RE: Homestake Mining Company's (Homestake) Water Use Report Letter of Information No. 698 for June 2019

Dear Mr. Burrus,

This information is relative to files 1605 and B-28 for June 2019.

On June 24, 2019 the meter readings for Deep Well #1 (B-28-S), Deep Well #2 (B-28-S-1) and well 951R (B-28-POD1340) were 541,737,984, 677,135,000 and 847,331,000 gallons, respectively. Only well Deep Well #2 had water usage this month. Monthly meter readings and volumes of water usage are presented in Table 2.

Metered gallons of 21,523,560 [total water injected] or 66.1 acre-feet (see next to last column in Table 1) were injected into wells in the San Mateo alluvial aquifer and the Upper and Middle Chinle aquifers, all located in Sections 26, 27, 28, 34 and 35 T12N, R10W and Section 3 T11N, R10W. As stated in Permit No. 1605 and B-28 Temp, Homestake requests return flow credits for water that is returned to underground aquifers. A portion of this injected water was shallow aquifer water treated by reverse osmosis and zeolite.

A monthly total of [industrial diversion] 28,861,792 metered gallons or 88.6 acre-feet (see tenth column in Table 1) of water were pumped from Homestake's production wells, of which 21,523,560 metered gallons [total water injected], were returned to the Bluewater underground water basin. Metered water used for industrial purposes was [industrial consumption] 7,338,232 gallons or 22.5 acre feet for June.

Thank you very much for your time and attention, if you have any questions regarding the foregoing information, I can be reached at 505-238-9701.

Respectfully,

David W. Pierce
