SUBJECT: NRC CONSENT TO INDIRECT LICENSE TRANSFER AND AMENDMENT NO.25

By letter dated November 9, 2018, received at the U.S. NRC Region III office via certified mail on November 15, 2018, Test America Laboratories – St. Louis (a wholly owned subsidiary of TestAmerica Environmental Services, LLC) submitted to the U.S. Nuclear Regulatory Commission (NRC) Region III Office a Request for Consent to an indirect License Transfer of NRC Materials License No. 24-24817-01. Based on the information provided, we understand that as a result of the acquisition of shares in Test America Environmental Services, LLC by Eurofins Scientific, control would be indirectly transferred to Eurofins Scientific. We further understand that this transfer will not result in any change to the licensed materials, persons using the licensed material, location of use of licensed material, or persons responsible for the licensee's radiation safety program. Based on information provided, we understood that, on or about October 31, 2018, the licensee intended that all of the licensee's assets would be transferred to Eurofins Scientific.

Based on the above understandings and as more fully detailed in the enclosed NRC staff's Safety Evaluation Report (SER) which documents the NRC staff's review of the request, we have no objection to the proposed transfer.

In addition to the SER, enclosed is Amendment No. 25 to your NRC Material License No. 24-24817-01 in accordance with your April 1, 2019 confirmation that the Transfer has been completed as described in the previous letters. Your November 9, 2018, and April 1, 2019 letters may be found in our NRC Agencywide Documents Access and Management System (ADAMS) at accession numbers ML18319A156 and ML19092A369, respectively.

Please review the enclosed documents carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The enclosed document contains sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Sara A. Forster, M.S.
