DOCKET NUMBER  
PROD. & UTIL. FAC. 50-466

To Whom It May Concern:

I am petitioning the Secretary of the Commission to halt the licensing of the Allens Creek Nuclear Power Plant because

- 1) concerned scientists agree that a nuclear power plant accident is inevitable ~~the more~~
- 2) even if an "accident" never ~~occurs~~ <sup>occurs</sup>, the low level ~~to~~ radiation that all plants in operation put out is dangerous.
- 3) scientists have not yet discovered any way safely dispose of nuclear waste
- 4) the proposed site is too near a heavily popu-

lated area.

I live within 25 miles of the proposed site. I have never intervened before, but after reading on the subject of nuclear energy, I feel obligated to speak out on its dangers. I would like to be full party to the licensing process.

Thank you.

Sincerely,

Kathryn Otto
