NOTE TO:

- V. Benarova, Chief, Auxiliary and Power Conversion Systems Branch
- G. Lainas, Chief, Containment Systems Branch
- T. Ippolito, Chief, Electrical Instrumentation and Control Systems Branch
- T. Novak, Chief, Reactor Systems Branch
- P. Check, Chief, Core Performance Branch
- C. Beltemes, Chief, Quality Assurance
- J. Knight, Chief, Mechanical Engineering Branch
- D. Bunch, Chief, Accident Analysis Branch
- L. Sulman, Chief, Hydrology - Meteorology Branch

THREE MILE ISLAND, UNIT 2 SER

We have very recently received Amendment 42 to the TMI-2 PSAR, and expect to receive Amendment 43 on July 15, with advance copies several days earlier.

I have been discussing with the individual reviewers the contents of these amendments in an attempt to assure issuance of the SER with minimum open items, and they have been most cooperative.

In order to make the current SER schedule, however, I will need revisions to your SER inputs covering Amendments through 43 by July 22 at the latest. Inputs covering earlier amendments are requested by July 14.

The expected content of Amendment 43 includes the following:

1. High energy line failure analysis completion - APCSB
2. LPI and CS pump NPSH analysis - RSB, CSB
3. LPI - crossconnect and manual actions - RSB
4. Qualification of safety-related display instrumentation - EICSB
5. NSCCW swing pump - EICSB
6. Control building ventilation - APCSB
7. Control rod scram time information - QA, CSB
8. Containment purge and valve information - CSB, MEB
