Subject: R. E. Ginna Nuclear Power Plant: Acceptance Review: Relief Request Associated with Inservice Program for the Sixth Ten-Year Interval -I6R-02 (EPID: L-2019-LLR-0071)

By letter dated June 27, 2019 (Agencywide Documents and Access Management System (ADAMS) Accession No. ML19178A013), Exelon Generation Company, LLC (the licensee) submitted Relief Request Associated with Inservice Inspection Program for the Sixth Ten-Year Interval of R. E. Ginna Nuclear Power Plant. Pursuant to 10 CFR 50.55a(z)(1), the licensee proposed an alternative for I6R-02 on the basis that use of the alternative provides an acceptable level of quality and safety. The sixth inservice interval will begin on January 1, 2020 and scheduled to end December 31, 2029.

The NRC staff has reviewed your application and concluded that it does provide technical information in sufficient detail to enable the NRC staff to complete its detailed technical review and make an assessment regarding the acceptability of the proposed amendment in terms of regulatory requirements and the protection of public health and safety and the environment given the lesser scope and depth of the acceptance review as compared to the detailed technical review, there may be instances in which issues that impact the NRC staff's ability to complete the detailed technical review are identified despite completion of an adequate acceptance review. If additional information is needed, you will be advised by separate correspondence.

Based on the information provided in your submittal, the NRC staff has estimated that this request will take approximately 180 hours to complete. The NRC staff expects to complete this review in 12 months, which is June, 2020. If there are emergent complexities or challenges in our review that would cause changes to the initial forecasted completion date or significant changes in the forecasted hours, the reasons for the changes, along with the new estimates, will be communicated during the routine interactions with the assigned project manager.

These estimates are based on the NRC staff's initial review of the application and they could change, due to several factors including requests for additional information, unanticipated addition of scope to the review, and review by NRC advisory committees or hearing-related activities.
