General Comment

How many people downwind of TMI suffered hypothyroid or related thyroid issues after 1979? What health surveys were carried out to discover any surges in cancer downwind and in the area around TMI? Why were local, state, federal and industry spokespersons telling that people were safe, that there was no danger, when in fact, there was great danger? Why did it take 20 years or more before some of the facts and evidence about the dangers, and the lies, surface? Who suppressed information and why?
