CUMBERLAND, DAUPHIN, and PERRY COUNTIES)

2001 NORTH FRONT STREET BLDG. #2 SUITE 221 HARRISBURG, PENNSYLVANIA 17102 Staff Telephone 234-2639

August 4, 1976

Mr. William H. Regan, Jr., Chief Environmental Projects Branch 3 Division of Site Safety and Environmental Analysis United States Nuclear Regulatory Commission Washington, D. C. 20555

Subject: Draft Supplement to the Final Environmental Statement Three Mile Island, Nuclear Station, Unit 2; Metropolitan Edison Co. and others; Nuclear Regulatory Commission; Docket No. 50-320

Dear Mr. Regan:

We have received the "Draft Supplement to the Final Environmental Statement" noted above, and dated July, 1976.

The Commission has found that the Environmental Statement, as prepared in accordance with the statement of general policy and procedure on implementation of the National Environmental Policy Act of 1969, as set forth in the Commission's regulations in 10 CFR Part 51, considers many aspects of the environment as required. Further, the Commission can only concur in general with the contents of the statement since the Commission does not have the expertise to review the technical aspects of this statement.

Further, the Commission is pleased to find that consideration has been given to historic sites, national landmarks, existing land use, recreational use and overall safety. Related to the last, we have noted comments of other agencies on the protection of the plant from flooding. The Commission believes that such protection should be verified as adequate. Another concern of the Commission is the protection from accidents relating to radioactive materials in transportation and in use or storage.

Very truly yours,

Charles M. Ruth, Chairman 23 148

10.20
