PUBLIC SUBMISSION

Docket: NRC-2016-0179

Revisions to Transportation Safety Requirements and Compatibility with International Atomic Energy Agency Transportation Requirements

Comment On: NRC-2016-0179-0063

Harmonization of Transportation Safety Requirements With IAEA Standards; Draft Regulatory Basis; Request for Comment

Document: NRC-2016-0179-DRAFT-0066

Comment on FR Doc # 2019-07321

Submitter Information

Name: Kyle Gould

General Comment

Hello, my name is Kyle Gould and I am a concerned citizen from New York State.

I'm writing to demand that the Nuclear Regulatory Commission adopt the IAEA transportation standards. This will help ensure that safe transportation of materials can occur.

In addition, the Commisipn should use this to also establish how they collect data on proper transport. The U.S. Nuclear Regulatory Commission must continue collecting and sharing data regarding transportation and packaging of materials. Nuclear material is especially hazardous due its extreme radioactivity, so special precautions must be made to make sure that the packaging is secure and transportation is safe. This also includes making sure that there is data collected to make sure that proper procedure is followed. This means following the procedures laid out by the Resource Conservation and Recovery Act for waste and that any and all material must be supplied with a material safety data sheet. All material must also be recorded during receiving as well to make sure that the RCRA Section C regulations are enforced.
