Dear Mr. Orphanos,

On March 27, 2019 the Department received an application to renew the above-referenced State Pollutant Discharge Elimination System (SPDES) permit. The application was timely and sufficient. Therefore, the current permit will remain in effect in accordance with the State Administrative Procedures Act.

The Department will, at some point in the future, undertake a full technical review of the SPDES discharge to determine the need to incorporate new permit requirements under the Federal Clean Water Act. The timing of the Department's full technical review will be determined by the ranking of the discharge under the Environmental Benefit Permit Strategy (EBPS). The EBPS utilizes criteria to score and rank a wastewater discharge, giving priority for technical review to those discharges with the greatest potential to cause environmental harm. To initiate a full technical review, the Department will send you a "Request for Information" seeking data to be used in the evaluation of the discharge and in the establishment of provisions proposed for inclusion in the permit.

No further action is required on your part at this time. In accordance with the Uniform Procedures Act, the Department has suspended its review of your application and will resume review upon receipt of your response to the "Request for Information".

If you have any technical questions, please contact Brian Baker at brian.baker@dec.ny.gov. For assistance with permitting questions, please contact me at michael.schaefer@dec.ny.gov or at (518) 402-9167.
