EVENT DESCRIPTION AND PROBABLE CONSEQUENCES ⑩

| 0 | 2 | Coil for relay A71-K25 in panel H11-P623 was found to not energize with voltage across

| 0 | 3 | it while performing the RWCU auto isolation LSFT. This relay indirectly closes the

| 0 | 4 | RWCU pump suction valve which allows running of either RWCU pump when no non-regenera-

| 0 | 5 | tive heat exchanger high temperature signal is present. The unit was shutdown, so

| 0 | 6 | RWCU was not required at the time. This is a non-repetitive occurrence.
