

UNITED STATES  
NUCLEAR REGULATORY COMMISSION

REGION III  
2443 WARRENVILLE RD. SUITE 210  
LISLE, IL 60532-4352

JUN 21 2019

Michelle J. Majetic  
Facilities Capital Project Manager  
Roush Industries, Inc.  
11916 Market St.  
Livonia, MI 48150

Dear Ms. Majetic:

This concerns the Roush Industries, Inc., NRC Form 313, "Application for Materials License," dated March 12, 2019, regarding a request for authorization to use germanium-69 for research and development. That application omitted some information needed by our office prior to issuing a Radioactive Materials License, including no identification of a Radiation Safety Officer (RSO), or other individuals responsible for the Radiation Safety Program. An RSO is required pursuant to Title 10 of the *Code of Federal Regulations* (CFR) Section 30.33(a)(3). That application may be found at accession number ML19084A258 in the NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

As we discussed via phone on June 19, 2019, additional information is needed from our office in order to complete our review of the application. That information was initially provided to your company on May 31, 2019, and forwarded directly to you on June 19, 2019.

In accordance with our conversation, we have voided your request for a new radioactive materials license. This action is without prejudice to resubmission. You may refer to NUREG 1556, Vol. 7, rev. 1, "Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Academic, Research and Development, and Other Licenses of Limited Scope, Including Electron Capture Devices and X-Ray Fluorescence Analyzers;" when preparing any future new license application.

This volume may be found at the website:

<http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/v7>;

In resubmitting your request, please be reminded that 10 CFR 30.9 and 30.10 require that information provided to the Commission by a licensee to be complete and accurate in all material aspects. Deliberate submittal of incomplete or inaccurate information that is material to the Commission could subject the licensee to enforcement action.

M. Majetic

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

If you have any questions concerning this letter, please contact the U.S. NRC, Region III office at (630) 829-9887 so that we may provide appropriate answers.

In accordance with 10 CFR 2.390, a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from ADAMS.

Sincerely,

Sara A. Forster, M.S.  
Health Physicist  
Materials Licensing Branch
