H. Peter

DOCKET NUMBER  
PROPOSED RULE PR - Misc. Notice  
Reg. Guide

June 27, 1979

Secretary of the Commission  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Attn: Docketing & Service Section

Sirs:

In reviewing Task RH-802-4, "Calculational Models for Estimating Radiation Doses to Man from Airborne Radioactive Materials Resulting from Uranium Milling Operations--For Comment," I noted a few errors in the assignment of units in tables.

In Table 1, page 29, the particle size is shown as being in units of (mm). I believe that should be units of microns ( $\mu\text{m}$ ). In Table 3, page 31, the Inhalation Dose Conversion Factors are shown to be in units of mrem/yr per pCi/m<sup>2</sup>. I believe that should read mrem/yr per pCi/m<sup>3</sup>.

Sincerely,

*Judd M. Sills*
