SUBJECT Pending NRC License Amendment - Additional Information Requested		
<p>SUMMARY AND ACTION REQUIRED (IF ANY) This record is a summary of the conversation that occurred between Laura Cender and Graham Donahue on May 20, 2019 regarding the license amendment request dated April 23, 2019.</p> <p>As we discussed during our conversation today, licensed material authorized in Items 6-9 on your license will now be listed differently going forward due to changes to our licensing process. Specifically, Item 9.C. of your license currently authorizes Troxler Electronic Laboratories 3241 Series devices. As the Troxler Electronic Laboratories 3241 Series refers to a number of unique devices with various sealed sources and activity limits permitted, the various models of devices within this series will now individually be listed on the license going forward.</p> <p>I understand from our conversation this afternoon that you are likely interested in removing this authorization from your license completely. If this the case, please provide leak test records and disposal records for all devices that fall within the Troxler Electronic Laboratories 3241 Series that have previously been used or possessed under the license. If no devices of this type have ever been used or possessed under your NRC license, please provide a signed and dated statement confirming that this is the case.</p> <p>Please submit your signed and dated response by no later than Friday May 31, 2019.</p>

Hello Graham,

I was working on completing the paperwork for your amendment today and I have a quick question regarding some information that I will need to update on the license. Can you please give me a call at 630-829-9712 when you are available?

Thank you,
Laura
