General Comment

Against Status Quo: 35.390 criteria is excessive for the role an AU has for radiation safety.

Authorized users are part of a team of radiation safety officers, Nuc Med techs, regulators and administrators for NRC compliance. An AU is responsible for written directive criteria and being a member of the radiation safety committee.

There are not enough Treating Authorized Users:

Many AUs dont treat due to out of insurance network problems, practice bias for other therapys, schedule problems, competing forces and geographic limitations.
