Subject: ERM sampling location at Pohakuloa Training Area
Date: Monday, June 3, 2019 9:57:06 AM

Dr. Cherry,

Hello, I am the license project manager for SUC-1593. Richard Chang forwarded me your email and I look forward to speaking with you.

Thank you for your willingness to address public concerns related to the PTA sampling location. I would like to note that NRC staff believes that sampling locations within the PTA Site Specific Environmental Monitoring Plan are protective of public health and safety (otherwise we wouldn't have approved it).

One thing I would like to confirm is that this would be a permanent change to the PTA Site Specific Environmental Monitoring Plan? Not a one-off sampling event?

Furthermore, we would like to set up a call with you in the next couple of weeks to discuss this and some of Dr. Reimer's other recent correspondence as well as give you the status of the outstanding license amendment requests. Please let me know when a good time is that Steve and I can give you a call to discuss.

Thank you,

Priya Yadav, P.E.

I guess I should have included it is OK with the PTA commander and deputy commander. Sorry about that.

CLASSIFICATION: UNCLASSIFIED

All,

If it's determined to abide Dr. Reimer's request to relocate the sampling site, I am willing to support. I have the RCAs clearly marked and can navigate PTA ranges with ease.

Please advise.

V/r,

Myranda Spear TSP, CSHO, SSH, (Gen. & Const. Ind.) RSO.

Subject: ERM sampling location at Pohakuloa Training Area

Mr. Chang,

If the NRC would like to put to rest Dr. Reimer's distress about current subject location, I am willing to stipulate that Dr. Reimer can select whatever location he wants to replace the current location as long as it meets the three criteria in the license plus one more:

1. It is outside the RCA.
2. It is outside all UXO areas.
3. It is inside PTA boundaries.
4. Access to it may be safely made.

You (or the license project manager) can offer that to him without my (representing the Army) objection. After the license is accordingly amended, we would begin sampling the Reimer location, but no other location.

Then you would have one fewer problem with him.

Of course, I prefer to leave the location where it is.

Bob
