 (2011)
South Texas Project Nuclear Operating Co. (South Texas Project, Units 3 and 4), LBP-10-14, 72 NRC 101, 107-09 (2010)

new contentions may be admitted as long as they meet the timeliness criteria in 10 C.F.R. 2.309(f)(2) or the timeliness content criteria in section 2.309(c)(1) and fulfill the contention admissibility requirements of 10 C.F.R. § 2.309(f)(1); LBP-11-39, 74 NRC 866 (2011)

standards for admission of new contentions are reviewed; LBP-11-25, 74 NRC 389 (2011)

Southern California Edison Co. (San Onofre Nuclear Generating Station, Units 1 and 2), CLI-12-20, 76 NRC 437, 440 (2012)

Commission referred request to licensing board, directing the board to consider whether a Confirmatory Action Letter issued to licensee constituted a de facto license amendment; CLI-15-14, 81 NRC 749 (2015)

Southern California Edison Co. (San Onofre Nuclear Generating Station, Units 1 and 2), CLI-12-20, 76 NRC 307, 327, vacated as moot, CLI-13-9, 78 NRC 551 (2013)

board examined whether any aspect of the larger Confirmatory Action Letter process constituted a de facto license amendment; CLI-15-14, 81 NRC 749 (2015)

Southern California Edison Co. (San Onofre Nuclear Generating Station, Units 1 and 2), LBP-13-7, 77 NRC 307, 333-34, vacated as moot, CLI-13-9, 78 NRC 551 (2013)

board erred in determining that it could review unilateral, unapproved, licensee actions under section 50.59(c)(2) to determine whether they also constituted de facto license amendments; CLI-15-14, 81 NRC 749-50 (2015)

Southern California Edison Co. (San Onofre Nuclear Generating Station, Units 2 and 3), ALAB-212, 7 AEC 986, 991 (1974)

licensing board may modify or waive the provisions of its scheduling orders as it deems appropriate in the interest of sound case management; LBP-15-29, 82 NRC 254 (2015)

licensing boards must be vested with considerable latitude in determining the course of the proceedings that they are called upon to conduct, and the Commission will enter that arena only to the extent necessary to insure that no party has been denied a fair opportunity to advance its cause; LBP-15-29, 82 NRC 254 n.39 (2015)

Southern California Edison Co. (San Onofre Nuclear Generating Station, Units 2 and 3), ALAB-268, 1 NRC 383, 399 (1975)

NRC Staff is but one of the parties to a licensing proceeding, and the positions that it may take are in no way binding upon the licensing board; LBP-12-23, 76 NRC 479 (2012)

Southern California Edison Co. (San Onofre Nuclear Generating Station, Units 2 and 3), ALAB-717, 17 NRC 346, 365 n.32 (1983)

Federal Rules of Evidence are not directly applicable to NRC proceedings, but NRC adjudicatory boards often look to those rules for guidance; LBP-12-21, 76 NRC 248 n.171 (2012); LBP-15-20, 81 NRC 859 n.184 (2015)

Southern California Edison Co. (San Onofre Nuclear Generating Station, Units 2 and 3), CLI-12-20, 76 NRC 347, 439 n.10 (2012)

actions taken by licensee under 10 C.F.R. 50.59 do not give rise to hearing rights under the AEA but rather are monitored by NRC Staff’s inspections and oversight, which may be challenged only by a petition for enforcement; LBP-15-27, 82 NRC 196 (2015)

claim that a facility is improperly operating outside its licensing basis is appropriately raised in a petition to initiate an enforcement proceeding rather than by a request for a hearing under AEA § 189a; LBP-15-27, 82 NRC 192 (2015)

Southern California Edison Co. (San Onofre Nuclear Generating Station, Units 2 and 3), CLI-12-20, 76 NRC 437, 439-40 (2012)

appropriate means of challenging licensee actions undertaken in accordance with 10 C.F.R. 50.59 is through a petition under 10 C.F.R. 2.206; LBP-13-11, 78 NRC 180 (2013; CLI-14-11, 80 NRC 175 (2014)

NRC’s 2.206 process affords a meaningful opportunity to seek review of and action on safety-related concerns; CLI-15-5, 81 NRC 339 (2015); CLI-15-14, 81 NRC 736 n.32 (2015)
section 2.206 process provides stakeholders a forum to advance concerns and obtain full or partial relief, or written reasons why the requested relief is not warranted; CLI-13-2, 77 NRC 50 n.57 (2013); CLI-14-11, 80 NRC 179 (2014)

Southern California Edison Co. (San Onofre Nuclear Generating Station, Units 2 and 3), CLI-13-9, 78 NRC 551, 556 n.17 (2013)

although NRC rules do not provide for the filing of amicus curiae briefs on motions filed pursuant to 10 C.F.R. 2.323, as a matter of discretion the Commission has reviewed both an amicus brief and the opposition to it; CLI-14-11, 80 NRC 171 n.20 (2014)

amicus curiae filings are allowed at the Commission’s discretion or sua sponte; CLI-15-4, 81 NRC 225 n.8 (2015); CLI-15-5, 81 NRC 333 n.19 (2015); CLI-15-10, 81 NRC 537-38 n.5 (2015); CLI-15-23, 82 NRC 324 n.16 (2015)

Commission exercises its discretion to consider briefs that were not filed via the agency’s E-Filing system; LBP-15-4, 81 NRC 163 n.38 (2015)

exception to the mootness doctrine is recognized when the same litigants are likely to be subject to similar future action; CLI-13-10, 78 NRC 568 (2013)

Southern California Edison Co. (San Onofre Nuclear Generating Station, Units 2 and 3), CLI-13-9, 78 NRC 551, 557-58 (2013)

possibility that an issue may arise in the future is not grounds to continue with an appeal in a proceeding where no live controversy remains between the litigants; CLI-13-10, 78 NRC 568 (2013)

soundness of relocating certain surveillance frequencies from operating license technical specifications to licensee-controlled documents is better resolved in the context of a concrete dispute, where all of the parties have a stake in the outcome of the litigation; CLI-13-10, 78 NRC 569 (2013)

unreviewed board decisions are not binding on future boards; CLI-13-10, 78 NRC 569 n.42 (2013)

Southern California Edison Co. (San Onofre Nuclear Generating Station, Units 2 and 3), CLI-13-9, 78 NRC 551, 558-59 (2013)

it is the Commission’s customary practice to vacate a challenged licensing board decision when, during the pendency of an appeal, the proceeding becomes moot; CLI-13-10, 78 NRC 569 (2013)

Southern California Edison Co. (San Onofre Nuclear Generating Station, Units 2 and 3), CLI-13-9, 78 NRC 551, 559 & n.31 (2013)

Commission decision to vacate a board’s decision does not intimate any opinion on its soundness; CLI-13-10, 78 NRC 569 (2013)

unreviewed board decisions may be cited by future litigants as persuasive authority; CLI-13-10, 78 NRC 569 n.42 (2013)

Southern California Edison Co. (San Onofre Nuclear Generating Station, Units 2 and 3), CLI-13-9, 78 NRC 551, 560 & n.36 (2013)

licensing boards are the appropriate finders of fact in most circumstances, and referral of a matter for a fact-specific dispute occurs in the ordinary course of business; CLI-15-14, 81 NRC 735 n.27, 751 n.62 (2015)

Southern California Edison Co. (San Onofre Nuclear Generating Station, Units 2 and 3), LBP-77-35, 5 NRC 1290, 1291 (1977)

licensing boards have authority to adjudicate exemption issues, but NRC Staff serves as an initial reviewer of exemption requests; LBP-12-6, 75 NRC 273 n.101 (2012)

Southern California Edison Co. (San Onofre Nuclear Generating Station, Units 2 and 3), LBP-13-7, 77 NRC 307, vacated as moot, CLI-13-9, 78 NRC 551 (2013)

criteria of 10 C.F.R. 50.59 was used as an analytical tool to address the question of whether a confirmatory action letter issued to the licensee by the NRC Staff constituted a de facto license amendment that would be subject to a hearing opportunity; LBP-13-11, 78 NRC 181 (2013)

no petition or other request for review of or hearing on the NRC Staff’s significant hazards determination will be entertained by the Commission; LBP-13-11, 78 NRC 181 (2013)

NRC Staff’s inspection and oversight of licensee’s actions are part of an ongoing de facto license amendment; CLI-14-11, 80 NRC 174 n.33 (2014)
LEGAL CITATIONS INDEX

CASES

Southern California Edison Co. (San Onofre Nuclear Generating Station, Units 2 and 3), LBP-13-7, 77 NRC 307, 316, 324-25 vacated as moot, CLI-13-9, 78 NRC 551, 552 (2013)
confirmatory action letter is an enforcement process that does not allow for public intervention; LBP-14-1, 79 NRC 123 (2014)

Southern California Edison Co. (San Onofre Nuclear Generating Station, Units 2 and 3), LBP-13-7, 77 NRC 307, 325-26, 338-39 vacated as moot, CLI-13-9, 78 NRC 551 (2013)
unilateral licensee activities can constitute de facto license amendments; LBP-14-11, 80 NRC 174 n.33 (2014)

Southern California Edison Co. (San Onofre Nuclear Generating Station, Units 2 and 3), LBP-13-7, 77 NRC 307, 326 vacated as moot, CLI-13-9, 78 NRC 551 (2013)
board refused to let a matter turn on attempts by NRC Staff and applicant to label a controversial matter in a way that would avoid adjudication; LBP-14-1, 79 NRC 123 (2014)

Southern California Edison Co. (San Onofre Nuclear Generating Station, Units 2 and 3), LBP-13-7, 77 NRC 307, 344 vacated as moot, CLI-13-9, 78 NRC 551 (2013)
board determined that confirmatory action letter was a de facto license amendment, which allows for public intervention; LBP-14-1, 79 NRC 123 (2014)

Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), CLI-07-17, 65 NRC 392, 394 (2007)
completion of NRC Staff’s final environmental review document always must precede the conduct of hearings on environmental issues; LBP-11-30, 74 NRC 631 (2011)

Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), CLI-07-17, 65 NRC 392, 395 (2007)
boards may not commence a hearing on environmental issues before the final environmental impact statement is issued, and may only commence a hearing with respect to safety issues prior to issuance of the final safety evaluation report if it will expedite the proceeding without adversely impacting the Staff’s ability to complete its evaluations in a timely manner; LBP-11-22, 74 NRC 272 n.69 (2011)

NRC hearings on NEPA issues focus entirely on the adequacy of NRC Staff’s work; LBP-15-3, 81 NRC 84-85 (2015); LBP-15-16, 81 NRC 641-41 n.126 (2015)

Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), CLI-10-5, 71 NRC 90, 98-99 (2010)
where a board’s decision rests on a weighing of extensive fact-specific evidence presented by technical experts, the Commission generally will defer to the board’s factual findings, unless there appears to be a clearly erroneous factual finding or related oversight; CLI-12-1, 75 NRC 46 (2012)

Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), CLI-10-5, 71 NRC 90, 100 (2010)
the scope of a contention is limited to the issues of law and fact pleaded with particularity in the contention and any factual and legal material in support thereof; LBP-11-38, 74 NRC 833 (2011); LBP-12-5, 75 NRC 239 (2012)

Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), CLI-10-5, 71 NRC 90, 100-01 (2010)
contention claims must be set forth with particularity; CLI-12-1, 75 NRC 55 (2012)

Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), CLI-10-5, 71 NRC 90, 102 n.60 (2010)
cumulative impact analysis is required for reasonably foreseeable future actions, and test for connected actions in CEQ regulation 40 C.F.R. 1508.25 need not be satisfied; LBP-14-6, 79 NRC 423 (2014)

Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), CLI-10-5, 71 NRC 90, 102 n.63 (2010)
NRC Staff has conducted cumulative impact analyses of covered actions that were not interdependent with the proposed action; LBP-14-6, 79 NRC 423 (2014)

Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), LBP-07-3, 65 NRC 237, 247 (2007)
an ESP essentially allows an entity to bank a site for the possible future construction of a specified number of new nuclear power generation facilities; LBP-11-16, 73 NRC 650-51 (2011)
in cases involving the possible construction or operation of a nuclear power reactor, NRC considers proximity to the proposed facility to be sufficient to establish standing; LBP-11-16, 73 NRC 653 (2011)

Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), LBP-07-3, 65 NRC 237, 250 (2007)

an organization that seeks to establish representational standing must show that at least one of its members would be affected by the proceeding and must identify that member by name and address, show that the member would have standing to intervene in his or her own right, and that the identified members have authorized the organization to request a hearing on their behalf; LBP-11-16, 73 NRC 653 (2011)

to determine whether the elements for standing are met, boards are to construe the petition in favor of the petitioner; LBP-11-16, 73 NRC 653 (2011)

Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), LBP-07-3, 65 NRC 237, 255 (2007)

boards have authority under 10 C.F.R. 2.316, 2.319, 2.329 to further define petitioners’ admitted contentions when redrafting would clarify the scope of the contentions; LBP-11-13, 73 NRC 565 n.199 (2011)

Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), LBP-07-3, 65 NRC 237, 258-59 (2007)

contention that raises a genuine dispute with the sufficiency of the cumulative impacts analysis, or the lack thereof, in the environmental report is admissible; LBP-12-3, 75 NRC 202 (2012)

Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), LBP-07-3, 65 NRC 237, 264-65 (2007)

keeping radionuclides below the EPA limit is necessary to maintain public safety at a decommissioning facility; LBP-15-24, 82 NRC 89 (2015)

Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), LBP-08-2, 67 NRC 54, 63-64 (2008)

contentions of adequacy may migrate into contentions of omission; LBP-13-10, 78 NRC 133 (2013)

intervenor attempting to litigate an issue based on expressed concerns about the draft environmental impact statement may need to amend the admitted contention or submit a new contention if the information in the DEIS is sufficiently different from the information in the environmental report that supported the original contention’s admission; LBP-13-9, 78 NRC 47 (2013); LBP-14-5, 79 NRC 383 (2014)

migration of a contention is appropriate only where the environmental analysis or discussion at issue is essentially in pari materia with applicant’s analysis or discussion that is the focus of the contention; LBP-12-12, 75 NRC 768 (2012); LBP-15-11, 81 NRC 410 (2015)

migration tenet applies when the information in the final supplemental environmental impact statement is sufficiently similar to the information in the draft SEIS; LBP-14-5, 79 NRC 383 (2014)

migration tenet for admitted contentions applies when information in the draft environmental impact statement is sufficiently similar to the information in the environmental report; LBP-11-1, 73 NRC 26 n.14 (2011); LBP-13-9, 78 NRC 46-47 (2013)

post-environmental report, intervenor would need to file a motion to amend an already-admitted contention or to admit a new contention if the information in the Staff’s NEPA statement is sufficiently different from the information in the ER that supported the original contention’s admission; LBP-13-10, 78 NRC 133 (2013)

where the information in the DEIS is so different from the information in the environmental report that the DEIS dispenses with and moots the issues raised in the original contention, intervenor must file a new or amended contention against the DEIS; LBP-11-1, 73 NRC 26 (2011)

Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), LBP-08-2, 67 NRC 54, 64 (2008)

although a contention contesting applicant’s environmental report generally may be viewed as a challenge to the NRC Staff’s subsequent draft environmental impact statement, new claims must be raised in a new or amended contention; LBP-13-10, 78 NRC 134 (2013); LBP-14-5, 79 NRC 384 n.32 (2014)
if the portion of the environmental report that an admitted contention challenges is not sufficiently similar to the draft environmental impact statement, intervenor may need to amend the admitted contention or, if the information in the DEIS is sufficiently different from that in the ER, submit a new contention; LBP-12-12, 75 NRC 768 (2012); LBP-13-9, 78 NRC 47 n.29 (2013) Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), LBP-08-2, 67 NRC 54, 66-67 (2008)
the proper method for raising an issue addressed in a motion to strike is to seek leave to file a reply in support of the summary disposition motion; LBP-11-14, 73 NRC 608 n.108 (2011) Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), LBP-08-2, 67 NRC 54, 67-68 n.9 (2008)
if summary disposition movant discusses a matter in its statement of undisputed facts, the board may view with skepticism any later argument by that movant that a response regarding that issue is outside the scope of the contention, particularly given the onus that is placed upon an opposing party to respond to such a statement; LBP-11-4, 73 NRC 123 (2011) Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), LBP-08-2, 67 NRC 54, 78 (2008)
the board refused to consider new bases that were included in an answer to a summary disposition motion and were outside the scope of the original contention; LBP-11-4, 73 NRC 123 (2011) Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), LBP-09-7, 69 NRC 613, 631-32 (2009)
environmental impact statements are subject to a rule of reason that grants the agency a degree of deference exempting it from examining impacts that it in good faith deems to be remote and speculative or inconsequentially small; LBP-11-39, 74 NRC 868 (2011) Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), LBP-09-7, 69 NRC 613, 632 (2009)
board’s ultimate NEPA judgments can be made on the basis of the entire adjudicatory record in addition to NRC Staff’s final environmental impact statement; LBP-15-3, 81 NRC 82 (2015) Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), LBP-09-7, 69 NRC 613, 648-50, 662, 671-74, 681-82 (2009) NEPA does not require that the final environmental impact statement be a Ph.D. dissertation on specific topics; LBP-13-4, 77 NRC 212 (2013) Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), LBP-09-7, 69 NRC 613, 696-702 (2009), review denied, CLI-10-5, 71 NRC 90 (2010) ruling that supplements the record should state clearly what evidence the board found credible, whether the evidence supports or alters NRC Staff’s conclusions in the environmental impact statement, and what the impact of the proposed action for the specific issue is expected to be; CLI-15-6, 81 NRC 389 n.258 (2015) Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), LBP-09-7, 69 NRC 613, 719 (2009) NRC’s environmental analysis need only consider environmental impacts that are reasonably foreseeable, and need not consider remote and speculative scenarios; LBP-11-16, 73 NRC 690-91 (2011) Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), LBP-09-7, 69 NRC 613, 733 (2009), petition for review denied, CLI-10-5, 71 NRC 90 (2010) board’s ultimate NEPA judgments are made on the basis of the entire adjudicatory record in addition to NRC Staff’s final supplemental environmental impact statement; LBP-15-16, 81 NRC 638 (2015) Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), LBP-09-19, 70 NRC 433 (2009) guidance on the role of licensing boards in mandatory proceedings is provided; LBP-12-21, 76 NRC 233-34 (2012) mandatory hearings have been conducted by licensing boards in 10 C.F.R. Part 52 early site permit proceedings; LBP-11-11, 73 NRC 475 (2011) Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), LBP-09-19, 70 NRC 433, 503-04 (2009) there is no agency requirement that applicant submit a redress plan relative to preconstruction activities or, absent state or local requirements, take any remediation action regarding preconstruction
activities if it decides not to complete the project or is denied agency authorization to construct and
operate the facility; LBP-11-11, 73 NRC 507 (2011); LBP-11-26, 74 NRC 539 (2011)
Southern Nuclear Operating Co. (Early Site Permit for Vogtle ESP Site), LBP-09-19, 70 NRC 433, 540 (2009)
license conditions imposed on an applicant as a result of the Staff’s review process and
applicant-requested exemptions from agency regulatory requirements that are granted by the Staff
have a strong potential to fall into a “non-routine matter” category; LBP-11-11, 73 NRC 494-95 (2011)
Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-09-16, 70 NRC 33, 35 (2009)
Commission defers to a board’s contention admissibility rulings unless the appeal points to an error of
law or abuse of discretion; CLI-14-2, 79 NRC 13-14 (2014)
Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-09-16, 70 NRC 33, 36 (2009)
section 52.79(a)(3) specifies no quantity or time restrictions relative to onsite storage of low-level
radioactive waste; LBP-12-4, 75 NRC 218 (2012)
Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-09-16, 70 NRC 33, 36-37 (2009)
section 52.79(a)(3) requires that a combined license application contain information pertaining to how
applicant intends, through its design, operational organization, and procedures, to comply with
relevant substantive radiation protection requirements in 10 C.F.R. Part 20 including, but not limited
to, LLRW handling and storage; LBP-12-4, 75 NRC 223 (2012)
Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-09-16, 70 NRC 33, 37 (2009)
applicant’s FSAR must identify particular plans pertaining to design, operational organization, and
procedures that demonstrate how it intends to comply with relevant substantive radiation protection
requirements in 10 C.F.R. Part 20 including, but not limited to, LLRW handling and storage;
LBP-12-4, 75 NRC 223 (2012)
level of low-level radioactive waste storage information required by 10 C.F.R. 52.79(a)(3) is tied to
the combined license applicant’s particular plans for compliance through design, operational
organization, and procedures; LBP-12-4, 75 NRC 218 (2012)
Part 20 outlines a number of radiation protection requirements with which licensees must comply,
such as procedures and controls to reduce occupational doses and doses to members of the public to
levels that are as low as reasonably achievable; LBP-12-4, 75 NRC 217 (2012)
scope and specificity of information required under section 52.79(a)(3) is a fact-bound determination
that is tied to applicant’s particular plans for compliance through, but not necessarily the details of,
design, operational organization, and procedures associated with any contingent long-term LLRW
facility; LBP-12-4, 75 NRC 223 (2012)
Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-11-8, 74 NRC 214, 217 n.1 (2011)
heavy barrier to reopening applies whenever an adjudication has been closed and not merely after a
case has been terminated following a full evidentiary hearing on the merits; LBP-15-14, 81 NRC
595 (2015)
once all contentions have been decided, the contested proceeding is terminated; CLI-12-14, 75 NRC
699-700 (2012)
Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-11-8, 74 NRC 214, 218 & n.8 (2011)
although NRC regulations do not provide a precise definition of “timely,” licensing boards have often
found a new contention to be timely if it has been filed within 30 days of the availability of
information on which the contention is based; LBP-12-11, 75 NRC 737 (2012)
both the reopening and contention admissibility criteria require that new contentions be timely
presented, generally within 30 days of the availability of the information on which the contention is
based; CLI-12-21, 76 NRC 496 (2012)
new contentions are considered timely when filed within 30 days of the date that asserted foundational
information became available; LBP-12-1, 75 NRC 14 (2012); LBP-12-10, 75 NRC 653-54 (2012)
Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-11-8, 74 NRC 214, 219 (2011) briefs on appeal must be comprehensive, concise, and self-contained, and incorporation of pleadings or arguments by reference is discouraged; CLI-12-3, 75 NRC 139 n.41 (2012)

Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-11-8, 74 NRC 214, 219-20 (2011) the Commission generally declines to hold oral argument on appeals, absent a specific showing that oral argument will assist it in reaching a decision; CLI-12-12, 75 NRC 614 (2012)

Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-11-8, 74 NRC 214, 220 (2011) boards are in a better position than the Commission to consider any expert affidavit or affidavits that petitioner submits to support its motion to reopen; CLI-12-14, 75 NRC 702 n.64 (2012)

decisions on the admissibility of contentions will be affirmed where no error of law or abuse of discretion is found; CLI-12-3, 75 NRC 138 (2012); CLI-12-6, 75 NRC 361 (2012)

Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-11-8, 74 NRC 214, 221 (2011) at the contention admissibility stage, a board evaluates whether a petitioner has provided sufficient support to justify admitting the contention for further litigation; LBP-15-24, 82 NRC 102 n.223 (2015)
evaluation of a contention that is performed at the contention admissibility stage should not be confused with the evaluation that is later conducted at the merits stage of a proceeding; LBP-15-24, 82 NRC 102 n.223 (2015)

facts and issues raised in a contention are not in controversy and subject to a full evidentiary hearing unless the proposed contention is admitted; LBP-15-24, 82 NRC 102 n.223 (2015)

merits questions cannot be resolved at the contention admission stage of the proceeding; LBP-15-20, 81 NRC 855 n.158 (2015)

petitioners are not required at the contention admissibility stage to prove their case on the merits or even to provide expert or factual support as strong as that necessary to withstand a summary disposition motion; LBP-15-20, 81 NRC 851, 855 (2015)

Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-11-8, 74 NRC 214, 221-22 (2011) failure to address the reopening criteria is enough to reject contentions that are filed after a record has closed; CLI-12-3, 75 NRC 143 n.72 (2012)

Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-11-8, 74 NRC 214, 222 (2011) boards should not have to hunt for information that the agency’s procedural rules require be explicitly identified and fully explained; CLI-12-3, 75 NRC 145 n.86 (2012); LBP-12-10, 75 NRC 652 n.127 (2012)

litigants seeking to reopen a record must comply fully with section 2.326(b); CLI-12-3, 75 NRC 145 n.86 (2012)

motions to reopen could be rejected solely on the basis of the appellants’ failure to address the reopening standards in the supporting affidavit; LBP-12-10, 75 NRC 639 n.33 (2012)

Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-11-8, 74 NRC 214, 225 n.44 (2011) where a motion to reopen is untimely, the section 2.326(a)(1) “exceptionally grave” test supplants the section 2.326(a)(2) “significant safety or environmental issue” test; LBP-12-1, 75 NRC 16 n.62 (2012); LBP-12-10, 75 NRC 655-56 (2012)

Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-11-8, 74 NRC 214, 228 (2011) introduction of a new contention, long after the evidentiary record has otherwise closed, would broaden and delay the proceeding and therefore tends to weigh against admission of a new contention; CLI-12-15, 75 NRC 723-24 n.96 (2012)
LEGAL CITATIONS INDEX

CASES

Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-11-8, 79 NRC 214, 228-29 (2011)

contention that seeks to litigate a matter that is, or clearly is about to become, the subject of a rulemaking is inadmissible; LBP-14-1, 79 NRC 95 n.293 (2014)
litigation proceedings are not the appropriate venue for generic issues, especially those that are about to become the subject of rulemaking; LBP-14-1, 79 NRC 95 n.293 (2014)

Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-12-2, 75 NRC 63 (2012)
departing from NRC’s stable, predictable licensing process could unintentionally impact NRC Staff’s disciplined work; CLI-12-9, 75 NRC 445 (2012)

plants for which a SAMA analysis was conducted for the first time under section 51.53(c)(3)(ii)(L) may face general criticism that the passage of time between original licensing and renewal has rendered their SAMA analysis out of date upon application for a subsequent renewal term; CLI-13-7, 78 NRC 214-15 n.83 (2013)

Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-12-2, 75 NRC 63, 74 (2012)

Commission does not review combined license application de novo, but rather considers the sufficiency of NRC Staff’s review of the application; CLI-15-13, 81 NRC 560-61 (2015)

Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-12-2, 75 NRC 63, 90 (2012)
in the event of a severe accident in an AP1000, squib valves, which are explosively activated, reduce pressure and inject water as needed into the reactor vessel; CLI-15-13, 81 NRC 578 (2015)
purpose of the testing program for squib valves is to ensure that the valves operate as intended under design conditions; CLI-15-13, 81 NRC 578 (2015)

Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-12-2, 75 NRC 63, 90-96 (2012)

inservice testing and inspection program for squib valves in combined license applications is discussed; CLI-15-13, 81 NRC 578 (2015)

Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-12-2, 75 NRC 63, 93-95 (2012)

although the Commission found NRC Staff’s review of combined license applications rigorous, it imposed a condition requiring implementation of a squib-valve surveillance program prior to fuel load; CLI-15-13, 81 NRC 578 (2015)

Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-12-7, 75 NRC 379, 391-92 (2012)
an application-specific NEPA review represents a snapshot in time, and although NEPA requires that NRC conduct its environmental review with the best information available at that time, it does not require that NRC wait until inchoate information matures into something that later might affect its review; LBP-12-10, 75 NRC 659 (2012)

Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-12-11, 75 NRC 523, 529 (2012)

absent a showing of irreparable injury, stay standards can only be met if movant can demonstrate a virtual certainty of success on the merits; CLI-15-17, 82 NRC 39 (2015)
even if stay movant fails to show irreparable injury, a board may still grant a stay if movant has made an overwhelming showing or a demonstration of virtual certainty that it will prevail on the merits; LBP-15-2, 81 NRC 54, 58 (2015)

for a potential injury to be irreparable, it must be shown to be imminent, certain, and great; LBP-15-2, 81 NRC 54 (2015)

irreparable injury is the most important of the factors for grant or denial of a stay; LBP-15-2, 81 NRC 53-54 (2015)

where movant cannot show either irreparable injury or a likelihood of prevailing on the merits, a board need not consider the remaining factors; LBP-15-2, 81 NRC 54 (2015)

447
Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-12-11, 75 NRC 523, 530-31 (2012)
to qualify as irreparable injury, the potential harm cited by stay movant first must be related to the underlying claim that is the focus of the adjudication; LBP-15-2, 81 NRC 54, 55 (2015)
Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-12-11, 75 NRC 523, 533 n.53 (2012)
party offering a new contention on the need to supplement an issued final EIS must explain why the new information is sufficiently significant to present a seriously different picture of the environmental landscape; LBP-15-16, 81 NRC 704 (2015)
Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), CLI-12-11, 75 NRC 523, 534 (2012)
results of review by NRC Staff and Indian tribe of applicant’s newly disclosed well log data did not paint a seriously different picture of the environmental landscape; LBP-15-16, 81 NRC 705 (2015)
Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), LBP-09-3, 69 NRC 139, 154 (2009)
petitions that lack alleged facts or expert opinions to support the contention are inadmissible; LBP-11-29, 74 NRC 621 (2011)
Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), LBP-10-1, 71 NRC 165, 177 n.3 (2010)
boards have an independent obligation to determine whether petitioners meet the threshold criterion for intervention even if their standing is uncontested; LBP-12-24, 76 NRC 507 (2012)
Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), LBP-10-8, 71 NRC 433 (2010)
the low-level radioactive waste plan outlined in applicant’s final safety analysis report complies with 10 C.F.R. 52.97(a)(3); CLI-11-10, 74 NRC 256-57 (2011)
Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), LBP-10-8, 71 NRC 433, 439 (2010)
Subpart L provides for motions for summary disposition, and such motions are governed by the same standards as those in Subpart G proceedings; LBP-12-2, 75 NRC 163 n.18 (2012)
summary disposition may be entered with respect to all or any part of the matters involved in the proceeding if the motion, along with any appropriate supporting materials, shows that there is no genuine issue as to any material fact and that the moving party is entitled to a decision as a matter of law; LBP-12-2, 75 NRC 163 n.18 (2012)
Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), LBP-10-8, 71 NRC 433, 444 (2010)
scope and specificity of information required under section 52.79(a)(3) is a fact-bound determination that is tied to applicant’s particular plans for compliance through, but not necessarily the details of, design, operational organization, and procedures associated with any contingent long-term LLRW facility; LBP-12-4, 75 NRC 223 (2012)
there is a longstanding agency recognition of the availability of the mechanisms under 10 C.F.R. 50.59 or 50.90 for obtaining authorization to construct additional onsite LLRW storage facilities; LBP-12-4, 75 NRC 225 n.17 (2012)
Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), LBP-10-8, 71 NRC 433, 447 (2010)
the licensing board chose to terminate the adjudications when faced with no pending contentions, but did not state that it was compelled to do so by Commission precedent or agency regulation; LBP-11-22, 74 NRC 285 (2011)
the Chief Administrative Judge of the Atomic Safety and Licensing Board Panel appointed a new board (consisting of the same members as the old board), which held that the new contention submitted after termination of the proceeding did not meet the reopening standard, deemed that contention untimely and inadmissible, and again terminated the adjudicatory proceeding; LBP-11-22, 74 NRC 285 n.136 (2011)
LEGAL CITATIONS INDEX

CASES

a newly constituted board applied the reopening standard to new contentions filed after the prior proceeding was terminated for want of pending or admitted contentions; LBP-11-22, 74 NRC 269 n.50 (2011)

Southern Nuclear Operating Co. (Vogtle Electric Generating Plant, Units 3 and 4), LBP-10-21, 72 NRC 616, 643 (2010)
petitioner who satisfies the reopening standard must also show that its proposed new contention meets the standard for new or amended contentions in section 2.309(c) and the underlying admissibility standards of section 2.309(f)(1); LBP-14-8, 79 NRC 523 (2014)

Southern Pacific Co. v. Darnell-Taenzer Lumber Co., 245 U.S. 531, 533 (1918) (Holmes, J.)
general tendency of the law, when deciding which consequences give rise to actionable rights, is not to go beyond the first step; LBP-14-4, 79 NRC 333 (2014)

Southern Pacific Terminal Co. v. Interstate Commerce Commission, 219 U.S. 498, 515 (1911) exception to the mootness doctrine occurs if the challenged action is too short in duration to be litigated and there is a reasonable expectation that the same party will be subjected to the same action again; CLI-13-9, 78 NRC 558 n.26 (2013)

environmental assessment cannot import previous environmental analyses without consideration of subsequent developments at the site and to hold otherwise would render meaningless NEPA’s requirement to supplement an environmental impact statement or environmental assessment; CLI-15-25, 82 NRC 399 (2015)

Southwest Center for Biological Diversity v. U.S. Forest Service, 100 F.3d 1443, 1447 (9th Cir. 1996)
if an agency determines that a particular action will have no effect on an endangered or threatened species, the consultation requirements are not triggered, and the finding of no effect obviates the need for formal consultation under the Endangered Species Act; LBP-12-10, 75 NRC 657 n.153 (2012)

Southwest Center for Biological Diversity v. U.S. Forest Service, 100 F.3d 1443, 1447-48 (9th Cir. 1996)
if an agency determines that a particular action will have no effect on an endangered or threatened species, the consultation requirements are not triggered; LBP-12-10, 75 NRC 671-72 (2012); LBP-15-11, 81 NRC 444 n.284 (2015)

Southwest Williamson County Community Ass’n, Inc. v. Slater, 243 F.3d 270, 278-80 (6th Cir. 2001)
for an action such as a transmission corridor that will not be constructed by or expressly permitted by the federal agency preparing an environmental impact statement, there must be sufficient federal control and responsibility that the action qualifies as a federal action; LBP-14-9, 80 NRC 45 (2014) only those activities that have sufficient federal involvement to qualify as federal actions need be included in the scope of the proposed action evaluated in an environmental impact statement; LBP-14-9, 80 NRC 47 (2014)

Southwest Williamson County Community Ass’n, Inc. v. Slater, 243 F.3d 270, 281-83 (6th Cir. 2001)
federal decisionmakers have authority to exercise sufficient control or responsibility over the nonfederal projects so as to influence the outcome of the project; LBP-14-9, 80 NRC 49 (2014) test for determining when a nonfederal project should be analyzed under NEPA as a major federal action is discussed; LBP-14-9, 80 NRC 48 (2014)

Southwest Williamson County Community Ass’n, Inc. v. Slater, 243 F.3d 270, 281-83 (6th Cir. 2001) to be analyzed under NEPA as a major federal action, a nonfederal project must restrict or limit the statutorily prescribed federal decisionmakers’ choice of reasonable alternatives; LBP-14-9, 80 NRC 48 (2014)
Southwest Williamson County Community Ass’n, Inc. v. Slater, 243 F.3d 270, 283-84 (6th Cir. 2001) for a nonfederal project to be analyzed under NEPA as a major federal action, federal decisionmakers must have authority to exercise sufficient control or responsibility over the nonfederal project so as to influence the outcome of the project; LBP-14-9, 80 NRC 48 (2014)

SRI International v. Matsushita Electric Corp. of America, 775 F.2d 1107, 1116 (9th Cir. 1985) summary disposition, like summary judgment, is an extreme remedy; LBP-11-7, 73 NRC 263 (2011)

St. Louis Fuel and Supply Co. v. Federal Energy Regulatory Commission, 890 F.2d 446, 448-91 (D.C. Cir. 1989) an agency’s discretionary choice to conduct a formal on-the-record hearing is irrelevant when determining whether the Equal Access to Justice Act applies to a particular proceeding; LBP-11-8, 73 NRC 360 (2011)

St. Louis Fuel and Supply Co. v. Federal Energy Regulatory Commission, 890 F.2d 446, 451 (D.C. Cir. 1989) attorneys’ fees may be awarded in adversary adjudications that are governed by Administrative Procedure Act § 554, but they may not be awarded in adversary adjudications that Congress did not subject to that section; LBP-11-8, 73 NRC 356 (2011)

St. Regis Paper Co. v. United States, 368 U.S. 208, 229 (1961) (Black, J., dissenting) it is no less good morals and good law that the government should turn square corners in dealing with the people than that the people should turn square corners in dealing with their government; LBP-13-3, 77 NRC 97 n.76 (2013) the Commission justifiably expects that all applicable provisions of the Rules of Practice will be observed in adjudicatory submissions, but it also expects the Staff to turn square corners with those with whom it deals, including applicants for SRO licenses; LBP-13-3, 77 NRC 97 (2013)

State of Alaska v. Andrus, 580 F.2d 465, 475 (D.C. Cir. 1978) role of the final environmental impact statement is to expose the reasoning and data of the agency proposing the action to scrutiny by the public and by other branches of the government; LBP-12-18, 76 NRC 179 (2012)

State of New Jersey (Department of Law and Public Safety), CLI-93-25, 38 NRC 289, 296 (1993) good cause for failure to file on time is entitled to the most weight; LBP-11-7, 73 NRC 279 (2011); LBP-11-15, 73 NRC 634 (2011)

State of North Carolina v. Federal Aviation Administration, 957 F.2d 1125, 1129-30 (4th Cir. 1994) duty to exercise independent judgment does not mean that NRC must reinvent every wheel or duplicate competent and professional environmental data and studies that have already been done on a proposed site; LBP-13-4, 77 NRC 213 n.91 (2013) NEPA precludes an agency from avoiding the Act’s requirements by simply relying on another agency’s conclusions about a federal action’s impact on the environment; LBP-13-4, 77 NRC 213 n.91 (2013)

State of Ohio v. NRC, 814 F.2d 258, 262-64 (6th Cir. 1987) courts of appeals have repeatedly approved NRC practice of closing the hearing record after resolution of the last live contention, and of holding new contentions to the higher reopening standard; CLI-12-14, 75 NRC 700 (2012)

Statement of Policy on Conduct of Adjudicatory Proceedings, CLI-98-12, 48 NRC 18, 19 (1998) current adjudicatory procedures and policies provide a latitude to the Commission, its licensing boards, and presiding officers to instill discipline in the hearing process and ensure a prompt yet fair resolution of contested issues in adjudicatory proceedings; CLI-14-10, 80 NRC 164 n.39 (2014) NRC adjudicatory rules are designed to promote fair and efficient resolution of disputes; CLI-14-7, 80 NRC 8 n.30 (2014)
LEGAL CITATIONS INDEX

CASES

NRC proceedings would be incapable of attaining finality if contentions that could have been raised at
the outset could be added later at will, regardless of the stage of the proceeding; CLI-12-21, 76
NRC 499 n.53 (2012)

the Commission enforces the 10-day deadline for filing appeals strictly and excuses it only in
unavoidable and extreme circumstances; LBP-12-12, 75 NRC 749 n.18 (2012)

all parties are obliged to follow the procedures in 10 C.F.R. Part 2 and board scheduling orders;
CLI-14-10, 80 NRC 164 n.36 (2014)

board may appropriately view petitioner’s support for its contention in a light that is favorable to
petitioner, but the board cannot do so by ignoring the requirements set forth in 10 C.F.R.

intervention petitioner must review relevant documents and provide sufficient discussion of these
documents and its concerns to demonstrate existence of a genuine material dispute with licensee on
a material issue of law or fact; CLI-15-23, 82 NRC 326, 329 (2015)

proponent of a contention, not the licensing board, is responsible for formulating the contention and
providing the necessary information to satisfy the basis requirement its admission; CLI-12-5, 75 NRC
349 n.277 (2012); CLI-12-13, 75 NRC 686 n.30 (2012); CLI-15-18, 82 NRC 146 n.53 (2015)

Statement of Policy on Conduct of Licensing Proceedings, CLI-98-12, 48 NRC 18, 22-23 (1998)
boards are not to proceed with sua sponte issues absent the Commission’s approval; LBP-11-9, 73
NRC 419 n.13 (2011)

licensing boards should only use sua sponte review in extraordinary circumstances; CLI-15-1, 81 NRC
9 (2015); LBP-14-9, 80 NRC 38 n.65 (2014)

under 10 C.F.R. 2.311, appeal of a ruling on contentions is allowed only if the order wholly denies
an intervention petition or a party other than the petitioner alleges that a petition for leave to
intervene or a request for hearing should have been wholly denied; CLI-12-7, 75 NRC 385 n.16
(2012)

NRC Rules of Practice provide the board with substantial authority to regulate hearing procedures;
CLI-14-10, 80 NRC 164 n.39 (2014)

NRC Rules of Practice provide the board with substantial authority to regulate hearing procedures;

every participant in NRC adjudicatory proceedings has the duty to fulfill the obligations imposed by
and in accordance with applicable law, and when participant fails to meet its obligations, a licensing
board should consider the imposition of sanctions against the offending party; LBP-13-2, 77 NRC 75
(2003)

boards should attempt to tailor sanctions to mitigate the harm caused by the failure of a party to
fulfill its obligations and bring about improved future compliance; LBP-13-2, 77 NRC 76 (2003)
in selecting a sanction, boards should consider the relative importance of the unmet obligation, its
potential for harm to other parties or the orderly conduct of the proceeding, whether its occurrence
is an isolated incident or a part of a pattern of behavior, the importance of the safety or
environmental concerns raised by the party, and all of the circumstances; LBP-13-2, 77 NRC 76
(2003)

leniency is afforded to pro se petitioners, but parties to NRC proceedings are expected to fulfill the
obligations imposed by NRC rules; CLI-15-25, 82 NRC 397 n.53 (2015)
parties’ other professional obligations do not relieve them of their obligations to meet regulatory
deadlines; LBP-11-34, 74 NRC 693 n.52 (2011)
petitioners’ argument that their counsel was busy on other legal matters disregards longstanding policy that the fact that a party may have other obligations does not relieve that party of its hearing obligations; LBP-12-12, 75 NRC 749 n.18 (2012) regardless of a party’s resources, fairness to all involved in NRC’s adjudicatory procedures requires that every participant fulfill the obligations imposed by and in accordance with applicable law and NRC regulations; CLI-14-10, 80 NRC 164 (2014); LBP-13-2, 77 NRC 78 (2003) Statement of Policy on Conduct of Licensing Proceedings, CLI-81-8, 13 NRC 452, 456 (1981) Commission, like other adjudicatory bodies, looks with favor upon settlements; LBP-14-4, 79 NRC 333 (2014) Statement of Policy: Further Commission Guidance for Power Reactor Operating Licenses, CLI-80-42, 12 NRC 654, 661 (1980) in the post-TMI time frame, the Commission, although providing for some modified procedures, continued to apply the existing rules for filing new contentions and motions to reopen the record; CLI-11-5, 74 NRC 170 (2011) Strata Energy, Inc. (Ross In Situ Recovery Uranium Project), LBP-12-3, 75 NRC 164, 192-95 (2012) contention that the draft environmental impact statement fails to include necessary information for adequate determination of baseline groundwater quality is admissible; LBP-13-9, 78 NRC 54 n.79 (2013) Strata Energy, Inc. (Ross In Situ Recovery Uranium Project), LBP-12-3, 75 NRC 164, 195-98 (2012) contention that draft environmental impact statement fails to include an adequate hydrogeological analysis to assess potential impacts to groundwater is admissible; LBP-13-9, 78 NRC 58 n.106 (2013) Strata Energy, Inc. (Ross In Situ Recovery Uranium Project), LBP-12-3, 75 NRC 164, 207 (2012), aff’d on other grounds, CLI-12-12, 75 NRC 603 (2012) generic environmental impact statement for ISL mining is subject to an appropriate challenge in an adjudicatory proceeding; LBP-15-11, 81 NRC 441 (2015) Strata Energy, Inc. (Ross In Situ Uranium Recovery Project), CLI-12-12, 75 NRC 603, 607 (2012) piecemeal review of licensing board rulings during ongoing proceedings is disfavored; CLI-13-3, 77 NRC 54 (2013) Strata Energy, Inc. (Ross In Situ Uranium Recovery Project), CLI-12-12, 75 NRC 603, 608 (2012) board rulings on standing are given substantial deference on appeal; CLI-14-2, 79 NRC 13 (2014) Strata Energy, Inc. (Ross In Situ Uranium Recovery Project), CLI-12-12, 75 NRC 603, 612-13 & n.49 (2012) nonradiological impacts can be a basis for standing; LBP-13-6, 77 NRC 271 (2013) Strata Energy, Inc. (Ross In Situ Uranium Recovery Project), CLI-12-12, 75 NRC 603, 613 (2012) once the board makes its determination that petitioner has articulated sufficient detail as to how the proposed action would affect its members, it would not be appropriate for the board to weigh the evidence to determine whether the harm to petitioner’s members is certain; CLI-15-25, 82 NRC 397 (2015) Strata Energy, Inc. (Ross In Situ Uranium Recovery Project), LBP-12-3, 75 NRC 164, 201-02 & n.33 (2012), aff’d as to standing ruling, CLI-12-12, 75 NRC 603 (2012) scope of the term “impact” includes cumulative impacts; LBP-12-24, 76 NRC 513 (2012) Strata Energy, Inc. (Ross In Situ Uranium Recovery Project), LBP-12-3, 75 NRC 164, 203 (2012) reasonably foreseeable actions must be the subject of a cumulative impacts analysis; LBP-14-6, 79 NRC 416 n.67 (2014) Strata Energy, Inc. (Ross In Situ Uranium Recovery Project), LBP-15-3, 81 NRC 65, 91-92 (2015) prelicensing monitoring program to characterize site groundwater constituents need not be coextensive with the Criterion 7A preoperational monitoring, license condition-based program intended to provide the information needed for setting Criterion 5B groundwater protection standards and UCLs; LBP-15-16, 81 NRC 665 (2015) Strata Energy, Inc. (Ross In Situ Uranium Recovery Project), LBP-15-3, 81 NRC 65, 132 (2015) there is nothing in the record to suggest that applicant or NRC Staff will not act in good faith to ensure that applicant’s regulatory responsibilities, including its license conditions, are honored, and the board cannot assume noncompliance; LBP-15-11, 81 NRC 439 n.252 (2015)
LEGAL CITATIONS INDEX

CASES

NEPA does not require agencies to elevate environmental concerns over other appropriate considerations; LBP-12-17, 76 NRC 81 n.49 (2012); LBP-12-18, 76 NRC 158 (2012); LBP-14-9, 80 NRC 40 (2014)

although NEPA mandates that an agency prepare an environmental impact statement and take a hard look at the environmental impacts of a proposed agency action, NEPA itself does not mandate particular results, but simply prescribes the necessary process; LBP-11-7, 73 NRC 264 (2011); LBP-13-4, 77 NRC 120 (2013)
if the adverse environmental effects of a proposed action are adequately identified and evaluated, the agency is not constrained by NEPA from deciding that other values outweigh the environmental costs; LBP-11-7, 73 NRC 281 n.168 (2011); LBP-11-14, 73 NRC 605 (2011); LBP-13-4, 77 NRC 216 (2013)

doctrine of standing reflects the fundamental constitutional case or controversy limitation; LBP-14-4, 79 NRC 350 (2014)

project represents a NEPA success story, because the final proposal includes numerous environmental improvements that might not have been realized without the lengthy NEPA process; LBP-14-7, 79 NRC 468 n.108 (2014)

the Commission declines to take pendent jurisdiction of contention admissibility determinations, to avoid encouraging interlocutory appeals riding on the coattails of appealable issues; CLI-12-12, 75 NRC 607 (2012)

System Energy Resources, Inc. (Early Site Permit for Grand Gulf ESP Site), CLI-05-4, 61 NRC 10, 13 (2005)
boards do not sit to “flyspeck” environmental documents or to add details or nuances, but the environmental report or environmental impact statement must come to grips with all important considerations; LBP-11-16, 73 NRC 676 (2011); LBP-15-5, 81 NRC 283 (2015)
petitioners may raise contentions seeking correction of significant inaccuracies and omissions in the environmental report; LBP-15-5, 81 NRC 282-83 (2015)

System Energy Resources, Inc. (Early Site Permit for Grand Gulf ESP Site), CLI-07-10, 65 NRC 144, 146 (2007)
tardy filing of a contention may be excusable only where the facts upon which the amended or new contention is based were previously unavailable; CLI-11-2, 73 NRC 344 (2011)
within the geographic boundary of the Ninth Circuit, NRC may not exclude NEPA terrorism contentions categorically; CLI-11-11, 74 NRC 456 (2011)

System Energy Resources, Inc. (Early Site Permit for Grand Gulf ESP Site), LBP-07-1, 65 NRC 27, permit issuance authorized, CLI-07-14, 65 NRC 216 (2007)
guidance on the role of licensing boards in mandatory proceedings is provided; LBP-12-21, 76 NRC 233-34 (2012)
mandatory proceedings for licensing of proposed uranium enrichment facility sites were conducted; LBP-11-11, 73 NRC 475 (2011)

a draft environmental impact statement does not and cannot treat identified environmental concerns in a vacuum; LBP-11-7, 73 NRC 302 (2011)

Taxpayers Watchdog, Inc. v. Stanley, 819 F.2d 294, 298 (D.C. Cir. 1987)
segmentation is to be avoided in order to ensure that interrelated projects, the overall effect of which is environmentally significant, not be fractionalized into smaller, less significant actions; LBP-12-12, 75 NRC 778 n.204 (2012); LBP-14-6, 79 NRC 421 (2014); LBP-14-9, 80 NRC 41 (2014)

Te-Moak Tribe of Western Shoshone of Nevada v. U.S. Department of Interior, 608 F.3d 592, 603 (9th Cir. 2010)
NEPA analysis of cumulative impacts must give a sufficiently detailed catalogue of past, present, and future projects, and provide adequate analysis about how these projects, and differences between the projects, are thought to have impacted the environment; LBP-13-9, 78 NRC 83 (2013)
Te-Moak Tribe of Western Shoshone of Nevada v. U.S. Department of Interior, 608 F.3d 592, 606, 610 (9th Cir. 2010)
agency failed to take a hard look at cumulative impacts on cultural resources under NEPA even though the agency had satisfied its obligations under NHPA to consult with the tribe; LBP-15-16, 81 NRC 654 n.214 (2015)

Tennessee Valley Authority (Bellefonte Nuclear Power Plant, Units 1 and 2), CLI-10-26, 73 NRC 474, 476 (2010)
parties’ other professional obligations do not relieve them of their obligations to meet mandatory deadlines; LBP-11-34, 74 NRC 693 n.52 (2011); LBP-12-12, 75 NRC 749 n.18 (2012)
the Commission enforces the 10-day deadline for filing appeals strictly and excuses it only in unavoidable and extreme circumstances; LBP-12-12, 75 NRC 749 n.18 (2012)

Tennessee Valley Authority (Bellefonte Nuclear Power Plant, Units 1 and 2), CLI-10-26, 72 NRC 474, 478 n.23 (2010)
NRC has a strong policy in favor of openness and transparency; LBP-11-5, 73 NRC 134 (2011)

Tennessee Valley Authority (Bellefonte Nuclear Power Plant, Units 1 and 2), LBP-10-7, 71 NRC 391, 413-14 (2010)
boards cannot logically infer that identified members of one organization are also members of another organization for purpose of representational standing determinations; LBP-13-8, 78 NRC 8 n.11 (2013)

Tennessee Valley Authority (Bellefonte Nuclear Power Plant, Units 3 and 4), CLI-09-3, 69 NRC 68, 72 (2009)
boards are encouraged to refer rulings that raise significant and novel legal or policy issues, the resolution of which would materially advance the orderly disposition of the proceeding; CLI-12-13, 75 NRC 685 n.23 (2012)

Tennessee Valley Authority (Bellefonte Nuclear Power Plant, Units 3 and 4), CLI-09-3, 69 NRC 68, 73 n.24 (2009)
board is free to decide contention admissibility on a theory different from those argued by the litigants, but only if it explained the specific basis of its ruling and gave the litigants a chance to present arguments (and, where appropriate, evidence) regarding the board’s new theory; LBP-14-4, 79 NRC 362 n.44 (2014)

Tennessee Valley Authority (Bellefonte Nuclear Power Plant, Units 3 and 4), CLI-09-3, 69 NRC 68, 75 (2009)
aspect a waiver, parties are prohibited from collaterally attacking NRC regulations in an adjudication; LBP-15-4, 81 NRC 173 n.96 (2015)
contention challenging a Category 1 issue is inadmissible because petitioner has not requested a rule waiver and makes no arguments unique to this reactor; LBP-15-5, 81 NRC 302 (2015)

Tennessee Valley Authority (Bellefonte Nuclear Power Plant, Units 3 and 4), CLI-09-3, 69 NRC 68, 75 n.38 (2009)
rule waivers are not granted where the circumstances on which the waiver’s proponent relies are common to a large class of applicants or facilities; LBP-11-16, 73 NRC 702 n.351 (2011)

Tennessee Valley Authority (Bellefonte Nuclear Power Plant, Units 3 and 4), CLI-09-3, 69 NRC 68, 76-77 (2009)
questions of safety impacts of onsite low-level waste storage are largely site- and design-specific, and appropriately decided in an individual licensing proceeding; LBP-12-4, 75 NRC 224 n.15 (2012)

Tennessee Valley Authority (Bellefonte Nuclear Power Plant, Units 3 and 4), LBP-08-16, 68 NRC 361, 379-80 (2008)
boards cannot logically infer that identified members of one organization are also members of another organization for purpose of representational standing determinations; LBP-13-8, 78 NRC 8 n.11 (2013)

Tennessee Valley Authority (Bellefonte Nuclear Power Plant, Units 3 and 4), LBP-08-16, 68 NRC 361, 410 (2008)
potential legislative action that might result in a reduction in demand is speculative and therefore does not provide a basis for admission of a contention on need for power; LBP-11-7, 73 NRC 287 n.206, 298 n.296 (2011)

454
Tennessee Valley Authority (Bellefonte Nuclear Power Plant, Units 3 and 4), LBP-11-37, 74 NRC 774 (2011)
Fukushima-related contentions were dismissed as premature; LBP-11-39, 74 NRC 870 (2011)

Tennessee Valley Authority (Browns Ferry Nuclear Plant, Units 1, 2, and 3), ALAB-664, 15 NRC 1, 15-16 (1982), vacated and remanded on other grounds, CLI-82-26, 16 NRC 880 (1982)
prior to license issuance NRC must find reasonable assurance that activities authorized by the amendment can be conducted without endangering the health and safety of the public, and are in compliance with Commission regulations; LBP-15-17, 81 NRC 778 n.154 (2015); LBP-15-20, 81 NRC 841 n.65 (2015)

Tennessee Valley Authority (Browns Ferry Nuclear Plant, Units 1, 2, and 3), ALAB-677, 15 NRC 1387 (1982)
NRC Staff is obliged to lay all relevant materials before the board to enable it to adequately dispose of the issues before it; LBP-14-2, 79 NRC 243 (2014)

Tennessee Valley Authority (Browns Ferry Nuclear Plant, Units 1, 2, and 3), ALAB-677, 15 NRC 1387, 1394 (1982)
all parties, including NRC Staff, are obligated to bring any significant new information to the board’s attention; LBP-14-2, 79 NRC 243 (2014)

Tennessee Valley Authority (Clinch River Breeder Reactor Plant), ALAB-345, 4 NRC 212, 213 (1976)
although a party who is not injured by a board’s ruling has no right to appeal that ruling, it may file a supporting brief at the appropriate time; CLI-12-6, 75 NRC 363 n.51 (2012)
petitioner may act to vindicate its own rights, but it has no standing to assert the rights of others; CLI-12-6, 75 NRC 363 (2012)

Tennessee Valley Authority (Hartsville Nuclear Plant, Units 1A, 2A, 1B, and 2B), ALAB-380, 5 NRC 572 (1977)
licensing boards may raise significant environmental and safety issues sua sponte; LBP-11-23, 74 NRC 367 (2011)

Tennessee Valley Authority (Hartsville Nuclear Plant, Units 1A, 2A, 1B, and 2B), ALAB-380, 5 NRC 572, 575 (1977)
licensing board role is not confined to arbitration of those environmental controversies as may happen to have been placed before them by the litigants in the particular case; LBP-14-9, 80 NRC 66 (2014)

Tennessee Valley Authority (Hartsville Nuclear Plant, Units 1A, 2A, 1B, and 2B), ALAB-463, 7 NRC 341, 362 n.90 (1978)
board considered a letter written after the original petition was filed and submitted with petitioner’s reply; LBP-15-5, 81 NRC 289 n.252 (2015)

Tennessee Valley Authority (Hartsville Nuclear Plant, Units 1A, 2A, 1B, and 2B), ALAB-467, 7 NRC 459, 463 (1978)
issuance of advisory opinions is generally disfavored; CLI-13-4, 77 NRC 105 (2013)

Tennessee Valley Authority (Hartsville Nuclear Plant, Units 1A, 2A, 1B, and 2B), LBP-76-44, 4 NRC 637, 648-49 (1976)
boards’ authority to seek to trigger review in extraordinary circumstances remains and has been put to good use; LBP-11-9, 73 NRC 418 n.13 (2011)

Tennessee Valley Authority (Sequoyah Nuclear Plant, Units 1 and 2), CLI-14-3, 79 NRC 31, 33-34, 37 (2014)
because of special circumstances presented by waste confidence, Commission directs that waste confidence contentions be held in abeyance pending its further direction; CLI-14-8, 80 NRC 78 n.23 (2014)

Tennessee Valley Authority (Sequoyah Nuclear Plant, Units 1 and 2), CLI-14-3, 79 NRC 31, 34-35 (2014)
experienced litigator should have expected that NRC Staff might challenge its interpretation of an NRC regulation regarding appeals; LBP-15-28, 82 NRC 244 n.78 (2015)

Tennessee Valley Authority (Sequoyah Nuclear Plant, Units 1 and 2), CLI-14-3, 79 NRC 31, 36 (2014)
appeal under 10 C.F.R. 2.311 of a licensing board order holding various contentions inadmissible was premature because a waste confidence contention had been held in abeyance, and the board had therefore not yet granted or denied the hearing request; LBP-14-8, 79 NRC 528 (2014)
limited interlocutory appeal right attaches only when the board has fully ruled on the initial intervention petition, i.e., when it has admitted or rejected all proposed contentions; LBP-15-1, 81 NRC 46 (2015)

Tennessee Valley Authority (Sequoyah Nuclear Plant, Units 1 and 2), CLI-14-3, 79 NRC 31, 36-37 (2014) degree to which pendency of a new contention at the time of the board’s ruling on an initial hearing petition tolled the time for filing any appeals from that decision regarding the admissibility of the contentions would be a matter for Commission determination; LBP-14-12, 80 NRC 141 n.3 (2014)

Tennessee Valley Authority (Sequoyah Nuclear Plant, Units 1 and 2), CLI-14-3, 79 NRC 31, 37 (2014) the Commission retained authority to provide ultimate direction on the waste confidence contentions being held in abeyance; LBP-14-8, 79 NRC 528 (2014)

Tennessee Valley Authority (Sequoyah Nuclear Plant, Units 1 and 2), CLI-14-3, 79 NRC 31, 37 n.33 (2014) licensing board opinion on appealability of an order does not bind the Commission, which will make its own decision whether an appeal may be filed; LBP-14-8, 79 NRC 528-29 n.32 (2014)

Tennessee Valley Authority (Sequoyah Nuclear Plant, Units 1 and 2; Watts Bar Nuclear Plant, Unit 1), LBP-02-14, 56 NRC 15, 23 (2002) statutes articulating the relevant zone of interests in NRC proceedings are the Atomic Energy Act and the National Environmental Policy Act; LBP-11-29, 74 NRC 616 n.10 (2011)

Tennessee Valley Authority (Sequoyah Nuclear Plant, Units 1 and 2; Watts Bar Nuclear Plant, Unit 1), LBP-02-14, 56 NRC 15, 25 (2002) even if an import or export license authorized possession and/or use of the low-level radioactive waste, the petition does not assert how the LLRW is a significant source of radioactivity or provide any scenario in which the import or export of the LLRW would result in an accident that could produce obvious offsite consequences; LBP-11-3, 73 NRC 622 n.46 (2011)

Tennessee Valley Authority v. Hill, 437 U.S. 153, 173 (1978) the Endangered Species Act affirmatively commands all federal agencies to ensure that actions authorized, funded, or carried out by them do not jeopardize the continued existence of an endangered species or result in destruction or modification of habitats of such species, with no exception; LBP-12-10, 75 NRC 670 (2012)

Tennessee Valley Authority v. Hill, 437 U.S. 153, 180 (1978) the Secretary of the Interior has been given extensive power to develop regulations and programs for the preservation of endangered and threatened species; LBP-12-10, 75 NRC 670 (2012)

Tennessee Valley Authority v. Hill, 437 U.S. 153, 181-82 (1978) federal agencies should seek to preserve endangered species only insofar as is practicable and consistent with their primary purposes; LBP-12-10, 75 NRC 671 (2012)

Tennessee Valley Authority v. Hill, 437 U.S. 153, 188 n.34 (1978) it would make sense to hold NEPA inapplicable at some point in the life of a project, because the agency would no longer have a meaningful opportunity to weigh the benefits of the project versus the detrimental effects on the environment; LBP-12-1, 75 NRC 37 n.48 (2012)

Tennessee Valley Authority (Watts Bar Nuclear Plant, Unit 1), CLI-03-9, 58 NRC 39, 44 n.21 (2003) filing of amicus briefs is permitted if a matter is taken up by the Commission under section 2.341 or sua sponte; CLI-15-24, 82 NRC 334 n.17 (2015)

Tennessee Valley Authority (Watts Bar Nuclear Plant, Unit 2), CLI-10-12, 71 NRC 319, 322-23 (2010) in weighing the timeliness factors for motions to reopen, greatest weight is accorded to good cause for failure to file on time; CLI-11-8, 74 NRC 227 (2011); CLI-12-15, 75 NRC 723 n.96 (2012)

Tennessee Valley Authority (Watts Bar Nuclear Plant, Unit 2), CLI-10-12, 71 NRC 319, 323 (2010) absent good cause, there must be a compelling showing on the remaining late-filing factors; CLI-12-10, 75 NRC 492 n.69 (2012); CLI-12-15, 75 NRC 723 n.96 (2012)

Tennessee Valley Authority (Watts Bar Nuclear Plant, Unit 2), CLI-12-10, 75 NRC 489 n.47, 492 n.69 (2012) if good cause is not shown, a board may still permit the late filing, but petitioner or intervenor must make a strong showing on the other factors of 10 C.F.R. 2.309(c); LBP-11-9, 73 NRC 401 (2011)

NRC Staff will incorporate any new SAMA-related information that it finds to be significant in the final supplemental EIS; CLI-13-7, 78 NRC 217 (2013)
petitioner’s rule waiver petition is referred to NRC Staff as additional comments on the draft supplemental EIS for the Staff’s consideration and response; CLI-13-7, 78 NRC 216-17 (2013)

Tennessee Valley Authority (Watts Bar Nuclear Plant, Unit 2), LBP-10-12, 71 NRC 656, 662 n.9 (2010)

contention where a fisheries biologist opined that applicant lacked adequate data on which to conclude that impacts on the aquatic environment were insignificant was admissible; LBP-15-20, 81 NRC 852 n.139 (2015)

Tennessee Valley Authority (Watts Bar Nuclear Plant, Unit 2), LBP-14-16, 80 NRC 194 n.64 (2014)

“prima facie” is not defined in NRC regulations, but is interpreted to mean a substantial showing; LBP-14-16, 80 NRC 194 n.64 (2014)

contention where a fisheries biologist opined that applicant lacked adequate data on which to conclude that impacts on the aquatic environment were insignificant was admissible; LBP-15-20, 81 NRC 852 n.139 (2015)

Tennessee Valley Authority (Watts Bar Nuclear Plant, Units 1 and 2), ALAB-413, 5 NRC 1418, 1420-21 (1977)

standing claims based on economic impacts are only cognizable in NRC proceedings with regard to NEPA-based concerns; LBP-12-3, 75 NRC 184 n.15 (2012)

Tennessee Valley Authority (Watts Bar Nuclear Plant, Units 1 and 2), ALAB-413, 5 NRC 1418, 1421 (1977)

an organization’s standing can be demonstrated through the interests of its members, but if a member acts or speaks on behalf of the organization, that member must also demonstrate authorization by that organization to represent it; LBP-11-13, 73 NRC 548-49 (2011)

Tennessee Valley Authority (Yellow Creek Nuclear Plant, Units 1 and 2), ALAB-515, 8 NRC 702, 707 (1978)

an issue on appeal is not properly briefed by incorporating by reference papers filed with the licensing board; CLI-11-8, 74 NRC 219 n.13 (2011)

Texas Utilities Electric Co. (Comanche Peak Steam Electric Station, Unit 1), ALAB-868, 25 NRC 912, 924 n.42 (1987)

an issue on appeal is not properly briefed by incorporating by reference papers filed with the licensing board; CLI-11-8, 74 NRC 219 n.13 (2011)

Texas Utilities Electric Co. (Comanche Peak Steam Electric Station, Unit 2), CLI-93-2, 37 NRC 55, 59 n.4 (1993)

appellants seeking oral argument must show how oral argument will assist the Commission in reaching a decision; CLI-11-8, 74 NRC 220 (2011); CLI-12-12, 75 NRC 614 (2012)

Texas Utilities Electric Co. (Comanche Peak Steam Electric Station, Unit 2), CLI-93-4, 37 NRC 156, 165 (1993)

failure to demonstrate good cause for a late-filed contention requires a compelling showing on the remaining factors; CLI-12-15, 75 NRC 723 n.96 (2012)

Texas Utilities Electric Co. (Comanche Peak Steam Electric Station, Unit 2), CLI-93-10, 37 NRC 192 (1993)

controversy often ends during the pendency of appeals before the Commission or the Appeal Board; CLI-13-9, 78 NRC 558 (2013)

Texas Utilities Electric Co. (Comanche Peak Steam Electric Station, Unit 2), CLI-93-10, 37 NRC 192, 200 n.28 (1993)

because the plant is now permanently shut down and will not restart, no live controversy remains between the litigants; CLI-13-9, 78 NRC 557 (2013)

cases will be moot when the issues are no longer live, or the parties lack a cognizable interest in the outcome; CLI-13-9, 78 NRC 557 (2013)

in ruling on whether a contention is moot, boards look to whether an issue is still live, such that a party still has a legal interest in the issue; LBP-11-4, 73 NRC 127 (2011)

Texas Utilities Electric Co. (Comanche Peak Steam Electric Station, Unit 2), CLI-93-10, 37 NRC 192, 200 n.28 (1993)

absent compelling reasons, the Commission adheres to the case or controversy doctrine in its adjudicatory proceedings; LBP-13-7, 77 NRC 345 n.59 (2013)
**LEGAL CITATIONS INDEX**

**CASES**

*Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Unit 2), CLI-93-10, 37 NRC 192, 205 (1993)

...stare decisis is not implicated where the board decision is unreviewed and therefore not binding on future tribunals, but as a prudential matter, the Commission vacates such decisions when appellate review is cut short by mootness; CLI-11-8, 74 NRC 227 n.59 (2011)

*Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Unit 2), CLI-93-11, 37 NRC 251, 255 (1993)

...petitioner’s failure to specifically address the section 2.309(c)(1) factors in its motion to reopen is a potentially fatal omission; CLI-12-11, 75 NRC 528 (2012)

*Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Unit 2), CLI-93-11, 37 NRC 251, 263 (1993)

...section 2.342 does not apply to requests for stays of Commission decisions pending judicial review; CLI-12-11, 75 NRC 528 (2012)

*Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Unit 2), CLI-93-11, 37 NRC 251, 263-65 (1993)

...the Commission traditionally has entertained motions to stay agency action pending judicial review; CLI-12-11, 75 NRC 528 (2012)

*Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Unit 2), LBP-92-37, 36 NRC 370, 384 (1992)

...petitions that lack alleged facts or expert opinions to support the contention are inadmissible; LBP-11-29, 74 NRC 621 (2011)

*Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Units 1 and 2), CLI-88-12, 28 NRC 605, 609 (1988)

...burden is on intervenors to demonstrate that a balancing of the factors of 10 C.F.R. 2.309(c)(i)-(viii) weighs in favor of granting a late-filed petition; LBP-12-27, 76 NRC 594 (2012)

*Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Units 1 and 2), CLI-92-1, 35 NRC 1, 6 n.5 (1992)

...as long as license review is ongoing, the licensing proceeding is still in existence; CLI-12-14, 75 NRC 696 (2012)

...despite rulings dismissing a contention as moot and declining to admit two other contentions, the licensing proceeding remains in existence; LBP-11-22, 74 NRC 267 (2011)

*Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Units 1 and 2), CLI-92-12, 36 NRC 62, 68-69 (1992)

...the Commission generally declines to hold oral argument on appeals, absent a specific showing that oral argument will assist it in reaching a decision; CLI-11-8, 74 NRC 220 (2011); CLI-12-12, 75 NRC 614 (2012)

*Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Units 1 and 2), CLI-92-12, 36 NRC 62, 69-70 (1992)

...availability of new information may provide good cause for nontimely filing, but the test for good cause is not simply when the intervenor became aware of the material sought to be introduced but when the information became available and when the intervenor reasonably should have become aware of the information; LBP-11-7, 73 NRC 279 n.162 (2011)

...not only must intervenor act promptly after learning of new information, but the information itself must be new information, not information already in the public domain; LBP-11-7, 73 NRC 279-80 n.162 (2011)

*Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Units 1 and 2), CLI-92-12, 36 NRC 62, 69-73 (1992)

...petitioner must act reasonably and promptly after learning of the new information on which its motion to reopen is based; LBP-11-23, 74 NRC 328 (2011)

*Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Units 1 and 2), CLI-92-12, 36 NRC 62, 73 (1992)

...if intervenor fails to show good cause for a late filing, its demonstration on the other late-filing factors must be particularly strong; LBP-11-7, 73 NRC 280 (2011); LBP-11-15, 73 NRC 634-35 (2011); LBP-12-7, 75 NRC 510 (2012); LBP-12-9, 75 NRC 622 (2012)

458
Texas Utilities Generating Co. (Comanche Peak Steam Electric Station), ALAB-714, 17 NRC 86, 94 (1983) if a board were to adjudicate either the admissibility of a moot contention or the standing of a petitioner who sought to adjudicate a moot contention, it would be issuing an advisory opinion in derogation of Commission precedent; LBP-13-7, 77 NRC 345 (2013)

Texas Utilities Generating Co. (Comanche Peak Steam Electric Station, Units 1 and 2), CLI-81-24, 14 NRC 614 (1981) rulings seeking to invoke sua sponte review must be transmitted to the Commission for approval; LBP-11-9, 73 NRC 419 n.13 (2011)

Theodore Roosevelt Conservation Partnership v. Salazar, 616 F.3d 497, 517 (D.C. Cir. 2010) when the adequacy of an EIS mitigation strategy is challenged, the determining issue is whether the agency took a sufficiently hard look at environmental consequences, and ensured that its decision was supported by a completely informed record; LBP-15-17, 82 NRC 41 n.53 (2015)

Thomas v. Peterson, 753 F.2d 754, 758 (9th Cir. 1985) construction of a road to facilitate logging and the sale of timber from the logging are “connected actions” that have to be addressed in a single environmental impact statement; LBP-14-9, 80 NRC 41, 46 (2014)

Thomas v. Peterson, 753 F.2d 754, 759 (9th Cir. 1985) to determine whether interdependence exists among the various actions at issue, courts generally have looked to see whether the first action has independent utility; LBP-13-10, 78 NRC 147 (2013)

Thomas v. Peterson, 753 F.2d 754, 759-60 (9th Cir. 1985) for construction of a transmission corridor to constitute a connected action under 40 C.F.R. 1508.25, the corridor must lack independent utility, that is, its sole purpose must be serving the proposed nuclear power plant; LBP-14-9, 80 NRC 45 (2014)

Three Mile Island Alert v. NRC, 771 F.2d 720, 728 (3d Cir. 1985), cert. denied sub nom. Aamodt v. NRC, 475 U.S. 1082, rel’t’s denied, 476 U.S. 1179 (1986) in the context of a new contention filed after the initial petition, petitioner has an iron-clad obligation to examine the publicly available documentary material with sufficient care to enable it to uncover any information that could serve as the foundation for a specific contention; CLI-11-2, 73 NRC 339 n.22 (2011)

Toledo Edison Co. (Davis-Besse Nuclear Power Station), ALAB-300, 2 NRC 752, 758 (1975) board orders are appealable when they dispose of a major segment of the case or terminate a party’s right to participate; CLI-11-10, 74 NRC 255 (2011)

Toledo Edison Co. (Davis-Besse Nuclear Power Station), ALAB-300, 2 NRC 752, 761 (1975) specific regulations control over general regulations; CLI-15-10, 81 NRC 540 (2015)

Toledo Edison Co. (Davis-Besse Nuclear Power Station, Unit 1), ALAB-314, 3 NRC 98, 99 (1976) it is not the Commission’s role to monitor rulings that deal with reception of evidence and procedural framework under which it will be admitted on a day-to-day basis; CLI-15-24, 82 NRC 336 n.31 (2015)

Toledo Edison Co. (Davis-Besse Nuclear Power Station, Units 1, 2, and 3), ALAB-378, 5 NRC 557, 561 (1977) relitigation of an issue previously decided by a licensing board or the Commission may also be barred by the doctrine of collateral estoppel; LBP-11-10, 73 NRC 433 n.47 (2011)

Toledo Edison Co. (Davis-Besse Nuclear Power Station, Units 1, 2, and 3), ALAB-560, 10 NRC 265, 400 (1979) exception to the mootness doctrine is recognized when the same litigants are likely to be subject to similar future action; CLI-13-10, 78 NRC 568 (2013)

Toledo Edison Co. (Davis-Besse Nuclear Power Station, Units 1, 2, and 3), ALAB-560, 10 NRC 265, 400 & n.23 (1979) general proposition that an appeal is not moot if there is a possibility of similar acts recurring in the future applies to instances where the same litigants likely will be subject to similar future action; CLI-13-9, 78 NRC 557 (2013)
LEGAL CITATIONS INDEX

CASES

Tongass Conservation Society v. Cheney, 924 F.2d 1137, 1140 (D.C. Cir. 1991)
NEPA requires that an environmental review provide a sufficient discussion of alternatives to enable the decisionmaker to take a hard look at environmental factors, and to make a reasoned decision; LBP-11-13, 73 NRC 552 (2011)

Town of Huntington v. Marsh, 859 F.2d 1134, 1142 (2d Cir. 1988)
failure to include all connected actions within the scope of the proposed action is generally referred to as segmentation; LBP-14-6, 79 NRC 421 (2014); LBP-14-9, 80 NRC 41 (2014) for an environmental impact statement, separate actions may be considered connected if, among other things, they are interdependent parts of a larger action and depend on the larger action for their justification; LBP-11-10, 73 NRC 441 (2011) segmentation is to be avoided in order to ensure that interrelated projects, the overall effect of which is environmentally significant, not be fractionalized into smaller, less significant actions; LBP-14-6, 79 NRC 421 (2014) segmentation or piecemealing occurs when an action is divided into component parts, each involving action with less significant environmental effects; LBP-12-12, 75 NRC 778 n.204 (2012); LBP-14-6, 79 NRC 421 (2014); LBP-14-9, 80 NRC 41 (2014)

Town of Huntington v. Marsh, 884 F.2d 648, 651 (2d Cir. 1989)
immediate, irreparable harm is not presumed by a NEPA violation, even assuming such a violation has occurred; CLI-15-17, 82 NRC 40 n.45 (2015)

Town of Winthrop v. Federal Aviation Administration, 535 F.3d 1, 9-13 (1st Cir. 2008)
NECA need not supplement an environmental impact statement with information in an area of research that is still developing; CLI-12-6, 75 NRC 376 n.146 (2012); CLI-12-7, 75 NRC 392 n.48 (2012)

Town of Winthrop v. Federal Aviation Administration, 535 F.3d 1, 11 (1st Cir. 2008)
although there will always be more data that could be gathered, agencies must have some discretion to draw the line and move forward with decisionmaking; LBP-13-4, 77 NRC 211 (2013) NEPA allows agencies to select their own methodology as long as that methodology is reasonable; LBP-13-4, 77 NRC 211 (2013)

Town of Winthrop v. Federal Aviation Administration, 535 F.3d 1, 11-13 (1st Cir. 2008)
environmental impact statements are not intended to be research documents, reflecting the frontiers of scientific methodology, studies, and data; CLI-12-5, 75 NRC 341 (2012); LBP-13-4, 77 NRC 211 (2013) for a mitigation analysis, NEPA demands no fully developed plan or detailed examination of specific measures that will be employed to mitigate adverse environmental effects; LBP-11-23, 74 NRC 330 (2011) NEPA allows agencies to select their own methodology as long as that methodology is reasonable; LBP-11-7, 73 NRC 265 (2011); LBP-13-13, 78 NRC 287 n.193, 540 (2013) NEPA imposes on NRC a disclosure obligation that NRC publicly discuss its evaluation of the reasonably foreseeable effects of a proposed action; CLI-15-25, 82 NRC 396 n.46 (2015)

Town of Winthrop v. Federal Aviation Administration, 535 F.3d 1, 13 (1st Cir. 2008)
environmental impact statements are not intended to be research documents; LBP-15-3, 81 NRC 82 (2015) NEPA allows agencies to select their own methodology as long as that methodology is reasonable; CLI-12-6, 75 NRC 369 n.96 (2012)

Transnuclear, Inc. (Export of 93.15% Enriched Uranium), CLI-94-1, 39 NRC 1, 3 (1994) in assessing whether a petitioner has set forth a sufficient interest to quality for a hearing as a matter of right in a licensing proceeding, the Commission has long applied contemporaneous judicial concepts of standing; CLI-11-3, 73 NRC 621 (2011)

Transnuclear, Inc. (Export of 93.3% Enriched Uranium), CLI-99-15, 49 NRC 366, 367 (1999) essential to establishing standing are findings of injury, causation, and redressability; CLI-11-3, 73 NRC 621 (2011)

Transnuclear, Inc. (Export of 93.3% Enriched Uranium), CLI-99-15, 49 NRC 366, 368 (1999) where petitioners do not claim to have special knowledge on any of the issues raised by an import/export application or present any significant information not already available to and considered by the Commission in assessing the applications, a discretionary hearing would impose
LEGAL CITATIONS INDEX

CASES

unnecessary burdens on the participants without assisting in the Commission in making the requisite findings; CLI-11-3, 73 NRC 625 (2011)

_Transnuclear, Inc. (Export of 93.3% Enriched Uranium), CLI-00-16, 52 NRC 68, 72 (2000)_

where petitioners do not claim to have special knowledge on any of the issues raised by an import/export application or present any significant information not already available to and considered by the Commission in assessing the applications, a discretionary hearing would impose unnecessary burdens on the participants without assisting in the Commission in making the requisite findings; CLI-11-3, 73 NRC 625 (2011)

_Transnuclear, Inc._ v. _Trident Industries, Inc.,_ 725 F.2d 274, 279 (5th Cir. 1984)

summary disposition, like summary judgment, is an extreme remedy; LBP-11-7, 73 NRC 263 (2011)

_Treadway v. Gateway Oldsmobile Inc.,_ 362 F.3d 971, 976 (7th Cir. 2004)

licensing boards should not interpret regulatory text in a way that would essentially negate the stated purpose of the regulation or impute to the Commission an intent to create a schizophrenic rule; LBP-14-7, 79 NRC 475-76 (2014)

_Trout Unlimited v. Morton,_ 509 F.2d 1276, 1283 (9th Cir. 1974)

NEPA requirements are subject to a rule of reason, and an environmental impact statement need not address remote and highly speculative consequences; LBP-14-9, 80 NRC 45 n.107 (2014)

whether petitioner could be affected by the licensing action must be determined on a case-by-case basis, taking into account the petitioner’s distance from the source, the nature of the licensed activity, and the significance of the radioactive source; LBP-13-6, 77 NRC 271 n.5 (2013)

if proximity-based standing cannot be demonstrated, then standing must be established according to traditional principles of redressability, injury, and causation; LBP-12-3, 75 NRC 179 (2012)

where petitioner has made no effort to establish that any proximity plus presumption should be applicable in determining standing relative to the challenged licensing action, boards must look to traditional standing precepts of injury and causation, as well as redressibility, to determine whether a sufficient factual and legal demonstration of standing has been made; LBP-13-6, 77 NRC 271 n.5 (2013)

_U.S. Army Installation Command (Schofield Barracks, Oahu, Hawaii, and Pohakuloa Training Area, Island of Hawaii, Hawaii), CLI-10-20, 72 NRC 185, 189 (2010)_

if proximity-based standing cannot be demonstrated, then standing must be established according to traditional principles of redressability, injury, and causation; LBP-12-3, 75 NRC 179 (2012)

in lieu of the injury and causation showings for standing, petitioner has been able to establish proximity-plus by showing that the proposed licensing action involves a significant source of radiation that has an obvious potential for offsite consequences; LBP-12-3, 75 NRC 179 (2012); LBP-13-6, 77 NRC 271 n.5 (2013)

it is presumed that applicants intend to comply with state law; LBP-11-16, 73 NRC 678 n.185 (2011)
U.S. Army Installation Command (Schofield Barracks, Oahu, Hawaii, and Pohakuloa Training Area, Island of Hawaii, Hawaii), LBP-10-4, 71 NRC 216, 229 (2010), aff’d, CLI-10-20, 72 NRC 185 (2010) intervention petitioner’s burden is met if petitioner provides plausible factual allegations that satisfy each element of standing; LBP-12-3, 75 NRC 177 (2012); LBP-13-6, 77 NRC 270 (2013)

U.S. Army Installation Command (Schofield Barracks, Oahu, Hawaii, and Pohakuloa Training Area, Island of Hawaii, Hawaii), LBP-10-4, 71 NRC 216, 230 & n.14 (2010) if petitioner’s factual claims in support of its standing are contested, untenable, conjectural, or conclusory, a board need not uncritically accept such assertions, but may weigh those informational claims and exercise its judgment about whether standing has been satisfied; LBP-12-3, 75 NRC 177 (2012); LBP-13-6, 77 NRC 270 (2013)

petitioners considerably upgradient of a mining area must provide scientific or technical support for how contaminated material from an in situ recovery site might plausibly enter their drinking water to fulfill the causation element necessary to establish their standing; LBP-12-3, 75 NRC 182-83 (2012) whether petitioner could be affected by the licensing action must be determined on a case-by-case basis, taking into account the petitioner’s distance from the source, the nature of the licensed activity, and the significance of the radioactive source; LBP-13-6, 77 NRC 270 (2013)

U.S. Army (Jefferson Proving Ground Site), LBP-06-27, 64 NRC 438, 454 n.39 (2006) licensing boards may not assume that a licensee intends to contravene NRC regulations; LBP-15-24, 82 NRC 83 n.91 (2015)

U.S. Bancorp Mortgage Co. v. Bonner Mall Partnership, 513 U.S. 18, 23-24 (1994) vacatur is not automatic, but will depend on the nature and character of the conditions that have caused the case to become moot; CLI-13-9, 78 NRC 562 n.6 (2013)

U.S. Bancorp Mortgage Co. v. Bonner Mall Partnership, 513 U.S. 18, 25 (1994) denial of vacatur is merely one application of the principle that a suitor’s conduct in relation to the matter at hand may disentitle him to the relief he seeks; CLI-13-9, 78 NRC 562 (2013)

U.S. Department of Energy (Clinch River Breeder Reactor Plant), ALAB-721, 17 NRC 539, 544 (1983) in addressing the stay criteria in a Subpart L proceeding, litigant must come forth with more than general or conclusory assertions in order to demonstrate its entitlement to relief; LBP-15-2, 81 NRC 54 (2015)

U.S. Department of Energy (Clinch River Breeder Reactor Plant), CLI-82-23, 16 NRC 412, 421, remanded on other grounds, Natural Resources Defense Council, Inc. v. NRC, 695 F.2d 623 (D.C. Cir. 1982) for there to be any statutory right to a hearing on the granting of a rule exemption, such a grant must be part of a proceeding for the granting, suspending, revoking, or amending of any license or construction permit under the Atomic Energy Act; CLI-13-1, 77 NRC 10 n.37 (2013)

U.S. Department of Energy (Clinch River Breeder Reactor Plant), CLI-82-23, 16 NRC 412, 426, remanded on other grounds, Natural Resources Defense Council, Inc. v. NRC, 695 F.2d 623, 625 (D.C. Cir. 1982) exemption from the decommissioning financial assurance requirements is considered to be an extraordinary equitable remedy to be used only sparingly; CLI-13-1, 77 NRC 9 (2013)

U.S. Department of Energy (High-Level Waste Repository), CLI-04-32, 60 NRC 469, 473 (2004) in view of the uncertainty surrounding the application at issue, the Commission is reluctant to engage in review when its opinion might constitute a mere academic exercise; CLI-13-4, 77 NRC 105 (2013) issuance of advisory opinions is generally disfavored; CLI-13-4, 77 NRC 105 (2013)

U.S. Department of Energy (High-Level Waste Repository), CLI-06-5, 63 NRC 143, 154 (2006) interpretation of a regulation, like the interpretation of a statute, begins with the language and structure of the provision itself; LBP-14-4, 79 NRC 348 n.22 (2014)

U.S. Department of Energy (High-Level Waste Repository), CLI-08-12, 67 NRC 386, 393 (2008) filings not otherwise authorized by NRC rules are allowed only where necessity or fairness dictates; CLI-11-14, 74 NRC 807 (2011); CLI-14-3, 79 NRC 35 (2014)
if a board were to adjudicate either the admissibility of a moot contention or the standing of a petitioner who sought to adjudicate a moot contention, it would be issuing an advisory opinion in derogation of Commission precedent; LBP-13-7, 77 NRC 345 (2013)

issuance of advisory opinions is generally disfavored; CLI-13-4, 77 NRC 105 (2013)

petitioner may not rely on general allegations, but must show specific ties to NRC regulatory requirements or to safety in general to demonstrate a genuine dispute of fact or law; LBP-15-20, 81 NRC 848 n.105 (2015)

where neither the Commission nor any licensing board has had the opportunity to interpret the meaning of 10 C.F.R. 50.75(h)(5), a legal issue exists for the board to address; LBP-15-24, 82 NRC 102-03 (2015)

the Commission disfavors requests to invoke its inherent supervisory authority over adjudications; CLI-11-13, 74 NRC 637 n.11 (2011)

interpretation of statutes at issue and the regulations governing their implementation falls within the Commission’s province; LBP-15-5, 81 NRC 302 n.363 (2015)

external entities are not entitled to seek revisions to a Commission direction to the NRC Staff contained in a Staff Requirements Memorandum; CLI-15-19, 82 NRC 159 n.42 (2015)

rarely should the basis for a contention require more than a sentence or two; LBP-11-34, 74 NRC 699 n.89 (2011)

a test for materiality that would require petitioners to demonstrate quantitatively how an alleged defect would result in a violation of pertinent requirements is rejected; LBP-11-7, 73 NRC 292 n.250 (2011)

requiring petitioners to proffer additional and conclusive support for the effect of their proposed contention would improperly require boards to adjudicate the merits of contentions before admitting them; LBP-11-7, 73 NRC 292-93 n.252 (2011); LBP-11-21, 74 NRC 125 n.46 (2011); LBP-11-25, 74 NRC 397 n.111 (2011); LBP-15-20, 81 NRC 858 n.155 (2015)

intervenors may be granted standing based on purely economic interests; LBP-14-4, 79 NRC 352 (2014)

economic interests are sometimes insufficient to establish standing; LBP-14-4, 79 NRC 352 (2014)

NRC generally presumes that licensees will comply with its regulations; LBP-13-4, 77 NRC 218 n.95 (2013)

NRC generally presumes that licensees will comply with its regulations; LBP-15-16, 81 NRC 695 n.494 (2015)
LEGAL CITATIONS INDEX

CASES

licensing boards have authority to impose reasonable conditions on voluntary withdrawals in

standing was granted to a utilities commission based on injuries that would increase costs to regulated
utilities; LBP-14-4, 79 NRC 352 (2014)

in determining whether an individual member of an organization qualifies for standing in his or her
own right, NRC generally applies traditional judicial standing concepts; LBP-11-13, 73 NRC 545
(2011)
mere interest in a problem is not sufficient by itself to render the organization adversely affected or
aggrieved within the meaning of the Administrative Procedure Act; CLI-11-1, 73 NRC 622 n.41
(2011)

petitioner in materials licensing actions is entitled to a presumption of standing if petitioner resides in
the zone of reasonably foreseeable harm from the source of radioactivity and the proposed action
involves a significant source of radioactivity producing an obvious potential for offsite consequences;
LBP-12-24, 76 NRC 508 (2012)
proximity presumption is limited to reactor licensing proceedings and to other cases where there is an
obvious potential for offsite radiological consequences; LBP-14-4, 79 NRC 332 (2014)
when no proximity presumption applies, petitioner must assert some specific injury in fact that will
result from the action taken; CLI-11-3, 73 NRC 622 n.47 (2011)

in materials licensing matters, there is no predefined distance marking the area of potential offsite
consequences on which to establish standing and thus this must be judged on a case-by-case basis;
LBP-12-24, 76 NRC 508 (2012)
no proximity presumption applies in an import/export licensing case because petitioners have not
shown that the import or export involves a significant source of radioactivity producing an obvious
potential for offsite consequences; CLI-11-1, 73 NRC 622 (2011)

U.S. Department of Justice v. Julian, 486 U.S. 1, 8 (1988)
FOIA’s purpose is to encourage disclosure, and, to that end, its exemptions are to be interpreted
narrowly; LBP-13-5, 77 NRC 238 (2013)

the government has the burden of proving that a requested document falls within one of FOIA’s
exemptions; LBP-13-5, 77 NRC 238 (2013)

adjudicative bodies are to accord government records and official conduct a presumption of legitimacy;
LBP-12-14, 76 NRC 8 n.36 (2012)

FOIA’s purpose is to encourage disclosure, and, to that end, its exemptions are to be interpreted
narrowly; LBP-13-5, 77 NRC 238 (2013)

federal agencies must consider the likely environmental impacts of the preferred course of action as
well as reasonable alternatives; LBP-12-17, 76 NRC 81 (2012)
NEPA requires federal agencies to pause before committing resources to a project and consider the
likely environmental impacts of the preferred course of action as well as reasonable alternatives;
LBP-12-18, 76 NRC 159 (2012)

Council on Environmental Quality regulations receive substantial deference from federal courts;
LBP-12-17, 76 NRC 82 n.57 (2012)

rule of reason is inherent in NEPA and its implementing regulations; LBP-12-17, 76 NRC 82 n.52
(2012)

464
U.S. Energy Research and Development Administration (Clinch River Breeder Reactor Plant), CLI-76-13, 4 NRC 67, 77 (1976)
need-for-power forecasts are required only to be reasonable; LBP-12-5, 75 NRC 237 (2012)
U.S. Enrichment Corp. (Paducah, Kentucky Gaseous Diffusion Plant), CLI-01-23, 54 NRC 267, 272 (2001)
burden of setting forth a clear and coherent argument for standing is generally on petitioner, but pro se petitioner is not held to the same standards of clarity and precision to which a lawyer might reasonably be expected to adhere; CLI-15-25, 82 NRC 394-95 (2015)
in NRC proceedings, pro se litigants are generally not held to the same high standards of pleading and practice as parties with counsel; LBP-11-9, 73 NRC 408 (2011); LBP-11-20, 74 NRC 96 n.26 (2011); LBP-11-23, 74 NRC 333 n.23 (2011)
future cases are appropriately decided in the context of a concrete dispute, with self-interested parties vigorously advocating opposing positions; CLI-13-9, 78 NRC 557-58 (2013)
U.S. Postal Service v. Gregory, 534 U.S. 1, 10 (2001)
Staff’s deference to the expertise of other federal and state agencies to set and monitor the financial soundness of institutions issuing letters of credit is reasonable; CLI-11-4, 74 NRC 6 n.27 (2011)
U.S. Steel Mining Co., LLC v. Director, OWCP, 386 F.3d 977, 985 (11th Cir. 2004)
Millstone rule waiver decision, which aggregates cases interpreting the waiver standard, is an example of a uniform, permissible interpretation of NRC regulations; CLI-13-7, 78 NRC 205 n.19 (2013)
when an agency waives the deliberative process privilege for a document when it discloses the same document or one containing equivalent text, the question necessarily arises whether the agency has waived any deliberative process privilege that might otherwise apply; LBP-13-5, 77 NRC 244 (2013)
Union Electric Co. (Callaway Plant, Unit 1), ALAB-740, 18 NRC 343, 346 (1983)
demonstration of a pervasive failure to carry out the quality assurance program might well stand in the way of the requisite safety finding; LBP-14-7, 79 NRC 478 (2014)
Union Electric Co. (Callaway Plant, Unit 1), ALAB-750, 18 NRC 1205, 1210 n.11 (1983)
all parties, including NRC Staff, are obligated to bring any significant new information to the board’s attention; LBP-14-2, 79 NRC 243 (2014)
Union Electric Co. (Callaway Plant, Unit 1), CLI-15-11, 81 NRC 546 (2015)
contention that supplementation of the environmental impact statement is necessary to allow members of the public to lodge placeholder contentions challenging Commission reliance, in individual licensing proceedings, on the Continued Storage Rule and GEIS is denied; CLI-15-10, 81 NRC 538 n.7 (2015)
motion to reopen the record on claim that final environmental impact statement for combined license application violates National Environmental Policy Act by failing to consider the environmental impacts associated of continued storage of spent nuclear fuel is denied; CLI-15-12, 81 NRC 551 (2015)
contention that challenges an agency regulation does not raise an issue appropriately within the scope of an individual licensing proceeding and thus is not admissible absent a waiver; CLI-15-12, 81 NRC 553 (2015)
Union Electric Co. (Callaway Plant, Unit 1), CLI-15-11, 81 NRC 546, 549 (2015)
contention that does not engage the combined license application has not demonstrated a genuine dispute with applicant on a material issue; CLI-15-12, 81 NRC 554 (2015)
Union Electric Co. (Callaway Plant, Unit 1), CLI-15-11, 81 NRC 546, 549 n.17 (2015)
lack of an admissible contention necessarily precludes reopening the proceeding; CLI-15-12, 81 NRC 554 (2015)
LEGAL CITATIONS INDEX

CASES

Union Electric Co. (Callaway Plant, Unit 1), LBP-12-15, 76 NRC 14, 27 (2012)
petitioner that fails to provide sufficient factual or expert support for the claims in its contention in
corravention of section 2.309(f)(1)(v) also may have failed to show a genuine dispute with the
application as required under section 2.309(f)(1)(v); LBP-15-1, 81 NRC 38 (2015)

Union Electric Co. (Callaway Plant, Unit 1), LBP-12-15, 76 NRC 14, 34 (2012)
information request from NRC Staff is not an approval that needs to be listed in applicant’s
environmental report under 10 C.F.R. 51.45(d); LBP-15-27, 82 NRC 193 n.50 (2015)

Union Electric Co. (Callaway Plant, Unit 1), LBP-12-15, 76 NRC 14, 36 (2012)
admissible contention challenging consideration of alternatives must show that a particular alternative
was not discussed in the draft environmental impact statement and provide some support that the
alternative is reasonable; LBP-13-9, 78 NRC 89 (2013)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141 (2011)
motions and petitions related to the Fukushima events are denied as premature; CLI-12-7, 75 NRC
383-84 (2012)
new contentions on the safety and environmental implications of the NRC Task Force Report on the
Fukushima Dai-ichi accident are premature and must be denied on that basis without regard to any
other considerations; LBP-11-27, 74 NRC 595 (2011); LBP-11-37, 74 NRC 783 (2011)
NRC continues to comprehensively assess the accident at Fukushima, including carefully reviewing all
recommendations outlined by NRC’s Task Force studying the accident; CLI-12-10, 75 NRC 501
(2012)
 petitioner does not identify how the Fukushima accident paints a seriously different picture of the
environment, given the bounding severe accident scenarios assumed in the GEIS analysis and its
consideration of liquid pathways; CLI-12-15, 75 NRC 726 (2012)
petitions requesting suspension of all combined license decisions regarding pending completion of
actions associated with the Fukushima accident are granted in part and denied in part; CLI-12-2, 75
NRC 70 (2012); CLI-12-14, 75 NRC 696 n.31 (2012)
the Commission declined to suspend adjudications or any final licensing decisions because of the
Fukushima accident, finding no imminent risk to public health and safety or to common defense and
security; CLI-11-8, 74 NRC 232 (2011); CLI-11-10, 74 NRC 257 n.28 (2011); CLI-12-5, 75 NRC
349 (2012); CLI-12-11, 75 NRC 528 n.22 (2012)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 146 (2011)
requests to suspend ongoing adjudicatory and licensing activities pending full consideration of the
safety and environmental implications of the Fukushima accident are denied; LBP-11-34, 74 NRC
689 (2011)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 146 (2011)
NRC understanding of the details of the failure modes at the Fukushima Dai-ichi site continues to
evolve and NRC continues to learn more about the extent of the damage at the site; LBP-11-28, 74
NRC 607 (2011)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 146, 177-78 (2011)
request for suspension of proceedings and other relief after the Fukushima Dai-ichi accident was
denied; CLI-15-13, 81 NRC 564 n.42 (2015)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 147 (2011)
the Fukushima Task Force was to review NRC processes and regulations to determine, among other
things, whether the agency should make additional improvements to its regulatory system;
LBP-11-27, 74 NRC 594 (2011)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 147-48 & n.6 (2011)
any changes adopted as a result of the Fukushima accident or the Task Force Report can and will be
implemented through the normal regulatory process; LBP-11-28, 74 NRC 607 (2011); LBP-11-32, 74
NRC 659 (2011)
continued operation and continued licensing activities following the Fukushima accident do not pose
an imminent risk to public health and safety; CLI-13-2, 77 NRC 47 n.36 (2013)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 147-49 (2011)
in response to the Fukushima accident in Japan, NRC is conducting a comprehensive safety review of
the requirements and guidance associated with accident mitigation measures; CLI-12-1, 75 NRC 57
(2012)
NRC continues to consider the nuclear events in Japan, and the agency is in the process of implementing and prioritizing actions to be taken in response to the Fukushima accident; CLI-11-14, 74 NRC 812 n.66 (2011)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 148 (2011)
continued operation and licensing activities post-Fukushima do not pose an imminent risk to public health and safety; LBP-12-18, 76 NRC 133 (2012)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 151 (2011)
petitioners asserted that NRC actions following the events of September 11, 2001, and the accident at Fukushima Dai-ichi were insufficient to satisfy NRC’s general obligation under the Atomic Energy Act to protect public health and safety; CLI-15-4, 81 NRC 231 (2015)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 152-56 (2011)
Commission responses to requests for suspension of reactor licensing reviews and associated adjudications in the wake of the Three Mile Island accident 9/11 terrorist attacks are discussed; LBP-11-37, 74 NRC 784 n.8 (2011)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 152-57, 161-65 (2011)
decision to suspend final licensing decisions is highly dependent upon the facts and requires a judgment that the significance of the matter raised is so substantial as to warrant suspension; CLI-15-14, 81 NRC 736-37 (2015)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 158 (2011)
section 2.342(a) applies only to decisions or actions of a presiding officer or licensing board in a proceeding to which the movant is a party pending the filing and resolution of a petition for review; CLI-14-4, 79 NRC 252 (2014)
suspending a proceeding is a drastic action that will not be taken absent immediate threats to public health and safety or other compelling reason; CLI-14-7, 80 NRC 7 (2014); CLI-15-19, 82 NRC 158 (2015)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 158 & n.65 (2011)
as an exercise of the Commission’s inherent supervisory authority over agency proceedings, it need not address procedural issues that would merit further consideration in adjudications; CLI-12-16, 76 NRC 66 n.1 (2012)
because the Commission finds that the suspension petition and new contention fail on the merits, and it considers and takes action on the petition and motions in its supervisory capacity, it need not address procedural issues; CLI-15-4, 81 NRC 239 n.100 (2015)
three criteria are used to determine whether to suspend an adjudication; CLI-12-6, 75 NRC 373 (2012) where petition fails on the merits, the Commission need not address procedural issues; CLI-15-10, 81 NRC 539 n.8 (2015)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 158-59 (2011)
to determine whether suspension of an adjudication or licensing decision is warranted, the Commission considers whether moving forward will jeopardize the public health and safety, prove an obstacle to fair and efficient decisionmaking, or prevent appropriate implementation of any pertinent rule or policy changes; CLI-14-7, 80 NRC 7 (2014)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 159-66 (2011)
petitioners’ requests to suspend various licensing proceedings, pending completion of long-term analyses of the Fukushima events and the issuance of any resulting regulatory changes were denied; CLI-12-9, 75 NRC 437 (2012)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 161 (2011)
“imminent risk” reflects NRC’s determination that, post-Fukushima, continued operation of U.S. nuclear plants and continued licensing activities pose no imminent risk to public health and safety; CLI-15-19, 82 NRC 157-58 & n.33 (2015)
in the context of NRC’s post-Fukushima activities, nothing learned to date requires immediate cessation of NRC review of license applications; CLI-15-19, 82 NRC 158-59 (2015)
lack of a specific link between the relief requested and the particulars of the individual applications makes it difficult to conclude that moving forward with any individual licensing decision or proceeding will have a negative impact on public health and safety; LBP-11-35, 74 NRC 716 n.63 (2011)
no information that NRC has learned so far from the Fukushima accident puts into question the continued safety of currently operating regulated facilities, including reactors and spent fuel pools; CLI-12-10, 75 NRC 501 (2012)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 161-63 (2011)

there is no imminent safety reason to halt new reactor licensing because there is sufficient time to implement new Fukushima-related requirements before operation; CLI-12-2, 75 NRC 126 (2012)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 162-63 (2011)

NRC has in place well-established regulatory processes by which to impose any new Fukushima-related requirements or other enhancements that may be needed; CLI-12-2, 75 NRC 120 (2012); CLI-12-6, 75 NRC 375-76 (2012); CLI-12-9, 75 NRC 444 (2012)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 162-63, 166 (2011)

NRC has in place well-established regulatory processes by which to impose any new requirements or other enhancements that may be needed following completion of regulatory actions associated with the Fukushima events, CLI-12-3, 75 NRC 151 (2012)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 163 (2011)

for pending license renewal applications, where the period of extended operation will not begin for at least a year, there is no imminent threat to public health and safety that requires suspension of licensing proceedings or decisions; LBP-11-35, 74 NRC 710 (2011)

no imminent risk to public health and safety or to the common defense and security post-Fukushima necessitates suspensions; LBP-12-18, 76 NRC 133 (2012)

NRC has the authority to ensure that certified designs and combined licenses include appropriate Commission-directed changes before operation; CLI-11-6, 74 NRC 211 (2011); CLI-11-8, 74 NRC 232 (2011); CLI-11-10, 74 NRC 257 n.28 (2011)

petitioner’s request that the Commission defer a decision on the license renewal applications pending disposition of its forthcoming rulemaking and other potential events is premature and is therefore denied; CLI-14-6, 79 NRC 450 n.32 (2014)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 163-65 (2011)

it is unnecessary to cease current licensing activities because NRC has authority to, and will, address Fukushima-related matters with future rulemaking and requirements to be applied to then-operating plants if the information it obtains so warrants; LBP-11-35, 74 NRC 745 n.200 (2011)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 164 (2011)

it is in the public interest for adjudications to proceed, except for contentions associated with waste confidence issues; CLI-12-16, 76 NRC 67 n.7 (2012)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 164 (2011)

any rule or policy changes NRC may make as a result of its post-Fukushima review may be made irrespective of whether a license renewal application is pending, or whether final action on an application has been taken; CLI-12-6, 75 NRC 375 (2012)

events of Fukushima do not present a sufficiently grave threat to public safety that reactor licensing proceedings should be suspended; LBP-12-1, 75 NRC 35 n.59 (2012)

for license renewal safety review, it is not clear at this point whether any enhancements or changes considered by the Fukushima Task Force will bear on license renewal regulations, which are focused more narrowly on the proper management of aging; CLI-12-10, 75 NRC 501 (2012)

NRC’s ongoing regulatory and oversight processes provide reasonable assurance that each facility complies with its current licensing basis, which can be adjusted by future Commission order or by modification to the facility’s operating license outside the renewal proceeding; CLI-11-11, 74 NRC 458 (2011); CLI-12-3, 75 NRC 150 (2012); CLI-12-5, 75 NRC 349 (2012); CLI-12-6, 75 NRC 374 (2012); CLI-12-8, 75 NRC 419 (2012); LBP-11-35, 74 NRC 713 (2011)

the Commission does not believe that an imminent risk will exist during the time period needed to apply any necessary Fukushima-related changes to operating plants, whether a license renewal application is pending or not; LBP-11-35, 74 NRC 749 n.212 (2011)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 164-65 (2011)

speculative support for petitioners’ request that licensing decisions be put on hold until NRC has completed its Fukushima studies and developed appropriate information is insufficient; LBP-11-35, 74 NRC 749 n.211 (2011)
Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 166 (2011)

continuing licensing processes in accordance with current regulations pending completion of long-term analyses of the Fukushima events would cause no imminent risk to public health and safety because current regulations provide for incorporating new requirements into existing licenses as they are shown to be necessary; CLI-12-9, 75 NRC 437-38 (2012)

even for licenses that NRC issues before completing its review of hazards like those at Fukushima, any new Fukushima-driven requirements can be imposed later, if necessary, to protect the public health and safety; CLI-15-19, 82 NRC 158 n.39 (2015); LBP-11-35, 74 NRC 749 n.212 (2011); LBP-12-1, 75 NRC 22 n.83, 36 (2012)
moving forward with decisions and proceedings will have no effect on NRC’s ability to implement necessary rule or policy changes that might come out of its review of the Fukushima accident; LBP-11-32, 74 NRC 659 (2011); LBP-11-35, 74 NRC 710-11 (2011)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 166-67 (2011)

although the Task Force Report on the Fukushima accident did not justify initiating a generic NEPA review, the Commission acknowledged that new and significant information may come to light that must be considered in individual reactor licensing proceedings; LBP-11-32, 74 NRC 664 (2011)

Fukushima-related contentions are rejected as premature, and would not have addressed the reopening or contention admissibility standards, or the waiver petition; CLI-12-6, 75 NRC 355 n.33 (2012)

NRC need not conduct a separate generic NEPA analysis regarding whether the Fukushima events constitute new and significant information under NEPA that must be analyzed as a part of the environmental review for new reactor and license renewal decisions; LBP-11-32, 74 NRC 659 (2011)

request that NRC conduct a separate generic NEPA analysis regarding whether the Fukushima events constitute new and significant information under NEPA that must be analyzed as part of the environmental review for new reactor and license renewal decisions is premature; LBP-12-1, 75 NRC 25 (2012); LBP-12-18, 76 NRC 133 (2012)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 167 (2011)

because the full implications of the Fukushima events for U.S. facilities are unknown, any generic NEPA duty is premature; CLI-12-7, 75 NRC 389 (2012); LBP-11-27, 74 NRC 600-01 (2011); LBP-11-28, 74 NRC 608 (2011); LBP-11-32, 74 NRC 659 (2011); LBP-11-33, 74 NRC 682 (2011); LBP-12-8, 75 NRC 558 (2012)

events at Fukushima, and the ensuing NRC response, are not, at this point, to be considered new and significant information under NEPA; LBP-12-8, 75 NRC 559 (2012)

for our NEPA-based evaluations, if new and significant Fukushima-related information comes to light that is relevant to ongoing application-specific NEPA documents, NRC will evaluate the information as appropriate; CLI-12-7, 75 NRC 388 (2012); CLI-12-10, 75 NRC 501 (2012); LBP-11-33, 74 NRC 682 (2011)

NRC’s obligation to evaluate mitigation in an EIS for a new nuclear reactor license includes evaluating measures to mitigate the impact of severe accidents on public health and safety; LBP-12-18, 76 NRC 161 (2012)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 167, 170-71 (2011)

the Commission declined to provide guidance as to when a Fukushima contention, challenging an individual environmental impact statement, would be mature; LBP-11-32, 74 NRC 669 n.34 (2011)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 167-68 (2011)

an environmental issue is “significant” for the purposes of reopening a closed record if it will paint a seriously different picture of the environmental impact of the proposed project from what was previously envisioned; LBP-12-10, 75 NRC 656 (2012)

asserted new Fukushima-related information must present a seriously different picture of the environmental impact of the proposed project from what was previously envisioned; CLI-12-10, 75 NRC 501 (2012); LBP-12-1, 75 NRC 15 n.57, 26 n.2 (2012); CLI-12-13, 75 NRC 688 n.39 (2012)

new information requiring NRC Staff to prepare supplemental environmental review documents must present a seriously different picture of the environmental impact of the proposed project than what was previously envisioned; CLI-12-7, 75 NRC 388-89, 390-91 (2012); LBP-11-27, 74 NRC 601 (2011); LBP-11-28, 74 NRC 609 (2011); LBP-11-39, 74 NRC 868 (2011); LBP-12-18, 76 NRC 167 (2012)
requests for a generic NEPA analysis were premature where the NRC evaluation of the Fukushima Dai-ichi events was still ongoing; LBP-15-24, 82 NRC 97 n.191 (2015)

the measure of “significance” is whether the new information presents a seriously different picture of the environmental impact of the proposed project from what was previously envisioned; LBP-11-35, 74 NRC 751 n.218 (2011)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 168 (2011)

Fukushima-related environmental impacts are not so significant as to satisfy the Commission’s criterion for supplementing an environmental impact statement; LBP-12-18, 76 NRC 142 (2012)

the Commission declined to conduct a generic NEPA analysis on the effects of Fukushima-related events; CLI-12-7, 75 NRC 387 (2012)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 168, 176 (2011)

petitioners’ request for a safety analysis relative to Fukushima-related concerns was granted to the extent that the requested analyses had already been undertaken; CLI-12-9, 75 NRC 437 (2012)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 168-71 (2011)

if case-specific challenges to the waste confidence rule are appropriate for consideration, normal procedural rules will apply; CLI-12-16, 76 NRC 69 (2012)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 169 (2011)

bald allegations do not suffice to support contention admissibility; LBP-13-8, 78 NRC 14 (2013)

NRC regulations and case law already provide clear and uniform standards to determine the timeliness of motions to add new contentions on the Fukushima accident; LBP-11-32, 74 NRC 660 (2011)

NRC rules deliberately place a heavy burden on proponents of contentions, who must challenge aspects of license applications with specificity, backed up with substantive technical support, mere conclusions or speculation being insufficient; LBP-11-35, 74 NRC 718 n.70, 751 n.219 (2011)

speculation cannot be the basis for an admissible contention; LBP-12-27, 76 NRC 608 n.154, 611 (2012)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 170 (2011)

boards are encouraged to refer rulings that raise significant and novel legal or policy issues, the resolution of which would materially advance the orderly disposition of the proceeding; CLI-12-13, 75 NRC 685 n.23 (2012)

boards are encouraged to seek guidance from the Commission with regard to new contentions based on the Fukushima accident; LBP-11-32, 74 NRC 671 (2011)

individual reactor adjudications should go forward, including those that may involve proposed contentions based on issues implicated by the Fukushima events; LBP-11-32, 74 NRC 660 (2011)

NRC procedural rules contain ample provisions through which litigants may seek admission of new or amended contentions, seek stays of licensing board decisions, appeal adverse decisions, and file motions to reopen the record, as appropriate; CLI-12-3, 75 NRC 141 (2012); CLI-12-13, 75 NRC 689 (2012); LBP-12-18, 76 NRC 133 (2012)

raising new issues related to the Fukushima events does not warrant new procedures or a separate timetable; CLI-12-6, 75 NRC 363 n.50 (2012)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 170 & n.120 (2011)

licensing boards applied existing procedural rules to new contentions and motions to reopen filed in response to the Three Mile Island accident and the September 11, 2001, terrorist attacks; CLI-12-13, 75 NRC 689 (2012)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 171 (2011)

for Fukushima-related contentions the Commission will monitor its proceedings and issue additional guidance as appropriate; CLI-12-3, 75 NRC 153 (2012)

in the future the Commission might provide relevant guidance regarding the proper time frame for adjudicating Fukushima-related contentions; LBP-11-39, 74 NRC 871 n.42 (2011)

neither new procedures nor a separate timetable for raising new issues related to the Fukushima events are warranted; CLI-12-3, 75 NRC 141 (2012); CLI-12-13, 75 NRC 689 (2012); CLI-12-15, 75 NRC 713 n.43 (2012)

Union Electric Co. (Callaway Plant, Unit 2), CLI-11-5, 74 NRC 141, 171-72 (2011)

request to suspend this license renewal proceedings is denied; CLI-12-6, 75 NRC 360 n.33 (2012)
when considering stays or other forms of temporary injunctive relief, the Commission has applied the stay factors outlined in 10 C.F.R. 2.342(e), which restate commonplace principles of equity; 

Union Electric Co. (Callaway Plant, Unit 2), CLI-14-6, 79 NRC 449 n.30 (2014)

for suspension of licensing proceedings, petitioners must show that continuation of proceedings, pending consideration of a rulemaking petition, would jeopardize the public health and safety, prove an obstacle to fair and efficient decisionmaking, or prevent appropriate implementation of any pertinent rule or policy changes that might emerge from NRC’s continued evaluation of the impacts of the Fukushima accident; LBP-11-33, 74 NRC 679 n.5 (2011); LBP-11-34, 74 NRC 691 (2011)

if NRC determines that changes to its current environmental assessment rules are warranted, it can revisit whether an individual licensing review or adjudication should be held in abeyance pending the outcome of a relevant rulemaking; CLI-14-7, 80 NRC 9 (2014)

petitioners have not shown compelling circumstances requiring NRC to suspend final licensing decisions pending completion of rulemaking; CLI-14-7, 80 NRC 9 (2014)

spent fuel storage pool matters will be addressed, if studies of implications from Fukushima warrant, through more generic regulatory reform; LBP-11-35, 74 NRC 717 (2011)

given that NRC will have the opportunity to further consider the concerns that rulemaking petitioners have expressed, and as it further considers actions related to the Fukushima events, it declines to suspend any proceeding pending resolution of the rulemaking petition; CLI-14-7, 80 NRC 8 n.31 (2014)

request to suspend licensing and rulemaking activities pending completion of the NRC Task Force’s evaluation of the implications of the Fukushima accident and issuance of any proposed regulatory decisions and/or environmental analyses is denied; LBP-12-18, 76 NRC 133 (2012)

Fukushima-related contentions were denied as premature; LBP-11-36, 74 NRC 770 (2011)

Fukushima-related petitions for suspension of proceeding and rescission of regulations that make generic conclusions about environmental impacts of severe reactor and spent fuel pool accidents and that preclude consideration of those issues in individual licensing proceedings are denied; LBP-11-33, 74 NRC 678 (2011); LBP-11-39, 74 NRC 865 n.5 (2011)

parties were not permitted to raise issues or there was no opportunity for hearing on a particular issue; LBP-11-20, 74 NRC 91 n.3 (2011)

design basis is the set of regulations adopted without regard to their cost as fundamentally required for all NRC standards that set requirements for adequate protection of health and safety; LBP-12-18, 76 NRC 135 (2012)

the Commission cannot restrict the opportunity for a hearing so much that it effectively removes from the hearing issues that are material to the licensing decision; CLI-12-14, 75 NRC 698 (2012); LBP-11-22, 74 NRC 282 (2011)
LEGAL CITATIONS INDEX

CASES

Union of Concerned Scientists v. NRC, 880 F.2d 552, 558 (D.C. Cir. 1989)

determination of what constitutes adequate protection under the Atomic Energy Act, absent specific
guidance from Congress, is just such a situation where NRC should be permitted to have discretion
to make case-by-case judgments; LBP-14-1, 79 NRC 51 n.57 (2014)

Union of Concerned Scientists v. NRC, 920 F.2d 50, 55 (D.C. Cir. 1990)

a licensing hearing does not embrace anything new revealed in the safety evaluation report or the
NEPA documents; CLI-12-14, 75 NRC 701 n.57 (2012)

argument that applying heightened late-filing standards to contentions triggered by NRC Staff’s review
documents violates a petitioner’s AEA hearing rights has been considered and rejected; CLI-12-14,
75 NRC 700-01 (2012)

intervenor is not entitled to NRC Staff’s review documents as a discovery tool; CLI-12-17, 76 NRC
210-11 (2012)

Union of Concerned Scientists v. NRC, 920 F.2d 50, 55 n.4 (D.C. Cir. 1990)

for contentions that fall within the facility’s current licensing basis, petitioner may seek action on its
concerns by either filing a petition for rulemaking under 10 C.F.R. 2.802 or submitting an
enforcement petition under 10 C.F.R. 2.206; LBP-11-21, 74 NRC 134 n.115 (2011)

Union of Concerned Scientists v. NRC, 920 F.2d 50, 55-56 (D.C. Cir. 1990)

AEA does not guarantee all private parties the right to have NRC Staff studies as a sort of
precomplaint discovery tool; CLI-12-14, 75 NRC 701 (2012)

agencies have discretion on the manner in which they determine whether information is new or
significant to warrant supplementation of an environmental impact statement, including the
application of its procedural rules; CLI-12-3, 75 NRC 140 n.42 (2012); CLI-12-6, 75 NRC 364
(2012)

NRC may impose reasonable requirements on new contentions when those requirements are related to
legitimate agency goals such as avoiding needless duplication and delay; LBP-11-22, 74 NRC 282
(2011)

United States Department of Energy (Clinch River Breeder Reactor Plant), ALAB-755, 18 NRC 1337,

stare decisis is not implicated where the board decision is unreviewed and therefore not binding on
future tribunals, but as a prudential matter, the Commission vacates such decisions when appellate
review is cut short by mootness; CLI-13-9, 78 NRC 558-59 (2013)

United States Energy Research and Development Administration (Clinch River Breeder Reactor Plant),
CLI-76-13, 4 NRC 67, 77 (1976)

regardless of whether NRC itself conducts the need-for-power assessment or relies on another agency’s
forecasts and studies, that assessment need only be reasonable; LBP-11-7, 73 NRC 283 (2011)

agencies of the government must scrupulously observe the rules, regulations, or procedures that it has
established; LBP-14-2, 79 NRC 244 (2014)

United States v. 5800 SW 74th Ave., 363 F.3d 1099, 1101-02 (11th Cir. 2004)

where a nonmoving party declines to oppose a motion for summary disposition, the board shall accept
as admitted the moving party’s prima facie showing of material facts, but boards cannot grant
summary disposition unless movant discharges its burden of demonstrating that it is entitled to a
decision as a matter of law; LBP-12-4, 75 NRC 219 (2012)

United States v. Alexander, 326 F.2d 736, 741 (5th Cir. 1964)

in absence of objection, hearsay evidence is treated as being properly admitted and may be given such
probative effect and value to which it is entitled; LBP-15-20, 81 NRC 859 n.184 (2015)

NRC’s statutory authority to adopt rules of general application entails a concomitant authority to
provide exemption procedures in order to allow for special circumstances; CLI-13-1, 77 NRC 9
(2013)

United States v. Bosurgi, 530 F.2d 1105, 1110 (2d. Cir. 1976)

summary disposition, like summary judgment, is an extreme remedy; LBP-11-7, 73 NRC 263 (2011)

United States v. Carney, 468 F.2d 354, 357 (8th Cir. 1972)

in absence of objection, hearsay evidence is treated as being properly admitted and may be given such
probative effect and value to which it is entitled; LBP-15-20, 81 NRC 859 n.184 (2015)
a presumption of regularity attaches to the actions of government agencies; CLI-11-4, 74 NRC 6 n.27 (2011)
in assessing whether applicant/licensee adequately carries out a licensing directive, boards are to assume that NRC Staff will be fair and judge the matter of an applicant/licensee’s compliance on the merits; LBP-15-3, 81 NRC 141 n.66 (2015)

licensee’s failure to claim that a subpoena violates First Amendment rights or assert that any other legally protectable interest including the right to be free from an unduly burdensome subpoena has been infringed obviates the need to evaluate the agency’s need for the information at issue or the existence of a less restrictive alternative for obtaining it; CLI-13-5, 77 NRC 228 (2013)

NRC subpoena was upheld notwithstanding assertion of First Amendment freedom of association rights, where the subpoena was narrowly tailored to documents supporting specific allegations; CLI-13-5, 77 NRC 227 n.15 (2013)

under appropriate circumstances First Amendment rights give way to the compelling government interest in nuclear safety; CLI-13-5, 77 NRC 227 (2013)

agencies are required to use alternative means for obtaining information to avoid unnecessary infringement of First Amendment associational rights; CLI-13-5, 77 NRC 230 (2013)

NRC subpoenas have been quashed or limited when the subpoena was not closely drawn or NRC did not consider alternative means for obtaining the requested information to avoid unnecessary infringement of First Amendment associational rights; CLI-13-5, 77 NRC 227 (2013)

agencies of the government must scrupulously observe the rules, regulations, or procedures that it has established; LBP-14-2, 79 NRC 244 (2014)

elements of a showing of estoppel against the government are described; LBP-12-16, 76 NRC 51 (2012)
there is a clear presumption against invoking the estoppel doctrine against government actors in any but the most extreme circumstances; LBP-12-16, 76 NRC 51 (2012)

United States v. Idaho, 135 Idaho 655, 661 (2001)
the purpose of the Migratory Bird Conservation Act is to provide sanctuaries where birds cannot be molested by hunters; LBP-11-16, 73 NRC 689 (2011)

the primary purpose of the Migratory Bird Conservation Act will not be defeated without a federal reserved water right; LBP-11-16, 73 NRC 689 (2011)

United States v. Jamerson, 549 F.2d 1263, 1266-67 (9th Cir. 1977)
objection not timely made is waived; LBP-15-20, 81 NRC 859 n.184 (2015)

harming Native American artifacts would constitute an irreparable injury because artifacts are, by their nature, unique, and their historical and cultural significance make them difficult to value monetarily; LBP-15-2, 81 NRC 55 n.54 (2015)

government fulfills its trust duties by executing federal law, not by waiving federal law; LBP-14-16, 80 NRC 196 (2014)

waivers of the government’s sovereign immunity, to be effective, must be unequivocally expressed; LBP-11-8, 73 NRC 360 (2011)

a court cannot defer to interpretive proposals offered by counsel at oral argument and affirm on the basis of that reading when the statute does not plainly compel the reading being proposed; CLI-11-12, 74 NRC 470-71 (2011)

statutes must, if possible, be construed so that every word has operative effect; LBP-12-19, 76 NRC 196 (2012)

the federal government bears a trust responsibility to Native American tribes, and the NRC, as a federal agency, owes a fiduciary duty to tribes and their members; LBP-11-30, 74 NRC 632 (2011)

administrative subpoena duces tecum is judicially enforceable where the inquiry is within the authority of the agency, the demand for production is neither too indefinite nor unreasonably broad nor burdensome, and the information sought is reasonably relevant to the authorized inquiry; CLI-13-5, 77 NRC 227 (2013)

United States v. New Mexico, 458 U.S. 696, 700 & n.4 (1978)
where the federal government reserves land, a water right may be implied only where the underlying purposes of the reservation of land are entirely defeated absent such a water right; LBP-11-16, 73 NRC 689 (2011)

United States v. Oncology Services Corp., 60 F.3d 1015, 1020 (3d Cir. 1995)
administrative subpoena duces tecum is judicially enforceable where the inquiry is within the authority of the agency, the demand for production is neither too indefinite nor unreasonably broad nor
burdensome, and the information sought is reasonably relevant to the authorized inquiry; CLI-13-5, 77 NRC 227 (2013)

**United States v. Paisley**, 957 F.2d 1161, 1163-64 (4th Cir. 1992)

the term “incurred” within the context of Equal Access to Justice Act means that an individual who is a prevailing party meeting the financial qualification of the EAJA is ineligible to receive an EAJA award when that individual was not responsible for the costs of the attorney’s fees; LBP-11-8, 73 NRC 363 (2011)

**United States v. Paisley**, 957 F.2d 1161, 1164 (4th Cir. 1992)

claimant with a legally enforceable right to full indemnification of attorney fees from a solvent third party cannot be deemed to have incurred that expense for purposes of the Equal Access to Justice Act, hence is not eligible for an award of fees under that Act; LBP-11-8, 73 NRC 363 (2011)

**United States v. Roses Inc.**, 706 F.2d 1563, 1567 (Fed. Cir. 1983)

presumption of regularity does not help to sustain an action that on its face appears irregular, and if it appears irregular, it is irregular, and the burden shifts to the proponent to show the contrary; LBP-14-2, 79 NRC 151 (2014)

usual rule of regulatory interpretation is that different language is intended to mean different things, and thus a demand for a hearing is not to be treated as a mere request for a hearing; LBP-13-5, 77 NRC 90 (2013)

**United States v. Thouvenot, Wade & Moerschen, Inc.**, 596 F.3d 378, 383 (7th Cir. 2010)

an award of attorneys’ fees under the Equal Access to Justice Act can include fees paid by a third-party liability insurer; LBP-11-8, 73 NRC 365 n.74 (2011)

in an actuarial sense the cost of the defense, to the extent borne by the insurance company, is a cost that the insured paid for, just as he would have paid a lawyer for his defense had he had no insurance; LBP-11-8, 73 NRC 365 (2011)

nothing in the Equal Access to Justice Act suggests a purpose to prevent a contractual agreement, or more broadly, to discourage the purchase of liability insurance; LBP-11-8, 73 NRC 365 (2011)

because the UFSAR updated under section 50.71(e) also includes changes the agency approved by the license amendment process under section 50.90, challenges under 10 C.F.R. 50.59 would have the agency effectively approve these changes for a second time, without apparent purpose or effect; CLI-15-14, 81 NRC 748 (2015)

**United States v. Westinghouse Electric Corp.**, 788 F.2d 164, 166 (3d Cir. 1986)

administrative subpoena duces tecum is judicially enforceable where the inquiry is within the authority of the agency, the demand for production is neither too indefinite nor unreasonably broad nor burdensome, and the information sought is reasonably relevant to the authorized inquiry; CLI-13-5, 77 NRC 227 (2013)

*stare decisis* is not implicated where the board decision is unreviewed and therefore not binding on future tribunals, but as a prudential matter, the Commission vacates such decisions when appellate review is cut short by mootness; CLI-13-9, 78 NRC 558-59 (2013)

**USEC Inc.** (American Centrifuge Plant), CLI-05-11, 61 NRC 309, 311 (2005)

in cases involving the possible construction or operation of a nuclear power reactor, the NRC considers proximity to the proposed facility to be sufficient to establish standing; LBP-11-16, 73 NRC 653 (2011)

**USEC Inc.** (American Centrifuge Plant), CLI-05-11, 61 NRC 309, 314 (2005)

Atomic Energy Act authorizes NRC to accord protection from radiological injury to both health and property interests, and thus a genuine property interest is sufficient to accord petitioner proximity-based standing; LBP-15-17, 81 NRC 776 (2015)

proximity presumption applies to persons who have a significant property interest in the area near a nuclear power plant; LBP-15-17, 81 NRC 770, 775 (2015)

failure of organization member to provide an exact address in her affidavit is not a limiting concern; LBP-15-17, 81 NRC 776 n.144 (2015)
a contention of omission may be summarily rejected as inadmissible if there is no requirement to address the topic allegedly omitted from the application or the topic that allegedly is omitted is, in fact, included in the application; LBP-11-6, 73 NRC 235 (2010)

if petitioner believes that an application fails to contain information on a relevant matter as required by law, the contention must identify each failure and the supporting reasons for the petitioner’s belief; LBP-11-6, 73 NRC 214 (2010)

contentions must make clear why cited references provide a basis; CLI-12-5, 75 NRC 332 n.189 (2012)

it is insufficient for petitioner to point to an Internet website or article and expect the board on its own to discern what particular issue a petitioner is raising, including what section of the application, if any, is being challenged as deficient and why; LBP-11-6, 73 NRC 228 n.91 (2010)

it is not up to boards to search through pleadings or other materials to uncover arguments and support never advanced by intervenors; LBP-11-34, 74 NRC 697 (2011)

licensing boards are expected to examine cited materials to verify that they do, in fact, support a contention; CLI-15-22, 82 NRC 320 n.68 (2016)

petitioner is obliged to present factual allegations and/or expert opinion necessary to support its contention; CLI-12-3, 75 NRC 191 (2012); LBP-12-15, 76 NRC 26 (2012); LBP-12-27, 76 NRC 595 (2012); LBP-13-6, 77 NRC 285 (2013); LBP-15-1, 81 NRC 38 (2015)

petitioners have an affirmative obligation to request confidential and proprietary information that has not been made publicly available in order to support a proposed contention; LBP-11-9, 73 NRC 405, 416 (2011)

any contention that fails to directly controvert the application or environmental impact statement, or mistakenly asserts the application does not address a relevant issue, will be dismissed; LBP-12-3, 75 NRC 192 (2012); LBP-12-15, 76 NRC 27 (2012); LBP-12-27, 76 NRC 595 (2012); LBP-13-6, 77 NRC 285-86 (2013); LBP-15-1, 81 NRC 37 (2015)

a conclusory assertion, even if made by an expert, is inadequate because it deprives the board of the ability to make the necessary, reflective assessment of the opinion; LBP-15-17, 81 NRC 783 (2015)

expert opinion that merely states a conclusion, e.g., the application is “deficient,” “inadequate,” or “wrong” without providing a reasoned basis or explanation for that conclusion is inadequate because it deprives the board of the ability to make the necessary, reflective assessment of the opinion; CLI-15-23, 82 NRC 328 (2015); LBP-15-26, 82 NRC 178 n.31 (2015)

neither speculation nor conclusory assertions, even by an expert, alleging that a matter fails to satisfy the AEA or NEPA will suffice to allow admission of a proffered contention; LBP-12-15, 76 NRC 26 (2012); LBP-12-27, 76 NRC 595 (2012); LBP-13-6, 81 NRC 38-39, 42 (2015)

petitioner cannot cure a deficient contention with new arguments not presented in the initial petition; LBP-15-4, 81 NRC 174 n.103 (2015)
petitioners cannot use a reply brief to introduce wholly new arguments not presented in the initial petition; CLI-15-20, 82 NRC 230 n.124 (2015)

USEC Inc. (American Centrifuge Plant), CLI-08-10, 63 NRC 451, 477 (2006)

contentions admitted for litigation must point to a deficiency in the application, and not merely suggest other ways an analysis could have been done, or other details that could have been included; CLI-12-5, 75 NRC 323 (2012)

USEC Inc. (American Centrifuge Plant), CLI-06-10, 63 NRC 451, 480 (2006)

contentions must be based on a genuine material dispute, not the possibility that petitioners, if they perform their own additional analyses, may ultimately disagree with the application; LBP-14-6, 79 NRC 442 (2014)

USEC Inc. (American Centrifuge Plant), CLI-06-9, 63 NRC 433, 437 (2006)

contention admissibility standards are deliberately strict, and any contention that does not satisfy NRC requirements will be rejected; CLI-11-8, 74 NRC 228 (2011); LBP-15-19, 81 NRC 820 (2015)

contention admissibility standard is strict by design; LBP-15-23, 82 NRC 59 (2015); LBP-15-26, 82 NRC 174 (2015)

failure to comply with any of the admissibility criteria of 10 C.F.R. 2.309(f)(1) is grounds for rejection of a contention; LBP-12-7, 75 NRC 511 (2012); LBP-12-9, 75 NRC 622 (2012)

USEC Inc. (American Centrifuge Plant), CLI-06-9, 63 NRC 433, 439 (2006)

replies may not contain new information that was not raised in either the petition or answers, but arguments that respond to the petition or answers are not precluded, whether they are offered in rebuttal or in support; CLI-11-14, 74 NRC 809 n.45 (2011)

the board is the agency’s expert body on matters of contention admissibility, and the Commission generally defers to its judgment on such matters; CLI-12-14, 75 NRC 702 (2012)

USEC Inc. (American Centrifuge Plant), CLI-06-9, 63 NRC 433, 444-45 (2006)

resolution of a mooted contention requires no more than a finding by the presiding officer that the matter has become moot; LBP-12-5, 75 NRC 238 (2012)

USEC Inc. (American Centrifuge Plant), CLI-06-9, 63 NRC 433, 448 (2006)

NRC’s NEPA responsibilities to conduct a rigorous and objective review are described; LBP-12-9, 75 NRC 626 n.16 (2012)

USEC Inc. (American Centrifuge Plant), CLI-06-9, 63 NRC 433, 463 (2006)

terrorist and nuclear nonproliferation issues are dependent upon the actions and decisions of the President, Congress, international organizations, and officials of other nations, and constitute issues of international policy unrelated to the NRC’s licensing criteria; LBP-12-21, 76 NRC 241-42 (2012)

this decision may be relied upon as precedent for licensing of a uranium enrichment facility; LBP-12-21, 76 NRC 233 (2012)

petitioners are not required at the contention admission stage to prove the case on the merits or even to provide expert or factual support as strong as that necessary to withstand a summary disposition motion; LBP-15-20, 81 NRC 851, 855 (2015)

boards must not adjudicate the merits of allegations at the contention admissibility stage, but, to be admissible, a contention must provide more than a bare assertion, and must explain the supporting reasons for the dispute raised; LBP-11-16, 73 NRC 667 (2011)

past violations of NRC regulations would indicate a deficiency in an application only if they are directly germane to the licensing action, rather than being of simply historical interest; CLI-12-2, 75 NRC 83-84 (2012)

USEC Inc. (American Centrifuge Plant), LBP-07-6, 65 NRC 429 (2007)

mandatory proceedings for licensing of proposed uranium enrichment facility sites were conducted; LBP-11-11, 73 NRC 475 (2011)
USEC Inc. (American Centrifuge Plant), LBP-07-6, 65 NRC 429, 440 n.31 (2007)
although boards may give reasonable deference to NRC guidance, such guidance does not substitute
for regulations, is not binding authority, and does not prescribe NRC requirements; LBP-11-16, 73
NRC 670, 674 (2011)
regulatory guidance is not binding on applicants; LBP-11-16, 73 NRC 661 (2011)
USEC Inc. (American Centrifuge Plant), LBP-07-6, 65 NRC 429, 442-46 (2007)
license conditions imposed on an applicant as a result of NRC Staff’s review process and
applicant-requested exemptions from agency regulatory requirements that are granted by Staff have a
strong potential to fall into a “non-routine matter” category; LBP-11-11, 73 NRC 494-95 (2011)
USEC Inc. (American Centrifuge Plant), LBP-07-6, 65 NRC 429, 451 (2007)
NRC requires a contingency factor for decommissioning funds to provide for unforeseen events that
may happen during operations or decommissioning that could increase the overall costs of this
all credible accident sequences were identified in the ISA Summary as well as items relied on for
safety and necessary safety controls; LBP-12-21, 76 NRC 239 (2012)
USEC Inc. (American Centrifuge Plant), LBP-07-6, 65 NRC 429, 466 (2007)
differing professional opinion did not preclude the agency from conducting licensing reviews or
making licensing decisions prior to a resolution of the DPO by the NRC Staff; LBP-12-21, 76 NRC
239 (2012)
USEC Inc. (American Centrifuge Plant), LBP-07-6, 65 NRC 429, 473 (2007)
previously recognized availability policy for domestic enrichment services supports a NEPA finding of
a need for the construction and operation of uranium enrichment facilities; LBP-11-26, 74 NRC 533
(2011)
Utahans for Better Transportation v. U.S. Department of Transportation, 305 F.3d 1152, 1172 (10th Cir.
2002)
aesthetic impacts of energy sources may vary according to individual location; LBP-11-4, 73 NRC 112
(2011)
reviewing proposed actions improperly intrudes into the agency’s decisionmaking process; LBP-15-15,
81 NRC 610 (2015)
Valley Community Preservation Commission v. Mineta, 373 F.3d 1078, 1085 (10th Cir. 2004)
National Historic Preservation Act and its implementing regulations do not require that the agency
implement any mitigation measures, let alone that those measures meet a certain standard of
protection for historic properties; LBP-12-23, 76 NRC 489 n.289 (2012)
Vaughn v. Rosen, 484 F.2d 820 (D.C. Cir. 1973)
to qualify for deliberative process privilege, documents must be generated as part of a definable
decisionmaking process that results in a final agency decision and must reflect the flow of opinions,
recommendations, or advice between policymakers in formulating some type of definitive and
conclusive ruling; LBP-13-5, 77 NRC 239 (2013)
Vermont Department of Public Service v. United States, 684 F.3d 149, 156 (D.C. Cir. 2012)
in an action under the Hobbs Act for review of an NRC final order, exhaustion of remedies is not a
jurisdictional requirement; LBP-14-9, 80 NRC 69 (2014)
(1978)
NRC’s environmental analysis need only consider environmental impacts that are reasonably
foreseeable, and need not consider remote and speculative scenarios; LBP-11-16, 73 NRC 690-91
(2011)
(1978)
formal adjudicatory procedures are inappropriate in export or import licensing proceedings; CLI-11-3,
73 NRC 623-24 n.53 (2011)
LEGAL CITATIONS INDEX

CASES

NEPA does not mandate how an agency must fulfill its obligations under the statute; LBP-11-23, 74 NRC 331 (2011)

final environmental impact statements need not discuss remote and speculative alternatives, but must consider only alternatives that bring about the ends of the proposed project; LBP-12-17, 76 NRC 113 (2012)
if impacts are remote or speculative, the environmental impact statement need not discuss them, including greenhouse gas emissions; LBP-11-7, 73 NRC 301 n.314 (2011)
it is not necessary that every alternative device and thought conceivable by the mind of man be considered, but a hard look must be taken at the environmental consequences; LBP-12-1, 75 NRC 35 (2012)
NEPA documents need consider only those environmental impacts that are reasonably foreseeable, not those that are remote and speculative possibilities; LBP-12-9, 75 NRC 623 (2012)
remote and speculative alternatives need not be addressed in a final environmental impact statement, but NEPA requires NRC Staff to consider reasonable alternatives that are likely to be available within the time frame of the proposed action; LBP-12-17, 76 NRC 115 (2012)
remote and speculative alternatives need not be addressed in an applicant’s environmental report; CLI-12-5, 75 NRC 340 (2012); LBP-11-2, 73 NRC 51 (2011)
to make an impact statement something more than an exercise in frivolous boilerplate, the concept of alternatives must be bounded by some notion of feasibility; LBP-13-4, 77 NRC 120 n.24 (2013), 210 n.84 (2013)
under the rule of reason governing NEPA, the concept of alternatives must be bounded by some notion of feasibility; CLI-12-15, 75 NRC 724 (2012)

the concept of alternatives evolves, and agencies must explore alternatives as they become better known and understood; LBP-11-13, 73 NRC 562 (2011)

it is NRC Staff, not petitioners, that has the burden of complying with NEPA; LBP-15-5, 81 NRC 283 (2015)
NEPA places upon an agency the obligation to consider every significant aspect of the environmental impact of a proposed action and ensures that the agency will inform the public that it has indeed considered environmental concerns in its decisionmaking process; LBP-11-7, 73 NRC 264 (2011)
NEPA requirement to prepare an environmental impact statement places upon an agency the obligation to consider every significant aspect of the environmental impact of a proposed action; LBP-13-4, 77 NRC 119 (2013)
the concept of alternatives evolves, and agencies must explore alternatives as they become better known and understood; LBP-11-13, 73 NRC 562 (2011)

agencies are permitted to impose requirements or thresholds for parties seeking to reopen a closed record; CLI-15-19, 82 NRC 156 (2015)
section 2.326 reflects the importance of finality in adjudicatory proceedings; CLI-15-19, 82 NRC 155 (2015)

479
LEGAL CITATIONS INDEX

CASES

there would be little hope of completing administrative proceedings if each newly arising allegation required an agency to reopen its hearings; CLI-11-2, 73 NRC 337-38 n.15 (2011); LBP-15-14, 81 NRC 595 (2015)

although NEPA mandates that an agency prepare an environmental impact statement and take a hard look at the environmental impacts of a proposed agency action, NEPA itself does not mandate particular results, but simply prescribes the necessary process; LBP-13-4, 77 NRC 120 (2013)

as long as the adverse effects of the proposed action are adequately identified and evaluated, the agency is not constrained by NEPA from deciding that other values outweigh the environmental costs; LBP-13-4, 77 NRC 216 (2013); LBP-11-7, 73 NRC 281 n.168 (2011)

NEPA does not mandate particular results, but simply prescribes the necessary process; LBP-11-7, 73 NRC 264 (2011); LBP-12-17, 76 NRC 81 n.49 (2012)

requirement to prepare an environmental impact statement is a procedural mechanism designed to assure that agencies give proper consideration to the environmental consequences of their actions; LBP-12-18, 76 NRC 159 (2012); LBP-14-9, 80 NRC 40 (2014)

Vermont Yankee Nuclear Power Corp. v. NRC, 435 U.S. 519, 554 (1978)

lack of clarity about which electrical cables might be subject to any saltwater environment, however high or low the concentration, and about the effects of and efforts to address this, is a level of concern sufficient to warrant further inquiry and exploration; LBP-11-20, 74 NRC 113-14 (2011)

Vermont Yankee Nuclear Power Corp. (Vermont Yankee Nuclear Power Station), ALAB-138, 6 AEC 520, 523 (1973)

for a reopening motion to be timely presented, movant must show that the issue sought to be raised could not have been raised earlier; LBP-11-20, 74 NRC 85 n.110 (2011)

to justify granting a motion to reopen, the moving papers must be strong enough, in the light of any opposing filings, to avoid summary disposition; CLI-11-8, 74 NRC 223 (2011)

Vermont Yankee Nuclear Power Corp. (Vermont Yankee Nuclear Power Station), ALAB-919, 30 NRC 29, 44 (1989)

consideration of remote and speculative impacts is not required by NEPA; LBP-11-38, 74 NRC 859 (2011); LBP-12-5, 75 NRC 243 (2012)

NRC may decline to examine remote and speculative risks or events with inconsequentially small probabilities; LBP-11-26, 74 NRC 545 (2011)

although boards do not decide the merits at the contention admissibility stage, materials cited as the basis for a contention are subject to scrutiny to determine whether, on their face, they actually support the facts alleged; LBP-12-12, 75 NRC 774 (2012)

board examines the information, facts, and expert opinions provided by petitioners to confirm that they do indeed provide adequate support for the contention; LBP-15-20, 81 NRC 850-51 (2015)

boards must do more than uncritically accept a party’s mere assertion that a particular document supplies the basis for its contention, without even reviewing the document itself to determine if it appears to support a litigable contention; LBP-11-6, 73 NRC 176 n.24 (2010)

Vermont Yankee Nuclear Power Corp. (Vermont Yankee Nuclear Power Station), CLI-00-20, 52 NRC 151, 162 (2000)

any discretionary diversion from the usual Subpart M procedural track will be rare, requiring extraordinary and unusual circumstances, and all requests to date to provide a non-Subpart M hearing in a license transfer case have been denied; CLI-14-5, 79 NRC 260 n.31 (2014)

Vermont Yankee Nuclear Power Corp. (Vermont Yankee Nuclear Power Station), CLI-00-20, 52 NRC 151, 163 (2000)

an organization that seeks to establish representational standing must show that at least one of its members would be affected by the proceeding, identify that member by name and address, and show

480
LEGAL CITATIONS INDEX

CASES

that the member would have standing to intervene in his or her own right and that the member has authorized the organization to request a hearing; LBP-11-16, 73 NRC 653 (2011)
Vermont Yankee Nuclear Power Corp. (Vermont Yankee Nuclear Power Station), CLI-00-20, 52 NRC 151, 163 (2000)
entity seeking representational standing must show it has an individual member who can fulfill all the necessary standing elements and who has authorized the organization to represent his or her interests; LBP-11-21, 74 NRC 122 (2011); LBP-12-3, 75 NRC 177 (2012); LBP-12-15, 76 NRC 23-24 (2012); LBP-13-6, 77 NRC 269 (2013)
Vermont Yankee Nuclear Power Corp. (Vermont Yankee Nuclear Power Station), CLI-00-20, 52 NRC 151, 169 (2000)
license transfer proceedings do not encompass a full-scale health-and-safety review of a plant; CLI-15-8, 81 NRC 508 (2015)
Vermont Yankee Nuclear Power Corp. (Vermont Yankee Nuclear Power Station), CLI-00-20, 52 NRC 151, 173-74 (2000)
the Commission refused to suspend all license transfer proceedings pending analysis of limited liability companies; CLI-11-1, 73 NRC 4 (2011)
radius for the proximity presumption has to be at least as large as the range where obvious offsite consequences can occur; LBP-15-17, 81 NRC 773 n.122 (2015)
Village of Bensenville v. Federal Aviation Administration, 457 F.3d 52, 71-72 (D.C. Cir. 2006)
NEPA requires that NRC conduct its environmental review with the best information available at that time; CLI-12-6, 75 NRC 376 n.146 (2012); CLI-12-7, 75 NRC 391-92 n.48 (2012)
the review method chosen by NRC in creating its models with the best information available when it began its analysis and then checking the assumptions of those models as new information becomes available is a reasonable means of balancing competing considerations, particularly given the many months required to conduct full modeling with new data; CLI-12-7, 75 NRC 391-92 n.48 (2012)
Virginia Electric and Power Co. (North Anna Power Station, Unit 3), CLI-12-14, 75 NRC 692, 692 (2012)
heavy barrier to reopening applies whenever an adjudication has been closed and not merely after a case has been terminated following a full evidentiary hearing on the merits; LBP-15-14, 81 NRC 595 (2015)
Virginia Electric and Power Co. (North Anna Power Station, Unit 3), CLI-12-14, 75 NRC 692, 693, 699-701 (2012)
board’s jurisdiction terminates when there are no longer any contested matters pending before it; CLI-15-13, 81 NRC 564 (2015)
Virginia Electric and Power Co. (North Anna Power Station, Unit 3), CLI-12-14, 75 NRC 692, 699 (2012)
once all contentions have been decided, the adjudicatory proceeding is terminated; CLI-14-6, 79 NRC 449 (2014); LBP-12-19, 76 NRC 187 n.3, 202 (2012); LBP-15-30, 82 NRC 345 n.30 (2015)
when there are no proffered or admitted contentions remaining in the adjudicatory proceeding, the board’s jurisdiction terminates; LBP-15-12, 81 NRC 454 (2015)
Virginia Electric and Power Co. (North Anna Power Station, Unit 3), CLI-12-14, 75 NRC 692, 699, 701 (2012)
licensing board’s ruling resolving the last pending contention is equivalent to a final decision under 10 C.F.R. 2.341, and a licensing board’s jurisdiction ends after it has rendered a final decision; LBP-15-9, 81 NRC 397 n.10 (2015)
Virginia Electric and Power Co. (North Anna Power Station, Unit 3), CLI-12-14, 75 NRC 692, 700 (2012)
courts of appeals have repeatedly approved NRC practice of closing the hearing record after resolution of the last live contention; LBP-12-19, 76 NRC 203 (2012)
rule governing motions to reopen sets a high standard; LBP-14-4, 79 NRC 374 n.68 (2014)
Virginia Electric and Power Co. (North Anna Power Station, Unit 3), CLI-12-14, 75 NRC 692, 700-01 (2012)
new or amended contentions not related to the question of foreign ownership that an interested person may wish to file during the pendency of the combined license application are subject to usual rules of practice, including rules governing reopening the record of a closed proceeding; CLI-13-4, 77 NRC 106 n.20 (2013)
LEGAL CITATIONS INDEX

CASES

Virginia Electric and Power Co. (North Anna Power Station, Unit 3), LBP-08-15, 68 NRC 294, 303 (2008) although neither applicant nor NRC Staff challenges petitioner’s standing, the board must make its own determination whether petitioner has satisfied standing requirement; LBP-11-2, 73 NRC 41 n.54 (2011)

Virginia Electric and Power Co. (North Anna Power Station, Unit 3), LBP-08-15, 68 NRC 294, 317 (2008) if applicant cures the omission cited in a contention, the contention will become moot unless revised by intervenors; LBP-15-5, 81 NRC 258 (2015) pleading requirements of 10 C.F.R. 2.309(f)(1)(v), calling for a recitation of facts or expert opinion supporting the issue raised, are inapplicable to a contention of omission beyond identifying the regulatively required missing information; LBP-15-5, 81 NRC 258 (2015); LBP-15-11, 81 NRC 437-38 n.241 (2015)

Virginia Electric and Power Co. (North Anna Power Station, Unit 3), LBP-10-17, 72 NRC 501, 507-08, 517 (2010) licensing boards have commonly afforded intervenors the opportunity to propose new contentions to challenge new information, even though no contention is pending; LBP-11-22, 74 NRC 277 (2011)

Virginia Electric and Power Co. (North Anna Power Station, Units 1 and 2), ALAB-146, 6 AEC 631, 633 & n.4 (1973) pro se petitioner is not held to the same standards of clarity and precision as a lawyer; LBP-15-5, 81 NRC 286 n.234 (2015)

Virginia Electric and Power Co. (North Anna Power Station, Units 1 and 2), ALAB-146, 6 AEC 631, 633 n.5 (1973) question whether the environmental assessment is sufficient to satisfy NRC Staff’s NEPA requirements must await consideration at a full evidentiary hearing; LBP-15-13, 81 NRC 476 (2015)

Virginia Electric and Power Co. (North Anna Power Station, Units 1 and 2), ALAB-342, 4 NRC 98, 107 (1976) whether the zone-of-interests test has been satisfied does not depend on how concrete or speculative the threat of injury may be; LBP-14-4, 79 NRC 352 n.34 (2014)

Virginia Electric and Power Co. (North Anna Power Station, Units 1 and 2), ALAB-491, 8 NRC 245 (1978) Commission must find that activities authorized by a license amendment can be conducted without endangering the health and safety of the public and will be in compliance with Commission regulations; LBP-15-20, 81 NRC 849 (2015) contention about a matter not covered by a specific rule need only allege that it poses a significant safety problem; LBP-15-20, 81 NRC 847-48, 854 n.151 (2015) petitioners’ contention challenges the sufficiency of the equivalent margins analysis to provide reasonable assurance of reactor safety and is therefore within the scope of the proceeding; LBP-15-20, 81 NRC 849 (2015) petitioners may raise issues not addressed by a specific regulation when unique features in the facility or ongoing development of a generic solution mean that there are some gaps in the regulatory scheme that must be addressed on a case-by-case basis; LBP-15-20, 81 NRC 840 (2015)

Virginia Electric and Power Co. (North Anna Power Station, Units 1 and 2), ALAB-584, 11 NRC 451, 455 (1980) if summary disposition movant meets its burden, opponent must set forth specific facts showing that there is a genuine issue and may not rely on mere allegations or denials; LBP-12-19, 76 NRC 190-91 (2012)
Virginia Electric and Power Co. (North Anna Power Station, Units 1 and 2), CLI-76-22, 4 NRC 480, 491 n.11 (1976)
parties’ duty to report material significant developments in a matter under adjudication arises immediately upon discovery of that information, CLI-15-16, 81 NRC 813 n.11 (2015)
Virginia Electric and Power Co. (North Anna Power Station, Units 1 and 2), LBP-75-70, 2 NRC 879, 890 (1975), aff’d, ALAB-325, 3 NRC 404 (1976), petition for rev. dismissed sub nom., Culpeper League for Protection v. NRC, 574 F.2d 633 (D.C. Cir. 1978)
the fact that a competent and responsible state authority has approved the environmental acceptability of a site or a project after extensive and thorough environmentally sensitive hearings is properly entitled to substantial weight in the conduct of NRC’s own NEPA analysis; LBP-15-11, 81 NRC 439 n.253 (2015)
NRC Staff must supply the board with precise and certain reasons for maintaining the confidentiality of requested documents; LBP-13-5, 77 NRC 242 (2013)
vague, general, and conclusory statements, all purporting to apply to many documents but not connected to any particular document, fail to meet the requirement that defendant supply the court with precise and certain reasons for maintaining the confidentiality of requested documents; LBP-13-5, 77 NRC 243 (2013)
Warm Springs Dam Task Force v. Gribble, 621 F.2d 1017, 1017 (9th Cir. 1980)
to satisfy the hard look requirement, NRC must provide detailed analysis of new information and a reasonable explanation of the agency’s decision concerning supplementation, not merely a conclusory assertion that the agency has reviewed the new information and concluded that no supplement is required; LBP-12-18, 76 NRC 173 (2012)
Warm Springs Dam Task Force v. Gribble, 621 F.2d 1017, 1023-24 (9th Cir. 1980)
mitigation must be discussed in sufficient detail in an environmental impact statement to ensure that environmental consequences have been fairly evaluated; LBP-12-18, 76 NRC 159 (2012)
Warm Springs Dam Task Force v. Gribble, 621 F.2d 1017, 1024 (9th Cir. 1980)
NRC Staff will incorporate any new SAMA-related information that it finds to be significant in the final supplemental EIS; CLI-13-7, 78 NRC 217 (2013)
Warm Springs Dam Task Force v. Gribble, 621 F.2d 1017, 1024 (9th Cir. 1980)
when new information comes to light the agency must consider it, evaluate it, and make a reasoned determination whether it is of such significance as to require implementation of formal NEPA filing procedures; LBP-12-18, 76 NRC 180 (2012)
Warm Springs Dam Task Force v. Gribble, 621 F.2d 1017, 1025 (9th Cir. 1980)
agencies violate NEPA when they fail to take a hard look at significant safety concerns raised by qualified experts to determine whether they require a supplemental EIS; LBP-12-18, 76 NRC 172 (2012)
Army Corps of Engineers’ SEIS for a new dam violated NEPA because it failed to take a hard look at a new report from the U.S. Geological Survey suggesting that the dam might experience an earthquake stronger than the SEIS indicated it was designed to withstand; LBP-12-18, 76 NRC 180 (2012)
Warm Springs Dam Task Force v. Gribble, 621 F.2d 1017, 1025-26 (9th Cir. 1980)
Army Corps of Engineers had conducted an extensive 10-month study of new information to determine whether further NEPA analysis was required; LBP-12-18, 76 NRC 173 (2012)
Warm Springs Dam Task Force v. Gribble, 621 F.2d 1017, 1026-27 (9th Cir. 1980)
NRC Staff must provide a reasonably thorough discussion of the significant aspects of the probable environmental consequences of a proposed action; LBP-15-16, 81 NRC 637 (2015)
Washington Public Power Supply System (WPPSS Nuclear Project No. 1), LBP-00-18, 52 NRC 9 (2000)
forcing a pro se intervenor to file monthly disclosures and closely follow a proceeding indefinitely solely to obtain a ruling on the merits of its claim would constitute significant unfairness and hardship; LBP-12-19, 76 NRC 200 n.91 (2012)
Washington Public Power Supply System (WPPSS Nuclear Project No. 1), LBP-00-18, 52 NRC 9, 13-14 (2000)
if a party fails to file an answer or pleading within the time prescribed in 10 C.F.R. Part 2 or as specified in the notice of hearing or pleading, to appear at a hearing or prehearing conference, to
comply with any prehearing order entered by the presiding officer, or to comply with any discovery order entered by the presiding officer, the Commission or the presiding officer may make any orders in regard to the failure that are just; CLI-14-2, 79 NRC 14 n.10 (2014)

Part 51, not NEPA, is the source of the legal requirements applicable to the applicant’s environmental report; LBP-11-32, 74 NRC 666 (2011)

Washington Public Power Supply System (WPPSS Nuclear Project Nos. 3 and 5), CLI-77-11, 5 NRC 719, 722-23 (1977)

Commission generally prefers that licensing boards make initial factual determinations; CLI-14-2, 79 NRC 29 (2014)

Washington Public Power Supply System (WPPSS Nuclear Project Nos. 3 and 5), CLI-77-11, 5 NRC 719, 723 (1977)

exemption from the decommissioning financial assurance requirements is considered to be an extraordinary equitable remedy to be used only sparingly; CLI-13-1, 77 NRC 9 (2013)

no consultation is required by the Endangered Species Act for actions that have no effect on listed species; LBP-12-10, 75 NRC 671 (2012)

rules permitting the Environmental Protection Agency to make “not likely to adversely affect” determinations without consultation or concurrence of the National Marine Fisheries Service or the Fish and Wildlife Service are discussed; LBP-12-10, 75 NRC 671 (2012)

agencies cannot unilaterally determine that an action will not jeopardize species listed under the Endangered Species Act; LBP-12-10, 75 NRC 658 (2012)

Water Keeper Alliance v. U.S. Department of Defense, 271 F.3d 21, 25 (1st Cir. 2001)

determination of possible effects on an endangered species is ultimately the acting agency’s responsibility; LBP-12-10, 75 NRC 640 (2012)

Water Keeper Alliance v. U.S. Department of Defense, 271 F.3d 21, 31-32 (1st Cir. 2001)

formal consultation follows only if a biological assessment shows that the action may affect listed species or critical habitat; LBP-12-10, 75 NRC 647 (2012)

Waterford Citizens’ Association v. Reilly, 970 F.2d 1287, 1290-91 (4th Cir. 1992)

National Historic Preservation Act and its implementing regulations do not require that the agency implement any mitigation measures, let alone that those measures meet a certain standard of protection for historic properties; LBP-12-23, 76 NRC 489 n.289 (2012)

Webb v. Gorsuch, 699 F.2d 157, 161 (4th Cir. 1983)

when developing an environmental impact statement, an agency must consider the impact of other proposed projects only if the projects are so interdependent that it would be unwise or irrational to complete one without the other; LBP-13-10, 78 NRC 147 (2013)

action with potential impacts subsequent to the initial federal action may not constitute a proposed action if it is insufficiently certain; LBP-14-9, 80 NRC 45-46 & n.115 (2014)

Webster v. U.S. Department of Agriculture, 685 F.3d 411, 433 (4th Cir. 2012)

NEPA is not violated when an agency issues a supplemental environmental impact statement before the Corps of Engineers completes a Clean Water Act section 404 permit review; LBP-15-23, 82 NRC 63 (2015)

NEPA places upon an agency the obligation to consider every significant aspect of the environmental impact of a proposed action and ensures that the agency will inform the public that it has indeed considered environmental concerns in its decisionmaking process; LBP-11-7, 73 NRC 264 (2011)
LEGAL CITATIONS INDEX

CASES

Western Watersheds Project v. Kraayenbrink, 632 F.3d 472, 491-93 (9th Cir. 2011)
although NRC must respond to the significant views of other agencies, particularly if they are critical of NRC’s analysis, that duty applies at the final environmental impact statement stage after the draft EIS has been circulated to interested federal and state agencies for their review and comment; LBP-12-17, 75 NRC 760 (2012)

Western Watersheds Project v. Kraayenbrink, 632 F.3d 472, 492 (9th Cir. 2011)
agency violated NEPA when it failed to address concerns raised by its own experts, the U.S. Fish and Wildlife Service, the Environmental Protection Agency, and state agencies; LBP-12-18, 76 NRC 165 n.179 (2012)

Western Watersheds Project v. Kraayenbrink, 632 F.3d 472, 492-93 (9th Cir. 2011)
agencies violate NEPA when their EIS fails to adequately respond to the critical opinions of their own experts; LBP-12-18, 76 NRC 163 (2012)

Western Watersheds Project v. Kraayenbrink, 632 F.3d 472, 493 (9th Cir. 2011)
NRC must fulfill its obligation under NEPA to take a hard look at mitigation alternatives recommended by its own experts; LBP-12-18, 76 NRC 165 (2012)

although no one will represent petitioners’ perspective if the hearing requests are denied, this in itself is insufficient to excuse untimeliness; LBP-12-16, 76 NRC 59 n.73 (2012)
in addressing the good cause factor for late filing, petitioner must explain not only why it failed to file within the time required, but also why it did not file as soon thereafter as possible; LBP-11-7, 73 NRC 279 n.161 (2011)

if it is not clear that denying an import/export application would avoid the harms that petitioners assert for standing purposes, then the redressibility standard is not met; CLI-11-3, 73 NRC 623 n.51 (2011)

standing is not a mere legal technicality; CLI-11-3, 73 NRC 621 n.37 (2011)

Wetlands Action Network v. U.S. Army Corps of Engineers, 222 F.3d 1105, 1121 (9th Cir. 2000)
proposed mitigation measures are sufficient if they are supported by sufficient evidence, such as studies conducted by the agency, or are adequately policed; LBP-12-23, 76 NRC 467-48 (2012); LBP-14-7, 79 NRC 461-62 (2014)
there must be some assurance that mitigation measures constitute an adequate buffer against the negative impacts that result from the authorized activity to render such impacts so minor as to not warrant an environmental impact statement; LBP-12-23, 76 NRC 467 (2012); LBP-14-7, 79 NRC 461 (2014)

Wetlands Water District v. Department of the Interior, 376 F.3d 853, 868 (9th Cir. 2004)
if an alternative is commercially feasible and capable of bringing about the ends of the proposed project, then Staff may not dismiss it merely because it is inconsistent with the preferences of interested parties, or for other reasons inconsistent with NEPA’s rule of reason; LBP-12-17, 76 NRC 113 (2012)

Wilderness Watch v. Mainella, 375 F.3d 1085, 1096 (11th Cir. 2004)
doctrine of harmless error has only limited application in NEPA cases, and none where the agency has failed to take the required hard look at environmental consequences and alternatives; LBP-12-17, 76 NRC 120 (2012)
permitting agencies to avoid a NEPA violation through a subsequent, conclusory statement that it would not have reached a different result even with the proper analysis would significantly undermine the statutory scheme; LBP-12-17, 76 NRC 120 (2012)

Wong Yang Sang v. McGrath, 339 U.S. 33 (1950)
if a formal adjudicatory hearing is mandated by the due process clause, the absence of the on-the-record requirement will not preclude application of the Administrative Procedure Act; LBP-11-8, 73 NRC 361 n.53 (2011)

485
agency’s reliance on mitigation in making a finding of no significant impact is justified if the proposed mitigation is more than a possibility in that it is imposed by statute or regulation or has been so integrated into the initial proposal that it is impossible to define the proposal without mitigation; LBP-12-23, 76 NRC 467 (2012); LBP-14-7, 79 NRC 461 (2014)

mitigation measures that are a mandatory condition qualify as the type of mitigation measures that can be relied upon for a finding of no significant impact; LBP-12-23, 76 NRC 469 n.152 (2012)

proposed mitigation measures are sufficient if they are supported by sufficient evidence, such as studies conducted by the agency, or are adequately policed; LBP-12-23, 76 NRC 467-48 (2012); LBP-14-7, 79 NRC 461-62 (2014)

Council on Environmental Quality guidance does not bind NRC, but NRC gives it substantial deference; LBP-12-17, 76 NRC 82-83 (2012)

agencies are not permitted to define the objectives of a proposed action so narrowly as to preclude a reasonable consideration of alternatives; LBP-12-17, 76 NRC 114 (2012)

actions taken by licensee under 10 C.F.R. 50.59 do not give rise to hearing rights under the AEA but rather are monitored by NRC Staff’s inspections and oversight, which may be challenged only by a petition for enforcement; LBP-15-27, 82 NRC 196 (2015)

appropriate means of challenging licensee actions undertaken in accordance with 10 C.F.R. 50.59 is through a petition under 10 C.F.R. 2.206;CLI-12-20, 76 NRC 439 n.10 (2012); CLI-14-11, 80 NRC 175, 179 (2014); CLI-15-14, 81 NRC 747-48 (2015); LBP-13-7, 77 NRC 334 (2013); LBP-13-11, 78 NRC 380 (2013); LBP-15-27, 82 NRC 192 n.43 (2015)

change to a facility that is allowed under 10 C.F.R. 50.59 without prior NRC approval is not a license amendment triggering hearing rights; LBP-15-27, 82 NRC 191-92 (2015)

an organization seeking to intervene in its own right must allege that the challenged action will cause a cognizable injury to its interests or to the interests of its members; LBP-11-21, 74 NRC 122 (2011)

in a reactor decommissioning proceeding, a public interest group lacked organizational standing when its business address did not lie within 50 miles of the facility; LBP-13-6, 77 NRC 283 n.23 (2013)

intervention petitioner must demonstrate that it has suffered a distinct and palpable harm that constitutes injury-in-fact within the zone of interests arguably protected by the governing statute and that the injury can fairly be traced to the challenged action and is likely to be redressed by a favorable decision; LBP-11-13, 73 NRC 546 (2011); LBP-11-21, 74 NRC 121 n.22 (2011); LBP-12-8, 75 NRC 546-47 (2012); LBP-12-15, 76 NRC 23 (2012)

to have standing, petitioner need only show that a cognizable injury is associated with a proposed licensing action and that granting the relief sought will address that injury; LBP-13-6, 77 NRC 274 n.9 (2013)

at the contention admissibility stage, boards need only decide whether intervenors have presented sufficient information to show a genuine dispute concerning NRC’s duty to supplement the FEIS,
and reasonably indicating that further inquiry concerning that issue is appropriate; LBP-12-18, 76 NRC 167, 174 (2012)
boards are not to decide the merits at the contention admission stage; LBP-12-18, 76 NRC 166-67 (2012)
contention admissibility rules impose on petitioner the burden of going forward with a sufficient factual basis, but they do not shift the ultimate burden of proof from applicant to petitioner, nor do the rules require petitioner to prove its case at the contention admissibility stage; LBP-12-18, 76 NRC 163-64 (2012)
for factual disputes, petitioner need not proffer facts in formal affidavit or evidentiary form, sufficient to withstand a summary disposition motion; LBP-12-18, 76 NRC 163-64 (2012)
lack of clarity about which electrical cables might be subject to any saltwater environment, however high or low the concentration, and about the effects of and efforts to address this, is a level of concern sufficient to warrant further inquiry and exploration; LBP-11-20, 74 NRC 111-12 (2011)
petitioners need not prove their case at the contention admission stage, but petitioner must present sufficient information to show a genuine dispute and reasonably indicating that a further inquiry is appropriate; LBP-12-18, 76 NRC 163-64 (2012); LBP-12-27, 76 NRC 608 (2012)

Yankee Atomic Electric Co. (Yankee Nuclear Power Station), CLI-96-7, 43 NRC 235, 251 (1996)
contentions that advocate stricter requirements than agency rules impose or that otherwise seek to litigate a generic determination established by a Commission rulemaking are inadmissible; LBP-13-6, 77 NRC 284 (2013)

claimed deficiencies in a decommissioning plan must have health and safety significance in order to be admissible; LBP-15-24, 82 NRC 87 n.115 (2015)
state has provided sufficiently supported expert opinion to show at the contention admissibility stage why the inadvertent release of radionuclides is enough of a risk to public health and safety to warrant merits consideration as an unforeseen expense; LBP-15-24, 82 NRC 89 (2015)
cursory assertions are insufficient to raise an issue for appeal; CLI-13-1, 77 NRC 22 n.129 (2013)
Yankee Atomic Electric Co. (Yankee Nuclear Power Station), CLI-98-21, 48 NRC 185, 195 (1998)
contemporaneous judicial concepts of standing are applied in NRC proceedings; LBP-15-13, 81 NRC 463 (2015); LBP-15-19, 81 NRC 819 (2015)
petitioner must allege a concrete and particularized injury that is fairly traceable to the challenged action and is likely to be redressed by a favorable decision; LBP-15-13, 81 NRC 463 (2015); LBP-15-17, 81 NRC 770 (2015)
to establish organizational standing, petitioner must show that its interests will be harmed by the licensing action, while an organization seeking representational standing must demonstrate that the interests of at least one of its members will be harmed; LBP-12-10, 75 NRC 637 (2012)
dismissal of an appeal with prejudice, similar to termination of a proceeding with prejudice, generally implies that the Commission has ruled on the merits of the appeal, but such ruling is reserved for unusual situations involving substantial prejudice to an opposing party or to the public interest in general; CLI-13-10, 78 NRC 568 n.29 (2013)
dismissal with prejudice is a harsh sanction reserved for unusual situations because it is the equivalent of a decision on the merits of the license amendment request; LBP-15-28, 82 NRC 241 (2015)
Commission decision to vacate a board’s decision does not intimate any opinion on its soundness; CLI-13-9, 78 NRC 559 n.31 (2013); CLI-13-10, 78 NRC 569 (2013)
no prejudice to either the intervenors or the public occurred where intervenors would have been in precisely the same position in any subsequent proceeding as if they had prevailed not only on their instant appeal but also on the subsequent merits portion of the proceeding; CLI-13-10, 78 NRC 567 n.27 (2013)
stare decisis is not implicated where the board decision is unreviewed and therefore not binding on future tribunals, but as a prudential matter, the Commission vacates such decisions when appellate review is cut short by mootness; CLI-13-9, 78 NRC 558 (2013)
unconditional withdrawal is generally appropriate if it would cause no prejudice to either the intervenors’ or the public’s interest; LBP-15-28, 82 NRC 241 (2015)

vacatur is designed to eliminate confusion and disagreement over what an unreviewed board decision may mean or what effect it may have in the resolution of safety or environmental issues in a future proceeding; CLI-13-9, 78 NRC 561 (2013)

whether a potential future license amendment request shares those same alleged deficiencies as a previously withdrawn one would require a new analysis; LBP-15-28, 82 NRC 241 (2015)

**Yankee Atomic Electric Co.** (Yankee Nuclear Power Station), CLI-99-24, 50 NRC 219, 222 n.3 (1999)

standard for dismissal with prejudice is not met because the prospect of future litigation is not unusual, being inherent in any dismissal without prejudice; LBP-15-28, 82 NRC 241 (2015)
