Subject: Acceptance Review - License Amendment Request
Date: Friday, May 31, 2019 11:00:00 AM

By letter dated April 22, 2019 (Agencywide Documents Access and Management System [ADAMS] Accession Number ML19116A057/ML19119A008 [Redacted]), you provided a License Amendment Request to remove materials from storage to prepare for shipment.

The U.S. Nuclear Regulatory Commission (NRC) staff has performed an acceptance review of your submittal to determine if the application contains sufficient technical information to allow the NRC staff to conduct the detailed technical review. Based on this review, completed February 11, 2019, the NRC staff concludes the submittal contains information in sufficient detail to enable the staff to conduct its detailed review. Accordingly, the NRC staff has established a schedule for this review which includes a site visit scheduled for June 25, 2019 and the formal issuance of requests for additional information (RAIs) by June 30, 2019. The NRC staff anticipates completing its review and developing a Safety Evaluation Report to address the submittal by August 9, 2019 or 4 weeks after adequate response to any RAIs, if any. In addition, the NRC staff estimates that completing the review and making an independent assessment of the proposed application will require approximately 160 staff hours.

In accordance with Title 10 of the Code of Federal Regulations, Section 2.390 of the NRC's "Agency Rules of Practice and Procedure," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of NRC's ADAMS. ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>

If you have any questions, feel free to contact me.
