SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 42-32507-01

By letter dated April 16, 2019, you informed the U.S. Nuclear Regulatory Commission (NRC) that you wished to terminate your NRC radioactive materials license. The letter dated April 16, 2019 stated that radioactive material had been transferred to your material license issued by the State of Texas (L04460 Amendment 132) and to the manufacturer.

The supporting documentation to the letter also provided a copy of the latest leak test results, survey report, and source transfer documentation. The leak test results document that there was no evidence of leakage of radioactive material from the sealed source. The NRC staff has reviewed the supporting documentation to your letter dated April 16, 2019. Based on the documentation submitted and a review of your historical file, the staff concluded that all licensable radioactive material has been removed from the facilities and the facilities located at: 2637 Belknap Avenue, Billings, Montana, 59101; and 401 S. 23rd Street, Billings, Montana, 59101, are suitable for unrestricted use in accordance with 10 CFR 20.1402, "Radiological Criteria for Unrestricted Use." Based on these conclusions, no further remediation or actions with respect to NRC regulated material is required.

Please find enclosed Amendment No. 18 to License No. 42-32507-01 authorizing your license termination. An environmental assessment for this action is not required since this action is categorically excluded under 10 CFR 51.22, as applicable.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.
