RE: Termination of Providence Hospital Radioactive Materials License # 08-01728-01

Dear Mr. Gallaghar:

I am writing to inform you that, to the best of my knowledge, Providence Hospital's last use of the radioactive material Iodine-125 was in August of 2004. Additionally, based on my investigation, I believe that Providence Hospital has not used any other radioactive material within the same category of radioactivity or half-life duration as Iodine-125 since August 2004. Enclosed please find relevant supporting documentation of surveys, disposal receipts, and a copy of the license.

Additionally, you asked what Terrie Trimmer's position was with Providence Hospital so that you could document it in your records. I have confirmed that she was a director of radiology.

If you require further information to terminate Providence Hospital's Radioactive Materials License # 08-01728-01, please contact me at 314-733-8902 or at Tamarah.Duperval-Brownlee@ascension.org. Thank you for your time and attention to this matter.

Sincerely,

Tamarah Duperval-Brownlee, MD
President and Chief Executive Officer
