### **B.4.1 Objective**

The objective of this acquisition is to provide low voltage switchgear enclosures and associated circuit breakers that will be subjected to high energy arc fault test conditions. The objective is not to evaluate the electrical performance of the equipment, but to assess the hazards associated with arcing faults in low voltage switchgear enclosures. The switchgear enclosures and circuit breakers shall be used (including refurbished), provided they meet the requirements herein.

### **B.4.2 Scope**

The offeror shall provide the low voltage equipment and required documentation that meets the requirements stated below:

  - a) Four (4) indoor metal-enclosed switchgear enclosure units, each unit consisting of:
    - i. two vertical section
      - o One vertical section may be up to four breaker compartments with associated stationary parts (representing load breakers)
      - o Second vertical section is to have at least one breaker compartment with a frame size equal to the switchgear bus rating (to house the supply breaker)
    - ii. associated three phase and ground busses

Note: instrument compartment is not required
  - b) Four (4) fully operational draw out type metal-clad low voltage air circuit breakers that fit the second vertical section 'supply breaker' specified above (item a).
  - c) Ten (10) non-operational (dummy) draw out type metal-clad low voltage air circuit breakers that fit the provided enclosures specified above (item a)

Each metal-enclosed switchgear unit shall be furnished complete, including accessory equipment specified herein. The equipment shall be tested by the Offeror in accordance with industry standards identified in the Test section below.

- 2) The Offeror shall also provide the following:
  - a) Certification the equipment is in compliance with:
    - i. IEEE C37.20.1 – Metal Enclosed Low Voltage Power Circuit Breaker Switchgear
