Mr. Sol Levine
Office of Nuclear Regulatory Research
Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Levine:

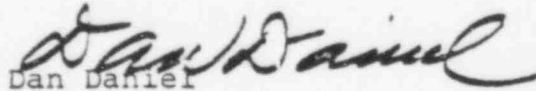

We have recently been contacted by Approach Fish, Inc., Route 1, Box 620B, Ringgold, Virginia, with reference to a patented "kite anemometer" in which this company has an interest, which they state can be used to measure radiation levels on a continuing basis.

We have no knowledge of the effectiveness of this equipment but can conceive there might be a need for this or something similar.

We are enclosing information provided to us and your Agency's reaction will be very much appreciated.

With kind regards and best wishes,

Very sincerely,

Dan Daniel
