

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
REGION III  
2443 WARRENVILLE ROAD, SUITE 210  
LISLE, ILLINOIS 60532-4352

July 5, 2019

Mr. Jon Thoreson, CNMT  
Nuclear Diagnosis, Inc.  
P.O. Box 3371  
Springfield, MO 65808

SUBJECT: CHANGES TO FEE CATEGORIES AND PROGRAM CODES  
BASED ON THE 2019 FEE RULE

Dear Mr. Thoreson:

On May 24, 2019, the U.S. Nuclear Regulatory Commission (NRC) amended Title 10 of the *Code of Federal Regulations* (10 CFR) Sections 170.31 and 10 CFR 171.16 as a result of the final 2019 fee rule, to add new subcategories for seven fee categories. Generally speaking, 10 CFR 170.31 and 10 CFR 171.16 assign the same fee to each licensee in the fee category, regardless of the number of locations of use that are authorized on the license. However, for some of these fee categories, the NRC staff determined that additional resources are required for licenses with six or more locations of use compared to licenses in the same fee category with fewer than six locations.

The NRC revised its fee categories to include new subcategories, to more accurately reflect the cost of services provided by the NRC. This change resulted in subcategories for each of the seven fee categories listed below, based on the number of locations of use (e.g. subcategories for 1–5, 6–20, and more than 20 locations of use):

- Medical licenses under fee category 7.C.

The final 2019 fee rule may be found on the NRC's public website at the following address:  
<https://www.nrc.gov/about-nrc/regulatory/licensing/fees.html#fee>

In addition, the NRC staff has developed new program codes for these new fee subcategories. The enclosure to this letter includes a crosswalk that maps the new program codes to the new fee subcategories.

Based on our review of the Location of Use license condition (typically Condition No. 10) on your license, we have determined that you have six or more locations of use and that your fee category and program code will change. Based on the information currently specified on your license, your fee category and program code will change from Fee Category 7C to 7C(1) and Program Codes 02220 and 02121 to 04820 and 04812. Location of use has been defined as the following:

1. An individual building or facility at one address.

2. A contiguous licensee-controlled geographic area, such as a campus or licensee owned/operated/controlled business campus or park, is considered a single "location of use" and only one address is listed on the license. Sites that are not contiguous but are located in separate parts of a city, different city or state, are separate "locations of use" and separate addresses are listed on the license.
3. A temporary job site is not a "location of use." In addition, use of licensed materials at sea or on board a ship may be a separate location, specifically listed on the license, if it is a permanent job site. If use at sea is not a permanent location but is a temporary job site, then it is not a separate location and its address will not be listed on the license.

If the locations of use currently listed on your license are not accurate and need to be revised, please submit the new information regarding each location of use. Your license may be amended accordingly based on the information you provide. If you have any questions concerning this change, please contact Erin Kennedy at 630-829-9876 or [erin.kennedy@nrc.gov](mailto:erin.kennedy@nrc.gov).

In accordance with 10 CFR 2.390, a copy of this letter and its enclosure will be available electronically for public inspection in the NRC's Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC's website at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

*/RA/*

Patricia J. Pelke, Chief  
Materials Licensing Branch  
Division of Nuclear Materials Safety

License No. 24-17561-01  
Docket No. 030-12966

Enclosure:  
As stated

cc w/encl: Charles A. Hillis, Sr., CNMT,  
Radiation Safety Officer

Letter to Jon Thoreson from Patricia J. Pelke dated July 5, 2019.
