NRC Export License Application

Dear Deputy Director:

Curtiss-Wright Flow Control Service LLC ("Curtiss-Wright"), a subsidiary of Curtiss-Wright Corporation, hereby submits a license application for the export of steam generator nozzle dam systems for ultimate use at the Koeberg Nuclear Power Station 1 & 2. The steam generator nozzle dams are used to isolate the steam generator by plugging the entrance of the hot and cold legs into the steam generator and thus allowing maintenance of the steam generator to occur during the normal refueling process of the nuclear power plant.

Curtiss-Wright has a contract with Framatome in France who will be purchasing the nozzle dams directly from Curtiss-Wright but delivery will be directly to the Koeberg Nuclear power Station. The total value of the nozzle dam systems to be delivered is [REDACTED].

Please contact the undersigned should there be any questions regarding this request.

Sincerely,

Carol G. Fischer
