Rock Springs, WY 82901

SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 49-27701-01

By letter dated May 7, 2019, you informed the U.S. Nuclear Regulatory Commission (NRC) that you wished to terminate NRC radioactive materials license number 49-27701-01. The NRC Form 314 dated May 6, 2019, stated that all radioactive material had been transferred to an Agreement State licensed entity. The supporting documentation to the NRC Form 314 included copies of the most current leak test results demonstrating that there was no evidence of leakage of radioactive material from the sealed sources.

The NRC staff has reviewed the supporting documentation to your NRC Form 314. Based on the documentation submitted and a review of your historical file, the staff concluded that all licensable radioactive material had been removed from your storage facility and the facility located at 649 North Front Street, Unit A, Rock Springs, Wyoming, 82901, is suitable for unrestricted use in accordance with 10 CFR 20.1402, "Radiological Criteria for Unrestricted Use." Based on these conclusions, no further remediation or actions with respect to NRC regulated material is required. Please find enclosed amendment number 3 to NRC license number 49-27701-01 authorizing your license termination. An environmental assessment for this licensing action is not required since this action is categorically excluded under 10 CFR 51.22(c)(20)(ii). You can contact me at 817-200-1189 if you have questions on any of the information stated above.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

/RA/

Roberto J. Torres, M.S., Senior Health Physicist  
Materials Licensing and Decommissioning Branch
