Joseph M. Farley Nuclear Plant Units 1 & 2
Significant Hazards Evaluation and Environmental Considerations for Farley Risk
Informed Technical Specifications Response to Request for Additional Information

Ladies and Gentlemen:

By letter dated July 27, 2018, Southern Nuclear Operating Company (SNC) submitted a license amendment request (LAR) for the Joseph M. Farley Nuclear Plant Unit 1 and Unit 2 facility operating license (FOL) and technical specifications (TS). By letter dated May 3, 2019, SNC responded to Nuclear Regulatory Commission (NRC) requests for additional information (RAIs). This RAI response included some modifications to the proposed FOL and TS markups from those provided in the LAR. The purpose of this letter is to inform the NRC that the RAI response letter (including the revised markups and supplemental request) does not alter the conclusions of either the No Significant Hazards Consideration response nor the Environmental Considerations response provided in the LAR.

This letter contains no NRC commitments. If you have any questions, please contact Jamie Coleman at 205.992.6611.

I declare under penalty of perjury that the foregoing is true and correct. Executed on the 17th day of May 2019.

Respectfully submitted,

Cheryl Gayheart
Director, Regulatory Affairs
