May 16, 2019

Mr. David Drucker
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

Dear Mr. Drucker,

We got lucky at Three Mile Island. Chernobyl will be unlivable for centuries. Fukushima was done in by a tidal wave that should have been accounted for but wasn't, and is taking years to clean up. America's coastal power plants need to start planning and building now for sea level rise. Some Florida cities already have seawater in the streets at high tide every day. Hurricanes are getting more frequent and severe.

Thank you.

Sincerely,

Dr. David Williams
