SUBJECT: STATUS OF NRC'S REVIEW OF DECONTAMINATION DECOMMISSIONING
AND ENVIRONMENTAL SERVICES' CLEANUP PLAN FOR THE FORMER
NEW HAVEN CLOCK FACTORY SITE IN NEW HAVEN, CONNECTICUT

Dear Mr. Norton:

This letter is to inform you that we have completed our review of your Cleanup Plan, Revision 2, dated March 23, 2019, [Agencywide Documents Access and Management System (ADAMS) Accession Number ML19123A196] for the former New Haven Clock Factory site in New Haven, Connecticut. We noted that the Cleanup Plan was revised to include Buildings 1 and 8, reflect the current building owner, and your current business address. We confirmed that no significant technical changes, such as dose modeling, the Derived Concentration Guideline Levels (DCGLs), screening methodology, and ALARA analysis were made to the plan. The results of our review revealed that the DCGLs are sufficiently conservative and will be protective of public health and safety provided that you provide an adequate technical basis confirming that residual radioactivity will be surficial and not volumetric.

We have informed the State of Connecticut Department of Energy and Environmental Protection (DEEP) of the results of our review. Based on our review and the assumption that residual radioactivity will be surficial and not volumetric, the NRC has no further questions and expects that you will continue with your activities at the site.

In addition, we noted that your Final Status Survey Plan (FSSP) is in Appendix B of your Cleanup Plan. We request that you submit any changes made to your FSSP for NRC review prior to implementation.

If you need any additional information or assistance, please contact Laurie A. Kauffman at (610) 337-5323. Thank you for your cooperation.

Sincerely,

/RA/

Raymond J. Powell, Chief
Decommissioning, ISFSI, and Reactor
HP Branch
Division of Nuclear Materials Safety
