## Submitter Information

**Name:** Kyle Gould

---

## General Comment

Hello, my name is Kyle Gould and I am a concerned citizen from New York State.

I'm writing to demand that the U.S. Nuclear Regulatory Commission continue collecting and sharing data regarding transportation and packaging of materials. Nuclear material is especially hazardous due its extreme radioactivity, so special precautions must be made to make sure that the packaging is secure and transportation is safe. This also includes making sure that there is data collected to make sure that proper procedure is followed. This means following the procedures laid out by the Resource Conservation and Recovery Act for waste and that any and all material must be supplied with a material safety data sheet. All material must also be recorded during receiving as well to make sure that the RCRA Section C regulations are enforced.

Kyle Gould
