

April 25, 1979

Dear Sir:

My name is Delores Moore and I am a Junior attending Rogers High School in Wyoming, Michigan. I am writing you to express my feelings toward Nuclear Energy and also to ask about your views toward Nuclear Energy.

In my opinion I feel that there should be a waiting period on the building of any new Nuclear Power Plants until the problems of the waste and the cost are solved. I also feel that Nuclear Energy should be banned altogether if the chance of death, birth defects, and cancer are greater in the areas surrounding the plants. As I get older and at the age where I will soon be married with a family of my own I do not want them to have to grow up with a birth defect because of Nuclear Energy.

I would like to ask you a couple of question concerning Nuclear Energy.

1. Are the chances of miscarriages, birth defects, and death in the areas of the Nuclear Power Plants greater?
2. Has the recent accident at the Three Mile Island Plant caused the congress to go along with Senator Levin's proposal to stop all plans of the building of new plants?
3. What is being done to find better ways of taking care of nuclear waste

Thank you very much for you time.

Sincerely yours,

Delores Moore

(Miss) Delores Moore
