

Annual Request for Risk-Informed-Activity Information

FY 2019 Template for Risk-Informed-Activities

This template will assist with the consistent description of activities. Each office is requested to provide all of their activities for the annual update of the public website using this template for each activity as one consolidated office-approved response directly to Dale Yeilding, (Dale.Yeilding@nrc.gov).

<p>2019 Template - Risk-Informed-Activities</p> <p>Activities do not have to be submitted in table format, simply email the new activities Title and FY2019 section.</p>	
<p>Activity Title</p>	<p>Title should not be changed.</p>
<p>Summary Description and Prior Year Updates</p>	<p>Summary Description: Existing information should only be changed to clarify why the activity is risk-informed and to include examples of what decisions were made that were based upon risk information. Prior Year Sections: This information should not be changed or if necessary contact Dale Yeilding (301-415-0898) for webmaster change requirements.</p>
<p>Add New FY2019 Section</p>	<p>Identify current efforts, results, or activities completed or conducted during the fiscal year. Provide an ADAMS ML# to a publically available document if additional information is referenced. Refer to Enclosure 3 to ensure the use of risk is explained so the general public will understand why the activity is risk-informed for this section and the Summary Description. Describe risk insights vs simply stating risk insights were applied since both staff and stakeholders will better understand the basis behind risk-informed decision making.</p> <p>If the activity is completed or suspended, note this fact with a brief description or a reference to an ADAMS ML# that documents completion or suspension of the activity. If the activity was completed last year and completion was published on the website, consider deleting this activity and it will be moved to the completed website page.</p>
