July 26, 2019

Mr. Bryan C. Hanson
Senior VP, Exelon Generation Company, LLC
President and CNO, Exelon Nuclear
4300 Winfield Road
Warrenville, IL 60555

SUBJECT: BRAIDWOOD STATION, UNITS 1 AND 2—NOTIFICATION OF AN NRC
BIENNIAL LICENSED OPERATOR REQUALIFICATION PROGRAM
INSPECTION AND REQUEST FOR INFORMATION

Dear Mr. Hanson:

In a telephone conversation on July 23, 2019, between Mr. R. Baker, Senior Operations Engineer, the U.S. Nuclear Regulatory Commission (NRC) lead inspector for this inspection, and Mr. Kevin Hegarty, Operations Continuous Training Lead, final arrangements were made for the NRC to inspect the licensed operator requalification program at the Braidwood Station. The inspection is planned for the week of August 19, 2019, which coincides with your regularly scheduled requalification examination cycle. The staff at your facility should prepare and conduct the requalification examinations in accordance with your NRC-approved requalification program.

In accordance with Title 10 of the *Code of Federal Regulations* (CFR), Part 55.59(c), the NRC may request facility licensees to submit their biennial comprehensive requalification written examinations and annual operating tests as necessary to support the NRC's inspection program needs. To assist in minimizing the impact that the inspection has on the site and to ensure a productive inspection, we have enclosed a request for documents needed for the inspection. Please furnish the items listed in the first group of the attached enclosure, needed to support the in-office inspection activities, to the NRC by August 12, 2019. Please have the items listed in the second group of the attached enclosure available for the inspectors during the onsite portion of the inspection activities. Mr. Hegarty has been advised of this request.

Thank you for your cooperation in this matter. If there are any questions regarding either the inspection, or the material requested in the enclosure, please contact me at 630-829-9871 or via e-mail at Randal.Baker@nrc.gov.

This letter does not contain new or amended information collection requirements subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.). Existing information collection requirements were approved by the Office of Management and Budget, Control Number 3150-0011. The NRC may not conduct or sponsor, and a person is not required to respond to, a request for information or an information collection requirement unless the requesting document displays a currently valid Office of Management and Budget Control Number.

This letter and its enclosure will be available for public inspection and copying at <http://www.nrc.gov/reading-rm/adams.html> and at the NRC Public Document Room in accordance with 10 CFR 2.390, "Public Inspections, Exemptions, Requests for Withholding."

Sincerely,

/RA/

Randal D. Baker, Senior Operations Engineer
Operations Branch
Division of Reactor Safety

REQUESTED INFORMATION TO SUPPORT LICENSED OPERATOR REQUALIFICATION PROGRAM AND LICENSED OPERATOR PERFORMANCE INSPECTION (IP 71111.11)

Please provide the following information on a CD/DVD, if possible, by **August 12, 2019**.

1. One complete version of a biennial requalification written examination administered during the training cycle.
2. Ten (10) job performance measures (JPMs) and four (4) simulator scenarios associated with an annual requalification operating test required by Title 10 of the *Code of Federal Regulations*, Part 55.59(a)(2). The JPMs and scenarios to be reviewed should include those that will be observed during the onsite portion of this inspection, with any remaining JPMs and scenarios selected from other weeks within the same training cycle.
3. Complete versions of the reference materials used to develop the administered written examinations and operating tests. (Refer to ES-201 Attachment 3, Reference Material Guidelines for Initial Licensing Examinations, for additional examples and clarification.)
4. A list (or lists) of licensee-identified issues associated with licensed operator errors or other licensed operator performance problems which have occurred in the actual plant/main control room since the last biennial requalification program, their associated corrective actions, and if these issues were incorporated into requalification training. (These issues are likely documented in condition/problem identification reports, licensee-conducted audits and assessments, and in industry operating experience reports, etc.)
5. Facility licensee procedures for licensed operator requalification training and examination, including examination security procedures.
6. A schedule of the licensee's examination activities during the onsite inspection week.

Please have the following information available for U.S. Nuclear Regulatory Commission review on **August 19, 2019**.

1. Spreadsheets and/or test outlines which show the usage of written examination questions, JPMs, and simulator scenarios.
2. Licensed operator pass/fail statistics for any U.S. Nuclear Regulatory Commission-required requalification examinations that have been completed.
3. An overall schedule of the facility licensee's requalification program since the last biennial inspection (cycle weeks, training topics, etc.).
4. A list and descriptions of any examination security problems since the last biennial inspection (likely documented in training department condition/problem identification reports).
5. Records for licensed operator requalification training attendance, licensed operator performance in requalification, licensed operator remedial training, individual licensed operator medical records, and records for maintaining an active license and license re-activation.
6. Simulator testing, maintenance, modification, and performance records. Simulator corrective action records, including lists of open/closed simulator deficiencies, and corrective actions taken.
