## General Comment

Hello, my name is Kyle Gould and I am a concerned citizen from New York State.

I'm writing to express my approval for creating tailored training and experience requirements for different radiopharmaceuticals. This will allow for multiple specialists to be able to work with the myriad options for radiation-based medicine. The NRC should also partner and train with the National Institute of Health and the Department of Health and Human Services to help set up proper protocols. Finally, the NRC can possibly train with Euratom to understand any differences between the standards of the United States and the standards of the international community.

Kyle Gould
