SUBJECT Request for information pertinent to a scheduled initial inspection on 7/8/2019.		
SUMMARY AND ACTION REQUIRED (IF ANY) The inspector announced an initial inspection scheduled for 7/8/2019 by way of a phone call with the licensee's RSO. During the call, Bob Gattone requested information from the RSO who provided information to determine if the initial inspection should be conducted on 7/8/2019. The licensee's work hours are 7:30am-4:00pm. However, the licensee had not received licensed material, and there was no facility for using or storing licensed material because there was no contract yet. The licensee anticipates that the facilities may be ready to receive licensed material in March 2020. The RSO committed to phone Bob Gattone when the licensee receives its first receipt of licensed material. In accordance with Inspection Manual Chapter 2800, dated 9/12/2017, page 15, since the licensee had not received licensed material yet, the new initial inspection due date is 18 months from license issuance (i.e., January 30, 2020).
