36475 W Five Mile Road  
Livonia, MI 48154

Dear Dr. Mohtadi:

Enclosed is Amendment No. 63 to your NRC Material License No. 21-14849-01 in accordance with your request.

If you have any questions or comments please contact me directly at (630) 829-9841. My fax number is (630) 515-1078. My email address is [colleen.casey@nrc.gov](mailto:colleen.casey@nrc.gov).

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

This also refers to your letter ("the letter") dated March 26, 2019, in which you requested that IsoAid Model IAI – 125A and Medi-Physics Model 6733 iodine-125 seeds, permitted by 10 CFR 35.400, be deleted from your license.

We were unable to approve the deletion of these materials at this time because the information in your letter was insufficient to complete our review.

If you wish to pursue this matter, please provide only one complete, written response that is addressed to my attention at the above address, as "additional information to control number 611688."

Please be sure to accompany/transmit your response with a brief business style letter that identifies your license by name, mailing address and license number; control number as given above; is currently dated; is physically and legibly signed by a senior management representative; is addressed to my attention; and completely resolves the information requested below to continue our review.

This will help ensure that your response is processed correctly in our offices. We will then continue our review.

Under no circumstances should you submit more than one, complete, written response, even by different means of transmission, such as email, regular mail, etc. To do so will introduce confusion and delay in the processing and review of your response.

Your letter does not indicate whether you ever, or presently, possessed, used and/or stored the sources you are requesting be deleted from your license

Failure to specifically describe the past and current status of these sources is insufficient to justify their removal from your license.

For historical context, please state when the approximate last date of possession, use and/or storage was for each of these sealed sources.

If you never received or possessed any or all of these materials, please so state specifically. Please note that we will corroborate your response with a review of your inspection history.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you.

This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture.

You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>.

N. Mohtadi

- 3 -

We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Sincerely,

A handwritten signature in cursive script that reads "Colleen Carol Casey".
