Director of Nuclear Reactor Regulation
Attention: Mr. Robert W. Reid, Chief
Operating Reactors Branch No. 4
Division of Operating Reactors
United States Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Reid:

This letter transmits a revised technical specification proposal for the Davis-Besse Nuclear Power Station, Unit No. 1. Attachment 1 of Toledo Edison's letter of July 27, 1979 (Serial No. 529) proposed changes in the surveillance requirements for steam generator tube inspections. As a result of recent discussions with your staff, a more detailed proposal has been developed and is attached for your consideration. This revision does not constitute a change in the basic proposal so the safety evaluation remains as previously submitted.

Yours very truly,

Lowell E. Roe/coj
