SUMMARY

The U.S. Nuclear Regulatory Commission (NRC) continued monitoring the licensee's performance by conducting an Emergency Preparedness Biennial Exercise inspection at Point Beach Nuclear Plant, Units 1 and 2 in accordance with the Reactor Oversight Process. The Reactor Oversight Process is the NRC's program for overseeing the safe operation of commercial nuclear power reactors. Refer to <https://www.nrc.gov/reactors/operating/oversight.html> for more information.

List of Findings and Violations

No findings or violations of more-than-minor significance were identified.

Additional Tracking Items

None.

INSPECTION SCOPES

Inspections were conducted using the appropriate portions of the inspection procedures (IPs) in effect at the beginning of the inspection unless otherwise noted. Currently approved IPs with their attached revision histories are located on the public website at <http://www.nrc.gov/reading-rm/doc-collections/insp-manual/inspection-procedure/index.html>. Samples were declared complete when the IP requirements most appropriate to the inspection activity were met consistent with Inspection Manual Chapter (IMC) 2515, "Light-Water Reactor Inspection Program - Operations Phase." The inspectors reviewed selected procedures and records, observed activities, and interviewed personnel to assess licensee performance and compliance with Commission rules and regulations, license conditions, site procedures, and standards.

REACTOR SAFETY

71114.01 - Exercise Evaluation

Inspection Review (IP Section 02.01-02.11) (1 Sample)

The inspectors evaluated the Biennial Emergency Plan Exercise. On June 11, 2019, the exercise scenario simulated an event at the Point Beach Nuclear Plant that initiated with the declaration and notification of an Unusual Event in response to a dropped fuel transfer cask damaging the spent fuel pool (SFP) liner, resulting in SFP leakage and rising radiation levels in the area of the SFP. The scenario conditions simulated the escalation of the significance of the event, requiring the declaration of an Alert, Site Area Emergency, and then a General Emergency, as well as the development of Protective Action Recommendations that were communicated to the required state and local government agencies.

71114.08 - Exercise Evaluation Scenario Review

Inspection Review (IP Section 02.01 - 02.04) (1 Sample)

The inspectors reviewed and evaluated the proposed scenario for Biennial Emergency Plan Exercise on May 9, 2019.

OTHER ACTIVITIES – BASELINE

71151 - Performance Indicator Verification

The inspectors verified licensee Performance Indicators submittals listed below:

EP01: Drill/Exercise Performance (IP Section 02.12) (1 Sample)

July 2018 - March 2019

EP02: ERO Drill Participation (IP Section 02.13) (1 Sample)

July 2018 - March 2019

EP03: Alert & Notification System Reliability (IP Section 02.14) (1 Sample)

July 2018 - March 2019

INSPECTION RESULTS

No findings or violations were identified.

EXIT MEETINGS AND DEBRIEFS

The inspectors verified no proprietary information was retained or documented in this report.

- On June 13, 2019, the inspectors presented the Emergency Preparedness Biennial Exercise inspection results to Robert Craven and other members of the licensee staff.
