Attachments: [External_Sender] Request: SERO-2019-00173 Turkey Point Nuclear Power Relicensing

Kristin and Jodie,

As part of NMFS's review of the NRC's request for concurrence on the NRC's "not likely to adversely affect" determinations for sea turtles and smalltooth sawfish for Turkey Point SLR, NMFS has requested additional information from the NRC (see attached email). I am currently working on responses. I may need to reach out to you to make sure that I am gathering the correct data for the more detailed water quality monitoring questions. For now, though, there is no action for you. I just wanted to keep you in the loop so that you are aware of where this consultation stands. NMFS's email will be in ADAMS at ML19126A028 by the end of the week.

Thanks!

Briana
