Hi Briana,

Thank you. I checked the links, and they all work. The date of initiation for the consultation is the date of your email, 5/28/19.

Kind regards,  
Audra

Audra,

The St. Lucie Annual Environmental Operating Reports are available online at the following links:

- [2018 Report](#)
- [2017 Report](#)
- [2016 Report](#)

I apologize for the incorrect link the first time around!

Briana

Dear Briana,

We have reviewed the NRC's response to our May 8, 2019 RAI. We find the response to be sufficient with the exception of the response to RAI #1.

We went to the following link provided in your response:

<https://www.nrc.gov/reactors/operating/ops-experience/tritium/plant-specific-reports/stl1-2.html>. However, we were unable to locate the requested reports. The 2016 and 2017 reports under “Environmental Reports” were Annual Radiological Environmental Operating Reports that are not applicable to our review. In order to satisfy this information request, please provide the pdf documents of the requested 2016 and 2017 PSL Annual Environmental Operating Reports to [Audra.Livergood@noaa.gov](mailto:Audra.Livergood@noaa.gov).

NMFS reserves the right to request additional information once we have received and reviewed the information requested in this email. We look forward to receiving your response within **45 days** from the date of this email.

However, if no response to this request for additional information is received within **45 days**, we will assume the consultation is no longer active. We will then close out the consultation request. Please note this 45-day period has been established as a national policy.

If you have any questions, please feel free to reach out.

Thank you,

Audra

Audra,

With this email, I am transmitting to you the NRC's responses to your May 8, 2019, requests for additional information concerning the reinitiated Endangered Species Act Section 7 consultation for the St. Lucie Plant, Unit Nos. 1 and 2. FPL has reviewed the responses for accuracy and also provided input on the responses.

From our communications last week, I understand that you will consider the olive ridley in the revised biological opinion based on FPL's capture of a live olive ridley on May 11. At this time, you have not requested any additional information from FPL or NRC related to this event or species. Please let me know if this changes or if you find you need any further information once you review the attached responses.

Thank you,

Briana
