AUG 4 1975

Docket No: 50-320

Note to: C. Ferrell, AAB
THRU: R. W. Houston, Chief, ISEP, RL

We have evaluated the site suitability information submitted by the Metropolitan Edison Company, regarding population distribution, road network, and land use factors within the proposed low population zone for the Three Mile Island Nuclear Station, Unit #2 in connection with emergency planning. We have not identified any factors in this review which would change our findings as detailed at Section 13.2 of the Safety Evaluation Report for Unit 1 (Docket 50-289) dated July 11, 1973.
