Docket Nos. 50-239
and 50-320

OCT 28 1970

Mr. Timothy Atkeson, General Counsel
Council on Environmental Quality
722 Jackson Place, NW
Washington, D. C. 20006

Dear Mr. Atkeson:

I am pleased to provide the Council with ten copies of the enclosed environmental report and errata sheet filed by the Metropolitan Edison Company with its letter dated October 1, 1970, on the environmental considerations under the National Environmental Policy Act relating to the operating license stage for the Three Mile Island Nuclear Station Unit 1. A provisional construction permit for Unit 2 was issued in November 1969, but information concerning Unit 2 is included in the environmental report for informational purposes.

This report has been prepared by the applicant at our request under our revised statement of policy on implementation of the National Environmental Policy Act which was forwarded to Mr. Train on May 28, 1970. A notice of the availability of the report and request for comments from State and local agencies has been sent to the Office of the Federal Register for filing and publication (copy enclosed). A request for comments also has been sent to those applicable Federal agencies specified in the Council's memorandum of June 3, 1970.

After we have received the comments from Federal, State, and local agencies, we will prepare a detailed environmental statement, including, where appropriate, a discussion of any problems or objections raised and the disposition thereof, and forward copies of the statement to the Council.

Sincerely,

(Signed) H. L. Price

Harold L. Price
Director of Regulation
