Docket No. 50-320

MEMORANDUM FOR: S. A. Varga, Chief, Light Water Reactors Branch No. 4,
Division of Project Management

FROM: C. J. Heltemes, Jr., Chief, Quality Assurance Branch,
Division of Project Management

SUBJECT: REVIEW OF METROPOLITAN EDISON COMPANY'S AMENDMENT FOR
QA TO THREE MILE ISLAND, UNIT NO. 2, NUCLEAR POWER
STATION FSAR

The Quality Assurance Branch has performed a review and evaluation of the information submitted by Metropolitan Edison Company for the Three Mile Island Unit No. 2 Nuclear Power Station FSAR in Amendment 61 dated December 16, 1977. As a result of our review and evaluation of Amendment 61, we conclude that this change relative to the QA program, satisfies our requirements. We therefore find the quality-related changes described in Amendment 61 acceptable for the operational phase of Three Mile Island Unit No. 2. This amendment does not warrant a change to the QA section of the SER.
