Subject: Salem 1 & 2, Hope Creek - Acceptance Review: Changes to Emergency Plan Staffing (EPID: L-2019-LLA-0145)

Mr. Duke,

By letter dated, July 8, 2019, (ADAMS Accession Number ML19189A316), PSEG Nuclear LLC (PSEG) submitted a license amendment request for Hope Creek Generating Station and Salem Generating Station Units 1 and 2. The proposed changes would revise certain Emergency Response Organization (ERO) positions for the facilities listed with the minimum staff ERO guidance specified in the "Alternative Guidance for Licensee Emergency Response Organizations."

The NRC staff has reviewed your application and concluded that it does provide technical information in sufficient detail to enable the NRC staff to complete its detailed technical review and make an independent assessment regarding the acceptability of the proposed amendment in terms of regulatory requirements and the protection of public health and safety and the environment. Given the lesser scope and depth of the acceptance review as compared to the detailed technical review, there may be instances in which issues that impact the NRC staff's ability to complete the detailed technical review are identified despite completion of an adequate acceptance review. If additional information is needed, you will be advised by separate correspondence.

The NRC staff has estimated that this licensing request will take approximately 160 hours to complete. The NRC staff expect to complete this review in approximately 12 months, which is July 2020. If there are emergent complexities or challenges in our review that would cause changes to the initial forecasted completion date or significant changes in the forecasted hours, the reasons for the changes, along with the new estimates, will be communicated during the routine interactions with the assigned project manager.

These estimates are based on the NRC staff's initial review of the application and they could change, due to several factors including requests for additional information, unanticipated addition of scope to the review, and review by NRC advisory committees or hearing-related activities. Additional delay may occur if the submittal is provided to the NRC in advance or in parallel with industry program initiatives or pilot applications.

If you have any question, please contact me, James Kim, at James.Kim@nrc.gov or 301-415-4125.
