**BRIEF PROJECT TITLE AND WORK DESCRIPTION**

(a) The title of this project is: Vega Unity 7 Acquisition to Support ADAMS Business Process Automation Stack (BPAS)

(b) Summary work description:

The NRC is upgrading the current BPAS infrastructure with the new version of Unity – Unity 7. The Contractor shall provide the following:

Base Period:

Part Number	Description	Quantity	Unit Price	Total
VSWUI1012-SUB-001	Unity 7 Term Model Per Seat 50-99	50		
<b>TOTAL</b>				

Option Period 1:

Part Number	Description	Quantity	Unit Price	Total
VSWUI1012-SUB-001	Unity 7 Term Model Per Seat 50-99	50		
<b>TOTAL</b>				

Option Period 2:

Part Number	Description	Quantity	Unit Price	Total
VSWUI1012-SUB-001	Unity 7 Term Model Per Seat 50-99	50		
<b>TOTAL</b>				

**TOTAL PRICE: \$106,364.50**

Brand Name Justification:

The Brand name procurement of Unity 7 will allow the NRC to continue to support a variety of Mission Critical automated business processes. Unity 7 product is based on the same infrastructure and toolset as the Vega Unity product currently in use. No other brand name software will provide advanced analytics as a built component of their product offerings or, manifest the following shortcomings without time-consuming and resource-intensive custom code development:

- Unable to click on a workload (or ticket tracking) graph and make immediate changes to the underlying cases directly from the analytics screens
- Unable to take action directly from the analytic display across many sources of data
- Unable to rapidly configure the application User interface, Analytics dashboards, security, and integration with disparate systems
- Unable to combine content, process and data from across the enterprise into a single configurable user interface

There are some commercially available products but based on the NRC's market research, none of the alternate products have ability to meet all of NRC's requirements, such as:

- Click on a workload (or ticket tracking) graph and make immediate changes to the underlying cases directly from the analytics screens
- Take action directly from the analytic display across many sources of data

- Rapidly configure the application User interface, Analytics dashboards, security, and integration with disparate systems
- Combine content, process and data from across the enterprise into a single configurable user interface

This means that unless provided in a contract document or specifically authorized by the contracting officer, NRC technical personnel may not issue contract modifications, give formal contractual commitments, or otherwise bind, commit, or obligate the NRC contractually. Informal unauthorized commitments, which do not obligate the NRC and do not entitle the contractor to payment, may include:

- (2) Requesting or requiring a contractor to make changes under a contract without formal contract modifications;
- (3) Encouraging a contractor to incur costs under a cost-reimbursable contract in excess of those costs contractually allowable; and
