Elizabeth,

I spoke with Curvel regarding your two inquiries.

1. Yes, we would like to confirm Performance Materials NA as the licensee.
2. Address for the specific building/mail correspondence is:
 - a. 200 Powder Mill Road, Building 249/211, Wilmington, DE 19803

Sincerely,

Grace E. Battista, MPH

Subject: RE: FW: RSO Letter to NRC

This email originated from outside of the organization.

License No. 07-13441-03
Docket No. 030-39154
Control No. 612078

Mr. Hypolite,

Please clarify the following issues related to the company name and address.

1. You listed the name of the company as "Performance Materials NA, Inc., The Dow Chemical Company". When this license was requested, the name was listed as "Performance Materials NA, Inc". In addition, it was explained in the change of control action that is currently open, that the three new companies were subsidiaries of the combined Dow DuPont, not Dow Chemical Company. Because the NRC has a regulation which requires notification and approval prior to a change of control [10 CFR 30.34(b)], it is important that we are clear on who is the

responsible licensee. At this time, we believe that Performance Materials NA, Inc. is the responsible licensee. If that is not correct, please let us know.

2. The current mailing address listed on the license is 200 Powder Mille Road, PO Box 8352, Wilmington, DE 19803. Your address under your signature line has a different zip code, 19898. Please inform us if the mailing address should be changed.

Also, please note that the April 26 letter that initiated this action should have been signed by a management representative rather than the proposed new RSO. The NRC considers a letter signed by a management representative to indicate that management has reviewed the application and concurs in the statements and representations contained therein. A management representative should sign all future correspondence that requests a change in your license. At this time, I am assuming you are the correct management contact. If that is not correct, please let me know.

If any of the clarifications will require that the license be amended, the response must be a signed, hard copy letter submitted by regular mail; or a pdf of a signed hard copy letter submitted by email, or a facsimile of a signed hard copy letter sent to 610-337-5269.

Please contact me if you have any questions.

Elizabeth,

Please see the attached letter, signed from the Site Leader, within the Performance Materials NA site at Wilmington DE.

If you need any additional information to support this RSO change, please let me know.

Sincerely,

Subject: RSO Letter to NRC

Curvel,

I recently made the request to the Nuclear Regulatory Committee to be transferred as RSO for your facility. NRC contacted me, and since I have a Collegeville address, requested that the site leader of HPU write a letter supporting this change.

I have attached a draft of this letter. It is written from you to NRC, supporting my transfer as RSO.

Could you review, sign, and return to me in a PDF form?

I will forward the signed copy to NRC. Hopefully this is the last step in the approval process.

Sincerely,

Grace E. Battista, MPH
